Vistula, where they were supported by the Russians, who now came up in great strength. Several bloody actions took place during the depth of winter, in which the French discovered the sturdy nature of the new antagonist with which they had to deal, and in a pitched battle fought at Eylau, on Feb. 9, 1807, the French emperor was defeated with the loss of 30,000 men. But ere long he had his revenge. Having gathered up all his reserves, and collected 150,000 men round his standard, he attacked the Russians, in June, 1807, and after several bloody actions, defeated them in a pitched battle at Friedland, on July 14. The result of this triumph was the treaty of Tilsit, which virtually destroying all lesser powers, in effect divided the whole continent of Europe between Napoleon and Alexander. Insatiable in ambition, Napoleon had no sooner achieved that great victory over his northern enemies than he turned his eyes to the Spanish Peninsula, seized on Portugal, without a shadow of a pretext, and decoyed the king, queen, and heir apparent of Spain to Bayonne, where what, between threats, treachery, and cajolery, he succeeded in extracting from them all a renunciation of the throne of Spain, upon which he immediately placed his own brother, Joseph, and at the same time gave the throne of Naples to his brother-in-law, Murat. About the same time he put in force the famous Berlin and Milan decree, intended to exclude the English permanently from the whole trade of continental Europe. His abominable treachery to the Spanish royal family lighted up a frightful war in the Peninsula, which at first was attended with surprising success. Dupont surrendered with 25,000 men to Castanos, in Andalusia. Portugal was recovered by Wellington, and the French were obliged to retire behind the Ebro. But Napoleon was at hand to repair the disaster. Directing his whole reserves from Germany to Spain, he entered Navarre at the head of 200,000 men, defeated the Spaniards in several battles, retook Madrid, and pursued the English under Sir John Moore into Galicia, where, though they gained at the eleventh hour a glorious victory at Corunna over Soult and Ney, they were forced to embark and return to England, weakened by a third of their numbers, and having lost the whole objects of the campaign. Austria deemed the moment favorable when the chief forces of Napoleon were immersed in the Peninsula to endeavor to regain some of her lost provinces. She declared war accordingly in May, 1809, and advanced with 100,000 men into Bavaria, where the archduke Charles at first gained considerable success. But Napoleon fled to the spot, defeated the Austrians in three pitched battles, and treacherously gaining possession of the bridge of Vienna, made himself master of that capital. He sustained, however, a severe check soon after from the archduke Charles at the battle of Aspern, who defeated him with the loss of 30,000 men, and brought him to the very verge of ruin. He recovered himself, however, and having collected 150,000 men in Vienna, threw six bridges in one night over the Danube, and defeated the Austrians in a pitched battle which lasted two days, on the field of Wagram. This triumph won for France the peace of Presburg, which deprived Austria of a fourth of her dominions, and for Napoleon the hand of the archduchess Maria Louisa, daughter of the emperor of Austria. He had previously been declared emperor of France in 1804, and divorced Josephine in order to make way for this splendid alliance, and as he was now recognized emperor by all the states in Europe except England, and admitted to a matrimonial connection with the

highest and proudest of them, he seemed to have arrived at the utmost limits of earthly grandeur and felicity. Nevertheless, it turned out otherwise, and his marriage proved not only the limit of his good fortune but the commencement of his decline. The emperor Alexander was personally hurt by the Austrian marriage, for Napoleon had been on terms of proposal for his own sister, and he never forgave the affront. This, coupled with the rapid strides of the French emperor in northern Europe, who had halved Prussia, and incorporated Holland, the Hanse Towns, and nearly the whole of northern Germany with his dominions, led to a rupture with Russia in 1812. The whole of 1810 and 1811 was spent by both parties in preparing for this contest, which every one saw was approaching; and at length his preparations being complete, Napoleon crossed the Niemen, and invaded Russia in May, 1812, at the head of 500,000 men, the greatest military armament of real soldiers ever seen since the beginning of the world. The Russians had not half the force to resist this crusade, and the consequence was they were driven back into the very heart of their territories. Smolensko was stormed by Napoleon in person, and in a desperate battle fought at Borodino, on Sept. 6, when 30,000 men fell on both sides, the Russians were so far wasted that they were obliged to abandon Moscow to the conqueror. But this was the extreme point of the French emperor's success. The Russians burned their ancient capital to prevent it from affording shelter to the enemy; the French reduced now by the sword, fatigue, and sickness to 100,000 men, were obliged to retreat on the wasted line of their former advance; and the cold having set in with great severity, they were attacked by the Russians on several occasions, with such success that not 20,000 escaped across the Niemen, nearly all in the last stage of exhaustion and misery. Napoleon himself abandoned his troops in the middle of their sufferings, and made his escape to Paris on a sledge accompanied only by a single attendant. This terrible and unexampled reverse, coupled with the victorious career of Wellington in the same year in Spain, who had defeated the French in a pitched battle at Salamanca, recovered Madrid, and liberated all the southern provinces of Spain from their oppressors, produced a general insurrection in Europe. Prussia took up arms; desperate battles were fought at Lutzen, Bautzen, Dresden, and other places; and at length Napoleon having made a last stand at Leipzig, the battle of Giants began on 18th Oct., 1813. 300,000 Germans and Russians commenced the attack, which 200,000 French resisted. 2,500 pieces of cannon spread destruction around, and after a bloody conflict of two days' duration, Napoleon was totally defeated with the loss of 40,000 men and 250 guns, and with difficulty brought back 60,000 of his vast army behind the Rhine. At the same time Wellington, who had totally defeated king Joseph in person at Vittoria, had crossed the Pyrenees and was threatening Bayonne, so that the French empire on all sides was crumbling into ruins. Early in the following spring, the allies invaded France along the whole course of the Rhine, while Wellington pursued his career of success in the south of France. Driven to extremities, Napoleon exerted himself to the utmost, and exhibited the most splendid military abilities. But although he gained with forces greatly inferior several important victories over the allies, he was at length overpowered. Paris was taken by the emperor of Russia and king of Prussia in person, at the head of 200,000 men. Napoleon was dethroned, and the Bourbons restored to the French throne,

and he himself banished to the Isle of Elba, where a mimic sovereignty was permitted him to console his mind after such a dreadful series of reverses. But the restless mind and ambitious spirit of Napoleon could not long rest in this state of forced seclusion. Having ascertained that discontent was universal in the French army, the natural result of their misfortune, he set out from Elba accompanied only by 600 of the old guard who had shared his exile, and landing at Cannes, marched to Paris without opposition, dethroned Louis XVIII., and re-established himself on the throne of France. He was then immediately denounced by the allied sovereigns, who set about collecting forces on his frontiers; and despairing of averting a war by negotiation, he resolved, with his usual vigor and decision, to anticipate the allies and strike the first blow. He all but succeeded. Crossing the frontier of Flanders, on the morning of the 15th June, 1815, he attacked and defeated the Prussians, 80,000 strong, under Blucher, at Ligny, and the same day sustained a bloody conflict with Wellington's advanced guard, in which he was at length routed at Quatre Bras. But two days after he met the stroke of fate. Wellington retired to and stood firm at Waterloo, where, on the 18th, he gave battle to the French, with an army nearly equal in numerical amount, but greatly inferior in artillery and the quality of part of his troops, being not more than a half of them English. A desperate battle ensued, in which both parties displayed prodigies of valor, and victory seemed long doubtful. At length the Prussians came up late in the evening, and Napoleon was by the united allied force totally defeated with the loss of 40,000 men and 150 pieces of cannon. This victory was decisive: Napoleon fled to Paris, where he was soon after forced to abdicate the throne and surrender to the English cruisers. St. Helena was assigned as the future residence of the fallen conqueror, where he was guarded with the most vigilant care by the English troops and vessels,

[Tomb of Napoleon at the Invalides.]

to whom the custody of the illustrious state prisoner was committed. He remained there fretting in inaction and loudly complaining of trifling indignities till the period of his death, which occurred on May 5, 1821. His conduct there exhibited alternately the grandeur of a noble and the littleness of a despicable man. He wrote several most able and interesting works, chiefly relating to his eventful biography, and which, not less than his long series of victories, have contributed to his colossal fame; but at the same time he fretted beyond measure at being denied the title of emperor, and attended even at a distance by English sentinels in his rides. He was magnificently treated by the English government,

who expended £12,000 a-year on his private establishment, and £400,000 yearly on the island; but his ardent spirit could not brook even supposed indignity and real inaction. His imaginary grievances, coupled with an hereditary malady, cancer in the stomach, of which his father had died, brought on a mortal distemper, of which he died on 5th May, 1821. He quitted this life during a terrible storm of wind and rain, which recalled to his mind the roar of battle. His last words were '*Tete d'armée*' (head of the army). He was interred in Slain's valley, in

[Mask of Napoleon taken after death.]

the island of St. Helena, from whence his remains were, in December, 1841, with the consent of the English government, translated to Paris, where on the 15th of that month they were interred in a mausoleum under the dome of the Invalides, and now repose beside the bones of Turenne and Vauban, the paladins of France.

[A.A.]  
NAPPER-TANDY. See TANDY.

NARBONNE, the viscounts of, distinguished for any particular merits, are,—AYMERI, died in the Holy Land beginning of the 12th century. AYMERI II., perished in Arragon, on his way to join Alphonso against the Moors, 1134. ERMENGARDE, famous for the wise administration of her government, abdicated in favor of her nephew 1192, died 1197. PIERRE DE LARA, nephew and successor of the preceding, abdicated in favor of his son 1194, died 1202. AYMERI III., son and successor of the preceding, subdued by Simon de Montfort, who took the title of duke of Narbonne, died 1239. AYMERI IV., or AMELRIC I., son and successor of the latter, died 1270. AYMERI V., son and successor of the preceding, and his successor in the government, 1270, died 1298. AYMERI VI., or AMELRIC II., son and successor of the preceding, commander of the troops of Florence for Charles II., king of Sicily, died 1328. AYMERI VII., his son, who succeeded him, died 1336. AMELRIC III., son and successor of the preceding, died 1341. AYMERI VIII., brother and successor of the latter, named admiral of France by Charles V., 1369, died 1388.

NARBONNE LARA, LOUIS, Count, born at Parma, in 1755. He was minister of war under Louis XVI.; lieutenant-general of France in the third year of the revolution; and, finally, one of Napoleon's aides-de-camp during the imperial government. He attempted to defend the constitutional monarchy; and, after the 10th of August, 1792, which decided the king's fate, was outlawed by the triumphant party of the 'Mountain.' He was saved, partly by the exertions of Madame de Stael and partly by Dr.

Bollman (who subsequently withdrew Lafayette from a similar search of the ultra Jacobins), and retired to England first, and afterwards to Switzerland. Invested with military rank by Napoleon, who greatly esteemed him, he accompanied him in most of his wars with Austria, and was in the fatal Russian campaign, in 1812. In 1813 he was ambassador to Vienna, and died at the end of that year.

NARBONNE-PELET-FRITZLAR, J. F., Count De, a French officer, died 1784.

NARBOROUGH, SIR JOHN, an English naval officer, distinguished against the Dutch and Algerines, died 1688.

NARCISSUS, the freedman and favorite of Claudius, memorable for his part in the fall of Messalina: being afterwards exiled by the influence of Agrippina, he died by his own hand 54.

NARCISSUS, St., patriarch of Jerusalem, died about 216.

NARDI, JACOPO, an eminent Italian historian, was born of an ancient and noble family at Florence, in 1476. Having distinguished himself by his opposition to the Medici, he was imprisoned and exiled; and he retired to Venice, where he passed the rest of his life in the cultivation of literature. He wrote a '*History of Florence*,' the '*Life of Malespini*,' &c.; and acquired much reputation by an elegant translation of Livy. Died about 1555.

NARDIN, TH., a French merchant, 1540-1616.

NARDINI, PIETRO, one of the first violinists of his time, was born at Leghorn, in 1725; studied under Tartini; and, in 1770, went to Florence, as first violinist in the chapel of the grand-duke of Tuscany. Died 1796.

NAREG, G. DE, an Armenian ascetic, 951-1003.

NARES, JAMES, an eminent English composer and doctor of music, successor of Dr. Green as organist and composer to the king, author of a '*Treatise on Singing*,' &c., 1715-1783. EDWARD, nephew of James, a clergyman of the Church of England, 1762-1841.

NARES, ROBERT, a learned critic and theologian, was the son of the preceding, and received his education at Westminster School, and Christchurch College, Oxford. After entering into holy orders he was presented to the rectory of Sharnford, in Leicestershire; he was also chosen preacher at Lincoln's Inn, and obtained the office of assistant librarian at the British Museum. He was afterwards a prebendary of Lincoln; and at the time of his death, in 1829, he was archdeacon of Strafford, canon of Litchfield, and rector of Allhallows, London. Dr. Nares, in conjunction with Mr. Beloe, established and conducted the British Critic, a high church literary review; and among his separate works are, '*Elements of Orthoepy*,' '*A Glossary of Words, Phrases, &c., in the Works of English Authors of the Age of Queen Elizabeth*,' '*A Chronological View of the Prophecies relating to the Christ. Church*,' &c.

NARNI, J. M. DE, a Capuchin preacher, 17th century.

NARSES, the companion-in-arms of Belisarius, and one of the most successful generals of the emperor Justinian, was an Asiatic slave and eunuch, whom the latter had taken into favor and appointed to a command in 538. Between that period and 552, he put an end to the dominion of the Goths in Italy, and in 553 was himself appointed exarch, and fixed his court at Ravenna. He was deposed under the emperor Justinus II. 565, and died at Rome 568.

NARUSZEWICZ, ADAM STANISLAUS, an eminent historian and poet of Poland, who, from having made an excellent translation of the works of the

great Roman historian, obtained the appellation of the Polish Tacitus; but his fame chiefly rests on his elaborate 'History of Poland,' which he left unfinished at his death, in 1796.

NARVAEZ, PAMPHILA DE, a native of Valladolid, in Spain, who went to America soon after its discovery, and was appointed commander of the expedition against Cortez by Diego de Velasquez, governor of Cuba. He sailed, in 1528, with 400 men, intending to establish a colony in Florida; discovered the bay of Pensacola; and, having marched into the country, was never heard of more.

NARY, CORNELIUS, a catholic divine, 1660-1738.

NASELLI, F., an Italian painter, died 1630.

NASH, JOHN, a distinguished architect of the metropolis, originally a miniature painter, designer of Buckingham palace, the Brighton pavilion, the Haymarket theatre, the Regent-Street improvements, &c., 1752-1835.

NASH, FRANCIS, brigadier-general, and a distinguished soldier of the Revolutionary war. He displayed great bravery in an action with the insurgents in North Carolina in 1771, when he held the rank of captain. In 1775, the convention of North Carolina appointed him colonel, and in 1777 he was made a brigadier-general in the continental army. Was killed at the battle of Germantown, October 4th, 1777.

NASH, RICHARD, commonly called *Beau Nash*, the once celebrated arbiter of fashion at Bath, was born in 1674, at Swansea, in Glamorganshire. He was originally intended for the law, but entered the army, which, however, he soon quitted, and took chambers in the Temple. Here he devoted himself entirely to pleasure and fashion; and when king William visited the inn, he was chosen master of the pageant with which it was customary to welcome the monarch. So pleased was William with the entertainment, that he offered him the honor of knighthood, which Nash, on account of his narrow circumstances, refused. In 1704 he was appointed master of the ceremonies at Bath, an office for which he was admirably qualified by an elegant taste and uncommon vivacity. He immediately instituted a set of regulations as remarkable for their strictness as for their judicious adaptation to the wants and society of the place; and as he drew the whole beau monde to Bath, he was justly regarded as a public benefactor there. While in the plenitude of his power and popularity, Nash lived in the most splendid style, supporting his expenses by a long run of success at the gaming table. His dress was covered with expensive lace, and he wore a large white cocked hat. The chariot in which he rode was drawn by six gray horses, and attended by a long retinue of servants, some on horses, others on foot, while his progress through the streets was made known by a band of French horns and other instruments. His common title was the *king of Bath*; and his reign continued, with undiminished splendor, for more than fifty years. His health then began to decline, and his resources grew less plentiful. As the change in his spirits and circumstances became more evident, his former acquaintances gradually forsook him, and he died, in comparative indigence and solitude, in 1761. His remains, however, were honored with a splendid funeral, at the expense of the city; and an appropriate epitaph, written by Dr. Harrington, is placed over his tomb in the abbey church.

NASH, THOMAS, a dramatic writer and satirist, known as the literary antagonist of the puritan writer Marprelate, flourished about 1558-1601.

NASH, TREADWAY RUSSEL, an English divine and antiquary, was educated at Worcester College, Oxford, where he took his degree of D.D. in 1758. He was a man of fortune, and died at his seat in Worcestershire, in 1811, aged 87. Dr. Nash published collections for a history of Worcestershire 2 vols. folio; a splendid edition of Hudibras, 3 vols. 4to.; and some papers in the *Archæologia*.

NASINI, J. N., an Italian painter, 1650-1736.

NASMITH, JAMES, a divine, was born at Norwich, in 1740, and educated at Bene't College, Cambridge. He took the degree of D.D. in 1797; and his last preferment was the rectory of Leverington, in the Isle of Ely, where he died in 1808. Dr. Nasmyth published 'A Catalogue of Bene't College Library;' an edition of the 'Itineraries of Simon and William of Worcester,' 8vo.; a new edition of Tanner's 'Notitia Monastica,' &c.

NASMYTH, ALEXANDER, a celebrated painter, whose talents gave so strong and strikingly obvious an impetus to the art in Scotland, that he is not undeservedly called the father of the Scottish school of landscape painting. Those who patronized Nasmyth as a portrait painter were for the most part persons of rank and wealth; and his visits to various country seats afforded him excellent opportunities of giving his advice in landscape gardening. To that advice it is, at first generally as an amateur and in mere friendship, but subsequently as a part of his profession, that the Scottish nobility and gentry owe some of the finest of their park scenery. It may likewise be added, that to his suggestions, his native city, Edinburgh, owes not a few of the judicious changes made in her streets and buildings. B. 1757; d. 1840.

NASMYTH, PETER, an eminent landscape painter, was born at Edinburgh, in 1786. At the age of twenty he removed to London, where his talents soon attracted notice, and procured him the appellation of the English Hobbima. His works are deservedly in high repute, and there are few collections of importance in England, but what contain some of them. Died 1831.

NASSIR, EDDIN, a Persian astronomer, 1201-74.

NATALE, J., a Spanish Jesuit, who co-operated with Loyola, and became vicar-general, died 1580.

NATALI, P., a Venetian hagiographer, 14th ct.

NATALIS, M., a French engraver, died 1670.

NATHAN, a Jewish prophet, 10th cent. B.C.

NATHAN-BEN-JECHIEL, a learned rabbin, president of the synagogue at Rome, died 1106.

NATHAN, ISAAC, or MORDECAI, a learned Jewish rabbi, who, about the middle of the 15th century, published the first concordance of the Old Testament in the original tongue. This work, with considerable additions, has been several times reprinted; but little or nothing is known of the personal history of its original author.

NATHAN, NATA-SPIRA, a rabbi of the 17th ct.

NATTIER, JOHN MARK, a French artist, was born at Paris, in 1685, and died in 1766. Louis XIV. appointed him to a professorship in the academy of painting.—Another artist of this name went to Petersburg, where he died in 1763. He was an engraver of intaglios, and published a treatise on gems.

NATTIER, L., a medal engraver, died 1763.

NAU, M., a Fr. Jesuit missionary, 1631-1683.

NAUBERT, B., a German novelist, 1755-1819.

NAUDE, GABRIEL, a French physician, author of an 'Apology for Great Men Accused of Magic,' the principal argument of which is his scepticism concerning the existence of spirits, 1600-1653.

NAUDE, PHILIP, a mathematician, was born at

Metz, in 1654. Being a Protestant he retired to Berlin on the revocation of the edict of Nantes, and there became mathematical tutor to the court. He was also chosen a member of the academy in that city, where he died in 1729. He published a work on geometry, and some religious pieces. His son, who succeeded him in his professorship, was a member of the royal societies of Berlin and London, and died in 1745.

NAUDET, THOMAS CHARLES, a French landscape painter, born at Paris, in 1774; died 1810. He left a collection of near three thousand designs, comprehending the most beautiful views, and the finest monuments of ancient and modern times on the Continent.

NAUMANN, JOHANN GOTTLIEB, master of the electoral chapel at Dresden, and one of the first German composers, was born of very poor parents, in a small village near Dresden, in 1741. He received his principal instructions in music from a Swedish master, named Van Weestrom, who took him to Italy and used him in a severe and niggardly manner. Though Naumann had to struggle on amidst poverty and hardships, his industry never relaxed. He pursued his studies until he made himself one of the first musicians of his age. His compositions, which were very numerous, include works of every kind, operas, oratorios, songs, cantatas, odes, compositions for the piano-forte, symphonies, &c. For the last years of his life, he devoted himself to the composition of sacred music, and left many valuable works in the library of the chapel of Dresden. He died of apoplexy, in the year 1801.

[J.M.]

NAUNTON, SIR ROBERT, an English statesman, was born at Suffolk, and educated at Cambridge. After having been employed on some diplomatic concerns in Scotland and France, he returned to the university, and in 1601 was elected public orator, in which capacity he attracted the notice of James I., who made him master of the requests, surveyor of the court of wards, and secretary of state. His 'Fragmenta Regalia' contains many curious particulars of the court of queen Elizabeth.

NAUSEA, F., a Ger. prelate, about 1480-1552.

NAVAGERO, ANDREA, in Latin NAUGERICES, a Venetian noble, distinguished as a poet and orator, 1483-1529.

NAVAGERO, B., a Venetian cardinal, 1507-65.

NAVARETE, JUAN FERNANDEZ, a Spanish painter, surnamed El Mudo, from his being deaf and dumb, was born in 1562. He was appointed painter to the king, and his best pieces are preserved in the Escorial. From his fine style of coloring, he obtained the name of the Spanish Titian; but he was so found of introducing into his pictures a dog, a cat, or a partridge, that scarcely any of his sacred subjects even are without them. Died 1579.

NAVARETTA, FERNANDEZ, a Spanish missionary, who went to China in 1646, and was expelled at the time when the persecution there took place. He was afterwards consecrated bishop of St. Domingo, and died in 1689. He was the author of an excellent account of the political and religious condition of the Chinese.

NAVARRE, HENRY OF, the popular designation of Henry IV., king of France, was the son of Anthony of Bourbon, king of Navarre, descended in the direct male line from Robert of Clermont, fifth son of Saint Louis. He is sometimes called Henry of Béarn, from his birth-place, where he first saw the light in 1553. His mother, Jeanne D'Albret, educated him as a Calvinist, and though she im-

parted to him the full measure of her own intrepidity and intellectual superiority, it was unaccompanied with either her constancy of purpose or her domestic virtues. In 1569 she presented the young prince to the protestant camp at Rochelle, where he was hailed chief of the party—its leaders at that time being the famous Condé and Coligni. A few weeks afterwards, the battle of Montcontour deprived the Calvinists (or Huguenots as they were called) of 16,000 brave soldiers left on the field or taken prisoners, and on the 11th August, 1570, the civil wars were hushed for the time by the peace of St. Germain. This was followed by a negotiation for the marriage of Henry with the Princess Margaret, daughter of Catherine de Medici, and sister of the reigning king, Charles IX., the catholic party, however, darkly plotting the massacre of St. Bartholomew, which, in August, 1572, drowned the marriage festival in blood. Henry, who was in the power of the king, saved his life by embracing catholicism; and remaining at the French court till 1576, was imbued with its licentiousness and intriguing policy. Meanwhile the succession of Henry III., brother of Charles IX., in 1574, tended to a breach of the truce with the Huguenots, in consequence of the ambitious designs and religious hatred of the Guises, chiefs of the catholic league, and in 1576 Henry of Navarre made his escape from Paris, and rejoined the protestants, once more in arms. He now displayed all the qualities of a great commander, and some years following were occupied with military operations and negotiations for peace, in which the reigning king accumulated defeat and shame upon himself under the dictation of the duke of Guise; and the name of Henry of Navarre became identified with the protestant cause and the liberties of France. In 1585 he was excommunicated by Sixtus Quintus, and in October, 1587, obtained a splendid victory over the duke of Joyeuse at Contras. The year 1588 was signalized by the attempt of the reigning king to liberate himself from the dictation of Guise, whom in December of that year he caused to be assassinated. He then made overtures to Henry of Navarre, who joined him with his troops, and took the field against the league—their reconciliation leading to his acknowledgment as the rightful successor by Henry III., who was assassinated in August, 1589. Henry of Navarre, at the head of his protestant subjects, had now to conquer his kingdom, his opponents being the duke of Mayenne, appointed lieutenant-general by the parliament of Paris, and in alliance with him the old catholic league, the house of Savoy, the forces of Spain, and the Cardinal de Bourbon, whom Mayenne acknowledged king. Henry repulsed Mayenne at Arques in 1589, and gained the great battle of Ivry in March, 1590, but was compelled to desist from the siege of Paris, and more lately from the siege of Rouen, both these cities being relieved by his active enemy the duke of Parma. The forces of the two parties were capable of carrying on the war for an indefinite period, but neither of them could hope to obtain the superiority. So at least it seemed to their leaders, and as a consequence, in July, 1593, Henry purchased the crown by his apostasy, the catholics on their part agreeing to the toleration of the Huguenots. In 1594 he entered Paris; the principal cities of the kingdom soon submitted to him, and in the same year the Jesuits were condemned to exile in consequence of an attempt on the king's life by the fanatic John Chatel. Mayenne held out in Burgundy till 1596, and the Spaniards till 1598, when the war was concluded by the treaty of Vervins. By the edict of Nantes dated this

year, Henry secured to his protestant subjects the freedom of worship and education, and they were even allowed to occupy several fortified cities as a guarantee of its fulfilment. The remaining political events of this reign are summed up in our account of SULLY, the great minister, whose designs were often crossed by Henry's intrigues with his mistresses. The article MARIE DE MEDICI may also be consulted, that princess having been married to him on the divorce of Margaret in 1601. Henry of Navarre fell by the dagger of Ravallac, 14th May, 1610, when preparing for a political war with the house of Austria, and was succeeded by his son, Louis XIII. He was the most popular monarch that ever reigned over France, and was certainly the possessor of many high and kinglike qualities. The questionable point in his career is the compromise of his faith by the public profession of catholicism as a means of peace. Granting the sincerity of his motives, there is the question whether he ever could have had the faith of a protestant in the principles of the Bible, or the trust of a devout man in the final triumph of God's justice. On the other hand, the character of the French nation must be considered, and the adaptation of Calvinism and catholicism, respectively, to the outward habits of the French people. [E.R.]

NAVARE, M., a Spanish theolog., 1493-1586.

NAVARE, P., a native of Biscay, known as a military adventurer and engineer, died 1528.

NAYLOR, JAMES, an enthusiast of the 17th cent., was born in 1616, at Ardesley, in Yorkshire. He served eight years in the parliamentary army, and on his return home, in 1651, became converted to Quakerism by the preaching of George Fox; though at a future period, in consequence of his extravagant conduct, the more formal body of Quakers were led to disown him. Misled by imaginary inspiration, he soon distinguished himself among those of kindred sentiments, both in London and other places, until, in 1656, he was committed to Exeter gaol, for propagating his opinions. On his release from imprisonment, he repaired to Bristol, where his followers formed a procession, and led him into that city in a manner which they intended to resemble the entrance of Christ into Jerusalem. He was declared guilty of blasphemy by parliament, and barbarously sentenced to a double whipping at different times, branding, boring of the tongue with a hot iron, and imprisonment and hard labor during pleasure. This sentence, though illegal, was fully inflicted upon the unhappy man, who, when the delirium of fanaticism was over, humbly acknowledged and lamented the delusion under which he had labored; and died in 1660.

NEAL, DANIEL, an eminent dissenting divine, was born in London, in 1678, and was educated at the university of Utrecht. On his return he began to officiate as a preacher, and, in 1706, succeeded Dr. Singleton as minister of a congregation in Aldersgate Street, in which connection he continued for 36 years. Although assiduous as a minister, he found leisure for literary labors, and published, among other works, a 'History of the Puritans,' 4 vols.; and a 'History of New England,' 2 vols. Died 1743.

NEAL, JOSEPH C., an American miscellaneous writer, author of the popular book entitled 'Charcoal Sketches;' died in Philadelphia, where he had been long connected with the press, 1847, aged 40.

NEAL, or NELE, T., a catholic divine, b. 1519.

NEANDER, C. F., a German poet, 1724-1802.

NEANDER, JOHANN AUGUST, the celebrated

Church Historian, was of Jewish descent, and born at Göttingen, 13th January, 1789. Having been placed in Hamburg to attend the classical schools of that town, he was introduced, during his residence, to the acquaintance of several Christian families, by whose conversation, as well as the religious works put in his way, he early renounced Judaism, and embraced the Christian faith. In token of the sincerity and strength of his faith, he was publicly baptized, and, farther, assumed the name 'NEANDER,' from two Greek words signifying a new man. Having resolved to dedicate his life to the pursuits of theology, he repaired in 1806-12, to study successively at the Universities of Halle, Göttingen, and Heidelberg, and at the end of that period, the extraordinary extent of his acquirements raised him at once to the status of Professor Extraordinarius of Theology. Thence, his wide-spread fame procured his removal in a few years to the Metropolitan University of Berlin, the scene of his public labors and honors, and there he spent a life of intense devotedness to the study of Ecclesiastical History and Literature. He was a very pious as well as learned man. In all his pursuits, his animating principle was the love of Christ, and the advancement of the Redeemer's kingdom: and accordingly he was a warm supporter of Bible and Missionary Societies, to the funds of which, as well as to the cause of general charity, he frequently contributed the whole proceeds of his publications. He took the greatest interest in his students, was always ready to assist poor and meritorious young men with his counsel and his purse, and was in the habit of inviting a few of them every Saturday evening to his house, where he held a familiar and literary conversation. Neander was an interesting and most instructive lecturer. His classes were always crowded, and the hundreds of ministers, protestant, catholic, as well as of minor denominations, scattered throughout Germany, who attended his prelections, show the extent of his reputation, and the value of his literary services. From his extreme short-sightedness, as well as his fits of mental abstraction, he was rather eccentric in some of his habits. He was latterly never trusted to walk alone in the streets; a student or his sister generally accompanying him from his house to the lecture-room, and waiting at the close to conduct him home again. He was a man of warm affections, of amiable manners, and of unbounded charity. Many a poor student was indebted to him, not for gratuitous attendance on his lectures only, but for maintenance at the university; and not seldom has he been known to give all the money he had about him away, the moment an appeal was made to his benevolence. The character, as well as the writings of Neander, has exercised an extensive and beneficial influence on the religious sentiments and state of Germany. Neology found in him a stern and uncompromising, but, at the same time, a calm and judicious opponent; and perhaps none, in the modern school of evangelical divines, not even excepting Schleiermacher and Hengstenberg, have rendered such essential service in restoring his countrymen to soundness in the faith. Neander having been seized with sudden illness during the delivery of his lecture, was with difficulty conveyed home, where he lingered in great sufferings till the 14th July, 1850, when he gently fell asleep. His funeral was attended by a large concourse of citizens, many of them in the highest rank in Berlin. A funeral discourse was pronounced, in German fashion, first in his house, another address being delivered, by Dr. Krummacher, at the grave. Nean-

der's works, which are also held in high estimation in England and America, as well as in his own country, comprise several volumes. The chief of them are his 'Life of Christ,' in refutation of Strauss, his 'General History of the Church,' and his 'History of the Apostolic Church.' [R.J.]

NEANDER, M., a Germ. philologist, 1525-95.

NEANDER, M., a German physician, 1529-81.

NEARCHUS, one of the generals of Alexander the Great, who was employed in conducting his fleet from India by the ocean to the Persian Gulf. Fragments of a narrative by this early voyager are extant, and form a curious and valuable record.

NEBUCHADNEZZAR, whose name is otherwise written Nebuchadrezzar, Nabuchodonosor, &c., was a king of Assyria, who is supposed to have reigned from 669 to 648 B.C.

NEBUCHADNEZZAR, otherwise Nabopolassar, was a king of Babylonia, who united with Astyages in the conquest of Syria, and founded the second Assyrio-Babylonian empire, 626-605 B.C.

NEBUCHADNEZZAR, 'the Great,' who is the king of that name so much spoken of in Scripture, was the son and successor of the preceding. He died, after a reign of 43 years, B.C. 562.

NECHAM, NECKHAM, or NEQUAM, ALEXANDER, an English monk, who became abbot of Cirencestre, and died 1217. He is author of a great variety of works remaining in MS.

NECK, JOHN VAN, a Dutch painter, 1635-1714.

NECKER, JAMES, the famous minister at the commencement of the French revolution, was descended from a family originally German, and was born at Geneva, where his father was in practice as an advocate, 1732. Having in a few years made a handsome fortune as a banker, he became, in 1764, syndic of the French India Company, which was dissolved by the government in 1770. Necker, ambitious of rising in the public service, now made himself known as an economist by publishing, in 1773, his 'Eulogium of Colbert,' the beginning of his controversy with the economists of the school of Quesney. His next step was to forward a Memoir upon the French Finances to Maurepas, president of the Council of Finances, who persuaded Louis XVI. to appoint him to the treasury, the direction of which he retained during the five years 1776-1781. In May of the last-mentioned year he resigned, in consequence of being refused a seat in the council—the fact being that his suppression of abuses had created him many enemies at court. He then published his famous 'Compte Rendu,' in which he furnished the public with a clear statement of the condition in which he had found things, of what he had done, and what he had intended to do. The effect of this document was quite startling—it was translated into all the languages of Europe; and when the successors of Necker, Calonne and Lomenie Brienne, were compelled to retire by the disastrous state of the finances, the honest minister was recalled, and public credit began to revive again. This was on the 24th of August, 1788. On the 6th of November he summoned the old notables, who had met under Lomenie Brienne in 1787, and they remained in session till 12th December. In January of the following year the states-general were convoked, in fulfilment of the previous pledges of the government, and in May they were assembled for business. The constitution of this body was ruled by the advice of Necker, to whom therefore it was owing, that the members of the 'Tiers Etat' were equal in number to the nobles and the clergy united. This circumstance occasioned a 'dead lock,' disagreement arising on mat-

ters of form necessary to constitute the assembly, and after three weeks had been wasted in altercation, a 'Séance Royale' was resolved upon, in which instructions were to be given from the throne. The deputies being excluded from the hall while preparations were making for this sitting, held that famous meeting in the Tennis Court, presided over by Bailly, where they swore an oath to meet under all circumstances, and in all places wherever they could get together, and not to separate till they had made the constitution. The issue of the 'Séance Royale' may be read in the article MIRABEAU, add to which that Necker made a decided stand in favor of the people, resisted the attempt to coerce the assembly by the action of the army, and in the course of a fortnight, 11th July, received his dismissal. This was known to Paris on the 12th, and the people instantly rose in arms, one of their principal movers being Camille Desmoulins, and their first step, a tumultuous procession through the streets, bearing aloft the wax busts of Necker and the duc d'Orléans. On the 14th the Bastille was taken; on the 15th Necker was recalled, and his return to Paris was marked by a popular ovation, which placed him at the very summit of renown. He remained in office till 3d September, 1790, taking no salary, and advancing as much as two millions of livres to the government. During the whole of this period his popularity was rapidly declining under the rising star of Mirabeau, on the one hand, and the increasing difficulties of carrying on the government with such a court as that of Louis XVI. on the other. On the date mentioned he asked permission to resign, leaving the money he had advanced, together with his house and furniture, as the material guarantee of his previous integrity, and this being with the greatest indifference accorded him, he retired to Copet, near Geneva, where he died in 1804. Necker was married in 1764 to Mademoiselle Curchod, the daughter of a Swiss minister, who had previously won the heart of the historian Gibbon (next article), and his daughter by her became the famous Madame de Stael. This lady published the numerous works of her father, whom she almost idolized, in 15 vols. 8vo. 1821. [E.R.]

NECKER, MADAME, whose maiden name was Susannah Curchod, was born in 1739, in the mountain village of Grassy, situated between the Pays de Vaud and Franche-Comté. Her father was a man of considerable talents as a pastor of the Swiss church; her mother was descended from an ancient family of Provence, who had fled to Switzerland on the revocation of the edict of Nantes. As stated in the preceding article, this accomplished lady was married to the minister Necker, and she greatly distinguished herself during his terms of office in every possible form of benevolence. She erected a hospital in Paris with her own money, was a great reformer of prison abuses, and surrounded herself with the most distinguished men of the time, who offered her the homage due to her great learning, and her rare goodness of heart. She died in 1796, the year after publishing her 'Reflections on Divorce.' Her works were published by her husband in 5 vols. 8vo. 1798 and 1801. [E.R.]

NECKER, NOEL JOSEPH, a native of the Netherlands, who became botanist and historiographer to the elector palatine. He wrote 'Elementa Botanica,' and other works, relating to his favorite science. Died, 1793.

NECTARIUS, patriarch of C'nople, 381-392.

NECTARIUS, patriarch of Jerusalem, d. 1668.

NEEDHAM, JOHN TUBERVILLE, a Roman Ca-

tholic divine, was born in London, in 1713, and educated at Douay, where he entered into orders. He died rector of the academy of sciences at Brussels, in 1781. Mr. Needham wrote observations inserted in Buffon's Natural History; also 'New Enquiries upon Microscopical Discoveries, and the Generation of Organized Bodies,' 'Enquiries concerning Nature and Religion,' &c.

NEEDHAM, MARCHMONT, an active partisan and political writer, was born at Burford, in Oxfordshire, in 1620, and educated at All Souls' College, Oxford. During the civil war he distinguished himself by his political writings first against the parliament, and afterwards against the king, so that at the Restoration he obtained his pardon with difficulty. He conducted periodical journals, somewhat in the manner of newspapers, the titles of which were, *Mercurius Britannicus*, *Mercurius Pragmaticus*, and *Mercurius Politicus*; and when politics no longer afforded him employment, he practised as a physician. Died 1678.

NEEDHAM, W., an anatomical writer, died 1691.

NEEF, or NEEFS, PETER, the elder of the name, a Flemish painter, 1570-1651. The younger, his son, born about 1600.

NEEL, L. B., a French author, died 1754.

NEELE, HENRY, a poet and miscellaneous writer, born in 1798, was the son of an engraver in the Strand, and was educated for the profession of an attorney, which he practised with reputation in the metropolis till his death. He was a young man of amiable disposition and inoffensive manners, and had a decided taste for literary pursuits; but his intense application to study produced a fit of insanity, and he put a period to his existence, February 7, 1828. He was the author of 'Poems,' 'Dramatic Scenes,' the 'Romance of History,' 3 vols.; and 'Literary Remains,' published after his decease.

NEER, ARNOLD VANDER, an eminent artist, was born at Amsterdam, in 1619. He excelled in painting coast scenery, fishermen's huts, and in his beautiful delineation of moonlight. Died, 1683. His son, EGLON HENDRICK, was an historical and portrait painter. Born, 1643; died, 1703.

NEGRI, P., a Venetian painter, 17th century.

NEGRI, VIRGINIUS, an Ital. religieuse, d. 1555.

NEGRO, NERO, or NIGER, ANDALONE DE, an astronomer of Genoa, born 1270.

NEGRO, F., an Italian *savant*, 16th century.

NEHEMIAH, a celebrated Jew of the captivity, who obtained permission of Artaxerxes Longimanus to rebuild the Temple, and governed the people, 5th century B.C.

NEILD, JOHN CAMDEN, an English barrister and sordid miser, who bequeathed his large property amounting to £500,000, the accumulation of a long life of mean parsimony, to Queen Victoria; died 1852 at the age of 72.

NELEDINSKJ - MELEZKJ, JURJ ALEXANROWITSCH, a Russian song-writer, 1751-1829.

NELSON. HORATIO NELSON was born 29th September, 1758, at Burnham Thorpe, in Norfolk. His father was a clergyman of the Church of England, and the rector of Burnham Thorpe parish. His uncle, by the mother's side, Captain Suckling, commanded the *Raisonnable*, a sixty-four gun ship, on board of which young Nelson was entered as a midshipman at the age of twelve. He was a lad of weakly frame, and seemed ill suited for the hardships of a seafaring life. But he had moral courage as well as physical courage of the highest order. His strong sense of duty, sublimed by earnest religious feeling, gave him at once the keenest incentive to exertion, and a never-failing stay and support amid

the vicissitudes of fortune. As boy, and as man, he won the love as well as the confidence of all whom he acted with, whether as superiors, equals, or subordinates. The details of Nelson's early life, as given in Southey's admirable biography, abound in traits which mark out the spirit of the future victor of the Nile and Trafalgar, and of the almost idolized

[Birth-place of Nelson.]

chief of the British navy. In 1773, Nelson served in the expedition to the Polar Seas under Commodore Phipps. In 1777 he was made a lieutenant, and two years afterwards he obtained the rank of post-captain, and the command of the *Hinchinbrooke* of 28 guns. He distinguished himself in some desperate attacks on the Spanish forts in Nicaragua, and served on the American coast till the general peace in 1783. In 1784 he was appointed to the *Boreas*, and for some time was stationed in the West Indies. He here showed his political courage and independence of character by stopping the contraband traffic which the Americans carried on with the British colonies. This had been connived at, and even sanctioned by the British authorities in the islands, and Nelson ran the greatest risk of ruin in purse and in professional prospects by the sturdy course which he pursued. He said himself afterwards of this trying part of his career, 'Conscious rectitude bore me through it;' and he obtained in the end the just thanks of the government for his patriotic conduct. While in the West Indies he married Mrs. Nisbet, the widow of Dr. Nisbet, a physician. When England took part in the wars of the French revolution, Nelson was appointed to the *Agamemnon*, a 64 gun ship. He did good service on board of her in the Mediterranean during 1793, 1794, and 1795, and he equally signalized himself on shore in Corsica, while co-operating with Paoli and the patriotic party in that island against the French. He lost an eye at the siege of Calvi. In 1797 he took a distinguished part in Jervis's victory over the Spanish fleet off Cape St. Vincent. He commanded the *Captain* 74, in that action; and boarded and captured two of the enemy's large ships, the *San Nicholas* and the *San Josef*. He led the boarders himself from the first of these prizes to the other, exclaiming the well-known words, 'Westminster Abbey or victory!' He was now knighted, and advanced to the rank of rear-admiral. In 1797 he led an attack on the island of Teneriffe, which was beaten off with severe loss to the assailants. Nelson, who led the attack in person, lost his right arm, and his life was saved with the greatest difficulty by his son-in-law, Lieutenant Nesbit. In a memorial which he was required to present, as a matter of form, after this action, to entitle him to a pension, he gave in the following catalogue of services performed by him during the war. He had been

in four actions with the fleets of the enemy, in three cutting out expeditions, and in taking three towns. He had served ashore with the army four months, and commanded the batteries in two sieges. He had assisted in the capture of seven sail of the line, six frigates, four corvettes, eleven privateers, and fifty sail of merchant vessels. He had been actually personally engaged with the enemy one hundred and twenty times, in which service he had lost his right eye and his right arm, and received several severe wounds and contusions in the body. In 1798 he rejoined the fleet in the Mediterranean, and was sent with a squadron to watch the French expedition which was fitting out at Toulon, and which ultimately escaped by favor of the weather, and reached Egypt. Nelson did not arrive off Egypt in time to prevent Buonaparte's army from landing, but he found the French fleet in Aboukir Bay, on the 1st of August, and though it far outnumbered his own force he instantly attacked and nearly destroyed it in a battle, which it is hard to match in naval warfare, either for the genius shown by the victorious admiral in his tactics, or the heroism which he and his men displayed throughout the contest. This, the battle of the Nile, was, as Nelson truly said, not a mere victory, it was a conquest; and Napoleon in his memoirs bears ample testimony to its decisive effects on the French prospects. Nelson was now raised to the peerage, and honors of the highest kind were heaped on him by every court that was engaged in war with France. He now took an active part in restoring the royal family of Naples to the throne of that country; and formed an unfortunate attachment for Lady Hamilton, a companion of the Neapolitan Queen, which led to the destruction of Nelson's domestic happiness; and caused his fame to be sullied by his lending his aid to the cruel reprisals which the mean and cowardly Bourbons of Naples took on the chiefs of their lately insurgent subjects. In 1801, Nelson was second in command of the expedition which was sent against Denmark. On the 2d of April in that year, he led the advanced squadron of the fleet against the Danish capital, and fought the desperate battle of Copenhagen. He refused to obey the signal to retire, which the commander-in-chief, alarmed at his peril, displayed; and continued the action till the Danish line of defences was nearly destroyed. A flag of truce was then sent by him, and after some negotiation the Danes submitted to the requisitions of the English government. On the renewal of the war between England and France, after the breach of the peace of Amiens, in 1803, Nelson received the command of the Mediterranean fleet. He blockaded Toulon for many months, but at length the French squadron under Admiral Villeneuve escaped to sea, and effected a junction with the Spanish ships off Cadiz. The combined fleets now sailed for the West Indies, and thither and back again to Europe did Nelson follow them, twice traversing the Atlantic in unrelenting but unsuccessful chase. When Nelson anchored at Gibraltar on the 20th June, 1805, he went on shore for the first time since 16th June, 1803. In his own words, 'he had not had his foot out of his ship, the Victory, for two years, wanting only ten days.' For the seamanship and resolution which the English admiral showed during this arduous part of his career, the worthiest eulogium is to be found in the writings of a French naval officer, in Captain Jurien de la Graviere's History of the Last Naval War. Nelson returned to England; but when intelligence arrived that the combined enemy's fleets, after their action with Sir Robert Calder, were at Cadiz, Nelson

volunteered to take the command again against them. His services were gladly accepted, and on the 15th September, 1805, the fine old English admiral left England for the last time. He arrived off Cadiz on the 29th September; and, on the 19th of October, the enemy's admiral came out of port. They were deceived by Nelson's skilful tactics, as to the number of the English ships, and they hoped to crush him with an overwhelming force. Even as it was, they had 33 sail of the line and 7 frigates, against 27 of the line and 5 frigates under Nelson. On the 21st of October, he attacked them off Cape Trafalgar. Forming his fleet into two columns, one of which he led himself in the Victory, while Collingwood led the other in the Royal Sovereign, Nelson burst through the double line of the French and Spaniards, and brought on the close and general action, for which he had long ardently prayed. In four hours, 20 of the enemy had struck; others were flying in despair; and the marine on which Napoleon had relied for the invasion of England was annihilated. But the victory was bought at the expense of the chief victor's life. About a quarter past one, in the heat of the battle, Nelson was shot through the back by a musket ball. He survived long enough to know that the victory was complete; and his last words were, 'Thank God, I have done my duty.' His ever-memorable signal to his fleet, immediately before the battle commenced, had been 'England expects every man to do his duty,' and, if ever a man lived and died in earnest, fearless, unselfish discharge of his duty to his country, it was Admiral Nelson, victor of the Nile, Copenhagen, and Trafalgar. [E.S.C.]

[Nelson's Monument in Trafalgar Square.]

NELSON, ROBERT, a pious and learned writer, was born in London, in 1656; and received his education at St. Paul's School, and at Trinity College, Cambridge. He was strongly attached to James II., and he continued to communicate with the non-jurors till the death of Bishop Lloyd, when he returned to the established church. He lived on terms of intimacy with Archbishop Tillotson, and was the zealous promoter of all works of charity, having the ability as well as the disposition to give what true benevolence prompted. He was the author of many popular works; among which are, 'The Practice of True Devotion,' 'A Companion to the Festivals and Fasts of the Church of England,' 'The Whole Duty of a Christian,' 'The Great Duty of Frequenting the Christian Sacrifice,' &c. Died 1714.

NELSON, ROGER, general, was a soldier of the revolution, and for several years a member of Congress from Maryland. Died June 7, 1815.

NELSON, SAMUEL, born in 1759, was one of the

most ardent of the 'Irish patriots' in 1790; and edited the Northern Star, which produced great effects. On the rebellion being put down in 1796, he was thrown into prison, where he remained, till set at liberty by French interference, at the treaty of Amiens, in 1802. He then retired to America, where he died.

NELSON, THOMAS, governor of Virginia, one of the signers of the Declaration of Independence in 1776, was born in New York 1738. He went at an early age to England, and was educated at the university of Cambridge. In 1761 he returned to America. In 1775 he was a member of the general convention of Virginia, and in the same year was chosen a member of Congress; but in consequence of delicate health resigned in 1777. Soon after he was appointed brigadier-general and commander-in-chief, and in 1781 was chosen governor of Virginia. Washington, in his general orders after the taking of York in October, 1781, particularly notices the services of General Nelson. Died January 4th, 1789.

NEMESIUS, a Greek philosopher in the 4th century, who embraced the Christian religion, and was made bishop of Emesa, in Phœnicia, of which place he was a native. He wrote a treatise entitled 'De Natura Hominis,' in which he asserts the doctrine of pre-existence.

NEMOURS, a titular name borne by several persons distinguished in French history, among whom are—JAMES D'ARMAGNAC, Duc De Nemours, cousin by marriage to Louis XI., who caused him to be beheaded 1477. LOUIS, his son and successor in the duchy, viceroy of Naples for Charles VIII., killed at the battle of Cerignola 1503. GASTON DE FOIX, son of Mary, sister of Louis XII., killed at the battle of Ravenna 1512. PHILIP OF SAVOY, uncle to Francis I., who invested him with the duchy 1528. JAMES OF SAVOY, a distinguished commander, 1531–1585. HENRY, second son and successor of James, connected with the league, and afterwards with Henry IV., 1571–1632. HENRY II., second son and successor of Henry I., born 1625, appointed archbishop of Rheims 1651, abandoned the church on the death of his elder brother, and married Mary D'Orleans, daughter of the duc de Longueville, 1657, died 1659. This lady survived her husband many years, and, in 1694, was recognized sovereign of Neuchâtel. She died in 1707, leaving valuable 'Memoirs' of the minority of Louis XIV. and the wars of the Fronde. The title was borne again by the second son of Louis Philippe, late king of the French.

NENNIUS, a British historian, and abbot of Bangor in the 7th century, who, when the monks of his house were massacred, fled for refuge to Chester. His work is entitled 'Historia Britonum,' and is among the Cottonian MSS. in the British Museum.

NENY, P. MAC, a Belgian statesman, 1712–84.

NEPOS, CORNELIUS, a Roman historian of the time of Julius Cæsar and the first six years of Augustus. The only remains of his works are some short biographies of twenty Greek generals, and of Hamilcar and Hannibal.

NEPOS, FLAVIUS JULIUS, emperor of the West, predecessor of Augustulus, 473–475.

NEPREU, F., an ascetic writer, 1639–1708.

NERI, POMPEO, an Italian economist, 1707–1776.

NERI, ST. PHILIP DE, founder of the congregation of the Oratory in Italy, was born in 1515, of a noble family at Florence, and died at Rome in 1595. His order obtained its name from the place of its

original establishment, which was an oratory of St. Jerome's church at Rome.

NERLI, FILIPPO, an Italian historian, 1485–1556.

NERO, emperor of Rome, whose full name was LUCIUS DOMITIUS NERO CLAUDIUS CÆSAR, was the son of Domitius Ahenobarbus and of Agrippina, daughter of Germanicus. He was born in 37 at Antium, and after the marriage of his mother, in third nuptials, with her uncle, the emperor Claudius, was adopted by that prince, and married to his daughter Octavia. When Nero was about seventeen years of age his abandoned mother poisoned her husband, Claudius, and by means of her criminal favors succeeded in raising her son to the throne, over whom she expected to exercise the most absolute control. Nero became emperor in 54, and the year following disposed of the rightful heir, Britannicus, by poison. For the first few years his public conduct, under the control of Burrhus and Seneca, was unexceptionable; in private, however, he disgraced himself by the most odious vices, and his mother endeavored to retain her influence by shamefully complying with his inclinations. In 59 Nero caused this detestable woman to be murdered, and then, fearing no rival in power, gave full scope to the darkest traits of his character. In 62 he repudiated his wife Octavia. In 64 the burning of Rome occurred, which has been charged with great probability, upon Nero himself, who, however, accused the Christians of the act, and made it the occasion of the most dreadful cruelties towards them. His debaucheries and cruelties occasioned an almost general conspiracy against him, known as that of Piso, in 65, the discovery of which led to more tortures and bloodshed. The revolt of Vindex was also suppressed. That of Galba in 68 succeeded, and Nero escaped arrest by stabbing himself, being then in the thirty-first year of his age, and the fourteenth of his reign. He was a lover of arts and letters, and possessed much taste

[Palace of the Cæsars at Rome.]

as a poet and histrionic performer. It was the remark of Nero's father, Ahenobarbus, that 'nothing but what was hateful and pernicious to mankind, could ever come from Agrippina and himself. Yet, the story of a strange hand that strewed flowers upon the tomb of this tyrant is well known.

[E.R.]

NERVA, MARCUS COCCEIUS, emperor of Rome, was born 27, and was twice consul,—with Vespasian

in 71, and with Domitian in 90. He succeeded to the sovereign power on the assassination of the latter 96; died 98. Trajan succeeded him.

NESBIT, or NISBET, ALEXANDER, a Scotch antiquarian and writer on heraldry, 1672-1725.

NESMOND, T. DE, a French prelate, died 1727.

NESSE, C., a nonconformist divine, 1621-1705.

NESSEL, D. DE, a Ger. bibliographer, 1644-99.

NESSON, P. DE, a French poet, 15th century.

NESTOR, a monk of Kieff, whose annals are the sources of Slavonic history, 1056-1116.

NESTOR, D., a classical writer, 15th century.

NESTORIUS, a celebrated patriarch of Constantinople, from whom originated the sect of Nestorians, was born in Syria in the 5th century. On entering into the priesthood he became so popular for his eloquence, that Theodosius nominated him, in 429, to the archbishopric of Constantinople, in which station he displayed great zeal against the Arians and Novatians. He at length fell under censure himself for affirming that the Virgin Mary is not the mother of God: for which he was condemned in the council of Ephesus, deprived of his see, and banished. He died in 439; but his followers continue to be numerous in the East, and are organized under a patriarch.

NETSCHER, the name of three Dutch painters—GASPAR, the father, celebrated for his domestic pieces and portraits, 1639-1684. THEODORE, his eldest son, a good painter of female portraits, 1661-1732. CONSTANTINE, younger brother of the latter, distinguished for his portraits and groups, 1670-1722.

NETTELBLADT, CHRISTIAN, Baron DE, a Swedish jurist, historian, and antiquary, 1696-1776.

NETTELBLADT, DANIEL, a learned German lawyer, 1719-1791. His brother, HENRY, historian of Mecklenburg, died 1761.

NETTER, THOMAS, an English monk, professor of philosophy and divinity, and privy councillor to Henry V., died 1430.

NETTLETON, ASAHEL, an Amer. divine, and author of the 'Village Hymns,' was born in Conn. Died 1844, aged 60.

NETTLETON, THOMAS, a physician of Halifax, known as a miscellaneous writer, 1683-1742.

NEUBECK, V. W., a German poet, born 1765.

NEUHOFF, THEODORE STEPHEN, Baron, the son of a Westphalian noble, was born at Metz, about 1690. While a student at Cologne, he unfortunately killed a young man of rank in a duel, and fled to the Hague. But through the mediation of the Spanish minister he received a lieutenancy in the Spanish regiment of cavalry destined to march against the Moors in Africa, and, on account of his good behavior, was promoted to a captaincy. When the Corsicans, after several unsuccessful attempts to free themselves from the oppressions of Genoa, resolved, in 1735, to form a government of their own, Neuhoﬀ was crowned king, had silver and copper coins struck, and established an order of knighthood, under the name of the order of deliverance. Theodore, however, could not maintain himself against the Genoese and a Corsican opposition. He fled to England. Here his Dutch creditors pursued him, and being arrested, he became a prisoner in the king's bench for some years. His liberation was at length, however, effected, through the instrumentality of Horace Walpole; but he died soon after, in 1755.

NEUKIRCH, B., a German poet, 1665-1729.

NEUMANN, GASPAR, an eminent German chemist of the 18th century. After pursuing his studies with ardor, and travelling for improvement through England, France, and Italy, he was nominated pro-

fessor of chemistry at the Royal College at Berlin, and afterwards honored by the king of Prussia with the title of aulic counsellor. His works, which at the time were important, have been translated into English. Died, 1737.

NEUMANN, G., a Germ. Hebraist, 1648-1715.

NEUMANN, J. G., a Lutheran div., 1661-1709.

NEUSER, A., a German theologian, died 1576.

NEVE, TIMOTHY, a dignitary of the Church of England, and professor of divinity, son of a divine of the same name, author of 'Sermons,' 'Notes on Cardinal Pole,' &c., 1724-1798.

NEVILE, or NEVYLE, ALEXANDER, an English writer, was born in Kent, in 1544. He took his degree of master of arts at Cambridge; after which he became secretary to Archbishop Parker and his successor, Grindal. He died in 1614. He paraphrased the *Ædipus* of Seneca, and wrote in Latin, a narrative of the insurrection under Kett, to which he added an account of Norwich. He published the Cambridge verses on the death of Sir Philip Sidney, &c. His brother, THOMAS NEVILE, became dean of Canterbury, and died in 1615.

NEVILE, or NEVILLE, HENRY, a republican writer, was born in Berkshire, in 1620, and educated at Merton College, Oxford. In the rebellion he took the side of the parliament, and was elected a member of the council of state; but, on the usurpation of Cromwell, he gave up his seat. He died in 1694. He published Machiavel's works, and a piece entitled 'Plato Redivivus, or a Dialogue concerning Government.'

NEVIZAN, J., an Italian jurisconsult, died 1549.

NEWBOROUGH, or NEWBURGH, WILLIAM OF, commonly known as Gulielmus Newbrigensis, a monastic historian of the period, 1066-1197.

NEWCASTLE. See CAVENDISH and HOLLIS.

NEWCOMBE, THOMAS, chaplain to the second duke of Richmond, known as a miscellaneous writer, 1671-1766.

NEWCOMBE, WILLIAM, archbishop of Armagh, a learned and exemplary prelate, was born, in 1792, at Barton-le-Clay, in Bedfordshire. He completed his studies at Pembroke College, Oxford; was successively bishop of Dromore, Ossory, and Waterford; was raised to the archbishopric of Armagh, in 1795; and died in 1800. His principal works are, 'A Harmony of the Gospels,' 'An Historical View of the English Biblical translations,' and 'Attempts towards an improved Version of Ezekiel and the Minor Prophets.'

NEWCOMEN, MATTHEW, an eminent nonconformist divine of the 17th century, noted as having been one of the authors of the attack on episcopacy, entitled 'Smectymnuus,' from the initials of the names of its contributors. Died, 1766.

NEWCOMEN, THOMAS, a locksmith at Dartmouth, in Devonshire, who, towards the close of the 17th century, engaged in scientific researches, and to whom belongs the merit of the first great improvement in steam-engines, by forming a vacuum under the piston, after it had been raised by the expansive force of the elastic vapor, and thus bringing into action the atmospheric pressure.

NEWCOURT, R., an ecclesiast. lawyer, d. 1716.

NEWDIGATE, SIR ROGER, bart., a munificent patron of learning, was born at Arbury, in Warwickshire, in 1719. He was first placed in Westminster School, whence he removed to Oxford, as a gentleman commoner of University College. He represented the university in parliament for many years, was a liberal benefactor to it, and bequeathed the sum of £1,000 to furnish an annual prize for the

best copy of English verses connected with the fine arts, to be written by an undergraduate. Died 1780.

NEWELL, SAMUEL, a missionary at Bombay. Having graduated at Harvard College in 1807, he studied theology at Andover, and was ordained in 1812. In 1817 he went to Bombay, where he continued in his mission until his death by cholera in 1821.

NEWLAND, JOHN, an English abbot, employed as a diplomatist by Henry VIII., died 1515.

NEWLAND, PETER, an eminent Dutch mathematician, born in 1764. He was successively professor of mathematics and philosophy at Utrecht and Amsterdam, and was appointed by the Batavian government one of the commissioners of longitude. He wrote several works on astronomy, mathematics, and political economy; and died in 1794.

NEWMAN, SAMUEL, first minister of Rehoboth, Massachusetts, a native of Banbury, England, was educated at Oxford. In 1636 he emigrated to America, and was chosen minister of the church at Weymouth. In 1644 he removed to Rehoboth. He compiled a concordance of the Scriptures which passed through several editions, under the title of the 'Cambridge Concordance.' Died July, 1663.

NEWTON, SIR ADAM, a Scottish protestant and scholar, tutor to Prince Henry, son of James I., died 1630.

NEWTON, GILBERT STUART, a painter of considerable merit, was born at Halifax, Nova Scotia, in 1794; visited Italy, about 1820; and on his return to England, entered himself a student of the Royal Academy. He confined himself chiefly to small pictures, and illustrated many subjects in the 'Annuals' and other elegant publications, in a highly creditable manner. His female figures are strikingly expressive of innocence as well as beauty, d. 1835.

[Birth-place of Newton.]

NEWTON, ISAAC, a celebrated mathematician and natural philosopher, was born at Woolsthorpe, near Colsterworth, Lincolnshire, on the 25th December, 1642, o.s. His father, Isaac Newton, was proprietor and farmer of the manor, and died a few months after his marriage to Hannah Ayscough, so that young Newton was a posthumous child. He was so small at his birth that 'they might have put him into a quart mug,' but he gradually attained size and strength, destined to enjoy a vigorous manhood, and to survive even the average term of life. The estate of Woolsthorpe, worth only about

£30 per annum, had been in the family upwards of one hundred years. The origin of the family is still in obscurity. Newton himself, according to the usual forms, gave in his pedigree on oath to the Herald's Office in 1705, stating that *he had reason to believe* (from tradition), that his great grandfather's father was John Newton of Wesby, in Lincolnshire; but it is certain, that twenty years after this Newton told Professor James Gregory, that his grandfather was a gentleman of East Lothian, and it is equally certain that Newton corresponded on the subject with the last baronet of the family, Sir Richard Newton of Newton, and that this family considered Newton to be a distant relation of theirs. For three years Mrs. Newton watched over her only child with maternal anxiety till her marriage with the Rev. Barnabas Smith, of North Witham, by whom she had one son and three daughters. In consequence of this marriage Newton was left under the care of his grandmother, and was sent at the usual age to the day school at Skillington and Stoke. At the age of twelve he went to the public school of Grantham, where he was boarded with Mr. Clark the apothecary. Here he was very inattentive to his studies, and was low in the school till a quarrel with a boy above him in the class, who had used him ill, induced him to apply diligently to his lessons till he rose above his rival, and reached the head of the class. During his leisure hours he occupied himself with all sorts of mechanical contrivances, windmills, water-clocks, carriages, and paper kites; and among his early tastes may be mentioned his love for drawing and writing verses, in neither of which he was destined to excel. On the death of his father-in-law in 1656, his mother came to reside at Woolsthorpe with her three children and Isaac, who was now in his fifteenth year. He was recalled from school, to assist in the management of the farm; but while he was occupied with his books, models, water-wheels, and dials, the business of the farm was neglected, and the cattle were luxuriating among the corn. Thus found to be unfit for the profession of a farmer, he was sent back to Grantham school, and in due time to Trinity College, Cambridge, with recommendations from his uncle, the Rev. W. Ayscough. On the 5th of June, 1661, when nineteen years old, he was admitted sub-sizar in Trinity College, very ill prepared for its course of instruction by his preliminary mathematical studies. He had been disposed to undervalue the ancient geometry, and he afterwards confessed to Dr. Pemberton that he had applied himself to the works of Descartes and others before he had sufficiently considered the Elements of Euclid. On the 28th April, 1664, he was elected scholar. He took his degree of B.A. in January, 1665. He was elected to Major Fellow in March, 1668, and he took his degree of M.A. on the 7th July. On the 20th May, 1665, he committed to writing his first ideas on fluxions. In 1666, having procured a prism, he discovered the unequal refrangibility of light, and the true doctrine of colors, and having drawn the erroneous conclusion that the improvement of the refracting telescope was impossible, he set himself to the construction of a reflecting telescope. While thus occupied he was driven from Cambridge by the plague in 1666, and went to Woolsthorpe, where the idea of gravitation first presented itself to him, from observing the fall of an apple in his garden. Here he continued his inquiries into the application of fluxions, and after his return to Cambridge in 1668, he made a very small reflecting telescope, which he described to a friend. On the 29th October, 1669, Newton was appointed to

the Lucasian chair of mathematics on the resignation of Dr. Barrow, and from this time we may date the commencement of his great discoveries. His first communication to the Royal Society was a description of a second reflecting telescope, which excited great interest in England and abroad. The telescope itself was sent to the Society in December, 1671, 'for his majesty's perusal.' On the 18th September, 1672, he announced to the secretary, Mr. Oldenburg, a philosophical discovery which he considered the oldest, if not the most considerable detection hitherto made in the operations of nature. This was the discovery of the composition of light, which was read to the Society on the 8th February, 1672, and which led him into interminable controversies with Hook, Huygens, and several eminent foreigners. These controversies embittered his peace, and made him resolve to have nothing more to do with that litigious lady, philosophy. On the 11th January, 1671, Newton was elected a fellow of the Royal Society. In 1673 he was disappointed in a competition for the law fellowship, then vacant; a disappointment increased by the fact that he was about this time in such circumstances as to be unable to afford the weekly payment to the Royal Society, who 'excused him.' Very soon afterwards, however, when his fellowship was about to expire, he obtained permission from the crown to hold the Lucasian chair along with a fellowship, without being obliged to go into orders. On the 9th December, 1675, Newton communicated to the Royal Society a discourse on colors. This interesting paper contained fuller details on the composition and decomposition of white light, and a new hypothesis concerning colors, with some proposition explaining the colors of thin transparent plates, and their relation to the colors of natural bodies. This discourse again brought Newton into a controversy with Hook, but notwithstanding this interruption, he was soon occupied with those profound studies, the results of which were afterwards consigned in his immortal work the 'Principia.' He had long ago deduced from the laws of Kepler the important law that gravity decreases with the square of the distance, a law to which Sir Christopher Wren, Halley, and Hook, had all been led by independent study. No demonstration of it, however, had been given, and no proof obtained that the same power which made the apple to fall, was that which retained the moon and the other planets in their orbits. Adopting the ordinary measure of the earth's radius, he had been led to the conclusion that the force which kept the moon in her orbit, if the same as gravity, was one sixth greater than that which is actually observed, a result which perplexed him, and prevented him from communicating to his friends the great speculation in which he was engaged. In June, 1682, however, he had heard of Picard's more accurate measure of the earth's diameter, and repeating with this measure his former calculations, he found to his extreme delight that the force of gravity, by which bodies fall at the earth's surface, 4,000 miles from the earth's centre, when diminished as the square of 240,000 miles, the moon's distance, was almost exactly equal to that which kept the moon in her orbit. Hence it followed that the same power retained all the other satellites round their primaries and all the primaries round the sun. In Aug., 1684, when Dr. Halley visited Newton at Cambridge, he learned from him that he had surmounted the difficulties of the planetary motion, and promised him a copy of the treatise he had written on the subject. This treatise, 'De Motu Corporum,' was after some delay completed, and presented to the Royal Society on the

28th April, 1686, being the first book of the 'Philosophiæ Naturalis Principia Mathematica.' The *second* book was sent to the Society on the 1st March, 1687, the *third* on the 6th April, and the whole work published at the expense of Dr. Halley about midsummer of that year. We have already seen that Newton discovered the doctrine of fluxions in 1666, the principle and application of which he explained in his treatise 'Analysis per Equationes numero terminorum Infinitas,' which he communicated to Dr. Barrow in June, 1667. Although this treatise was not published till 1711, its contents were circulated throughout Europe by letters between 1669 and 1672. The principle of the new calculus was published in the Principia in 1687, and the Algorithms communicated to Dr. Wallis in 1692. The great discovery of fluxions was also made by Leibnitz, and a controversy arose on the subject of priority, which has continued for nearly two centuries to agitate the mathematical world. The violent friends of each

[Newton's study.]

party falsely charged their principals with plagiarism, and thus embittered a controversy carried on with all the violence of politics or theology. There can be no doubt that Newton *first* invented fluxions, and that Leibnitz was an independent inventor of them before Newton had published his method. In the year 1692 a rumor prevailed abroad that Newton had become insane, either from intense mental application, or from the loss of valuable MSS. by fire. It is quite true that Newton's health had at this time suffered from inability to sleep, and that he had exhibited symptoms of a nervous indisposition in some of his letters to his friends; but his mind had never given way, and it was during this period that he wrote his four celebrated letters to Dr. Bentley, and was occupied with the profound subject of the Lunar theory. Newton had now brought to a close the great investigations which had occupied the early and the middle portion of his life. He was in the fifty-third year of his age, and no mark of national gratitude had been conferred upon him, although he was counted the pride of England, and the ornament of his species. In this position a new sphere of usefulness was unveiled to him, and wealth and honors awaited his acceptance. Charles Montague, a fellow of Trinity College, though twenty years younger than Newton, shared his friendship at Cam-

bridge. They had sat together in the convention parliament of 1688, and had entertained the same liberal opinions in politics. In 1694 Montague was appointed chancellor of the exchequer, and after consulting Newton, Locke, and Halley, he resolved to restore to its intrinsic value the adulterated coin of the realm. With this view Newton was appointed warden of the mint in 1695, with a salary of about £600, and in 1699 he succeeded to the mastership, the highest office in the establishment, which was worth £1,200 or £1,500 per annum. In the same year he was elected one of the eight associate members of the Royal Academy of Sciences in Paris. In 1701 he was re-elected one of the members for the university of Cambridge. In 1703 he was chosen president of the Royal Society, an office which he held till his death, and on the 16th of April, 1705, the honor of knighthood was conferred upon him by Queen Anne in Trinity Lodge, Cambridge. When George I. ascended the throne in 1714, Newton, then in his seventy-second year, was a favorite at court. His character, his reputation, and his piety, had gained him the favor of the princess of Wales, afterwards queen consort to George II., who took great pleasure in his conversation. She corresponded also with Leibnitz, who seems to have availed himself of this privilege to injure the character of Newton, by representing the Newtonian philosophy as false and hostile to religion. Locke was involved in the same charge, and at the king's desire an answer was prepared by Sir Isaac and Dr. Clarke, which seems to have satisfied the royal scruples. At the princess's request Sir Isaac gave her a MS., which he calls a 'Chronological Index.' The Abbé Conti having got a copy of it, published it in Paris without the leave of the author, and thus involved him in a disagreeable controversy. He was in this way induced to prepare for the press his posthumous work, entitled 'The Chronology of Ancient Kingdoms,' which appeared in 1728. In the year 1722, when in his eightieth year, Newton was attacked with a complaint in the urinary organs, which continued to afflict him till the time of his death, but though he suffered also from an affection of the lungs and gout, he was able on the 28th February, 1727, to preside at a meeting of the Royal Society. He suffered, however, from the exertion which he made on this occasion, and as the master disease under which he suffered was found to be stone, no hope was entertained of his recovery. He preserved his faculties entire till two days before his death, when he became insensible, and expired on Monday, the 20th March, 1727, between one and two o'clock in the morning, in the eighty-fifth year of his age. His body was removed from Kensington to London on the 28th March. It lay in state in the Jerusalem Chamber, and was buried in Westminster Abbey, in a conspicuous part of which a monument was erected to his memory in 1731 by his relatives. Newton left about £32,000, which was divided among his four nephews and four nieces of the half blood, the grandchildren of his mother: one of them the beautiful and accomplished Miss Catherine Barton, was married to Mr. Conduit, in Newton's lifetime, and they lived together. Mr. Conduit left an only child, a daughter, who married Mr. Wallop, the eldest son of Lord Lymington, and from this cause all Newton's papers came into the hands of the Portsmouth family. The most important of Newton's philosophical works are his 'Principia,' already mentioned, his 'Arithmetica Universalis,' his 'Geometria Analytica,' his 'Treatise on Optics,' published in 1705, his 'Lectiones Opticæ,' published after his death,

and others which have been collected by Bishop Horsley, and published in 5 vols. 4to, under the title of 'Newtoni Opera quæ Extant Omnia,' London, 1779 and 1782. His literary and theological works, included in the same collection, are his 'Chronology,' his 'Observations on the Prophecies of Holy Writ,' viz., Daniel and the Apocalypse, and his 'Historical Account of two Notable Corruptions of Scripture.' For further information respecting Sir Isaac Newton, see 'Life of Sir Isaac Newton,' by Sir David Brewster, London, 1831; a very brief but excellent Memoir of Newton by Professor De Morgan, in 'Knight's Cabinet Historical Gallery,' vol. XI., p. 78-118; and 'Memoirs of the Life, Writings, and Discoveries of Sir Isaac Newton,' by Sir David Brewster, in 2 vols. 8vo, (from the family Papers), now in the press. [D.B.]

NEWTON, JOHN, a mathematician, 1622-78.

NEWTON, JOHN, an episcopal clergyman of Calvinistic principles, was born in London, in 1725. He did not enjoy the advantages of a regular education, having been bred to the sea under his father, who was master of a merchant vessel. Afterwards he sailed in the Guinea trade, and led a very irregular life for some years; but at last he grew both serious and studious. By indefatigable diligence he attained a knowledge of the Latin and Greek languages; and in 1764 was ordained to the curacy of Olney, in Buckinghamshire, where he became intimately acquainted with Cowper the poet, conjointly with whom he produced the 'Olney Hymns.' In 1779, Mr. Newton obtained the rectory of St. Mary Woolnoth, London, which he held till his death, in 1807. He was the author of several works, among which may be numbered a 'Review of Ecclesiastical History,' 'Cardiphonia, or the Utterance of the Heart,' 'The Messiah, a Series of Discourses,' &c., forming altogether 6 vols. 8vo.

NEWTON, R., a learned divine, 1676-1753.

NEWTON, THOMAS, an eminent English prelate, was born at Lichfield, in 1704. After finishing his education at Westminster, he was elected to Trinity College, Cambridge, where he obtained a fellowship; and in 1744 he was presented to the rectory of St. Mary-le-Bow, Cheapside. In 1749 he published an edition of 'Milton's Paradise Lost, with Notes, and the Life of the Author;' which was followed by the 'Paradise Regained,' in a similar form. But his literary reputation rests chiefly on his 'Dissertations on the Prophecies,' which he completed in 1758. He was made a prebendary of Westminster in 1757, and soon after precentor of York; both which preferments he resigned in 1761, on his promotion to the see of Bristol. In 1768 he was made dean of St. Paul's, and died in 1782.

NEWTON, THOMAS, a schoolmaster and physician, was born at Butley, in Cheshire; studied at Trinity College, Oxford, and Queen's College, Cambridge; became master of Macclesfield School, where he also practised physic; but, having entered into orders, in 1583, he obtained the living of Little Ilford, in Essex. His principal works are, a 'History of the Saracens,' 'An Elegiac Poem on the Death of Queen Elizabeth,' and 'The Herbal to the Bible, translated from Lemnius.'

NEY. MICHEL NEY, marshal of the French empire, duke of Elchingen, prince of the Moskwa, and 'The bravest of the brave' in Napoleon's armies, was the son of a cooper at Sarre-Louis. He was born in 1769. He entered the army very young; and was a subaltern in a hussar regiment at the commencement of the wars of the revolution. Ney soon attracted the notice of his commanders, especially of

Kleber and Hoche, by his valor and skill in the campaigns against the Austrian armies; and in 1798 he had attained the rank of general of division. In 1799 he shared in the glories of Massena's campaign in Switzerland; and in 1800 he aided, under Moreau, in gaining the victories of Moeskirch, and Hohenlinden. Napoleon afterwards employed him as minister plenipotentiary to complete the submission of the Swiss to French ascendancy—a task which Ney performed with success—and thereafter stood high in Napoleon's favor. He was made marshal of the New French empire in 1804; and in the campaign of 1805 against Austria, he commanded the French at the victory of Elchingen, whence the dukedom which the emperor conferred upon him was named. Ney contributed greatly to the overthrow of the Prussians at Jena, and to the defeat of the Russians at Friedland. In 1807 he was sent to the peninsula, and for some time commanded in Galicia, and on the northern frontier of Portugal. In 1810 he acted under Massena in the invasion of Portugal, which was baffled by the genius of Wellington, and the lines of Torres Vedras. During that invasion, and during the retreat of the French army, which was its result, Ney displayed 'a happy mixture of courage and skill,' to adopt the words in which the English historian, Napier, has justly described his conduct. But the altercations between him and Massena were frequent and violent, and at last Massena deprived Ney of his command. Napier says that Massena's general views were as superior to Ney's, as the latter's readiness and genius for handling troops in action were superior to Massena's. In 1812 Ney served again under Napoleon, and took part in the invasion of Russia. He commanded the French centre at the battle of the Moskwa, and gained from that victory his princely title. His heroic bravery was still more signally displayed in the dreadful retreat from Moscow. His honorable task was to protect the French rear. On leaving Smolensko, Ney, at the head of about 7,000 men, found his path barred near the river Losmina by a large Russian army under Milaradovich. Ney was summoned to surrender—'A marshal of France never surrenders' was his answer, and he led his men on with the bayonet against the Russian batteries. Driven back repeatedly with frightful carnage, Ney countermarched the remnant of his column, and wheeling to the left under shelter of the night, he eluded the Russian pursuit. He reached the bank of the Dnieper at a spot where the river was frozen over, but so thinly, that the ice bent beneath the soldier's tread. He effected the perilous passage, and in a succession of desperate contests with other Russian forces that strove to intercept him, Ney fought his way with 1,500 of his men to Orcha, where Napoleon was with the wrecks of the main army. Napoleon's joy was almost rapturous when Ney rejoined him, for all had believed that the intrepid marshal must have been slain, or captive. The emperor hailed Ney as 'The bravest of the brave,' which thenceforth became his undisputed title. After Napoleon left the army, Ney still continued to fight in the rear against the advancing Muscovites. Thrice did the rear-guard which he commanded melt away beneath him by death, captivity, or flight; and as often was it reorganized by the indomitable marshal. At last, Ney, with only thirty men under him, defended the gate of Kowno, the last place in the Russian dominions through which the French retreated—against the pursuing enemies, while his comrades escaped at the other end of the town. He was himself the very last man

to retire. He fired with his own hand the last shot against the foes, threw the musket into the river Niemen, plunged into the neighboring forest to baffle the enemies who held him in chase; and after a series of almost incredible personal adventures, rejoined his comrades in the Prussian territory. In the campaign of 1814 Ney was present at the victories of Lutzen and Bautzen, but he was defeated with great loss by the crown prince of Sweden at Dennewitz. He fell in consequence under Napoleon's displeasure, and was little employed during the rest of the struggle against the allies, which ended in Napoleon's first abdication. On the first return of the Bourbons, Ney professed, and probably felt great willingness to serve them loyally; and when, in 1815, the news reached Paris of Napoleon's escape from Elba, Ney took the command of the army which was sent to oppose him. Ney expressed the utmost devotion to the royal cause, and promised Louis XVII. that he would bring Buonaparte to Paris 'like a wild beast in a cage.' There seems no reason to doubt Ney's sincerity in this unhappy crisis of his career. He was an impulsive, rather than a reflective man; and prone both to speak and act with more enthusiasm than consistency. But, as he advanced against the emperor, he received a letter from Napoleon, who summoned him by the magic name of 'The bravest of the brave' to join his old master beneath the old banner. The army which Ney was leading, showed, both officers and soldiers, their fixed resolve to fight under, and not against Buonaparte. Ney caught the contagion. He became Napoleonist with vehemence equal to that which he had displayed a few days before in the Bourbon cause, and passed over with all his troops to the emperor, who received him with expressions of the warmest passion and welcome. But, though Ney had thus deeply committed himself against the Bourbons, Napoleon seems to have mistrusted him, and to have long hesitated as to employing him in the campaign of 1815. It was only on the night of the 11th of June that Ney received at Paris an order to join the French army in Belgium. Hurrying forward to the frontier, Ney next met Napoleon on the 15th at Charleroi, after active operations had commenced. Napoleon gave him the command of the left wing, and sent him to seize the post of Quatre Bras, and oppose the English. Those who censure Ney's supposed want of promptness in this eventful campaign, should remember that the marshal had been so suddenly appointed to his command, that he did not know the strength of the regiments placed under him, or even the names of their commanding officers. On the 16th, Ney attacked the allies at Quatre Bras, but after many hours' hard fighting was repulsed; though he succeeded in preventing the English from marching to the help of the Prussians, who were being defeated by the emperor at Ligny. On the 18th, Ney acted as the emperor's lieutenant at Waterloo. He led in person several of the fiercest assaults upon various parts of the British line, and especially the final charge of the old guard. Never was his valor more nobly though unsuccessfully displayed. His horse was killed under him in the last great attack, and he was seen, both by friends and foes, on foot, his clothes torn with bullets, his face blackened with powder, striving, sword in hand, first to urge his men forward, and at last to check their flight. On the second restoration of the Bourbons, Ney was brought to trial by them for treason. He was condemned by the Chamber of Peers on the 7th December, 1815; and was shot, in pursuance of his

sentence, on the morning of the next day. He met death with the same firmness with which he had braved it on the battle-field for five and twenty years. Ney was an erring, but a noble-hearted man. He was honorably free from the impurities and vices that tarnish the fame of many of his brethren-in-arms; and, take him for all in all, he was a man in whom even deplorable faults should have been forgiven. [E.S.C.]

NEYN, P. DE, a Dutch painter, 1596-1639.

NIBLOCK, J. W., an English scholar, author of a lexicon and a classical dictionary. Died 1843.

NICAISE, C., a French antiquarian, 1623-1701.

NICAISE, St., a martyr of the 3d century, said to be the first bishop of Rome. Another martyr and saint of the name was bishop of Rheims, 5th century.

NICANOR, commander of the Syrian army for Antiochus Epiphanes, slain by Judas Maccabæus at Bethoron B.C. 161.

NICANOR, or NICATOR. See DEMETRIUS.

NICCOLAI, A., an Italian Jesuit, 1706-1784.

NICCOLAI, J. B., an Ital. mathema., 1726-93.

NICCOLI, N., an Italian writer, 1363-1437.

NICEPHORUS, the name of two saints—the *first*, a martyr of Antioch about 260; the *second*, a Greek historian and patriarch of Constantinople, born about 750, died 828.

NICEPHORUS I., emperor of the East, formerly grand treasurer and chancellor of the empire under Irene, was proclaimed on the fall of the latter 802, killed in war with the Bulgarians 811. NICEPHORUS II., born 912, succeeded 963, assassinated by Zimisceus, one of his generals, who succeeded him 969. NICEPHORUS III., commander of the Asiatic forces proclaimed 1078, deposed by Alexius Comnenus 1081.

NICEPHORUS, a Greek theologian, and metropolitan of Kiev, in Russia, 12th century.

NICEPHORUS-BLEMMIDAS, a learned Greek priest, abbot of a monastery at Miathos, 13th cent.

NICEPHORUS-BRYNNE, a Byzantine general, who became emperor of the East, and was vanquished by Nicephorus (Botoniates) III. 1078. His son, NICEPHORUS, married to Anna, daughter of Alexius Comnenus, known as an historian, d. 1137.

NICEPHORUS, CALLISTUS, a native of Constantinople, was an ecclesiastical historian of the 14th century; author of a 'History of the Church,' and other works of a similar description.

NICEPHORUS, GREGORIAS, a Byzantine historian, who flourished in the 14th century. He was a great favorite of Andronicus Palæologus the elder, who made him librarian of the Constantinopolitan church, and employed him as his ambassador to the Prince of Servia.

NICERON, J. F., a Fr. mathema., 1613-1646.

NICERON, JOHN PETER, an eminent biographer, was born at Paris, in 1685. He entered into the religious order of the Barnabites, and became a celebrated preacher. He was also successively professor of philosophy and theology, and librarian to his society. Died 1738. His principal work is entitled 'Memoirs of Men Illustrious in the Republic of Letters, with an Account of their Works,' 44 vols.

NICETAS, the name of several Greek writers—DAVID, author of a Life of St. Ignatius, 9th century. ACHOMINATUS, or CHONIATES, author of Annals, died about 1216. SERRON, author of several panegyrics and Commentaries, 11th century. EUGENIANUS, a novelist, 12th century.

NICETAS, St., abbot of Mount Olympus, d. 824.

NICETIUS, FLAVIUS, a Gaulonite jurist, 5th c.

NICETIUS, Sr., a bishop of Treves, appointed

527, died 566. Another of the name, bishop of Besançon, died about 612.

NICHOLAS I., pope of Rome, in whose reign the schism between the Greek and Latin churches commenced, 858-867. NICHOLAS II., reigned 1058-1061. NICHOLAS III., 1277-1280. NICHOLAS IV., author of Commentaries, 1288-1292. NICHOLAS V., a great patron of learning, founder of the Vatican library, &c., 1447-1455. An anti-pope (P. de Corbiere) assumed the title of Nicholas V., and died in prison about 1338.

NICHOLAS, an emperor of the East, deposed after a few days' reign by Alexis Ducas, 1204.

NICHOLAS, a king of Denmark, 1104-1134.

NICHOLAS, two dukes of Lorraine—the *first*, born 1448, succeeded John 1470, died 1473. The *second* succeeded his brother, Charles IV., who abdicated 1634, died 1670.

NICHOLAS, three lords of Ferrara, Modena, and Reggio—the *first* reigned 1317-1346; the *second*, 1361-1388; the *third*, 1393-1422. This last, in his nineteenth year, was commander of the papal army directed against Milan, 1403. He caused his second wife, Parasina de Malatesta, to be put to death, together with his natural son, Hugues, for adultery; a circumstance which has furnished Byron with the subject of one of his poems.

NICHOLAS, patriarch of Constantinople, d. 1111.

NICHOLAS, a monk of Clairvaux, 12th cent.

NICHOLAS, EYMERICUS, inquisitor-general of Spain, au. of 'Directorium Inquisitorum,' d. 1393.

NICHOLAS OF MUNSTER, founder of a German sect in the sixteenth century, whose followers called themselves the family or house of Love. He published the 'Evangel of the Kingdom,' and other mystic works.

NICHOLAS, PAULOVITCH, emperor of Russia, was born at St. Petersburg on the 7th of July, being the third son of the emperor Paul by his wife, Mary of Wirtemberg. In July, 1817, he married Charlotte Louisa, eldest daughter of Frederick William of Prussia, and sister of the present king. By this marriage he had four sons and three daughters. The eldest son is the present czar Alexander Nicolaivitch, who was born in 1818. On the death of his eldest brother, the emperor Alexander in 1825, Nicholas ascended the throne in lieu of the Grand Duke Constantine, who had renounced his claims to the succession. On the accession of Nicholas, an insurrection broke out which was quelled, chiefly by the intractability of the czar, who thus established himself firmly on the throne. He was crowned at Moscow September, 1824. In 1828 war was declared between Russia and Turkey, and in 1829 the peace of Adrianople was concluded. In 1830 the Polish revolution broke out and Poland was finally crushed. In March 1854 war was declared by England and France against Russia, and during the excitement of this conflict, Nicholas died on the 2d of March, 1855.

NICHOLAS, WILSON CARY, governor of Virginia, served as an officer in the Revolutionary war. He was for many years a member of the House of Representatives, and in 1799 was chosen senator from Virginia. In 1804 he resigned this office, and became collector of the ports of Norfolk and Portsmouth. In 1814 was appointed governor. Died 1820.

NICHOLLS, CHARLOTTE, better known under the assumed name of Currer Bell, was the daughter of the Rev. Patrick Bronte, an English clergyman, and wife of the Rev. Arthur Bell Nicholls. She commenced her literary career in 1846 by the publication of a volume of poems in conjunction with her

sisters, under the title of 'Poems by Currer, Ellis, and Acton Bell.' She subsequently wrote the three remarkable novels, 'Jane Eyre,' 'Shirley,' and 'Villette,' all distinguished for their minute delineations of startling and almost morbid peculiarity, yet all marked by uncommon genius and force. Died 1855.

NICHOLLS, FRANK, M.D., F.R.S., an eminent English physician, was born in London, in 1699. He was educated at Westminster School, whence he removed to Christchurch, Oxford, where he took his degrees, and became reader of anatomy. On leaving the university he settled in London, and in 1743 he married a daughter of Dr. Mead. He succeeded Sir Hans Sloane as physician to George II., an account of whose death he published in the *Philosophical Transactions*. Died 1779. His works are, 'De Anima Medica,' 'De Mortu Cordis et Sanguinis,' &c.; and a tract against man-midwifery.

NICHOLLS, WILLIAM, an English divine of great learning and piety, was born at Donnington, Bucks, in 1664, and educated at Magdalen Hall, Oxford, after which he became fellow of Merton College, and took his degree of D.D. in 1695; at which time he was rector of Selsey, in Sussex. He died about 1712. Dr. Nicholls published several valuable works: the principal of which were, 'A Conference with a Theist,' 'A Defence of the Church of England,' and 'A Commentary on the Book of Common Prayer.'

NICHOLS, JOHN, a missionary to Bombay, was ordained at Boston 1817, and shortly after sailed for Bombay. Died of fever, 1824.

NICHOLS, JOHN, an antiquary and miscellaneous writer, who for nearly half a century conducted the *Gentleman's Magazine*, was born at Islington, in 1744. Having received a liberal education, he became apprentice, at an early age, to Bowyer, the learned printer, and was subsequently admitted into partnership with his master, on whose death he succeeded to the management of one of the first typographical establishments in London. Among his numerous publications are, 'The History and Antiquities of Leicestershire,' 'Anecdotes of Bowyer,' 'Literary Anecdotes of the Eighteenth Century,' 9 vols.; 'Illustrations of the Literature of the Eighteenth Century,' 6 vols. His personal exertions as well as his pen were frequently used to promote charitable purposes, and he had sometimes the gratification of being able to assist the indigent sons of genius in his office of registrar of the Literary Fund. Died 1828.

NICHOLS, R., a poetical writer, born 1584.

NICHOLS, W., a learned divine, 1664-1712.

NICHOLSON, JAMES, a naval officer in the American service, was born at Chestertown, Maryland, in 1737, and at an early age sent to sea. This occupation he followed until 1763, when he married in New York, and resided there some years. In 1776, he obtained the command of a ship-of-war called the *Defence*, fitted out by the government of Maryland, and soon retook some vessels which the British had captured. In June, 1780, when in command of the frigate *Trumbull*, of 32 guns, he fought a severe action with the *Wyatt*. In 1801 he was appointed commissioner of loans for the State of New York. Died September 2, 1804.

NICHOLSON, JOHN B., an American commodore. Entered the navy in 1806, was fourth lieutenant of the *United States* when she captured the *Macedonian*, and first lieutenant of the *Peacock* in the engagement with the *Epervier*. Died 1846.

NICHOLSON, JOSEPH HOPPER, chief judge of the sixth judicial district, and a judge of the court

of appeals of Maryland. He was for several years a distinguished member of Congress. In 1805 he was appointed judge. Died 1817.

NICHOLSON, WILLIAM, an eminent writer on chemistry and natural philosophy, was born in London, in 1758, and went to India at an early age, in the maritime service. In 1776 he became agent, on the Continent, for Mr. Wedgwood; and afterwards settled in the metropolis as a mathematical teacher. He published an 'Introduction to Natural Philosophy,' a 'Dictionary of Chemistry,' and a 'Journal of Natural Philosophy, Chemistry and the Arts,' which was continued for several years; and various valuable compilations. He also took out patents for several inventions; but he was singularly unfortunate in his speculations, and died in indigent circumstances, in 1815.

NICIAS, an Athenian painter, 4th cent. B.C.

NICIAS, an Athenian general, companion-in-arms of Alcibiades and Lamachus, put to death after the ill success of his expedition to Sicily, B.C. 413.

NICOLAI, a Dutch painter, born 1766.

NICOLAI, CHRISTOPHER FREDERIC, a German author and bookseller, of some note in the history of German literature, was born at Berlin, in 1733, and died there in 1811. After studying at the university of Frankfort, to which city he was first sent, in order to learn the book trade, he returned to Berlin, and wrote his 'Letters on the Present State of Belles Lettres,' in 1756. With the aid of other literati, he produced his 'Letters on Modern Literature,' and in 1765 executed his plan of the 'General German Library,' a work which was continued forty years, though he ceased to edit it at the end of the 107th volume, in 1792. Among his other numerous works are, 'The Life and Opinions of Sebaldus Nothanger,' a 'Tour in Germany and Switzerland,' 'Characteristic Anecdotes of Frederic II.,' &c. His criticisms were often severe, and not always just; hence he was frequently involved in disputes with his literary brethren, by some of whom he was treated very unceremoniously. Died 1811.

NICOLAI, E., a Swedish theologian, d. 1580.

NICOLAI, J., a Saxon philologist, died 1708.

NICOLAI, N. A., a German pathologist, 1722-1802.

NICOLAI, N. M., an Italian writer, 1756-1833.

NICOLAI, W., a French writer, 1716-1788.

NICOLAS, A., a French historian, 1622-1695.

NICOLAS, ARMELLE, generally called 'the good Armelle,' was a French servant girl, remarkable for her charity and pious devotion, 1606-1671. Her life was published in 1676, entitled 'The Triumph of Divine Love in the Life of a great servant of God.'

NICOLAS, SIR NICHOLAS HARRIS, an eminent antiquary, was born in Cornwall, 1799. At an early age he entered the navy, and received his commission as lieutenant in 1815, after an active and adventurous service on the coast of Calabria. But he appears to have been now tired of the sea, and to have taken steps to exchange the 'jacket' for the 'gown,' for he was called to the bar in 1825. Shortly afterwards he was elected a fellow of the Society of Antiquities; and he thenceforward devoted himself almost entirely to antiquarian literature, particularly in the departments of genealogy and history; and the works which he produced in rapid succession bore witness at once to his critical acumen and his almost unparalleled industry. Almost all his works have a substantial historical value; such for instance as his 'History of the Battle of Agincourt,' the memoirs in 'The Siege of Carlaverock,' and the 'Scrope

and Grosvenor Roll,' the 'Proceedings of the Privy Council,' his 'Life of Hatton,' and his 'Despatches of Lord Nelson;' but the most useful in aid of other literary men were his 'Chronology of History,' his 'Synopsis of the Peerage,' and his 'Testamenta Vestusta.' Besides producing these substantial works, he was a frequent correspondent of the Gentleman's Magazine; in 1826 he became co-editor of the Retrospective Review; and he subsequently contributed occasionally to the Athenæum, Spectator, and Quarterly Review. In 1831 he received the honor of knighthood; a year later he was nominated chancellor; and, in 1840, grand cross of the order of St. Michael and St. George. Sir Harris prosecuted his favorite studies almost to his latest hour. The last works on which he was engaged were a 'History of the Navy,' and the editing of the papers of Sir Hudson Lowe. Died 1848.

NICOLAS, P., a French mathematician, died about 1720.

NICOLAUS, DAMASCENUS, a native of Damascus, in Syria, who lived in the time of Augustus. He wrote 'A Universal History,' 'Memoirs of Augustus,' &c.

NICOLAUS-MYNEPSUS, a medical writer, 13th century.

NICOLAUS-PRÆPOSITUS, a medical writer, 12th century.

NICOLAY, L. H., a German poet, 1737-1820.

NICOLAY, N., a French traveller, 1517-1583.

NICOLE, CLAUDE, a French poet, 1611-1686.

NICOLE, FRANCIS, a mathematician, was born at Paris, in 1683. He distinguished himself by detecting the falsehood of a pretended quadrature of the circle, and thereby gained a prize of 3,000 livres, which he gave to the hospital of Lyons. Died 1748.

NICOLE, N., a French architect, 1701-1784.

NICOLE, PETER, an eminent French divine, and moralist, was born at Chartres, in 1625. He became a member of the society of Port Royal, where he taught youth with great reputation, and assisted Arnauld in many of his works. In his latter years he espoused the cause of Bossuet against the Quietists, and was engaged in other controversies. His principal works are, 'Moral Essays,' 23 vols.; 'The Perpetuity of the Faith,' and a 'Treatise on the Unity of the Church.' Died 1695.

NICOLEF, N. P., a Russian dram., 1758-1816.

NICOLINO, G., an Ital. singer, celebrated 1697-1717.

NICOLL, JOHN, M. D., a physician of New York, was born in Scotland, and graduated at the university of Edinburgh. In 1719, shortly after his arrival in America, he, with some others, founded the first presbyterian church in New York, and appropriated a considerable part of his property to that purpose. He died in 1743, much regretted, particularly by the poor, to whom he was a kind friend.

NICOLLE, G. H., a Fr. journalist, 1767-1828.

NICOLLS, RICHARD, colonel, first English governor of New York. In 1664 he, with Carr, Cartwright, and Maverick, was appointed to decide all complaints and appeals, either civil, military, or criminal, throughout New England. On 27th August of the same year, he compelled Stuyvesant, the Dutch governor, to capitulate at Manhattan, and changed the name of New Amsterdam to that of New York, where he established a regular government. On September 14, he captured Fort Orange, and gave it the name of Albany. In 1667 he was succeeded in the government by Lovelace, by whom Staten Island was purchased from the Indians.

NICOLO, DEL ABBATE. See ABATI.

NICOLO, properly NICOLO ISOUARD, one of the most favorite theatrical composers of France, was born at Malta, in 1777. At Naples he completed his study of composition, under the famous Guglielmi. When the French evacuated Italy, General Vaubois took him to Paris as his private secretary. Here he formed himself on the compositions of Monsigny and Grétry, and produced the popular opera of 'Cendrillon,' in 1810. In light dramatical composition, he is distinguished for the ease and sweetness of his melodies, the fertility of his imagination, and the happy combination of the modern Italian school with the French. He died at Paris, in 1818.

NICOLSON, WILLIAM, a learned English prelate, was born at Orton, in Cumberland, in 1655; was educated at Queen's college, Oxford; became, successively, bishop of Carlisle, Derry, and archbishop of Cashel; but died suddenly a few days after he was raised to the archiepiscopal dignity in 1727. He published 'The English, Scotch, and Irish Historical Library,' the 'Leges Marchiarum, or Border Laws,' and several other works. He also distinguished himself by the zeal and ability with which he entered into the Bangorian controversy.

NICOMEDES, a Ger. geometrician, 1st c. B.C.

NICOMEDES, the first of the name, king of Bithynia, B.C. 278-250; the second, 148-89; the third, time of Mithridates, 89-75.

NICOT, JOHN, a French statesman, who being sent by Francis I. ambassador to Portugal, brought from thence the tobacco plant, which out of compliment to him received its Latin name of Nicotiana. He was the author of a 'French and Latin Dictionary,' 'Traité de la Marine,' &c. Born, 1530; died 1600.

NICUESSA, D., a Span. navigator, 16th century.

NIEBUHR, CARSTEN, a celebrated traveller, was born at Ludengworth, in Hanover, in 1733. At the age of 22 he went to Hamburgh for the purpose of studying geometry, after which he devoted several years to the study of the mathematics at Göttingen. Count Bernstorff, the Danish minister, having determined to send a scientific expedition for the purpose of exploring Arabia, Niebuhr went as geographer to it, in March, 1761, and, after touching at Constantinople, proceeded to Egypt. Here they remained a year, and reached Yemen, their point of destination, in 1762. In September, 1763, he sailed for Bombay, and in December, 1764, set out on his return overland, through Persia and Turkey. He arrived at Copenhagen in November, 1767, and laid the fruits of his researches before the world in his 'Description of Arabia' and his 'Travels in Arabia,' both of which have been translated into English and other languages. He was the only one that returned from the mission, was liberally rewarded by the Danish monarch, and died in 1815.

NIEBUHR, BARTHOLOMÆUS, son of the preceding, was born at Copenhagen, 1776. He is famous as an historian, diplomatist, and philologist—holding, in fact, such high rank in the first of these characters, that he has originated a new school of historical criticism, and our own Arnold may be numbered among his followers. His father's stories of the East and the new German literature ushered in by such writers as Klopstock, Lessing, and Goethe, fixed his attention when quite a boy; and the Turkish war of 1778, the French Revolution soon afterwards, and other great movements of that age, deeply interested him in the fortunes of states. His memory and capacity of methodizing knowledge were at the same time very great. By his eighteenth year he had acquired, at home and at school,

ten languages, to which, in a few years afterwards, he added as many more; and there were few facts in the compass of history to which he was not able to speak accurately without the aid of books. In 1794 he was sent to pursue his studies at Kiel. In 1796 he went to Copenhagen as private secretary to the Danish minister of finance, Count Schimmelmann, and in 1797, exchanged this office for an appointment in the Royal Library. From 1798 to 1800 was occupied with a literary visit to England and Scotland; and in the last named year he married his first wife, Amelia Behrens, and took up his abode in Copenhagen as secretary to the African Consulate. In 1804 he became first director of the bank and of the East India department of the Board of Trade, besides being promoted to the commission for the affairs of Barbary, of which he had hitherto been secretary. From 1806 till 1810 he was in the Prussian civil service, part of the time as minister at the court of Holland, and, at Berlin, as head of the department for managing the national debt. In 1810, Hardenberg having returned to power, Niebuhr resigned, and became professor of history at the new university of Berlin till 1813. From 1813 to 1816 he was engaged in affairs of state connected with the administration of the German countries reconquered from Napoleon, and in the negotiations of the court of Berlin with England and Holland; besides instructing the crown prince in finance. In 1816 he went on a mission to Rome, and this occupied him till 1823. His object was to procure a frank understanding and recognition of the new development of religion in Germany,—in this, however, he was disappointed, and he once shrewdly observed that he might have made his position much easier there had he only been an Atheist! He turned his lengthened sojourn to account, however, in making those archæological observations, which enter so largely into his histories. At the close of this mission he entered on the most important period of his life, as professor of history at the university of Bonn, and died there 1831. The great work of his life is his Roman history, to which must now be added the series of posthumous works in course of publication—among others his ‘Ancient Ethnography and Geography.’ The novelty and value of these consist in their minute reproduction of the very circumstances, in the midst of which the events of history occurred, and the faculty of the author for judging of similar occurrences from the conflicts of his own times. In politics, he was the friend of constitutional freedom, with guarantees for a national education and religion, and perhaps no greater instance could be found of a statesman whose life and manners so completely represented his convictions. The men of the hour found it difficult to agree with him, simply because he *had* convictions and acted up to them. [E.R.]

NIEL, L., a French composer, died about 1760.

NIELD, JAMES, a man who, like the philanthropist Howard, devoted a great part of his life to the amelioration of human wretchedness, was born at Knutsford, in Cheshire, in 1744; and, coming to London as an apprentice to a goldsmith, afterwards realized a good fortune in that business. In 1773, by his exertions, a society was formed in the metropolis, having for its object the relief and discharge of persons confined for small debts. Of this benevolent institution Mr. Nield was unanimously chosen treasurer, and he continued to discharge that office through life, much to the advantage of the charity, and with great trouble to himself. He travelled not as most do, for pleasure or profit, but to gauge the

depths of human misery, and to alleviate the sufferings of his fellow-men. It was his constant practice in his prison excursions, as he called them, during thirty years, to wait upon the magistrates in cities and boroughs, and respectfully to represent what he saw amiss in their gaols. By these means he was the instrument of producing many substantial improvements, and of diffusing a kindred spirit of beneficence far and wide, so that it would be difficult to estimate the extent of his service in the humane cause to which he cheerfully and perseveringly devoted his time and fortune. He died, universally lamented, in 1814.

NIEMEYER, AUGUSTUS HERMANN, a German theologian and miscellaneous writer, was born at Halle, in 1754, and died there in 1828. He first began to give instructions in the university of Halle in 1777, was appointed professor of theology in 1780, and continued to receive various appointments till 1808, when he was made a member of the estates of the kingdom of Westphalia, chancellor, and rector of the university. In 1813 the university was abolished by Napoleon; but when the Prussian government restored it, he was re-appointed. He produced a great number of works, particularly on the subject of education, the bare titles of which would occupy a very considerable space, besides others on theology, ethics, history, &c. Died 1828.

NIEPPERG, COUNT, an Austrian general, who was a principal agent in the coalition against Buonaparte, and afterwards lived with the empress Maria Louisa, 1771–1828.

NIEREMBERG, JOHN EUSEBIUS, a celebrated Spanish Jesuit, and a distinguished writer. He was born at Madrid, in 1590, took the habit of St. Ignatius, paid great attention to the study of natural history, and was appointed professor at Madrid, where he remained 14 years. His works are both numerous and important. Died 1658.

NIETO, DAVID, a Venetian rabbi, 1654–1728.

NIEUHOFF, JOHN DE, an agent of the Dutch East India Company, who wrote interesting narratives of his embassies to China, &c., 17th century.

NIEULANT, A., a Dutch painter, died 1601.

NIEULANT, W., a Dutch painter, 1584–1635.

NIEUPOORT, W. H., a learned Dutch philologist, professor at Utrecht, about 1670–1730.

NIEUPORT, C. F. A. F. LE PRUD'HOMME D'HAILLY, Viscount de, a French diplomatist, was born at Paris, in 1746. He was early in life admitted into the order of Malta; and after having served in the Austrian army, and in the Maltese expeditions, became *chargé-d'affaires* at the court of the Netherlands; and eventually received from the Prince of Orange the title of chamberlain, and the decoration of the Belgic legion. He was the author of ‘*Mélanges des Mathématiques*,’ &c. Died 1827.

NIEUWELANDT, WILLIAM, VAN DEN, a Dutch dramatic author and painter, 1584–1635.

NIEUWENTYT, BERNARD, a Dutch physician, celeb. as a philosopher and mathematic., 1654–1730.

NIEUWLAND, PETER, a classical scholar, professor of natural philosophy and mathematics at the University of Leyden, was born near Amsterdam in 1764. He wrote several works on science, and could, at an early age, solve any difficult problem in geometry. Died 1794.

NIFO, AUGUSTIN, an Ital. philosopher, d. 1538.

NIGHTINGALE, JOSEPH, a dissenting minister, of very considerable talent, was born in 1775, at Chowbent, in Lancashire; settled in London, and became an author; left the Methodist connection for Unitarianism, and died in 1824. Among his writings are, ‘A

Portraiture of Catholicism,' 'A Portraiture of Methodism,' several volumes of the 'Beauties of England and Wales,' 'English Topography,' and 'Sermons.'

NIGHTINGALL, Sir MILES, K.C.B., &c., began his military career in 1787, and proceeded to India, where he was employed under Sir W. Meadows, and in the campaigns of 1791 and 1792. In 1798 he sailed for St. Domingo; and having executed a commission to Toussaint, the black chief, he returned to England, and afterwards bore a principal part in the continental war. In 1812 he once more visited Bengal; but in 1820 he fixed his residence in England, and was several years a member of parliament for the borough of Eye, in Suffolk. He died in 1829.

NIGIDIUS-FIGULUS, PUBLIUS, a learned Roman and Pythagorean philosopher, to whose assistance Cicero was much indebted in the defeat of Catiline's conspiracy. Being banished by Cæsar as a partisan of Pompey, he died in exile B.C. 45.

NIHUSIUS, B., a Ger. contro. wr., 1584-1657.

NILES, HEZEKIAH, the founder and editor for 25 years of 'Niles' Register' published at Baltimore. Died 1839, aged 63.

NILES, SAMUEL, minister of Abington, Mass., was born in Braintree in 1744, and after graduating at Princeton College in 1769, he was ordained in 1771. Died 1814.

NILES, SAMUEL, minister of Braintree, Massachusetts, was born May 1, 1674, graduated at Harvard College in 1699, and in 1759, sixty years after, he took the degree of master of arts. He was ordained minister of the Second Church in Braintree, in 1711. Died 1762.

NIMMO, A., a Scottish engineer, 1783-1832.

NINIGRETT or NINEGRAD, sachem of Niantick or Nehantick, was one of the Narraganset chiefs when Rhode Island was settled by the whites. In the war with the Pequots in 1637, he assisted the English; but in 1653, being suspected of joining the Dutch in a plan for the destruction of the British settlements, the authorities of the united colonies decided on making war with him. The commissioner from Massachusetts, however, not approving of such a proceeding, it was not then prosecuted. In the following year, war was again determined on against him, when Major S. Willard marched into the Narraganset country, and put him to flight. In 1660, he and other chiefs sold their territory to Mr. Ather-ton and his partners, and in 1662 gave them possession of it. The date of his death is unknown.

NIPHUS, AUGUSTINE, a learned Italian, was born at Sessa, in Naples, in 1473. He became professor of philosophy, first at Padua, and afterwards at Pisa, where his reputation was so great, that Leo X. made him count palatine. He wrote 'Commentaries on Aristotle and Averroes,' 14 vols. fol.; 'De Intellectu et Demonibus,' 'A Treatise on the Immortality of the Soul,' and other works. Died 1537.

NISBET, CHARLES, D.D., first president of Dickinson College, Pennsylvania, and for many years minister of Montrose, Scotland, was born in that country in 1737. He emigrated to America in 1785, and entered on the duties of principal of Dickinson College, to which office he had been appointed before leaving England. Died 1804.

NITHARD, a grandson of Charlemagne, known as a French historian, 790-859.

NITSCH, P. F. A., a German *savant*, 1753-94.

NIVELLE, G. N., a Fr. theologian, died 1761.

NIVELLE, J. DE, a Flemish lord, known as an adherent of the duke of Burgundy, 15th century. Being dispossessed by his father, his estates passed to his third brother, WILLIAM, who was father of the

constable, Anne de Montmorency. See HORN, MONTMORENCY.

NIVELLE CHAUSSEE. See CHAUSSEE.

NIVERNOIS, LOUIS JULIUS MANCINI MAZARINI, Duke de, was born at Paris, in 1716. He was, successively, ambassador at Rome, Berlin, and London, in which latter city he negotiated the peace of 1763. On his return to France he produced several poetical imitations of Virgil, Horace, Tibullus, Ovid, Ariosto, and Milton. He also wrote 'Letters on the Use of the Mind,' 'Dialogues of the Dead,' 'Reflections on the Genius of Horace, Boileau, and Rousseau;' 'Fables in Verse,' 'Dramas,' &c. He was imprisoned by the republicans in 1793, and died in 1798.

NIVERS, G., a Fr. musical writer, died 1707.

NIXON, JOHN, brigadier general, a soldier in the revolutionary war, was born at Framingham, Massachusetts, 1725. He was at the siege of Louisburg in 1745, also fought at Ticonderoga and the battle of Lake George, and distinguished himself at the battles of Lexington and Bunker Hill, where he commanded a regiment. In 1776, he was promoted to the rank of brigadier general, and in 1777 served under General Gates. He retired from the army in 1780. Died 1815.

NIXON, SAMUEL, an English sculptor, died 1854, aged 51.

NIZAM AL MULK, an enlightened Persian, who, in the 11th century, rose from obscurity to be vizier to the sultan Alp Arslan. He was an able statesman and a consummate general; but, above all, a zealous patron of learning, having founded and endowed the once famous college of Bagdad, and numerous other seminaries of education, while his palace was always open to men of genius, many of whom he pensioned. He was also distinguished as the historian of his own times. At the age of 90 he met his death from the hand of an assassin, while reading a petition which his treacherous foe had just presented to him.

NIZAM-EL-MOLOUK, or AL-MOULK, viceroy of the Deccan under Mohammed Shah, the Mogul emperor, to whose dethronement, by Nadir Shah, he was an active party; died 1748.

NIZAMI, a Persian poet, died 1180.

NIZZOLI, M., an Italian scholar, 1498-1575.

NOAH, MORDECAI MANASSEH, an American journalist, was born in Philadelphia 1785, and died at New York 1851, where he had resided for the most part of his active life, filling various political offices, and editing successively the *National Advocate*, the *Enquirer*, the *Evening Star*, and the *Sunday Times*. He was the author of a book of travels, the result of his observation while consul to Morocco, and of a drama, &c.

NOAILLES, a noble French family, many members of which are distinguished in history. The principal are—ANTHONY, admiral of France under Henry II. 1504-1562. FRANCIS, brother of Anthony, ambassador to Venice, Constantinople, and London, 1519-1585. LOUIS ANTHONY, second son of Anne, first duke of Noailles, cardinal and archbishop of Paris, noted for his vacillation in the religious quarrels of the age, first against the Jansenists, and afterwards against the Bull Unigenitus, 1651-1729. ANNE JULIUS, brother of the latter, a marshal of France, 1650-1708. ADRIAN MAURICE, son of Anne Julius, duke and marshal, distinguished in the Spanish war of succession, afterwards commander in the wars of 1733-5 and 1743 when he lost the battle of Dettingen. He was subsequently known as a statesman, and is the author of Political

and Military Memoirs, 1678-1766. LOUIS, eldest son of the latter, duke and marshal, perished on the scaffold, 1713-1793. PHILIP, his second son, known as the marshal and duke de Mouchy, perished on the scaffold, 1715-1794. JEAN PAUL FRANCIS, eldest son of Louis just mentioned, 1739-1824. EMMA-NUEL MARIE LOUIS, marquis de Noailles, brother of the latter, 1743-1822. PHILIP LOUIS MARK ANTONY, prince de Poix, eldest son of Philip, the before-mentioned marshal de Mouchy, commander of a regiment of dragoons that had been raised by his grandfather in the war of succession, and a partisan of the Bourbons, 1752-1819. CHARLES, his son and successor in the command and the dukedom, 1771-1834. LOUIS MARK ANTONY, viscount de Noailles, second son of the marshal de Mouchy, and uncle of the last mentioned, born 1753. He was one of the first among the noblesse to join the commons in the estates-general 1789, and was killed at the Havana 1804. ALEXIS, count de Noailles, son of the preceding, a diplomatist of the restoration, 1783-1835. ALFRED, brother of the latter, born 1786, killed in the retreat from Russia, 1812.

NOBILI, R., a Roman Jesuit, 1606-1656.

NOBLE, MARK, an industrious writer on history and biography, was a clergyman of the Church of England, and presented to the rectory of Barming, in Kent, in 1784, at which place he died in 1827. He was the author of 'Memoirs of the Protectorate House of Cromwell,' 2 vols.; 'Memoirs of the Illustrious House of Medici, with Genealogical Tables,' 'The Lives of the English Regicides,' 2 vols.; a 'History of the College of Arms,' and a supplementary continuation of 'Granger's Biographical History of England,' 3 vols. He also wrote several papers in the *Archæologia*, and was F.S.A. Lond. et Edin.

NOBLE, PATRICK, a governor of South Carolina. He was an eminent lawyer and politician. Born in 1787, died 1840.

NOBLE, SAMUEL, a learned minister of one of the congregations formed by the receivers of the writings of Swedenborg, author of an 'Appeal' on behalf of those doctrines, and of 'The Plenary Inspiration of the Scriptures,' designed to enforce and illustrate the internal sense of the Word; died 1853.

NOCETI, C., an Ital. *savant*, about 1695-1759.

NOEHDEN, GEORGE HENRY, a learned German writer, who for many years resided in England, was born in 1770, at Gottingen, where he received his education. Being introduced to the late Sir William Milner, in 1793, he attended his son to Eton in the capacity of private tutor. Here he obtained the friendship of Jacob Bryant, Herschell, &c., till the education of his young pupil being completed, he accompanied a younger son of the same family to Gottingen, where he wrote a dissertation, 'De Porphyrii Scholiis in Homerum.' After visiting the courts of Brunswick and Berlin, they returned to Eton, and in 1800 Noehden published his admirable 'German and English Grammar.' He was an excellent numismatologist, and some years before his death obtained the chief situation in that department of the British Museum. He died in 1826, leaving unfinished his 'Essay on the Northwick Coins,' an 'Introduction to Numismatology,' &c.

NOEL, F., a Germ. Jesuit, known as a Chinese scholar and missionary, born about 1640, died 1715.

NOEL, F. J., a French scholar who fulfilled many administrative and diplomatic functions, and wrote many useful works of research, the principal of which is his 'Dictionnaire de la Fable,' 1755-1841.

NOEL, P., a Flemish painter, died 1823.

NOETUS, an Asiatic theologian, supposed to have

flourished about the middle of the 3d century. The Noetian Creed, attributed to him, is an endeavor to state the doctrine of Christ's divinity, without supposing a trinity of separate persons.

NOGAROLA, ISOTTA, a lady of Verona, remarkable for her beauty, her learning, and her talents for poetry, 1428-1466. A brother of hers, named LEONARDO, is also known as a theological writer.

NOGAROLA, L., an Italian *savant*, 16th century.

NOGAROLA, T., an Ital. theologian, 18th cent.

NOIROT, CLAUDE, a Fr. writer on the origin of Masks, Mummings, &c., born 1570, published 1609.

NOLAN, LEWIS EDWARD, a brave English officer who fell killed by a shell at the age of 36 in the rash charge of the British Light Cavalry, of which he was a captain in the hussars, against the Russian artillery at Balaklava during the siege of Sebastopol, 1854. He was the author of a work connected with his profession on the organization, drill and manoeuvres of cavalry corps.

NOLAN, MICHAEL, an eminent lawyer, a native of Ireland, who, after distinguishing himself at the English bar, obtained the office of chief justice of the Brecon circuit, in Wales. He published 'Reports of Cases relating to the Duty and Office of a Justice of the Peace,' and other practical law books; and was particularly conversant with the poor laws, tithe laws, &c. Died, 1827.

NOLDIUS, CHRISTIAN, a learned Danish minister and professor of divinity, 1626-1683.

NOLLEKENS, JOSEPH FRANCIS, was a native of Antwerp, who settled in London, where he obtained considerable reputation as a painter, and died in 1748. His style resembled that of Watteau, whom he closely imitated.

NOLLEKENS, JOSEPH, son of the preceding, was a celebrated sculptor, and born in London, in 1737. He was placed under Scheemakers, the sculptor, on leaving whom he went to Italy, and studied there some time under Ciavetti. While at Rome, he gained a gold medal from the academy of painting, sculpture, and architecture; and on his return to England, in 1770, he became a royal academician, executed many works of great beauty, and was so extensively employed, particularly on busts, that he realized a fortune of £200,000. Nollekens was chiefly distinguished by his careful and accurate imitation of nature, and by the absence of a peculiarity of manner. He was a great favorite with George III., and possessed many peculiarities of character, of which his inordinate love of money was not the least. D. 1823.

NOLLET, D., a Flemish painter, 1640-1736.

NOLLET, JOHN ANTOINE, a French natural philosopher, was born in 1770, at Pimbré, near Noyon. He was lecturer on experimental philosophy to the duke of Savoy, and afterwards to the royal family in his native country; he also held the professorship of physics in the college of Navarre at Paris, and was a member of the Royal Society and other learned bodies. He wrote 'Leçons du Physique Experimentale,' 6 vols.; besides some works on electricity, and other scientific subjects. Died 1770.

NOMSZ, JAN, a Dutch poet, 1738-1803.

NONIUS, MARCELLUS, a philosopher, 4th century.

NONIUS or NONNIUS, the Latinized name of Pedro Nunez, a Portuguese mathematician, 1492-1577.

NONIUS, or NONNIUS, LEWIS, a Spanish physician and philologist, born about 1560.

NOODT, GERARD, a famous civilian, was born in 1647, at Nimeguen, where he was chosen professor of law in 1671. He afterwards settled at Leyden, of which university he became rector, and died in 1725. He published a collection of his works in 1713, which

are wholly on subjects of jurisprudence, and are esteemed of high authority.

NORBERG, or NORDBERG, DR. GEORGE, a Swedish historian, chaplain and biographer of Charles XII., 1677-1744.

NORBERG, MATTHIAS, a Swedish Orientalist, prof. of Greek and theology at Upsala, 1747-1826.

NORBY, S., a Danish admiral, killed 1530.

NORDEN, FRED. LOUIS, a Danish traveller, author of 'Memoirs upon the Ruins and Colossal Statues of Thebes,' and of 'Travels in Egypt and Nubia,' both illustrated, 1708-1742.

NORDEN, JOHN, an old English writer, who is conjectured by Wood to have been a native of Wilts. He received his education at Oxford, and wrote some strange books in divinity, with very whimsical titles, as 'The Sinful Man's Solace,' 'Antithesis, or Contrariety between the Wicked and Godly set forth in a Pair of Gloves fit for every Man to wear,' &c. He was also the author of the 'Surveyor's Dialogue,' 'Labyrinth of Man's Life,' a poem, 'England, or a Guide for Travellers,' and 'Topographical Descriptions of Middlesex, Hertfordshire, and Cornwall.' He was surveyor of the king's lands, and died about 1625.

NORDENANKER, J. DE, a Swedish naval commander, author of several memoirs, last century.

NORDEN-FLEICHT, HEDWIGE CHARLOTTE DE, a lady of Stockholm, known in Sweden as a poetess, 1719-1763.

NORDENHEIM, J. CHRISTOPHER, a Swedish physician, and writer on Hereditary Diseases, died 1719.

NORDENSCHOLD, a Swedish governor of Finland, distinguished as a political economist, d. 1764.

NORDENSKJOLD, AUGUSTUS, a Swedish traveller, and one of several followers of Swedenborg who interested themselves in African enterprise, close of last c.

NORDHEIMER, ISAAC, a Hebrew scholar and professor of that language in the New York Union Theological Seminary. Died 1842.

NORDIN, CHARLES GUSTAVUS, a Swedish *savant* and statesman, author of 'Materials for Swedish History,' 1749-1812.

NORFOLK, ROGER BIGOD, earl of, one of the barons who compelled Henry III. to confirm Magna Charta, died 1270. His nephew, of the same names, distinguished in the reign of Edward I., about 1301. See HOWARD.

NORGATE, EDWARD, an English artist, was born at Cambridge, where his father was master of Bene't College. He was employed by the earl of Arundel to purchase pictures in Italy; but not being supplied with remittances, he was compelled to return without executing his commissions; and was afterwards made one of the clerks of the signet, and Windsor herald. He died in 1650, and was considered one of the finest illuminators of his age.

NORIS, HENRY, a learned Italian cardinal of Irish descent, author of a 'History of Pelagianism,' and chief librarian of the Vatican, 1631-1704.

NORIS, M., a Venetian dramatist, 1640-1710.

NORMAND, CL. J., a Fr. antiquary, 1704-61.

NORMANN EHRENFELS, CHARLES FREDERIC LEBRECHT, Count de, a distinguished military officer, born at Stuttgart, in 1784. He entered the Austrian service at the age of 18, in 1809 he became a colonel, and in 1813 commanded the light cavalry of the guard of Napoleon during the campaign of Russia. After the battle of Leipsic he refused to serve against the French, and sought refuge in Saxony. On the insurrection taking place in Greece, in 1822, he embarked at Marseilles, with a number of German officers, and, on arriving at Greece, he was appointed by the government com-

mandant of the fort of Navarino. After organizing a battalion of Philhellenes at Corinth, he joined Mavrocordato, had a share in the brilliant victory of Combotti, was severely wounded at Peta, and died during the same year, at Missolonghi.

NORRIS, JAMES (of Nonesuch House, Devizes), an eccentric miser, who, though possessing great wealth, lived the life of a secluded pauper, and died, without a friend to solace him in his last moments, January, 1835.

NORRIS, JOHN, founder of a professorship and prize essay at Cambridge university, 1734-1777.

NORRIS, JOHN, second son of Henry, first Lord Norris, distinguished in the military service of France during the civil wars of that country. He went to Ireland with the earl of Essex, and afterwards served in Flanders under the archduke of Austria, the duke of Lorraine, and William of Nassau. In 1585 he was commander of the English troops sent to the aid of Antwerp. In 1588 he was intrusted with the power of the crown in Ireland by Queen Elizabeth, and in 1591 commanded the troops sent in aid of Henry of Navarre against the leaguers. He returned to his Irish government in 1594, and died a few years after. [E.R.]

NORRIS, JOHN, whose name ranks among the principal of our philosophical divines, was born at Collingbourne Kingston, in Wiltshire, of which place his father was rector, 1657. He took his bachelor's degree at Oxford in 1680, and was admitted M.A. 1684. In 1689 he became rector of Newton Sodoc in Somersetshire; in 1691 was promoted to the richer living of Bemerton near Salisbury; and died there in 1711 after a life of hard study, which probably hastened his end. Norris, at college, was an ardent student and admirer of Plato, and when, a few years afterwards, the tendency of Locke's philosophy to one extreme of belief, provoked a controversy which travelled the length and breadth of Europe, he was found with the opposite party—followers of Cartesius and Malebranche. He published his principal work in 1701, entitled 'An Essay towards a Theory of the Ideal or Intellectual World,' written, professedly, in support of Malebranche—the theory that we perceive all things in God, whose thoughts, to use such a term, are our ideal forms. Norris, in short, was an idealist, to the extent of declaring that after all that had been argued from the time of Descartes to his own, the existence of external objects of sensation is only probable but by no means *certain*. His other works, which rank in the Platonic class of divinity with those of Henry More, his contemporary and correspondent, are 'The Picture of Love Unveiled,' translated from Waryng, 'An Ideal of Happiness,' 'Theory and Regulation of Love,' 'Reason and Religion,' 'The Natural Immortality of the Soul,' together with poems and discourses on a variety of subjects. [E.R.]

NORRIS, SIR JOHN, a brave naval officer, who served his country nearly sixty years, commencing in 1689, and terminating, with his life, in 1749. The frequent accidents and misfortunes which befell the ships and squadrons under his command, and which could not be warded off by any human prudence or sagacity, procured him the appellation of 'Foul-weather Jack;' yet in the duties of his profession no man could be more assiduous; and so well did he second the exertions of his friend Sir Cloudesly Shovel in the Mediterranean, that the queen knighted him, and otherwise handsomely rewarded him.

NORRIS, JOHN, one of the founders of the theological seminary in Andover, and a munificent benefactor to that institution. He was, for many years,

engaged in mercantile pursuits, in which he acquired a large fortune. He was elected to the senate of Massachusetts at different times. Died 1808.

NORRIS, ROBERT, a native of Liverpool, famous for his sojourn of eighteen years on the coast of Guinea. He wrote 'Memoirs of the Reign of Bossa Ahadee, king of Dahomey, an inland country of Guinea, to which is added the author's journey to Abomey the capital,' published in London, 1789.

NORRIS, S., a theological writer, died 1630.

NORRMAN, L., a Swed. Oriental., 1654-1703.

NORRY, C., a French architect, author of a Memoir of the Expedition to Egypt, which he accompanied, 1756-1832.

NORTH, Sir EDWARD, an eminent lawyer in the reigns of Henry VIII. and Queen Mary, by the latter of whom he was created baron North, of Catlidge, in Cambridgeshire.

NORTH, DUDLEY, Lord, great grandson of the preceding, was born in 1581, and succeeded to the title in 1600. In the civil war he espoused the cause of the parliament, and died in 1666. His son, of the same name, wrote a 'History of the Life of Edward Lord North,' &c., and is classed by Walpole among the 'Royal and Noble Authors.' He left four sons, all of whom attained political or literary eminence.

[Lord North.]

NORTH, FREDERIC, earl of Guildford, better known as Lord North, was of the same family as the foregoing, and was born in 1732. He was educated at Eton, and at Trinity College, Oxford. After having held several less important offices, he was, in 1767, appointed chancellor of the exchequer, and, in 1770, first lord of the treasury. His administration continued through the whole of the American war, a period of peculiar difficulty and danger, during which he was incessantly assailed by the opposition, and was often threatened with impeachment. On his resignation of office however, in 1782, instead of instituting against him that impeachment which they had so long threatened, a coalition was formed between him and the Whigs; but this heterogeneous administration lasted only a few months, after which Lord North held no responsible station in the state. He was distinguished for urbanity of manners and a

turn for repartee. For several years previous to his death he was afflicted with blindness. Died 1792.

NORTH, GEORGE, an English antiquary and writer on numismatics, was born in London, in 1710; received his education at St. Paul's School, and Bene't College, Cambridge; became rector of Codicote, in Hertfordshire; and died in 1772.

NORTH, WM., a miscellaneous writer, born in England but removed to New York, where he died by his own hand in 1854, at the age of 30.

NORTHAMPTON, EARL OF. See HOWARD.

NORTHAMPTON, SPENCER JOSHUA ALWYNE COMPTON, marquis of, well known for his love of science and literature, was born 1790, and succeeded to the title of his father in 1828. He was known in the House of Lords as an advocate of popular measures; but the arena in which he chiefly distinguished himself was that already indicated. From 1838 till 1849 he held the presidency of the Royal Society, and during this period his mansion was the scene of frequent and brilliant reunions of the most distinguished men in philosophy, art, and literature. The marquis of Northampton was also one of the presidents of the British Association, and he filled the same office in the Royal Society of Literature at the time of his death, 1851.

NORTHCOTE, JAMES, an eminent portrait and historical painter, was born in 1746, at Plymouth, where his father was a watchmaker. Having a taste for the fine arts, and being flattered by praises bestowed on his early productions, he pursued the practice of drawing and painting with so much assiduity, that Dr. Mudge, a physician of Plymouth, recommended him as a scholar to Sir Joshua Reynolds, with whom he remained five years; and on leaving that great artist he commenced business on his own account, with great success, as a portrait painter. Aspiring, however, to the loftier, though less lucrative department of historical painting, he visited Italy in 1777, and remaining there three years, he returned to London with a vastly increased reputation. In 1787 he became a royal academician; and for a period of 30 years his productions formed a conspicuous part of the exhibitions at Somerset House. He studied deeply, was an acute observer of human nature, and possessed a sound judgment, a quick perception, and great conversational powers. He wrote 'The Life of Sir Joshua Reynolds,' also 'Fables,' 'Conversations,' and 'The Life of Titian,' in all of which he was assisted by Mr. Hazlitt. He amassed a large fortune by his profession, and his habits were too penurious to dissipate it. He died, aged 85, in 1831.

NORTON, LADY F., a religious wr., died 1720.

NORTON, JOHN, a writer in the reign of Charles II., who published a curious book, called 'The Scholar's Vade-mecum,' in which he endeavored to alter the orthography of the English language.

NORTON, JOHN, a minister of Boston, was a native of Hertfordshire, England. After studying theology, he conformed to the creed of the puritans, and in 1635 emigrated to America, and settled in the ministry at Boston. He published several works on theology. Died 1663.

NORTON, JOHN P., an Amer. chem. and prof. of agricultural chemistry in Yale College. Died 1852.

NORTON, THOMAS, an English writer of the 16th century, was a native of Bedfordshire. He was a zealous Calvinist, and wrote an 'Epistle to the Queen's poor deceived Subjects of the North Country,' a 'Warning against the dangerous Practices of the Papists,' and other tracts against Popery. He was also the author of 27 of the Psalms of David,

in the version of Sternhold and Hopkins; and he assisted Thomas Sackville in his tragedy of 'Ferreus and Porrex.' Died 1584.

NORVIUS, M. DE, a French writer, author of a 'History of Napoleon.' Died 1854.

NORWOOD, RICHARD, an English geometrician of the 17th century, was the first person who measured a degree of the meridian in England. This was executed in 1635, the operations being carried on between London and York. He wrote treatises on navigation, trigonometry, and fortification; but no particulars of his life are recorded.

NORZI, SOLOMON, an Italian rabbin, 17th cent.

NOSTRADAMUS, MICHEL, a physician of Provence, known as an astrologer in the time of Catherine de Medici. He composed 'Seven Centuries of Prophecies' in enigmatical rhymes, some of which are admitted to have been most exactly fulfilled; among others his prophecy, a hundred years before its occurrence, of the execution of Charles I., and still more surprising, of the exact date of the French Republic, 1792. He died in 1566. His brother, JOHN, known as an historical writer, died 1590. His son, CÆSAR, a poet and historian, flourished 1555-1629. MICHEL, another son, known as an astrologer and prophet like his father, died 1574.

NOTARAS, C., a patriarch of Jerusalem, d. 1733.

NOTT, JOHN, M.D., an elegant poet and oriental scholar, was born at Worcester, in 1751. After studying surgery at Birmingham, he visited Paris for further instruction, and subsequently went out to China, as surgeon in an East Indiaman. In 1788 he graduated in medicine, and soon after attended the Duchess of Devonshire to the Continent, in quality of family physician; in 1793 he returned to England, and settled at Clifton, where he continued to reside till his death, in 1826. Among his numerous writings are, 'Alonzo, a poetic Tale,' 'Poems from the Italian of Petrarch,' the 'Cynthia' of Propertius; some elegant translations of the odes of Hafiz; an edition of 'Catullus,' with the Latin text rendered into English verse, and classical notes, 2 vols.; 'The Odes of Horace,' 2 vols.; a translation of the 'Basia' of Johannes Secundus, 'Sappho, after a Greek Romance,' &c. He also published some professional works, viz.: 'A Chemical Dissertation on the Springs of Pisa and Asciano,' 'A Nosological Companion to the London Pharmacopœia,' &c.

NOTT, Major-general Sir WILLIAM, one of the successful heroes of the late Affghan war, was the son of an extensive mail-contractor and proprietor of the Ivy-bush hotel at Carmarthen, where the distinguished soldier was born in 1782. From his earliest youth he had shown a strong predilection for the profession of arms, and he went out to India as a cadet in 1800; but although his talents and gallantry were well known, he was unpatronized, and no striking event occurring to accelerate his progress, we find him only arriving at a majority after a servitude of 26 years. His health at that time being seriously affected, he returned on leave of absence to England, visited his native place, and there purchased an interesting seat called 'Job's Well,' where he resided a few years. The failure of the Calcutta bank in which he had invested the greater part of his savings, having rendered it necessary for him to resume his active duties as a soldier, he, at 50 years of age, returned to India to engage in a fresh career. 'To relate "the moving accidents by flood and field" through which this gallant officer led the troops under his command, would be to write a volume, for which the materials are alike interesting and abundant. By an exercise

of skill, judgment, and valor, not often equalled, and probably never surpassed, he extricated the British army from difficulties by which they were surrounded in Affghanistan, and succeeded in conveying them, and several captives, whom he released, across the frontier, bringing them with perfect safety, and without any loss of honor, within the limits of her majesty's dominions. The victories which he achieved in Candahar closed the Affghan war, and drew forth the gratitude and applause of the whole British empire; even the Duke of Wellington departed from that peculiar severity of taste which marks his generally sparing eulogium, and with a fervor unusual to him, he—the best possible judge of Indian warfare—pronounced in a manner the most emphatic his unqualified admiration of General Nott. The crown, of course, lost no time in conferring on him, the highest military distinction—that of a knight grand cross of the Bath; neither was parliament slow to give expression to the national sentiment.' The Affghan war concluded, Sir William hastened to return to England, the hardships of a military life and the insalubrity of an Indian climate seeming to render repose absolutely necessary for the restoration of his shattered health; but he had not long revisited his native town when the unfavorable symptoms increased, and he died on the 1st of January, 1845.

NOTTINGHAM. See FINCH, HOWARD.

NOUE. See LANOUE.

NOUET, JAMES, a French ascetic, 1605-1680.

NOUET, N. A., a French astronomer, d. 1811.

NOUGURET, P. J. B., a Fr. novelist, 1742-1823.

NOULLEAU, J. B., a Fr. theolog., 1604-1672.

NOUR-DJIHAN, wife of the Mogul emperor, Djihan-Guir, famous for the happy influence which she exercised over him, and said to be the discoverer of the essence of roses, reigned 1611-1645.

NOUR-ED-DEEN-ALI, sult. of Egypt, 1257-59.

NOUR-ED-DEEN-MAHMOUD, MELEK-EL-ADEL, commonly called NOURADIN, or NOUR-ED-DEEN, a celebrated Moslem ruler of Syria and Egypt, born 1117, succeeded his father in Syria 1145, commenced the conquest of Egypt after the death of Baldwin III., king of Jerusalem, 1162, died when he was preparing to march against his ambitious lieutenant, Saladin, 1174.

NOUWAYRI, SHEHAB-ED-DEEN AHMED, an Arabian historian and encyclopædist, 1283-1331.

NOVA, J. DA, a Spanish navigator, 16th cent.

NOVALIS, the literary cognomen of FRÉDERICK VON HARDENBERG, a German literateur and poet, born at Mansfield near Eisleben, 1772, died 1801. His works were published by Tieck and Schlegel in 1814—the principal of them being lyrical poems and the philosophical romance 'Heinrich Von Ofterdingen.'

NOVATUS, a presbyter of the church of Carthage in the time of Cyprian, who procured his excommunication for heresy, and gave him occasion to form a new church. After this, in 251, Novatus went to Rome and became a partisan of his namesake, the subject of the following article.

NOVATUS, NOVATIAN, or NOVATIANUS, supposed to be a native of Phrygia, and to have been educated as a Stoic philosopher, was a presbyter of the Roman Church, distinguished for his learning and eloquence. He is called the first anti-pope, from being chosen bishop of Rome by a minority of the clergy at the same time as Cornelius, whose election was confirmed by a council in 251. The party of Novatian was distinguished by their refusal to re-admit apostates to the communion of the church. This, with some other points of discipline,

gained for them the appellation of Cathari, or Puritans. The time of his death is uncertain.

NOVELLO, MARY SABILLA, an English novelist, wife of the musical composer V. Novello, and mother of Mary Cowden Clarke. Died 1854, aged 67.

NOVERRE, JOHN GEORGE, a great master of the art of dancing, was born at Paris, in 1727. He was destined by his father, who was an adjutant in the army of Charles XII., for the military profession; but his taste led him to prefer the graceful movements of Terpsichore. In 1746 he composed for the comic opera his noted Chinese ballet, which made an extraordinary sensation; and he acquired so much celebrity, that Garrick invited him to England, where his talents attracted great admiration. After adding to his fame, and receiving honors and rewards from several princes on the Continent, he entered into the service of Marie Antoinette, queen of France, who appointed him chief ballet master of the royal academy of music; but he suffered greatly at the revolution, and passed the latter years of his life in indifferent circumstances. In his 'Lettres sur la Danse' he proposed a radical reformation of his art; and at the time of his death he was engaged on a 'Dictionary of the Art of Dancing,' intending to rectify the errors of the Encyclopédie on the subject. Died 1810.

NOVES, LAURA DE, immortalized by the pen of Petrarch, was born near Avignon, in 1307; married Hugh de Sade in 1325; and died, 1348.

NOVIKOFF, N. I., a Russian au., 1744-1818.

NOWELL, ALEXANDER, a dignitary of the Church of England, and the last surviving father of the reformation in England, was born at Whalley, in Lancashire, 1507 or 1508. He was first employed as second master of Westminster school, and, in 1551, became one of the prebendaries of Westminster. He was among the exiles at Strasburg in the reign of Queen Mary, and, returning on the accession of Elizabeth, he became dean of St. Paul's in 1560. He is the author of the Church of England Catechism, and the founder of a free grammar school in his native county, and of thirteen Oxford scholarships. Died 1602.

NOWELL, LAURENCE, younger brother of the preceding, became dean of Lichfield, and is known as the author of a Saxon Dictionary, now in the Bodleian library; died 1576.

NOWELL, INCREASE, secretary of the Massachusetts colony, emigrated to America with Winthrop in 1630. He was soon chosen ruling elder, but resigned in 1632. In 1634 he was a commissioner for military affairs, and in 1644 was appointed secretary, which office he held till 1649. Died in 1655, in indigent circumstances.

NOY, WILLIAM, a celebrated lawyer of the 17th century, who may be considered as one of the main authors of the civil war between Charles and his subjects, inasmuch as the fatal project of attempting to raise supplies, by what was called ship-money, is said to have been advised by him. He had originally labored to abridge the royal prerogative; but being made attorney-general, he suddenly veered about, and became its most strenuous supporter. Died 1634. Among his works are, 'A Treatise on the Grounds and Maxims of the Law of England,' 'The Perfect Conveyancer,' and 'The Complete Lawyer.'

NOYES, ELI, an American Baptist divine, and author of a Hebrew Grammar, &c. Died 1854.

NOYES, JAMES, a distinguished minister of Stonington, Conn., also practised as a physician (chiefly gratuitously), was born in 1640, graduated at Har-

vard College in 1659, and was ordained in 1674, having preached for ten years previously. He was one of the first trustees of Yale College, also a councillor in civil affairs. Died 1710. His brother, MOSES NOYES, was minister of Lyme. Died 1729. His son, JOSEPH, was minister of New Haven. Died 1761.

NOYES, JAMES, one of the first ministers of Newbury, Mass., was a native of Wiltshire, England, born in 1603, and was educated at Oxford. Not wishing to comply with the forms of the established church, he emigrated to America with Mr. Parker in 1634, and in the following year was established with him at Newbury, where he remained for twenty years. Mr. Noyes was much esteemed by his congregation, and had the reputation of being one of the most eminent men of his time. Died in 1656.

NOYES, NICHOLAS, minister of Salem, Mass., was born in Newbury, Dec. 22, 1647, graduated at Harvard College in 1667, and after preaching for several years at Haddam, was ordained in 1683. Died 1717.

NUCK, ANTHONY, a skilful Dutch anatomist, who was professor of anatomy, and president of the college of surgeons, at Leyden, where he died in 1692. He was the discoverer of a new salival duct, of the communication between the red veins and the lymphatics, and of a mode of making preparations of the lungs by inflation. His principal works are, 'De Vasis aquosis Oculi,' 'De Ductu Salivali novo,' and 'Operationes et Experimenta Chirurgica.'

NUGENT, GEORGE GRENVILLE, Lord, second son of the Marquis of Buckingham, and brother of the late duke, was born 1789. In his younger days he was known as Lord George Grenville; under which name he published a long poem on that portion of the Peninsular war of which Portugal was the scene. In 1812 he succeeded to an Irish barony on the death of his mother, who had been created a baroness in 1800, with remainder to her second son. During four parliaments previous to the reform bill, he sat in the House of Commons for Aylesbury, displaying great ardor as a politician, and taking an active part in promoting parliamentary reform, and all the liberal measures of the day. On the accession of the Whigs to office in the year 1830, he was appointed a junior lord of the treasury, and in that capacity he introduced the only legislative measure with which his name was ever mixed up; a bill for the abolition of certain oaths, which it was formerly necessary to take for the most ordinary objects connected with the revenue laws, and the substitution of simple declarations in their place. In 1832 he vacated his seat in parliament on being appointed lord high commissioner of the Ionian Islands, which office he held until 1835. He was recalled during the short administration of Sir Robert Peel, and he was an unsuccessful candidate for Aylesbury at the general elections of 1837 and 1839, but succeeded in being returned in 1847. Besides the poem above mentioned, Lord Nugent was the author of several other works. His 'Memorials of Hampden and his Times,' published in 1831, was favorably noticed in the Edinburgh Review by Mr. Macaulay; and his 'Lands, Classical and Sacred,' possesses much merit. Died 1850.

NUGENT, ROBERT CRAGGS, Earl, a native of Westmeath, in Ireland, was bred in the Roman Catholic faith, but quitted it for that of the established church, and then became a member of the English parliament. He was three times returned for Bristol. In 1767 he was created Viscount Clare, and, in 1776, earl Nugent. He was the author of a

volume of poems, some of which possess considerable merit.

**NUGENT, THOMAS**, was a native of Ireland, but settled in London, where he produced numerous works. He was an LL.D. and F.S.A.; and occupied himself in writing and compiling a variety of publications, several of which possess much merit. Among them are, 'A French and English Dictionary,' which has been often reprinted; 'Travels through Germany,' 2 vols.; 'Observations on Italy and its Inhabitants,' 2 vols.; 'The Tour of Europe,' 4 vols.; 'Condillac's Essay on the Origin of Human Knowledge,' 'Henault's History of France,' &c. Died 1772.

**NUMA POMPILIUS**, said to be the successor of Romulus as king of Rome, and distinguished as a philosopher and legislator, was of Sabine origin, and died after a reign of forty-three years, B.C. 672. He was the founder of the most important religious institutions of the Romans, and left writings explanatory of his system, which were burnt by order of the senate, when accidentally discovered four hundred years after his time.

**NUMENIUS**, a Christian Platonist, 2d century.

**NUMERIANUS, MARCUS AURELIUS**, emperor of Rome, succeeded his father, Carus, 283 or 284, and is supposed to have been murdered a few months afterwards by his father-in-law, Arrius Aper, who was stabbed without trial by Diocletian.

**NUMITOR**, said to be the son of Procas, king of Alba, and grandfather of Romulus.

**NUNEZ**, or **NUNNEZ**, the name of several distinguished Portuguese and Spaniards—**AMBROSE**, a physician and professor at Salamanca, died 1553. **FERDINAND**, a learned philologist and classical editor, about 1473–1553. **JUAN** and **PEDRO**, distinguished painters; the former in the 16th century, the latter about 1614–1654. **MATTHEW**, *Nunez de Supelveda*, fresco painter to Philip IV. in 1640, and *Nunez de Villavicencio*, a pupil of Murillo, 1635–1700.

**NUNEZ DE BALBOA**, a Spaniard, governor of the small colony of Darien, guided by reports of the Indians, that a great sea existed a few days' journey to the south, undertook a most difficult and hazardous journey across the marshy tracts of the isthmus in September, 1513, in the hope of discovering the ocean so long the object to Columbus of a fruitless search. Nearing at length the watershed, his impatience became uncontrollable, and he ran forward in advance of his men to an eminence in sight. Having reached this, and mounted into a tree, his delighted eye rested on the vast expanse of the boundless Pacific. He now hurried forward, and

plunging into the waves, claimed the sovereignty of the 'Great South Sea' for the crown of Spain. From the natives of the coast he received the most wonderful accounts of the power and wealth of the nations occupying the lands to the far south, which they affirmed to have no end. Thirteen years after, the former statement was fully confirmed by Pizarro; six years after Magellan disproved the latter. Messengers were immediately sent to Spain with the important tidings; but instead of a reward, or important appointment arriving for De Balboa, he was in a short time superseded in his government by Davila, a mean, envious, and cruel man, who, four years after, on some trifling accusation, had the heroic discoverer of the Pacific put publicly to an ignominious death. [J.B.]

**NUNNING, J. H.**, a Ger. antiquarian, 1675–1753.

**NUVOLONE**, the name of three painters of Lombardy—**PAMFILO**, the father, born about 1608, died 1651. **CARLO FRANCESCO**, his eldest son, surnamed the Guido of Lombardy, 1608–1661. **GIUSEPPE**, younger brother of the latter, called *Il Pamfilo*, a great painter of altar-pieces, 1619–1703.

**NUZZI, MARIO**, commonly called Mario da Fiori, a celebrated flower painter, was born in 1603, at Penna, in the kingdom of Naples. His pictures were highly esteemed, and he was chosen a member of the academy of St. Luke. Died 1673.

**NYE, PHILIP**, an eminent Nonconformist divine, was born in Sussex, in 1596, and took his degrees in arts at Magdalen Hall, Oxford. He became minister of St. Michael's church, Cornhill; but in 1633 he went to Holland, and remained there till the rebellion, when he obtained the living of Kimbolton, in Huntingdonshire. He was also one of the assembly of divines, and rector of St. Bartholomew behind the Exchange. In 1647 he was appointed one of the chaplains who attended the commissioners empowered to treat with Charles I. in the Isle of Wight; and he lost no opportunity of showing his enmity to the cause of royalty. His conduct, in fact, had been so violent, that he was not only deprived of his living at the Restoration, but an act was passed, restraining him from holding any office in future. Died 1672.

**NYERUP, ERASMUS**, a Danish hist., 1759–1829.

**NYMANN, G.**, a Germ. anatomist, 1594–1638.

**NYSTEN, PIERRE HUBERT**, a French physician, distinguished for his researches in electro-physiology, author of a Dictionary of Medicine, Pathological Chemistry, and Experiments upon the Muscular Organs of Man, and of the Red-blooded Animals, 1771–1818.

## O

**OAKES, URIAN**, President of Harvard College, was born in England, in 1631, and brought to America when a child. Having graduated at Harvard, he returned to England and was appointed minister at Titchfield, Hampshire, but being silenced in 1662 as a nonconforming minister, he accepted an invitation from the inhabitants of Cambridge, Massachusetts, in 1668, to become their minister, but did not enter on the duties till 1671. He was appointed president of Harvard College in 1680, and died in the following year.

**OATES, TITUS**, well known to English history as a political intriguer in the reign of Charles II., was the son of an anabaptist preacher, and was born about 1619. He was educated for the Church of England, and became chaplain in one of the king's

ships, but was dismissed in disgrace, and joined the Jesuits. In September, 1678, having rejoined the Church of England, he made a disclosure of a pretended popish plot, which caused the execution and imprisonment of many eminent men: and for which he received a handsome pension, and a residence at Whitehall, till the end of Charles II.'s reign. On the accession of James, he was convicted of perjury and publicly whipped, but recovered his liberty, and was pensioned again by William III. Died 1705.

**OBEID-ALLAK**, a famous Arabian commander, successively governor of Khorassan, Basrah, and Koufah; killed 685.

**OBEID-ALLAH, ABU MOHAMMED**, the first caliph of the Fatimite dynasty, reigned 910–933.

**O'BEIRNE, THOMAS LEWIS**, a learned Irish pre-

late, was born in 1748, in the county of Longford, in Ireland; was educated at St. Omer's for the priesthood, but renounced the creed in which he had been brought up, and at the commencement of the American war sailed with Lord Howe as chaplain to the fleet. In 1782 he accompanied the Duke of Portland to Ireland as private secretary, obtained two valuable livings in Northumberland and Cumberland, was promoted to the see of Upper Ossory, and translated to that of Meath. He wrote several political pamphlets, sermons, and charges on various occasions; 'The Generous Impostor,' a comedy, and 'The Crucifixion,' a poem. Died 1823.

OBEREIT, J. H., a Swiss alchemist, 1725-98.

OBERKAMP; F. J., a German physician, 1710-1768. His son, F. PHILIP, professor of anatomy, died 1793.

OBERKAMPF, C. PHILIP, the originator of the French manufacture of printed cotton, 1738-1815.

[View of the Ban de la Roche.]

OBERLIN, JOHN FREDERIC, pastor of Waldbach, was born at Strasburg, on 1st August, 1740. His father held office in the Gymnasium of that city; and being a man of great vivacity, as well as assiduous devotedness to his duties, was in the habit of taking his children on holidays to a small patrimonial farm he possessed a few miles out of town. There entering into all the feelings and sports of boyhood, he joined in every active and healthy amusement, and especially, as playing 'at soldiers' was a favorite pastime, the father invariably acted the part of drummer and major. The mother, a woman of great talents, energy, and piety, imbued her family not only with her earnest spirit and sound principles of religion, but also with her own passionate fondness for sacred music, and never did the children separate at night without her leading the juvenile circle in chanting one of Luther's beautiful hymns. Dr. Lorentz, an evangelical minister of high popular gifts, was her favorite preacher, and as young Frederic frequently accompanied her to the Lutheran chapel, the tones, manner, as well as strains of the Doctor's preaching made such an impression on the susceptible and pious heart of the boy, that he early cherished the desire of devoting his future life to the service of God and the good of his fellow-men. Having completed his studies, and acted a few years as tutor in the family of an eminent surgeon in Strasburg, Oberlin entered on the duties of his sacred profession, by engaging to act in the capacity of chaplain to a French regiment which was quartered in the city. During the four years he filled that situation he prosecuted his private studies with great ardor, and at the expiry of that term, he

resigned the office on obtaining a curacy in the Ban de la Roche, or Steinthal, a mountainous district in Alsace. It was an extensive valley lying in a state of wild uncultivated nature, divided into two parishes, of which the Waldbach was one, and comprising from eighty to a hundred families. These whose sequestered condition had hitherto placed them almost beyond the pale of civilization, were in a state of rude simplicity or rather barbarism, indolent and filthy—because almost entire strangers to all the useful arts of life; and their state as to religion may be imagined from the fact, that they knew nothing of the Bible, except that it was a large book, said to have come from God. The idea of undertaking the pastoral duties of such a wild and neglected people, was a prospect from which most persons would have shrunk. But Oberlin was known to possess the self-denying spirit, the energetic fortitude, and the enterprising genius suited to the exigencies of the place; and accordingly being urged by those who were interested in the regeneration of that people, he at length accepted the onerous charge. Oberlin was precisely of the cast of mind adapted for the Waldbach. A person of literary attainments or studious habits would have been perfectly useless in such a parish. The pastor who aimed at doing any good required bodily activity far more than study, and was under a necessity of combining physical and social with spiritual improvement. Wedded to habits of hereditary indolence, the people made open resistance to Oberlin's first attempts at innovation; and although his experimental measures were of an obviously useful and practical character, they excused themselves in the usual spirit of the sluggard, on the plea that what had done for their fathers might well satisfy them. The resolute minister, no way discouraged, proceeded to the execution of his projected schemes; and the first attempt he made was to form roads. Throughout the whole parish there was nothing but foot tracks, which were impassable during the greater part of the year, and the Bruche, a stream that bounded it in the direction of Strasburg, was crossed only by a series of stepping-stones, which, when the river was swollen by the winter rains, were submerged, so that for nearly nine months the inhabitants were completely secluded from all intercourse with the world. Oberlin proposed to throw a wooden bridge over this stream, and by excavating the mounds or blasting the rocks, construct a road to the city. Having assembled his parishioners in a field, he explained his design, and finishing his address with the words 'Whoever is persuaded of the benefits of the bridge, let them follow me,' he shouldered a pick-axe, and accompanied by his servant, commenced the work of excavation. The effect of his words and his example was electric. When the first surprise was over, all classes—old and young, offered their assistance, and from morning to night continued to labor for six months at their pastor's side with unabated assiduity till the bridge was erected. When opened, it received the name of *Le pont-de charité*. The obvious advantage of this bridge disposed the parishioners to listen the more readily to other undertakings which their public-spirited pastor contemplated for their benefit. He opened roads to the neighboring towns—introduced the use of agricultural implements—sent the more promising boys, some to the nearest counties to learn farming, and others to Strasburg to be taught the knowledge of different trades—erected neat cottages instead of the wretched cabins of turf in which the inhabitants dwelt—introduced the culture of the potato instead of the wild apples

and pears which had hitherto formed their staple subsistence—showed them the use of many common plants for food and physic—instructed them in every useful art that tended to the comfort and advancement of social life, and made so many improvements in the villages, houses, fields, and gardens of the Steinthal, that the parish which at his entrance was a neglected waste, a dreary desert, began to blossom as the rose. These improvements on the domestic, social, and agricultural economy of the Steinthal, were only preparatory to other and higher reformatory he contemplated on the moral state and religious character of the inhabitants. The confidence he had gained by his benevolent exertions for their temporal good he employed for promoting their spiritual welfare by establishing weekly prayer-meetings, introducing infant schools, as well as seminaries of a higher character, in which, besides the common branches of education, astronomy, agriculture, and various mechanical arts, such as plaiting straw, knitting, cotton-spinning by the hand, and the manufacture of silk ribbons were taught by masters and mistresses properly qualified for the office. He himself superintended the religious instruction of the children, teaching them not only to read and understand the history and principles of the Bible, but instructing them in a knowledge of sacred music by chanting the hymns sung in the church, and also of several branches of natural history, with a view of illustrating the perfections of God. By means of a printing press he had in his own house, he prepared religious tracts for distribution, and established itinerant libraries which, after being devoted to one village for three months, were then removed for the use of another. The expense of all these various schemes he was enabled to meet by the liberality of some Christian friends in Strasburg. Oberlin having been deprived of his wife, who had entered with intelligent and zealous activity into all his undertakings, her place in the care of his house as well as in the domestic duties of the parish was supplied by a pious and sensible young woman, Louisa Schelper, who had long been resident in his family. There was need of so economical and prudent a manager; for during the disorders consequent on the great French revolution, Oberlin no longer enjoyed his scanty stipend, and his maintenance was derived wholly from the contributions of his parishioners. During the reign of terror, however, when all worship elsewhere was proscribed, he was allowed to minister to his flock,—an immunity for which he was indebted partly to the poor and isolated position of his parish, and partly to the excellence of his own character. As at once the result and the evidence of the great improvements he had made, the population of the Steinthal during his incumbency rose from eighty, or a hundred, to three thousand. Oberlin was a simple, earnest, evangelical preacher, and one characteristic of his discourses was the numerous anecdotes he introduced of persons eminent for piety, known to him by reading or intercourse. The population of his parish being of a mixed character, he preached on Sabbaths in French, and on Friday evenings in German. Other meetings he held for reading to the people, and as he studied always to improve every moment of time, he caused the women to knit stockings; and when he had read or spoken long, he used to stop and say, 'Children, are you tired yet?' or, 'you have had enough for this night.' He was decorated by Louis XVIII. with the legion of honor. Oberlin died in 1826, at the age of eighty-six, having earned the character of

being one of the most useful men that have appeared in any country in modern times. [R.J.]

OBERLIN, JEREMIAH JAMES, a German antiquary and philologist, was born at Strasburg, in 1735. He began his career as teacher in the gymnasium of his native place, and after he had extended his knowledge and reputation by his travels, he was transferred to the university; in 1782 he obtained the chair of logic and metaphysics; to which, in 1787, was added the office of director of the gymnasium. The French revolution interrupted his learned labors; and in 1793 he was imprisoned at Metz, and treated with great cruelty; but at the termination of Robespierre's tyranny he was liberated, and resumed his literary occupations. He published valuable editions of Tacitus, Cæsar, Ovid, and Horace; and produced a number of works on archæology, statistics, &c. Died 1806.

OBICINI-OBIZZING, THOMAS, a catholic missionary, afterwards professor of Oriental languages, died 1636.

OBRECHT, ULRIC, a Fr. jurisconsult, 1646-1701.

O'BRIEN, RICHARD, consul-general of the United States to Barbary. Having been at an early age sent to sea, he became a successful privateer during the Revolution, and afterwards distinguished himself as a naval officer of the regular service. Having fallen into the hands of the barbarians of Africa, he was kept in slavery in Algiers. Was afterwards appointed consul-general. In the latter part of his life, he was a member of the legislature of Pennsylvania. Died 1824.

OBSEQUENS, JULIUS, a Latin writer, who flourished about A.D. 395. He was the author of a treatise 'De Prodigis.'

OBSOPÆUS. See OPSOPÆUS.

OCAMPO, F. D., a Spanish historian, 16th cent.

OCARIZ, or OCARITZ, DON JOSEPH, Chevalier D', a Spanish diplomatist, who held the post of *chargé d'affaires* at Paris in 1792, and distinguished himself by endeavoring to save Louis XVI., born about 1750, died 1805.

OCCAM, or OCKHAM, WILLIAM OF: born at Ockham in the county of Surrey about the close of the thirteenth century; taught with brilliant success in Paris, in the early part of the fourteenth; a Franciscan, like his master, *Duns Scotus*; the greatest of the later Schoolmen—by title the 'Invincible Doctor;' the philosopher who gave the final blow to the fantastic Realism of the middle ages, and perhaps the first effective blow to the authority of the Pope; the predecessor of D'Ailly and Gerson, and, not remotely, the progenitor of LUTHER.—It cannot be expected that in a work like this, any extensive appreciation can be given of a subject so thorny and strange as the Scholastic Philosophy; nevertheless, occasion may be taken of our mention of Occam, to warn the Student against hastily adopting those crude and common views of its deserts, and its place in the history of Thought. Difficult to peruse, as most of the writings of these singular disputants unquestionably are, and in great part from the apparent barbarism of their language, it must not be overlooked that this difficulty and uncouthness belonged almost necessarily to the excessive subtlety and sagacity with which they attacked the highest problems that can engage the Human Intellect. It falls to every new metaphysical school, or rather to every great school in a new epoch, to invent in so far its own language: take for example the writings of the Philosopher of Königsberg, who, strangely enough, was long reputed obscure and even unintelligible,

because of the very pains he took to render his expression of profoundest Thought, about the clearest and most precise, of which any language contains a record: nor is the remark of Mr. Hallam to be doubted, that as words are meant to express precise ideas, 'it was as impossible,' in the times of which we speak, 'to write metaphysics in good Latin, as modern naturalists have found it to describe plants and animals.' Besides the strangeness of terminology too, we must keep in mind that every age has a position peculiar to itself, around which, as a centre, the battle of Thought is contested; and it is only by taking account of this specialty, and separating from it the tactics and efforts of the contending Parties, one can come to recognize the identity in all ages, of these Parties and Tactics—that one can discern in the East, in Greece early and late, in those Middle Ages, and in modern Europe, the representatives and movements of Forces, whose antagonism is perpetual, and amid whose conflicts we live. The form in which these Schoolmen placed the great question they discussed, was mainly a *grammatical* one; but, underneath that form, those precise problems were debated which divided the followers of Aristotle and Plato, which sever Descartes and Hobbes, Locke and Kant. If sometimes subtle to a fault, and minute apparently to painful affectation—an error into which the grammatical form of their speculations inevitably led them—Aquinas, Scotus, Roscelin, Abelard, and Occam, were neither pedants nor sciolists, but brave divers into the depths of human thought: men who struggled fearlessly with the difficulties, the doubts, and hopes of the Soul: and, by their energy of purpose, eloquence in speech, and the firmness of the grasp with which they held the tendencies of their time, they again emancipated the World. Let us note in illustration, and in general and catholic terms, the inquiries which engaged Occam. It is universally known that Schoolmen became finally divided into two great sects—Realists and Nominalists. The former, whose leaders were Aquinas and Duns Scotus, had a subdivision into *Thomists* and *Scotists*; the latter—including the Conceptualists—following the great names of *Roscelin*, *Abelard*, and *OCCAM*. The following were the positions upheld by Occam. In those days as now, the first field of dispute was the Theory of Perception. How do we perceive? How do Mind and Matter meet? Occam maintains that we know only two things, viz., the existence of an *object*, and the existence of a *mental impression*. The notion of images transmitted, he declares a pure fantasy. Certain senses, he says, receive an image of external objects (*sight*, for instance), but this reception *accompanies* the act of perceiving, and does not constitute it. There are but two partial causes of sensation—the Subject, which feels; and the Object, that is perceived:—further, we know nothing and need not inquire. And so of objects remembered: he rejects with equal decision the theory then in vogue, that we perceive or *image* what is past, through effect of Resemblances of objects continuing, as essences or shadows in the Mind: he says that Recollection is a power of the mind, and that we cannot define it more minutely. So also with regard to general terms or notions. They result from the action of the Intellect, on things perceived. Intelligible Species or Entities, representing general ideas, he utterly repudiates. The Mind, which has the faculty to perceive objects, has also a power to abstract, to compare, to differentiate, to combine. And so, it forms conceptions corresponding to these operations, and expresses their results. There was a prevalent belief or position connected with this sub-

ject, in reference to the Divine mind. His attributes of Justice, Goodness, Wisdom, &c., were imagined separate Entities, with which he held council, on proceeding to act. No! said Occam, these are modes or forms of the Supreme Reason; they are attributes, and not Entities. The *Nominalism* of Occam as thus expressed, certainly does not reach that of Hobbes and Locke; nor indeed can we easily distinguish it from views that would not be termed Nominalist, in these our modern times. But is it not easy to recognize, in the basis of such disputations, the most important difficulties of Philosophy—those very problems that agitate us still? One thing at least is clear;—questions of such sort regarding all things Human and Divine, clothed in any garb—even in the grammatical—could not be presented with the ardor of an Abelard, or the logic of Occam, without stirring men's souls to an extent, so that no dogma of Popish Infallibility, could lay the tumult again. Occam, as we have said, was therefore a legitimate progenitor of Luther: but another point of most anxious interest is inseparable from the subject we contemplate,—we mean the singular influence on the fates of the World, of the genius of the French or Gallic race. It may be taken now almost as an historic maxim, that the Teuton *originates* Thought, France *diffuses* it, and the Anglo-Saxon *realizes* it, and gathers its good fruits. How strange in the providence of God, that Paris, even under its most absolute Monarchs, should have been the source—moral, as well as material—of mightiest Revolutions! Is it that the peculiar genius of the Gallic Race endows it with the gift to foresee, as well as the facility to be dazzled, by new Ideas? Paris when most Catholic, was, *par excellence*, the seat of those intellectual strifes which ultimately destroyed the Pope: Paris when most absolute, was, through the popularity of the Encyclopedists, the centre of those influences which first introduced the wildest Republicanism into Europe; Paris under a profound despotism, ploughed up the roots of every despotism in the old Continent: Paris, now, in its fresh anomalous condition, has, we doubt not, a similar and singular Destiny to fulfil. [J.P.N.]

OCCIALI, the common appellation of Kilig-Ali, captain pacha under Selim II., distinguished at the battle of Lepanto 1572, died about 1577.

OCCO, ADOLPHUS, a Ger. numism., 1524–1605.

OCELLUS-LUCANUS, a Pythagorean philosopher, supposed author of a work 'On the Universe,' B.C. 500.

OCHINUS, or OCHIN, BERNARDIN, an Italian monk, was born at Sienna, in 1487. His eloquence was so much admired, that pope Paul III. made him his confessor. Ochinus however, on meeting with the works of Luther, turned Protestant, and went first to Geneva, and next to England, where he obtained a prebend in Canterbury cathedral; but on the accession of Mary he retired to Strasburg, whence he removed to Zurich, and became minister of the Italian church; but was banished in 1563, for writing his dialogues in defence of polygamy. He then went to Moravia, where he joined the Socinians, but died of the plague the year following. His 'Sermons,' in Italian, 5 vols. 8vo., are scarce. He also wrote several controversial books.

OCHS, PETER, a chevalier and grand tribune of the state of Basle, was born in 1749; and having finished his academical studies, was soon distinguished for his legal and political knowledge. In 1795 he was chosen by his fellow-citizens to negotiate with M. Barthelemy, agent of the French directory; and he at length became president of the

assembly convened to organize a constitution for the state of Basle, under the influence of France. Being subsequently displaced, he went to Paris, and, after remaining there some years, was appointed by Buonaparte a member of the council of state, under the new Helvetic government, which subsisted till the return of the Bourbons in 1814. He was the author of 'Histoire de la Ville et du Pays du Bâle,' 5 vols.; 'Projet de Constitution Helvétique,' and some dramatic pieces. Died 1821.

OCHTERLONY, SIR DAVID, bart., of the East India Company's service, was born at Boston, in New England, in 1758. At the age of 18 he went to India as a cadet, and rose, by regular gradation, to the rank of major-general, in 1814. In the Nepaulese war he distinguished himself by a series of skilful operations and brilliant successes, and was rewarded with the order of the Bath, the dignity of baronet, and a pension of £1,000 per annum. Died 1825.

OCKLEY, SIMON, distinguished for his Oriental learning, and his zeal in promoting the culture of the Arabian language, of which he was professor at Cambridge, was born at Exeter 1678, and died, prematurely, 1720. His principal works are a 'History of the Saracens,' a 'Life of Mahomet,' a 'History of the Present Jews,' from the Italian of Leo Modena, 'An Introduction to the Oriental Languages,' and 'The Improvement of Human Reason,' exhibited in the Life of Hai Ebn Yokdhan,' translated from the Arabic.

[Colossal Marble Statue of O'Connell, Royal Exchange, Dublin.]

O'CONNELL, DANIEL, was born near Cahir Siveen in the county of Kerry, on the 6th of August, 1775. In his youth, and subsequently as the hospitable lord of Derrynane Abbey, he lived much amid the wild scenery, and as wild population of his native district. It is still a scarcely accessible territory, with but scanty road communication through the narrow gaps in the mountain ranges, and so sterile, as to present even a part of Ireland thinly peopled. It is impossible to look at O'Connell's career and character without believing that the spot with which his career was so closely connected, had a characteristic influence on his mind. His father was a petty landowner. Whether O'Connell was of high or humble birth, has been a matter ever disputed. He claimed high descent, and it was conceded to him by his

Irish followers; but this is one of the characteristics without which that singular people would never acknowledge leadership. It was necessary as a point of policy that he should be reported to come of the true old blood, and when he swept through the crowd in his great family coach, broadly emblazoned with a quartered shield and conspicuous supporters, it was evident that the large-built, handsome, rather highly dressed man, who looked around with the air of an Eastern prince, was by no means the democratic leader of a republican people. He had an uncle who rose high in the military service of France, of whom he used to speak as ashamed to own that his nephew occupied the humble position of an *avocat*. He was educated at St. Omers and Douay, and at first destined for the church, but the relaxation which admitted Roman Catholics to the bar, opened for him a more brilliant career. He kept his terms at the Middle Temple, and was admitted to the Irish bar in Easter term, 1798. He was a very hard student, and is described by Sir Jonah Barrington as having 'bottled' a quantity of legal knowledge for subsequent use. His great characteristic, indeed, as a daring leader of the people against the existing order of things, was the wonderful sagacity with which he could march along the boundary line of strict legal action without crossing it, or committing either himself or his followers. At the Irish bar he was beyond all question the first advocate of his day, whether for oratory or a ready adaptation of the law. And thus, when it is known that he collected large subsidies from his fellow-countrymen in the form of what was termed the patriotic rent, it must at the same time be remembered that he gave up a practice as lucrative as the Irish bar could afford. His later career is intimately connected with the recollections of all who have paid attention to the passing politics of the day. It may be mentioned, however, as chronologically fixing the commencement of his historical career, that it was in the year 1809 that he first came forth as a champion of the Irish Roman Catholics, by boldly proposing, in a small meeting of the body in William-Street, Dublin, the establishment of a general committee. In 1815 he made himself unpleasantly notorious, by killing in a duel Mr. D'Esterre, who challenged him for calling the corporation of Dublin beggarly. When the 'Catholic Association,' afterwards formed by him, was denounced by the law, he found means of evading the penalties, and reconstructing the association on a firmer basis. When he proceeded systematically to obtain elections of persons who could not take the oaths, statesmen saw the necessity of concession, and the Roman Catholic Emancipation Act was passed. After the Reform Bill he became conspicuous as the head of a parliamentary body, who, acknowledging his leadership, and voting together, were called 'O'Connell's Tail.' About the year 1840 he struck out the agitation for the repeal of the union, which became a failure in his hands. In January, 1844, the government of Sir Robert Peel resolving to grapple with him and the repeal agitators, began criminal proceedings, and obtained a conviction, followed by a sentence of imprisonment, but it was reversed in the House of Lords. O'Connell, however, was now an old man—the trial shook his nerves and his position. It was followed by the miseries of the potato blight, and on the 15th of May, 1847, he died during a sojourn in Italy, which was called a pilgrimage, and supposed to partake of a penitential or religious character. [J.H.B.]

O'CONNOR, GENERAL ARTHUR, uncle of the notorious Feargus O'Connor, and one of the princi-

pal actors in the Irish rebellion of 1798, was originally a barrister, and having the good fortune to escape punishment, after that event went to France, where the first Consul appointed him general of division. In 1809 he married the daughter of the famous Condorcet, niece on her mother's side to Marshal Grouchy, and in 1834 purchased the chateau of Bignon from the heirs of Mirabeau, where he died 1852.

O'CONNOR, CHARLES, a learned catholic clergyman, who, for many years was a resident in the family of the Duke of Buckingham, at Stowe, as librarian to that nobleman. He was the author of 'Columbanus's Letters,' 2 vols.; a 'Narrative of the most interesting Events in Modern Irish History,' and a collection of the ancient Irish chronicles; his studies having been chiefly directed to the elucidation of the history and antiquities of Ireland. He died in 1828, at Balinagar, the seat of his brother, the O'Connor Don.

O'CONNOR, RODERICK, king of Connaught, in the time of the conquest of Ireland by Henry II.

O'CONNOR, TURLOGH, called 'the Great,' a king of Connaught, who aimed at the entire sovereignty of the country, 1088-1156.

OCTAVIA, the sist. of Augustus, illustrious for her virtues, her beauty, and her accomplishments, was the widow of Claudius Marcellus, by whom she had a son and two daughters, when she was married, at the instance of her brother, to the triumvir, Mark Antony. The latter neglected her for Cleopatra, queen of Egypt; notwithstanding which, Octavia displayed the most noble fidelity to his house and fortunes, and devoted herself to the education of all his children. She died of the dejection into which she was thrown by the loss of her son by Marcellus, who was the intended heir of Augustus, and who was idolized by the people of Rome, B.C. 11. [E.R.]

OCTAVIA, a daughter of the emperor Claudius by Messalina. She was the sister of Britannicus, and, at the age of sixteen, became the wife of Nero. The latter divorced her and married Poppæa, at whose instance she was put to death in the twentieth year of her age, A.D. 62.

ODARRI, G., an Italian painter, 1663-1731.

ODENATUS, SEPTIMIUS, son of an Arabian sheik, who allied himself with the Romans against Sapor, king of Persia, and, after defeating the latter, was associated with Gallienus in the empire. He was married to Zenobia, who remained queen of Palmyra after his death. Assassinated 267.

ODERICO-DE-PORTEAU, a cele. Franciscan missionary, author of his travels, 1286-1331.

ODERICO, GASPARE LOUIS, a learned antiquary and medalist, was born at Genoa in 1725, and entered into the society of the Jesuits. His love, however, for coins, medals, and other relics of antiquity, prevailed over theological studies, and he was admitted a member of the Etruscan academy of Cortona, under the name of Theodemio Ostracino. On the suppression of the order, he was made conservator of the library of Genoa, and was subsequently chosen a member of the Institute. He published some valuable works on numismatics and ancient inscriptions, and died in 1803.

ODESCALCHI, MARC ANTONIO, an Italian of high rank, who devoted his time and fortune to acts of philanthropy. He was cousin to pope Innocent XI., who offered him many high dignities in the church. Observing that though Rome contained several hospitals for the relief of the poor of different nations, there were many strangers who could find no asylum in any of them, but were obliged to

take shelter in the porches of churches, the porticos of palaces, or the ancient ruins of the city, he converted his house into an hospital for the reception of these outcasts, without distinction. Here he fitted up 1000 beds, and employed a number of tailors constantly in making clothes for the objects of his bounty. If in his rides he chanced to observe a forlorn wanderer, he would stop, take him into his carriage, and convey him to his mansion. At his death in 1670, he left all his property to the support of the hospital.

ODESCALCHI, THOMAS, another member of the same family, who was almoner to pope Innocent XI. In imitation of the preceding, he gave himself up to works of charity. Perceiving that in the hospital of St. Gale there were a number of children destitute of education, he conceived the idea of erecting an asylum for their reception; which he carried into execution, beginning with 38 children, who were instructed, and brought up to industry. The number soon increased, through the liberality of pope Innocent, to 70; and, in 1686, Thomas Odescalchi laid the foundation of a large hospital for the education and employment of poor children in weaving cloth. This pious prelate died in 1692, and left considerable funds for the support of his institution, to which he gave the name of St. Michael de Ripegrande.

ODIER, LOUIS, an eminent Genevese physician, was born in 1748; studied at Edinburgh, Leyden, and Paris; and returning to Geneva, commenced a course of lectures on chemistry. He practised medicine with great reputation in his native city, filled several public offices, distinguished himself by his successful endeavors to introduce vaccine inoculation on the continent, and was the author of a 'Manual of Practical Medicine.' Died 1817.

ODIER, P. A., a Fr. administrator, 1774-1825.

ODILON, ST., a famous abbot of Clugny, distinguished as a Latin poet and theologian, 962-1048.

ODINGTON, WALTER, called Walter of Evesham, was a monk of that monastery in Worcestershire, and lived in the reign of Henry VIII. He was an astronomer, mathematician and musician; on each of which subjects he wrote treatises. 'De Motibus Planetarum et de Mutatione Aeris,' is attributed to him; and Dr. Burney observes of his treatise, entitled 'Of the Speculation of Music,' which is preserved in the library of Bene't College, Cambridge, 'that if all other musical tracts, from the time of Boethius to Franco and John Cotton were lost, with this MS. our knowledge would not be much diminished.'

ODO, ST., a celebrated abbot of Clugny, in France, was born at Tours, in 879, and died about 943. He introduced the most rigorous discipline into his order, obtained a high reputation for sanctity and wisdom, and wrote several books full of superstitious notions and legendary tales.—Another of this name, called Odo of Kent, was a Benedictine monk, who became abbot of Battle, and died in 1800.

OECOLAMPADIUS, JOHN, was born at Weinsperg in Franconia, in the year 1482. He was educated at Heilbrun, and afterwards at Heidelberg. At Stutgard he met with the famous Reuchlin, under whom he studied Greek so ardently as in a short time to compose and publish a Greek grammar. In 1515 he began to preach, and he cordially assisted Erasmus at Basle in publishing his Annotations on the New Testament. After this he entered the monastery of St. Bridget at Augsburg, but after two years left it for more active labors. In 1521 the protestant light began to dawn upon him, and

he soon came to the assistance of Zwingli, the Swiss reformer, and concurred with him in his views of the sacrament of the Lord's Supper in opposition to Luther. He was mingled up for many years in those discussions, and in the conventions held to secure agreement. He disputed with Dr. Eck at Baden, and the debate lasted eighteen days. Basle was his head-quarters, and the scene of his earnest and multiplied pastoral labors. In 1531 he was seized with severe and sudden sickness, and he died in December of that year, in the forty-ninth year of his age. He has left behind him several works, but his special memory lies in his living diligence, meekness, prudence, self-denial, and success in carrying on the Swiss reformation from Popery. His original name was *Hausschein*, *House-lamp*, which he, according to a prevalent custom, changed into the Greek surname *Oecolampadius*, of similar meaning.

[J.E.]

OE CUMENIUS, an ancient greek commentator upon the Scriptures, was bishop of Trica, in Thessaly, in the 10th century.

OEDER, GEORGE CHRISTIAN, an eminent physician and botanist, was born at Anspach, in 1728. He studied at Gottingen, under Haller, by whose interest he became professor of botany at Copenhagen; but, on account of his intimacy with the unfortunate Struensee, he was obliged to retire to Oldenburgh, where he died in 1791. His works are 'Flora Danica,' 3 vols. fol.; 'Elementa Botanica,' 'Nomenclator Botanicus,' and 'Enumeratio Plantarum Floræ Danicæ.'

OEFELS, A. F. D', a Ger. *savant*, 1706-1780.

OE HLENSCHLOEGER, ADAM, the most celebrated dramatic poet of Scandinavia, was born at Copenhagen, 1777. When still a child he evinced great skill in writing verses; and even in his 9th year he wrote short comedies for private theatricals, in which the chief performers were himself, his sister, and a friend. These and other similar attempts created the wish to go upon the stage; and when he was in his 17th year he put his design in execution. But he soon found that the stage was not in unison with his inclinations; and he abandoned it first for the study of law, and afterwards for general literature. In 1805 he left Copenhagen with a stipend from the Danish government, on a lengthened tour through Germany and Italy; and on his return in 1810, he was appointed to the chair of literature in the university of Copenhagen, where he labored assiduously till his death. His earliest works were composed in Danish, but he rewrote most of them in German, and Germany has given them a prominent place in her own literature. His most important works are, 'Hakon Jarl,' 'Correggio,' 'Palnatoke,' 'Aladdin,' 'Der Hirten-Knabe,' &c. His 'Autobiography,' is a beautiful performance, fully displaying the qualities for which he was distinguished through life—strong feelings and earnestness of purpose—and which gained him universal respect while he lived, and more than regal honors at his death. Died January 28, 1850.

OE HLMULAR, D. J., a Ger. archit., 1791-1823.

OELRICHS, G., a Germ. antiquarian, 1727-89,

OELRICHS, JOHN CHARLES CONRAD, a German historian and bibliographer, was born at Berlin, in 1722; became professor of history and civil law at the academy of Stettin; published many valuable works in Latin and German; obtained the post of counsellor of legation, and resident of the Duke of Deux Ponts, at the court of Berlin, in 1784; and died in 1798.

OELRICHS, J. G. A., a Ger. *savant*, 1767-91.

OENOMAUUS, a Greek philosopher, 2d century.

OENOPIDES OF CHIO, a Pythagorean philosopher, 5th century B.C.

OERN, N., a traveller and wr. on Lapland, 1707.

OERNHEIM, or ORNSJOELMS, CLAUDIUS, called in Latin Aorhenius, a Swed. hist., 1625-95.

OERNSCHOELD, P. ABRAHAM, Baron De, founder of the manufacture of linens and prints in Sweden, died 1770.

OERSTED, HANS CHRISTIAN, professor of physics at the university of Copenhagen, and secretary of the Academy of Sciences in that city, was born 1777. He is the author of numerous works in physics—more especially in magnetism and chemistry, most of which are written in Latin. His last production, in Danish, entitled 'Aanden a Naturen,' caused a great sensation. Died 1851.

OESER, A. F., a painter and engraver of Presburg, 1717-1799. His son, FREDERIC, died 1792.

OETINGER, FRED. CHRISTOPHER, a learned philologist and mystic divine of Germany, who finally became prelate of Murhard in Wurtemberg, and died at the age of eighty, 1782. His principal work is the 'Earthly and Heavenly Philosophy of Swedenborg and Others,' which included notices of Boehmen, Malebranche, Newton, Cluvers, Wolffe, Plouquet, Bagliv, and Fricker. This publication involved him in considerable trouble with the Consistory; and in a controversy with Faber. Oetinger, however, was protected by the duke of Wurtemberg, as Dr. Tafel has been in the same cause by the present king. The son of Oetinger published a work, entitled 'Metaphysica et Chemica,' his father at the time being interdicted from writing. This prelate was a great master of the philosophy of Leibnitz.

[E.R.]

OETTINGER, a Russian writer and translator of Kotzebue, died 1853.

OETTER, S. W., a German historian, 1720-92.

OEXMELIN, A. O., a Flem. buccaneer, au. of a 'History of the Adventures to India,' publ. 1686.

O'FARRIL, G., a Spanish general, 1784-1831.

OFFA, the successor of his uncle Ethelbald, as king of Mercia, was placed on the throne after a successful insurrection in 757. He greatly extended his kingdom, and added that of the East Angles to it by treacherously murdering Ethelbert. In his latter years, he made peace with his conscience by the foundation of St. Alban's Abbey, and an annual payment to the pope, known in after ages as Peter's pence. Died 796.

OGDEN, DAVID B., a New York lawyer of eminence, died 1849 aged 80.

OGDEN, JACOB, a distinguished physician, was born at Newark, New Jersey in 1721, and practised medicine at Jamaica, Long Island, for many years. In 1769 and 1774, he published letters on the malignant sore throat distemper, and was considered the first physician who introduced the use of mercury in that complaint. He died in 1779.

OGDEN, MATTHIAS, a brigadier-general in the American army. He accompanied Arnold to Canada in 1775, and was at the attack upon Quebec, where he was severely wounded. He was afterward appointed to the command of a regiment, and at the termination of the war, congress promoted him to the rank of a brigadier. Died 1791.

OGDEN, SAMUEL, an eminent divine, was born at Manchester, in 1716, and educated at the grammar school there, from which he was removed to King's College, Cambridge, and next to St. John's, where he obtained a fellowship. In 1744 he became master of the school at Halifax, but resigned

that situation in 1753, and, returning to Cambridge took his degree of D.D., and was presented to the vicarage of Damerham, in Wiltshire. In 1764 he was appointed Woodwardian professor, and in 1766 obtained the rectories of Lawford, in Essex, and Stansfield in Suffolk. He published two volumes of sermons, which, from their pithy and animated character, obtained considerable celebrity. Died 1778.

OGE, a creole of St. Domingo, who, at the commencement of the French revolution, having occasion to visit Paris on mercantile affairs, was there admitted into the society of Amis des Noirs, or Friends of the Negroes, and warmly solicited, though ineffectually, the National Assembly to grant to men of color the rights of equality. Returning to his native city in 1790, with a determination to effect by force what was denied to his solicitations, he issued a proclamation, inviting all the people of color, as well as the negro slaves, to join him. At first the insurgents demanded nothing but what was just—freedom and political equality; but their cause was soon disgraced by crimes of the most atrocious description. These, however, were not attributable so much to Ogé, as to his lieutenant Chavannes, a sanguinary wretch, who delighted in deeds of violence. At length they were overpowered by the regular troops sent against them, and Ogé and Chavannes were condemned to be broken on the wheel. When the former heard his doom, he took a quantity of black seeds in the hollow of his hand, and covered them with a small quantity which were white; he then shook them together, and the former remaining uppermost, he exclaimed to his judges, 'Where are the whites?'—an impressive allegory, which was fatally verified in the subsequent revolution in that colony.

OGEE, J., a French geographer, 1728–1789.

OGIER, C., a French writer of his travels and residence in the North of Europe, 1595–1654.

OGILBY, JOHN, a multifarious writer, was born at Edinburgh, in 1600. He became a teacher of dancing, in the practice of which he contracted a lameness, but still continued to give instruction in families. On going to Ireland with the Earl of Strafford, he was made deputy master of the revels in that kingdom, and he also built a theatre at Dublin; but in the rebellion he lost all his property. After suffering great vicissitudes, he returned to England, and settled at Cambridge, where he published a translation of Virgil. At the age of 54 he learnt Greek, and gave a specimen of his proficiency in the translation of the Iliad, published in 1650, which was followed by the Odyssey in 1655. While at Cambridge, he edited a superb impression of the Bible, for which he was remunerated by the House of Lords; and, in 1661, he was appointed to conduct the poetical part of the coronation pageantry. He was also restored to his place of master of the revels in Ireland, where he again built a theatre. In London, after the great fire, he erected a printing office, and was appointed king's cosmographer: in which capacity he published several volumes of a large atlas, and an account of the great and cross-roads of the kingdom, from his own actual survey. Died 1676.

OGILVIE, JAMES, an orator, was born in Scotland, and emigrated to America at an early age. When only eighteen years old, he had the charge of an academy at Milton, Albemarle county, Virginia. In 1807 he resigned this employment, and commenced a series of lectures in the principal cities. Having returned to Europe, he lectured in London and Edinburgh very unsuccessfully. Died at Aberdeen

1820, shortly after his succession to the lordship of Finlatur.

OGILVIE, JOHN, an able and pious Scotch divine and poet, was born in 1733; received his education at the university of Aberdeen; was for more than half a century minister of Midmar, in Aberdeenshire; and died in 1814. Among his works are 'Britannia,' an epic poem; 'Philosophical and Critical Observations on Composition,' 'An Examination of the Evidence of Prophecy' and 'Sermons.'

OGINSKI, COUNT, a Polish patriot, 1731–1803.

OGLETHORPE, JAMES EDWARD, an English general, was the son of Sir Theophilus Oglethorpe, of Godalming, Surrey, and born in London, in 1698. He served under Prince Eugene, and, in 1733, distinguished himself by his exertions to found the colony of Georgia, for which he obtained the royal charter. In 1745 he was promoted to the rank of major-general, and was sent against the rebels, but did not overtake them, for which he was brought to a court martial, and honorably acquitted. He died in 1785, at the advanced age of 97, being the oldest general in the service. The private character of Oglethorpe was extremely amiable, and he has been eulogized by Thomson, Pope, and Johnson.

O'HALLORAN, SYLVESTER, an Irish antiquary, He was born in 1728, was brought up and practiced as a surgeon, and wrote several medical treatises. But it is as an antiquary and historian that he is now principally known. In 1772 he published an 'Introduction to the Study of the History and Antiquities of Ireland,' 4to., which was followed by a 'General History of Ireland,' 2 vols. 4to. Died 1807.

O'HARA, JAMES, one of the founders of Pittsburg, Pennsylvania, was a native of Ireland, emigrated to America in 1772, and traded with the Indians for some time. He acted as quarter-master general under General Wayne, in which office he was very efficient. Died December 1819.

O'HARA, KANE, an Irish dramatist, who had much musical taste, and a happy talent of adapting verses to old airs. His chief productions are, 'Midas,' which was extremely well received, and is still a favorite; 'The Golden Pippin,' 'The Two Misers,' 'April Day,' and 'Tom Thumb.' Died 1782.

OIPENART, A., a Spanish historian, 16th cent.

OISEL, or OUZEL, J., a Ger. civilian, 1631–86.

OISEL, or OUSEL, P., a Ger. Hebr., 1671–1724.

OISELAY, J. D', a French poet, 15th century.

OJEDA, DON ALONZO DE, remarkable for his daring spirit, accompanied Columbus in his second voyage. In 1494 he explored the interior of Hispaniola. He was afterwards governor of New Andalusia, at Darien, and failed in 1513 in his attempt to establish a colony there.

O'KEEFE, JOHN, a celebrated dramatist, was born at Dublin, in 1748, and was originally intended for the profession of a painter; but his taste for theatrical amusements interfered with his studies, and he soon forsook the easel for the sock and buskin. Having been introduced to Mr. Mossop, he obtained an engagement at the Dublin Theatre; and he continued to perform in that city, and in the towns to which the company made summer excursions, for 12 years, as a comedian, with considerable success. His ambition to figure as an author was coeval with his theatrical taste; for, at the age of 15, he attempted a comedy in five acts. Among his early productions which attracted notice, was a kind of histrionic monologue, called 'Tony Lumpkin's Rambles through Dublin,' which afforded him abundant scope for the exhibition of broad humor, and was received

with applause, not only in Dublin but at the Haymarket Theatre, London. He at length left Ireland, about 1780, with the view of obtaining an engagement in London; but, as he did not succeed in his endeavor, he applied himself with assiduity to dramatic composition; and between 1781 and 1798 he produced nearly 50 comedies, comic operas and farces. Many of these acquired a flattering popularity and some still keep possession of the stage; among which are, 'Wild Oats,' the 'Castle of Andalusia,' the 'Agreeable Surprise,' the 'Poor Soldier,' 'Peeping Tom,' the 'Young Quaker,' &c. In 1800, O'Keefe, who was then blind, and had been reduced by misfortunes to a state of great embarrassment, had a benefit at Covent Garden Theatre, when between the acts of his comedy of the 'Lie of the Day,' which was performed on that occasion, he was led on the stage to deliver a poetical address of his own composition, in which humor and pathos were very happily blended. He subsequently published his 'Recollections, or Biographical Memoirs;' and died, at Southampton, in his 86th year, in 1833.

OKEN, LORENZ, a great Swiss naturalist, and author of 'Physico-Philosophy,' and other scientific works. Died at Zurich, in the university of which he was professor, 1851, age 73.

OKOLSKI, F. S., a Polish historian, 17th cent.

OLAFSEN, the name of several distinguished Icelanders—MAGNUS, a clergyman, and Latin translator of the Edda, 1573–1636. STEPHEN, translator of the Edda and Voluspa, died 1688. EGGERT, a minister, distinguished as a naturalist, 1721–1776. His brother, JOHN, an antiquarian, 1731–1801. A third brother, MAGNUS, an administrator and writer, 1728–1800.

OLAHUS, NICHOLAS, archbishop of Strigonia in Hungary, and chancellor of that kingdom, was born at Hermanstadt, in 1493, and died in 1568. He was a liberal prelate, and published a 'Chronicle of his own Times,' a 'History of Attila,' and a 'Description of Hungary.'

OLAUS, or OLOF, the first of the Swedish chiefs who received the title of king, born 984; received at his baptism the English name of Siegfried 1008, died 1026.

OLAUS, the name of two Danish kings—the *first* of whom reigned in Jutland only, and was killed 814. The *second* reigned 1086–1095.

OLAUS, the *first* of the name, king of Norway, reigned 994–1000. The *second*, 1014–1032. The *third*, shared the throne with Magnus II., 1066–1096, and reigned alone 1069–1093. The *fourth* reigned, with his two brothers, 1103–1116. The *fifth*, born 1370, became king of Denmark after Waldemar, 1376, and king of Norway on the death of his father, 1380; died 1387.

OLAUS, P., a Danish chronicler, 16th century.

OLAVIDES, PAUL ANTHONY JOSEPH, Count de, was born in 1725, at Lima, in Peru, but was educated at Madrid. Charles III. created him a count, and appointed him intendant of the province of Andalusia. He undertook the great work of fertilizing the Sierra Morena, or the Black Mountains; and by his perseverance, and the colonies of Germans he brought thither, it became the seat of agricultural and commercial industry. Notwithstanding the benefits which this worthy man had thus rendered his country, he fell into disgrace, was charged with heresy, tried by the merciless tribunal of the Inquisition, and condemned to eight years' imprisonment in a monastery, and to be incapable of all public employment ever after. He contrived to escape from the convent, and took refuge in France, whi-

ther monastic hate pursued him, and he was forced to seek an asylum at Geneva. After the death of Charles III. he was permitted to return to France. He resided there at the revolution; and under the reign of terror, he was imprisoned at Orleans, but was released after the fall of Robespierre. He employed the period of his confinement, and his subsequent leisure, in writing an excellent work, entitled 'The Triumph of the Gospel;' and the zealots who had persecuted the author, assuming the merit of having converted him, obtained his recall to Spain, and he retired to his estates in Andalusia, where he died in 1803.

OLBERS, H. W. M., a Ger. astron., 1758–1840.

OLDCASTLE, SIR JOHN, Lord Cobham, the first martyr among the English nobility, was born in the reign of Edward III. He was an adherent of Wickliffe, whose doctrines he propagated with such zeal, that in the reign of Henry V. he was sent to the Tower, whence he made his escape into Wales. A report was then circulated by the clergy, and sent to the king, that 20,000 Lollards were assembled in St. Giles's for his destruction, with Lord Cobham at their head; upon which a bill of attainder was passed against him, and he was burnt alive in St. Giles's Fields, in 1417. He was a man of high spirit and extensive acquirements, and was the author of 'Twelve Conclusions, addressed to the Parliament of England.'

OLDENBURGH, HENRY, a physician, born in the duchy of Bremen 1626, who became one of the first members, and the colleague of Dr. Wilkins, in the secretaryship of the Royal Society. He published the 'Philosophical Transactions' from 1665–1677, and died 1678.

OLDERMAN, J., a learned German, 1686–1723.

OLDFIELD, ANN, a celebrated English actress, was born in London, in 1683. Sir John Vanbrugh recommended her to Mr. Rich, patentee of the king's theatre, by whom she was engaged. Her great excellence lay in comedy, though she often appeared with great éclat in tragic parts; and having the advantages of a good figure and a fine voice, she soon became a general favorite. She was at first the mistress of Mr. Arthur Maynwaring, and after his death of General Churchill; yet she was much esteemed in private life. She died in 1730, and was buried in Westminster Abbey.

OLDHAM, HUGH, an English prelate, supposed to have been born at Oldham, near Manchester, founder of the grammar school in the last named town, and a great benefactor of Corpus College, Oxford; died 1519.

OLDHAM, JOHN, an English poet, was born at Shipton, in Gloucestershire, in 1653. He was appointed tutor to the grandsons of Sir Edmund Thurland, and afterwards to a son of Sir William Hicks. He next resided with the Earl of Kingston, and died of the small pox in 1683. His poems were published in 4 vols., and there is much force and spirit in many of them, though they partake largely of the licentious sentiments which disgraced the age in which he lived.

OLDMIXON, J., an historical wr., 1673–1742.

OLDONI, A., an Italian *savant*, 1612–1682.

OLDSWORTH, E., an Eng. writer, 1688–1747.

OLDSWORTH, WILLIAM, an English writer, who was one of the original authors of a periodical paper called the Examiner. He also published a volume called 'State Tracts;' and another entitled 'State and Miscellaneous Poems,' &c. Died 1734.

OLDYS, WILLIAM, distinguished as a biographical writer, and for his great knowledge of English

books, was the natural son of Dr. W. Oldys, chancellor of Lincoln, and was born 1696. He was almost constantly employed by the booksellers, and died 1761. His principal works are a 'Life of Sir Walter Raleigh,' 'The British Librarian,' a translation of Camden's 'Britannia,' and the lives signed G. in the 'Biographia Britannica.'

OLEARIUS, the name by which ADAM OELSCHLÄGER is generally known, a famous German traveller and mathematician; author of *Stories from the Persian*, a *Voyage to the Indies*, a *Chronicle of Holstein*, &c., 1569-1671.

OLEARIUS, GODFREY, a German divine, author of biblical translations, &c., 1604-1685. JOHN, his son, author of 'Sacred Hermeneutics,' and various theological works, 1639-1713. JOHN GODFREY, elder brother of the latter, an ecclesiastical biographer, 1635-1710. GODFREY, son of John, author of historical and theological works, 1672-1715.

O'LEARY, ARTHUR, a Roman Catholic divine, was born at Cork, and educated at St. Maloes, where he became a Franciscan. On his return to his native place he distinguished himself by persuading his brethren to take the oath of allegiance; for which, and his other exertions in the cause of loyalty, he obtained a pension, and won the esteem of moderate men of all parties. He afterwards settled in London, and officiated as principal minister in the Roman Catholic chapel in Soho Square. He died in 1802. His addresses to the Catholics of Ireland, and other tracts, were collected into one volume, 8vo.; besides which he published 'A Defence of his Conduct and Writings,' in reply to the bishop of Cloyne. O'Leary was an acute and spirited writer, and was remarkable for his powers of wit and humor.

OLEASHER, J., a Portuguese divine, died 1663.

OLENSCHLÄGER, J. D., called 'Olearius,' a German publicist and historical writer, 1711-1778.

OLESNIKI, S., a Polish cardinal, died 1455.

OLEY, BARNABAS, a learned divine, who became archdeacon of Ely after the restoration, and died 1686. He published the works of Dr. Jackson and Herbert's 'Country Parson.'

OLGA, a woman of obscure birth, who became the wife of Igor, grand duke of Russia; and after the death of her husband, in 945, governed the country for ten years as regent. Having become a Christian, and contributed to the spread of the faith, she is regarded as a saint in the Greek church; died 968.

OLGIERD, grand duke of Lithuania, 1330-81.

OLIER, J. J., a French ascetic writer, 1608-57.

OLIN, STEPHEN, an American Methodist divine, president of the Wesleyan University at Middletown, Connecticut, and author of 'Travels in the East,' died 1851.

OLINA, J. P., an Italian naturalist, 16th century.

OLIVA, ALESSANDRO, an Ital. cardinal, 1408-63.

OLIVA, F. P. D', a Span. wr., abt. 1497-1533.

OLIVA, JOHN, an eminent antiquary, was born in 1689, at Rovigo, in the state of Venice. He became, successively, professor of ethics, at Azzolo, secretary to the conclave at Rome, and librarian to Cardinal de Rohan, at Paris, where he died in 1757. He published a treatise 'On the Study of Medals,' and another 'On the Progress and Decay of Learning among the Romans;' besides a dissertation entitled 'De Antiqua in Romanis Scholis Grammaticorum Disciplina,' &c.

OLIVAREZ, GASPER GUZMAN, Count Duke D', a Spanish statesman, devoted to the house of Austria, descended from the Guzmans of Castile, born

at Rome, during his father's embassy to Sextus Quintus, about 1587, minister for twenty-two years during the reign of Philip IV. and his political enemy, Richelieu, died a few months after his dismissal, 1645.

OLIVECRANTZ, JOHN PAULIN, a Swedish statesman, and master of polite literat., 1633-1707.

OLIVER OF MALMESBURY, a Benedictine monk of the 11th century, chiefly memorable as the first Englishman who attempted to travel through the aerial regions. He is said to have been well skilled in mechanics; but in attempting to fly from a lofty tower, with wings of his own construction fastened to his hands and feet, he fell, and broke both his legs.

OLIVER, ANDREW, lieutenant governor of Massachusetts, was graduated at Harvard College in 1724. In 1765, while he was secretary of the province, he rendered himself very obnoxious to the people of Boston, by accepting the appointment of distributor of stamps for the district. He was appointed lieutenant governor in 1770, which office he held until his death. Died March 3, 1774.

OLIVER, DANIEL, an American physician and medical writer, author of 'First Lines of Physiology;' born in Massachusetts 1787; died 1842.

OLIVER, ISAAC, an English painter, was born in 1556. His miniatures were painted in a style of exquisite beauty, and he also executed some good historical pictures. Died 1617. His son, PETER OLIVER, who died about 1654, was also an admirable artist in the same line, and much employed by Charles I.

OLIVER, PETER, LL.D., chief justice of Massachusetts, was born in 1713, and graduated at Harvard College in 1730. He was appointed a judge of the superior court in 1756. Died in England 1791.

OLIVER, W., a physician of Bath, died 1764.

OLIVER, WM. ANTHONY, a celebrated naturalist and traveller, was born in 1756 at Frejus. Died 1814.

OLIVET, JOSEPH, THOULIER D', a learned critic, was born at Salins, in France, in 1682. He entered into the society of Jesuits, but left them to lead a retired life at Paris, where he was admitted a member of the academy, whose history he continued in 2 vols. His greatest work, however, is his edition of Cicero, in 9 vols. 4to., or 10 vols. 8vo. The Abbé Olivet also published translations from Cicero and Demosthenes, executed in a spirited and elegant manner. Died 1768.

OLIVETAN, PETER ROBERT, a relative and townsman of Calvin, said to have been poisoned at Rome in 1536, and, by other accounts, to have died at Ferrara 1538. He was one of the first reformers, and published a French version of the Scriptures, which became the foundation of the Genevan Bible.

OLIVEYRA, FRANCIS XAVIER DE, a Portuguese knight, and gentleman of the household to the king, was born at Lisbon, in 1702. On going to Vienna, as secretary to the embassy, he became a convert to the Protestant faith; to profess which he came to England in 1746. He published 'Memoirs of his Travels,' 'Familiar Letters,' 'A Pathetic Discourse to his Countrymen, on the Earthquake at Lisbon in 1756,' 'The Chevalier d'Oliveyra burnt in Effigy as an Heretic, why and wherefore?' &c.; and he left at his death, which happened at Hackney, in 1783, a great number of MSS., including 'Oliveyriana, or Memoirs, historical and literary,' 27 vols. 4to.

OLIVEYRA, S., a Portuguese rabbin, d. 1708.

OLIVIER, C. M., a French critic, 1701-1736.

OLIVIER, F., chancellor of France, 1497-1560.

OLIVIER, GUILLAUME ANTOINE, an eminent

French naturalist and traveller, was born in 1756, at Frejus. He made botany and entomology his especial study, went on a scientific mission to Persia in 1792, returned with a valuable collection after an absence of six years, and died in 1814. He published the result of his researches in the East, under the title of 'Voyage dans l'Empire Ottoman, l'Egypt, et la Perse,' 3 vols. 4to., with an atlas and plates; also, a 'Natural History of Coleopterous Insects,' &c.

OLIVIER, JAMES, a president of the parliament of Paris, born about 1460, died 1519. His son, JOHN, a poet, and grand almoner, afterwards bishop of Angers, died 1540.

OLIVIER, S., prof. of canon law, 1538-1609.

OLIVIER, W. A., a Fr. naturalist, 1756-1814.

OLIVIERI, ANNIBAL, a learned Italian antiquary, born at Pesaro, in 1708; author of 'Marmora Pesaursiensis a Notis illustrata,' 2 vols.; 'Memoirs of the ancient Port of Pesaro,' and 'Memoirs of the Chevalier Passeri.' He was honorary chamberlain to pope Clement XIII., and perpetual secretary of the academy of Pesaro.

OLIVIERI, D., an Italian painter, 1679-1755.

OLLIVIER, R., a French writer, 1727-1814.

OLMOS, F. A., a Span. missionary, died 1571.

OLYBRIUS, FLAVIUS ANICIUS, emperor of the West, died after a three months' reign, 472.

OLYMPIAS, daughter of Pyrrhus, and wife of Alexander, king of Epirus, died about 240 B.C.

OLYMPIAS, wife of Philip, king of Macedonia, and mother of Alexander the Great, was the daughter of Neoptolemus, king of Epirus. Her haughtiness, and, more probably, her infidelity, induced Philip to repudiate her; and as Philip's murder soon followed this disgrace, some have attributed it to her intrigues. Antipater, the successor of Alexander on the Macedonian throne, left the administration of the country to Polyperchon, who, to confirm his power, recalled Olympias from Epirus, whither she had fled, and confided to her the guardianship of the young son of Alexander. She now cruelly put to death Aridæus, son of Philip, with his wife Eurydice, as also Nicanor, the brother of Cassander, with 100 leading men of Macedon, who were inimical to her interest. But such barbarities did not long remain unpunished. Cassander besieged her in Pydna, where she had retired with her family; and being obliged to surrender, after an obstinate siege, she was put to death.

OLYMPIODORUS, a Platonic philosopher of Alexandria, commencement of the 6th century. Another philosopher of the same name and place, author of a commentary on Aristotle, about the end of the 6th century. A third *savant* of this name was deacon of Alexandria about the end of the 7th century, and wrote Commentaries.

OLZOFFSKI, ANDREW, a Polish statesman and prelate, distinguished for his wisdom and patriotism, born 1678.

OMAR, the *first* caliph of the name, and father-in-law of Mahomet, succeeded Aboubeker 634, conquered Jerusalem 637, and Alexandria 640. It was on this occasion that the great library of the Ptolemies was destroyed, and in the reign of Omar that the institutions of the Mahommedans began to assume their proper form. He was assassinated by a Persian slave 644. The *second* Omar succeeded 717, and was assassinated 720.

OMAR, the fourth and last Arabian king of Badajoz, suc. his brother 1082, and was killed 1090.

OMAR, a cel. Mussulman doctor, abt. 1068-1142.

OMAR-PACHA, dey of Algiers, 1815-1817.

OMAYAH, or OMMIAH, a prince who ruled the Arabian tribe of Khoreish, the same to which Mahomet belonged, before the advent of the latter at the commencement of the 7th century. He was the stock of the Omniade caliphs.

O'MEARA, BARRY EDWARD, the confidential medical attendant of the emperor Napoleon in his last days, and author of 'A Voice from St. Helena,' was a native of Ireland, and born about 1778. He was originally a surgeon in the British navy, and was on board the Bellerophon in that capacity, on the 7th of August, 1815, when Napoleon went on board. Napoleon having observed Dr. O'Meara's skill in attending to some of the crew, and his knowledge of Italian, made overtures to him, on being transferred to the Northumberland, to accompany him to St. Helena as his surgeon, his own not being able to go with him. Having obtained Admiral Keith's permission, Dr. O'Meara assented, and remained with the ex-emperor till July, 1818, when he was recalled and deprived of his rank. He was latterly an active partisan of O'Connell's, at one of whose agitation meetings he is said to have caught the illness which terminated fatally, June 3, 1836. In the following month a sale of his effects took place; and it is surprising what competition there was for such articles as had been the property of the French emperor. A few lines in his handwriting sold for 11 guineas; a lock of his hair, £2 10s.; one of his teeth, 7 guineas and a half; and the instrument used by O'Meara in extracting it, 3 guineas!

O'MEARA, THEODOSIA BEAUCHAMP, wife of the preceding Barry O'Meara, but who styled herself Lady Leigh, died in 1830. She was the widow of Captain John Donellan, who was hung at Warwick, in 1781, for poisoning Sir Theodosius Boughton; she next married Sir Egerton Leigh, bart.; and at his death, in 1818, she gave her hand to the author of 'A Voice from St. Helena.'

OMMEGANCK, B. B., a Fle. painter, 1775-1826.

ONESICRITUS, a Gr. historian, 4th century B.C.

ONIAS, the name of several high priests of the Jews—the *first* of whom governed the Hebrew republic, 322-302 B.C. The *second*, 233-219 B.C. The *third*, who is much spoken of in the book of the Maccabees, 199-170 B.C. The *fourth*, called also Menelaus, reigned 172-162 B.C.

ONKELOS, a celebrated rabbin, supposed to have been a native of Babylon, and to have flourished about the time of our Lord. He wrote the Chaldee Targum, or paraphrase on the Pentateuch, which is remarkable for the purity of its language, and conformity with the Hebrew text.

ONOMACRILUS, a Greek poet, 6th century B.C.

ONOSANDER, a Greek Platonist, whose only remaining work is a discourse on the duties and virtues of the general of an army, 1st century.

ONSLOW, GEORGE, an English musical composer. Died 1853, age 69.

OORT, LAMBRECHT VAN, a Flemish historical painter, born in 1520. ADAM, his son, 1557-1641.

OOST, JACOB VAN, the elder, a Flemish painter, greatly distinguished for his numerous altar-pieces, born about 1600, died 1671. His son, of the same names, called the Younger, a portrait and historical painter, 1637-1713.

OOSTERWICK, MARIA VAN, a pupil of J. De Heam, celebrated for her exquisite fruit and flower painting, 1630-1693.

OPIE, AMELIA, was the daughter of the late distinguished physician, Dr. Alderson, of Norwich, and the sister of Mr. Baron Alderson. She was married to John Opie, the eminent historical painter, in

1784, and survived him nearly half a century. From an early period she devoted herself to literary pursuits, principally in the composition of works of fiction and moral tales. These have been chiefly admired for their simplicity and genial feeling. Her public literary career extended from 1805, when she published her 'Adeline Mowbray,' down to 1834, when her 'Lays for the Dead' issued from the press. Besides these she is the author of 'Detraction Displayed,' 'Father and Daughter,' 'Madeline,' 'Temper,' 'Valentine's Eve,' &c. But her happiest effort is considered to be the 'Illustrations of Lying.' For the last twenty-five years of her life she was a member of the Society of Friends, and lived in the strictest retirement at Norwich, where in 1853 she died, aged 84.

OPIE, JOHN, an eminent historical painter, was born, in 1761, at St. Agnes, near Truro, in Cornwall. At the age of 12 he was considered a phenomenon of learning; he had mastered Euclid, and commenced teacher to the peasants in that immediate neighborhood. His father, who was a carpenter, saw his dwelling-house hung with likenesses and sketches of landscapes with anger, at what he thought a mere idle propensity; but his uncle witnessed these efforts of early genius with pleasure. His talents at length attracted the notice of Dr. Wolcot, the satirist, whose instructions greatly served him. He commenced as a portrait painter, and visited the neighboring towns in quest of employment, and on one of these occasions he returned home well dressed, with 20 guineas in his pocket. This money he gave to his mother, of whom he was excessively fond, and told her that in future he should maintain himself. He accordingly removed to London, and was introduced to Sir J. Reynolds. Wolcot was impatient to see his progress; and as his fame had preceded him, the London connoisseurs were all eager to behold the Cornish wonder. He was then 20 years of age, people of distinction crowded his door, and it became the fashion to sit to him; but as the novelty wore off, so did the fashion; and, by the time he was 40, though he gradually improved, he was comparatively deserted. The first specimen he gave of his literary ability was in a life of Sir Joshua Reynolds, in Dr. Wolcot's edition of Pilkington's Dictionary. He then published 'An Enquiry into the requisite Cultivation of the Arts of Design in England;' and he delivered lectures at the Royal Institution. On Fuseli's death, he was appointed to succeed him as professor of painting to the Royal Academy. He died in 1807, and was interred near Sir Joshua Reynolds, in St. Paul's cathedral. His wife AMELIA OPIE, born in 1771, at Harwich, was highly distinguished for her literary abilities, and was the author of 'A Life of Opie,' 'Adeline Mowbray,' 'Simple Tales,' 'The Eve of St. Valentine,' &c.

OPINEER, P., a Dutch annalist, 1526-1595.

OPITZ, or OPITIUS, HENRY, a German divine and Orientalist, whose singular opinions as the pupil of Matthias Wasmuth, subjected him to much enmity among the the learned, 1642-1712.

OPITZ, or OPITIUS, MARTIN, a German poet, was born at Bunzlau, in Silesia, in 1597. He became schoolmaster at Weissenburg, and afterwards secretary to a nobleman, at whose expense he travelled to Paris, where he formed an acquaintance with Grotius. He is called the father of German poetry. Died 1689.

OPPIAN, a Greek poet, who lived under Caracalla, in the beginning of the 3d century, wrote poems distinguished for elegance and sublimity, two only of which are now extant, his 'Halieuticon,' or five

books on fishing and four books on hunting, entitled 'Cynægeticon.' He died in his 30th year, A.D. 213.

OPPIUS CAIUS, the name of two Romans—the first, a tribune of the people, B.C. 215. The second, one of Cæsar's lieutenants, 50 B.C.

OPSOPÆUS, J., a German critic, 1556-1596.

OPSOPÆUS, V., a Ger. philologist, died 1540.

OPSTRAET, J., a French Jansenist, 1651-1720.

ORANGE, FREDERIC HENRY of Nassau, prince of, Stadtholder of Holland, was born at Delft in 1584, and succeeded his brother Maurice in 1625. Died 1647.

ORANGE, WM. of Nassau, prince of, founder of the Dutch republic, was born at Dillemburgh, in 1533. Being attached to the court of Charles V., he was appointed by that monarch to the command of the army in the Netherlands. Having, however, united himself to the Flemish nobles as the advocate of the liberties of the Netherlands, he incurred the hatred of Philip II., and was compelled to fly. He soon took up arms against Spain, and at length wrested a part of the Netherlands from that country. He was assassinated at Delft by Balthazar Gerard, in 1584.

ORCAGNA, A., an Italian painter, 1320-1389.

ORDERIC, VITALIS, an English monk of French descent, kn. as an ecclesiastical historian, 12th cent.

ORDINAIRE, C. N., a Fr. naturalist, 1736-1809.

OREGGIO, A., an Ital. theologian, 1577-1635.

O'REILLY, ALEXANDER, a native of Ireland, who entered into the Spanish army, where he obtained the favor of Charles III., and was raised to the highest military rank for his eminent services. Born 1735, died 1794.

O'REILLY, ANDREW, Count, a general of cavalry in the Austrian service, was a native of Ireland. He was a brave and skilful officer, and had filled in succession all the military grades in the Austrian army, with the exception of that of field-marshal. At the battle of Austerlitz, so fatal to their cause, the remnant of the army was preserved from destruction by his courage and skill; and when, in 1809, he held the post of governor of Vienna, the difficult task of making an honorable capitulation with the French emperor devolved on him. He died in the 91st year of his age.

ORELLANA, FRANCIS, a Spanish officer, who is regarded as the discoverer of the river Amazon, in South America. At least, he was the first European that navigated that mighty stream, and it still bears his name. Died 1549.

ORESME, N., an eminent Fr. prelate, died 1382.

ORFANEL, HYACINTH, a Spanish missionary and hist. of Japan, where he was burnt alive, 1622.

ORFILA, M., a physician, celebrated for his contributions to toxicological chemistry, born at Port Mahon in 1783, died in Paris 1853.

ORGAGNA, ANDREW, an Italian painter, was born at Florence, in 1329. He was also a sculptor and architect. In a picture of the Last Day, he represented his friends in paradise, and his enemies in hell. Died 1389.

ORIANI, B., an Italian astronomer, 1753-1832.

ORIBASIUS, a Greek physician, 4th century.

ORIENT, J., a Hungarian painter, died 1747.

ORIENTIUS, St., bishop of Auch, d. about 450.

ORIGEN, surnamed ADAMANTIUS, was born at Alexandria about the year A.D. 186. His father, Leonides, an intelligent and educated Christian, was martyred in the year 203, and Origen, his mother, and six younger sons, were left in great destitution. The fatherless pupil studied under Clemens Alexandrinus and Ammonius Saccas, and made so great pro-

ficiency that in his eighteenth year Demetrius the bishop raised him to the office of catechist. In this position his success in teaching Christianity was so great, that his life was threatened by his pagan adversaries. During this period he practised peculiar austerities, and subjected himself to a strange mutilation, agreeably to what he deemed the correct meaning of the statement in Matthew xix. 12. He sold his library of secular books for a perpetual income of four oboli a-day, went without shoes, and slept on the ground. About the year 212 he made a brief visit to Rome. On his return to Alexandria he devoted himself more exclusively and assiduously to biblical studies. Among the persons recovered from error by him, was a man of wealth, named Ambrose, who gratefully supplied his teacher with seven amanuenses and as many copyists. The danger in which persecution placed him, obliged him to leave Alexandria in 215, and he took refuge in Cæsarea. Here, though invested with no ecclesiastical office, he publicly expounded the Scriptures. In the year following he was recalled to Alexandria, and still pursued his scripture studies. Immediately afterwards he journeyed into Greece; on his way through Palestine he was ordained a presbyter, and at Antioch had an interview, at her earnest request, with Mammaea, mother of the emperor Alexander Severus. The bishop Demetrius, who had been for some time jealous of the growing fame of Origen, now openly attacked him on his return. In an assembly of prelates he pronounced sentence of exile upon Origen, and having in another degraded him from the priesthood, he sent a circular to all the bishops demanding their concurrence in the judgment. In Palestine, however, Origen was protected; he lived, studied, and preached in Cæsarea. Persecution broke out again under Decius, and he was imprisoned and tortured. He showed himself prepared for martyrdom, but was at length released. His sufferings, however, shortened his life, and he died at Tyre in the year 253, about his sixty-ninth year. The private life and character of Origen were marked by great piety, moderation, meekness, humility, and industry. Under trying provocation he maintained an unruffled temper, and in times of danger he was never unnerved. His orthodoxy was impeached during his lifetime, and Origenism became in succeeding centuries an interminable theme of wrangling and accusation. The fancy of Origen did lead him often astray into wild and extravagant speculations, such as the dream of an ante-natal existence, the pre-existence of Christ's human soul, and the final restoration of men and fallen spirits. His grammatical knowledge did not preserve him from the common and enticing error of spiritualizing, or allegorizing Scripture. As a defender of the faith, Origen was far before any of his contemporaries, as may be seen in his book 'against Celsus,' and the remains of the *Philocalia*, which was compiled out of his writings by Basil and Gregory of Nazianzus, and principally from this clever defence. In the shape of commentary, scholia, or homilies, he published on nearly the whole of Scripture, though only a few portions of these voluminous works have been preserved. His treatise 'De Principiis' is extant in the Latin version of Rufinus. Others of his numerous works exist only in scanty fragments. The 'Exhortation to Martyrdom,' and the book 'On Prayer,' have come down to us. Eusebius speaks of having collected a hundred of his letters. But one chief province of Origen's literary labors was upon the text of Scripture. His famous Hexapla, the best known of his

editions, presents, in successive columns the Hebrew, Hebrew in Greek characters, and the Greek versions of Aquila, Symmachus, the Seventy, and Theodotion; other Greek versions were occasionally added in additional columns. This was a critical attempt to amend the text of the Septuagint. The surviving remains of this noble and costly polyglot were published by Montfaucon, in 2 folio volumes, Paris, 1714. The earlier editions of Origen's works were chiefly in Latin versions, such as those of Merlin, Erasmus, Panzer, and Ganebrard. Huet published the exegetical works in 2 folios, Rouen, 1688; but the *Editio princeps* is the Benedictine one, of De La Rue, Paris, 1733-59, 4 vols., folio, reprinted in fifteen volumes by Oberthür, Würzburg, 1785. A later edition by Lommatzsch in twenty-five 12mo volumes, was printed at Berlin, 1832-48, and a good life was published by Redepenning in two octavos at Bonn, 1846. With all his skilled diligence in biblical literature, Origen was not a safe guide in theology. There is at the same time no doubt that many of his works were interpolated, yet it is plain that he was prone to theorize, and to propound hypotheses which could not be sustained. His hints were by and by broadened by others into assertions, and his conjectures changed into positive affirmations. We cannot but admire his industry and erudition, though we smile at his psychology, and refuse to admit the truth of many of the dogmas with which his name has been so long connected. [J.E.]

ORIGEN, the disciple and friend of Porphyry, lived at the same time as the preceding, and was the successor of Plotinus in the chair of philosophy at Alexandria.

ORLANDI, CL., an Italian architect, 1694-1775.

ORLANDI, PEREGRINE ANTHONY, a learned bibliographer and writer on the history of the arts, was professor of theology at Bologna, where he died in 1730.

ORLANDINI, N., an Italian Jesuit, known as the first historian of his order, 1554-1606.

ORLAY, B. VAN, a Flem. painter, b. about 1490.

ORLAY, J. VAN, a Flem. painter, b. about 1656.

ORLEANS, an ancient dukedom, and titular name borne by the princes of the blood royal in France, of which there are two lines:—1. The first line has given the following names to history:—LOUIS I. of France, duke d'Orleans, second son of Charles V., born 1371, became regent in consequence of the mental incapacity of his brother, Charles VI., 1393, and was murdered by his cousin, the duke of Burgundy, 1407. This event was the source of the bloody feuds between the houses of Orleans and Burgundy. CHARLES, son of the preceding, duke of Angouleme in his father's lifetime, taken prisoner at the battle of Agincourt, died while attempting the conquest of the Milanese, which he claimed in right of his mother, 1465. He left a son, LOUIS II. of Orleans, who, in 1498, succeeded to the crown as Louis XII. Between the first and second houses we find JOHN BAPTIST GASTON, third son of Henry IV. and Mary de Medici, born 1608, created duke of Orleans 1626, and noted for his intrigues during the reign of his brother, Louis XIII. He was banished to Blois by Mazarin in 1652, and died there 1660. 2. The second house of Orleans commences with PHILIP I., second son of Louis XIII. and Anne of Austria, born 1640, received the title of Orleans on the death of his uncle, Gaston, 1660, and the next year was married to his cousin, Henrietta Anne, daughter of Charles I. of England. He is suspected of having poisoned this princess, and, in 1671, was married to Elizabeth of Bavaria, of whom his suc-

cessor was born; died 1701. PHILIP II., born 1674, succeeded to the title of the preceding 1701, and became the celebrated regent Orleans after the death of Louis XIV. He was educated in profligacy by abbé Dubois, and brought the kingdom to the verge of an insurrection (see LAW); died suddenly 1723. LOUIS, son and successor of the latter, born 1703, was distinguished for his accomplishments as a universal scholar and linguist. He died, after passing his life in a literary and religious retirement, 1752. LOUIS PHILIP, son and successor of Louis the preceding, born 1725, was lieutenant-general in the Flemish wars and governor of Dauphiné. He was a man of taste and a lover of literature, and died generally regretted 1785. LOUIS JOSEPH PHILIP, son of the last named, see article below. LOUIS PHILIP, his son and successor, same as the late king of French. See LOUIS PHILIPPE. FERDINAND PHILIP LOUIS CHARLES HENRY, eldest son of the late king of the French, was born 1810 at Palermo, and distinguished himself in 1831 at the siege of Antwerp, and more recently in the African campaigns. He was killed by a fall from his carriage, near Neuilly, 13th July, 1842. His sons are the present Count de Paris, born 1838, and the duc de Chartres, born 1840. His sister, MARIE, princess of Orleans, born at Palermo 1813, was greatly distinguished for her love of art, and especially for her skill in sculpture. She was married to the duke of Wurtemberg in 1837, and died of consumption 1839. Her greatest work is the statue of Joan of Arc, in the museum of Versailles.

ORLEANS, LOUIS PHILIPPE JOSEPH, Duc D', father of the late king of the French, and cousin of Louis XVI., was born at St. Cloud, with the title of Duc de Montpensier, 1747, became duc de Chartres 1752, and succeeded to the title and estates of his father in 1787. In 1769 he married the daughter of the duc de Penthièvre, and enjoyed some measure of the popularity that belonged to her as member of a family beloved by the people. In the conflict between the court and the parliaments, which preceded the revolution, Louis d'Orleans fully justified this preference by opposing the former, and, as a natural consequence, was received coldly by the royal family, and exposed to many mortifications at court; one considerable instance of which was the refusal of the king to appoint him grand admiral of France—a dignity that had fairly reverted to the duc d'Orleans by ordinary custom. His predilection for the popular cause was accompanied by a private character undeniably bad. It may be enough to say on this point, that, as he frequently visited England, he was the boon companion of the prince of Wales, and shared in all those nameless crimes against morality that we commonly understand by 'blackguardism.' The scene of his orgies in France was the *Palais Royal*. 'He changed the noble and spacious gardens of his palace into a market of luxury, devoted by day to traffic (as a means of repairing his shattered fortunes), and by night to play and debauchery—a complete sink of iniquities, built in the heart of the capital—a work of cupidity which antique manners never could forgive this prince; and which, being gradually adopted as their forum by the indolence of the Parisian population, was destined to become the cradle of the revolution.' The duc d'Orleans, in fact, and the *Palais Royal*, became the centre of the great conspiracy that was striding onwards to overthrow all that should have been dear to the descendant of a line of kings. Honor, decency, the privacy of the domestic life of royalty, and the fair name of his cousin Marie Antoinette, were all sacrificed by

the man whose natural place at such a crisis was among the chief defenders of the throne. In 1792 Louis d'Orleans took his seat with the republicans in the national Convention, and adopted for himself and his heirs the name of *Egalité*—even voting for the king's death, 'simply occupied with his duty,' as he expressed himself, 'and convinced that the enemies of public liberty deserved to die.' It has been affirmed that he went to see Louis executed, but this is by no means certain; for his position, especially after the king's death, as first prince of the blood, was such as to bring upon him the hatred and suspicion of all parties. He was accused, at last, of plotting to re-establish the monarchy, either in his own person, or in his family, and the Jacobins were resolved to rid themselves of the embarrassment of his presence. A revulsion of feeling seems to have taken place after his arrest, and he conducted himself with unexpected courage, propriety, and self-possession on the day of his trial and execution—which took place after several months' imprisonment, on 6th November, 1793. On being asked 'Whether he had not voted the death of the tyrant with the ambitious premeditation of succeeding him?' 'No,' he replied, 'I obeyed my heart and conscience.' 'Since you were determined to condemn me,' he added, 'you should have found more specious pretexts, for you will never persuade any one that you believed me really guilty of the treason you charge me with.' Louis d'Orleans, in truth, understood the temper of the people too well to think of aspiring to the crown, and had made himself too familiar with them to dream of any respect in such a character. The republicans sacrificed him for future security, as they would have done every member of the royal family if it had been possible to secure their persons. [E.R.]

ORLEANS-DE-LA-MOTTE, LOUIS FRANCIS GABRIEL D', born 1683, became bishop of Amiens 1733, and died 1774. He is regarded as the model of a Christian minister, and is author of 'Spiritual Letters,' published 1777. His life, by Proyart, was published 1788.

ORLEY, B. VAN, a Flemish painter, 1490–1560.

ORLEY, RICHARD VAN, and his son, JOHN, distinguished at Brussels as miniature painters, and engravers; the former 1652–1732.

ORLOFF, GREGORY, a Russian general and political intriguer, who greatly promoted the elevation of his mistress, Catharine II., to the throne. Being disappointed in his hope of sharing the crown with her, and declining a private marriage, he was supplanted by a new favorite, and died insane 1783. He had one son by the empress, named Bobrinski. ALEXIS, his brother and fellow-conspirator, was a man of gigantic stature and strength, and is said to have strangled the emperor Peter with his own hands. He was a favorite of Catharine, and was married to the princess Taranoff, daughter of the empress Elizabeth; died 1808. GREGORY VLADIMIROVITZ, a nobleman of the same family, bearing the title of COUNT ORLOFF, was distinguished for his patronage and culture of letters. He is author of 'Historical, Political, and Literary Memoirs of Naples,' a 'History of the Arts in Italy,' flour. 1778–1826.

ORME, ROBERT, an historian, was born in 1728, at Anjengo, in the East Indies, where his father was a physician in the company's service. He was educated at Harrow, obtained a civil appointment in India, became a member of the council at Fort St. George, and was a commissary and accountant-general. In 1758 he returned to England, and employed himself in writing 'The History of the Mili-

tary Transactions of the British Nation in Indostan,' the first volume of which was published in 1763, and the second in 1778. The author compiled also a work entitled 'Historical Fragments of the Mogul Empire of the Mahrattas,' &c. Died 1801.

ORMEROD, OLIVER, a Church of England minister and polemical writer of the time of James I., author of 'the Picture of a Puritan,' and 'The Picture of a Papist,' died 1626.

ORMOND, JAMES BUTLER, Duke of, an eminent statesman, was born in 1610, in London, and succeeded to the earldom of Ormond in 1632. During the wars between Charles I. and the parliament he strenuously labored, though with very inadequate force, to uphold the king's authority in Ireland; and on the ruin of the royal cause, he retired to the Continent, and exerted himself to promote the re-establishment of monarchy in England. After the restoration of Charles II. he was created a duke, and was twice appointed lord-lieutenant of Ireland. In 1670 he narrowly escaped with his life from a plot formed against him by the desperado Colonel Blood. Died 1688.

ORMONDE, MARQUIS JOHN BULLER, an English nobleman of refined tastes and considerable literary culture, author of 'Autumn in Sicily,' &c. Died 1854, aged 46.

OROBIO, BALTHASAR, a Spanish Jew, who became professor of metaphysics at Salamanca, and afterwards a physician at Seville, where his family were nominally Christians. Orobio at last fell under the suspicion of the holy office, and was tortured and imprisoned. At the expiration of three years he obtained his release, and then went to Toulouse; from which place he removed to Amsterdam, where he made an open profession of Judaism, submitted to the rite of circumcision, took the name of Isaac, and practised as a physician. He wrote a book against Spinoza, entitled 'Certamen Philosophicum.' Limborch had a conference with him on the subject of the Christian religion, of which he published a celebrated book, entitled 'Amica Collatio cum erudito Judæo.'

ORONO, chief of the Penobscot tribe of Indians. Died at Oldtown, 1801, aged 113 years.

OROSIUS, PAUL, a Spanish ecclesiastic of the 5th century, was a native of Tarragona, and a disciple of St. Augustine. He wrote a 'History of Human Calamities,' which was considered his chief work, and was afterwards translated by Alfred the Great. The time of his death is not known.

ORR, HUGH, a gunsmith, was born in Scotland in 1717, emigrated to New England in 1733, and settled at Bridgewater, Massachusetts, where he carried on an extensive manufactory. He invented a machine for the manufacture of cotton, also for cleaning flaxseed. He was for some years a senator. Died 1798.

ORR, JOHN, served under General Stark in the battle of Bennington, and severely wounded. He was for several years representative and senator of New Hampshire. Died 1822.

ORENTE, P., a Spanish painter, died 1642.

ORSATO, J. B., an Italian antiq., 1673-1720.

ORSATO, SERTORIO, an Italian antiquarian and historian usually called Ursatus, 1617-1678.

ORSI, J. A., an Italian historian, 1692-1761.

ORSINI, a noble Italian family, the most celebrated of whom are—NICHOLAS, count of Pitigliano, a Venetian general, time of the league of Cambray, 1412-1510. His cousin, LORENZO, or RENZO DE CERI, conquered the duchy of Urbino, in the interest of Leo X., and defended Rome against the constable

Bourbon, died 1536. FULVIO, in the Latinized form, FULVIUS URSINUS, a distinguished scholar and antiquarian writer, 1529-1600. The popes, Nicholas III. and Benedict XIII., were of this family, and a branch of the family entered the Neapolitan service, and became the counts of Nola and dukes of Gradina. FRANCESCO and PAOLO, of this branch, were strangled at Sinegaglia by Cæsar Borgia, and the cardinal Orsini was poisoned by Cæsar's father, the pope Alexander VI. See also URSIUS.

ORTE, Viscount D', whose name deserves to be recorded as an instance of manly integrity and true honor, was governor of Bayonne at the time of the infamous massacre of St. Bartholomew. Having received an order from Charles IX. to put to death all the Protestants in his government, he replied in the following words, 'Sire, I have communicated your majesty's letter to the garrison and inhabitants of this city. I have found only brave soldiers and good citizens, and not a single executioner.'

ORTEGA, C. G. DE, a Span. botanist, 1730-1810.

ORTELL, or ORTELIUS, ABRAHAM, a learned geographer, born at Antwerp, in 1527. After travelling on the Continent and in Great Britain, he published an Atlas, which gained for him the appointment of geographer to Philip II. of Spain. His principal works are, 'Thesaurus Geographicus,' and 'Theatri Orbis Terrarum.' Died 1598.

ORTON, JOB, an eminent dissenting minister, was born at Shrewsbury, in 1717. He was the author of a 'Life of Dr. Doddridge,' 'Sacramental Meditations,' 'Discourses on Christian Worship,' 'Discourses on Practical Subjects,' &c. After his death, which happened in 1783, was printed his 'Practical Exposition of the Old Testament,' 6 vols.

ORUS APOLLO, otherwise HORUS APOLLO, and HORAPOLLO, the supposed author of two ancient books concerning the Hieroglyphics of the Egyptians, first published by Aldus in 1505, was a native of Egypt, and first taught as a grammarian at Alexandria, and then at Constantinople, in the reign of Theodosius, about 380. The interesting fragment known by his name is supposed to be, substantially, of much older date, and to have been written in the Egyptian tongue, the books we now have (according to this hypothesis) being a reproduction or abridged version in Greek. The explanations of Orus Apollo have exercised a good deal the curiosity of the learned, and some of the signs are admitted to have the value he assigns to them. The book has often been republished since the time of Aldus, and several times with a Latin version, the latest being that of Leemans, Amsterdam, 1834. The following will give some idea of the meanings of Orus Apollo:—The scarabæus—virility, paternity, strength; the stars—fate and providence; the dew, or soft rain—doctrine; fire and water, as emblems of lustration and expiation—purity; the ox—temperance and strength; the crocodile—insane fury, rapacity, fecundity; the frog—an imperfect or unformed man; the lion's head—watchfulness; the anterior members of the lion—power; the lamp burning—life; the eye—God; the face without eyes, or two eyes represented over a mask—the manes, or infernal gods; the black dove—constancy in widowhood. It is quite clear that this interesting fragment of antiquity contains the remnant of some traditions of remote times, mingled with later inventions or guesses. Orus Apollo gives the meaning of the cross as future life or salvation, and confesses that he cannot explain why. This is the crux ansata, erroneously regarded as the *key of the Nile*, and usually held by Osiris.

[E.R.]

ORVILLE, JAMES PHILIP D', an eminent writer on classical literature, was born at Amsterdam, in 1696. He travelled in England, Italy, France, and Germany, visiting every where the public libraries, and forming an acquaintance with the most celebrated classical scholars of the age. He occupied the chair of history, rhetoric, and Greek literature at Amsterdam, from 1730 to 1742, published several critical works, and died in 1751.

ORY, F., a French juriconsult, died 1657.

ORZECOWSKI, STANISLAUS, in Latin, ORICHOVIUS, a Polish orator and historian, 16th century.

OS, J. VAN, a Dutch flower painter, 1744-1808. His son, T. WILLIAM, a landscape painter, b. 1776.

OSBECK, P., a Swedish navigator, died 1805.

OSBORNE, FRANCIS, an English gentleman, was born in Bedfordshire, about 1588. He became master of the horse to the Earl of Pembroke, and in the civil wars he joined the parliament. Mr. Osborne wrote 'Advices to a Son,' and 'Letters and Poems,' 2 vols.; 'Historical Memoirs on the Reigns of Queen Elizabeth and King James,' 'Plea for a Free State compared with Monarchy,' &c. Died 1658.

OSBORN, SELLECK, a poet, was born in Connecticut, and brought up to the business of a printer. He was editor of the Boston and American Watchman, at Wilmington, Delaware. Died 1826.

OSEOLA, an Indian chief of the Seminoles, known also by the name of Powell. He was the leader of the long border warfare, and died at Fort Moultrie, on Sullivan's Island near Charleston, 1838, aged 35.

OSGOOD, SAMUEL, postmaster-general of the United States, was born at Andover, Massachusetts, in 1748, and graduated at Harvard College in 1770. In 1781, he was a member of Congress, and in 1785 he was appointed first commissioner of the treasury. In 1789 Washington made him postmaster-general, and in 1803, he was appointed naval officer for the port of New York. Died 1813.

OSIANDER, ANDREW, a celebrated protestant theologian, who joined the party of Luther when he declared against indulgences, and took part in all the discussions when the confession of faith was formed at Augsburg. Born at Guntzenhausen, in Franconia, 1498, died 1552. His son, LUKE, called the elder, a famous controversialist, 1534-1604. LUKE, son of the latter, chancellor of the university of Tubingen, 1570-1638. ANDREW, another son of the elder Luke, well known as a theologian and commentator, 1562-1617.

OSIANDER, JOHN ADAM, a theologian and philologist, professor of Tubingen, 1622-1697. His son, of the same names, a physician, 1659-1708. The son of the latter, who also bore the same names, 1701-1756. JOHN, son of the first John Adam, distinguished as a philologist, 1657-1724.

OSIO, F., an Italian historical critic, 1587-1631.

OSIUS, a Spanish theologian, bishop of Cordova at the period of the council of Nice, 256-358.

OSMAN, son of Ibrahim, emperor of the Turks, who was taken captive when a child by certain Maltese adventurers, and, being educated as a Christian, became vicar-general of Dominicans at Malta; died 1676.

OSMAN BEY, NEMSEY, a colonel in the Austrian service, who having been accused of robbing the regimental chest, and received for it a year's imprisonment, determined to go to Constantinople, and turn Mahometan. He accordingly arrived there in 1779, made profession of the Moslem faith, and received from the grand seignor a handsome pension, with an estate in Magnesia, in Asia Minor. He possessed a taste for the fine arts, and for the study of archæolo-

gy and numismatics; and he amused himself in adding to his collection all the scarce coins and medals he could collect. He had continued thus to employ himself for some years, when he was murdered by two of his servants, who were tempted to the deed by the hope of obtaining a large booty, a considerable sum of money being in his possession at the time. This happened in 1785.

OSMOND, J. B. L., a Fr. wr. on books, d. 1775.

OSMOND, ST., bishop of Salisbury in the 11th century, accompanied William the Norman to England, and was not less distinguished for military renown in the early part of his life, than for his learning and piety at a subsequent period. He erected a cathedral at Old Sarum, in which he was interred, but his ashes were afterwards taken up and enshrined. He wrote a 'Missal,' or service book, which became the most popular manual of public devotion among the English clergy, and has principally contributed to hand down his name to posterity.

OSORIO, J., a Portuguese prelate, 1506-1580.

OSSENBEECK, J. VAN, a D. painter, 1627-78.

OSSIAN, an ancient Gaelic bard, is supposed to have lived in the 3d century, and to have been the son of Fingal, a Caledonian hero, whom he accompanied in various military expeditions. His name has derived its celebrity from the publications of Macpherson, which comprise a remarkable series of ballads, on the deliverance of Erin from the haughty Swaran, king of Lochlin, by Fingal. They have been translated into all the European languages, and please by their successful delineation of the passions, picturesque expressions, bold but lovely images and comparisons, deep pathos, and tender melancholy tone.

OSSOLI, THE COUNTESS, better known as Margaret Fuller, was born in Massachusetts, U.S., 1810, and when quite a girl was remarkable for the avidity with which she applied herself to classical and literary studies. She became mistress of a brilliant reputation in Boston and New York, chiefly founded on her conversational powers, and the leading part she took in the friendly *conversazioni* made up at her friends' houses, and in a less degree on the genius and sensibility displayed in her writings. In 1847, while on a tour in Italy, she became the wife of the marquis Ossoli, and on returning to America in 1850, they both perished by shipwreck on the beach of Fire Island. With her perished the MS. of a work on Italy, containing the last and ripest fruits of her genius.

OSSORY, THOMAS, count of. See ORMOND.

OSTADE, ADRIAN VAN, a painter of the Flemish school, was born at Lubeck, in 1610, and studied under Francis Hals. His pictures are characterized by an exact imitation of nature, and usually consist of alehouse interiors, with Dutch peasants smoking, quarrelling, or drinking. His coloring is rich and clear, his touch spirited and free, and all his works are highly finished. Died 1685.

OSTERVALD, JOHN FREDERIC, a Swiss Protestant divine, was born at Neufchatel, in 1663; became pastor of the church in that place in 1699; and died in 1747. His chief works are, 'A Catechism of the Christian Religion,' 'Arguments and Reflections on all the Books of the Bible,' 2 vols.; 'Treatise against Uncleaness,' 'Treatise on the Sources of Corruption,' and 'Sermons.'

OSTERWICK, MARIA VAN, who is ranked among the most celebrated flower painters, was born at Nootdorp, near Delft, in 1630, and died in 1693. She was patronized by the emperor Leopold, William III., and Louis XIV.; and her pictures were eagerly

sought after, and admitted into the choicest collections.

OSTIUS, a Latin poet, 1st century.

OSTROJSKI, vaivode of Kieff, died 1608.

OSTROWSKI, a Polish general, 16th century.

OSTROWSKI, TH. ADRIAN RAWICZ, a Polish statesman and friend of the constitution, 1739-1817.

OSWALD, king of Northumberland, was obliged, after the death of Ethelred his father, to take refuge in Ireland; his uncle, Edwin, having usurped the throne. He became a Christian in his retreat; and returning to his own country, defeated Cerdwalla, king of the Britons, who lost his life. Oswald reunited the two kingdoms of Northumberland; but was slain in a battle with Penda, king of Mercia, in 643.

OSWALD, E., an Austrian *savant*, 1511-1579.

OSWALD, J., a Scottish philosopher, last cent.

OSYMANDYAS, an ancient king of Egypt, who flourished about 1500 years B.C., or, as some authors conjecture, 2300 years. He erected the gigantic works of Thebes, built the Memnonium in the city of the hundred gates, and, according to Diodorus, inscribed on his colossus, 'I am Osymandyas, king of kings; if any man will know my greatness and my resting-place, let him destroy one of my works.'

OTFRID, a German poet, and divine, 9th cent.

OTHER, OHTHER, or OTTAR, a Norwegian traveller of the age of Alfred the Great.

OTHMAN, or OSMAN, the founder of the Ottoman empire and the dynasty of the Osmanlis, was a Turkish chief who made himself master of Bithynia, flourished 1259-1326. A *second*, of the same name, was the sixteenth Ottoman sultan, reigned 1618-1622. A *third*, who was the twenty-fifth sultan, reigned 1754-1774.

OTHMAN AL RHADY, ABOUL SAID, a king of Fez and Morocco, reigned 1310-1331.

OTHMAN-IBN-AFFAN, son-in-law of Mahomet, succeeded to Omar as third caliph 644. He was murdered by Mohammed, son of Abubekr, 656.

[Otho the Great.]

OTHO I., emperor of Germany, distinguished as the Great, was the eldest son of Henry the Fowler, duke of Saxony. He was born 912, elected king of Germany 936, and crowned emperor 962, after subduing Bohemia and Italy, besides waging a successful warfare with Nicephorus, emperor of the

East. Died 973. OTHO II., son of the preceding, was born 955, consecrated king of Lombardy 962, and reigned as emperor after his father 973-983. OTHO III., son and successor of the latter, was a boy when his father died, and died when only thirty years of age, probably of poison, 1002. OTHO IV., son of Henry, the lion duke of Saxony, was born about 1175, and succeeded 1197. He was not recognized over all Germany till 1208, nor consecrated till 1209. In 1214 he was totally defeated by Philip Augustus. Died 1218.

OTHO, duke of Saxony, was the first hereditary lord of that country, and reigned from 880 to 912.

OTHO II., same as the first emperor of that name.

OTHO, a duke of Burgundy, 956-965.

OTHO, the *first* of the name, count of Burgundy, third son of the emperor Frederick I., succeeded him in the county 1190, died 1200. The *second* of the name succeeded the preceding by marrying his widow, Beatrice, 1200, and died 1234. The *third*, son of the preceding, died 1248. The *fourth*, eldest son and successor of Alix, 1279, died 1302.

OTHO OF BAVARIA, elected king of Hungary 1305, was compelled to abdicate 1307. OTHO, duke of Suabia, obtained the duchy of Bavaria in 976, and was killed the same year. The *second* Otho of Bavaria received the duchy from Agnes, mother of Henry IV., in 1061, and was slain after many reverses in 1083. The *third*, called 'the Great,' was nominated by Frederic Barbarossa, and reigned 1180-1183. The *fourth*, called the Illustrious, succeeded his father, Louis I., 1231, died 1253.

OTHO OF BRUNSWICK. See BRUNSWICK.

OTHO, HENRY, Count Palatine, reig. 1556-59.

OTHO, MARCUS SALVIUS, a Roman emperor, was born at Rome, A.D. 32, of a family which descended from the ancient kings of Tuscany. After Nero's death he attached himself to Galba, but that emperor having adopted Piso as his heir, Otho excited an insurrection, murdered Galba and Piso, and ascended the throne in 69. He was opposed by Vitellius, who was supported by the German army, and, in a battle between the two rivals near Cremona, Otho was defeated, on which he slew himself, after reigning three months.

OTHO, St., the apostle of Pomerania, 1060-1139.

OTHO, or OTTO, bishop of Freysingen, son of Leopold, margrave of Austria, and Agnes daughter of the emperor Henry IV., celebrated as a chronicler; died 1158.

OTHO, OTHON, or OTTON, GEORGE, a German Orientalist and rabbinical philosopher, 1634-1713.

OTIS, JAMES, was born in Massachusetts, on the 5th of February, 1725, and educated at Harvard where he took his degree of Bachelor in 1743. He devoted himself to the law, and soon attained to a great reputation for integrity and talents. In 1761 he greatly distinguished himself by pleading against the writs of assistance. At the next election he was chosen a representative to the legislature, where he soon became an acknowledged leader of the popular party. He was a member of the Congress which met in New York in 1765, and in the same year published a masterly defence of the rights of the colonies in opposition to the stamp act. In 1767 he resigned the office of judge advocate, and all other employments under an administration which had encroached upon the liberties of his country. He was hasty in temper and speech, and very obnoxious to the commissioners of the customs and other officials of the crown in Boston. He published some severe strictures upon them, and soon after met John Robinson, one of the commissioners in the evening

[The Osgood Farm, Andover, where Mr. Otis was killed.]

at a public room. An affray followed, when he was assaulted by several ruffians, who left him and a friend who attempted to defend him, covered with wounds. He did not die of the brutal treatment, but, on his recovery, his fine mind was in ruins, and for several years he lived in a state of imbecility. He sued Robinson and obtained a verdict for £2,000, but on receiving a written apology from him, he cancelled the judgment. He was killed by a flash of lightning in Andover, on the 23d of May, 1783.

OTIS, JOHN, colonel and judge, was born at Hingham, Massachusetts, in 1657. He was chief justice of the court of common pleas, and judge of probate. Died 1727.

OTIS, JOSEPH, general and a patriot of the revolution, was born in 1728. He was for some years clerk of the court of common pleas, brigadier-general of militia and a member of the legislature. Died 1810.

OTIS, SAMUEL ALLYNE, secretary of the Senate of the United States, graduated at Harvard College in 1759, and carried on the business of a merchant in Boston. In 1776 he was appointed a member of the convention which framed the Constitution of Massachusetts, also a member of the board of war. In 1788 he was sent to Congress, and after the adoption of the Constitution was appointed secretary of the Senate. Died 1814.

OTRANTO, JOSEPH FOUCHÉ, duke of, minister of police under Buonaparte, was born at Nantes in 1763. When the revolution broke out he made himself conspicuous by the extravagance of his harangues in the patriot club of that city, and in 1792, was sent to the convention. His career as a teacher of philosophy before the revolution was probably the reason of his appointment, in convention, on the Committee of Public Instruction. This function, however, presented little scope for his ambition, and he soon worked himself into the Committee of Finance. In this capacity he displayed his abilities by realizing a good deal of confiscated property for the use of government; and his public spirit was so highly approved that he was next sent to raise a battalion of troops in the city of Troyes. The trial of Louis XVI. was now approaching, and Fouché, who had identified himself with the party of Marat, voted for the instant execution of the king. In September, 1793, he was sent to the department of the Nièvre, to see the decrees of the convention executed; and besides suppressing public worship, he loaded himself with the spoil of the churches. This mission being satisfactorily executed, he was associated with that of Collot D'Herbois

to Lyons, and there the most horrible atrocities were committed. His maxim was, that nothing ought to arrest the will of the people, 'the explosion of the mine, the devouring activity of the flame, should express their power . . . their determination, like that of the tyrant, should be felt as a thunder-clap.' Such was the language of the day to which Fouché lent himself with Jesuitical cunning; and for him there is no apology, as for a Marat, in his sincerity. 'Brought up in a cloister, Fouché had learnt that monkish humility which stoops only to rise the higher; and he devoted himself to the tyranny of the people, until he became the instrument of a new Cæsar. More of an actor by nature than Collot was by profession, he played the part of a Brutus with the soul of Sejanus.' He was not yet, then, in his real element; the overthrow of altars, the disgrace of the cross and the Bible, which he caused to be dragged through the streets at the tail of an ass, the plunder of mansions and churches, and the wholesale butcheries of the city of Lyons, were coolly calculated the price paid for popular influence. After the fall of Robespierre accusations were heard against him on all sides, and in June, 1795, he was driven out of the convention. Enabled to return by the amnesty of October, Fouché remained quiet for about two years, and then, under the *Directory*, became in succession ambassador to Milan, ambassador to Holland, and minister of police. This latter was the very function for which nature had organized Fouché, and for which his career had thoroughly prepared him. He was to the political Jesuits all that Buonaparte became to the army; in him the native cunning of the born conspirator and the finished spy arrayed itself against the daring of the soldier, and the genius of the statesman. He was wise enough to be aware that power like his could only be exercised in secret, and hence his willingness to contribute to the establishment of Napoleon as consul; the successful soldier, on the other hand, seems to have been always conscious of the meanness and danger of employing such an instrument; but in this he had no choice, for unless he would have assassinated Fouché, the only means of keeping such a man harmless, was to employ him in his own interest. Fouché had mixed with men of all parties, was thoroughly conversant with their projects, and held the threads of a thousand conspiracies in his hands. Napoleon finding such a man in authority, and his system of *espionage* in full action, continued him in office till the peace of Amiens in 1802, when his functions were united to those of the minister of justice, M. Régnier, and Fouché was sent to Aix with the dignity of senator. In 1806, after Napoleon had become emperor, a new coalition was formed against him, and to meet certain of its emergencies, Fouché resumed his post as minister of police; his evening parties from this time becoming more brilliant than ever, for he was now created duke of Otranto, and opened his drawing-room to the old French nobility, many of whom acted as his spies. Napoleon, in the midst of his brilliant successes, was restive under the general persuasion of Europe that his throne was dependent on such a system; yet he retained the minister till his marriage with the Austrian princess, when he vainly supposed that his dynasty was established. Preceding that event in 1809, Fouché had made a daring exhibition of his power. During Napoleon's absence in the campaign concluded by the peace of Schönbrunn, the English made a descent upon Belgium. Fouché at this time was minister of the interior as well as minister of police, and without consulting the emperor, he organized an army of the

National Guard with astonishing rapidity, and having put Bernadotte at its head, who was not in favor with Napoleon, sent him to expel the enemy; about the same time he had, virtually, his own private agent at the court of St. James's in the person of M. Ouvrard. The complications arising out of these circumstances determined the emperor's course, and after his second marriage Fouché was appointed governor of Rome, the duke of Rovigo becoming minister of the interior. It was well understood that this change was equivalent to his disgrace, and Fouché remained in a splendid retirement till the disastrous campaign of Russia in 1812, when the emperor, sensible of the mischief he might now do, appointed him governor of the Illyrian provinces, and on the loss of Germany, still to keep him at a distance, governor of Naples. The services of Fouché were not enlisted by the provisional government of 1814, and there is a question how far he was a party in any way to Napoleon's return from Elba. He resumed his old function, however, as minister of police during the hundred days, and after the battle of Waterloo, advised the emperor to abdicate, at the same time making his own peace with the Bourbons at Ghent. The services of Fouché were retained some time by Louis XVIII., but he soon found his position untenable, and thought it convenient to make good his retreat by going as ambassador to Dresden. The law of 1816, passed generally against all the regicides, deprived him of this last political refuge, and after travelling some time in Germany, he settled at Trieste. Fouché died in 1820, leaving a fortune estimated at half-a-million sterling. [E.R.]

OTT, JOHN HENRY, a Swiss divine, 1617-1682. His son, J. BAPTIST, cel. as an Orientalist, b. 1661.

OTT, PET. CHARLES, Baron, an Austrian field-marshal, disting. against the Turks, and more recently in the wars of Italy against France, d. 1809.

OTTER, JOHN, a Swedish Orientalist, 1707-48.

OTTH, ADOLPHUS, a Swiss physician, 1803-39.

OTTINI, PASCAL, an Italian painter, d. 1630.

OTTELEY, WM. YOUNG, F. R. S., F. S. A., and keeper of the prints in the British Museum. During the whole of his life, Mr. Otteley devoted himself to the fine arts, and was known as an artist, a collector, and an author. When scarcely 20 years of age he proceeded to Italy, where, wrapt in admiration of the endless treasures of art, he not only employed his own talents, but the talents of others, in taking copies of the most esteemed paintings, and in collecting whatever appeared most interesting and valuable. There he remained about 10 years; and on his return to England he produced a series of fac-similes of the original drawings of the best masters, under the title of the 'Italian School of Design,' a magnificent work, consisting of 84 plates. His other principal works are, 'The Florentine School,' the 'Origin and Early History of Engraving,' 2 vols.; 'The Stafford Gallery,' and 'The Critical Catalogue of the National Gallery.' Born 1772; died 1836.

OTTO. See GUERICKE.

OTTO, EVERHARD, a Ger. juriscn., 1685-1756.

OTTO, LOUIS WILLIAM, count de Mosloy, an eminent French diplomatist, was born in Baden, in 1754, and educated in the university of Strasburg. He was employed in 1779, secretary and *chargé d'affaires* to the United States in America, where he remained till 1792. He was then employed by the committee of public safety in the foreign department of the state; but, on the fall of the Girondists, shortly after, he was sent to the Luxembourg prison, where he remained till the revolution of the 9th Thermidor. In 1800 he was sent to England, and he remained there, as

minister-plenipotentiary, till the peace of Amiens, when he was succeeded by Gen. Andreowsy. In 1809 he was sent ambassador to Vienna, where he negotiated the marriage of Buonaparte with Maria Louisa, the archduchess; and remained there till 1813, when, on his return to Paris, he became minister of state. At the restoration, in 1814, he was unemployed; and in 1815, during the hundred days, was made secretary for foreign affairs. He was, after the battle of Waterloo, employed by Napoleon to negotiate for his personal security with the English government; but the object failed, through not receiving passports.

OTTO, VÆNIUS, an Italian painter, 1556-1634.

OTWAY, THOMAS, was born in 1651, at his father's parsonage in Sussex. From Winchester school he was sent to Oxford, but left the university for London in his twenty-first year, without a degree. Going on the stage, he failed completely, and began to write plays in 1675. His tragedy of 'Don Carlos' was extremely popular; two or three comic pieces, though very indifferent, were licentious enough to please the debauched patrons of the theatres: the author was likewise a jovial companion; and one of Charles II.'s natural sons procured for him, in 1677, a commission in the army then serving in Flanders. Very soon, however, he retired from service, returned to London in great poverty, and recommenced authorship. He now wrote some translations, and many occasional and miscellaneous poems, and produced a new series of plays. Among these were the two tragedies through which his name is remembered; 'The Orphan' appeared in 1680, and 'Venice Preserved' in 1682. Both of these, especially the latter, abound in that deep pathos which was so cordially admired by Dryden, and which attracted the sympathy of the poetic and imaginative Collins. Otway continued to be poor; and his unfortunate life came to a close in his thirty-fourth year. He died, 1685, in a house in Tower-Hill, where he was hiding from his creditors; and it is asserted that, suffering from hunger, he eagerly swallowed a crust of bread, and was choked by it. [W.S.]

OUDENARDE. See AUDENAERD.

OUDENDORP, F. D', a D. philolog., 1696-1761.

OUDET, JAMES JOSEPH, a French republican officer, of distinguished merit, who was supposed to have been concerned in the formation of a secret society, directed against the imperial power of Napoleon. His movements were accordingly watched by the government with great suspicion; and, after having been alternately employed and exiled, he had the command of a division at the battle of Wagram, where he highly signalized himself, and soon after died of the wounds he received on that occasion.

UDIN, CASIMIR, a French monk, was born at Mezieres, in 1638. He entered among the Premonstrés, and, while in the abbey of Bucilly, in Champagne, attracted the notice of Louis XIV. so much by his talents and genius, that his superiors employed him to make collections for a history of their order. He afterwards embraced the Protestant religion at Leyden, and was made librarian of the university. His works are, 'History of Ecclesiastical Writers,' 'Commentarius de Scriptoribus Ecclesiæ Antiquis, illorumque scriptis,' &c., 3 vols.; 'Veterum aliquot Galliæ et Belgiæ Scriptorum Opuscula Sacra.'

UDIN, CÆSAR, a French interpreter and diplomatist, time of Henry IV., author of a translation of Don Quixote, died 1625. His son, ANTHONY, of the same profession, and author of a history of the Flemish wars, died 1653.

UDIN, C. F., a French writer, 17th century.

ODIN, F., a Jesuit and Latin poet, 1673-1752.

ODINET, MARC ANTHONY, a learned French Jesuit; professor of law in the university of Rheims, and author of several esteemed works on medallic history and antiquities. Born 1643; died 1712.

ODINOT, CHARLES NICHOLAS, Duke of REGGIO, marshal of France, was the son of a merchant, and born in 1767. He entered the army early, and in 1791 was captain of the 3d battalion of volunteers who served in the department of the Meuse. Distinguishing himself by his courage and military skill, he attained the rank of general of division, and was placed on the staff in Massena's army, whom he accompanied into Italy in 1799, and by his courageous conduct during the siege of Genoa, in going twice through the English fleet to communicate with General Suchet, saved the French troops from becoming the victims of famine. In 1800 he joined General Brune's army in Italy, where he gained fresh laurels in forcing the Austrians to repass the Adige; and when war again broke out between France and Austria, in 1805, Napoleon confided an honorable station to General Oudinot, who appeared covered with glory in the field of Austerlitz. In 1806 he was sent to take possession of Neufchatel, where Oudinot conducted himself with so much disinterestedness, as to gain the esteem of its inhabitants, who, in token thereof, presented him with the freedom of their city. He assisted at the siege of Dantzic; and after the battle of Wagram, Napoleon made him marshal of the empire, and created him duke of Reggio. In 1810 he went to Holland to take possession of the throne, which Louis Buonaparte had quitted in disgust. He afterwards shared in the disastrous invasion of Russia, and was there seriously wounded. In 1814 he was again called into action, and again was distinguished for his courage, his great military talents, and a conduct that was never tarnished by the slightest accusation of inhumanity. On the capitulation of Paris, March 31, 1814, the duke agreed to the determination of the provisional government, and did not see Napoleon after that day. On the return of Napoleon from Elba, he placed himself at the head of the grenadiers; but finding it impossible to secure their fidelity to the cause of Louis XVIII., he retired to his seat at Montmorenci. He subsequently received the command of the national guard at Paris; was made a peer of France and a minister of state; and during the war with Spain, in 1823, he entered Madrid, of which he retained the situation of governor a few months, and then returned to Paris. In 1830 he adhered to the new dynasty; and in 1842 succeeded Marshal Moncey as governor of the 'Invalides.' Died 1847.

ODRY, JEAN BAPTISTE, a French painter of portraits and historical subjects. His skill in animals, particularly dogs, was such, that Louis XV. is said to have recognized his favorite ones whenever he saw them in the groups of Oudry, who was pensioned by that monarch, and had apartments in the Tuileries. Born 1685, became a member of the academy in 1717, and died in 1755.

OUGHTRED, WILLIAM, an English divine and mathematician, was born in 1574, at Eton; was educated there, and at King's College, Cambridge; obtained the living of Shalford, in Surrey, which he exchanged for that of Albury; and died in 1660, as is said, of joy, at hearing of Charles's restoration. Though a profound mathematician, his method of treating his subjects was both dry and obscure. He wrote treatises on trigonometry, arithmetic, conic sections, &c.

OULOUGH-BEYG. See ULUGH-BEIGH.

OULTNEMAN, HENRY D', a Flemish historian, 1546-1605. His br., PHILIP, an ascetic, died 1652.

OUSEL. See OISEL.

OUSELEY, SIR WILLIAM, an oriental scholar and wr. on Persian history and literature, 1771-1842.

OUTHIER, R., a Fr. astronomer, 1694-1774.

OUTRAM, or OWTRAM, WILLIAM, a Church of England minister, celebrated for his learning as a theologian, 1625-1679.

OUVILLE, ANTHONY LE METEL D', the brother of Boisrobert, the favorite of Cardinal Richelieu. He was the author of some dramas and tales, the latter of which rivalled those of La Fontaine in licentiousness, but were far inferior to them in wit and humor. Died 1657.

OUVARD, JULIAN, was born at Nantes, in 1772, and was a grocer at the era of the revolution. Being an excellent calculator, and of great address and boldness, he soon made a rapid fortune. He was a contractor under the republican, the imperial, and the restored Bourbon regime; he had the provisioning of the foreign armies during their occupation of France by the allied troops in 1816, and of the French army in Spain during the war in 1823. He was often denounced for his contracts during the revolution, and escaped the guillotine in 1794, by General Boivin concealing him in his house at Nantes. Under the successive regimes, he owed many an escape to the influence of his friend Fouché. In 1810 he was sent on a secret mission by the latter to England, while Napoleon also sent a mission to negotiate a peace. The two ambassadors counteracted each other—the British government evaded what it considered as a trap—they were dismissed; and, on their return, Fouché was disgraced, and Ouvard imprisoned by Napoleon. He subsequently became bankrupt, but he lived in such extraordinary luxury in prison, that his creditors held him confined there for a long time. Great complaints were made in the chamber of deputies in 1824, of the intrigues, extravagance, and material deficiencies of his contract for supplying the French army in Spain; but it was supposed he was protected by the strong arm of authority, as no inquiry into these financial operations was made. He subsequently resided in England, where he died 1847.

OUVARD, RENÉ, a French divine, poet, musician, and mathematician, was born at Chinon in Touraine. He published several works in each capacity, became music-master of the Holy Chapel at Paris, and afterwards canon of Tours, where he died in 1694.

OVANDO, DON NICHOLAS DE, governor of Hispaniola in 1501, an unprincipled tyrant, whose memory is rendered infamous by his cruelty to the natives.

OVERWEG, DR. ADOLPH, explorer of the interior of Africa. Died 1852, aged 30.

OVERALL, JOHN, an English prelate, was born in 1559; and, after taking his degrees, became master of Catherine Hall. Through the patronage of queen Elizabeth, he was made dean of St. Paul's, afterwards bishop of Lichfield and Coventry, and, in 1618, he was translated to the see of Norwich. He compiled a work called "The Convocation Book," in which he maintained the divine origin of government. He had also some concern in the present translation of the Bible, and wrote the sacramental part of the Church Catechism.

OVERBECK, BONAVENTURE VAN, a Dutch historical painter and designer, 1660-1706.

OVERBURY, SIR THOMAS, known as an elegant miscellaneous writer, but more especially for his tragical death at the instance of the earl of Rochester and the countess of Essex, was born in Warwickshire about 1581. He contracted an intimacy with

the earl, then Robert Carr, at the court of James I., and provoked the anger of the countess by endeavoring to dissuade his friend from marrying her; the fact being that he was privy to their intrigues, and well acquainted with the infamous character of the lady. Rochester had the address to procure the imprisonment of his friend in the Tower of London, by creating a cause of offence between him and the king, and, some months later, caused him to be poisoned there, September 15, 1613. Though suspicions were entertained at the time, it was not till 1616 that this deed of darkness was discovered, when the inferior agents were all apprehended, tried, and executed. Rochester, now earl of Somerset, and the countess, were also tried and condemned, but they were both pardoned by the king for private reasons. A nephew of Sir Thomas Overbury, who bore the same names, and inherited his estates, was author of some curious tracts, published 1676-1677.

OVID. PUBLIUS OVIDIUS NASO, the love poet of the Romans, was born at Sulmo, (now *Sulmona*,) a town in the country of the Peligni, about ninety miles south-east from Rome, on the 20th of March, B.C. 43, the year which witnessed the fall of the Roman consuls under the walls of Modena, the formation of the second triumvirate, and the cruel murder of Cicero. The leading events of his life have been transmitted to us chiefly in his own writings. His father belonged to an old equestrian family, and the future poet was the second son, his elder brother being exactly twelve months his senior. At an early age he was brought to Rome along with his brother, and there educated under the most distinguished masters. When the usual period arrived he repaired to Athens for the purpose of completing his studies; and, before returning to Rome, visited, along with the poet Macer, the magnificent cities of Asia Minor. Ovid had manifested even in boyhood a decided taste for poetical composition; but his father, believing that poetry did not necessarily lead to wealth or political distinction, endeavored to check the youthful aspirations of his son, and urged him to adopt the profession of law, as that which opened up to him the highest offices of the state. Parental authority for a time prevailed, and his poetical studies gave place to attendance in the forum. On attaining the legal age, he performed successively the duties of several of the minor offices of state; but his bodily health and his mental constitution alike disqualified him for active or public life. Poetry was his delight; and, therefore, notwithstanding the remonstrances of his father, he resolved to abandon the forum, and to devote himself exclusively to the cultivation of the muses. He now courted the society of the most eminent poets of the day; and the admiration which he cherished for them is pleasingly evinced by his statement, that, when they were assembled, he regarded them as so many divinities. Among his most intimate friends were Macer, Propertius, Ponticus, and Bassus. Ovid was married three times. His first wife, to whom he was united when scarcely beyond boyhood, was, he tells us, unworthy of his affection, so that the union was of short duration; the second, though of blameless character, was also soon discarded, without any serious charge being alleged against her. His third wife, who belonged to the Fabian family, appears to have been every way worthy of the sincere affection which the poet entertained for her till the day of his death. By her he had a daughter, Perilla, who was twice married, and had a child by each husband. Till the end of his fiftieth year, Ovid had spent a life of uninter-

rupted prosperity and enjoyment. His fortune though moderate, placed within his reach the luxuries of refined life, and his fame as a poet collected around him a large circle of devoted admirers. The favor and patronage of Augustus and the imperial family were also extended to him. But a reverse of fortune, as sudden as it was unexpected, was destined to overtake him. At the close of the year A.D. 8, he was ordered by an imperial edict to transport himself to Tomi, a colony in the country of the Gætæ, on the shore of the Euxine, a little to the south of the mouths of the Danube. Resistance was vain. Overwhelmed with grief he tore himself from the arms of his afflicted wife, and set out in the month of December for the place of his destination, which he reached the following spring. The cause of his banishment is a question which has long exercised the ingenuity of scholars; and though various solutions of it have been proposed, it still continues to be a subject of discussion. The ostensible reason was the immoral tendency of his *Art of Love*, which had been published for nearly two years, and to this Ovid frequently alludes; but there is no room for doubt that the wrath of the emperor had been excited by some other and more grave offence. The poet himself declares that his offence was an inadvertence, rather than a crime; but his expressions, when alluding to it, are ambiguous, and even inconsistent. This sudden transition from the luxury and refinement of Rome to the inhospitable soil and the barbarism of Moesia, would have tested severely even the sternest philosophy; and it must be admitted that Ovid did not display great fortitude in submitting to his fate. He died at Tomi, A.D. 18, in the sixtieth year of his age, and the tenth of his banishment. Ovid was born a poet—he ‘lisp’d in numbers, for the numbers came;’ and that he possessed high poetical genius is unquestionable. His judgment and taste, however, are sometimes at fault, and the vigorous fancy and warmth of coloring displayed in some parts of his works are required to counterbalance the false taste and frigid conceit which present themselves in others. At the same time, it must be granted that no poet, either ancient or modern, has expressed beautiful thoughts in more appropriate language. The works of Ovid consist of the *Amores*, or *Loves*, in three books; the *Heroides*, or *Heroic Epistles*, twenty-one in number; the *Ars Amatoria*, or *Art of Love*; the *Remedia Amoris*; the *Metamorphoses*, in fifteen books; the *Fasti*, in six books; the *Tristia*, in five books; the *Epistles from Pontus*, in four books, besides some minor poems.

OVIEDO, a Spanish Jesuit, was born at Illescas. In 1554 he was consecrated bishop of Heliopolis, and went to Abyssinia, where he obtained the title of patriarch; translated several works into Ethiopic, and died there in 1557.

OVIEDO, JOHN GONZALES, a Spaniard, who soon after the discovery of America visited the West Indies, to examine the natural productions of that part of the world. He published the result of his researches; and, according to Fallopius, was the first who discovered the virtues of guaiacum in the cure of syphilis. Died 1540.

OVIEDO Y VALDES, GONZALVA HERNANDEZ D., a Spanish military officer, who was intendant or inspector general of commerce in America, in the reign of the emperor Charles V. He wrote a complete ‘History of the Indies;’ from which succeeding writers have drawn much of their information relative to the intercourse of the Spaniards with America.

OWAIN, a famous British or Welch name borne by a son of Mexen Wledig, who was elected king in the time of the Romans, and is numbered with the British saints. Another OWAIN was prince of Powys 1110-1114, when he was killed by Gerald, constable of Pembroke, whose wife he had seduced. A *third*, OWAIN CIVEILOG, known as a warrior and poet, died about 1197.

OWAIN-GLANDWR. See GLENDOWER.

OWAIN, or OWEN TUDOR, the grandfather of Henry VII., was lord of Pennrynydd, in Anglesea. In 1426 he married Catherine, the widow of Henry V., and had three sons by her. The eldest became a monk. The *second* was EDMUND, earl of Richmond, father of Henry VII., and the *third*, JASPER, earl of Pembroke.

OWEN, GEORGE, an English physician, d. 1558.

OWEN, HENRY, a learned divine of the Church of England, was born in Monmouthshire, and educated first at Ruthin School, and next at Jesus College, Oxford, where he took his degree of M.D., but afterwards entered into orders, and obtained the vicarage of Edmonton, in Middlesex, and St. Olave, Hart Street. He died in 1795, aged 80. His chief works are 'Observations on the Scripture Miracles,' 'Remarks on the Four Gospels,' 'An Inquiry into the Septuagint Version,' 'Sermons preached at Boyle's Lecture,' 2 vols.; and 'An Introduction to Hebrew Criticism.'

OWEN, JOHN, D.D., a scion of an ancient Welch family, was born in 1616 at Stadham, Oxfordshire. His precocious talents and acquirements procured him admission into Queen's College at the age of twelve, and he was made Master of Arts at nineteen. Devoted to his studies at that age, he spent only four hours in bed, but at the same time was fond of all manly and athletic sports, which tended greatly to give vigor and stamina to his constitution. When only twenty-one, he headed the students in a determined resistance to some superstitious rites which the then chancellor of Oxford, Archbishop Laud, designed to impose: and though successful in putting down the innovation, Owen paid dearly for the part he acted, for he was obliged to leave the university. He immediately took orders, although he entered into no pastoral duties owing to the state of his bodily as well as mental health, for he became subject for a time to a deep and desponding anxiety about his spiritual interests. Owen's prospects in life were greatly affected by the part he acted on the outbreak of the civil war. Having zealously espoused the parliamentary cause, an incensed uncle, who had promised to make him heir to his large estate, expunged his name from his will; and he was left accordingly to his own resources. He went an entire stranger to London, and there commenced his career of authorship by publishing his 'Display of Arminianism,' a work suited to the times. The society for purging the church of heresies rewarded him through their Chairman with the living of Frodham in Essex, and during the year and a-half he resided in that parish, his popularity as a preacher was so great, that crowds flocked to hear him from all the surrounding districts. He resigned this living for a charge at Coggeshall, a market town about five miles distant, where he changed from the presbyterian form of church government to the congregational, as being more accordant with the primitive church of the New Testament. His name and character had risen so high, that he was invited to preach before the parliament, on 20th April, 1646, and on several occasions afterwards he performed the same duty, being selected particularly from his

energy as well as his full approval of the proceeding to preach before that body on the day after the execution of Charles I. He became a favorite with Cromwell, who took him as his chaplain first to Ireland, and at a later period into Scotland. On returning home, his design was to resume his pastoral labors at Coggeshall. But the parliament having nominated him dean of the university of Oxford, he removed thither in 1651, and was soon after chosen vice-chancellor. During his administration of the chancellorship, which he held for five years, he rendered important services, and by his moderation, amid the sectarian contests that were then bitterly carried on, secured the love and respect of all parties. His duties as chancellor, though onerous, were not allowed to interfere either with his labor in preaching, or his pursuit in literature. He preached every Sabbath at St. Mary's, and he published several of his best works, such as 'The Perseverance of the Saints,' in 1654, 'The Vindiciæ Evangelicæ, or the Mystery of the Gospel Vindicated,' and 'Communion with God,' which has been valued by many as one of his greatest performances. The restoration of the Stuart dynasty led, amongst other changes of government, to Owen's ejection from his university offices: and having gone to reside at Stadham, a small estate he possessed, lived there in retirement, till, things having become settled and tranquil, he returned to London, and took a public share in works connected with the interests of religion and learning. The rancor of the royalists and High Church party raged so violently against dissenters generally, and Owen in particular, that he contemplated seriously two successive offers made him of important offices in American colleges. His personal safety was sometimes endangered, for on one occasion, his mansion at Stadham was beset by troopers, and he narrowly escaped being made prisoner, by flight through a postern door. He was, even when invested with power and the chief direction of affairs, an enlightened and consistent advocate of the right of private judgment and religious toleration. A brief period of respite was granted to the nonconformists, during Buckingham's administration which commenced in 1667, and Owen undertook the charge of a numerous and influential congregation in Leadenhall Street. But this interval of indulgence was of short duration. A bill against conventicles was passed into a law in 1670, and by the fines and imprisonments it imposed, gave a heavy blow and great discouragement to the cause of dissent. Owen about this time began to decline in health. His great and long-continued labors had made serious inroads on a frame naturally robust and athletic, and having retired to a house at Ealing occupied himself in preparing his last work, 'The Glory of Christ,' for the press. He expired on 24th August, 1683, and was interred in the cemetery of Bunhill Fields. Owen has been often styled 'The Prince of Divines,' and his works, though marked by the tedious prolixity of the age, are a storehouse of valuable matter. [R.J.]

OWEN, JOHN, an epigrammatist, was born in Caernarvonshire; was educated at Winchester and New College, Oxford; after which he became master of Warwick School, and died in 1622. His Latin epigrams possess great point, and several of them are inferior only to Martial.

OWEN, JOHN, a divine of the Church of England, was born in London in 1765, and received his education at St. Paul's School, and at Cambridge. Having taken orders, he became a popular preacher at Fulham, and obtained from Bishop Porteus the liv-

ing of Paglesham, in Essex. Dr. Randolph, the successor of the bishop in the see of London, insisting upon Mr. Owen's residence at his rectory, he was obliged to relinquish the curacy of Fulham, the inhabitants of which parish presented him with a purse of near £700. He was one of the earliest members of the Bible Society, of which institution he continued to be the principal secretary till his death in 1822. Besides various tracts and sermons, he was the author of 'The Retrospect, or Reflections on the State of Religion and Politics in France and Great Britain,' 'The Christian Monitor for the Last Days,' 'Vindication of the Bible Society,' its 'History,' &c.

OWEN, THOMAS, a learned judge, was born at Conover, in Shropshire, and educated at Oxford; from whence he removed to Lincoln's Inn, where he became Lent reader to the Society, in 1583. In 1590 he was made serjeant-at-law, and afterwards a judge of the common pleas. Died 1598.

OWEN, WILLIAM, one of the ablest English portrait painters, was born at Ludlow in Shropshire, in 1769. He came to London, by the advice of Payne Knight, at the early age of seventeen, and became the pupil of Catton the Royal Academician. He attracted also the notice of Sir Joshua Reynolds by a copy he made of the 'Perdita' of that painter. Owen first exhibited at the Royal Academy in 1792; his connections increased so rapidly that in the following year he exhibited several portraits. He frequently very much enhanced the value of his portraits by making them generally interesting as fancy pictures, such as 'Venus'—'The Bacchante'—'Cottage Child from Nature'—'The Children in the Wood,' &c. His success was certainly very great; notwithstanding the rivalry of Lawrence, Beechey, and Hoppner; he had painted the Lord Chancellor and William Pitt before his thirtieth year; and the list of Owen's portraits comprises a very large proportion of the men of rank and talent of the early part of this century. He was superior to Lawrence in male heads: they were void of the simpering *prettiness* and delicacy of complexion which injure many of Lawrence's heads: the sitting full length of William Scott, Lord Stowell, in his robes, is worthy of Vandyck. He was elected a member of the Royal Academy in 1806; in 1810 he was made principal portrait painter to the Prince Regent, and in 1813 he declined the honor of knighthood. He died 11th February, 1825, in his fifty-sixth year, after a lingering illness, though the immediate cause of death was his taking opium instead of an aperient draught, owing to the mistake of the druggist, who had misplaced the labels.—(Cunningham, *Lives of the Most Eminent British Painters*, &c.) [R.N.W.]

OWTRAM. See OUTRAM.

OXBERRY, W. H., a popular English comedian, 1808–1851.

OXENBRIDGE, JOHN, a celebrated divine and popular preacher, was a native of England and educated at Oxford. In 1642 he was a fellow of Eton College. He emigrated to America and became pastor of the first church in New England in 1669. Died 1674.

OXENSTIERNA, AXEL, Count, one of the greatest statesmen that Sweden ever produced, was born at Fano in Upland, 1583, and educated in several of the German universities. He made his first appearance at court in the reign of Charles IX., father of Gustavus Adolphus, and was employed in an important diplomatic mission as early as 1606. Gustavus and Oxenstierna were great friends, and

[Oxenstierna.]

when the former succeeded to the crown in the eighteenth year of his age, the latter, only ten years older, stood by his side as high chancellor. From that time, 1611, to the majority of Christina, 1644, the name of Oxenstierna occupies a large space in Swedish history,—indeed in the history of Europe, as the political antagonist of Richelieu. Gustavus reposed the most unlimited confidence in his honesty and statesmanship, and we shall see immediately that Christina, though far from feeling the same friendship for him as her father, was compelled to do homage to his true worth and ability. We can only give a few principal dates to mark his career. In 1613 he negotiated the peace between Sweden and Denmark. In 1617 he concluded the peace of Stolbova, which followed the Russian campaign, and in 1630, when Gustavus took the field against the imperialists, he was invested with full authority in all civil and military affairs on the Rhine. On the fall of the Swedish hero at Lutzen, 1632, it devolved on the chancellor to take measures for the security of the kingdom, and the senate intrusted him with full powers, so that, in fact, he became virtual king during the minority of Christina. The burden of the war and the administration both rested on his shoulders, and he was not the man to shrink from the responsibility of either. In October, 1633, he presented his memorial to the council, which embraced a complete plan of public defence and finance, provided for the improvement of towns, the abolition of burdens on trade, and the security of civil freedom. He was necessarily intrusted with great power, and it is a proof of his greatness, that he retained it without losing his popularity; and though it was a period of reform and reorganization, he consolidated the state, and placed the daughter of his friend on an unimpaired throne. In 1642 Christina began to preside at the council; in 1644 she assumed the government, and in the month of August, 1645, Oxenstierna concluded the peace of Denmark, on which occasion she created him count of Södermöne. He was, of course, a principal party to the conclusion of the thirty years' war, by the peace of Westphalia, 1648, and sent his son, John Oxenstierna, as plenipotentiary to the convention of the powers on that occasion: it was in answer to his expressions of

diffidence that the chancellor used the words which have become proverbial,—‘You do not know, my son, with how little wisdom men are governed!’ Oxenstierna vainly opposed the intention of the queen to abdicate, and he died a few months afterwards in the same year, 1654. It is thus the daughter of Gustavus writes of him :—‘This great man had large attainments, having studied much in his youth. He contrived to read in the midst of his great occupations. He had a great capacity and knowledge of the affairs and interests of the world. He knew the strong and the weak points of all the states of our Europe. He had consummate wisdom and prudence, a vast capacity, a great heart. He was indefatigable. He had an assiduity and application to business incomparable. He made it his pleasure and his only occupation; and when he took relaxation his diversion was business. He was sober, as much as one could be in an age and country where that virtue was unknown. He was a full sleeper, and said that no affair had ever hindered him from sleeping in his life except twice: the first was the death of the late king, the other the loss of the battle of Nordlingen. He has often told me that when he went to rest he stripped off his cares with his clothes, and let them repose till the next day. For the rest, he was ambitious, but faithful, incorruptible, a little too slow and phlegmatic.’ [E.R.]

OZANAM, JAMES, an eminent French mathematician, was born at Boligneux, in Brescia, in 1640. He was educated for the church; but on the death of his father he relinquished that pursuit, and applying to the study of the sciences, was for many years in high repute as a mathematical teacher. Died 1717. He wrote a great number of useful works, the principal of which are, ‘Dictionnaire des Mathématiques,’ ‘Cours des Mathématiques,’ 5 vols.; ‘Récollections Mathématiques et Physiques,’ 4 vols.; ‘La Perspective Théorique et Pratique,’ &c.

OZAROUSKI, PETER, born in 1769, hetman of

the crown of Poland; was one of the most zealous of the partisans of Russia in destroying the new constitution of 1792. In the insurrection at Warsaw in 1794, his hotel was plundered, and himself hung before his door by the people. His two sons remained faithful to the patriot cause, and served in the Polish army.

OZELL, JOHN, a miscellaneous writer, was born in England, of a French family, and was intended for the church, which profession he declined, and obtained the offices of auditor-general of the city and bridge accounts, of the accounts of St. Paul’s Cathedral, and St. Thomas’s Hospital. His principal works are translations from the French, Italian, and Spanish, among which are Rabelais, Don Quixote, and Moliere. He is described by Pope, in his Dunciad, as a man of consummate vanity; which he resented by an extraordinary advertisement, signed with his name, in a paper, called ‘The Weekly Medley,’ wherein he drew a comparison between Pope and himself, of course very unfavorable to the former, with regard to their general learning and poetical genius. Died 1743.

OZERETZKOFFSKY, NICHOLAS YAKOVLEVICH, one of the earliest members of the academy of sciences at St. Petersburg; author of ‘Memoirs of the Progress of the Sciences in Russia, from 1803 to 1810,’ ‘Elements of Natural History,’ and various other publications serviceable to the advancement of science and literature. Born 1751; died 1827.

OZEROFF, VLADISLAS ALEXANDROVITSCH, a celebrated Russian tragic poet, was born in 1707; entered the army, in which he attained the rank of major-general, and afterwards obtained a civil appointment. He wrote the tragedies of ‘Fingal,’ ‘Demetrius Donskoi,’ ‘Edipus,’ and ‘Polyxena,’ which exhibit beauties of a high order; he also wrote some lyric poems. Died 1816.

OZI, STEPHEN, a French composer, 1754–1805.

OZIAS, the chief of Bethulia, when it was besieged by Holofernes. See HOLOFERNES, JUDITH.

## P

PAAW, PETER, an eminent Dutch physician and botanist, born at Amsterdam, in 1564. He was appointed professor of medicine at Leyden, where he founded the botanical garden, and published several works on anatomical and botanical subjects, which, though surpassed by subsequent productions, are still esteemed. Died 1617.

PACA, WM., one of the signers of the declaration of independence. He was originally educated as a physician, but became an eminent political character, was a delegate to Congress from Maryland and afterward governor of that State. In 1788, was one of the members of the convention of Maryland which ratified the general constitution. In 1789 was made district judge. Died 1799.

PACATIANUS, TITUS CLAUDIUS MARCIUS, a Roman usurper, killed by Decius about 249.

PACATUS, LATINUS DREPANIUS, a poet and orator of the time of Theodosius the Great, 4th cent.

PACCA, Cardinal, was born at Benevento, 1756. After rising through the usual ecclesiastical degrees, and discharging the office of nuncio at various courts, he received from pope Pius VII. the cardinal’s hat in 1801, drew up the famous bull which excommunicated Napoleon in 1809, and was in consequence imprisoned at Fenestrella. In 1813 he rejoined Pius VII. at Fontainebleau, where he induced him to withdraw the concessions a short time previously established with Napoleon by a concordat, returned to

Rome with the pope in 1814, and finally retired from office in 1816, after having re-established the order of the Jesuits. Died 1844. His interesting ‘Memoirs’ have been translated into English by Sir G. Head.

PACCHIONI, A., an Italian anatom., 1664–1726.

PACCIOLI, L., an Ital. mathematician, 16th c.

PACCORI, A., an ascetic writer, 1649–1730.

PACE, or PACIO, an Ital. juriscn., 1550–1635.

PACE, or PAICE, RICHARD, one of the most eminent diplomatists and men of learning in the 16th century, was born in Hampshire about 1482, and educated at the university of Padua. He commenced his public life in the service of Cardinal Bambridge, or Bainbridge, whom he accompanied to Italy, and was afterwards often employed in state affairs by Wolsey. Having fallen under the displeasure of that haughty prelate, he was imprisoned two years in the Tower; and his mind was so much affected that, in the later years of his life, he was only in the possession of his faculties at intervals. He wrote several learned pieces, and was highly esteemed by his friends, Sir Thomas More and Erasmus. Died 1532.

PACHECO, FRANCESCO, a Span. paint. and art-writ., taught by the master of Velasquez, 1571–1654.

PACHECO, DONNA MARIA. See PADILLA.

PACHYMERA, GEORGE, a Greek historian of the 14th century, was born at Nice, of a noble fam-

ily, and rose to high offices in church and state. He died in 1310. He wrote a 'History of Michael Palæologus and Andronicus,' published in Greek and Latin, at Rome, in 1666, in two vols. folio; and a compendium of Aristotelic philosophy was published from his MSS. at Oxford in 1666.

PACIAN, St., a Spanish prelate, 4th century.

PACIANDI, PAUL MARIA, an Italian ecclesiastic, antiquary, and historian, was born at Turin, in 1710. He studied at Bologna, became professor of philosophy at Genoa, and in 1761 he settled at Parma as librarian to the grand-duke, who also appointed him his antiquary and director of some public works; besides which he was historiographer of the order of Malta. He died in 1785. His principal works are, 'A Series of Medals representing the most remarkable Events of the Government of Malta,' 'Monumenta Peloponnesia,' 2 vols. 4to.; and 'Memoirs of the Grand Masters of the Order of St. John of Jerusalem,' 3 vols. 4to.

PACIFICUS, an Italian mechanician, 776-844.

PACIFICUS, M., a Latin poet, 15th century.

PACIO, GIULIO, an Italian *savant*, 1550-1635.

PACK, R., a miscellaneous writer, died 1728.

PACUVIUS, MARCUS, a tragic Latin poet, was a native of Brundisium, and flourished at Rome about 154 B.C. He obtained great reputation by his tragedies, and was much esteemed by Lælius and Cicero, who placed him above Sophocles; but we have nothing of his left by which to judge of his merits, except a few fragments in the 'Corpus Poetarum.' He died aged 89, at Tarentum.

PADILLA, DON JUAN DE, a Spanish noble, who distinguished himself as leader of the popular party in a revolt against Charles V., during the period 1620-1622. He organized a general convention of the malcontents under the title of a junta, by which body he was appointed chief commander of a force of 20,000 men, but not until the cause had been greatly endangered by an unskilful leader. He was taken prisoner at the rout of Villatar, April 23, 1622, and shot the following day. His wife, DONNA MARIA DE PACHECO, exhibited the same heroic spirit as her husband, and, after his death, defended the city of Toledo till reduced to the last extremity. She then made her escape to Portugal, where she died in poverty.

PADILLA, LORENZO DE, a Span. antiquarian and histor. writer, died about 1540. His nephew, FRANCIS, au. of an ecclesiastical history of Spain, 1527-1607.

PAER, F., an Italian composer, 1774-1839.

PAEZ, F. A., a Portuguese divine, died 1532.

PAEZ, PEDRO, a famous Spanish Jesuit and missionary, author of a Description of Abyssinia, where he introduced the Roman Catholic faith, 1564-1622. Another of the name, GASPARD PAEZ, also distinguished in Abyssinia, 1582-1635.

PAGAN, a king of Bulgaria, reigned 764-771.

PAGAN, BLAISE FRANÇOIS, Count de, an eminent Fr. military engineer, was born at Avignon, in 1604. He entered into the army at an early age, and lost an eye, in 1621, at the siege of Montauban. After this he distinguished himself on several occasions, particularly at the passage of the Alps and the barricade of Suza, where he was the first to lead the way over a dangerous height. In 1642 he lost his sight entirely; notwithstanding which he pursued his military studies, and in 1645 published an excellent work, entitled 'Traité de Fortification.' Died 1665.

PAGANACI, J., a French writer, 1729-1797.

PAGANEL, PETER, a member of the French Legislative Assembly and Convention, was born in 1745. He was chosen a deputy in 1791; and when, on the

10th of August, 1792, the unfortunate Louis XVI. sought an asylum in the hall of the representatives, he was one of the first to join in a deputation to the people, in order to restrain their violence; yet he afterwards voted for the king's death. He was consequently obliged to quit France in 1816, and he died at Brussels in 1826. Paganel was the author of 'Essai Historique et Critique sur la Revolution Française,' 3 vols., and some other works of minor importance.

PAGANI, the name of several Italian painters:—VICENZO, died towards the end of the 15th century. LATTANZIO, his son and scholar, known as a painter till 1553, when he abandoned the art. FRANCESCO, flourished at Florence, 1531-1561. GREGORIO, son of Francesco, 1558-1605. PAOLO, distinguished at Venice and Milan, 1671-1716.

PAGANINI, NICOLÒ, one of the greatest violinists that ever lived, was born at Genoa in 1784. His first lessons in music were imparted to him by his father, who seems to have discovered in the early infancy of the young Nicolo germs of that marvellous genius, which afterwards struck the musical world with wonder. At eight years old the boy was so far advanced that he took a prominent violin part in public saloons, as well as in the orchestra of the church. After having studied under Costa, Rolla, Ghiretti, and Paer, he was appointed director of the orchestra to the court of Lucca. In 1828, after having performed in various cities in Italy, he visited Vienna, where a charge of having murdered his wife was brought against him. He was able, however, to successfully refute the ill-founded charge. In 1831, Paganini went to Paris, where he created an immense sensation. After this he went to Brussels, where his wonderful slight of hand on the violin created only laughter. In the year last named the 'Wizard of the Bow,' as he was called, came to England, where he met with astonishing success, and where he received larger sums for his public performances than ever had even been dreamed of before his advent. Paganini died at Nice, in 1840, from a disease of the larynx, leaving an immense fortune. It has been said that though this great and original artist and inventor of difficulties and novel effects on the violin, was inordinately fond of money, he frequently ventured large sums at play in the gaming houses at Paris and other capital cities. His reputation is tarnished from the fact that he often condescended to mean tricks that he might secure the worthless applause of the crowds of 'pretended amateurs,' who flocked to his exhibitions. In person Paganini was tall and thin, with emaciated features, an aquiline nose, and long black elf locks, which personal peculiarities added greatly in the eyes of the unskilled, to enhance the merit of his performances. [J.M.]

PAGE, JOHN, governor of Va., from 1802 to 1805. Died 1808.

PAGE, WILLIAM, a divine of the Church of England, au. of 'The Peace-Maker,' &c., 1590-1663.

PAGEAU, M., a French poet, 16th century.

PAGES, FRANCIS XAVIER, an indefatigable French romance writer, &c., was born at Aurillac in 1745, and died at Paris in 1802. Among his numerous works are, 'Histoire secrète de la Révolution Française,' 6 vols. 8vo., and 'Nouveau Voyage autour du Monde, en Asie, en Amérique, et en Afrique, précédé d'un Voyage en Italie.'

PAGES, GARNIER, a French politician, d. 1841.

PAGES, PIERRE MARIE FRANÇOIS, Viscount de, a celebrated French navigator, was born at Toulouse, in 1748. He sailed from Cape François, in St. Do-

mingo, in 1797, with a view to explore the Indian Seas, and travel through China and Tartary to the Northern Ocean; but on arriving at the Philippine Islands in October, 1768, and finding it impossible to penetrate China, he went by sea to Bassora, and travelling through the desert to Syria, he reached France in December, 1771. He afterwards sailed in Kerguelen's expedition to the south pole, and on his return proceeded as far as 81 degrees and a half of north latitude. He served in the American war, after which he retired to his estate in St. Domingo, where he was murdered during a revolt of the negroes in 1793.

PAGET, EUSEBIUS, a puritan divine, 1542-1617. His son, EPHRAIM, a divine, 1575-1647.

PAGET, LORD WILLIAM, a statesman and ambassador, reign of Henry VIII. and Edward VI., died 1564.

PAGI, ANTHONY, a learned ecclesiastic of the order of cordeliers, author of *Annotations on the Annals of Baronius*, 1624-1690. His nephew, FRANCIS, a cordelier and historian of the popes, 1654-1721. A nephew of the latter, called the ABBE PAGI, author of a history of the Netherlands, about 1690-1740.

PAGNERRE, M., a French bookseller, the publisher of the works of Lamartine, Louis Blanc, and Cormenin, and through the influence of these notabilities made secretary of the French provisional government in 1848. Died 1854.

PAGNEST, A. H. C., a Fr. painter, 1790-1819.

PAGNINO, S., an Ital. Orientalist, 1470-1536.

PAGLEN, PETER, Count, descended from a noble Livonian family, was born 1744. He was appointed military governor of Petersburg by the emperor Paul: but fearing to fall a victim to the capricious disposition of that despot, he formed a conspiracy against him, caused him to be strangled in 1801, and proclaimed his son Alexander emperor. Soon afterwards he withdrew from public life. Died 1826.

PAILETT, LEON, a French journalist, d. 1854.

PAINE, ROBERT TREAT, a distinguished American lawyer and signer of the declaration of independence, was born in Boston 1731. In 1774, was a member of the General Congress, also one of the committee which drafted the State Constitution of Mass., and subsequently judge of the supreme court. Died 1814. His son, of the same name, was a popular lyric poet. His song of 'Adams and Liberty,' brought him the handsome sum of \$750. Died 1811.

PAINE, THOMAS, a deistical and political writer, was born in 1737, at Thetford, in Norfolk, where his father, who was a Quaker, carried on the business of a staymaker, and brought up his son to it. He, however, subsequently became an exciseman, and was living at Lewes, in Sussex, when he lost his situation in consequence of keeping a tobacconist's shop, which was considered incompatible with his duties. His literary abilities having appeared in a pamphlet composed by him in order to show the necessity of advancing the salaries of excisemen, he was introduced to Dr. Franklin, who urged him to go to America, and use his pen in behalf of the colonies. He accordingly went there, and reached Philadelphia in 1774. At first he conducted the *Pennsylvania Gazette*, which from the boldness of its arguments attracted considerable notice. He then published his celebrated pamphlet, entitled 'Common Sense,' which being written with great vigor, and addressed to a highly excited population, had a prodigious sale, and undoubtedly accelerated the famous Declaration of Independence. For this production the legislature of Pennsylvania voted him £500. He was afterwards also rewarded with a grant

of 500 acres of well cultivated land from the State of New York, and made clerk to the committee for foreign affairs. While in this office he published a series of political pamphlets on what he termed the 'Crisis.' In 1787 he embarked for France, and, after visiting Paris, went to England, with a view to the prosecution of a project relative to the construction of an iron bridge, of his own invention, at Roth-erham, in Yorkshire. This scheme involved him in considerable difficulties; but his writings, in which he foretold, or rather recommended, the change that was approaching in France, brought him a supply of money. On the appearance of Burke's *Reflections* on the French Revolution, he wrote the first part of his celebrated 'Rights of Man,' in answer to that work. The second part was published early in 1792; and, May the 21st, in that year, a proclamation issued against wicked and seditious publications, evidently alluded to, though it did not name, the 'Rights of Man.' On the same day, the attorney-general commenced a prosecution against Paine as the author of that work. While the trial was pending, he was chosen member of the National Convention for the department of Calais; and, making his escape, he set off for France, and arrived there in September, 1792. The garrison at Calais were under arms to receive this 'friend of liberty,' the tricolored cockade was presented to him by the mayor, and the handsomest woman in the town was selected to place it in his hat. Meantime Paine had been declared in Paris worthy of the honors of citizenship, and he proceeded thither, where he was received with every demonstration of extravagant joy. On the trial of Louis XVI., he voted against the sentence of death, proposing his imprisonment during the war, and his banishment afterwards. This conduct offended the Jacobins, and, towards the close of 1793, he was excluded from the convention, on the ground of being a foreigner (though naturalized); and, immediately after, he was arrested, and committed to the Luxembourg. Just before his confinement, he had finished the first part of his work, entitled the 'Age of Reason;' and, having confided it to the care of his friend Joel Barlow, it was published. On the fall of Robespierre he was released; in 1795 he published the second part of his 'Age of Reason;' and, in May 1796, he addressed to the council of five hundred a work, entitled 'Decline and Fall of the System of Finance in England,' and also published his pamphlet, entitled 'Agrarian Justice.' Fearful of being captured by English cruisers, he remained in France till August, 1802, when he embarked for America, and reached Baltimore the following October. His subsequent life was by no means happy; for, although occupied in various mechanical speculations, and other engrossing pursuits, and possessed of decent competence, his attacks upon religion had exceedingly narrowed his circle of acquaintance; and his habitual intemperance tended to the injury of his health, and the ultimate production of a complication of disorders, to which he fell a victim in 1809. The Quakers refused to admit his remains among their dead, and he was buried on his own farm. Cobbett boasted of having disinterred him in 1817, and brought his body to England; many, however, assert that Cobbett did not take that trouble, but brought over from America the remains of a criminal, who had been executed.

PAINTER, W., an English writer, 16th century.

PAISIELLO, GIOVANNI, was born at Tarento, in 1741. Having been placed at the Jesuits' college, in his native city, Paisiello soon distinguished himself amongst his fellow-pupils when they had, ac-

according to the rule of the college, to join in singing the hymn to the Virgin. His father was then induced to send him to Naples, that he might study music, where he was placed under the tuition of Durante, a celebrated master of the period; and, after five years' study, he became first master among the pupils of the Conservatoire. His first opera was brought out at the theatre of Bologna, in 1763. The reputation of Paisiello rose so high, that he had engagements to compose operas for all the principal states of Europe, and in the prosecution of his artistic career he visited Germany, Austria, Russia, and France. Paisiello, whose compositions were the most popular of the day, composed about sixty operas, besides masses, cantatas, concertos, songs, &c. He was named member of many learned societies in Italy, and was elected an associate of the French Institute, on the 30th of December, 1809. He died in Naples in the year 1818, when his remains received a public funeral, attended with all the pomp which the catholic church knows so well to employ on grand occasions. On the evening of his funeral his 'Nina' was performed, when the king of Naples and the whole court attended. [J.M.]

PAITONI, J. M., a Venetian writer, died 1774.

PAJOL, PIERRE, a distinguished soldier, was born at Besançon, 1772. Entering the army in 1791, he served in all the campaigns of the Republic, and gradually rose to the highest military honors. Nominated general of division in 1812, he commanded the vanguard in the Russian campaign, when he took Minsk and some other towns; was left for dead at the battle of Leipsic in 1813, recaptured Montereau from the allies in 1814, and had gained possession of Namur, at the moment when the battle of Waterloo decided the fate of France. He then retired from the service of his country, but re-entered it in 1830, when the revolution of July broke out, and directed the attack of the Parisians upon Rambouillet, which led to the flight of Charles X. For these services he was made a peer of France. Died 1844.

PAJON, C., a Fr. protestant writer, 1626-1685.

PAJOU, H., a French author, died 1776.

PAJOU, A., a French sculptor, 1730-1809.

PAKENHAM, SIR THOMAS, a famous naval commander in the last general war, 1758-1836.

PAKINGTON, DOROTHY, Lady, supposed by Dr. Hickes to be the authoress of the 'Whole Duty of Man,' died 1679.

PALADINI, FILIPPO, a painter of the Florentine school, 1544-1614. His daughter, ARCHANGELA, a painter, poet, and musician, 1599-1622.

PALÆMON, QUINTUS RHEMMIUS, a grammarian, who lived at Rome in the reign of Tiberius. He was the son of a slave at Vicenza, and acquired his learning by attending on the son of his master at school, in consequence of which he was rewarded with his freedom, and became a teacher at Rome. There are extant, under his name, 'Ars Grammatica' and 'De Ponderibus et Mensuris.'

PALÆFATUS, an ancient Greek philosopher.

PALÆOLOGUS, the surname of several emperors of the East:—1. ANDRONICUS II. and ANDRONICUS III., which see. 2. JOHN VI., born at Constantinople 1332, succeeded his father, Andronicus, 1341, shared his power with Cantacuzenus till 1355, died, after a debauched life and many reverses, 1391. He was succeeded by his son, Manuel. 3. JOHN VII., grandson of John VI., born 1390, associated with his uncle, Manuel, 1419, succeeded him 1425, died 1439.

PALAFIX-Y-MELZI, DON JOSEPH, the brave

defender of Saragossa, was a Spanish officer descended from an old family of Arragon. He was living in privacy at Alfranca, near Saragossa, when that city was menaced by the French armies in 1808, and was proclaimed governor by the people, though only twenty-nine years of age, and without experience, on the 25th of May in that year. Such was the heroism of the people of Saragossa, headed by Palafox, that the French were compelled to retreat, after a murderous siege and bombardment of sixty-one days. They returned, however, in much greater force, under Marshals Moncey and Mortier, in the month of November, and the former, a few weeks later, was succeeded by Lannes. The city held out till the 20th of February—men, women, and children fighting in its defence till it became a heap of ruins, and suffering dreadfully from an epidemic fever. Palafox himself being prostrated by the disease, and hopeless of success, then resigned the command to St. Marc, and the next day the city capitulated. Its defender became a prisoner at Vincennes till the restoration of Ferdinand, who, in June, 1814, appointed him captain-general of Arragon. Died 1847. [E.R.]

PALAFIX-Y-MENDOZA, JUAN DE, a Spanish statesman and prelate, best known by his 'History of the Siege of Fontarabia,' and 'History of the Conquest of China by the Tartars,' 1600-1659.

PALAPRAT, J. B. DE, a French dramatist, 1650-1721.

PALAZZI, J., a Venetian historian, 1640-1713.

PALEARIUS, A., an Italian scholar and theologian, executed at Rome for heresy, 1570.

PALENCIA, A. DE, a Spanish historian, 15th century.

PALEOTTI, G., an Italian cardinal, 1522-1597.

PALESTRINA, GIOVANNI PIETRE ALOISIA DA, sometimes, also, called PIERLUIGI, was born at Palestrina, the ancient Præneste, near Rome, about the year 1524. It is believed that his first instructor in music was Claude Goudimel, a Huguenot, native of Besançon, who was murdered at Lyons in 1572, on the fatal day of the St. Bartholomew. Having distinguished himself as a composer he was, about the year 1551, admitted into the pope's chapel at Rome, where he was soon afterwards appointed master by Pope Julius III. In 1555, it having been discovered that Palestrina had quitted the state of celibacy, Pope Paul IV. abruptly dismissed him from his post, to which he was afterwards restored in 1571. He having brought church harmony to a degree of perfection that had never before been attempted and never since excelled, departed this life on the 2d of February, 1594. In the course of this master's life, the council of Trent having, amongst other matters, taken the state of church music in consideration, appointed two cardinals to superintend the reform, which they had resolved upon. Immediately, by their direction, Palestrina set about the duty, and produced his celebrated work, known as 'The Mass of Pope Marcellus.' Such was the effect this work produced, that, when it was first performed, every person was enraptured, and the pope compared it to the heavenly melodies which the apostle John heard in his visions. The following account of Palestrina's death was entered in the register of the Pontifical chapel:—'February 2, 1594, this morning died the most excellent musician, Signor Giovanni Palestrina, our dear companion, and *maestro de capello* of St. Peter's church, whither his funeral was attended, not only by all the musicians of Rome, but by an infinite concourse of people, when '*Libera me, Domine*,' (as composed

by himself) was sung by the whole college.' Upon his coffin was inscribed '*Joannes Petrus Aloysius Prænestinus Musicæ Princeps*.' His works, which were very numerous, were chiefly ecclesiastical. Several of his motets and sacred songs are in use in England at the present day. [J.M.]

PALETTA, J. B., an Ital. anatomist, 1747–1832.

PALEY, WILLIAM, D.D., a celebrated divine of the Church of England, was born in 1743 at Peterborough, Northamptonshire. At the age of sixteen he entered Christ's College, Cambridge, But unhappily, seduced by the influence of a few gay and dissolute companions, the first two years of his university residence was entirely lost or misspent. Having had the wisdom and fortitude, however, to disentangle himself from this disgraceful connection, he resolved on a course of devoted study; and such rapid progress did he make that, in 1768, he became a fellow of the college, and soon after colleague to Dr. Law in his public lectures on Moral and Political philosophy, as well as on the New Testament. This early occupation directed the mind of Paley to those subjects, which, when more maturely studied, he gave to the public in works which have obtained him extensive fame as an author. Both as a college lecturer and a preacher, he was greatly admired for his sound sense and discretion, especially for his extraordinary skill in simplifying the most abstruse and difficult subjects, and bringing them down to the level of the humblest capacity. His early patron, Law, who had become bishop of Carlisle, and who was well aware of Paley's merits, promoted his views in the church by presenting him first to the vicarage of Dalston, Cumberland, then to Appleby, in Westmoreland, till in the course of years, he rose to be archdeacon of Carlisle. It was not till 1785, that his '*Elements of Moral and Political Philosophy*' appeared. It was almost immediately adopted as a text-book in Cambridge; and although its leading principle,—that of expediency, has often drawn down upon the moral system of which it is the foundation, the weight of severe censure, the work from the sound sense that pervades it, as well as from the clearness and force of its arguments, still maintains its ground. Not long after, Paley again came before the world as an author by the publication of *Horæ Paulinæ*, or '*The Truth of the Scripture History*' proved from undesigned coincidences in the epistles of Paul. More than any other of Paley's works, this treatise displays the characteristic qualities of the author's mind, and it formed a most important contribution to sacred literature, not only from the intrinsic value of the work, but from its opening up a new line of argument in illustration of the evidences. Paley did not take any open or prominent part in the discussion of public or political questions. But his hostility to the slave trade roused all his energies; and having drawn up an answer to the claims of the slave dealers, sent it to the parliamentary committee immediately previous to the discussion of the subject in the House of Lords. It produced a deep impression, and the author was rewarded not only by seeing the adoption of his views, but by promotion to the rectory of Bishop-Wearmouth, one of the most lucrative situations in the Church of England. It was there he composed and published his '*Natural Theology*,' amid the paroxysms of a painful disease which brought him gradually to the grave. Dr. Paley was suspected of heterodoxy, having discovered a strong inclination to Arian sentiments. In other respects, he was a genial, warm-hearted, benevolent man, distinguished for shrewdness and strong good sense; and those

mental qualities which he possessed in so eminent a degree were brought to bear predominantly on the subjects of religion. Died 1805. [R.J.]

PALFIN, J., a Flemish anatomist, 1649–1730.

PALISSOT DE BEAUVOIS, AMBROISE MARIE FRANÇOIS JOSEPH, an eminent naturalist, was born at Arras, in the French Netherlands, in 1752. After studying at the college of Harcourt, at Paris, he was, in 1772, admitted a counsel of the parliament of that city; and subsequently became receiver-general of territorial imposts, till the suppression of that office in 1777. He then devoted himself to the study of natural history, and he undertook a voyage to the coast of Guinea, with an intention to travel across the African continent to Egypt; but being unable to execute that design, he sailed for St. Domingo, in 1788, and there occupied some official situations. Having opposed the revolutionary attempts of the negroes, he with difficulty effected his escape to America, purposing to return to France, when he learnt that he had been proscribed as an emigrant. He occupied himself while in America as a teacher of languages and as a musician, but he did not neglect his favorite pursuits; and on hearing that his name had been erased from the proscribed list, he returned to his native country, taking with him the rich collection of natural curiosities which he had formed. He died in 1820.

PALISSOT-DE-MONTENOY, CHARLES, a Fr. dramatic writer and literary critic, 1730–1814.

PALISSY, BERNARD DE, a celebrated French potter and chemist, was born at Agen, and for his ingenuity in painting on glass and other works was patronized by Henry III. He made considerable discoveries in natural history, and is said to have been the first who gave a true theory of fountains. Palissy was a zealous Calvinist; and, during the fury of the league under Henry III. in 1584, he was committed to the Bastille. Died 1590.

PALLADINO, GIACOMO, or JAMES, an Italian prelate and theologian, generally called Giacomo de Teramo, author of '*Consolatio Peccatorum*,' a religious romance, 15th century.

PALLADIO, ANDREA, one of the greatest classical architects of modern Italy, was born at Vicenza, in 1518, and learnt the principles of his art from Trissino. He went to Rome, where he acquired a maturity of skill and science from an examination of the productions of ancient and modern art which that capital afforded. Returning to his native country, he established his fame by his designs for many noble edifices both there and in other parts of Italy, which have afforded models for many beautiful structures of most parts of Europe. He wrote a '*Treatise on Architecture*,' which has been many times reprinted. He was likewise the author of a work, entitled '*Le Antichità di Roma*,' and an illustration of Cæsar's Commentaries. Died 1580.

PALLADIUS, the name of several ancient *sa-vants*:—1. A bishop of Helenopolis, in Bithynia, author of a '*History of the Hermits of the Desert*,' and friend of Chrysostom, born about 368. 2. An author of a '*Dialogue of the Life of Chrysostom*,' written at Rome 408. It is a question among the learned whether or not he is the same as the preceding. 3. A Roman writer on agriculture, son of a Gaulish præfect, born about 405. 4. A Romish prelate, mentioned as 'the first apostle of the Scots,' died about 450. 5. A physician of Alexandria, surnamed Sophista, or Satrosophista, author of medical works in Greek, 6th century.

PALLAS, the freedman of the emperor Claudius, over whom he had so great an ascendancy as to per-

suade him to espouse Agrippina his niece, and to adopt Nero for his successor. Nero caused him to be put to death secretly, but erected a monument to his memory. Pallas was brother to the Felix before whom St. Paul pleaded.

PALLAS, PETER SIMON, a celebrated traveller and naturalist, was born at Berlin, in 1741; and studied at Halle, Gottingen, and Leyden. The empress Catharine, seeking for a naturalist to explore her immense empire, invited Pallas to Petersburg, and, in 1777, he became a member of the committee for the measurement and topography of Russia. As it was his desire to reside in the Crimea, the empress gave him several estates in the most fertile part of it. There he remained 15 years; but at length he quitted Russia, and settled at Berlin, where he died in 1811. Among his numerous works are his 'Travels,' which Saussure denominated an inexhaustible mine for the naturalist and statesman; 'Historical Documents on the Monguls,' and a 'Physical and Topographical Description of the Taurida.'

PALLAVICINI, or PELAVICINO, the Marquis Oberto, a chief of the Ghibellines, died 1269.

PALLAVICINO, FERRANTE, a satirical poet and man of letters, born 1618, beheaded 1644.

PALLAVICINO, SFORZA, an Italian cardinal, author of a 'History of the Council of Trent,' 1607-1667.

PALLIERE, V. L., a French painter, 1787-1820.

PALLIOT, P., a French genealogist, 1608-1698.

PALLISER, SIR HUGH, an English admiral, was born in 1721. He entered into the navy early in life, and distinguished himself on many occasions, particularly at the taking of Quebec. In 1773 he was made a baronet; but being second in command to Admiral Keppel, in the memorable battle off Ushant, July 27, 1778, some misunderstanding took place, and these two officers preferred charges against each other. Keppel was acquitted, and Palliser censured. This sentence, however, was considered as more the effect of party than of justice; and he was made governor of Greenwich Hospital, where he died in 1796.

PALLUEL, F. C. DE, a French agriculturist, 1741-89.

PALM, J. G., a German divine, 1697-1743.

PALM, JAMES PHILIP, a citizen and bookseller of Nuremberg, who, in 1806, being accused of having distributed a pamphlet against Buonaparte, entitled 'Germany in her deepest Humiliation,' was arbitrarily arrested, by virtue of an order sent from Paris, and conducted to Brennan, where he was arraigned before a military commission, pronounced guilty, and shot. This act of tyranny was every where regarded with horror. Palm was considered throughout Germany as a martyr, and public subscriptions were entered into for his widow and children.

PALMA, JACOB, the name of two Italian painters, the elder of whom was born at Bergamo 1518, and died at Venice 1574. The younger, his great nephew, flourished at Venice, 1544-1628.

PALMELLA, Duke of, a distinguished Portuguese statesman, was born in 1781. He took an active part in all the political troubles of his country during the last thirty or forty years; and it was owing to his aid and counsels that the queen of Portugal was indebted, in a great measure, for her establishment on the throne of her ancestors. A very considerable part of his life was dedicated to the diplomatic service of his country, which he represented at the congress of Vienna and in London. In 1820 he made a fruitless voyage to Brazil, to paci-

fy the revolution which had burst forth. He was also selected to attend at the coronation of Queen Victoria; and his great wealth enabled him to vie on that occasion with the representatives of the other courts of Europe. He was several times called on to offer advice to his sovereign, but only held office for a limited period. Died 1850.

PALMER, H., a learned divine, 1601-1647.

PALMER, JOHN, an English actor, was born in London about 1742, and commenced his career as an actor in inferior parts at the Haymarket and Drury Lane theatres. Gradually increasing in reputation, he was at length appointed manager to a new theatre proposed to be built in the east of London, but not being able to procure a patent, he returned to Drury, under circumstances of pecuniary embarrassment, which ultimately induced him to resolve to emigrate to America, which country, however, he never visited. His death was remarkable. It took place on the stage of the Liverpool theatre, while performing the character of the Stranger, and uttering the exclamation—'There is another and a better world.' This event occurred 2d August, 1798. Mr. Palmer was one of those actors who are made by time and practice. He was a modest and punctilious man, much respected, with, it would seem, a dash of superstition in his character; and, according to Boaden, seems to have had a presentiment of his death. [J.A.H.]

PALMER, JOHN, the first projector of mail-coaches, was a native of Bath, where he was brought up as a brewer, but subsequently solicited and obtained a patent for a theatre in his native city, which concern proved eminently successful under his management. Being much in the habit of travelling from place to place, for the purpose of securing rising performers, the idea occurred to him that a better mode of conveying the mails was most desirable, and he accordingly matured the plan of transmitting letters by coaches with guards, now superseded by the railway. He succeeded in his object, though not without great opposition; but the utility of the plan soon became manifest, and he was made comptroller-general of the post-office, with a salary of £1,500 a year. Some disputes, however, occurring, he lost the situation in 1792; and though he afterwards, through petitions, was reimbursed by parliament, the compensation was very inadequate to the per centage he was to have received, in case his plan succeeded. Died 1818.

PALMER, S., an historian of printing, d. 1732.

PALMIERI, M., an Italian annalist, 1405-1475.

PALMIERI, V., an Ital. theologian, 1753-1820.

PALMQUIST, MAGNUS, Baron De, a Swedish mathematician, and president of the Company of Miners, 1660-1729.

PALMSCHOELD, ELLAS, a Swedish historical antiquarian employed at Stockholm, died 1719.

PALOMINO DE VELASCO, ALCIBLES ANTONIO, an eminent Spanish painter, was born near Cordova, in 1653, and was a pupil of Valdes. He was appointed royal painter, with a pension; and he distinguished himself also as an author, having written a work on the theory and practice of painting, with the lives of the most celebrated artists, &c. D. 1726.

PALSGRAVE, JOHN, a polite writer, died 1554.

PAMELE, J. DE, a French theologian, 1536-1587.

PAMPILIUS, a Greek painter, 4th century.

PAMPILIUS, St., a presbyter of Cæsarea, in Palestine, who suffered martyrdom in the persecution under Maximinus, 309.

PANARD, C. F., a Fr. poet, about 1691-1764.

PANASIUS, a Stoic philosopher, 2d century B.C.

PANCIROLUS, GUY, an eminent Italian civilian, was born, at Reggio, in 1523. He became professor of the Institutes at Padua; and, after filling that chair seven years, was appointed to that of the Roman law, but resigned it in 1571, to go to Turin, where he obtained the professorship of civil law. In 1582 he returned to Padua, where he died, in 1599; having given to the world several excellent works on jurisprudence, besides a curious treatise on the ancient inventions which are lost, and on those inventions which belong to the moderns.

PANEKOUCKE, ANDREW JOSEPH, a Flemish bookseller and literateur, 1700–1753. His son, CHARLES JOSEPH, distinguished as a journalist at Paris, founder of the 'Moniteur,' &c., 1736–1798.

PANEL, A. X., a Fr. numismatist, 1699–1777.

PANETIUS, a stoic philosopher, was a native of Rhodes, and flourished 150 B.C. He studied at Athens with such credit as to be offered the rights of citizenship, which he refused, saying, 'a modest man is content with one country.'

PANGASIS, a Greek poet, 5th century B.C.

PANIGAROLA, F., an Italian prelate, 1548–94.

PANIN, NAKITA IVANOWITZ, Count de, a Russian statesman, was born in 1718. His father, who was a lieutenant-general in the service of Peter I., was originally of Lucca, in Italy. Young Panin, by his artful address, gained the favor of his sovereign, who sent him, in 1747, to Copenhagen, and afterwards to Stockholm, with the title of minister plenipotentiary. On his return he was made governor of the grand-duke, and, lastly, prime minister to Catherine II. Died 1783.

PANNINI, GIAN PAOLO, an Italian architect and landscape painter, 1691–1764. His son, FRANCIS, distinguished in the same line of art, dates unknown.

PANNONINO, J., a Hungarian poet, 1434–72.

PANTÆNUS, a Christian philosopher of the stoic sect, in the 2d century. He is supposed to have been a native of Alexandria, and to have taught philosophy there about A.D. 180. He went on a mission to Ethiopia, from whence he is said to have brought the gospel of St. Matthew, written in Hebrew. Died 213.

PANTALEON, H., a Fr. historian, 1522–1595.

PANVINIO, O., an Ital. historian, 1529–1568.

PANZACETIA, MARIA HELENA, an Italian lady, distinguished as an historical painter, 1668–1709.

PANZER, G. W. F., a Ger. bibliog., 1729–1805.

PAOLI, D. S., an Italian literateur, 1684–1751.

PAOLI, HYACINTH, or GIACINTO, a native of Corsica, distinguished for his part in liberating his country from the Genoese, 1729. He became one of the chief magistrates of the country, and acted as the lieutenant of the king elected by the patriots. He retired to Naples on the invasion of the French, and died there about 1755. His son, PASCAL, is the subject of the following article. An elder son, CLEMENT, also a distinguished patriot, died in Italy, and with him, as he left only daughters, the name of Paoli became extinct.

PAOLI, PASCAL, was born in Corsica in 1726. His native island had long been under the oppressive domination of the Genoese, which the Corsicans made repeated efforts to shake off. Paoli was raised to the headship of the liberating party in 1755. He organized a regular civil and military government, and for thirteen years carried on the war of independence against the Genoese with unvarying spirit, and with general success. In 1768, the Genoese sold their right of sovereignty over Corsica to France. The French endeavored to induce Paoli to recognize their dominion and adopt their interests, by lavish offers

of rank and money. But Paoli rejected all their bribes, and made a gallant though unsuccessful resistance to the troops which they poured into Corsica. After the French conquest was completed, Paoli took refuge in England, where he was received with merited respect. The British government settled a pension on him, and he passed many years in honored friendship with Burke, Johnson, and other distinguished Englishmen of the age. When the war of the French Revolution commenced, Paoli headed an expedition to Corsica, by which it was sought to detach that island from France, and unite it to the British dominion. This attempt, after some temporary successes, ultimately failed. Paoli returned to England, where he passed the remainder of his life in tranquillity. He died in 1807. He deserved the eulogium which the English historian Lord Mahon has pronounced on him, of being 'a brave and skilful soldier, and an upright and disinterested statesman.' He was also a warm and sincere friend; his literary acquirements were considerable; and he was a man of spotless integrity and pure morals in private life. [E.S.C.]

PAOLINI, P., an Italian dramatist, 1663–1726.

PAPA, J. DEL, an Ital. physician, 1649–1753.

PAPIAS, a grammarian of the 11th century.

PAPIAS, ST., a bishop of Hierapolis, 2d century.

PAPILLON, A., a French poet, 1487–1559.

PAPILLON, JOHN, two French wood engravers, father and son—the former, 1639–1710; and the latter, 1661–1710. A younger son, NICHOLAS, same profession, 1663–1714. A grandson of the elder John, named JOHN BAPTIST, noted for his foliage and flowers, 1698–1776. A brother of the latter, J. B. MICHEL, 1720–1746.

PAPILLON, P., a French canonist, 1667–1738.

PAPILLON, T., a Fr. jurisconsult, 1514–1596.

PAPIN, DENYS, an eminent natural philosopher and physician, was born at Blois, in France. After taking the degree of M.D., he visited England; and, in 1680, became a fellow of the Royal Society. While here he made many attempts to bring the steam-engine to perfection, and published an account of an invention, which still bears his name. His work is entitled 'The New Digester, or Engine for the Softening of Bones,' 4to. Papin assisted Mr. Boyle in his pneumatic experiments; and, on leaving England, he went to Marburg, where he was made mathematical professor in 1687, and died in 1710.

PAPIN, ISAAC, a French divine, 1657–1709.

PAPINIAN, ÆMILIUS, a celebrated Roman lawyer, was born in the year 175; and became advocate of the treasury, and afterwards prætorian prefect under the emperor Severus, who recommended his sons, Caracalla and Geta, to his care. When the former murdered his brother, he ordered Papinian to justify the deed, which he not only refused, but nobly observed, that it was easier to commit a parricide than to excuse it, and that slander of innocence was a second parricide. He was accordingly soon after put to death, A.D. 212.

PAPON, J., a French Hellenist, 1505–1590.

PAPON, JOHN PETER, an ingenious writer, was born in Puget, near Nice, in 1736. He was a priest of the congregation of the Oratory, but he quitted that society to become keeper of the library at Marseilles. During the stormy era of the revolution, he removed to the Puy de Dôme; and, after remaining there some years, he returned to Paris, where he died in 1803. His principal works are, 'Histoire générale de Provence,' 4 vols.; for which he obtained a pension; and 'Histoire de la Révolution de France,' 6 vols., a posthumous publication.

PAPPENHEIM, COUNT, one of the most illustrious generals of Austria during the thirty years' war, 1594-1632.

PAPPONI, J., an Italian jurist, died 1605.

PAPPUS, a mathematician of Alexandria, 4th c.

PAPPUS, J., a German divine, 1549-1610.

PAQUOT, J. N., an Austrian hist., 1722-1803.

PARABOSCO, G., an Italian poet, 16th century.

PARACELSUS. PHILIPPUS AUREOLUS THEOPHRASTUS PARACELSUS BOMBAST, AB HOHENHEIM, was born about the year 1403, near Zurich. Although he has left no discovery behind him, he is highly distinguished as the founder of the modern science of medicine. He instituted an immense number of experiments on the influence of chemical remedies in disease, and acquired much fame by the successful result of his treatment. He travelled extensively throughout Europe for the purpose of adding to his stock of knowledge, and of studying nature in her varied departments. He was professor of physic and surgery at Basle, from 1526 to 1527, when he abdicated his office and afterwards became a wanderer through various parts of Germany, Colmar, Moravia, Vienna, Hungary, and finally Salzburg, where he died in 1541, in his forty-eighth year. Paracelsus was a man of most dissolute habits and unprincipled character; and his works (Opera) are filled with the highest flights of unintelligible bombastic jargon, unworthy of perusal, but are such as might be expected from one who united in his person the qualities of a fanatic and a drunkard. [R.D.T.]

PARADIN, WILLIAM, a French historian, 1510-1590. His brother, CLAUDE, a writer on genealogy, &c., about the same period. JOHN, cousin of the preceding, distinguished as a poet, about 1508-1588.

PARADIS, PAUL, a Jewish convert, first professor of Hebrew at Paris, died 1559.

PARADIS DE RAYMONDIS, JOHN ZACHARIAH, a French moralist and agriculturist, 1746-1800.

PARADISI, COUNT AGOSTINO, an Italian poet, professor of civil economy and the Belles Lettres at Modena, born at Vignola, Reggio, 1736, died 1783.

PARADISI, COUNT JOHN, son of the preceding, born about 1760, became director of the Cisalpine republic in 1797, and, at a later period, president of Napoleon's Italian senate. He died 1826, distinguished as a philosopher and man of letters.

PARASINA MALATESTA. See NICHOLAS.

PARCELLES, JOHN, a Dutch painter, noted for his storm-pieces, 1597-1641. His son, JULIUS, born about 1628, painted in the same style.

PARCIEUX. See DEPARCIEUX.

PARCK, THOMAS, an engraver, 1759-1834.

PARDIES, J. G., a French *savant*, 1636-1673.

PARDOUX, B., a French physician, 1545-1611.

PARE, AMBROSE, one of the greatest surgeons of modern times, called the father of French surgery, was born in 1509, and was professional adviser of four French sovereigns. Though a Huguenot, he was in the fullest confidence of Charles IX., and by his favor escaped the massacre of St. Bartholomew; died 1590.

PAREJA, JUAN DE, a painter, was born in the West Indies, in 1610, and became the slave of Diego Velasquez. In the absence of his master, Pareja amused himself in drawing and copying his works, but secretly, for fear of giving offence. Philip IV., king of Spain, coming one day to visit Velasquez, Pareja contrived to place one of his own pictures in his way, with which his majesty was extremely pleased. The slave then fell on his knees, and besought the king to ask his master to forgive him. Philip not only did this, but obtained him his liberty;

but the faithful Pareja would not quit Velasquez till his death. His portraits are very fine. He died in 1670.

PARENT, A., a Fr. mathematician, 1666-1716.

PAREUS, the name of three distinguished theologians and philologists of Germany:—DAVID WOENGLER, author of many commentaries, 1548-1622. PHILIP, his son, about 1576-1650. DANIEL, son of the latter, 1605-1635.

PARFAIET, F., a French dramatist, 1698-1753.

PARIJI, J., an Italian architect, died 1635.

PARINI, JOSEPH, an eminent Italian poet, was born in 1729, at Basiglio, in the Milanese. He raised himself to eminence by his talents, which he employed in satirizing the vices and follies of the age. He first exerted his poetical abilities to procure the means of support for himself and his widowed mother; but he was obliged to struggle through nearly 20 years of obscurity and indigence, ere he emerged into reputation and competence. He was professor of belles lettres, eloquence, and the fine arts, at Milan; and died in 1799. His works form 6 vols. 8vo.

PARIS, A., a French ecclesiastic, 1631-1683.

PARIS, F., a notary of Paris, known at the period of the revolution as a friend of Danton.

PARIS, F., a French religious writer, d. 1718.

PARIS, FRANCIS, commonly called the ABBE PARIS, was a French ecclesiastic, born 1690. He died after a life of religious mortification and charity 1727, and was buried in the cemetery of Saint-Medard. Here the most extraordinary scenes took place, occasioned by the alleged miracles wrought at his tomb, where persons went into convulsions and transports of prophetic delirium. An account of these occurrences was written by the magistrate Montqueron, and they only ceased when the government took active measures, prosecuted some of the parties, and walled up the ground.

PARIS, J. B. F., Fr. general, about 1748-1820.

PARIS, JEAN J., a political writer, died 1824.

PARIS, L. M., a writer on grammar, 1740-1806.

PARIS, MATTHEW, one of our earliest English historians, was a Benedictine monk of St. Albans, and is known from 1245, to the year of his death, 1259. He was a man of the highest character, and distinguished as a musician, poet, orator, theologian, painter, and architect. His practical talents were turned to the reformation of monastic discipline, on which account he was sent to Norway by the pope. His principal work, first published in 1571, extends over English history from the reign of William the Conqueror to his own times, the earlier portion being lost. Other works of his exist only in MS.

PARIS, M. A., a French general, killed 1814.

PARIS, P. A., a French architect, 1747-1819.

PARIS, P. L., an actor of the French revolution, originally a priest of the oratory, executed 1794.

PARISAN, P. G., a French dramatist, 1755-93.

PARISEAU, N. DE, born in 1753; a celebrated victim of the 'mistakes' of the guillotine. Pariseau was director of the opera ballets at Paris, and ardently espoused the cause of the revolution in 'La Feuille du Jour.' He was arrested by the revolutionary tribunal in 1793, and *beheaded by mistake*, instead of Parisot, a captain of the king's guard.

PARISOT, or NORBERT, PETER, a Capuchin, was born at Bar-le-Duc, in 1697. In 1736 he went as a missionary to the East Indies; but having quarrelled with the Jesuits, they had him removed to America. He returned to Europe in 1744; and soon after published a work, entitled 'Historical Memoirs relative to the Missions in the Indies,' which giving offence to his own order, as well as the Je-

suits, he withdrew to England, where he established two manufactories of tapestry. After visiting part of Germany and the Peninsula, he at length returned to his native country, became reconciled to his order, and again abjured it. His most important work is a 'History of the Society of Jesus, from its first foundation by Ignatius Loyola.' Died 1770.

PARK, SIR JAMES ALLAN, an eminent English lawyer, was born at Newington, Surrey, and was educated at the free grammar school at Northampton. He was called to the bar in 1784, and speedily brought himself into notice by the profound knowledge he displayed in mercantile law and marine insurance. A work which he published on this latter subject rapidly became the complete text book of the profession, and continues so to this day. At the bar he was an admirable speaker; and when raised to the bench in 1816, as one of the justices of the court of common pleas, he proved himself a no less admirable judge. In addition to the legal work of which we have made mention, he published, in 1801, 'An Earnest Exhortation to a Frequent Reception of the Holy Sacrament of the Lord's Supper, addressed to Young Persons, by a Layman.' Died 1839.

PARK, MUNGO, was born at the farm of Fowlshields, near Selkirk, on the 10th September, 1771. An aptness for learning which he early showed, and a reserved and thoughtful manner, and grave deportment, which were natural to him, and distinguished him through life, induced his parents to select him as the most fitting of their sons for the ministry of the Church of Scotland. His education was directed accordingly; but his own tastes and aspirations took a different turn, and choosing the medical profession, he was apprenticed, at the age of fifteen, to Mr. Anderson, a surgeon in Selkirk. Here he remained three years, and then went to study at Edinburgh college, where his attendance on the usual course was continued for three successive sessions, the term necessary for graduation as a surgeon. A taste for botany acquired at this period, and freely indulged in during his summer rambles, was of the greatest use to him afterwards, and may be said to have in a great measure determined his future career. A young neighbor, James Dickson, afterwards his brother-in-law, going to London to seek employment as a gardener, was engaged by a nurseryman at Hammer-smith, to whose gardens Sir Joseph Banks was a frequent visitor. Dickson's superior intelligence attracted Sir Joseph's notice; and when some years afterwards he began business on his own account as a seedsman, and waited upon Sir Joseph, he was most kindly received by him, and offered the free use of his library. Dickson gladly availed himself of the advantages thus presented to him, and became afterwards a distinguished botanist, author of a work on cryptogamic plants, and of many valuable papers in the Linnæan transactions. He took Park with him on a botanical tour in the Highlands while he was a student; and when Park afterwards went to London, on the completion of his course, he introduced him to Sir Joseph Banks, through whose influence the situation of assistant surgeon in the Worcester East Indiaman was soon obtained. Park sailed in February, 1792, and returned the following year. He brought home some interesting plants, and contributed to the Linnæan Society a paper on eight new fishes from Sumatra. He now remained for some time inactive, enjoying intercourse with scientific men, to whom he was introduced by Sir Joseph Banks, then president of the Royal Society, whose warm friendship towards him knew no inter-

ruption during his entire career. Sir Joseph was an active member of the African Association, formed in 1778, for the exploration of the central portions of that continent; and Park's attention must, of course, have been much drawn to the subject. Having no ardor in the pursuit of his profession, and probably even no fondness for it, while he had long cherished a strong desire for foreign travel, it was natural that Park should offer himself to the Association when they were looking out for a successor to Major Houghton, who had perished in a late attempt to reach the Niger from the west coast. Park's knowledge of natural history and medicine, his age—the full vigor of youth—his previous experience of a hot climate, his enthusiasm, and a reputation for courage and address, founded, it would seem, rather upon an observation of his personal qualities and general bearing, than upon any thing which he had yet done, formed recommendations of so strong a nature that the Association accepted his offer. After due preparation he left England on the 22d May, 1795; and on the 5th July reached Pisanía, a British factory, 200 miles up the river Gambia, where he remained some time with Dr. Laidly, the resident agent. Beginning his journey on the 2d December, he first crossed the country E.N.E. to Yara, and then turning S.E. traversed the kingdoms of Leedamar and Bambarra, till he came in sight of the Niger near Sego: 'I saw with infinite pleasure the great object of my mission, the long sought for majestic Niger, glittering to the morning sun, as broad as the Thames at Westminster, and flowing slowly to the eastward. I hastened to the brink, and having drunk of the water, lifted up my fervent thanks in prayer to the great Ruler of all things, for having thus far crowned my endeavors with success. Thus, the first step was gained in the solution of a most difficult problem, deemed by his country of great importance, and which had already baffled the skill of numerous enterprising travellers, and the efforts of powerful states. Park was determined to work the problem fully out, by tracing the mysterious course of this great river. He found it impossible, however, to proceed farther down than Silla, near Jenné, and on the 30th July he began his homeward journey towards the Gambia. Following the Niger as far up as Bammakoo, and there turning to the right, he crossed the country watered by the streams of the Senegal, by a route more southerly than his former track, and at length reached Pisanía on the 10th June, 1797; having thus accomplished a journey whose hardship and suffering are, perhaps, without a parallel in the history of inland discovery. Soon after he returned home; and residing mostly at his native place occupied himself in preparing an account of his travels. In August, 1799, being then in his twenty-eighth year, he married the daughter of his former master, Mr. Anderson, and in October 1801, settled in the town of Peebles for the practice of his profession. During the few years which he spent here, he enjoyed much domestic happiness, and the privilege of associating with Sir Walter Scott, Dr. Adam Ferguson, the historian, and other persons of note. His mind was, however, kept in an unsettled state up to the end of 1804, by several proposals from government for new schemes of discovery. One for a new expedition to Central Africa was at length matured, and Park was requested to take the command. 'Park,' says his biographer, 'was so much afraid of encountering the distress of his family, that he proceeded directly to London from Edinburgh without returning to bid them a formal adieu.' Towards other friends he

practised the same constraint upon his feelings. He sailed from Portsmouth January 30th, 1805. Pisanía was again fixed on as the point of departure. His companions on his former journey were two negroes, and even these had accompanied him no farther than Yarra, so that for more than three-fourths of his journey he was quite alone. On the second journey he had stipulated for a good escort; and the presence of two friends, Mr. Anderson, his wife's brother, as surgeon, and Mr. Scott, a young neighbor, as artist. With these two friends, five artificers from the royal dock-yards, Lieutenant Martyn, thirty-five privates from the garrison at Goree, and Isaaco, a Mandingo, a priest and trader, as guide and interpreter, and forty asses with baggage, Park left Pisanía on the 4th of May, 1805. He chose the route by which he had returned on his first journey; but the time of starting was most unfortunate and illchosen,—less by any fault of his, than the delay of the government in despatching the ships from England. On the 8th June the rainy season set in, and the misfortunes of the expedition began. On the 19th August, Park reached the summit of the mountain ridge, dividing the river basins of the Senegal and Niger, and came once more in sight of the latter, 'rolling its immense stream along the plain,' and, on the evening of the same day, pitched his tent on the banks of the Niger at Bammakoo, where he had struck off from the river on his homeward route. Only seven men now remained: most of the rest had died of fever and dysentery by the way, among whom was Mr. Scott the artist; a few had been left sick in charge of friendly natives, but were not afterwards heard of. Nearly a month before, the last of the forty asses had died. The expedition now descended the river in two canoes to Sansanding, between Sego and Silla, where his brother-in-law, Mr. Anderson, and two of the men, fell victims to the dreadful climate. Lieutenant Martyn and three soldiers were all who now survived. With their aid, Park constructed a vessel, which was named the schooner Joliba, 40 feet long by 6 broad, and drawing, when loaded, only one foot water; and having engaged a guide and interpreter, named Amadi Fatouma, instead of Isaaco, who was sent back to the Gambia with his journal and letters, purchased three slaves, and laid in a stock of provisions, he set sail down the river on the 17th November, in the hope of tracing the remaining course of this famed stream, the lower part of which, according to the theory which he had formed, was identical with the Congo, or Zaire, entering the Atlantic in lat. 15° S. This, however, it was destined that the intrepid and enthusiastic traveller was not to accomplish. His despatches, forwarded by Isaaco, contained the last intelligence ever received from him, and for many years his fate was involved in mystery. It was at length distinctly made out by information gleaned from various quarters, that, about the beginning of June 1806, he had descended the river as far as Boussa, 650 miles below Timbuctoo; that here his interpreter, whose engagement now terminated, was sent on shore with a present for the king of Yaouri; that this was withheld by the Dooty, or chief, to whom it was given, and the king was told the white men had gone to return no more; that the king hereupon imprisoned the interpreter, and sent a band of armed men to intercept Park's passage at rocky narrows near Boussa; and that here, after a vain struggle against superior numbers, Park and all his companions, except one of the negroes, leaped into the river to attempt their escape by swimming, and were drowned. Fatouma was afterwards re-

leased, and met with this negro. Their narratives and Park's journal, with an introductory sketch of his life and labors, were published together in 1815. Government paid to his widow, according to stipulation before he left home, the sum of £4000. His family consisted of three sons and one daughter; the latter, married to H. W. Meredith, Esq., of Pentry-Bichen, Denbighshire, and his youngest son, Archibald, an officer in the East India Company's service, are still alive. All his brothers and sisters had families, many of whom are still living; and several of his relatives occupied stations of high respectability in Glasgow. In person, Mungo Park was tall and muscular, and possessed an extraordinary power of enduring fatigue; and by his many noble, mental, and moral qualities, was no less fitted for the right conduct of the important enterprises in which he was engaged. [J.B.]

PARK, THOMAS, a celebrated bibliographer, who, after having published many works, and been admitted a fellow of the society of antiquaries, withdrew his name from its roll, and retired to Hampstead; where he devoted his latter days to affairs of a purely local nature. He died in 1834, aged 75.

PARKE, JOHN, a celebrated musician, born in 1745, was the best hautboy player of his time, and succeeded Fischer at Vauxhall, in 1770. About the same time Garrick engaged him, on very liberal terms, to play at Drury Lane, and in 1783 he was attached to the Carlton House band at a yearly salary of £100. He was now in the highest reputation; he performed at the concert of ancient music, at the best private concerts, and was also regularly engaged at the great provincial music meetings. Died 1829.

PARKER, GEORGE, earl of Macclesfield, son of the first earl, who was lord chancellor of England, distinguished as a mathematician, died 1766.

PARKER, HENRY, Lord Morley, one of the barons who threatened Clement VII. with the loss of his supremacy if he refused his consent to the divorce of Henry VIII. He bears the reputation of a man of letters, and some of his works exist in MS., 1476-1556.

PARKER, ISAAC, a chief justice of the supreme court of Massachusetts, 1768-1830.

PARKER, MATTHEW, the second protestant archbishop of Canterbury, was born at Norwich 1504, and was early distinguished by his progress in every branch of knowledge connected with the study of divinity. In 1533 he became chaplain to Queen Anne Boleyn, and was charged by her with the care of her daughter Elizabeth. He remained in concealment during the reign of Mary, though search was several times made for him, and was elevated to the primacy on the accession of Elizabeth. He was among the first selected to prepare the Reformed Liturgy; and the 'Bishops' Bible,' which remained in use till the present translation was effected, was printed under his inspection. Archbishop Parker was also a great antiquarian, and had some share, either as patron or editor, in the work 'De Antiquitate Britannicæ ecclesiæ,' besides being the founder of the first Society of Antiquaries. He died 1575.

PARKER, RICHARD, an English sailor, notorious as the ringleader of the mutineers on board Admiral Bridport's squadron, lying at the Nore, in 1797. He was born at Exeter, about 1760, received a decent education, and entered into the navy. Being on board the fleet at the Nore at the time of the mutiny, he took a very active part in it, was made principal of the delegates, and so far acquired the

confidence of the men by his boldness and talent, that they appointed him admiral of the fleet. He ruled with great authority for some time; but the revolt having at length been suppressed, through the prudent management and firmness of Lord Howe, Parker was tried at Sheerness, condemned, and hanged on board the Sandwich, to which ship he had belonged, June 30, 1797.

PARKER, ROBERT, a puritan writer on theological subjects, known from 1583 to 1607. His son, THOMAS, a theological and religious writer, took refuge in America 1634, died there 1677.

PARKER, SAMUEL, bishop of Oxford in the reign of James II., was born at Northampton, in 1640. He was educated at Wadham College, Oxford, from whence he removed to Trinity College. In 1665 he became a fellow of the Royal Society, and published a work in Latin entitled 'Tentamina Physico-Theologica de Deo;' for which Archbishop Sheldon made him one of his chaplains, and gave him the archdeaconry of Canterbury. He also obtained a prebend in that church, and other preferments; in return for which he displayed his zeal by writing against the Nonconformists, in a 'Discourse of Ecclesiastical Polity.' At the commencement of the next reign he was made bishop of Oxford, and constituted by mandamus president of Magdalen College, Oxford. He wrote many works, among others a 'Demonstration of the Divine Authority of the Law of Nature and the Christian Religion;' but though he was a prelate of considerable learning, he was contemptible from his versatility and time-serving disposition. Died 1687.

PARKER, SAMUEL, Episcopal bishop of Massachusetts, 1745-1804.

PARKES, SAMUEL, an ingenious and scientific chemist, was born in 1759, at Stourbridge, in Worcestershire; and was educated at Market Harborough, under Dr. Addington. He was an eminent experimental chemist, belonged to several literary and philosophical institutions, and was the author of some very useful works, viz: a 'Chemical Catechism,' 'Rudiments of Chemistry,' an 'Essay on the Utility of Chemistry in the Arts and Manufactures,' and 'Chemical Essays.' He died in 1825.

PARKHURST, JOHN, bishop of Norwich in the reign of Elizabeth, and previously the teacher of Bishop Jewel, at Merton College. He was a prelate of eminent learning and piety, 1511-1574.

PARKHURST, JOHN, author of the well-known Hebrew and Greek lexicons, was born in Northamptonshire 1728, and educated at Clare Hall, Cambridge. He entered into orders, but held no preferments in the church, and, possessing considerable property, devoted himself to literary pursuits. He was a man of high principle, and a receiver of the philosophy of John Hutchinson. Died at Epsom, 1797.

PARKINS, J., a writer on law, 16th century.

PARKINSON, J., a writer on botany, d. 1567.

PARKINSON, THOMAS, an eminent mathematician, was born at Kirkham, in Lancashire, in 1745, and educated at Christ's College, Cambridge. He became rector of Kegworth, archdeacon of Leicester, chancellor of Chester, and a prebendary of St. Paul's, London. In 1789 he published 'A System of Mechanics and Hydrostatics,' a work of great value; and, while at college, he was employed by the board of longitude in the laborious calculation of tables of the series of parallax and refraction. Died 1830.

PARMA, ALEXANDER FARNESE, duke of, a famous general who won an early renown at the battle of Lepanto. Died 1592.

PARMA, FERDINAND CHARLES JOSEPH NIANA VITTORIO BALTHASAR DE BOURBON, duke of, a worthless prince, was born 1823, succeeded to the duchies of Parma, Piacenza and the states annexed, in 1849, on the abdication of his father. His rule was arbitrary and unprincipled. He extorted the money of his subjects without shame, and spent it recklessly. He acted the tyrant, and died as he deserved, by the indignant hand of one of his subjects, on the 26th March, 1854. On his death his favorite and prime minister, a Yorkshire jockey yclept Baron Ward, was forced to fly, and his widow, the daughter of the Duc de Bern, assumed the government.

PARMENIDES, of Elea, in Magna Græcia, born about 536 B.C.; one of the chief of the Eleatic school. That great search concerning the substance of things occupied Parmenides; but instead of finding Unity in Nature, he discerned it in Mind alone. It is the Reason which conceives and bestows Unity on Plurality; so that true Reality is subjective. The scheme of Parmenides is a pure Idealism, and open to all the objections to which one-sided schemes are liable. He exercised, however, much influence on the speculations of Plato.

PARMENIO, a Macedonian general, died B.C. 329.

PARMENTIER, ANTHONY A., a famous French agricultural writer and philanthropist, 1737-1813.

PARMENTIER, J., a Fr. painter, 1658-1730.

PARMENTIER, J., a French navigator, known also as a versifier and translator, 16th century.

PARMIZIANO. See MAZZUOLI.

PARNELL, THOMAS, born at Dublin in 1679, took orders, and became archdeacon of Clogher. He received, also, other preferments through the interest of Swift, when he deserted the Whig party on their fall in the latter part of the reign of Queen Anne. He was a contributor to the Spectator and Guardian, and, after flying to London from his Irish parsonage, became intimate with the leading men of letters. His poetry comes nearer to Pope's, in sweetness of versification, than do any other verses of the time: and he has not only much felicity of diction, but also a very pleasing seriousness of sentiment, shown in such pieces as his popular allegory 'The Hermit.' His death, which occurred in 1718, is said to have been hastened by intemperate habits, and these have been attributed to the grief he felt for the loss of his wife. [W.S.]

PARNY, EVARESTE, D. D., VICOMTE DE, a French elegiac poet, b. on the island of Bourbon, 1753, d. 1814.

PARODI, FILIPPO, a Genoese sculptor, born about 1640, died 1708. DOMENICO, his son, an historical painter, 1668-1740. BATTISTE, brother of Domenico, 1674-1730. PELLEGRINO, son of Domenico, a portrait painter, died after 1741.

PAROLETTI, VICTOR MODESTE, an Italian physician, dist. as a philos. and naturalist, 1765-1834.

PARR. See CATHARINE PARR.

PARR, RICHARD, an Irish divine, au. of Sermons, and a 'Life of Archbishop Usher,' 1617-1691.

PARR, SAMUEL, a learned divine and a profound scholar, was born in 1746, at Harrow-on-the-Hill, Middlesex, and was educated at the grammar school of that place, and at Emanuel College, Cambridge. He accepted the situation of usher at Harrow, under Dr. Sumner; at whose death he offered himself as a candidate for the mastership, but without success. He first opened an academy at Stanmore, which commenced under very promising appearances; but which, ultimately failing, he gave up in 1776, and then became master of the grammar school at Col-

chester; whence, in 1778, he removed to that of Norwich. In 1783 he obtained the perpetual curacy of Hatton, in Warwickshire, and a prebend in St. Paul's cathedral. In 1790 he exchanged Hatton for the rectory of Wadenhoe, in Northamptonshire, though he still continued to live at the former place, to which he was much attached, and the parish church of which he greatly ornamented. In 1802, Sir Francis Burdett gave him the rectory of Graffham, in the county of Huntingdon, and this completed the course of his church preferment. As an elegant classical scholar Dr. Parr stood pre-eminent among his cotemporaries; his prodigious memory and extent of research rendered him astonishingly powerful in conversation; and it is to be regretted that the greater part of his labors as an author had reference to topics which were of a temporary nature, and therefore, though written with vigor, are fast sinking into oblivion. He died in 1825.

PARR, THOMAS, noticed here as an extraordinary instance of longevity, was a native of Shropshire. He was born in 1483, and labored in husbandry till after he was one hundred and thirty years old. He died in 1635, when nearly one hundred and fifty-three years of age; and even then Dr. Harvey, who, opened his body, found no internal signs of decay. His grandson died at the age of one hundred and twenty.

PARR, W., a partisan of Mary Stuart, ex. 1584.

PARRENNIN, D., a Fr. missionary, 1665-1741.

PARRHASIUS, a painter of antiquity, who was a native of Ephesus, though others say he was an Athenian, where he flourished in the time of Socrates, and was the rival of Zeuxis. He was so excessively vain as to wear a crown of gold, and to carry a staff studded with gold nails, to indicate that he was the prince of painters.

PARRHASIUS, AULUS JAMES, an Italian grammarian and classical editor, 1470-1534.

PARROCEL, BARTHOLOMEW, a French painter, died 1660. His son, JOSEPH, a great painter of battles, 1648-1704. CHARLES, son and pupil of Joseph, 1688-1752. IGNATIUS, nephew and pupil of Joseph, died 1722. PIERRE, younger brother of the latter, also a pupil of his uncle Joseph, about 1720-1765. IGNATIUS, son of Pierre, and last painter of the family, died about 1774.

PARRY, CALEB HILLIER, M.D., F.R.S., a physician and naturalist, was born in 1756, and after graduating in the university of Edinburgh, settled for some time at Norwich, and there married a sister of Dr. Rigby. From thence he removed to Bath, and resided there above forty years, with great reputation, as one of the physicians of the hospital. He was the author of a 'Treatise on Angina Pectoris,' another upon 'Wool,' and a work on 'Hydrophobia,' but his greatest performance is entitled 'The Elements of Pathology,' published in 1816. He died in 1822, leaving two sons; the eldest, a physician at Bath, and the other, Sir Edward Parry, the distinguished commander of the Arctic expedition.

PARRY, R., bishop of St. Asaph, died 1620.

PARRY, R., a divine and theologian, 1722-1780.

PARRY, W., an English painter, 1742-1791.

PARRY, SIR WILLIAM EDWARD. In the year 1803, William Edward Parry, son of Dr. Parry, of Bath, England, entered the naval service of his country as midshipman, in which capacity, as well as that of lieutenant, which rank he attained in 1810, he served several years on the coast of North America. During this period he drew up a little treatise on nautical astronomy, containing directions for finding the principal fixed stars visible in

the Northern hemisphere. Through the influence of the late Sir John Barrow, then Secretary of the Admiralty, he was appointed, early in 1818, to the *Alexander*, as lieutenant commanding under Commander John Ross, in the *Isabella*, for 'the discovery of a passage through Davis's Straits, along the northern coast of America.' The expedition sailed in April, 1818, and returned late in the fall, having accomplished nothing beyond a verification of the wonderful accuracy of the old navigator, William Baffin, in his descriptions of that mighty bay which bears his name, and the discovery by Commander Ross that Lancaster Sound was merely a deep bay or indentation of the coast. In January, 1819, Lieut. Parry was appointed to the command of the *Hecla*, bomb vessel, 'for the discovery of a north-west passage from the Atlantic to the Pacific,' and in May sailed, with the brig *Griper*, Lieutenant Liddon, under his orders. It was on this voyage that Parry sailed up Lancaster's Sound to Melville island, beyond which no ship has since penetrated, where he wintered, and, after a weary imprisonment of over ten months on that dreary shore, arrived in England on the 3d November, 1820. On the 8th May, 1821, Commander Parry, in the *Fury*, bomb, having under his orders the *Hecla*, Commander George Francis Lyon, sailed on his third voyage of Arctic exploration. His orders on this occasion were to proceed 'towards or into Hudson's Strait, thence to penetrate to the westward through that strait until he should reach, either in Repulse Bay or on some part of the shore of Hudson's Bay, to the north of Wager river, some portion of the coast which he should feel convinced to be a portion of the continent of North America.' Failing in this, he should proceed to the northward, seeking a practicable passage to the westward, connecting the Atlantic and Pacific oceans, &c. Two dreary winters were passed among the howling tempests and terrific dangers of this horrible region, and on 18th October, 1823, Parry once more returned to England. His next voyage was as post captain in the *Hecla*, having the *Fury*, Commander H. P. Hoppner, as his second. They sailed on the 10th May, 1824, to explore Regent's Inlet, with a view to finding a passage between the oceans. The voyage resulted in the loss of the *Fury*, which occurred on the 2nd August, 1825, on the western shore of Regent's Inlet, now called North Somerset. The *Hecla* arrived safe, with the *Fury*'s crew, in England, on the 12th October, 1825. On the 4th April, 1827, Captain Parry sailed in the *Hecla* for Spitzbergen, where he left his ship and endeavored to reach the North Pole in sledge boats over the ice, but after an absence of sixty-one days from the ship, they got on board again, having succeeded only in reaching the latitude of 82 deg. 45 min. north, owing to the rough and difficult travelling over the ice, and a strong southerly current. Arriving in England the 29th September, 1827, this voyage terminated Captain Parry's services afloat. Since then, however, he received the honor of knighthood, and filled various Admiralty appointments, gradually advancing in the naval service until he attained the rank of Rear Admiral. He died in 1855.

PARSIN, J., a Dutch engraver, 16th century.

PARSONS, A., an English traveller, died 1785.

PARSONS, JAMES, an eminent English physician and medical writer, was born at Barnstable, in Devonshire, in 1705. Physic, anatomy, natural history, antiquities, &c., are indebted to his skill and industry for many important discoveries. His most remarkable production is his 'Remains of

Japhet,' being historical inquiries into the affinities and origin of the European languages. Died, 1770.

PARSONS, JOHN, an anatomist, 1742-1785.

PARSONS, PHILIP, a minister of the Church of England, known as a miscellaneous wr., 1729-1812.

PARSONS, ROBERT, whose name is sometimes written PERSONS, an English Jesuit, famous for his intermeddling in affairs of state, 1547-1610.

PARSONS, THEOPHILUS, a chief justice of the supreme court of Massachusetts, an eminent lawyer, 1750-1813.

PARUTA, PAUL, a Venetian diplomatist, and historiographer to the state, 1540-1598.

PARUTA, PHILIP, an antiquarian, died 1629.

PAS, ANTHONY DE, marquis de Feuquieres, one of the greatest generals of his age. He was so severe a disciplinarian, that it was usually said, 'He must be the bravest man living, since he slept every night in the midst of 100,000 enemies.' He died in 1711.

PAS, or PAAS, CRISPIN DE, a Dutch designer and engraver, born about 1536, had three sons in the same profession:—CRISPIN, the eldest, born 1570; WILLIAM, the *second*, dates unknown; SIMON, the *third*, a portrait engraver, born 1574. His daughter, MADELEINE, also distinguished herself in the art, born 1576.

PASCAL, the *first* of the name pope, 817-824. The *second*, 1099-1113. The *third*, an antipope, elected in opposition to Alexander III., and supported by the emperor Frederick, 1164-1168. Another antipope, of the name, headed a faction some time in 687.

PASCAL, BLAISE, was a native of Clermont in Auvergne, where he was born 19th June, 1623. His ancestors had, for several generations, held high offices in the French government, and his father was a provincial judge in his native county. Even in boyhood, the extraordinary power and acuteness of Blaise Pascal displayed itself. His father, who was an eminent mathematician, undertook the sole management of his son's education, and for that purpose removed to Paris. The bias of young Pascal's mind being strongly inclined towards mathematical science, the prudent father, afraid lest the favorite subject might engross his mind to the neglect of other necessary branches, took care to give him little or no access to his library. He confined his son's attention, as much as possible, to the study of languages. But nature could not be repressed, and the daily pastime of the boy was to draw mathematical diagrams, with charcoal, on the floor. In this stolen enjoyment, his father surprised him, and the figure that was then absorbing his thoughts was the 32d proposition of Euclid; showing that he had already mastered all the previous elements that enter into that demonstration. His father thenceforth set him to the regular study of Euclid; and so great was his proficiency in the science, that, before completing his sixteenth year, he had composed a treatise on conic sections, invented an arithmetical machine, for which, in 1649, he obtained a patent; and at the age of twenty-three had finished those important experiments, in pneumatics and hydrostatics, which have so honorably connected his name with the progress of natural philosophy, and raised him to the same rank with Toricelli and Boyle. A serious illness, brought on by intense application to study, obliged him, for a long time, to suspend his favorite pursuits, and on his recovery, circumstances occurred that powerfully diverted his thoughts into a different channel. During his protracted sickness, he had received deep impressions of religion, so that

[House in which Pascal died.]

under an overwhelming sense of its importance, he resolved to renounce all the scientific and secular pursuits, to which his taste and genius so strongly directed him, and to apply his mind exclusively to the study of theology, and the means by which he might promote the best interests of his fellow-men. Through the loopholes of his pious retreat, however, he took an occasional glance at what was passing in the world, and on the outbreak of the fierce contests that were waged between the Jansenists and the Jesuits, Pascal showed himself a keen and powerful advocate of the former. It was in connection with the controversy respecting Arnauld, that he wrote his famous 'Letters of a Provincial to one of his Friends,' which first appeared in the year 1656, under the fictitious authorship of Louis de Montalte. They contain a most withering exposure of the false morality of the Jesuits, and the sentiments are expressed in a style of elegance, accompanied with the most sparkling wit and bitter sarcasms, which, although enlisted in a foreign and bygone controversy, have secured to the work a lasting fame. Pascal meditated a work of high importance, viz., an inquiry into the character and evidences of Christianity, and in the hands of so original, profound, and independent a thinker, there was reason to expect a production which would interest and instruct the whole Christian world. But his *Penseés*, or 'Thoughts on Religion,' a posthumous volume of loose and desultory fragments, which were meant to be woven into a regular composition, is all that was accomplished of this grand design, for he was arrested in the midst of his work by death in 1662, which happened so suddenly and in such suspicious circumstances, as gave some color to the charge of his being carried off by poison.

[R.J.]

PASCH, G., a German philologist, 1661-1707.

PASCH, J., a professor of philosophy, d. 1709.

PASCH, JEAN, a Swedish landscape and marine painter, 1706-1769. LAURENCE, of the same family name, is known as a portrait painter, and his daughter, ULRICA FREDERICA, was a member of the Academy of Painting and Sculpture, 1735-96.

PASCHAL. See PASCAL.

PASCHAL, CHARLES, an eminent writer on ethics, antiquities, and jurisprudence, in the 17th century, was a native of France. He was the author of an elaborate work, in 10 books, entitled 'De Corona,' and another, called 'Virtutum et Vitiourum Characteres.' Died 1625.

PASCHAL, F., a Fr. dramatist, 17th century.

PASCHIUS, G., a Ger. philologist, 1661-1707.

PASCO, JOHN, an English admiral, who was flag lieutenant on board the Victory in the battle of Trafalgar. Lord Nelson gave the order, 'England *confides* that every man will do his duty,' to Lieut. Pasco, who suggested the alteration 'England *expects*,' &c., and thus the famous signal which thrilled through every English heart on the day of victory, and has become a household word. Died 1853, aged 79.

PASCOLI, A., an Ital. anatomist, 1669-1757.

PASCOLI, L., an Ital. art-writer, 1674-1744.

PASINELLI, L. an Ital. painter, 1629-1700.

PASQUALIS. See MARTINEZ.

PASQUIER, STEPHEN, an eminent French civil-ian, born at Paris, in 1529, who first rose into reputation, as an advocate, by pleading against the Jesuits before the Parliament. In his writings also he proved himself a formidable adversary of that dangerous and encroaching order. Died, 1615.

PASS, PASSE, or PAAS. See PAS.

PASSAROTTI, BARTALOMEIO, an Italian painter and engraver, died 1592. He had two sons, also distinguished in art:—TIBURZIO, died 1612; and AURELIO, who died between 1592 and 1605.

PASSEMANT, CLAUDE SIMEON, a mathematician, was born in Paris in 1702. He published an account of a large reflecting telescope made by him in 1738. He also constructed an astronomical pendulum surmounted on a celestial sphere, which he presented to Louis XV. Died 1769.

PASSERAT, J., a French poet, 1534-1602.

PASSERI, GIAMBATTISTA, an Italian antiquarian and naturalist, 1694-1780.

PASSERI, GIAMBATTISTA, an Italian painter and poet, 1610-1679. His nephew, GIUSEPPE, also a painter, 1654-1714.

PASSEROTTI. See PASSAROTTI.

PASSIGNANO, DOMINICO CRESTI DA, a disting. painter of the Florentine school, 1568-1638.

PASSIONEI, DOMINIC, a cardinal, was born at Fossombrone, in the duchy of Urbino, in 1682; and studied in the Clementine College at Rome. In 1706 he went with Gualterio, the nuncio, to Paris; and in 1708, he became a secret agent for the pope in Holland. He was also employed on several other missions, particularly in Switzerland, of which he published an account, entitled 'Acta Legationis Helveticae,' folio. Innocent XIII. made him archbishop of Ephesus. Clement XII. raised him to the purple, and Benedict XIV. appointed him librarian of the Vatican, in which situation he promoted Dr. Kennicott's great undertaking, by causing the Hebrew manuscripts to be collated for his use. D. 1761.

PASSWAN-OGLOU, OSMAN, a pacha of Widdin, in Bulgaria, who revolted against the porte, after his father had been put to death; and, after a long struggle, compelled the sultan to confirm him in the government. He was afterwards faithful to the Turks in a war with the Russians, 1758-1807.

PASTEUR, J. D., a Dut. naturalist, 1763-1804.

PASTORIUS, J., a Ger. historian, 1610-1681.

PATARASI, L., an Ital. naturalist, 1674-1727.

PATEL, PETER, a French landscape painter, killed in a duel, 1654-1703. His son, of the same names, painted several emblematic subjects; dates unknown.

PATER, PAUL, a Hungarian *savant*, 1656-1724.

PATERCULUS, CAIUS VELLEIUS, an ancient historian, was born in the year of Rome 735; served under Tiberius in Germany, as commander of the cavalry; and, in the first year of that emperor's

reign, was nominated prætor. He died in his 50th year, leaving an abridgment of Roman history in 10 books, of which the greater part is lost.

PATERSON, C. W., a Brit. admiral, 1756-1841.

PATERSON, SAMUEL, a bibliographer, was born in London, in 1728. He became an orphan at the age of 12 years, and was sent, by a dishonest guardian, to France, where he acquired such a knowledge of books as induced him to open a shop in the Strand, but without success. He next turned auctioneer; and, in 1757, sold the manuscript collections of Sir Julius Cæsar, which circumstance brought his talents into notice, and he was employed in the formation of catalogues and the sale of libraries. His principal performance in this line is the 'Bibliotheca Universalis Selecta.' He also wrote 'Cursory Remarks on a Journey through the Netherlands, by Coriat, Junior,' 3 vols. Died 1802.

PATICHI, A., an Italian painter, 1762-1788.

PATIN, GUY, a French physician, distinguished in the disputes which divided the profession concerning chemical remedies, as the determined enemy of antimonial and similar preparations, 1601-1672. His letters, which have been published since his death, are curious and interesting. CHARLES, his second son, distinguished as a physician and numismatist, 1633-1693. The wife of the latter, and their two daughters, CHARLOTTE and GABRIELLE, were women of remarkable learning, and have left some writings.

PATISSON, M., a Fr. Hellenist, died abt. 1600.

PATKUL, JOHN REGINALD DE, a gentleman of Poland, who distinguished himself by his endeavors to shake off the Swedish yoke in the reigns of Charles XI. and Charles XII. He was treacherously given up to the latter by Augustus, and broken on the wheel 1707.

PATON, R., an English painter, last century.

PATOUILLET, L., a Fr. Jesuit and controversialist, au. of 'Apology for Cartouche,' 1699-1779.

PATRAT, J., a French playwright, 1732-1801.

PATRICK, A., a Polish prelate, 16th century.

PATRICK, PETER, one of Justinian's ambassadors, and finally master of the palace, was a native of Thessalonica. Very little is known concerning his history; and of his work, 'The History of Ambassadors,' written in Greek, only some fragments remain.

PATRICK, Sr., the apostle or patron saint of Ireland, is supposed by some to have been a native of Cornwall, whose zeal prompted him to cross the Channel for the conversion of the pagan Irish. By others, however, he is said to have been a native of Kirkpatrick, on the Clyde; and that his name was Saccuthus, until changed by pope Celestine. Others again assert, that he was born in Brittany, and carried by some freebooters to Ireland, where he was at first employed in keeping sheep. Be this as it may, it is allowed by all that his endeavors were crowned with great success, and that he established there a number of schools and monasteries. Nennius states that his missions continued 40 years, and various miracles are attributed to him, particularly the often-repeated assertion of the absence of all venomous creatures from Ireland, ascribed by the superstitious to his holy benediction. We can no more reconcile the conflicting testimonies relative to the place of his birth, than we could determine the validity of his miraculous powers; and perhaps, for the sake of truth, the least that is said of either the better. It would seem that the latter years of his life were devoted to acts of piety and religious meditation; and that he died, at an ad-

vanced age, about the year 493. His works, or at least those ascribed to him, were published, with remarks, by Sir James Ware, in 1658.

PATRICK, SAMUEL, a divine and classical critic, editor of an edition of Hederick's Greek Lexicon, died 1748.

PATRICK, SIMON, a learned prelate, born at Gainsborough 1626, died bishop of Ely 1707. His works are—'Heart's Ease, or a Remedy against all Troubles,' 'Jewish Hypocrisy,' 'A Convert to the Present Generation,' 'Parable of the Pilgrim,' 'Exposition of the Commandments,' a 'Debate between a Conformist and Nonconformist,' 'Treatise on the Holy Communion,' 'The Devout Christian,' 'Jesus and the Resurrection Justified by Witnesses in Heaven and Earth,' 'A History of the Church of Peterborough' (of which he was dean), various paraphrases and commentaries on the Prophets, and a number of occasional sermons. When rector of St. Paul's, Covent Garden, he greatly endeared himself to his parishioners by remaining with them during the whole time of the plague in 1665.

PATRIN, EUGENE LOUIS MELCHIOR, a celebrated French geologist, was born at Lyons, in 1742. After ten years' travelling through the north of Europe, for the purpose of forming a collection of mineral specimens, he revisited France, and was chosen a member of the National Convention for his native city. Having voted for the banishment of Louis XVI., he was proscribed, and obliged to conceal himself during the reign of terror. On the creation of the School of Mines, he presented his museum of minerals to that institution, of which he was made librarian. His principal work, 'Histoire Naturelle des Minéraux,' in 5 vols., forms a sequel to the works of Buffon. Died 1815.

PATRIX, P., a French poet, 1585–1672.

PATRIZI, A., an Italian historian, died 1496.

PATRIZI, F., an Italian Platonist, 1529–1597.

PATTE, P., a French architect, 1723–1814.

PATTEN, T., an English theologian, 1754–90.

PATTISON, GRANVILLE SHARP, a professor of anatomy in London University, and subsequently in Philadelphia and New York, born in Scotland, and died in New York 1857, aged 59.

PATTERSON, ROBERT, President of the American Philosophical Society, and director of the United States Mint, was born in Ireland in 1743. Died 1824.

PATTERSON, WILLIAM, Governor of New Jersey in 1790, Judge of the Supreme Court of the United States, and member of the convention in 1787 which framed the federal constitution, died 1806.

PATTISON, JAMES, well known as member of parliament for London, and governor of the Bank of England, was born 1786. He was the representative of an old commercial family. His parliamentary career began in 1835. In 1841 he was unsuccessful, but was returned on the death of Sir W. Wood in 1843, and again at the general election in 1847. Died 1849.

PATTISON, WILLIAM, a native of Sussex, who distinguished himself as a poet, and died in his twenty-first year, after a miserable life, 1706–1727.

PATUZZI, J. V., an Ital. theologian, 1700–69.

PAUCTON, M. J. P., a Fr. mathematic., 1736–98.

PAUDITZ, C., a German painter, 17th century.

PAUL, or SAUL, (Acts xiii. 9,) was a native of Tarsus, in Cilicia, and inherited the privileges of a Roman citizen. (Acts xxii. 28, 29.) His descent and education were wholly Jewish, and the latter was of the highest order. Under the instruction of Gamaliel, a distinguished Jewish rabbi at Jerusalem, (Acts v. 34,) he became master of the Jewish law.

(Acts xxii. 3; Gal. i. 14.) He had been also taught a useful mechanical trade, according to the custom of the nation, for the Talmud says, he that does not train his son to some secular occupation is as bad as if he taught him to steal. The handicraft to which Saul was trained was that of a 'tent-maker.' Tent-making is a common and popular branch of business in the East, where these light and portable edifices are in so great and constant requisition. Cilicia, Saul's native province, was famed for a certain species of goat's hair, which was woven into hair-

[Paul preaching at Athens.]

cloth. This form of industry may have been Saul's early employment, and as such tent-cloth was largely used in the army, this manufacture may have suggested to the apostle's mind the many military figures and illusions which are scattered through his writings. (Acts xviii. 3.) His residence at Jerusalem commenced at an early period, (Acts xxvi. 4,) and he was probably from twenty-two to twenty-five years old when Christ commenced his public ministry. He belonged to the sect of the Pharisees, as did also his father. (Acts xxiii. 6.) The preaching of the gospel by the apostles, and especially the fact of Christ's resurrection from the dead, on which they placed their chief stress, excited, of course, a violent opposition among the Jews, which, before long, broke out in open violence. Stephen, an eloquent and powerful advocate of the new religion, was seized and stoned to death. Among the spectators, and perhaps promoters, of this bloody deed, was Paul; who, we may suppose, from the manner in which he was regarded by the murderers, and, indeed, from his own confession, was fully with them in the act. (Acts vii. 58. Comp. xxii. 20.) His temperament, talents, and education fitted him to become a leader in the persecution of the apostles and their adherents; and he commenced his career with a degree of zeal bordering on madness. He 'breathed out threatenings and slaughter.' His whole spirit was excited against the new religion, and he even sought for authority to go to Damascus, whither many of the disciples had fled after the murder of Stephen, and bind and drag to Jerusalem, without distinction of age or sex, all the followers of Christ whom he could find. Just before he reached Damascus, however, he was arrested by a miraculous light, so intense as to deprive him of vision. He fell to the earth in helpless prostration and terror. (Acts xxii. 11.) At the same time Christ revealed himself as the real object of his persecution. (Acts xxvi. 15. Comp. 1 Cor. xv. 8.) Paul on being con-

verted did not wait very long in Damascus; and we are not to infer from the narrative of Luke that immediately on leaving Damascus he went to Jerusalem. The time which he spent in Arabia may be estimated at from one year and a-half to two years; for immediately after his conversion, he must have spent at least some months at Damascus, before, as an apostle, he gave himself to his missionary journeyings,—and such was his journey into Arabia. When now he had returned to Damascus, he commenced making known, unreservedly and energetically, the gospel of Christ in the synagogues of the Jews, in the same manner that he did in his first abode in that city. The following chronological arrangement will enable the reader to connect the principal events in the life of Paul:—

	A.D.
Paul's conversion. (Acts ix.) 21st year of Tiberius,....	36
He goes into Arabia, and returns to Damascus; (Gal. 1. 17;) at the end of three years in all, he escapes from Damascus and goes to Jerusalem, (Acts ix. 23, &c.)....	39
From Jerusalem Paul goes to Cilicia and Syria. (Acts ix. 30; Gal. i. 21.) From Antioch he is sent with Barnabas to Jerusalem to carry alms, (Acts xi. 30.).....	45
The first missionary journey of Paul and Barnabas from Antioch, continued about two years, (Acts xiii., xiv.) commencing,.....	45
After spending several years in Antioch, (Acts xiv. 28.) Paul and Barnabas are sent a second time to Jerusalem, to consult the apostles respecting circumcision, &c., (Acts xv. 2.).....	52
The Jews expelled from Rome, A.D. 52-54; Paul, on his second missionary journey, (Acts xv. 40,) after passing through Asia Minor to Europe, finds Aquila and Priscilla at Corinth, (Acts xviii. 2.).....	54
Paul remains eighteen months in Corinth. (Acts xviii. 11.) After being brought before Gallio, he departs for Jerusalem the fourth time, and then goes to Antioch, (Acts xviii. 22.).....	56
The apostle winters at Nicopolis, (Tit. iii. 12,) and then goes to Ephesus, (Acts xix. 1.).....	57
After a residence of two years or more at Ephesus, Paul departs for Macedonia, (Acts xx. 1.).....	59
After wintering in Achaia, Paul goes the fifth time to Jerusalem, where he is imprisoned, (Acts xxi.; xxiii.)....	60
The apostle remains two years in prison at Cesarea, and is then sent to Rome, where he arrives in the spring, after wintering in Malta, (Acts xxiv. 27; xxv., xxviii.)	63
The history in Acts concludes, and Paul is supposed by some to have been set at liberty,.....	65
Probable martyrdom,.....	66

[J.E.]

PAUL, the name of two saints besides the apostle, the earlier a hermit of the Thebaid, about 229-341. The later, a patriarch of Constantinople, elected 340, put to death 350 or 351.

PAUL, the *first* of the name, pope, reigned 757-767. The *second*, 1644-1471. The *third*, of the Farnese family, succeeded Clement VII., 1534, excommunicated Henry VIII. 1535, concluded a league with the Venetians and Charles V. against the Turks 1538, concurred in the foundation of the Jesuits 1540, convoked the council of Trent 1542, died 1549. The *fourth*, reigned 1555-1559. The *fifth*, of the Borghese family, succeeded Leo XI. 1605, sustained a quarrel with Venice, which was terminated by Henry IV. 1605-1607, died 1621.

PAUL I., emperor of Russia, son of Catharine the Great and Peter III., was born 1754, and succeeded on the death of his mother 1796. He was assassinated 1800, and succeeded by his son, Alexander.

PAUL, an exarch of Ravenna, killed 728.

PAUL OF BURGOS. See PAUL OF S. MARIA.

PAUL THE DEACON, or PAULUS DIACONUS, was a native of Friuli, and a monk in the abbey of Monte Cassino, where he wrote a 'History of the Lombards.' Died 743.

PAUL-DE-LA-CROIX, an Italian founder of a religious congregation, 1720, died 1775.

PAUL OF SAMOSATA, bishop of that place, on the

Euphrates, and patriarch of Antioch, flourished from 260 to 273. He was deposed for heresy 270, but could not be expelled from his dignities till after the fall of Zenobia. The sect of *Paulians* or *Paulianists*, was named after him, and condemned by the council of Nice. Their doctrines were a form of Socinianism.

PAUL OF SANCTA MARIA, a converted Jew, born at Burgos in 1353, died a dignitary of the church 1435. His three sons, ALPHONSO, GONSALVO, and ALOARES, also rose in the church, the elder of them becoming bishop of Burgos. He is the author of an abridgment of Spanish history.

PAUL THE SILENTIARY, a Christian poet, chief of the officers who had charge of Justinian's palace.

PAUL, ST. VINCENT DE, an ecclesiastic of the Church of Rome, was born in 1576. In a voyage which he made from Marseilles, his ship was taken by the Turks, and he remained in slavery some years; but having made a convert of his master, he obtained his liberty, and returned to France. Louis XIII. made him abbot of St. Leonard de Chalme, and he also had the living of Clichy, where he built a church at his own expense. He was next placed at the head of the council of conscience, and chief of the house of St. Lazare, in which situations his zeal and charity knew no bounds. He projected missions into all parts of the world, and instituted a number of benevolent establishments. He died in 1660, and was afterwards canonized.

PAUL, A. L., a French ecclesiastic, 1740-1809.

PAULA, a sainted lady of Rome, died 404.

PAULDING, JOHN, was with Van Wart and Williams a captor of Major André, died 1818.

PAULET, J. J., a Fr. medical wr., 1740-1805.

PAULET, W., an English courtier, 1475-1572.

PAULI. See PAULLI.

PAULIANS, ALME HENRI, a learned Fr. Jesuit, author of several philosophical works, 1722-1802.

PAULIN-DE-SAINT-BARTHELEMY, the name by which JOHN PHILIP WERDIN, an Austrian Carmelite and missionary, is generally known. The principal scene of his labors was in the East Indies, and he has left some valuable Oriental works, 1748-1806.

PAULINUS, the name of three saints:—1. A bishop of Treves, elected 349, deposed 353, died in exile 359. 2. A famous ecclesiastical writer, born in Gaul 353, died bishop of Nola 431. 3. A patriarch of Aquileia, 726-804.

PAULLI, SIMON, a Danish physician and naturalist, 1603-1680. His son, of the same name, settled at Strasburg as painter 1661, author of miscellaneous publications, 1664. Another son, JAMES HENRY, was professor of anatomy and of history at Copenhagen, and was employed in affairs of state by Christian V. A third son, OLIGER, born at Copenhagen 1644, became secretary to the India Company, and acquired a large fortune by commerce. He then suddenly announced himself as the subject of certain visions, in obeying the mandates of which he lost his property, and endeavored to engage the Christian powers in a crusade against the Turks, for the purpose of restoring Israel. He published numerous works, in Flemish and German, and suffered imprisonment in pursuit of this object, and at last died in obscurity, 1715.

PAULINI, C. F., a Ger. naturalist, 1643-1712.

PAULMIER DE GRENTMESNIL, JULIAN LE, a French physician, who witnessed the massacre of St. Bartholomew, and wrote on surgery, 1520-1598. His son, JAMES, a learned antiquarian and philologist, 1587-1670.

PAULMY, MARK ANTONY RENÉ DE VOYER,

Marquis de, minister of state, and a member of the French academy, was born at Valenciennes, in 1722. He collected one of the most magnificent libraries in Europe, which was sold to the Count d'Artois, brother to Louis XVI. M. de Paulmy published '*Mélanges d'une grande Bibliothèque*,' 69 vols. 8vo., and a work entitled '*Essays in the Style of those of Montaigne*,' 9 vols. 8vo. Died 1787.

PAULUS OF ÆGINA, a medical writer, 7th cent.

PAULUS ÆMILUS LUCIUS. See ÆMILIUS.

PAULUS, H. E. G., a distinguished German oriental scholar and critic, professor of Church History and biblical exegesis in the University of Heidelberg. Died 1837, aged 90.

PAULUS, JULIUS, a Roman lawyer, 3d century.

PAULUS, PETER, grand pensionary of Holland, was born in 1754. As a minister of the marine department he displayed great activity and intelligence; but having offended the stadtholder's government, he was removed from his situation in 1787, and retired into France. He afterwards returned, and held very important offices in the state. Died 1796. Paulus was the author of a '*Commentary on the Treaty of Utrecht*,' 3 vols., a '*Memoir on the Equality of Mankind*,' and other works.

PAUSANIUS, a Greek geographer, 2d century.

PAUSANIAS, a general of Cleombrotus, king of Sparta, who distinguished himself at the battle of Plataea, and was afterwards detected in a treasonable attempt to deliver his country to the Persians. Having fled to a temple of Minerva, the sanctity of which secured him from violence, the Greeks surrounded the building with heaps of stones, and thus starved him to death, B.C. 467.

PAUSIAS, a Greek painter, 4th century B.C.

PAUSON, a Greek painter, 5th century B.C.

PAUW, C. DE, a Dutch *savant*, 1739–1799.

PAUW, J. C., a Dutch classic, 17th century.

PAUW, REIGNIER, a Dutch magistrate and diplomatist, 1564–1636. ADRIAN, his son, grand pensionary of Holland, 1631, plenipotentiary at the peace of Munster, 1648, died 1653. CORNELIUS, brother of the latter, a statesman, 1593–1631.

PAUWS, P., Dutch physician, 1564–1617.

PAUWELS, J., a Belgian composer, 1771–1804.

PAVILLON, JOHN FRANCIS DU CHEVRON DU, a French naval commander, 1730–1782.

PAVILLON, NICHOLAS, a famous preacher, born at Paris 1597, died bishop of Aleth 1677. STEPHEN, his son, a man of letters, 1632–1705.

PAYNE, J., an English engraver, 1608–1648.

PAYNE, JOHN HOWARD, an American writer and dramatist, was born in the city of New York, June 9th, 1792. While his father lived in Boston, to which city he had removed, his son, then only a child, is said to have made his appearance on some public occasion, and to have met with such success, in the delivery of an address, as to have fixed his taste for the stage. He, however, commenced his career as a merchant's clerk, and was placed at the age of thirteen in a counting house in New York. At this very early period he had already evinced such an inherent and precocious talent for literature and the stage as to establish a weekly journal, '*The Thespian*.' He was subsequently placed under the care and instruction of the Rev. Dr. Nott, at Schenectady, and while there, his literary ardor was exhibited by the publication of a semi-weekly paper, '*The Pastime*.' In his sixteenth year he made his first appearance on the stage at the Park Theatre in New York, as Young Norval. This was the commencement of considerable success as an actor, in this country and in England, where he went in 1813. While in Lon-

don he established a theatrical journal the '*Opera Glass*,' and began the career of a playwright. He industriously adapted many pieces from the French to the English stage, which were generally popular. The favorite air of '*Home, Sweet Home*,' was composed by Payne, and introduced into the play of '*Clara, or the Maid of Milan*.' The few simple words of this song have done more for the reputation of Payne than all his labored productions of many years. He returned to America in 1834, after a long residence in Europe, and published the prospectus of a universal magazine, under the fanciful Persian title of *Jam-Jeham-Nima* (the cup of the universe). The proposed plan never got farther towards consummation than a prospectus and a subscription list. After an interval of several years of expectation, with occasional literary activity, he was appointed Am. consul to Tunis, where he died in 1852, at the age of 60.

PAYS, RENE LE, a French poet, 1636–1690.

PAZ, J. A. DE, a Spanish Jesuit, 1560–1620.

PAZZI, JACOPO, chief of the Italian faction opposed to the Medici, put to death 1478.

PEACHAM, HENRY, an accomplished gentleman, who is supposed to have been tutor in the earl of Arundel's family, and who wrote many works known to the readers of polite literature: among these are some complimentary poems, '*The Gentleman's Exercise*,' intended as a treatise on art; '*Minerva Britannica*,' a collection of emblems in verse, illustrated with plates; and '*The Complete Gentleman*.' This latter work is the one for which he was most celebrated, and it has been frequently reprinted. Died about 1640.

PEACOCK, REGINALD, a learned and worthy prelate, was successively bishop of St. Asaph and Chester, by the favor of Humphry, the good duke of Gloucester. But he was deposed for resisting the papal authority and denying transubstantiation, with other articles of the Roman Catholic faith. He was obliged to recant his notions, and his books were publicly burnt; after which he was confined in Thorney Abbey, where he died in 1460.

PEALE, CHARLES WILSON, an American painter, 1741–1827. His brother, REMBRANDT, was also an artist.

PEARCE, NATHANIEL, a sailor, was born in 1780, at Acton, near London. In 1805 he accompanied Lord Valentia to Abyssinia; and being, by his own desire, left there, married, and enjoyed for many years the favor of the king. He died, on his journey to England, in 1820, at Alexandria. Though an uneducated man, Pearce was a shrewd observer, and has contributed much to our knowledge of the present state of the country in which he was domiciled.

PEARCE, ZACHARY, bishop of Rochester, a prelate of great learning and piety, was born in London in 1690; was educated at Westminster School, and Trinity College, Cambridge; became, successively, vicar of St. Martin's-in-the-Fields, dean of Winchester, bishop of Bangor and bishop of Rochester. His principal works are, erudite editions of Longinus and Cicero, a '*Review of Paradise Lost*,' a '*Commentary on the Four Evangelists*,' &c., 2 vols.; and '*Sermons*,' 4 vols. He left, among other charitable bequests, £5,000 to the college for clergymen's widows at Bromley.

PEARSALL, R., a nonconf. divine, 1698–1762.

PEARSON, EDWARD, a learned minister of the Church of England, author of a Norrisian prize essay on the '*Goodness of God, as Manifested in the Mission of Jesus Christ*,' a '*Collection of Prayers*,' and Tracts against the theory of Paley on moral obligation, 1756–1811.

**PEARSON, GEORGE, M.D., F.R.S.**, was a native of Rotherham, in Yorkshire. He studied medicine in London, Edinburgh, and Leyden; was one of the physicians of St. George's Hospital; and rendered essential benefit to the lovers of chemistry by his experimental knowledge of the science. The component parts of Dr. James's febrifuge powders having been kept a profound secret, Dr. Pearson analyzed the composition, and proved them to be composed solely of antimony and phosphate of lime. Died 1828.

**PEARSON, JOHN**, a learned English prelate, was born in Norfolk, where his father was rector of Creake and Snoring, 1612, and died, bishop of Chester, 1686. He is regarded as the greatest divine of his age, and is best known by his 'Exposition of the Creed,' published while he was vicar of St. Clement's Eastcheap, 1650. The principal of his other works is a 'Defence of the Epistles' of St. Ignatius.

**PEARSON, MARGARET EGLINGTON**, a lady distinguished for her skill in the art of enamelling, or painting on glass, was the daughter of Samuel Patterson, the bibliographer, and married an artist named Pearson, with whom she established a manufactory of stained glass at Hampstead. Some of her productions have scarcely ever been equalled, particularly her copies of Raphael's cartoons. Died 1823.

**PECCHIO, G.**, an Italian economist, 1785-1835.

**PECEI, J. A.**, an Ital. antiquarian, 1693-1768.

**PECHANTRA, N. DE**, a Fr. dram., 1638-1709.

**PECHMEJA, J.**, a Fr. literateur, 1741-1785.

**PECK, FRANCIS**, a learned antiquary, was born at Stamford, in 1692. He took his several degrees in arts at Trinity College, Cambridge; became rector of Godeby, in Lincolnshire; obtained a prebend in the cathedral of Lincoln, and died in 1743. His principal publications are 'The Antiquarian Annals of Stamford,' 'Desiderata Curiosa,' 'Memoirs of Oliver Cromwell,' and 'Memoirs of John Milton.'

**PECK, WILLIAM DANDRIDGE**, an American naturalist and Professor of Harvard College. Died 1822.

**PECKHAM, J.**, archb. of Canterbury, d. 1292.

**PECKWELL, H.** a Calvinist divine, 1737-87.

**PECQUET, ANTHONY**, grand master of the waters and forests of Rouen, known as a writer on the forest laws and general politics, 1704-1762.

**PECQUET, JOHN**, a celebrated anatomist and physician, was born at Dieppe, and died at Paris in 1674. He discovered the thoracic duct and the receptacle of the chyle, and traced the progress of the chyle into the left subclavian vein. He wrote 'Experimenta Nova Anatomica' and other works.

**PEDRAZI, P.**, an Ital. antiquarian, 1644-1720.

**PEDRO I., ANTONIO JOSE D'ALCANTARA**, Don, emperor of Brazil, was the eldest son of John VI. king of Portugal, elder brother of Don Miguel and nephew to Ferdinand VII. king of Spain. He was born in 1798, and was taken in 1808, with the rest of the royal family, to Brazil. In 1817 he married Leopoldine, archduchess of Austria, daughter of the emperor Francis I., by whom he had five children, among whom was the present queen, Donna Maria. Leopoldine died in 1826; and in 1829 he married Amelia, princess of Leuchtenberg, the daughter of Eugene Beauharnois. On account of the events which led to Pedro's abdication of the crown of Brazil, in favor of his son, Pedro II., he embarked on board an English ship of war for Europe, in the spring of 1831, and arrived in London in July, as a private gentleman, bearing the title of the Duke of Braganza. Operations immediately commenced for displacing his brother, Don Miguel, from the throne of Portugal, and many severe conflicts took place;

[Senate House, Rio Janeiro.]

at length, in July 1832, the fleet of Pedro, under the command of Admiral Napier, signally defeated that of Miguel; which event, with other successes of the Pedroite party, led to his brother's abandonment of the throne, and the accession of Donna Maria. Don Pedro died in 1834.

**PEEL, SIR ROBERT**, father of the celebrated statesman, was the third son of Mr. Peel, of Peel Cross, Lancashire. He was born in 1750, and amassed great wealth in the cotton trade, became a member of parliament, and in 1801 was created a baronet. Died at Drayton Manor, 1830.

**PEEL, SIR ROBERT**, was born on 5th February, 1788. His father was a celebrated manufacturer, whose successful career was intimately connected with the development of the industrial energies of Britain during the great European war. The elder Peel left a princely fortune to be inherited by his distinguished son, and there is no doubt that the peculiar position in which he was placed had much influence on the mind of the statesman. In wealth and rank he was nominally among the aristocracy, and his own character was reserved and somewhat haughty. In the external movements of society he would feel his place a high one, and the proudest aristocracy were naturally ever willing to acknowledge a considerable position to the clever, rich, and highly educated cotton-spinner's son. Yet he would have opportunities of being conscious that he was not admitted within the sacred arena of the old feudal aristocratic families, whose generations had been intermarrying for centuries. His was a nature to see and feel this, while the history of his father's rise, and all the antecedents of his own greatness, would concur to throw his sympathies into the cause of progress and energy. He studied at Harrow and Oxford, where he early distinguished himself among the most brilliant men of his day. When just twenty-one years of age he entered parliament as member for Cashel, and thenceforth the sphere of his exertions and triumphs was the House of Commons, in the history of which his career will form a large feature. He was no orator, nor was he properly speaking a natural and simple debater. His manner was the artificial one of thorough training, but for an artificial manner it was a good one, and the house from his practice got to like it, though to a stranger it was generally unpleasant. He could state his case clearly and forcibly, but he seldom liked to abandon a subject until he had discussed it at great length. He avoided in a marked manner the statement of general principles, as if he feared that he might after-

wards have to say or do something inconsistent with them, and he generally made out his case on the details of the matter, rather than on any wide rule or principle of political opinion. At the beginning of his parliamentary career he was appointed to serve on Horner's bullion committee, and the peculiarities of his mind were then distinctly remarked. It was seen that he went into the inquiry with opinions totally unformed—that he proceeded with the examination systematically and calmly, as if it had related to some philosophical question about the composition of metals, but that after having formed his opinions, he deemed it his function and duty to carry them resolutely into practice. In 1811 he was made under-secretary for the colonies, and in 1812, while only twenty-four, he received the very responsible appointment of chief secretary for Ireland. After carrying his celebrated currency measure of 1819, he became in 1822 home secretary. Refusing to take office under Canning, he joined the ministry of the duke of Wellington in 1828. Here by conceding catholic emancipation, against which he had previously protested, he did one of those acts which have been called tergiversation by some, and the result of honest conviction, rising above original prepossession by others. He still, however, professed to belong to

[Birthplace of Sir Robert Peel.]

the Conservative party, and he became a strenuous opponent of Earl Grey's ministry and the Reform Bill. When a Conservative government was, from mere accidental and personal causes not well explained, established in 1834, he gallantly undertook the attempt to work it, though conscious that the task was hopeless. He became prime minister in 1841 with better prospects. The position in which he was placed was that of the head of a protectionist government, established to defeat and suppress the free trade party. As circumstances developed themselves in the few critical years from 1841 to 1846, some indications of opinion created alarm among the thorough protectionists, and it was seen that the prime minister becoming convinced of the truth of free trade, was determined to carry its principles into practice. After a repeal of the corn laws and other measures in the same spirit, he resigned office to the party to whom his later opinions legitimately belonged, in the summer of 1846. He died on the 2d of July, 1850, of internal injuries caused by a fall from a horse. [J.H.B.]

PEELE, GEORGE, a dramatist and poet of the Elizabethan age, was a native of Devonshire, and was educated at Oxford, where he completed his degrees in arts in 1579. On going to London he formed an acquaintance with Shakspeare, Jonson, and other

dramatic writers, and wrote for the stage. He wrote five plays, which were well received; also, some pastoral and other poems. There is a scarce book still extant, entitled 'The Merry conceited Jests of George Peele,' &c. He died about 1598.

PEGEL, M., a German *savant*, died 1610.

PEGGE, SAMUEL, father and son, both of the same name, distinguished as antiquarian writers—the former, a minister of the Church of England, flourished 1704–1796; the latter, a barrister, 1731–1800. SIR CHRISTOPHER, son of the younger Samuel, was regius professor of medicine at Oxford, and died 1825.

PEINS, G., a German painter, 1500–1556.

PEIRCE, J., a nonconform. divine, 1673–1726.

PEIRESC, NICHOLAS CLAUDE FABRI, a learned Frenchman, was born at Beaugensier, in 1580, and distinguished himself by his application to the study of antiquities, and by his extraordinary abilities, while at the Jesuit's college, at Avignon. He afterwards fixed his residence at Padua, and made himself master of the mathematics, and of the Hebrew, Samaritan, Syriac, and Arabic languages. In 1605 he visited England, and became acquainted with Camden and other English literati. In 1607 he was admitted a Senator at Aix, and in 1618 he obtained the abbey of Guistres, in Guienne, where he employed himself in literary and scientific pursuits till his death, in 1637.

PEIROUSE, PHILIP PICOT, Baron De La, a distinguished French naturalist, 1744–1818.

PELAGIUS, sometimes surnamed Brito, is usually supposed to have been a native of England, his Greek name being a translation of his Celtic one,—MORGAN. The opinions which he afterwards advocated were probably the growth of many years, for at first during his residence in Rome, whither he came in the year 400, he was noted only for his earnest zeal and austere activities. He had even the address to hold intercourse with Augustine, when he visited Africa, and also with Jerome, without his being suspected of heresy. At length the agitation commenced. Pelagius, who had meanwhile gone to the East, was accused before John of Jerusalem and the synod of Diospolis, but acquitted, though he was formally anathematized by Pope Innocentius, in A.D. 417. Other sentences were passed upon the heresiarch, and his subsequent history is unknown. His doctrines were a denial of the distinctive truths of scripture and evangelical theology,—such as original sin and depravity, moral inability, and the need of divine grace to renovate. In fact, the tenets ascribed to Pelagius, ignore the guilt of man, and all but make him his own deliverer. In attempting to denude redemption of mystery, he robbed it of reality. His opponents, however, complained of his lubricity, and perhaps his own views are not to be judged of by the extreme sentiments of his pupils. Several of the works of Pelagius have descended to us, such as his 'Commentaries on Paul's Epistles,' and his 'Confession of Faith.' [J.E.]

PELAGIUS, a king of the Asturias, died 737.

PELAGIUS, the *first* of the name, pope, in the reign of Justinian, 555–559; the *second*, 578–590.

PELAGIUS, MAGLOIRE, a man of color, who became a general in the French army, died 1804.

PELAGIUS, ST., a convert of Antioch, 5th ct.

PELETIER, CLAUDE LE, one of the most distinguished members of the ancient French magistrature, provost of merchants, and builder of the quay which bears his name at Paris, 1631–1711. His brother, MICHAEL, a learned man and councillor of state, died 1725.

PELETIER, JAMES, a French mathematician and

man of letters, 1517-1582. JOHN, his brother, a theologian, died 1583. JAMES, their nephew, an ecclesiastic, executed in effigy for his alleged share in the death of the president Brisson, 1595.

PELL, JOHN, a learned divine and mathematician, who settled at Breda as professor of philosophy and mathematics, and was a great correspondent of Cavendish. Besides the works published by him, his MSS. and letters, in the British Museum, occupy nearly forty folio volumes. Born at Southwick, in Sussex, 1610, died 1685.

PELLEGRIN, SIMON JOSEPH, a French ecclesiastic, kn. as a dramatic wr. and poet, 1663-1745.

PELLEPRAT, P., a Fr. missionary, 1606-1667.

PELLERIN, JOSEPH, a French antiquary, who was commissary-general and clerk of the marine, at Paris, where he died at the age of 99, in 1782. He published ten volumes in quarto on the subject of medals; and his cabinet, which was one of the richest in Europe, was purchased by the King of France.

PELLETIER. See LEPELLETIER.

PELLETIER, BERNARD, an ingenious French chemist, was born at Bayonne, in 1761, and died of a consumption, brought on by inhaling oxymuriatic acid gas, in 1797. He made a number of discoveries, the particulars of which were communicated to the public in the *Journal of Natural History*, of which he was the principal conductor.

PELLEW, EDWARD. See EXMOUTH.

PELLICAN, C., a Germ. Hebraist, 1478-1536.

PELLICER, J. A., a Span. *savant*. 1740-1806.

PELLICO, SILVIO, was born at Saluzza, in Piedmont, 1789. He was known in early life as a poet and dramatic writer, especially by his fine tragedy 'Francesca da Rimini.' In 1819, he started the 'Conciliator,' a literary and scientific journal, which brought him under the Austrian censorship, and in 1821, he was arrested and condemned to death with Count Gonalonieri and others; all charged with conspiracy as members of the *Carbonari* societies. This punishment was commuted on the scaffold, and the patriots consigned to a horrible imprisonment; that of Silvio Pellico, chiefly passed in the fortress of Spielberg, lasting till the general amnesty of 1830. The pathetic account of his sufferings, 'Le Mie Prigioni,' produced an immense effect, and the name of Pellico, connected with those of Gioberti and Balbo, has kept alive the purest flame of patriotism that has yet burned in their unhappy country. He died in the house of the Marchesa Barolo, in Feb., 1854. [E.R.]

PELLIEUX, J. N., a Fr. antiquary, 1749-1832.

PELLISSON-FONTANIER, PAUL, an eminent historian and member of the French Academy, who was educated for the law, and at the age of twenty-one published a 'Commentary on the Institutes of Justinian.' He is famed also for the courage with which he defended his old protector, Fouquet, on whose disgrace he was consigned to a five years' imprisonment in the Bastille. His works are a 'History of the French Academy,' 'History of Louis XIV.,' 'History of the Conquest of Franche-Comté,' and 'Reflections upon Religious Differences.' Born at Béziers 1624, died 1693.

PELOUTIER, SIMON, an historian, was born at Leipsic, in 1694. He became pastor of the French church at Berlin, counsellor to the consistory, and librarian of the academy. He wrote a work replete with research, entitled 'Histoire des Celtes.'

PELOPIDAS, a famous Theban general, companion-in-arms of Epaminondas, died B.C. 364.

PELS, A., a Dutch miscellaneous wr., d. 1681.

PELTAN, T. A., a Germ. theologian, 1552-84.

PELTIER, J. G., a Fr. journalist, died 1825.

PEMBERTON, HENRY, professor of medicine at Gresham College, and a member of the Royal Society, bears a distinguished name as a mathematician and natural philosopher. He was the contemporary and friend of Sir Isaac Newton. Born in London 1694, died 1771.

PEMBERTON, THOMAS, an American chronicler, who left behind a large MS. collection of historical facts, died 1807.

PEMBLE, W., a learned divine, 1591-1623.

PEMBROKE, MARY HERBERT, wife of Henry, earl of, a poetical writer, died 1821.

PEMBROKE, T., a painter, about 1700-1728.

PENA, JOHN, a Fr. mathematician, 1530-1560.

PENA, JOHN NUNEZ DE LA, a Spanish historian of the Canary Islands, 1676.

PENA, PETER, a French botanist, 16th century.

PENHALLOW SAMUEL, a colonial chief justice, and historian of Indian wars, died 1726.

PENNINGTON, ISAAC, son of an alderman and mayor of London, famous as a writer among the Quakers, was born about 1617, joined that religious body 1658, and died 1679. A daughter of his wife, by her former husband, was married to the celebrated William Penn.

PENN, JOHN, a signer of the Declaration of Independence, was born in Virginia 1719, but removed to N. Carolina and represented that State as a delegate to Congress, died 1788.

PENN, WILLIAM, an English admiral, was born at Bristol in 1621. He commanded the fleet, and Venables the land forces, at the taking of Jamaica in 1655. After the Restoration he served under the Duke of York, in the successful battle with the Dutch fleet in 1664, for which he was knighted. He died at Wanstead, in Essex, in 1670.

[William Penn.]

PENN, WILLIAM, was born in Windsor, on the 14th of October, 1644. His father was Sir William Penn, a distinguished admiral, who boasted a high and ancient lineage. While the young man studied at Oxford, the great feud between the Puritan and Carabie party then raging was interrupted by the appearance of a new claimant to their allegiances, in a representative of the startling opinions of George Fox. From their boldness and originality, and their rejection of the authoritative restraints laid on both the other factions, this had a charm for one of young Penn's bold and original nature, and he joined the new sect resolving to brave all the consequences. A

far more painful portion of them, even than his expulsion from college, encountered him in the domestic circle, where the feelings of the proud old admiral were deeply wounded by finding his son a schismatic. It was one of the veteran's maxims, however, that conscience and honor were before all things, and the spirit and manliness with which his son carried out the principles he adopted seem to have appeased his indignation. In 1668, Penn published the first of his voluminous works 'Truth Exalted,' and two years afterwards he was imprisoned, under the conventicle act, for seditious preaching. In 1677, he travelled on the continent with his celebrated brethren, Robert Barclay and George Fox. It was in the year 1681 that, in compensation for a debt to his father by the crown, he received a grant of the province on the Delaware, called the New Netherlands. It was a signally fortunate incident that in the reckless disposal of such gifts at that time, one should have fallen into hands like his. Such was the foundation of the colony of Pennsylvania, now an empire. It was commenced in a spirit of magnanimous justice, incomprehensible to that age, in an agreement with the natives, and the admission that they had claims to be considered before the colonists took absolute possession. When the relaxations with which James II. wished to purchase the assent of the dissenters to his Romish projects began, the conduct of Penn created suspicions and accusations which have clouded his fame. His position was peculiar, since it was not easy to find among the dissenting bodies any other man whose rank and importance made him so likely a medium of communication with the court, and, at the same time, the Quakers not having much harmony with the others, and being little liked by them, were more apt to accede to measures not generally acceptable to dissenters at large. Thus Penn had friendly communications with the court, and gave his support to its measures. Whether he dishonorably implicated himself, is matter of too extensive controversy to be here entered on, and reference must be made to the vindication in Mr. Hepsworth Dixon's *Memoirs*, published in 1851. One charge against him is that when in Monmouth's rebellion, some young girls of Taunton were threatened with the punishment of death for having worked standards for Monmouth, Penn became the looker for their pardon, as a pecuniary consideration in favor of the maids of honor. Mr. Dixon has given reason to suppose that the negotiator was a different person named George Penne. After the Revolution, Penn lived under the suspicion of favoring the Jacobite cause, and his latter days were clouded. The death of his first wife in 1693, was followed by that of his eldest son. He married a second time in 1696. He was afterwards encumbered with debt, and died on the 30th of July, 1718.

[J.H.B.]

PENNA, L., an Italian composer, died 1693.

PENNANT, THOMAS, a celebrated naturalist, was born in 1726. He died in 1798. His father was the proprietor of an estate in Flintshire, north Wales, to which he succeeded at the age of thirty-seven. He devoted almost all his spare time to travelling and the study of natural history and antiquities. He is the author of many works, some of which retain a considerable reputation. His 'British Zoology' is a work of much excellence, and his 'Tour in Scotland' obtained for him a high character as an accurate observer. He made that country much better known to the English than it had hitherto been, and he assisted Lightfoot materially in his excellent work 'The Flora Scotica.' Amongst his other works we

may more particularly mention his 'Synopsis of Quadrupeds,' and the 'Arctic Zoology;' his 'Tour through Wales,' and the 'Antiquities of London.' He was a fellow of the Royal and Antiquarian Societies, and many others, both at home and abroad, and corresponded with Linnæus, Buffon, Haller, and many of the distinguished men of the day. Foster has named a genus of plants after him, *Pennantia*.

[W.B.]

PENNI, G. F., a Florentine painter, 1488-1528. His brother, LUCAS, was born about 1500.

PENNICUIK, A., a Scot. physician, 1652-1722

PENNY, EDWARD, a painter, 1714-1791.

PENNY, THOMAS, an Engl. naturalist, 16th c.

PENROSE, THOMAS, a poetical wr., 1743-79.

PENRY, or AP HENRY, JOHN, a violent Puritan, better known by his assumed name, Martin Marprelate, was born in Wales in 1559, and educated at Peter House, Cambridge, from whence he removed to Oxford, where he took his degree of master of arts, and entered into orders. In the controversy between the Puritans and the hierarchy, he wrote some scandalous libels against the church, under the assumed name of Martin Marprelate, for which he was tried, condemned, and executed, in 1593.

PENTHIEVRE, L. J. M. DE BOURBON, Duc De, regarded as one of the most upright statesmen of France in the last century, 1725-1793.

PENTZ, G., a German engraver, 1500-1550.

PENZEL, A. J., a Ger. philologist, 1749-1819.

PEPIN OF HERISTAL, called also PEPIN LE GROS, was the stock of the second dynasty, or Carolingian line of French kings. He was grandson by the mother's side to Pepin de Landen, who governed Austrasia in the reign of Dagobert, and stood in the same relation by his father to the famous Arnaud, archbishop of Metz, who combined in his own person the characters of a warrior, statesman, diplomatist, and prince of the church. Pepin of Heristal took his surname from his seat on the Meuse, near Liege, while the Christian prefix derived from his maternal grandfather may have been chosen as a recommendation to the people of Austrasia. The Austrasians, in fact, when Ebroin, mayor of the palace of Neustria, became their legal governor by the death of Dagobert II. in 680, preferred the hazard of a contest in favor of Pepin, to the yoke of the well-known tyrant, and a struggle was then begun which produced the assassination of the latter, and made Pepin of Heristal the virtual master of the Frank monarchy. It is an historical question how far Clothaire II. and the Dagoberts contributed to the elevation of this family, who at length overthrew their dynasty, but there can be no doubt about two facts,—1, that it was the period of a struggle between the local and the national powers, such as we often recognize at a later age in the history of feudalism; and 2, that the Merovingian, or first line of kings, descended from Clovis, had become a feeble, cruel, and debauched race. Thierry, who reigned nominally during this struggle, was no exception to the rule in point of feebleness; and when Ebroin was vanquished, who had tyrannized over him as well as the people, he refused to make the *amende honorable* to those who had been injured. It was the disaffection thus produced that armed the followers of Pepin against their common sovereign, and the king being defeated, found that he had exchanged a master hated by all his subjects for one whom they regarded as their saviour. Pepin, however, contented himself with the old title, 'Mayor of the Palace,' and not only propped up Thierry himself, but crowned three of his descendants after him, who are called in French

history, *Les Rois Fainéants*—‘Do-nothing kings.’ The real power was firmly grasped in the hands of Pepin Heristal, who subdued the tributary princes by continual victories, and consolidated the order of the state without daring to assume the pageantry of it. He died in 714, leaving his natural son, Charles Martel, to take the next step in advance, which consisted in administering the kingdom, not with the title of king indeed, but with the throne absolutely vacant. [E.R.]

PEPIN LE BREF, son of Charles Martel, and grandson of the preceding, is the first king of France of the Carolingian dynasty. He succeeded to his father’s authority conjointly with his brother Carloman, in 741, and by filling the throne with Childeric, a foolish prince of the Merovingian line, surnamed ‘the idiot,’ acquired the sanction necessary to support the continued assumption of power by his own family. While Childeric acted the part of the *roi fainéant*, Pepin le Bref, so named from his short stature, was reaping glory in the field, and in 746 was left without a competitor by the retirement of Carloman to a monastery. The clergy and the pope were easily conciliated in favor of a power which promised to preserve the church from the surrounding anarchy, and stop the progress of the Saracens, now spread as far as the south of France. In 750, therefore, Pepin le Bref dethroned Childeric, and having shaved off his long hair, which was an essential character of royalty with the Merovingian kings, confined him in a monastery. In 752 he caused himself to be consecrated at Soissons, and in 754 received the pope himself (Stephen II.) as a petitioner for intervention in Italy. This was the beginning of the Frankish empire, successor of the old Roman, which had ended in universal anarchy. Pepin and his queen Bertha were crowned in the church of St. Denis by the pope, and the king then accompanied him into Italy at the head of an army, besieged Astolphus, king of the Lombards, in Pavia, and compelled him to abandon his pretensions to the sovereignty of Rome and the exarchate of Ravenna. Another expedition was rendered necessary by the revolt of Astolphus, who was again subdued by the champion of the church, who also obtained a signal victory over the Saracens, reunited Aquitaine to his kingdom, and waged successful war against the German princes. Pepin le Bref died in the seventeenth year of his reign, 768, and was succeeded by Charlemagne. It is admitted by late historians that this change of dynasty was coincident with the elevation of the eastern Franks, whose fresher energy, guided by the chiefs of the Pepin family, enabled them to push upwards to the seat of government, and take the place of their feebler kindred. [E.R.]

PEPIN, the second son of Charlemagne, born 776, became king of Italy 781, died 810.

PEPIN, the *first* of the name, king of Aquitaine, was the son of Louis le Débonnaire, and was born 803. Aquitaine was apportioned to him in 817, died 838. The *second* of the name was son of the preceding, died in a monastery 864.

PEPIN, M., a Flemish painter, born 1578.

PEPOLI, a rich Italian family who aimed at the sovereign power in Bologna, 14th century.

PEPOLI, A. H., an Italian poet, 1757–1796.

PEPPERELL, SIR WM., an officer in the British army, was born in Maine, and was chiefly engaged in colonial service, and for his gallant conduct in the expedition against Louisburg, received the title of baronet. Died 1759.

PEPUSCH, JOHN CHRISTOPHER, one of the

greatest theoretical musicians of modern times, was born at Berlin, about 1667. He came to London in 1700, and was engaged as musician at Drury Lane theatre, where it is believed he assisted in adapting the operas which were performed there. In 1713, the university of Oxford admitted him to the degree of Doctor in Music. At the instance of Gay and Rich he undertook to compose and adapt the music for the ‘Beggar’s Opera.’ Having written a paper on the ancient genera, which was read before the Royal Society, and published in the Philosophical Transactions, in the year 1746, he soon afterwards was elected a fellow of the Royal Society. He died in 1752. [J.M.]

PEPYS, C. C., Earl of Cottenham, a distinguished English lawyer, and Lord Chancellor from 1836 to 1841, and from 1846 to 1850. Died 1851, aged 70.

[Pepysian Library, Cambridge.]

PEPYS, SAMUEL, born in 1632, was the son of a tailor in London, but related to persons of distinction, whose patronage procured him public offices, and introduced him into aristocratic society. After having served with much ability as a clerk in the Navy Board, he became secretary of the Admiralty under Charles II., and held the place till the Revolution. He died in 1703. Pepys was one of the strangest of mortals: with great talents and activity in business he united a considerable knowledge of several of the fine arts, and a sufficient turn for science to make him no unworthy president of the Royal Society: he was a man of much shrewd observation on the follies of others and the habits of his time, and yet himself a fop and an egotist, vain to the extreme of the ridiculous, and delighting in trifling and gossiping as much as in his more serious occupations. His own character is most amusingly shown, and that of his profligate age most instructively painted, in his ‘Diary’ and correspondence. A collection of books and manuscripts which he bequeathed to Magdalen College, Oxford, contained 2,000 old English ballads, which were among the chief authorities of Percy in the compilation of his ‘Reliques.’

PERANDA, S., a Venetian painter, 1566–1638.

PERAU, GABRIEL LOUIS CALABRE, a French writer, author of the ‘Secrets of the Freemasons,’ a continuation of the ‘Lives of Illustrious Men of France,’ and editor of editions of Rabelais, Boileau and Bossuet, 1700–1767.

PERAULT, W., a Dominican writer, died 1275.

**PERCEVAL, JOHN**, fifth baronet of the family, and first earl of Egmont, was born at Barton, in Yorkshire, 1683, and died 1748. He was one of the founders of the colony of Georgia, and wrote several works of temporary interest. His son, of the same name, second earl of Egmont, was a member of parliament, and one of the privy council on the accession of George III. He was raised to the peerage by the title of Lord Lovel and Holland, and wrote some political tracts. Born at Westminster 1711, died 1770. His second son is the subject of the following notice.

**PERCEVAL, SPENCER**, a lawyer and statesman, the second son of John Lord Egmont, was born in the year 1762. His education appears to have been private until he entered Trinity College, Cambridge. He was called to the bar from Lincoln's Inn, in 1786. This connection was of a sort which, at that time, secured immediate success even to ordinary abilities. He was made a king's counsel in 1796, when he entered parliament. He attracted the notice of Pitt by a constitutional pamphlet, and soon found himself in the path to political or professional advancement as he might incline. In 1801 he was made solicitor, and in 1802, attorney-general. When the Grenville ministry was overturned in 1807, he led the new ministry as chancellor of the exchequer. This appointment marked the decided opposition of the new government to the tolerant views which had destroyed its predecessors. Perceval is one of the few men in the rank of statesmen, in this country, whose names are associated with rancor or intolerant religious views, and they seem in him to have sprung less from a desire to oppress than from a cold, ungenial nature. One of his rivals said that he was like a fish, and the comparison seems to have been accepted by those who knew him. On the 11th of May, 1812, he was shot while passing through the lobby of the House of Commons by a man named Bellingham. Great alarm was, of course, felt that the maniac represented some political or religious combination, but it was soon discovered that his enmity was entirely on personal grounds.

[J.H.B.]

**PERCIVAL, THOMAS**, an eminent physician and miscellaneous writer, was born at Warrington, in Lancashire, in 1740. After studying at Edinburgh and Leyden, he settled at Manchester, and there founded a literary and philosophical society, of which he was chosen president. Among his works are, 'Medical Ethics,' 'Moral and Literary Dissertations,' and 'A Father's Instructions to his Children.' Died 1804.

**PERCLIGIA**, a Turkish visionary, who excited a commotion in Natolia, and was put to death, declaring himself an apostle of God, in 1418.

**PERCY**, the family name of a follower of Wm. the Conqueror, from whom sprang the lords of Alnwick, in Northumberland. The members of this family best known to history are—**WILLIAM DE PERCY**, whose grand-daughters were married to the earl of Warwick, and to the brother-in-law of Henry I. After him a **HENRY DE PERCY**, reign of Edward I. A second **HENRY** was married to the Princess Mary of Lancaster, in the reign of Edward III., and it was his sons whom Richard II. created respectively earl of Northumberland and earl of Worcester. The latter was beheaded after the victory of Henry IV., near Shrewsbury, while the son of the former, **HENRY PERCY**, called 'Hotspur,' fell gallantly in the battle; and his father, Northumberland, was killed in Yorkshire, 1408. The son of Hotspur was restored by Henry V. to the title of earl of North-

[Northumberland House—London Residence of the Percies.]

umberland, and was killed in the battle of St. Albans, 1455.

**PERCY, PETER FRANCIS**, Baron, a French army surgeon, time of Napoleon, famous for his professional skill and devoted zeal, and the contriver of perambulating hospitals, which he organized for the army of the Rhine, 1754–1825.

**PERCY, THOMAS**, the well-known editor of 'Ancient English Poetry,' was the son of a grocer of Shropshire, who was educated at Oxford, and became a minister, finally a prelate, in the Church of Ireland. He was born 1729, obtained a vicarage in Northamptonshire 1756, and commenced his literary career by publishing a Chinese romance in 1761. The fame of his first-named publication procured him an introduction to the Percies of Northumberland, and he became, in 1765, chaplain to the duke. In 1770 he published the 'Hermit of Warkworth,' and his translation of Mallet's 'Northern Antiquities.' Died at his episcopal palace of Drogheda 1811.

**PERDICCAS**, one of the generals of Alexander the Great, after whose death he aspired to the crown of Macedon; to accomplish which design he divorced his wife, and espoused Cleopatra, sister of Alexander. His project being discovered by Antigonus, he entered into a league with Craterus and Ptolemy, governor of Egypt, against Perdikkas, who marched to Memphis, but was slain in his tent by some of his soldiers, B.C. 322.

**PEREDA, A.**, a Spanish painter, 1599–1669.

**PEREFIXE, HARDOUIN DE BEAUGMONT DE**, a French prelate and historian, 1605–1670.

**PEREGRINUS**, a Cynic philosopher, 2d century.

**PEREIRA, D. NUNEZ ALVAREZ**, a Portuguese statesman and commander, 1360–1431.

**PEREIRA-DE-FIGUERIEDO, ANTONIO**, a Portuguese ecclesiastic, theologian, and ecclesiastical historian, 1725–1797.

**PEREIRA, G.**, a Spanish physician, 16th cent.

**PEREIRA, JONATHAN**, late physician to the London Hospital, distinguished for his knowledge of pharmacy and general science, author of 'Elements of Materia Medica.' Born of humble parentage at Shoreditch 1804, died 1853.

**PEREIRE, JACOB RODRIGUEZ**, a native of Estremadura, in Spain, was the first who practised in France the art of teaching the deaf and dumb. His method of instruction was quite different to that of the abbé l'Epée; but it was considered so good, that Louis XV. bestowed on him a pension of 500 francs. He wrote several treatises on the subject, and died in 1780.

PEREYRA, D., a Portug. painter, 1570-1640.

PEREYRA, M., a Portug. sculptor, 1614-1667.

PEREYRA, V., a Spanish painter, died 1618.

PEREZ, A., a Spanish painter, 1660-1727.

PEREZ, A., a Spanish juriconsult, 1585-1611.

PEREZ, DAVID, who was born of Spanish parents at Naples, in the year 1711, received his musical education from Antonio Galli, and Francisco Mancini. He early showed an uncommon genius for music, and his progress in the art was remarkably rapid. After having brought out operas at Palermo and in Naples, he was invited to Rome, where he soon became extremely popular. In 1752, Joseph, king of Portugal, offered him the situation of chapel-master at Lisbon, which office he accepted, and where his talents were as much prized as they had been in Sicily and Italy. Perez died in the service of the king of Portugal, aged sixty-seven years, after having resided at Lisbon, much admired and respected, during a period of twenty-seven years. Though wanting in grace, his compositions were valuable from the genius, science, and power displayed in them. Like Handel, Perez was blind during the latter years of his life, and when laboring under this severe deprivation, and confined to his bed, he frequently, without the aid of any instrument, dictated compositions in several parts. Besides twelve operas, he left much sacred music, which possesses almost unequalled beauty. [J.M.]

PEREZ, DON ANTONIO, a Spanish statesman, celebrated for the unhappy story of his love for the Princess d'Elboli, mistress of Philip II., and the persecution it brought upon him. He is known also as an historian. Died in poverty, at Paris, 1611.

PEREZ, J., a Spanish writer, 1512-1545.

PERGOLA, ANGELO DE LA, one of the most able Ghibeline commanders of Italy, died 1427.

PERGOLES, GIOVANNI BATTISTA, was born near Naples, about the year 1704, and was educated under Gaetano Greco and Durante. Having discovered that music, previous to his own time, was too much loaded with mere scientific embellishment, he determined to leave the style in which he had been taught, and to adopt the more melodious and simple one of Vinci and Hasse. He composed several operas, which did not meet with much success. His sacred compositions, however, were duly appreciated, and upon these his fame now rests. He died of consumption in 1737, and no sooner was his death made public, than all the cities of Italy, that had paid no attention to his works when he was alive, strove which should do most justice to them when he was dead; and every person became anxious to possess even the most trifling of his compositions. [J.M.]

PERI, J. D., an Italian poet, 17th century.

PERIANDER, who is one of the seven reputed sages of Greece, was a tyrant of Corinth, who succeeded his father, Cypselus, B.C. 633, and died with the reputation of an able ruler B.C. 563. He was a man of licentious manners, and, in the latter part of his reign, became a cruel ruler.

PERICLES, the greatest of Athenian statesmen, was the son of Xanthippus, the conqueror of Mycale, and Agarista, niece of the famous Cleisthenes. The date of his birth is unknown, but as he first took a share in public business in B.C. 469, we may legitimately infer that he was born soon after the beginning of the fifth century B.C. He early gave indications of a mind capable of great achievements, and, following his natural inclinations, spent his youth in retirement, devoting himself to those studies which he felt to be best calculated for fitting him to enter

[Pericles, from an Ancient Bust.]

upon political life. His rank and fortune opened to him the schools of the most eminent teachers of their respective arts and sciences. He was taught the higher music by Damon, who contributed mainly to train him for his political career; was initiated into the subtleties of the Eleatic school under Zeno, and especially profited by the philosophical teaching of Anaxagoras, with whom he was long united in intimate friendship. By his intercourse with the last-named philosopher, his habits of thought, and also the style and tone of his eloquence, were believed to have been formed; and an abiding effect on his future life was produced by the sublime speculations to which he listened. No specimens of his oratory remain to us; but by the unanimous testimony of ancient authors it is admitted to have been of the highest kind. In the year B.C. 469, two years after the ostracism of Themistocles, and about the time of the death of Aristides, Pericles began to engage in the political movements of the time. His hereditary prepossessions led him to espouse the cause of the people, and his pre-eminent talents, combined with untiring assiduity in public affairs, soon placed him at the head of the democratical party, and in opposition to Cimon, who was the acknowledged leader of the aristocracy. From this period till his death, the biography of Pericles is the history of his country. He aimed his first blow at the aristocracy through the council of the Aræopagus, which, notwithstanding the powerful opposition of Cimon, he succeeded in depriving of its judicial power, except in inconsiderable cases. This triumph was soon followed by the ostracism of Cimon, an event which for some time left him without a formidable rival. After B.C. 444 the power of Pericles was nearly absolute. But the boundless influence which he had thus acquired was not debased by the promotion of selfish objects. Averse to the further extension by conquest of the Athenian dominions, he employed himself chiefly in consolidating the empire already acquired, in establishing the surplus population as additional colonies, and proving, when necessary, by military achievements, which place him high as a commander, that the resources at his disposal were sufficient to maintain the position which he claimed for his country. Believing that the supremacy of Athens rested on her maritime superiority, he bestowed especial care on the navy, and maintained a well-trained fleet in constant readiness for action. But Pericles found a more congenial occupation in cultivating the arts of peace. The public funds, which had been greatly increased

by his management, were expended in the erection of those magnificent temples and public buildings which rendered Athens the wonder and admiration of Greece. Architecture and sculpture attained to a degree of perfection which modern ages have in vain endeavored to rival; poetry started into full maturity, and the drama, in the hands of Sophocles, reached the highest excellence. From these peaceful pursuits Pericles was withdrawn by the Peloponnesian war (B.C. 431), which he lived to conduct for the first two years. At the conclusion of the first campaign he delivered the funeral oration in honor of those who had fallen, a speech which, as reported by Thucydides, is one of the most remarkable of all the compositions of antiquity. During the following year Athens was visited by the plague, which carried off his two sons, his sister, and most of his intimate friends. In the middle of the succeeding year (B.C. 429) Pericles died of a lingering illness, which was perhaps connected with the epidemic, though not attended by any of its violent symptoms. [G.F.]

PERIER, CASIMIR, a statesman of the reign of Louis Philippe, was born at Grenoble 1777, and from 1798 to 1800, or shortly after, served in the French army. In 1802 he commenced those commercial and manufacturing speculations, by which he acquired an immense fortune; in 1816 brought himself into notice by a financial pamphlet, and in 1817 was elected one of the deputies for the Seine. From that period till 1830 he opposed the ministry, and on the 30th July became minister of the interior. He succeeded Lafitte as head of the government, in March, 1831. Died 1832.

PERIER, JAMES CONSTANTINE, associated with his brother, CHARLES, in the famous cannon foundries of Chaillot and Liege, and more lately in the manufacture of steam engines, was born at Paris 1742, and died 1818. He is author of an 'Essay on Steam Engines,' the construction of which he had studied in England.

PERIERS, B. DE, a French writer, died 1544.

PERIGNON, DOMINIQUE CATHERINE, Marquis De, a peer and marshal of France, was born 1754, became a deputy to the legislative assembly 1791, succeeded Dugommier, and distinguished himself at the battle of Escola 1794, ambassador to Madrid 1796, marshal 1804, governor of Parma and Placenza 1806, and successor of Jourdan at Naples 1808, joined the Bourbons, and became a peer after the fall of Napoleon; died 1818.

PERINGSKIOEL, JOHN, professor at Upsala, and secretary and antiquary to the k. of Swe., 1654-1720.

PERKINS, ELISHA, an American physician, remarkable as the inventor of the 'Metallic Tractors,' which gave rise to so much excitement in the medical world. His son introduced the tractors into England, and the new system of medical treatment was dignified with the title of 'Perkinism.' The celebrated Dr. Haygarth of London, exposed the charlatanism of the tractors by proving that bits of gingerbread, common bread, and any other material were equally effective, and that the occasional successful results of the application of the tractors was to be attributed solely to the influence of the imagination.

PERKINS, WM., an American colonist, remarkable for longevity. Died in 1732, aged 116.

PERKINS, WILLIAM, a minister of the Church of Eng., kn. as a Calvinistic theologian, 1558-1602.

PERNETTI, DOM ANTHONY JOSEPH, a learned French ecclesiastic of the Benedictine order, author of a curious Historical Journal of a voyage to the Falkland Isles, where he accompanied Bougainville; a Dictionary of Painting, Sculpture, and Engraving; a

Dictionary of Hermetic Philosophy and Mythology, and several works on physiognomy and ethnology. He also published a translation of Columella, of Wolff's Mathematics, and of some of Swedenborg's works, 1716-1801. His brother, JAMES, a priest, and historiographer to the city of Lyons, 1696-1777.

PERON, F., a French naturalist, 1775-1810.

PERONI, J., an Italian sculptor, 1627-1663.

PEROTTI, N., an Italian grammarian, 1430-80.

PEROUSE. See LAPEROUSE.

PERPENNA, a Roman general, and partisan of Marius, put to death by Pompey B.C. 74.

PERPINIAN, P. J., a Spanish painter and theologian, one of the best modern Latinists, died 1566.

PERRAULT, CHARLES, a French barrister, who became comptroller-general of the royal buildings, and a member of the Academy, and acquired great celebrity as a literateur and a poet, was born at Paris 1628. He commenced that famous controversy concerning the comparative merits of the ancients and moderns, in which Boileau advocated the former and Perrault the latter. His principal work is *The Age of Louis XIV.* Died 1703. CLAUDE, brother of the preceding, celebrated as an architect, mechanician, and naturalist, flourished 1613-1688. Among his artistic productions are the colonnade of the Louvre, and most of the vases which ornament the gardens of Versailles. The principal of his writings are a translation of Vitruvius, *Memoirs of the Natural History of Animals*, and *Medical Essays*. PETER, a third brother, wrote on fountains, 1674. NICHOLAS, a fourth brother, died young in 1661, and left a treatise entitled '*La Morale des Jésuits*,' which was published in 1667.

PERREAU, J. A., a French writer, 1749-1813.

PERREIN, J., a French naturalist, 1750-1805.

PERIER. See DUPERIER.

PERRIER, F., a French painter, 1590-1650.

PERRIER, F., a French jurist, 1645-1700.

PERRIN, A. S., a French painter, 1761-1832.

PERRIN, P. N., an eminent merchant of Troyes, born in 1751. In 1789 he was member for D l'Aube to the National Convention, where he exhibited a true but moderated love of liberty. He contracted to supply the republic with five millions of francs' worth of cotton cloth. Being accused, in 1793, of jobbing, he was condemned to be exposed publicly for six hours, and finally to the galleys for 12 years. This unjust sentence (reversed with reparation to his surviving family, after the fall of Robespierre) caused him to die with grief.

PERRON. See DUPERRON.

PERRONNET, JOHN RODOLPH, a celebrated French engineer and bridge builder, 1708-1794.

PERROT, SIR J., a naval officer, died 1592.

PERROT D'ABLANCOURT, NICHOLAS, a Fr. wr., author of several classical translations, 1606-64.

PERRY, JAMES, an able political writer, known for many years as the editor and proprietor of the *Morning Chronicle*, was born at Aberdeen, in 1756, and educated at the high-school and university of that city. He came to London in 1777, and was engaged as a writer in the *General Advertiser* and *London Evening Post*. In 1782 he projected, and for a time edited, the *European Magazine*; but this he quitted for the *Gazetteer*, with an express stipulation that he was to be left to the free exercise of his own judgment and political opinions in the conducting of it. Up to this period it had been the custom for a single person to finish an abstract of the nightly parliamentary debates; but Mr. Perry employed a succession of reporters for that purpose, and thus introduced the practice which is at present

adopted. He subsequently became sole editor and proprietor of the *Morning Chronicle*, which he conducted in such a manner, that Mr. Pitt and Lord Shelburne, in order to make use of his influence, offered him a seat in parliament. This, however, he refused and continued to edit his paper (which was regarded as a sort of official organ of the Whig opposition) till the illness which preceded his death, in 1821.

PERRY, JOHN, an English engineer and traveler, au. of 'The present State of Russia;' d. 1733.

PERRY, OLIVER HAZARD, a distinguished officer of the U. S. Navy, was born in Rhode Island in 1785. In 1798 he entered the navy, served in the expedition against Tripoli. In the war of 1812 with Great Britain, commanded on Lake Erie, and obtained a decisive victory against a superior force. For this, he was made a captain. Died in 1820.

PERSEUS, or PERSES, the last king of Macedon, was a natural son of Philip V., whom he succeeded B.C. 179. He was vanquished by the Romans B.C. 167, and died in prison at Rome.

PERSEUS, AULUS FLACCUS, a Roman satirist, who directed his shafts against the general corruption of the times, and died young, 62.

PERSIUS, a Roman orator, 2d century B.C.

PERTI, J. A., an Italian composer, 1656-1723.

PERTINAX, PUBLIUS HELVIUS, the successor of Commodus as emperor of Rome, was the son of a charcoal burner, and was born 126, in the reign of Adrian. He was assassinated by the prætorians within three months of his elevation to the throne, 193.

PERUGIUS, PIETRO, whose family name was VANUCCI, is most celebrated as the master of Raphael. He was born at Citta Della Pieve, near Perugia, 1446; and first distinguished himself by a 'Descent from the Cross,' painted for the Church of Saint Chiara, at Florence, 1485. One of his best pictures is said to be an infant Christ, in the Albani Palace, at Rome. Died 1524.

PERUSE, J. DE LA., a French poet, 16th cent.

PERUZZI, BALTHASAR, an eminent painter and architect, born in 1481, at Accajano. He went to Rome, was patronized by Alexander VI., and particularly distinguished himself by his able management of the chiaroscuro, and his imitations of basso rilievo, in his architectural views. He died by poison, in 1536.

PESARESE, the surname of SIMON CONTARINI, an Italian painter and engraver, 1612-1648.

PESCATORE, GIAMBATTISTA, an Italian poet and senator of Ravenna, died 1558.

PESCENNIUS NIGER, CAIUS, a governor of Syria, proclaimed emperor of Rome at Antioch on the death of Pertinax 193, slain 195.

PESSELIER, CHARLES STEPHEN, a French dramatic author and poet, 1712-1763.

PESTALOZZI, HENRY, descended from a family of Italian origin, was born at Zurich, 12th January, 1745. He was educated for the church, and even commenced preaching, but for some reason abandoned this occupation when about twenty-eight years of age. He then studied for the law, wrote an essay on the Constitution of Sparta, and on discovering the intense selfishness of the profession, bound himself apprentice to a farmer. With the experience thus acquired he spent the remainder of his property in the purchase and cultivation of a piece of land, and for the sake of employing the poor became partner in a cotton mill; it is probable that he was moved to both those enterprises by the 'Æmilii' of Rousseau, which afforded him a view of his true calling, and the only one which he could

reconcile with his benevolent feelings. He began his career as an educator on his farm of *Neuhof*, by admitting orphan children into his own house, whom he provided with food, clothing, and education—the Helvetic government refusing to take any cognizance of his projects. This was in 1775. In 1798, however, some time after publishing his popular romance, entitled 'Leonard and Gertrude,' in which he partly developed his ideas, he was appointed by the Swiss Directory to the charge of a larger number of children who had been left orphans by the French wars. He was allowed the use of a suppressed convent at Stantz, the capital of Unterwalden, and being compelled to abandon this by the approach of the French army, was transferred to the canton of Berne, where the chateau of Burgdorf, with its surrounding domain, was placed at his disposal. Pestalozzi availed himself of this opportunity to enlarge his plans; pupils flocked to him who paid for their instruction, and he was able to engage assistants. In 1804, after a temporary removal elsewhere, he established himself in the castle of Yverdun, in the canton of Vaud, which, with its surrounding estate, was generously given to him by that government. This change had been rendered necessary by the increase of his pupils, and Yverdun became a normal school, where young men of all nations surrounded the venerable philanthropist, and were instructed in his new system of education. The fame of Pestalozzi was widely spread, and his name every where honored. The canton of Zurich nominated him member of the Helvetic Consulta, convened by Buonaparte, and the emperor of Russia graced him with the order of St. Wladimir. He continued at Yverdun till 1825, when he retired to Neuhof, and in 1826 was named president of the Helvetic Society of Olten. Meantime, indeed, for some years past, the institution of Yverdun had been going to ruin, and soon after the retirement of Pestalozzi, his successor, M. Schmidt, was ordered to leave the country. The works of this great benefactor are 'Leonard and Gertrude,' already men-

[Tomb of Pestalozzi.]

tioned, 'How Gertrude Instructs her Children,' 'Researches on the Course of Nature in the Education of the Human Race,' 'Elementary Education,' and several others, developing his plan of instruction by objects, the essential principle of which is the drawing forth of the internal faculties. Whatever may be thought of his system as a whole, the present generation is deeply indebted to Pestalozzi for the fresher thoughts and experiments which his plans suggested. It is his grand distinction to be among the first benefactors of the poor—the first to claim for their squalid children the full advantage of all that is im-

pressive in art and beautiful in nature—the first to share his bread with them, and to dwell amongst them, as a poor man himself, in order, as he expresses it, that he might ‘Teach those harassed with poverty to live as men.’ [E.R.]

PESTALOZZI, J. J., a physician and professional writer at Lyons, 1674–1742. ANTHONY JOSEPH, probably his son, a physician, 1703–1779.

PESTEL, F. W., a German jurist, 1724–1805.

PETAN, PAUL, a chronologist and antiquarian, flourished at Orleans, 1568–1614. His great nephew, DENIS, commonly called *Petavius*, one of the most learned chronologists of his age, 1583–1652.

PETAVIUS, DIONYSIUS. See PETAN.

PETER, THE APOSTLE, whose name was originally SIMON, was born at Bethsaida, in Galilee, and was about forty years of age when he became a follower of our Lord. He is supposed to have suffered martyrdom at Rome, along with Paul, 65.

PÉTER, the name of five saints of Rome:—1. A bishop of Alexandria, martyred 311 under Maximinus. 2. PETER, surnamed *Chrysologus*, an Italian prelate, author of Sermons and Homilies, died 452. 3. An archbishop of Tarentaise, died 1174. 4. PETER NOLASQUE, founder of the order for the redemption of Christian slaves from the infidels, entitled ‘The Confraternity of Mercy,’ died 1256. 5. PETER OF ALCANTARA, a Franciscan friar, 1499–1562.

PETER I., emperor of Russia (next article.) PETER II., son of Alexis Petrowitz and the Princess Charlotte of Brunswick Wolfenbuttel, born 1715, succeeded Catharine I. 1727, died 1730. PETER III., son of Anne, eldest daughter of Peter I. and of Charles Frederic, duke of Holstein Gottorp, born 1728, was created grand duke by his sister, Elizabeth, 1742, and succeeded her 1762. He was put to death the same year by his wife, Catharine, who succeeded him as Catharine II.

PETER THE FIRST, czar of Russia, was born May 30, 1672. He is usually called PETER THE GREAT, nor can the epithet be justly denied to the man who gave his country seaports, commerce, fleets, and manufactures, arts and educational institutions; and who changed the despised and barbarous Muscovy, which our ancestors spoke of as we now speak of Timbuctoo, into the Russia whose ambitious schemes and preponderating force all the world now anxiously watches. Moreover, the exploits which Peter achieved, were mainly due to his own innate strength of character, and not to the favorable coincidence of circumstances. If it be true that the secret of greatness lies in energy of the will, in resolute endurance, and in self-sacrifice, there are few historical personages in whom its elements have been more strongly developed than in the imperial organizer of the Russian power. Peter succeeded to the crown of Russia at the age of ten; but his half sister Sophia, who held the regency, strove not only to keep him as long as possible from the exercise of power, but to render him unfit for it, by giving him a purposely defective education, and by placing in his way, as he grew up, every temptation to idleness and sensuality. Much of the coarseness, the vice, and the savage violence which deformed Peter's career in after life, may be traced to the taints thus early given to his moral system; the spirit must have been surpassingly strong and self-relying that could rise to any greatness in manhood, after a boyhood and early youth of such neglect and corruption. In 1689 Peter emancipated himself from the regent's domination, and took the reins of government into his own hands. He strove hard

to repair the defects of his education; he acquired, almost entirely by self-teaching, a knowledge of several foreign languages; he studied earnestly the mechanical arts, especially such as related to ship-building; his darling object being to give Russia ships and commerce, though, when he began his reign, she possessed no seaport except that of Archangel in the northern sea. He endeavored also to form a body of troops on the model of the armies of the civilized nations of western Europe. He exercised them in hostilities against the Turks and Tartars on his south-eastern frontier, during which he gained the important city of Azoph. In 1697, having provided for the safety of his empire, and left troops under the command of the best of the foreign officers who had aided him in his reforms, so as to curb any reactionary movements of the discontented part of his subjects, Peter travelled as a private per-

[House in which Peter lived at Zaandam.]

son through Germany, Holland, and England. He labored hard to improve his knowledge of ship-building, and other useful parts of practical knowledge. To do this the more effectually he worked with his own hands as a common shipwright in the dockyard at Amsterdam, and afterwards in the English yard at Deptford. During his absence from Russia the Strelitzes (the old Muscovite soldiers) mutinied, but were put down by General Gordon, whom Peter had left in command of his new troops. Peter hurried back to Russia, and punished the mutineers with frightful cruelty. He now proceeded with renewed vehemence in the changes of manners and dress, as well as the introduction of useful arts, which he forced upon his barbarous subjects. In his zeal to do good he was too frequently injudicious in choosing times and seasons for the work; and the least show of opposition irritated him into ferocity, which was fearfully aggravated by the habit of drunkenness, which he had acquired during his neglected youth, and from which he never set himself free. In 1700 the war between him and Charles XII. of Sweden commenced. At first the Swedes always defeated the Russians; but Peter was not disheartened. He recruited his armies; improved their discipline, and foretold that in the long run the Swedes would teach them how to win. Charles XII. neglected the coast of the Baltic; and Peter took advantage of this to pour troops into Ingria, Carelia, Livonia, and Esthonia. In 1702 he laid the foundation of St. Petersburg on the Neva. Not less than 100,000 lives are said to have been sacrificed in raising the future capital of Russia among the swamps, where Peter ordered its erection, and where, with characteristic pertinacity of purpose and indif-

ference to human suffering, he urged on the completion of the work, though made aware of its perils and difficulties. In 1709 he defeated Charles XII. in the decisive battle of Pultowa; and when the war between Sweden and Russia was ended, by the peace of Nystadt in 1721, Russia gained as part of her dominions, Ingria, Esthonia, and Livonia. Her empire was now firmly planted along the coast of the Baltic; and her influence upon Poland, and other eastern countries of Europe, christendom, was developing itself into paramount ascendancy. Peter was less fortunate in his wars against the Turks. In his campaign on the Pruth in 1711, his army was surrounded by the enemy; and he was only saved by the dexterity of his empress, Catharine, who was with him, and who succeeded in either bribing or persuading the Grand Vizier of the Turks into a negotiation, by which the Russian army was permitted to retire, and peace was restored, though at the price of the restoration of Azoph. In his family Peter experienced heavy sorrows. His first marriage produced mutual unhappiness; and his eldest son, Alexis, thwarted all his projects, and connected himself with the disaffected party, who wished to abolish all Peter's reforms and restore the old Muscovite fashions. Peter compelled his son to renounce all claim to the succession; and tried him before a high court, which condemned him to death. Two days after this, Alexis died in prison. It was said that he sickened when sentenced, and that his illness was natural; but the true manner of his death is a mystery. Peter's second and favorite wife, Catharine, was a Livonian peasant girl, who married a Swedish soldier, and became a prisoner of war to Peter's favorite general, Menzikoff. Menzikoff made her his mistress, but Peter saw her and fell in love with her, and took her as his own. Seven years afterwards (in 1711) he married her, and she ruled Russia as empress after his death. Peter died in 1725. It is easy to collect anecdotes of coarse debauchery, of almost frantic cruelty, and injudicious obstinacy from the acts of his long reign. But, to estimate him fairly, he and his deeds must be taken for all in all,

[Mask of Peter the Great, taken after death.]

and their grand result upon his country's fortunes must be considered. Nor must the debasing disadvantages of his early education be ever forgotten

by those who sit in judgment on his character as a ruler and a man. His last words were, 'I trust that in respect of the good I have striven to do my people, God will pardon my sins.' [E.S.C.]

PETER, king of Castile, surnamed the Cruel, born 1334, succeeded his father, Alphonso XI., 1350, assassinated, after a cruel reign, by Henry, his natural brother, 1369.

PETER I., king of Arragon, or PEDRO, as king of Navarre, reigned 1094-1104. PETER II., succeeded his father, Alphonso II., 1196; having put himself at the head of the Albigenses, he was defeated and killed at the battle of Muret, gained by Simon de Montfort, 1212. PETER III., born 1239, succeeded his father, James I., 1276, and inherited the kingdom of Sicily by his marriage with Constance, daughter of Manfred. He took an active part in the expulsion of the French, and was crowned in Sicily, after the massacre of the Sicilian vespers, 1282; died 1285 after sustaining, gloriously, a war with Charles of Anjou and Philip of France. PETER IV., born 1319, succeeded his father, Alphonso IV., 1336, died after a fruitless war for the sovereignty of Castile, 1387.

PETER I., king of Sicily, same as Peter III. of Arragon. PETER II., son of Frederick I., was crowned 1321, during the lifetime of his father, and succeeded him 1337, died 1342.

Peter I., king of Portugal, born 1320, succeeded his father, Alphonso IV., 1357; died after a beneficent reign, 1367. This prince was secretly married to Inez de Castro, who was murdered by order of his father 1339. PETER II., second son of John IV., born 1648, became regent after the fall of his brother, Alphonso VI., 1667, compelled Spain to recognize the independence of Portugal 1668. On the death of Alphonso, 1683, he received the title of king; died, while effecting the conquest of Estremadura, 1706.

PETER, king of Hungary, reigned 1038-1047.

PETER I., king of the Bulgarians, succeeded his father 927. His reign was troubled with internal dissensions, and wars with the Russians and Greeks; died 970. PETER II., obtained the royal power, in association with his brother, Asan, 1186, and they were both slain about 1195.

PETER I., king of Cyprus and Jerusalem, succeeded his father, Hugh IV., 1361, and was assassinated 1367. PETER II., son and successor of the preceding, died 1382.

PETER I., duke of Brittany, succeeded by his marriage with Alix, daughter of Guy, 1212, and, after her death in 1221, became chief of the league of the great vassals against Blanche of Castile. He went to Palestine 1240, accompanied Louis IX. to Egypt 1248, and died on the voyage home. PETER II., second son of John VI., succeeded his brother, Francis I., 1450, died 1457.

PETER, count of Savoy, surnamed 'The Little Charlemagne,' succeeded his father 1263, d. 1268.

PETER OF ALCANTARA. See above (Saints.)

PETER OF ST. ANDREW, a theologian, philosopher, and historian of the Carmelite order, 1624-1671.

PETER OF BLOIS, an ecclesiastic who settled in England in the reign of Henry II., and is esteemed one of the most learned men of his age, died ab. 1200.

PETER CHRYSOLOGUS. See above (Saints.)

PETER OF CLUGNY, an abbot of that monastery, called also PETER THE VENERABLE, and by his proper name PETER MAURICE, a distinguished theologian and Latin poet. He was born 1092 or 1094, became abbot after Hugh II. in 1122 or 1123, and in 1140 gave shelter to the unfortunate Abelard.

and interceded for him at Rome. Died 1156. His works were published in 1522.

PETER OF COTTONA, a name by which the Italian painter, F. Berettini, is known, 1596-1669.

PETER THE HERMIT, preacher and leader of the first crusade, was born in the eleventh century, and was first known as an officer in the army of the counts of Boulogne, serving in Flanders, about the year 1071. After this he passed some years in the quiet of domestic life, had several children, and on the death of his wife became a professor of religion, and devoted his days to solitude and austere practices. About 1095 he was led by the prevalent feeling of the age to make a pilgrimage to Jerusalem, then in possession of the Turks, and was deeply impressed by the profanation of the holy places, the indignities suffered by the pilgrims, and the general oppression to which the Christian inhabitants of the East were then subject. The same feeling was universal throughout Christendom, and the popes had long cherished the design of an expedition against the Mahomedans, which it only required the enthusiasm of a man like Peter the Hermit to render practicable. Urban II. received him as a prophet, and authorized his mission. He now traversed the greater part of continental Europe, riding on an ass, his head and feet bare, his body clothed in the coarse garment of a hermit, girded round the waist with a rope, and bearing a heavy crucifix in his hand. To understand his success, we must take into account the poverty of the masses, and the alluring prospect of a residence in Eastern lands, the scenes of which were painted in glowing colors by the apostle of the holy war. Thousands of outcasts had always been ready to follow the princes in their marauding expeditions or political wars, and how much more in a war which enlisted the highest sympathies of their nature in its behalf, which received the sanction of the ministers of religion, and was regarded as the will of God! The pope summoned a council, which met at Placenza and Clermont, and making an eloquent appeal to the assembly, was frequently interrupted by their acclamations. He was acknowledged chief of the crusade, and ordered that every one engaged in it should wear a cross of red stuff. Peter, meanwhile, collected a vast body of adventurers, estimated at a hundred thousand souls, from the borders of France and Lorraine, and while Godfrey of Bouillon mustered those of higher rank in a more soldier-like and deliberate manner, proceeded with this fanatic crowd, by way of the Rhine and Danube to the East. Ignorant of the route, and without the means of subsistence, it is fearful to contemplate the disorders and sufferings of such a march. About a third part reached the mountains of Thrace, and Peter himself took refuge in Constantinople, where he awaited the coming of Godfrey of Bouillon. At the same time he induced the emperor Alexis to send troops in aid of his followers, about three or four thousand of whom were rescued. Peter accompanied the army of Godfrey, and was present at the storming of Antioch, and before the capture of Jerusalem addressed the crusaders on the Mount of Olives. He then acted a short time as vicar general for the patriarch of the holy city—the Jesuit Outreman says, as viceroy. The latter part of his life, like the commencement, is wrapt in obscurity. It is not known when he returned to Europe, but he died in a monastery he had founded in the diocese of Liege, 1115. The movement he had commenced continued to agitate Europe for nearly two centuries, and its general effect upon the march of

civilization may be pronounced almost incalculable. [E.R.]

PETER OF ST. LOUIS, a French ecclesiastic of the Carmelite order, known as a poet, about 1626-84.

PETER MAURICE. See PETER OF CLUGNY.

PETER NOLASQUE. See above (Saints.)

PETER OF SICILY, a political negotiator in the service of the emperor Basil in 870. He wrote a History of the Manichæans, published 1604.

PETER THE VENERABLE. See P. OF CLUGNY.

PETER, WILLIAM, British consul at Philadelphia, an accomplished scholar and poet. He was the author of a translation of the Prometheus of Æschylus. Died at Philadelphia, 1853.

PETERBOROUGH, earl of. See MORDAUNT.

PETERKIN, ALEXANDER, son of a Scottish minister, and known of late years as a miscellaneous writer, was born in 1781. He was educated as a solicitor, and, in 1843, was engaged professionally for the Strathbogie clergymen—in the struggle which led to the disruption in the Scottish national church. Died 1846.

PETERS, BONAVENTURA, a Flemish painter, famous for his storms and shipping, 1614-1615. JOHN, his brother and pupil, 1625-1677.

PETERS, C., a German painter, 1808-1830.

PETERS, C., a learned Eng. divine, died 1777.

PETERS, F. L., a Flemish painter, 1606-1654.

PETERS, G., a Dutch painter, born 1580.

PETERS, HUGH, an English Jesuit, known as the counsellor and confessor of James II.

PETERS, HUGH, a disreputable character who connected himself with the English republican party as a pamphleteer and pulpit demagogue. He was born in Cornwall 1599, educated at Cambridge, and figured successively as an actor, a minister in the Church of England, and a preacher among the independents. Executed 1660.

PETERS, RICHARD, an American revolutionist, lawyer, and judge of the District Court of Pennsylvania, was born in Philadelphia, 1744. In 1776 was secretary of the board of war. His admiralty decisions have become established precedents in that branch of law. He was the author of various publications upon subjects connected with agriculture. Died 1828.

PETERS, WILLIAM, a minister of the Church of England, best known as an artist, died 1814.

PETERSEN, H., a Swiss minister, died 1820.

PETERSEN, JOHN WILLIAM, born at Osnaburg 1649, and pastor at Hanover, became celebrated about 1692 for his prophetic announcements. He was then deposed, and died in obscurity. His wife, JEANNE ELEANORA DE MERLAN, partook in his enthusiasm, and published his life.

PETERSEN, P. N., a Ger. musician, 1761-1830.

PETHION DE VILLENEUVE, JEROME, a Girondist leader of the French revolution, was the son of an attorney at Chartres, and was himself an advocate when chosen deputy to the *Tiers Etat* of the Estates-General. His character placed him in a political situation between the Girondists and the Jacobins, but his political and philosophical creed was the same as Brissot's, and he held it sincerely and implacably. He was one of the most zealous parties to the propagation of the 'Rights of Man' as the basis of a constitution, and it was at his instance that the Jacobin Club was reorganized—which led to the foundation of the Cordeliers, and the separation of the more violent members. The nation at this time was with the moderate party, and the influence of Lafayette was only just on the wane. Pethion profited by it, as one of the most practical

men in his party, and was successively president of the National Assembly, president of the Criminal Tribunal, and mayor of Paris. In the latter function he succeeded Bailly, November, 1791, and polled twice as many votes as Lafayette. On the famous 20th of June, 1792, when the mob of Paris compelled the king to put on the red cap, Pethion and Louis exchanged angry words; the next day, however, the mayor addressed a proclamation to the people calling upon them to defend the constitution and the king, and to respect his person. He maintained his position as mayor of Paris, after the victory of the Marseillaise on the 10th of August, and the dreadful massacre of September, but found it impossible to prevent the excesses on that occasion. Returned to the National Convention, he was unanimously elected its first president, and voted for the king's death, but pronounced in favor of delay. From this time he was identified with the Girondists by the followers of Robespierre, and included in the proscription of that body on the 31st of May 1793. He was among the few who escaped the guillotine to meet a more miserable fate. Having fled with Buzot and Salles to the department of Calvados, they made a fruitless attempt to raise the populace, and were obliged to hide in the woods. Whether they put an end to their own existence, or were starved to death, is not known, but the remains of Buzot and Pethion were found by the gleaners in a corn-field gnawed by wolves. [E.R.]

PETION, ALEXANDER SALIES, president of the republic of Hayti, was a man of color, born free at Port-au-Prince, 1770, and was educated at the military school of Paris. He served with distinction in the French army, and after the expulsion of the English, was an active party in the civil wars of the island. In 1804 Dessalines became chief of the infant republic, and having made himself emperor, was killed in October, 1806. His successor was Christophe, who also assumed the kingly title, and it was against this latter that Petion obtained his most signal victory on the first of January, 1808, a year after his own election as president. This success fully established his authority as chief of the republic, and he retained the presidency till his death in 1818, when he was succeeded by his friend General Boyer.

PETIS, FRANCIS, a learned French Orientalist and historian, 1622-1695. His son, FRANCIS PETIS DE LA CROIX, like him, a great oriental scholar, but also a traveller in the East, and his successor as royal interpreter, 1653-1713. A. L. MARIE, son of the latter, professor of Arabic in the Royal College, 1698-1751.

PETIT, A., a French medical writer, 1718-94.

PETIT, A. T., a French physician and writer on experimental philosophy, 1791-1820.

PETIT, F. P. DE, a Fr. naturalist, 1664-1741.

PETIT, JEAN LOUIS, a celebrated French surgeon, born at Paris on the 13th of March, 1674, and died in that city on the 20th of April, 1750, aged 76. Petit enjoyed a deservedly great reputation during his lifetime, and was undoubtedly one of the founders of modern French surgery. He was remarkable for his professional enthusiasm and industry; and his writings are still held in high estimation. The first edition of his work on the Bones, was published at Paris in 12mo, in 1705; but, in 1758, it was enlarged to two volumes. His treatise on Surgical Diseases was a posthumous work, and was published by his pupil, Dr. Lesne, in 1774, twenty-four years after the author's death. [J.M.C.]

PETIT, M., an advent. traveller, died 1815.

PETIT, M. A., a French surgeon, 1766-1811.

PETIT, P., a physician, distinguished as a writer on physiology, and Latin poet, 1617-1687.

PETIT, P., a dist. mathematician, 1594-1677.

PETIT, S., a philolo. and theolog., 1594-1643.

PETIT-DIDIER, MATTHEW, a learned French prelate, a great friend and advocate of ultramontanism, and author of critical, historical, and chronological dissertations on the Scriptures, 1659-1728. His brother, JOHN JOSEPH, a Jesuit and theologian, 1664-1756.

PETIT-THOUARS, ALBERT DU, a French botanist, author of 'Botanic Miscellanies,' died 1831.

PETITOT, OL. B., director-general of the Paris university, author of several tragedies and translations, 1772-1825.

PETITOT, JOHN, an unrivalled painter in enamel, was born at Geneva, in 1607. He visited England, where he was greatly patronized by Charles I.; after whose death he went to France, and was employed by Louis XIV. He painted the face and hands, and his brother-in-law, Bordier, added the drapery. Died 1691.

PETIT-PIED, NICHOLAS, a learned French canonist, about 1630-1705. His nephew, of the same name, a doctor of the Sorbonne, and a very voluminous writer in favor of Jansenism, 1665-1747.

PETIT-RADEL, L. F., a distinguished French architect, 1740-1818. His brother, PHILIP, a surgeon and Hellenist, 1749-1815. A third brother, L. C. FRANCIS, an archæologist, 1756-1836.

PETITZ, J. RAIMOND DE, author of a 'Library of Amateur Artists,' about 1715-1780.

PETIVER, JAS., surgeon to the Charter House, London, distinguished as a botanical writer, d. 1718.

PETRÆUS, T., a Danish Orientalist, died 1673.

PETRARCH, FRANCESCO, was born at Arezzo in Tuscany in 1304. His father, a Florentine notary, had been exiled two years before, in the same disturbance which drove out the poet Dante; and he soon left Italy for Avignon, where the papal court then resided. The son was educated there and at Montpellier, and then sent to study law at Bologna. Though Petrarch certainly loved the *Æneid* more than the Pandects, and copied ancient manuscripts more willingly than law papers, yet the subsequent course of his public life proves that he did not neglect professional pursuits, and that he prepared himself for being a useful man of business. Returning to Avignon soon after he became of age, he found himself in possession of a small inheritance, and indulged for some years in an alternation of classical studies and political composition, with such gaiety (sombre, perhaps, but not the more pure on that account) as the clerical court offered. In the year 1327 he conceived an attachment to an Avignonesse lady, young but already married. His attentions to her were treated much as a matter of course; the admirer was certainly never admitted even to the most innocent stage of modern cicisbeism: there appears to have been at no time much intercourse between the parties; and we do not know with certainty so much as the lady's real name. She became famous in her lifetime, and is still celebrated, as the 'Laura' of the verses in which Petrarch sang her praises: but his passion does seem to have been little more than a flight of imaginative sentiment, remarkable only for the length of its endurance, and for the genius of the person by whom it was entertained. About 1338 he retired for two or three years to dwell in the beautiful valley of Vaucluse, near Avignon. He himself said that his withdrawal to the retreat which he immortalized, was caused by

no reason more sentimental or poetic than his disgust with the licentiousness of the papal court, and the disappointment of the hopes of perferment which the pope had held out to him. Long before this time his talents and accomplishments had procured for him not only distinguished patronage, but frequent and active employment. He now speedily quitted Vacluse for Italy, where he became the confidential friend and diplomatic agent of several sovereigns, and skilfully executed missions not only in Italy, but in France and Germany. Though he never took orders, his employers rewarded him by ecclesiastical benefices in the north of Italy; and his longest residences were at Parma, Milan, Padua, and Venice. In 1370, when his health was already failing, through attacks of palpitation and epilepsy, he left Padua for the neighboring village of Arquà, seated among the lovely Euganean Hills. There he built a house, still preserved, but was hardly ever free from illness till his death in 1374. Petrarch, whose life was thus active, is immortal in the history of literature in virtue of more claims than one. He is placed as one of the most celebrated of poets in right of his 'Rime,' that is, verses in the modern Italian tongue, of which he was one of the earliest cultivators and refiners. Celebrating in these his visionary love, he modelled the Italian sonnet, and gave to it, and to other forms of lyrical poetry, not only an admirable polish of diction and melody, but a delicacy of poetic feeling which has hardly ever been equalled, and a play of rich fancy which, if it often degenerates into false wit, is as often delightfully and purely beautiful. But, though Petrarch's Sonnets, and Canzoni, and 'Triumphs,' could all be forgotten, he would still be honored as one of the benefactors of European civilization. No one but Boccaccio shares with him the glory of having been the chief restorer of classical learning. He was himself a voluminous Latin writer, both in prose and verse; and his fame as a poet in his own day, and his coronation in the Roman capitol in 1341, rested on his celebration of the second Punic war in his epic poem 'Africa.' But his greatest merit lay in his having

[Tomb of Petrarch.]

recalled attention to the higher and more correct classical authors; in his having been an enthusiastic and successful agent in reviving the study of the Greek tongue; and in his having been, in his travels and otherwise, an indefatigable collector and preserver of ancient manuscripts. To his care we owe copies of several classical works, which, but for him, would, in all likelihood, have perished. [W.S.]

PETRE. SIR WILLIAM, a native of Devonshire,

was educated at Exeter College, Oxford; elected fellow of All Souls in 1523, and became principal of Peckwater Inn. He was employed by Thomas, lord Cromwell, in a visitation of the monasteries; became master of the requests, was knighted, made one of the secretaries of state, and was appointed treasurer of the court of first-fruits. He was a liberal benefactor to Exeter and All Souls' Colleges, and died in 1572.

PETRI, B., a professor of Brabant, died 1630.

PETRI, C., a Danish divine, 16th century.

PETRI, SUFFRID, historiographer of the states of Friesland, secretary to Cardinal Granvella, (see WILLIAM I. OF NASSAU,) and professor of law at Cologne, author of historical and philological works, died 1597.

PETRI, or PETERSON, LAURENCE, one of the three principal Swedish reformers, first protestant bishop of Upsala, and a theological writer, 1499-1753. His brother, OLAVE, also a reformer, whose vehement addresses almost produced a civil war, author of 'Memoirs,' 1497-1562. A third of the name, JONAS PETRI, bishop of Linköping in the 17th century, was author of a Latin and Swedish dictionary, published 1640.

PETROF, WASSILJ PETROWITSCH, a famous Russian poet and philologist, appointed her reader and councillor of state by Catharine, 1736-1799.

PETRONI, R., an Italian cardinal, died 1314.

PETRONIUS, TITUS, surnamed ARBITER, a Roman author, notorious for his licentiousness and obscenity, was born at Marseilles, and lived in the court of Nero. He was, for a time, the favorite of the emperor, who made him master of his voluptuous banquets and revelries. But he finally fell a victim to the suspicions of the tyrant, and was condemned to death, but he avoided the ignominy of a public execution by opening his veins, A.D. 66.

PETRUCCI, PANDOLPH, a citizen of Sienna who obtained the sovereign power, and died 1512.

PETTUS, SIR JOHN, a member of parliament, and deputy-governor of the royal mines, author of some professional and other works, died about 1690.

PETTY, SIR WILLIAM, son of a clothier in Hampshire, and founder of the Lansdowne family, was born 1623, and being educated as a physician, became, in 1650, professor of anatomy at Oxford. His talents, however, were of the most versatile description, and he had the happy gift of turning them to some practical account in every way that promised to be a source of emolument; not satisfied with teaching anatomy and chemistry, he became Gresham professor of music; and as to inventions, a copying machine to write two letters at once, and a double-bottomed ship to sail against wind and tide, show what he was capable of. In 1652 he was appointed physician to the army in Ireland, to which he added the office of contractor for surveying the forfeited lands, one of the commissioners for their division, clerk to the council, and secretary to the lord-lieutenant, Henry Cromwell. With the wealth thus amassed, he became a member of parliament in the time of Richard Cromwell; and as he succeeded in making his peace at the restoration, his lands were confirmed to him, with the honor of knighthood in addition, and the office of surveyor-general of Ireland. Even the fire of London, which destroyed the fortunes of so many, only provoked Sir W. Petty to fresh speculations, by which he recovered his losses. He died 1687, leaving great wealth to his successors, and numerous tracts on economy, especially 'Political Arithmetic,' 'Taxes and Contributions,' and other subjects growing out of his knowledge of

Ireland. For his descendant, the celebrated statesman, see **SHELBURNE**.

**PETTYT**, or **PETYT**, **WILLIAM**, keeper of the Tower records, author of writings on the Ancient Constitution of Parliament, 1636-1707.

**PEUCER**, **G.**, a Ger. mathematician, 1525-1602.

**PEUERBACH**, **G.**, an Austr. astron., 1423-61.

**PEUTEMAN**, **P.**, a Dutch painter, 1608-1658.

**PEUTINGER**, **C.**, a Gr. antiquar., 1465-1547.

**PEYER**, **J. C.**, a Germ. anatomist, 1659-1712.

**PEYMANN**, **HENRY ERNEST DE**, a Danish general, commander of Copenhagen during its bombardment by the English in 1807. He was tried by his countrymen for signing the capitulation, and condemned to death,—a punishment which was commuted to a long imprisonment; died 1820.

**PEYRARE**, **F.**, a Fr. mathematic., 1760-1822.

**PEYRE**, **MARIE JOSEPH**, a French architect, 1730-1785. His brother, **ANTOINE FRANCOIS**, a painter and architect, 1739-1823.

**PEYRERE**, **ISAAC DE LA**, a French protestant, the *protégé* and librarian of the prince of Condé, author of a curious work on the 'Preadamites' and the 'Restoration of the Jews,' 1594-1676. His brother, **ABRAHAM**, a juriconsult, died 1704.

**PEYRON**, **JEAN FR. PIERRE**, an historical painter, and director of the Gobelins manufacture, 1744-1815. His brother, **J. FRANCOIS**, known as an author, 1748-1784.

**PEYRONIE**, **F. DE LA**, a Fr. surg., 1678-1747.

**PEYROUSE**. See **LAPEROUSE**.

**PEYSSONNEL**, **CHARLES DE**, a French antiquary and consul of Smyrna, author of *Memoirs of the Kings of the Bosphorus*, &c., 1700-1757. His son, who succeeded him as consul, was also a distinguished historical and antiquarian writer on the same countries, 1727-1790. His brother, **JOHN ANTHONY**, was appointed physician and naturalist to the island of Guadaloupe in 1726, and was the first to write on the production of coral according to the received theory.

**PEZ**, **BERNARD**, a learned Benedictine of Austria, 1683-1735. His brother, **JEROME**, 1685-1762.

**PEZAY**, **A. F. J. MASSON**, Marquis De, a French historical writer, 1741-1777.

**PEZENAS**, **ESPRIT**, a French Jesuit, known as a mathematician and astronomer, 1692-1776.

**PEZRON**, **PAUL**, a Bernardin, and doctor of the Sorbonne, born at Hennebon, in 1639. For a time he held the abbey of Charmoy, which he resigned to pursue his studies, and died in 1706. He was the author of several able works on theological and antiquarian subjects, in one of which he endeavors to support the chronology of the Septuagint against that of the Hebrew Bible.

**PFAFF**, **J. C.**, a Lutheran theologian of Wurtemberg, 1631-1720. His son, **CHRISTOPHER MATTHEW**, a voluminous protestant writer, 1686-1760.

**PFAFFRAD**, **G.**, a German philosopher, d. 1622.

**PFANNER**, **T.**, a German archivist, 1641-1717.

**PFEFFEL**, **J. CONRAD**, a native of Baden, distinguished as a juriconsult and diplomatist, 1684-1738. **CHR. FREDERIC**, his eldest son, a learned writer on public law, 1726-1807. **THEOPHILUS CONRAD**, young brother of the latter, a dramatic writer, poet, and literateur, 1736-1809.

**PFEFFERCORN**, **JOHN**, a converted Jew, who endeavored to persuade the emperor Maximilian to burn all the Hebrew books except the Bible, as containing the principles of magic and other dangerous matter, died after 1517.

**PFEIFFER**, **AUGUSTUS**, a learned orientalist, was born at Lauenburg, in 1640. He professed the

eastern languages at Leipsic, and was superintendent of the churches in Lubeck, where he died in 1698. Among his works are, '*Pansophia Mosaica*,' '*Critica Sacra*,' '*Sciagraphia Systematica Antiquitatum Hebræorum*,' &c.

**PFEIFFER**, **PFIFFER**, or **PFYFFER**, **FRANCIS LOUIS**, a Swiss general in the French service, was born at Lucerne, in 1716. After being 50 years in the army, he retired to his native country, and devoted his leisure hours to the construction of a model of the cantons of Underwalden, Schweitz, and Uri, 22 feet by 12, in which every object was laid down with the greatest precision. Died 1802.

**PFENNINGER**, **M.**, a Swiss designer and engraver, 1739-1810. **HENRY**, of the same family, a painter and engraver, who executed the figures for Lavater, born 1749.

**PFIFFER**, or **PFYFFER**, **L.**, a Swiss colonel in the service of France, 1530-1594.

**PFISTER**, **A.**, a German printer, died 1462.

**PFLUG**, **JULIUS**, an Italian prelate, died 1564.

**PFNITSING**, **M.**, a poet of Nuremberg, 1481-1535.

**PFUGUER**, **M. A. D.**, a Swiss poet, 1777-1824.

**PHÆDON**, a Greek philosopher, who studied under Socrates, and subsequently founded a school of philosophy at Elis, since known as the Eleatic. Plato gave his name to one of his Dialogues.

**PHÆDRUS**, **LUCIUS**, a Roman slave freed by Augustus, and known as the author of *Fables*, first discovered to modern literature in 1596 at Rheims. In the reign of Tiberius he suffered from the tyranny of Lejamas. His fables are written in iambic verse with remarkable purity.

**PHAER**, **THOMAS**, a Welch poet, died 1560.

**PHALARIS**, a native of Crete, whose cruelty, and the horrid instrument with which he wreaked his vengeance on those who fell under his displeasure, have become proverbial. In 571 B. C. he made himself master of Agrigentum, in Sicily, where he was guilty of horrible cruelties. Among other instruments of destruction, he caused a hollow brazen bull to be made, so contrived that when a fire was kindled under the body, the cries of the unhappy victim within resembled the roarings of the animal it represented. Phalaris, after commending the work, ordered Perillus, the artist, to be the first to make trial of it. After a sanguinary reign of eight years, the citizens at length seized the tyrant, and with a severe but just retaliation consumed him by a slow fire in his own bull, B. C. 563.

**PHARAMOND**, a half-fabulous personage, supposed to have been the first king of France, and to have reigned about 418 or 420. The Salic law is attributed to him. He was probably a chief of the Franks.

**PHARNACES**, the *first* of the name, king of Pontus, succeeded his father, Mithridates the Great, about 185 B. C., died 157. The *second*, born 97 B. C., became king of Bosphorus 64, and, after reconquering Pontus, was killed in battle 47.

**PHAVORINUS**. See **FAVORINUS**.

**PHELIPEAUX**, **JOHN**, a French theologian and historian of Quietism, died 1708.

**PHÉLIPPEAUX**, **A. LE PICARD DE**, a French officer of artillery, the fellow-pupil and rival of Buonaparte, was born in 1768. Having quitted France in 1791, he made a campaign the following year with the corps of emigrants under the French princes. In 1795 he re-entered France to organize a royalist insurrection in the central provinces, when he took Sancerre, and for some time maintained his position in Berri. He afterwards went to Paris,

where he effected the liberation of Sir Sidney Smith from the prison of the Temple, and, accompanying him to England, obtained the rank of colonel in the English service. He assisted Sir Sidney in the defence of Acre against Buonaparte; but died of fatigue shortly after the raising of the siege, in May, 1799.

PHELIPPEAUX, J., a Jesuit, 1577-1643.

PHELYPEAUX, RAIMOND BALTHASAR, Marquis De, French governor of Canada, died 1713.

PHERECRATES, a Greek poet, 5th cent. B.C.

PHERECYDES, a Greek philosopher, from whom Pythagoras is said to have acquired his doctrine of the Metempsychosis, 6th century B.C.

PHERECYDES, a Greek historian, 5th c. B.C.

PHIDIAS, a Greek sculptor and the most celebrated artist of antiquity, was the son of Charmidas, and the pupil of Azeladas of Athens, where Phidias was born, about 490 B.C., or even a year or two later, for according to this supposition he must have already reached the mature age of fifty before the execution of any of his most celebrated works, as the Minerva and other sculptures of the Parthenon, and the Olympian Jupiter. Phidias was the greatest ornament of the age of Pericles, and became eminent at Athens about 450 B.C.; the latter portion of the period of Pericles, however, 444 to 430, defines, probably in the best manner, the exact period of Phidias, for his greatest triumphs were achieved during his administration of the affairs of Athens. Great patrons have generally found great instruments to carry out their schemes, or the patron is himself developed by the opportunity: in some respects both positions are true, but the former is the more easily explained: the magnitude of an undertaking regulates and develops accordingly the faculties of those who undertake. Thus Pericles, Julius II., and Ludwig I. of Bavaria, all found artists of the highest genius ready to accomplish all their desires. Pericles appointed Phidias superintendent of public works. The Parthenon was completed 438 B.C., the year also in which Phidias dedicated his colossal statue of Minerva in ivory and gold, placed in the temple; the architecture was the work of Ictinus. In the following year he commenced, aided by Colotes of Paros, the great sitting colossus of Jupiter at Olympia, in Elis, also of ivory and gold; this was completed in the year 433, and was considered one of the seven wonders of the ancient world. (See Quakemere de Quiney, *Le Jupiter Olympien*, &c.) The great chryselephantine works, that is of ivory and gold, are the most remarkable monuments of which the ancient records give us any account; there seems to have been no limit to the magnificence or art-glory to which the anthropomorphic worship of the Greeks might not lead them. These gigantic images, from 40 to 60 feet in height, apparently of solid ivory draped in gold, with all necessary enrichments in color, must have more than realized the grandest notion of a human god that any of the Greek devotees can have brought to their shrines. The unparalleled height to which statuary has attained among the ancient Greeks is, therefore, to be attributed as much to the utilitarian end, the honor of religion and the stability of the priesthood, as to any æsthetic refinement, though this too did exist among the Greeks perhaps in a higher degree than any other people. The chryselephantine sculpture was the natural result of the Greek polychromy; once established the system of coloring images, the costliness must necessarily enter into the material as well as the external decoration of the image; thus we find these great images gradually progressing from rude wood and stone, to marble, and to bronze,

and finally (ostensibly) to ivory. The ivory was, however, only a coating, the core of the statue was wood, the gold was real. Phidias executed six of these great works, but this of Elis cost him his life, for he was accused of having embezzled the gold given by the Elians for the draperies, &c. of the statue, and upon this accusation cast into prison, where he died within the year, 432 B.C. The accu-

[Statue of Jupiter by Phidias.]

sation appears to have been found to be quite groundless; and in honor of the memory of the great statuary, the charge of the image was granted as an heir-loom to the family of Phidias, and when Pausanias visited Elis, 600 years afterwards, the descendants of Phidias still had the care of it. Another account states that it was in Athens, after his return from Elis, that he died, and that the charge in question related to the gold of the Minerva, which Pericles himself had taken off, and ordered to be weighed, and found exact; that he was finally committed on a charge of impiety for carving his own portrait on the shield of Minerva, and that he died during imprisonment for this offence. The Olympian Jupiter adorned Elis for about eight centuries, it was then removed to Constantinople, by the emperor Theodosius, and was either lost at sea, or destroyed in the fire of the Laudeion, 475 A.D. In carrying out so many and extensive works, Phidias must necessarily have had many assistants. His principal scholars were Agoracritus, Alcamenes, and Colotes. Such were his assistants probably in the extensive sculptures of the Parthenon, now in England, and known as the Elgin marbles; brought from Athens by Lord Elgin in 1803, and purchased by the British government in 1816. We have in these wonderful works adequate testimony of the deserved reputation of Phidias, and quite sufficient to show that the arts of Greece, at least of the time of Pericles, cannot be too highly esteemed. We have in these marbles the best exposition of the ideal, and a perfect illustration of the æsthetic element of style as distinct from mere representation or imitation. The so-called Theseus, the Ilissus, the Metopes, and the Panathenaic frieze all exhibit the most perfect ideality of form, at the same time of a grand generic character. The ideal or generic development of these sculptures can only have resulted from the long experience of centuries, or from extraordinary circumstances, but partly from the combination of both. All healthy bodies, subject to similar exercise, would most probably assume much the same character: the athletic games of the Greeks, common

and popular, gave their artists such opportunities of viewing the naked form in all its perfection, that the general excellence of their sculpture is not surprising. In the Elgin marbles we have doubtless all the several beauties of the athlete combined in the individual, yet so modified as altogether to obviate the sense of any special individuality, leaving only the impression of the perfect human form, illustrating its general attributes themselves in all their wonderful versatility and perfection, without suggesting for a moment, the notion of a limited individual fitness or quality; always excepting when such special limit or quality is not the specific object of the individual representation, as in the Farnese Hercules, the type of muscular strength. This is the ideal in its general and special development, and which we find invariably well illustrated in Greek sculpture, but nowhere with more refined grandeur than in the works of Phidias, as exemplified in the invaluable Elgin marbles.—(Müller, *Life and Works of Phidias de Phidiæ vita et operibus*, &c., Göttingen, 1827. A very full account of Phidias and his works may be found in the *Dictionary of Greek and Roman Biography*, edited by Dr. Smith.) [R.N.W.]

PHILASTER, an Italian prelate, 4th century.

PHILES, MANUEL, a Greek poet, 14th century.

PHILELPHUS, FRANCIS, a celebrated Italian philologist and state secretary, 1398–1481.

PHILEMON, a Greek poet, 4th century B.C.

PHILEMON, a Greek grammarian, 12th cent.

PHILIBERT, the first of the name, duke of Savoy, succeeded his father, Amadeus IX., 1472, died 1482. The second, succeeded his father, Philip II., 1497, died 1504.

PHILIBERT-EMANUEL, son of Charles Emanuel, duke of Savoy, grand prior of Castile and Leon, and grand admiral of Spain, died 1624.

PHILIDOR, ANDRE, born at Dreux in 1726, was the son of a musician, whose real name was MICHAEL DANICAN, but who, for the excellence of his performances upon the hautboy was named Philidor by the king of France. The young Andre, in childhood, entered as page in the band of the king of France, then under the direction of the chapel-master Campra. After having left the situation of page, Philidor settled in Paris, where he supported himself from his income as teacher and copier of music. Besides his musical talent, he had gained such a reputation as a chess player, that he was induced to travel; accordingly, in the year 1745, he left Paris for Holland, Germany, England, &c. During his travels he greatly improved his musical taste. In 1753 he was in England, when he set Dryden's Ode to St. Cecilia to music. He had while here devoted his attention principally to chess; and he gained extended fame from having published his analysis of the game, which is still referred to as an authority. On his return to France, in 1754, he again resumed his musical studies, and produced music to a dramatic piece, which was performed with great success in 1759. This work laid the foundation of his musical reputation. Philidor, along with Duni and Monsigny, is regarded as one of the founders of the modern French comic opera. After having produced about twenty operas at the Opera Comique, he came to London in the year 1779, where he produced the music to Horace's 'Carmen Seculare,' which is esteemed as his best work. He died in London in 1795. [J.M.]

PHILIP, the name of three saints:—1. The apostle, who is supposed to have preached in Phrygia, and died at an advanced age. 2. The deacon chosen by the apostles who preached at Cæsarea,

where he received Saint Paul 58, died 70. 3. PHILIP OF NERI, an Italian ecclesiastic, founder of the oratory, &c., 1515–1595.

PHILIP, son of Herod the Great, and of a woman named Cleopatra, obtained from Augustus the rank of tetrarch, and governed his states with great wisdom from B.C. 4 to A.D. 33. After his death his states were reunited to Syria.

PHILIP, king of Syria, son of Antiochus VIII., dethroned by Tigranes B.C. 80, died 57.

PHILIP I., king of Macedon, reigned in that obscure period of its history when it was regarded as a barbarian territory by the Greek states, about B.C. 400. Nothing worthy of notice is recorded of him. PHILIP II., see next article. PHILIP III., a natural son of Philip II., reigned seven years after the death of Alexander the Great, and was killed by order of Olympius 316 B.C. He is called Philip Archidæus. PHILIP IV., succeeded his father Cassander on the throne of Macedon B.C. 296, and died 295. PHILIP V., son of Demetrius III., succeeded at the age of three years B.C. 233, his uncle, Antigonus Doson, being guardian. After the battle of Cannæ he entered into a treaty with Hannibal, and thus brought the Romans upon the stage of Grecian affairs. He was totally defeated 197, and though he obtained reasonable terms, left the struggle to his son Perseus. Died B.C. 179.

PHILIP II., by whose valor and genius the little state of Macedon was raised to the supremacy over all Greece, was the third son of Amyntas, and was born in 383 or 382 B.C. He succeeded his elder brother, Perdiccas, in the first place as guardian of his infant son, but soon after as sovereign, in the twenty-third year of his age, B.C. 360; the existence of rival claimants to the crown, and the exterior evils with which the state was threatened, rendering his usurpation, if it may be called so, acceptable to the whole people. Philip had been detained at Thebes as a hostage from his fifteenth to his eighteenth year, and was thoroughly versed in the tactics of Epaminondas, with whose father he had lodged; besides which, his brother, Perdiccas, had intrusted him with a government in Macedonia, and had allowed him to organize troops. His chief military arm was the afterwards famous Macedonian phalanx, a force organized by himself—the materials he drew upon being a mountain peasantry accustomed to poverty and toil, without cities or even fixed habitations to render peace more desirable than war to them. Athens and Thebes had reached their highest vigor when Philip came to the throne, but the latter had lost her presiding genius in Epaminondas, and the former was seriously weakened by the 'social war' which now broke out, and which raged from 358 to 355 B.C. Philip took advantage of this troubled period to possess himself of Amphipolis, which gave him access to the gold mines of Mount Pangæus, soon a source of immense revenue to him, and the reason of his founding the new town of Philippi. The 'sacred war' carried on by the Amphietyonic council against the Phocians, gave the Macedonians another great opportunity for stepping in as armed arbitrators, and with the steady purpose in view of humbling the power of Thebes and Athens. After the capture of Methone—the last possession of the Athenians on the Macedonian coast—between 354 and 352, Philip marched into Thessaly at the head of 20,000 men, gave himself out as the champion of Delphi, and adorned his soldiers with laurel, which they plucked in the vale of Tempe. He was now joined by the famous Thessalian cavalry, and having become

maste. of Thessaly in 352, he endeavored to force the pass of Thermopylæ, but was repulsed by the Athenians; Philip, however, compensated himself by equipping a navy to harass the Athenian commerce. From 349 to 347 he became victor in the Olynthian war, which made him complete master of the Chalcidian peninsula and doubled his power. The terror of his name provoked the 'Philippics' of Demosthenes, who endeavored to rouse the people of Athens to form a general league against him—instead of which, each party in the sacred or Phocian war was anxious to obtain his succor against the others. This state of things led to embassages, the members of which, with the exception of Demosthenes, were cajoled or bribed by Philip into a shameful peace, which in 346 left him master of the Phocian cities, of the pass of Thermopylæ, and in the position of general to the Amphictyon council. In the latter capacity he was really the crowned protector of the Grecian faith, and in the spirit proper to his office he at once marched into Greece, but instead of acting against the profane Locians, he seized the city of Elatea, and began to fortify it. Demosthenes now exerted all his eloquence and statesmanship to raise the ancient spirit of Grecian independence, and a powerful army was soon in the field, but being without able or patriotic commanders was defeated at the decisive battle of Chæroneia in August, 338 B.C. After this last struggle for freedom, Philip was acknowledged chief of the whole Hellenic world by all the states except Sparta, and in 337 he summoned a congress at Corinth to organize an expedition against Persia. While preparing for this enterprise he repudiated his wife, Olympias, mother of Alexander the Great, and the same year espoused Cleopatra, niece of Attalus, who bore him a son, looked upon as the rival of Alexander in the succession. These circumstances led to dissensions at court, and in the year 336 B.C. to the death of Philip, who was murdered at the instigation of Olympias while engaged in a religious festival. He had several other wives or mistresses, and was addicted to intemperance; but as a king, for political and military genius, for persuasive eloquence, the general spirit of humanity, and for courage in the field, the name of Philip of Macedon may vie with any in history. At the time of his death the first division of his army had passed into Asia under the conduct of Attalus, and the young Alexander had already distinguished himself as commander of one wing of his army at the battle of Chæroneia. [E.R.]

PHILIP, emperor of Rome, was born in Arabia about 204, and having entered into the military service of the Romans, became prætorian præfect 243. The emperor Gordian was compelled to receive him as a colleague on the throne by the army which had conquered Sapor, king of Persia; and in the following year, 244, Philip assumed the whole authority by putting his rival to death. He was killed in battle by the soldiers of Decius 249.

PHILIP, emperor of Germany, was the second son of Frederick Barbarossa. He was born 1178, became king of Suabia and Tuscany after the death of his father 1190, and emperor after the death of his brother, Henry VI., 1198. He was assassinated 1208, and succeeded by Otho IV.

PHILIP I., king of France, son of Henry I. and Anne of Russia, was born 1052, and succeeded to the throne under the guardianship of Baldwin V., count of Flanders, 1060, died, after a troubled reign, mixed up with the affairs of William the Conqueror, 1108. PHILIP II., surnamed AUGUSTUS, son of

Louis VII. and of Alix, daughter of Thibault, count of Champagne, was born 1165, succeeded his father 1180, accompanied Richard Cœur de Lion to the Holy Land 1190, invaded Normandy during Richard's captivity 1193, confiscated the possessions of King John in France, after the supposed murder of Arthur 1203, prepared to invade England at the instance of the pope 1213, turned his arms against Flanders and gained the celebrated battle of Bouvines 1214, died 1223. Philip Augustus was one of the ablest princes that ever reigned in France, both as a commander and an administrator. PHILIP III., called the *Hardy*, was the son of Louis IX. and Margaret of Provence. He was born 1245, and succeeded his father 1270. In 1271 he possessed himself of Toulouse on the death of his uncle, Alphonso; in 1272 he repressed the revolt of Roger, count of Foix, and in 1276 sustained a war against Alphonso X., king of Castile. The invasion of Sicily by Peter of Arragon, and the massacre of the French, known as 'the Sicilian vespers,' caused him to make war against that prince, in the course of which he died, 1285. PHILIP IV., called the *Fair*, or Handsome, son of the preceding by his first wife, Isabella of Arragon, was born 1268, and succeeded his father 1285. He was engaged in wars with the English and Flemings; and in a quarrel with the pope, in the course of which he was excommunicated. In 1303 the estates-general were first assembled. In 1312 he suppressed the Templars (see *MOLAI*); died 1314. He was an able but most despotic sovereign. PHILIP V., called the *Long*, second son of the preceding, was born about 1293, and succeeded to the throne in virtue of the Salic law, which excluded the daughter of his brother, Louis X., who died 1316. In his reign a cruel persecution began against the Jews, in the midst of which he died, 1322. PHILIP VI., called *De Valois*, was son of Charles, count of Valois, a younger son of Philip the Hardy. He was born 1293, and succeeded Charles le Bel 1328. In his reign occurred the wars with Edward III. of England, who claimed the French crown as grandson, by his mother, of Philip the Fair. Philip lost the battle of Cressy in 1346, when 30,000 men, and the chief of his nobility, were slain. He died during a truce with the English, 1350.

PHILIP I., among the Spanish kings, was the son of Maximilian I., emperor of Germany, by Mary of Burgundy. He was born 1478, and on the death of his mother, 1482, became sovereign of the seventeen provinces of the Netherlands, the right of which he transmitted to his posterity of the house of Austria. In 1496 he married Joanna, daughter of Ferdinand and Isabella, and in 1502 the young couple were acknowledged lawful successors to the crown of Spain. In 1506 they were declared joint king and queen of Castile, and Philip died the same year. He was the father of Charles V. PHILIP II. (next article). PHILIP III., son of Philip II. and Anne of Austria, born 1578, succeeded his father 1598, died 1621. PHILIP IV., son of Philip III. and Margaret of Austria, was born 1605, and succeeded his father 1621. Besides a war with the Dutch, he had to contend against the league formed against the house of Austria by Richelieu, by which he lost many provinces. In 1640 the duke of Braganza made himself king of Portugal, and in 1647 Massaniello led the revolt in Naples, and in 1648 Philip was compelled to renounce all claims upon the United Provinces by the treaty of Westphalia (see article *MAURICE OF NASSAU*). In 1659, after the junction of Cromwell with France, and the victories of Blake, Philip concluded the treaty of the

Pyrenees. In 1665 his forces were totally defeated by the Portuguese, and he died the same year. PHILIP V., second son of Louis the dauphin of France, great grandson of the preceding, and grandson of Louis XIV., was born 1683. He succeeded to the throne of Spain by the testament of Charles II., and was proclaimed at Madrid 1700. The succession was disputed, and a league formed against it between England, Holland, Russia, Savoy, and Portugal, which led to a twelve years' war, concluded by the treaty of Utrecht 1713. By this treaty the English obtained Gibraltar and Minorca; Naples, Sardinia, the Milanese, and the coasts of Tuscany, were relinquished to the archduke Charles, who had been the rival of Philip, and was now become emperor; and the duke of Savoy possessed Sicily. Philip now married Elizabeth Farnese, princess of Mantua, and the notorious Alberoni became his minister, whom he was obliged to dismiss, in 1720, by a fresh combination. He then fell into a state of melancholy, abdicated in favor of his son, Louis, and was obliged to resume the crown in consequence of his death, 1724; died 1746.

PHILIP II., king of Spain, who projected the conquest of England by the famous 'Armada,' was the son of Charles V., emperor, and of Isabella of Portugal. He was born at Valladolid in 1527, eight years after his father's accession to the empire, and was married in succession to the Princess Mary of Portugal, 1543, and to Mary, queen of England, in the month of July, 1554, the same year in which he became king of Naples and Sicily by the abdication of his father. The most jealous precautions were taken on this occasion to prevent his assumption of any real power in England, and the temper of the people, and the queen herself, were so little to his taste, that in the course of 1555 (August) he retired to Flanders. There was a political reason for this

[The Escorial.]

journey, however. Charles V. was preparing to resign the empire by first investing his son with his hereditary dominions, and in the succeeding October he solemnly renounced the sovereignty of the Low Countries in his favor, at an assembly of the states-general in Brussels. About a month after, Philip received the sceptre of Spain and the Indies by the same self-abnegation of his father, and his first act was to propose a truce with France, which was broken almost as soon as concluded upon. Till September, 1556, he lived rather a debauched life, it would appear, in his Flemish dominions, and then went to England, where he had the mortification to be refused the ceremony of a coronation, and the troops he demanded in aid of his war with France. These, however, were at length conceded to him by

Mary, in violation of her marriage articles, and the levy, joined to the army of Emanuel Philibert, duke of Savoy, and Count Egmont, assisted to gain the battle of St. Quintin, 10th August, 1557. On the death of Mary in 1558, Philip, who was still prosecuting the war, made proposals of marriage to her successor, Elizabeth, and was refused; his military operations meanwhile greatly retarding the Reformation in England. In 1559 the French were reduced to sue for peace, and the policy and the arms of Philip, though he was no soldier himself, were crowned by the peace of Chateau-Cambresis on the 13th of April in that year; one condition of it being the marriage of Philip to the princess Elizabeth of France, daughter of Henry II. Freed from this political war, Philip now applied himself to the subjugation of the Moriscoes—the descendants of the Mohammedan conquerors of Spain, and commenced that intestine struggle which was not terminated till the reign of his successor. In the course of the year (1559) he returned to Valladolid, having appointed his half-sister, Margaret, sovereign of the Low Countries; his first act in that city was to send thirty-three protestants to the stake, of whose torments he went to be an eye-witness. About the same time he transferred the seat of government to Madrid. In 1566 the revolt of the Netherlands commenced, which ended in the separation of the seven northern provinces from the crown of Spain, and their formation into the Dutch republic. This struggle lasted about thirty years, till the close of Philip's reign: the principal incidents are noted in other articles (WILLIAM I. OF NASSAU; MAURICE OF NASSAU). The events of this protracted struggle were varied in 1567 by a domestic tragedy—the rebellion, arrest, and suspicious death of Don Carlos, the son of Philip and his first wife Mary of Portugal. Shortly afterwards he lost the queen Elizabeth, his third wife, and about the same time the Moors of Granada revolted, whose subjugation was effected in 1570. In 1571 the archduchess Anne of Austria became his fourth wife, and the same year his natural brother, Don John of Austria, obtained the great naval victory of Lepanto over the Turks. In 1580 his troops under Alva subdued Portugal, of which, and all its dependencies, Philip now became sovereign. By this time the protestant power and its policy had become centred in England under Elizabeth, who at length openly engaged herself in behalf of the Netherlands, and every where threatened the security of Philip; the seas at that time being ruled by the great English Admiral Drake. In 1586 the pope, Sixtus Quintus, offered his support to Philip, and the *Invincible armada* was prepared for the invasion of England. It was commanded by the duke of Medina Sidonia, and totally defeated by the combined Dutch and English fleets, aided by a great storm in the British channel, 1588. The remainder of Philip's reign was occupied with his French wars as a party to the league, in pursuance of the same dark policy against Henry IV. This struggle was concluded by the peace of Vervins, 1597. (See NAVARRE.) Philip died at Madrid, 13th September, 1598; having earned for himself the character of a cruel bigot, and made the most desperate efforts to sustain the preponderance of Spain in Europe, and the triumph of the papacy. No European sovereign has been able to resume the struggle on the same scale of magnificence to this day. [E.R.]

PHILIP I., count of Savoy, succeeded his brother, Peter, 1268, died 1285. PHILIP II., duke of Savoy, succeeded Charles II., 1496, died 1497. Another PHILIP, born 1278, was prince of Albania and the

Morea. He began to reign over Savoy at the death of Count Philip 1285, but Amadeus V., his uncle, took the sovereignty, and left Philip that of Piedmont; died 1338.

PHILIP, the *first* of the name, count of Burgundy, succeeded his mother, Jeanne of Valois, as count of Artois 1335, and obtained the county of Burgundy from his brother 1338; died 1346. The *second*, a son of the preceding, succeeded to the four counties of Burgundy, Auvergne, Boulogne, and Artois, at the age of eighteen months, and died 1361. The *third*, PHILIP THE HARDY, born 1342, received the duchy of Burgundy from his father, King John, 1364, and, by his marriage with Margaret of Flanders, became count of Flanders, of Artois, of Bethel, and of Nevers. He was one of the princes appointed to administer the government of France during the incapacity of Charles VI., and whose rivalry with the duke of Orleans created great troubles; died 1404. The *fourth*, grandson of the preceding by his son John, and Margaret of Bavaria, was born 1396, and succeeded his father 1419; died 1467. He was father of Charolois, afterwards Charles the Bold.

PHILIP, duke of Brabant, reigned 1427–1430.

PHILIP, count of Flanders, called PHILIP OF ALSACE, succeeded his father, Thierry, 1169, died 1191.

PHILIP, elector palatine, born 1448, succeeded his uncle, Frederick, 1476, died 1508. A *second* of the name, PHILIP WILLIAM OF NEUBOURG, born 1615, succeeded the elector Charles 1686, died 1690.

PHILIP, duke of Parma, born 1720, was son of Philip V. of Spain and Elizabeth Farnese, and son-in-law of Louis XV. He became duke of Parma, Placenza, and Guastalla, by the treaty of Aix-la-Chapelle, 1748; died 1759.

PHILIP, duke of Suabia. See PHILIP, EMP.

PHILIP OF ALSACE. See PHILIP, COUNT OF FLANDERS.

PHILIP OF ORLEANS. See ORLEANS.

PHILIP THE SOLITARY, a Greek monk, 12th ct.

PHILIP OF THESSALONICA, a Gr. epigrammatist, supposed no later than the age of Augustin.

PHILIP OF THE MOST HOLY TRINITY, a famous missionary to Persia and the Indies, born at Avignon 1603, died 1671.

PHILIP, KING, a famous Indian chief of Pokanoket, who carried on a devastating war against the colonists of New England in 1675. Was killed in battle, 1676.

PHILIP OF VALOIS. See PH. VI. OF FRANCE.

PHILIPPE, C. A., a Fr. magistrate, 1614–98.

PHILIPPE, LOUIS. See LOUIS PHILIPPE.

PHILIPPI, H., a learned Jesuit, 1575–1636.

PHILIPPICUS-BARDANES, emperor of the East, proclaimed, after causing the assassination of Justinian II., 711, dethroned by the people 713.

PHILIPPIDES, an Athenian poet, B.C. 335.

PHILIPPON, BARON, the French general who defended Badajoz in 1811; 1760–1836.

PHILIPPUS OF ACARNANA, the friend and physician of Alexander the Great, whose life he saved, B.C. 333.

PHILIPPUS, the name assumed by the impostor, Andrisus, who pretended to be the son of Perseus, and became king of Macedonia.

PHILIPS, AMBROSE, a poet and dramatist, was a native of Leicestershire. He received his education at St. John's College, Cambridge; and, on coming to London, associated with Steele, Addison, and the literary wits of the day. He was the author of the tragedies of the 'Distrest Mother,' 'The Briton,'

and 'Humphrey, Duke of Gloucester,' some pastoral poems; a 'Life of Archbishop Williams;' and was also a contributor to a periodical paper called the Freethinker, through his connection with which he was made registrar of the Irish prerogative court. Died 1749.

PHILIPS, CATHARINE, an accomplished lady, authoress of Translations from Corneille, 1631–64.

PHILIPS, FABIAN, a lawyer and royalist, author of several political pamphlets, and of books relating to ancient customs and privileges in England, 1601–1690.

PHILIPS, JOHN, a poet, was born at Bampton, in Oxfordshire, in 1676; was educated at Winchester School, and Christchurch, Oxford; and was the author of 'The Splendid Shilling,' 'Blenheim,' a poem in praise of Marlborough's victory; and one on 'Cyder,' formed on the Georgics of Virgil. Died 1708.

PHILIPS, RICHARD, F.R.S., F.G.S., an English chemist, died 1851.

PHILIPS, THOMAS, a Roman Catholic divine, was born at Ickford, in Buckinghamshire, and received his education at St. Omer's. He entered into orders, and became a Jesuit, but quitted that society, and obtained a prebend in the collegiate church of Tongres. He was the author of 'The Study of Sacred Literature, stated and considered,' and 'The Life of Cardinal Pole,' 2 vols. Died 1774.

PHILISTUS, an ancient historian, supposed to be a native of Syracuse, about 431–356 B.C.

PHILLIP, ARTHUR, an English naval officer, first governor of Botany Bay, 1738–1814.

PHILLIPS, EDWARD, son of Anne, the sister of Milton, and of Edward Phillips, secondary in the crown office, was born 1630. He was educated by his illustrious uncle, of whom he wrote a life. The best known of his works is a complete collection of the Poets, with observations upon them, in which it is supposed Milton assisted him. His brother, JOHN, at first a political adherent of his uncle, afterwards wrote in favor of the restoration. Dates unknown.

PHILLIPS, MORGAN, or PHILIP MORGAN, a Roman Catholic controversial writer, 16th century.

PHILLIPS, SAMUEL, an English journalist and miscellaneous writer. He was educated at the university of Cambridge, and subsequently became a tutor in a nobleman's family, with which he travelled over Europe. On his return to London he adopted literature for a profession, and he was one of the few examples, says the London Times, of men who, having followed it up with industry and perseverance, have been enabled to live and support a family in comfort and respectability, neither owing nor borrowing money. He is said to have left £10,000, the accumulated profits of literary labors. For many years he was the doomed victim of consumption, and worked manfully and cheerfully with the shadow of death upon him. He was the author of 'Caleb Stukely,' which originally appeared in Blackwood's Magazine, and of other novels. He was a diligent writer for the press, and edited for a time the London weekly tory journal, the 'John Bull.' He was supposed to have been the literary critic of the London Times, and to have written the severe criticism upon Thackeray, which incurred the cutting rebuke of that famous satirist. The general handbook of the Crystal Palace at Sydenham claims him as its author. He died of consumption in 1854, aged 39.

PHILLIPS, THOMAS, R.A., a portrait painter of considerable merit, was born at Dudley, in Warwickshire, in 1770. Having had some initiatory

practice in the country, he went to London when he was about 20, and found employment at Windsor, under Benjamin West, who was at that time engaged in decorating St. George's chapel. He was devotedly attached to his profession, but for many years he had to contend with the superior talents of West, Lawrence, Hoppner, &c., who were in their zenith; but by unceasing application, and a laudable emulation which never forsook him, he gained so much celebrity, as to number among his sitters some of the most eminent men in the kingdom. He also wrote many occasional essays on the fine arts; and, in co-operation with Turner, Chantrey, Robertson, and others, he planned and successfully matured the Artists' General Benevolent Institution. He died April 20, 1845, aged 74.

PHILO OF BIBLOS, a Greek historian, chiefly known as translator of Sanconiatho from the Phœnician into the Greek language, fragments of which have been preserved in the works of Eusebius. He flourished in the reign of Nero.

PHILO OF BYZANTIUS, a Greek architect, author of a Treatise on Machines of War, about 3d century B.C.

PHILO, JUDÆUS, was born of Jewish parents at Alexandria, not long before the commencement of the Christian era. He was a devotee of the Platonic philosophy, and it tinges all his interpretations of the sacred books. In A.D. 41, he was sent as chief deputy from the Jews in Alexandria to the emperor Caligula, in order to defend them against Apion, who had charged them with the crime of disloyalty. Again did he go to Rome in the reign of Claudius. Several of the writings of Philo have escaped the wreck of time, such as his treatise *De Mundi Opificio*; his 'Allegories of the Law,' full of strange fancy and wild interpretations, his book 'On Dreams,' and numerous tracts on biblical subjects, filled with Platonism and allegory. His works have been edited by Turnebus, fol., Paris, 1552; by Mangey in 2 vols. fol., 1742; reprinted under the care of Pfeiffer, at Erlangen, in 1820, and by Richter in 8 octavo vols., Leipzig, 1828-30. [J.E.]

PHILO OF LARISSA, a philosopher of Athens, who quitted that city on the success of the army of Mithridates and went to Rome, where he had Cicero for a disciple.

PHILODEMUS, an Epicurean philos., B.C. 100.

PHILOLAUS: a later Pythagorean: born at Crotona, or Tarentum, towards the close of the fifth century before Christ. Aresas, a probable disciple of Pythagoras, was his master; so that we receive the doctrine from Philolaus, only as it appeared to the third generation. (Article PYTHAGORAS.) It has been repeated once and again that Philolaus divined the true theory of the Universe, and was the virtual predecessor of Copernicus. Nothing can be more false. In his scheme indeed, not the Earth, but FIRE is placed in the centre of the Universe that Fire, however, is not the Sun, which, on the contrary, he makes revolve around the central  $\pi\upsilon\rho$ . The scheme, in so far as it can be understood, is altogether fantastic, based on no observation or comparison of phenomena, but on vague and now unintelligible metaphysical considerations. The only predecessor of Copernicus in Antiquity, was Aristarchus of Samos, whose remarkable conjectures appeared first, in the *Editio Princeps* of Archimedes—published after Copernicus wrote. [J.P.N.]

PHILOPOEMEN, called the *last of the Greeks*, was really their last great commander. He was born in Arcadia B.C. 253, became in 210 generalissimo of the Achæan League, and conquered the Spartans—

at which time he abolished the laws of Lycurgus. The greatest of his victories in this long struggle was the battle of Mantinea. He was put to death by poison when a prisoner of the Messenians B.C. 183, the same year that proved fatal to Hannibal and Scipio.

PHILOSTRATUS, FLAVIUS, a Greek rhetorician, author of 'Lives of the Sophists,' 'Comments on the Heroes of Homer,' and a descriptive work on art, entitled 'Icones,' known about 193. Another PHILOSTRATUS, his nephew, wrote a work similar to the 'Icones,' and bearing the same title. He was known about 217.

PHILOTHEUS, a patriarch of Constantinople, author of several learned works, died about 1371.

PHILOXENUS, the name of three Greeks, the most ancient a didactic and burlesque poet, 430-380 B.C. The *second*, a painter, was contemporary with Apelles, and is known to have executed a battle-piece, B.C. 316. The *third*, called also XENAIAS, was a bishop of Heliopolis, and a writer in favor of the Syrian Jacobites, died A.D. 518.

PHILPOT, JOHN, son of Sir Peter Philpot, and sheriff of Hampshire, known as a learned Calvinist writer and minister of the Church of England, burnt in Smithfield in the reign of Mary, 1555.

PHILPOT, or PHILIPOT, JOHN, a heraldist and antiquarian, assistant of Camden, and editor of his Remains, time of James I.; died 1645. THOMAS, his son, wrote a History of Heraldry.

PHIPPS, SIR WM., colonial-governor of Massachusetts in 1692. He was born in Maine, 1651, of humble parents, his father having been a gunsmith; his mother was remarkable for the number of her children, having had 21 sons and 5 daughters. Young Phipps passed the first 18 years of his life in his rude home in the wilderness. He then repaired to Boston, where he apprenticed himself to a shipcarpenter for four years, and improved his occasional leisure hours, by learning to read and to write. He was of a restless, roving disposition, and went to sea; while on the coast of Hispaniola in command of a vessel, he had the good luck to discover a Spanish wreck, from which he obtained plate, jewels, pearls, and treasures amounting to £300,000, of which he only kept £16,000 for himself, having liberally distributed the rest among his comrades. He now sailed for England, and on his arrival was knighted by King James. He, on his return to Massachusetts, was nominated governor. Died 1695.

PHLEGON, a Greek historian, 2d century.

PHOCAS, emperor of the East, 602-610.

PHOCION, a famous Athenian general, statesman, orator, and diplomatist, chief of the aristocratic party of Athens, and a great opponent of Philip and Alexander. He was put to death by poison B.C. 317, and afterwards honored by the regrets of his countrymen.

PHOCYLIDES, a Greek poet, 4th cent. B.C.

PHOTIUS, one of the most illustrious men of his age, was born of noble parents in the early part of the ninth century. He was also connected by the marriage of his brother with the royal family. He held various secular offices under the emperor, such as that of proto-a-secretis, or chief justice, and the captaincy of the royal life guards. His literary attainments were of a very high order, the result of diligent and continued study. But he rose suddenly and unexpectedly to the summit of ecclesiastical dignity. The patriarch Ignatius had been deposed and banished, and Photius, though a layman, was elected in his room. In less than a week he summarily passed through all the inferior grades of office, was in as

many successive days, monk, reader, sub-deacon, deacon, presbyter, and finally patriarch. This questionable procedure was confirmed by two councils, one in 853, and the other in 859. But, in 862 Pope Nicolaus, in consequence of a dispute about jurisdiction, declared the election void, and excommunicated Photius and his adherents. Photius, however, retained his place, but a schism was produced between the Eastern and Western churches. The emperor Michael III. was assassinated in A.D. 867, and his murderer and successor, Basil I., exiled Photius, brought back Ignatius his predecessor, and in a general council held at Constantinople, in 869, this transaction was solemnly ratified. When Ignatius died, in 877, Photius was elevated to his former position, and his restoration was sanctioned by the head of the Western churches. Photius immediately labored by the machinery of pliant councils, to have all the previous proceedings against himself declared null and void, and on this account, he incurred again the anathema of the pope. Ecclesiastical intrigue and manoeuvre, and not truth and right in those days determined the victory. Leo VI. succeeded Basil in 886, and he immediately, but probably on unjust grounds, banished the restless patriarch to Armenia, where he remained in exile till his death. The date of his death is unknown, but some place it in A.D. 891. Photius was a scheming diplomatist, keenly alive to his own interests, but not without a happy mixture of benignity and decision. His weapons of self-defence and self-aggrandizement were those of the age in which he lived, suppleness and chicanery, a jealous watch over all rivals, and the unscrupulous use of every means to enjoy, retain, and make the most of the imperial favor and patronage. Photius had been a voracious reader, and was also an accomplished critic. His *Myriobiblon* or *Bibliotheca* is a review and epitome of ancient Greek literature in 280 divisions, and contains notices of many rare and valuable works which themselves have been lost. The best edition is that of Bekker, Berlin, 1824, 2 vols. 8vo. Numerous other works were composed in the long life of this illustrious prelate and statesman, and many of his letters have been collected. We have his *Compendium*, his *Amphilochia*,—a theological treatise in the form of question and answer—his collection of *Canons*, *Homilies*, a tract on the Procession of the Holy Spirit, one against the Manichæans, *Commentaries* on St. Paul's Epistles, and a *Catena* on the Psalms, &c., but many of these still slumber in MSS. No collected edition of his works has appeared. Had Photius been a professional writer of uninterrupted leisure, he could scarcely have written more, and when we reflect on his long and scheming life, on his checkered and absorbing career, as courtier and patriarch, polemic and exile, intriguer and preacher, we cannot surely withhold our admiration of his industry and erudition. [J.E.]

PHRAHATACES, a king of Parthia, succeeded his father Phrahates IV., and killed in the year 9.

PHRAHATES I., king of Parthia, succeeded his father, Priapatius, 178 B.C., and, dying soon after, left his kingdom to his brother, Mithridates. PHRAHATES II., son of Mithridates I., reigned about 139–127 B.C. PHRAHATES III., about 70–58 B.C. PHRAHATES IV., obtained the crown by killing his father, Orodes, 37 B.C., and was killed in turn by his son, Phrahataces, A.D. 9. PHRAHATES V., son of the preceding, was absent at Rome when his brother usurped the throne, and was invested with the royalty by Tiberius. He departed for Syria to regain his

kingdom while Abraham III. reigned over it, and died on his journey 35.

PHRANZA, G., a Greek historian, 15th cent.

PHRYGIO, F. C., a German divine, died 1543.

PHRYNICUS, three distinguished Greeks:—The earliest, an Athenian writer of tragedy, contemporary with Æschylus, 5th century B.C. The *second*, a comic poet of Athens, known B.C. 430. The *third*, surnamed ARRHABIUS, a sophist and rhetorician of Bithynia, 2d century.

PHRYNIS, a Greek musician, 5th century B.C.

PHYSIC, PHILIP SING, a disting. surgeon and physician, settled in Philadelphia. D. 1837, aged 70.

PIA, PHILIP N., a French chemist, 1721–1799.

PIACENTI, D. G., an Ital. antiqua., 1684–1754.

PIALI, an Ottoman admiral, 16th century.

PIAZZA, C., an Italian painter, 16th century.

PIAZZA, JER. BARTHOLOMEW, an Italian convert to the Church of England, formerly a judge of the inquisition, author of an historical account of the inquisition and its proceedings. Died about 1745.

PIAZZA, P., an Italian painter, 1547–1621.

PIAZZI, a celebrated Italian astronomer, was born in 1746, at Ponte, in the Valteline; entered into the order of the Theatines; and, after having been a professor at Genoa, Malta, Ravenna, and Palermo, was in 1787 made director of the observatory founded in the latter city. About this time he visited Paris and London, and entered into a correspondence with the most celebrated European astronomers. In 1801 he discovered a new planet, which he named Ceres Ferdinanda, and in 1805 he made a new catalogue of 7646 fixed stars. This distinguished astronomer produced various treatises and memoirs of great importance to the science, and was a member of many learned institutions. Died 1826.

PICARD, J., a French astronomer, 1629–1682.

PICARD, L. B., a Fr. dramatist, 1769–1828.

PICARD, M., a German *savant*, 1574–1620.

PICART, STEPHEN, a French engraver, 1631–1721. His son, BERNARD, a designer and engraver, author of 'Illustrations of the Religious Ceremonies of all Nations,' 1663–1733.

PICCADONI, J. B., superior-general of the order of Minors, a theologian and philoso., 1766–1829.

PICCART, M., a Germ. philologist, 1574–1620.

PICCINI, NICOLAI, was born at Bari in Naples in 1728. This composer has been regarded as the most fertile and original that the school of Naples ever produced. Like many other musicians, he was first meant to be brought up to the church, but the ruling passion frustrated all parental intentions. He studied in the conservatory of San Onofrio under Leo and Durante. In 1758 he was invited to Rome, where he brought out several operas. In December, 1776, he arrived at Paris, where he, in the course of a year afterwards, found himself opposed to Gluck, who about this time effected a revolution in French music. For some time the musical feuds of the admirers of the Italian and the German kept Paris in a ferment. Gluck was, however, at the termination of the war, pronounced victor. At the breaking out of the French Revolution, he returned to Naples, but the ministry there having forbidden him to appear in public, he remained almost a close prisoner in his own apartments. In 1799 he returned to Paris, when the Emperor Napoleon appointed him inspector in the National Conservatory of Music, which situation he held till the time of his death, which took place in 1801. [J.M.]

PICCINI, JOSEPH, eldest son of the preceding, known as a dramatic writer, 1758–1826.

PICCOLOMINI. See Pius II.

PICCOLOMINI, CARDINAL, the name by which JAMES AMMANATI is best known, a famous name in the history of Italy, 1422-1479.

PICCOLOMINI, ALESSANDRO, archbishop of Patras and coadjutor of Sienna, known as a philologist, 1508-1578. FRANCESCO, a relation of the preceding, known as a learned writer, 1520-1604.

PICCOLOMINI, ALPHONSO, duke de Montemariano, an Italian adventurer, who ravaged the states of the church, and was hung 1591.

PICCOLOMINI, OCTAVIA, an Austrian general of the same family as the preceding, 1599-1656.

PICHAT, M., a French dramatist, 1786-1828.

PICHEGRU, CHARLES, was born in 1761, of parents in a humble rank of life, in Franche Comté. He was educated for the army at the Military College of Brienne, where he was monitor to Napoleon Buonaparte. The Revolution found him in the rank of adjutant; and he rose rapidly during the campaigns of 1792 and 1793. At the end of that year he obtained the chief command of the army of the Rhine, which was then disorganized by a series of reverses. Pichegru restored discipline and spirit; gained the victory of Haguenau, December 23, 1793, and drove the allies before him into the Dutch territory. The severity of that winter made the passage of the frozen rivers practicable, and in January, 1794, Pichegru invaded and conquered Holland. He captured not only towns and fortresses, but also, some of the Dutch fleet, which was frozen up in the Texel. Pichegru sent his cavalry over the ice; and the strange spectacle was presented of ships being attacked and taken by horse soldiers. Pichegru was favorable to the restoration of the Bourbons, and entered into a secret negotiation with their emissaries for this purpose. The French Directory suspected him, and recalled him from his command. He took part in the unsuccessful attempts at reaction in Paris in 1797, and was exiled to Guiana. He escaped thence to England, where he was well received. In 1804 he came secretly to Paris with other royalists; but he was arrested by Buonaparte's police and thrown into prison. He was found dead in his bed there, on the morning of the 6th April, 1805. The Imperialists said that he had committed suicide; the Royalists, that he had been murdered. There may be too much cause to suspect that Pichegru came foully by his death; but we believe Napoleon's assertion at St. Helena, that he, at least, was personally free from guilt in the matter. [E.S.C.]

PICHLER, CAROLINE, one of the most prolific writers that Germany has produced, was born at Vienna 1769. Her maiden name was Greiner. Her father held a high position at the court of Vienna; and his house was long celebrated for its reunions of all that was most distinguished in that metropolis for rank, fashion and genius. She received a first-rate education, and showed an early predilection for literary pursuits; but it was not till after she had attained her 30th year that she appeared as an authoress, her first work, called the 'Gleichnisse,' being published in 1799. This was followed from time to time by various other works of considerable merit; but these were all thrown into the shade by her 'Agathocles,' which appeared in 1808, and was written with the view of counteracting Gibbon's attacks upon the Christian faith. Her works amount to more than 60 volumes, consisting chiefly of dramas and historical romances; of which may be mentioned the 'Grafen von Hohenberg,' 'Die Belagerung Wien's von 1683,' 'Die Schweden in Prag,' 'Die Wiedereroberung von Ofen,' 'Henriette von England,' 'Die Frauenwürde,' and the 'Nebenbuhler,' &c., d. 1843.

PICHLER, G., a Germ. theologian, died 1736.

PICHLER, JOHN, an eminent gem engraver of Naples, born 1739, died 1791. His father, Anthony Pichler, was also famous in the same branch of art.

PICHON, J., a French missionary, 1683-1751.

PICHON, T., a French writer, 1700-1781.

PICHON, T. J., a Fr. theologian, 1731-1812.

PICKEN, ANDREW, a miscellaneous writer, was born at Paisley, in Scotland, in 1788. After some unsuccessful attempts of a commercial nature he entered on a literary career, by publishing a volume, entitled 'Tales and Sketches of the West of Scotland.' This was followed by 'The Sectarian' and 'The Dominie's Legacy;' the latter of which established his fame as the delineator of Scottish humble life. He subsequently engaged in writing tales, &c. for the periodical press; and a short time previous to his death appeared his 'Traditionary Stories of Old Families,' in 2 vols., designed as the first part of a series, which was intended to embrace the legendary history of Great Britain and Ireland. His death took place in November, 1833; and a novel, entitled 'The Black Watch,' which he had just completed, was afterwards published.

PICKENS, ANDREW, a Revolutionary major-general, born in South Carolina, and died there 1817.

PICKERING, WILLIAM, an eminent English publisher. Died 1854, aged 58.

PICKERING, TIMOTHY, an American Revolutionary statesman, was born at Salem, Mass, 1746. During the Revolution and subsequently filled various important offices; he was judge, adjutant-general, postmaster-general, secretary of war, secretary of state, and senator. Died 1829.

PICPAPE, N. J. P. DE, a Fr. Jesuit, 1731-93.

PICTET, BENEDICT, professor of theology at Geneva, author of a History of the Twelfth and Thirteenth Centuries, 1655-1724. His relation, JOHN LOUIS, an astronomer, 1739-1781.

PICTET, MARK AUGUSTUS, a naturalist and philosopher, president of the Society for the Advancement of the Arts, at Geneva, 1752-1825. His brother, CHARLES PICTET DE ROCHEMONT, a political negotiator, agriculturist, and miscellaneous writer, 1755-1824.

PICTON, SIR THOMAS, K. C. B., &c., a gallant British officer, was descended from an ancient family of Pembrokeshire, and commenced his military career as an ensign in the 12th regiment of foot in 1771. He served on the Gibraltar station till 1778, after which he was promoted to a captaincy in the 75th. In 1794 he embarked for the West Indies; and, after the reduction of St. Lucia and Trinidad in 1797, he rose to the rank of colonel, and was appointed governor of the latter island. Whilst holding that situation he was applied to by a Spanish magistrate to sign an order for inflicting the torture on a female slave, named Louisa Calderon; and on being told that it was a customary practice, he signed it without inquiry. The girl, who was only fourteen years of age, was accordingly *picketed*, with a view to extort from her the discovery of a theft committed by her paramour. For this act of cruelty the governor was, in 1807, indicted, and found guilty by an English jury. As many exaggerated rumors had preceded the colonel to England, a new trial was granted, and though he was acquitted of *moral guilt*, the deed was one which threw a shade over his bright career. However, in 1809, he was again employed for his country. He was at the siege of Flushing, and on its capture was appointed governor. From Flushing he returned to England an in-

valid, but was soon again in the field. His courage and intrepidity shone on every occasion; ever foremost in the fight, he was a victorious leader at Badajoz, at Vittoria, at Ciudad Rodrigo, &c. At the battle of Waterloo, General Picton commanded the 5th division of the army, and fell in a moment of glory, having just repulsed one of the most serious attacks made by the enemy. A monument to his memory was voted by the parliament, and erected in St. Paul's cathedral.

PICUS, MIRANDULUS. See MIRANDOLA.

PIDOUX, J., physician of Henry III., d. 1610.

PIERCE, BENJAMIN, governor of New Hampshire, and father of President Piercc. Died 1839, aged 82.

PIERCE, EDWARD, a famous painter of altarpieces, ceilings, and architecture, died about 1715.

PIERPONT, JAMES, a celebrated New England divine, born in Connecticut, 1661. Died 1714. He drew up the articles of discipline adopted as the Saybrook platform, in 1708.

PIERQUIN, J., a French priest, died 1742.

PIERRE, CORNELIUS DE LAPIDE, a learned Jesuit, author of 'Commentaries on the Bible,' died 1637.

PIERRE, J. B., a French painter, 1714-1789.

PIERRES, P. D., a French printer, 1741-1808.

PIERSON, ABRAHAM, a New England divine, and first president of Yale College. Died 1707.

PIERSON, C., a Dutch painter, 1631-1714.

PIERSON, J., a philologist, 1731-1759.

PIETERS, B., a Flemish marine painter, 1614-1652. JOHN, his brother, same profession, born 1625.

PIETERS, G., a Dutch painter, born 1580.

PIETRE, S., a French physician, died 1616.

PIETRI, P. DA., an Italian painter, 17th cent.

PIETRO, M. DI., an Ital. cardinal, 1747-1821.

PIGAFETTA, ANTHONY, a Spanish voyager, one of the eighteen companions of Magellan, who survived his voyage of discovery to the Pacific, in the 16th century. He was the author of a narrative of the voyage.

PIGALLE, J. B., an Italian sculptor, 1714-85.

PIGANIOL-DE-LA-FORCE, J. AIMAR, a French literateur and geographer, 1675-1753.

PIGAULT-LEBRUN, G. C. ANTOINE, a fertile novelist and dramatic writer, 1753-1835.

PIGHUS, ALBERT, a Dutch mathematician and Roman Catholic controversialist, born about 1490, died 1542. His nephew, STEPHEN VINAUD, a learned antiquarian, 1520-1604.

PIGNA, GIAMBATTISTA, a learned Italian historian of the house of Este, 1529-1575.

PIGNATELLI, F., a Neapolitan statesman, born 1732, captain-general of the Two Sicilies, 1789, vicar-general of the kingdom of Naples 1806, died 1812.

PIGNONE, S., an Italian painter, 1612-1698.

PIGNORIA, L., an Ital. antiquary, 1571-1631.

PIGNOTTI, LAURENCE, an Italian poet and historian, was born at Figliena, in Tuscany, in 1739; was educated at Arezzo and Pisa; practised as a physician at Florence; was created historiographer of the court, and became rector of the university of Pisa. His 'Fables' have acquired an extensive popularity, but his great fame was acquired by his 'History of Tuscany.' Died 1812.

PIGRAY, PETER, a French surgeon, died 1613.

PIKE, ZEBULON MONTGOMERY, an officer of the American army, born in New Jersey. Engaged in the explorations of the sources of the Mississippi in 1805, and of the interior of Louisiana in 1807. Was brigadier-general in the war of 1813, and was killed

during the attack upon York, U. C., by a large stone which was thrown up by the explosion of the British magazine.

PILATUS, LEONITIUS, a monk of Calabria, distinguished at the revival of letters in Europe, 14th century.

PILES, ROGER DE, a French painter, and a writer on painting, was born in 1635, at Clameci. In 1692 he was sent by the French ministry into Holland as a secret negotiator, or spy, but being discovered by the Dutch, they imprisoned him for five years, during which period he wrote his 'Lives of the Painters.' He was also the author of 'Dialogues on the Knowledge of Painting,' 'A Dissertation on the Works of famous Painters,' 'Elements of Practical Painting,' &c. Died 1709.

PILKINGTON, JAMES, a learned English prelate, created bishop of Durham by Elizabeth, after the Marian persecution, 1520-1575.

PILKINGTON, LETITIA, a lady of Dutch extraction, born in Dublin, 1712, and married to the Rev. Samuel Pilkington. She wrote several plays, some poems, and her own 'Memoirs.' She was separated from her husband in consequence of irregular conduct, and was supported some time by contributions obtained for her through the interest of Cibber. Died 1750.

PILLET, C. M., a Fr. biographer, died 1826.

PILON, F., an Irish actor, 1750-1788.

PILON, G., a French sculptor, died 1590.

PILPAY, an Indian fabulist, Bramin, and councillor of state to one of the rajahs, said to have lived 2,000 years B.C. His fables were translated into French by Galland in 1704, and by the Abbé Dubois in 1826.

PIMENOFF, a Russian sculptor, died 1833.

PINA, RUY DE, a Portuguese historian, d. 1521.

PINART, M., a French Orientalist, 1659-1717.

PINAS, J., a Dutch painter, 1597-1660.

PINCKNEY, CHARLES, an American Revolutionary officer, governor of South Carolina, senator of the United States, and ambassador under Jefferson to Spain. Was born in 1758, died 1824.

PINCKNEY, CHARLES COTESWORTH, an American Revolutionary officer and diplomatist, was born in South Carolina. During the war he was aide-de-camp to Washington. He was a member of the convention which framed the federal constitution. In 1796 was sent as minister to France, and subsequently elected president of the Cincinnati Society. Died 1825.

PINCKNEY, THOMAS, brother of Charles Cotesworth, an American Revolutionary officer of distinction, and governor of South Carolina from 1787 to 1789. Was minister to London under Washington. In 1796 was a candidate with John Adams for the vice-presidency. Died 1828.

PINDAR, the greatest of the Greek lyric poets, was born, according to the best authorities, at Cynocéphalæ, a village of Bœotia, between Thebes and Thespia, B.C. 518, and died B.C. 439, after completing his eightieth year. As is the case with most of the celebrated authors of antiquity, but few particulars respecting his life have been transmitted to us, and even these are derived from some ancient biographies of uncertain authority and value. According to one of these, he was the son of Diaphantus and Cleidice, and was born during the time of the celebration of the Pythian games (August or September) the latter fact being derived from one of his own fragments. He seems to have been twice married, and to have had one son and two daughters. His family, which claimed descent from Cadmus, ranked among the no-

[Pindar—from an ancient bust.]

blest in Thebes, and enjoyed a hereditary celebrity for skill in music, especially for flute playing, a profession which, at that time, was held in high reputation in the Bœotian capital. The youthful poet, to whom the family talent had descended, at first applied himself to that branch of poetry which was best adapted to the accompaniment of the flute; and his father, who had observed in him the indications of poetical genius, sent him to Athens, where, under the tuition of Lasus of Hermione, the founder of the Athenian school of dithyrambic poetry, he received that instruction in the art which was necessary to enable him to attain distinction. While at Athens, he likewise availed himself of the instructions of Agathocles and Apollodorus. Returning to Thebes in his twentieth year, he further profited by the instructions and advice of Myrtis and Corinna of Tanagra, two poetesses who at that time enjoyed great celebrity at Thebes, and with both of whom he afterwards contended unsuccessfully for the musical prize. Pindar commenced his career as a composer of choral odes at the early age of twenty, and his reputation soon extended to all parts of the Hellenic world. The productions of his muse were eagerly solicited by different states and princes to commemorate remarkable events; the tyrants and wealthy men of Greece paid homage to his superior genius; and the free states vied with each other in honoring him as the great lyric poet of his age. Athens, Ægina, and Opus conferred upon him the honor of electing him a public guest; the inhabitants of Ceos employed him to compose for them a processional song, to the exclusion of two celebrated poets of their own; and by the order of the priestess at Delphi, he received a portion of the banquet of the Theoxenia. Pindar manifests in his works a strong religious feeling, and entertaining a profound reverence for the gods, rejects those forms of the ancient legends which ascribes to them the frailties and immorality of mortals. He dedicated a temple to the Great Mother near his own house in Thebes; and erected statues to Jupiter-Ammon, and Mercury in the market-place. Extraordinary honors were paid to him after his death. The Athenians erected to him a statue of brass, representing him with a diadem and a lyre, and a book folded on his knees; while the Lacedæmonians, when they took Thebes, spared his house and family; and the same mark of veneration was afterwards shown to his memory by Alexander. Only a small portion of his works have come down to our time, and these, with a single exception, all belong to one class, the *Epinician* or

*triumphal odes*, odes celebrating respectively the victories gained in the four national games of Greece, the Olympian, Pythian, Nemean, and Isthmian. Besides these, he wrote dithyrambs, hymns to the gods, poems, dirges, drinking songs, mimic dancing songs, songs of maidens, and panegyrics on princes, of all of which we possess numerous fragments. Our estimate of Pindar as a poet must be formed from his *Epinician* odes alone, though it is evident from the testimony of the ancient writers, and particularly of Horace, that he was equally celebrated in other departments of poetry. The subjects which he selected for his muse do not appear, at first sight, to be well fitted for sublime poetry; but the genius of the poet, summoning to its aid the splendid mythology of the oldest times, and the mighty exploits of the heroes and demigods, invests the object of his panegyric with a fascination which seems really genuine. 'He is chiefly remarkable for the gigantic boldness of his conceptions and the daring sublimity of his metaphors, which stamp him the Æschylus of lyric poetry. The flights of his imagination are not, however, like those of the great tragedian, mingled with the intensity of human passion, which, while they carry us beyond ourselves, still come home to the heart. He has the light without the heat, his splendors dazzle, but do not warm us. There is little of human feeling in his works.'

[G.F.]

PINDEMONTE, IPPOLITO, Count, an Italian poet, biographer, and miscellan. wr., 1753–1828.

PINE, JOHN, a highly talented English engraver, appointed Blue Mantle in Herald's College, and engraver of the royal signets, 1690–1756. His son, ROBERT EDGE PINE, a portrait and historical painter, died 1790.

PINEAU, GABRIEL DU, a lawyer, was born in Angers, in 1573. He distinguished himself by his pleadings, and was appointed counsellor to the presidial of Angers, where his reputation was such as to procure him the appellation of 'Father of the People.' Died 1644.

PINEAU, S., a French surgeon, 1550–1619.

PINEDA, J. DE, a Sp. theologian, 1557–1637.

PINEL, LE P., a French priest of the oratory, known as a controversial writer, and for his visionary enthusiasm, died before 1777.

PINEL, PHILIP, an eminent French physician, particularly distinguished for the important improvements he introduced in the treatment of patients laboring under insanity. Among his works are, 'A Medico-philosophical Treatise on Mental Alienation,' 'Philosophical Nosography,' and 'Clinical Medicine.' He practised with great success at Paris, where he also acquired much popularity by his lectures. Born 1742; died 1826.

PINELLI, GIANVINCENZO, a great collector of books and manuscripts, and patron of literature, born at Naples, of Genoese descent, 1535; died 1601. MAFFEO, sometimes confounded with the preceding, also a learned bibliopole, and friend of Morelli, flourished at Venice, 1736–1785.

PINELO, ANTONIO DE LEON, a laborious writer on Spanish America, born in Peru 17th ct.

PINET, ANTHONY DU, lord of Noroy, a miscell. writer and defender of protestantism, 16th ct.

PINGERON, J. C., a French writer, died 1795.

PINGRE, ALEXANDER GUY, a French astronomer, was born at Paris, in 1711. He was originally an ecclesiastic; and though he began the study of astronomy at a late period, he distinguished himself by the zeal and success with which he followed it. In 1760 he made a voyage to the island of Diego Rodriguez, to observe the transit of Venus; and

undertook three subsequent voyages, to try the chronometers of Berthoud and Le Roy. The most important of his works is his 'Cometographie,' 2 vols. 4to. Died 1796.

PINI, E., an Italian naturalist, died 1825.

PINKERTON, JOHN, a prolific but eccentric author, was born at Edinburgh in 1758. He was educated at Lanark grammar school, and served 5 years with a writer of the signet; after which he settled in London, and devoted the remainder of his life to literature. He began his career by a volume of miscellaneous poetry, unassumingly entitled 'Rhymes.' This work was followed by two others, one containing 'Dithyrambic Odes,' &c., the other entitled 'Tales in Verse.' He also produced two volumes of pretended 'Ancient Scottish Poems,' a forgery after the manner of Chatterton; and 'Letters on Literature,' under the assumed name of Robert Heron, in which he displayed a degree of impudent pedantry almost unparalleled. It, however, obtained him the patronage of Horace Walpole; of whose witticisms, &c. he published a collection after his decease, under the title of 'Walpoliana.' A bare catalogue of the works of this indefatigable writer would fill a considerable space. Among them are, an excellent 'Essay on Medals,' 'Modern Geography,' 3 vols.; 'The Treasury of Wit,' 2 vols.; 'General Collection of Voyages and Travels,' 19 vols.; 'Iconographia Scotica,' 2 vols.; 'Recollections of Paris,' 2 vols.; and 'Petrology, or a Treatise on Rocks,' 2 vols. For many years Mr. Pinkerton resided at Paris, and there died in 1826.

PINKNEY, WILLIAM, an eloquent lawyer and statesman of America, distinguished as a political negotiator for the state of Maryland, and as a member of the Senate, 1765-1822. His son, EDWARD COATE, a naval officer, known to literature as a poet, 1802-1828.

PINSON, —, a French surgeon, famous as a modeller of anatomical subjects in wax, 1745-1828.

PINSON, or PYNSON, RICHARD, an early English printer, who was originally servant to Caxton, and introduced the Roman letter into this country, died about 1530.

PINSSON, F., a Fr. juriconsult, 1612-1691.

PINTARD, JOHN, a New York merchant, noted for his public spirit; one of the founders of the N. Y. Historical Society. Died 1844, aged 85.

PINTO, F. M., a Portuguese traveller, 16th ct.

PINTO, H., a Portuguese divine, died 1584.

PINTO, ISAAC, a Portuguese economist, d. 1787.

PINTURRICHIO, BERNARDINO, a famous Italian painter, scholar of Perugius, and associate in the labors of Raphael, 1454-1513.

PINZI, J. A., an Ital. numismatist, 1713-1769.

PINZON, ALONZO, VINCENT YANEZ, and MARTIN, three brothers, Spaniards, who had commands in Columbus' first voyage, and by whose exertions mainly it was that a sufficient number of men were induced to risk their lives on the perilous enterprise. Vincent Yanez was the most distinguished of the brothers; he made several voyages, on the most important of which he sailed in December 1499, and discovered Brazil, and the river Amazon, three months before Cabral took possession of South America for the crown of Portugal. [J.B.]

PIOMBO. See SEBASTIANO.

PIOZZI, ESTHER LYNCH, a distinguished name in the literary circle of Dr. Johnson, was the daughter of John Salusbury, Esq., of Bodvel in Carnarvonshire, where she was born 1739. In 1763 she married Mr. Thrale, a brewer, and member of parliament for Southwark, and this gentleman having

made the acquaintance of Dr. Johnson, the latter became a constant visitor at their house, at Streatham, in Surrey. In 1784 Mrs. Thrale, after a three years' widowhood, married Gabriel Piozzi, an Italian music-master, with whom she went abroad; this match cost her the friendship of the great moralist, who had been greatly opposed to it. In 1786 she published 'Anecdotes of Dr. Johnson during the Last Twenty Years of his Life,' and in 1788 her correspondence with him. Her other literary productions consist of poems and fugitive pieces of a miscellaneous description; the chief of them is her poetical story, entitled 'The Three Warnings.' She returned to England after the death of Piozzi, and died at Clifton, near Bristol, 1821.

PIPELET, F., a French surgeon, 1722-1792.

PIPER, CHARLES, Count, chief minister of Charles XII. of Sweden. He was born of obscure parents, and by his talents raised himself to the eminent station he occupied. He accompanied Charles in all his campaigns, was taken by the Russians at the battle of Pultowa, and died a prisoner in the fortress of Schlussemburg, in 1716.

PIPER, FRANCIS LE, an English comic painter, was born in Kent, where he inherited a handsome estate. He painted only for amusement, and chiefly such subjects as afforded him an opportunity for indulging in caricature; his talent for drawing faces remarkable for singularity of expression, or whimsical combination of feature, being unrivalled. D. 1740.

PIPPI. See ROMANO.

PIPPING, H., a Germ. theologian, 1670-1722.

PIRANESI, GIAMBATTISTA, *Cavaliere*, was born at Rome in 1707; he studied some time in Venice as an architect, but settled in Rome, and henceforth devoted himself to archæology, and etching the various ruins and monuments of Rome, in which he was assisted by his son, the CAV. FRANCESCO PIRANESI; and together they have produced the most extraordinary and interesting work, as a whole, that we possess on the magnificence of the ancient Romans. Yet it must always be borne in mind that the archæological was secondary to the artistic element in their admirable etchings, and much is supplied by enthusiasm and imagination, as well as what has been afforded by the actual monument; but the existing ruins as they were, are powerfully and faithfully given, and even the ornamental fragments have their pictorial truth, if not their exact proportions or details. The elder Piranesi died at Rome in 1778; the son at Paris in 1810, he was born at Rome in 1750. The son completed what the father commenced: the early editions are the most valued; a complete collection is very rare, as all the monuments or series were published separately, and was worth, before the publication of the new Paris reprint, between three and four hundred pounds. The new edition is 29 volumes, atlas folio, published at Paris, 1835-37, is worth about £70; it contains plates by some other artists besides the Piranesi, and some modern as well as ancient monuments.

PIRES, THOMAS, a Portuguese ambassador to China,—the first European who ever went there in that capacity; the date of his mission 1517.

PIRINGER, B., a Germ. engraver, 1776-1826.

PIRON, AIME, a French apothecary, distinguished as a poet, 1640-1727. His son, ALEXIS, a poet, dramatic author, and man of wit, 1689-1773.

PIROT, E., a French theologian, 1631-1713.

PIRRO, R., a Sicilian historian, 1577-1651.

PISAN, C. DE, an Italian poetess, died 1420.

PISANI, N., a Venetian admiral, distinguished in the third war between the Venetians and Genoese,

from 1350 to 1354, when he was taken captive with all his fleet by Paganino Doria. He was released at the conclusion of peace 1355, and died in obscurity. VICTOR, son or nephew of the preceding, obtained a victory over the Genoese at Antium in 1378, and was beaten by Lucien Doria 1379. After three months' imprisonment at Venice he was restored to his command, and captured the whole Genoese fleet at Chioggia. Died 1380.

PISANO, the surname of several distinguished artists of Pisa, very important in the early history of art in Italy. GIUNTA PISANO, or GIUNTA DI GIUSTINO of Pisa, is the earliest known Tuscan painter, and a crucifixion painted by him in the church of Santa Maria degli Angeli, at Assisi, about the year 1236, is still preserved; it is admirable in impasto and absolutely great as a work of art, compared with any thing we know of this early period in Italy. Giunta was anterior to Cimabue. This shows how little reliance is to be placed on local and partial histories, especially where individuals are made heroes of. This picture, of which a fac-simile has been published by the Düsseldorf painter, Ramboux, in his 'Outlines from Tracings, illustrating the Old Christian Art in Italy,' shows that so far from Cimabue being the father of Italian painting, he was scarcely equal to Giunta, certainly inferior in style of drawing. If an individual can have the credit of reviving painting in Italy it must belong to Giunta Pisano, for any thing we know, as yet, to the contrary; he is said to have worked with the Greeks about 1210. There was notoriously an influx of Greek artists into Italy, after the Venetian capture of Constantinople in 1204, but we know of no Greek works equal to this crucifixion by Giunta. There are several other works of his preserved, and the progress of the art was evidently very slow, even down to the time of Masaccio, notwithstanding the great impulse given to it by the works of Giotto. Giunta was not noticed by Vasari. NICCOLA PISANO was equally distinguished as sculptor and architect, and must hold the same rank in the former art that Giunta does in painting. He distinguished himself as early as 1225 at Bologna, where he executed the celebrated tomb of San Domenico. Niccola was also a great architect, he executed the church of the Frari at Venice; he was the pioneer of the *Renaissance* in Italy, in sculpture and in architecture. He died in 1278. GIOVANNI PISANO, the son and assistant of Niccola, and likewise one of the greatest of the early sculptors and architects of Italy, died at Pisa in 1320, and was placed in the same tomb with his father in the Campo Santo. ANDREA PISANO was another early artist of Pisa, but nearly a century later than Giunta; he was a sculptor and architect, and the friend of Giotto, a few years his senior. Andrea was born about 1280. Of several works still extant by Andrea, 'the bronze gates of the Baptistery of St. John' (see Ghiberti) are the most important. These two gates are still perfect; the exact date of their execution is disputed, whether they were finished in 1330, or only commenced in that year. The reliefs are from the life of John the Baptist, and the general design of the gate is said to have been made by Giotto; but Giotto's share, if any, must have been more that of the architect than the sculptor, though even defining the panels and indicating the subjects; he can scarcely have had more to do with the design than this, or his name would have been more intimately associated with them. The work appears to have been modelled by Andrea and his son Nino, and the castings commenced by some Venetian artists in 1330,

and the complete gates to have been finished and gilded in 1339, with the exception of some decorations of the architrave, which were added many years afterwards by Vittorio, the son of Lorenzo Ghiberti, in order to make them harmonize with the other two sets of gates executed by his father. The gates of Andrea were originally in the centre of the Baptistery, opposite to the cathedral, but were afterwards removed to the side, to give place to the more beautiful work of Ghiberti, in the year 1424. Andrea was made citizen of Florence, and died there in 1345; he was buried in the cathedral Santa Maria del Fiore. All three sets of gates have been well engraved in outline by Lasinio, *Le tre Porte del Battisterio di Firenze*. Florence, 1823.—(Vasari, *Vite de Pittori*, &c. Ed. Flor., 1846, seq.; Cicognara, *Storia della Scultura*; Rumohr, *Italienische Forschungen*; Rosini, *Storia della Pittura Italiana*.) [R.N.W.]

PISANSKI, G. C., a Ger. philologist, 1725–90.

PISISTRATUS, a citizen of Athens who raised himself to the sovereign authority in the time of Solon, to whom he was related, B.C. 560. Compelled to retire from the city by the conspiracy of Megacles and Lycærgus, he returned soon after by effecting a compromise, but was obliged to retire again, and suffer an exile of eleven years, which he spent in making preparations to recover his authority. In the eleventh year he reappeared at the head of an army and regained his power, which he retained till his death, B.C. 527. He was a beneficent ruler, and did much to promote the rise of Greek literature. We owe to him the poems of Homer in their present form, Pisistratus having collected them, as they were scattered in detached parts throughout Greece, and digested them into order.

PISSAREF, A., a Russian poet, 1801–1828.

PISSELEU, ANNE DE. See ESTAMPES.

PISTORIUS, a polemic of the 16th century, was born at Nidda, in 1546. He was at first a physician, then a lawyer, and rose to be one of the counsellors of state in the court of Baden Dourlach; but his religious opinions undergoing a change, he took orders, and, as a Romish priest, wrote violently against Lutheranism and its professors. He finally became prelate of the abbey of Fulda, and provost of the cathedral of Breslau, with the rank of imperial counsellor. Died 1608.

PITCAIRNE, ARCHIBALD, an eminent physician, born and educated at Edinburgh, and eventually settled there after holding a professorship at Leyden. He founded his medical system upon his knowledge of mathematics, and wrote several learned works in support of it. Among his more general writings may be mentioned a vindication of the claims of Harvey, 1652–1713.

PITHOIS, C., a French writer, died 1676.

PITHOU, PETER, a French magistrate, profoundly learned as a jurisconsult and philologist, and the first to publish the laws of the Visigoths. He is represented by De Thou as one of the first men of his age, as well for probity, candor, and real piety, as for the extent of his learning, the soundness of his judgment, and his political wisdom; born at Troyes 1539, died 1596. His brother, FRANCIS, also a jurisconsult, 1543–1621.

PITISCUS, BARTHOLOMEW, a German mathematician and astronomer, 1561–1613. His nephew, SAMUEL, a learned philologist, 1637–1717.

PITOT, HENRY, a mathematician, was born in Languedoc, in 1695; and in 1740 was appointed engineer to his native province, and inspector-general of the canal which forms a junction between the Mediterranean and the Bay of Biscay. One of his

principal works was that of supplying Montpelier with water, for which he received the order of St. Michael. He was also a member of the Academy of Sciences, and of the Roy. Society of London. D. 1771.

PITROU, R., a French engineer, 1684–1750.

PITS, JOHN, a native of Southampton, who went to France, and becoming a catholic was protected by the cardinal of Lorraine, known as a theologian and biographer, died 1616.

PITT, CHRISTOPHER, an English clergyman and an elegant poet, was born in 1699, at Blandford, in Dorsetshire; was educated at Winchester and at New College, Oxford; and having obtained the family living of Pimperne, he there passed his life, in the performance of his clerical duties and the cultivation of literature, beloved and respected for his suavity of manners and general benevolence. His poems have considerable merit, and his translations of the 'Æneid' and 'Vida's Art of Poetry' are both tasteful and harmonious. He died in 1748.

PITT, THOMAS, the founder of an illustrious family, was born at St. Mary's, Blandford, in 1653. Towards the end of that century he went to the East Indies, as governor of Fort St. George, where he resided many years, and realized a large fortune; particularly by a diamond (called after him the Pitt diamond) which he purchased for £20,400, and sold to the king of France for somewhat more than five times that sum. A rumor having prevailed in England, that the governor gained this jewel unfairly, and Pope having most unwarrantably given the slander currency, by a sort of poetical adoption of it in the following couplet—

"Asleep and naked as an Indian lay,  
An honest factor stole a gem away,"

he published a narrative containing a fair statement of the transaction, which completely refuted the calumny. In 1716, Mr. Pitt was made governor of Jamaica, but did not hold that situation above a year. He sat in four parliaments, for Old Sarum and Thirsk; died in 1726; and was buried in Blandford church, where a monument was erected to his memory. — His eldest son, ROBERT PITT, of Boscunoc, who died in 1727, was the father of the great Lord Chatham.

[Statue of Pitt, by Chantry in Hanover Square.]

PITT, WILLIAM, the second son of the great Lord Chatham, was born at Hayes in Kent, on the 28th of May, in the year 1759. He was educated at home under private tuition until at the age of fourteen he entered at Cambridge. His biographers are profuse in their testimonies to his precocious capacity

[Holwood Lodge, residence of William Pitt.]

and readiness in acquiring knowledge. He was indeed saturated with tuition of all kinds, and taught from his earliest youth by his haughty father to consider himself the hope of the country. He thus acquired at the age when young men are just ridding themselves of boyish shyness an austere self-possession, which imparted to every thing he did an air of wisdom and authority. He never knew the nature of diffidence, and the easy assurance with which he took whatever duty or office presented itself, is supposed, not without good reason, to have deceived the world as to the extent of his capacity. In January, 1781, he was returned to parliament for Appleby, and at once threw himself into the business of the session with the confidence of an old debater. He boldly adopted the projects of reform, then rising into shape in Britain side by side with the discontents in France, and in 1782 brought on his motion for a reform in the representation of the people. On the accession of Lord Shelburne's administration in July, he was made chancellor of the exchequer, and this invitation to retire from the party who were deemed utopian theorists, showed that a well-founded reliance was placed in his ambition, overcoming his reforming propensities. It was in the December of 1783 that King George dismissed the coalition ministry, and placing young Pitt at the head of the cabinet, conducted with his able championship that battle in which the crown defeated the political aristocracy. Among the statesmen of the day, Dundas, afterwards his right-hand man, had the sagacity to see beforehand that he would be victorious, and to sacrifice other prospects for a participation in his fortune. Once established in power, he ruled through seventeen of the most eventful years of European history. When his reign began he had not quite abandoned his old reforming views, and being well versed in the newly promulgated philosophy of Adam Smith, he was partial to the principle of free trade. But the French revolution drove him back from all progressive projects, and the frightened country submitted to a sort of ministerial and parliamentary despotism. The great conflict in which the young minister of a constitutional country measured his strength with the young military despot of France, is matter of history familiar to all. That Pitt, although perhaps his powers have been somewhat exaggerated by panegyrists, showed great resources cannot be denied. His readiness in debate and promptness in comprehending business have seldom been equalled. What chiefly surprises people of the

present day in the history of his career, is the vast amount of dissipation, and especially of drinking, with which his great labors were diversified; but perhaps his frailties have, like his abilities, been exaggerated. It was said of him that he never was truly young, that he never had the freshness, naturalness, and openness of youth; it is certain that he grew old before his time, and he died of a broken and exhausted constitution, on the 23d of January, 1806. [J.H.B.]

PITTACUS, one of the seven sages of Greece, was a native of Mitylene, in the isle of Lesbos, where he was born about B.C. 650. He was invested with the sovereign power by the people of Athens, and voluntarily abdicated after re-establishing the authority of the laws. Died about 570 B.C.

PITTERI, J. M., a Venetian engraver, 1703-87.

PITTIS, T., an English divine, died 1687.

PITTON, J. S., a Fr. historian, about 1620-90.

PITTONI, J. B., a Venet. painter, 1687-1767.

PITTS, WILLIAM, an English artist, 1790-1840.

PIUS I., pope and saint of Rome, is supposed to have commenced his pontificate, or rather bishoprick, about 152 or 153, and to have died 157. The date of his reign, however, as given by other authorities, is from 127 to 140. He was succeeded by Anicetus. PIUS II. (ÆNEAS SYLVIVS PICCOLOMINI), born 1405, succeeded Calixtus III. 1458, died 1464. He was a great theologian, diplomatist, canonist, historian, orator, and, in fact, a pontiff universally accomplished. He made great efforts to organize a crusade against the Ottomans. PIUS III. (ANTONIO TODESCHINI) enjoyed a pontificate of twenty-five days, 1503. PIUS IV. (GIOV. ANGELO MEDICI, or MEDICINO, of Milan), succeeded Paul IV. 1559, died 1565. In his reign the council of Trent finished its sittings, which lasted from 1545 to 1563. PIUS V. (MICHELE GHISLERI), born of an obscure family in Piedmont 1504, succeeded the preceding 1566, he died 1572. In his reign, the bull *In Cena Domini* was published, which claims privileges for the clergy irreconcilable with the civil authority; he was succeeded by Gregory XIII., and canonized by Clement XI. in 1713. PIUS VI. and PIUS VII. (following articles.) PIUS VIII. (FRANCESCO XAVIERIO CASTIGLIONI), born near Ancona 1761, succeeded Leo XII. 1829, and died after reigning twenty months 1830. His successor was Gregory XVI.

PIUS VI., pope of Rome, by name GIOVANNI ANGELO BRASCHI, descended from a noble family, was born at Cesena 1717, and succeeded Clement XIV., better known as Ganganelli, 15th February, 1775. The first five years of his reign were occupied with public works and economical projects—among others the draining of the Pontine marshes, which helped to embarrass his finances and impoverish the state. In 1780 his political troubles commenced by the accession of Joseph to the power of the empress Queen Maria Theresa, the new emperor being bent on separating the church from the papal jurisdiction. This he did by suppressing a great number of monasteries, forbidding any intercourse between the remainder and Rome, and taking upon himself the nomination of bishops—even of those in Italy. The agitation, intrigues, and social troubles consequent on these proceedings, kept the pope fully occupied till the French revolution; and then, the invasion of Italy by the French occasioned him still greater difficulties. In 1791 Avignon was united to France, the pope pretended to a neutrality which he did not observe, heavy contributions were imposed on him, and Ferrara, Romagna, and the Bolognese, were incorporated with the newly-formed Cisalpine

republic; the price of peace, in fine, was the revocation of the papal edicts launched against the Janse-nists, and the acknowledgment of the civil constitution of the French clergy. Some disorders in Rome between the French and Italians, in course of which the French general Duphot was shot, led to the expedition of Berthier, who arrived in Rome on the 10th of February, 1798, and on the 15th proclaimed it a republic. The Vatican was now occupied by the French troops, the apartment in which the pope sat plundered before his eyes, and even the ring stolen from his finger. He was then taken prisoner, and being carried to France, d. there in Aug., 1799.

PIUS VII., successor of the preceding, by name GREGORIO LUIGI BARNABA CHIARAMONTI, also of noble descent, and a native of Cesena, was born 1740. He became a cardinal in 1785, and in that character propitiated the favor of the French at the period of his predecessor's humiliation. On the fall of Pius VI. the papacy was taken under the protection of the coalesced powers, and just about the time of his death the combined troops of Austria, Russia, and Naples, had succeeded in extinguishing the Roman republic. Cardinal Chiaramonti was elected pope, and took the name of Pius VII., at Venice, on the 13th of March, 1800; at the same time he appointed Cardinal Gonsalvi his secretary. The power of the French revolution was now grasped by the hands of a master spirit, and instead of destroying the papacy, Napoleon was resolved on moulding it to his purposes by whatever force might be necessary. This great man knew that a nation could not subsist without a religion, and that the genius of the French demanded it rather as an institution than an internal life. By the concordat of 1801, he restored catholicism in France, and bound Pius VII. to recognize the independence of the French church. In 1804 the pope was induced to crown the emperor at Paris, hoping, perhaps, to deter him from his purpose of extending the same principles of independence to Germany and Italy. In this effort Pius VII. had the mortification to fail, and as he still resisted the policy of the emperor, the latter, in 1808 and 1809, united all the states of the church to the French empire, and on being excommunicated, arrested the pope himself, and finally carried him prisoner to Fontainebleau. Here, on the 25th of January, 1813, the pope signed a concordat granting all that Napoleon demanded, but retracted again, when the French soon after were expelled from Germany. He now temporized and awaited the issue of events, and was restored to his capital on the 24th of May, 1814, by the coalition of the protestant states, with the house of Austria, against Buonaparte. Gonsalvi now resumed his functions as papal secretary, with a people reduced to servitude under princes who were the mere tools of Austria, and by a fanatical conclave at Rome, who governed by a system of mere terror and corruption—and without the slightest regard for the privileges and prosperity of the papal subjects. In 1817 Pius VII. revoked the concordat of 1801, and concluded a new one with the French crown, one effect of which was the restoration of Avignon. This year, also, he commenced the persecution of the secret societies of patriots, known as the Carbonari, but was a little deterred by the revolutions of 1820 and 1821 in Spain, Naples, and Piedmont; the patriots at the same time being soothed by the friendly disposition of Gonsalvi. Affairs were in this feverish state when the aged pope died, as the result of an accident, on the 20th of August, 1823. His successor was Leo XII. [E.R.]

PIVATI, G. F., an Italian *savant*, 1689–1764.

PIX, MARY, an Eng. dramatist, d. about 1720.

PIXODATUS, a king of Caria, in Asia Minor, only known as the father of Mausoleus and Artimessa, whose names are familiar to history. He flourished in the 4th century B.C.

PIZARRO, FRANCISCO, the conqueror of Peru, was the illegitimate son of a Spanish colonel of infantry and a peasant girl of Estremadura. He was born at Truxillo about 1571. Neglected by his parents, he was suffered to grow up in ignorance and idleness. But he had a strong frame and a bold spirit; and, stirred by the marvellous tales with which Spain was filled about the newly-discovered world beyond the Atlantic, Pizarro left Europe for Hispaniola, and served for many years in the perilous and painful expeditions which Ojeda, Balboa, Pedrarias, and others, led into the interior and to the western coast of the American continent. Pizarro was fifty years old before he obtained the means of undertaking his great enterprise against the Peruvian empire, the wealth and splendor of which had long been rumored among the Spanish settlements on the isthmus of Darien, but which no European had previously dared to attack; so formidable were the reports of its power, and so terrific were the hardships of the voyage and land march, which were to be overcome before the frontier of Peru could be reached. Pizarro's chief associate in his enterprise was Diego Almagro, a soldier of fortune like himself. The first attempt against Peru was made in 1524, but produced nothing beyond the discovery of some islands and parts of the coast of the Pacific, though the sufferings of the adventurers were extreme. Pizarro sailed again from Panama in 1526; and succeeded in exploring part of the Peruvian territory, and entering the wealthy city of Tumbez. Nothing but the most heroic constancy on the part of Pizarro could have overcome the toils and sufferings which he and his little band experienced. On one occasion he and a few followers were detained for several months on an almost barren island. Worn down with famine, cold, and disease, many of the Spaniards wished to abandon the disastrous enterprise and return to Panama. Pizarro assembled them, and traced with his sword a line on the sand from east to west; then turning towards the south, he said, 'Comrades, on that side are toil, hunger, nakedness, the drenching storm, battle, and death. On this side are ease and safety; but on that side lies Peru with its wealth; on this side is Panama and its poverty. Choose, each man, what best becomes a brave Castilian. For my part, I go to the south.' Saying this, Pizarro stepped across the line, and thirteen of his band followed. At the head of this scanty but determined remnant, Pizarro persevered; and the arrival of succor soon enabled him to leave the scene of suffering and trial, and to gain ocular proof of the value of the great prize which he aimed at. In 1528, Pizarro sailed to Spain, and there sought and obtained from Charles V. ample authority and rank for conducting the conquest of the great South American empire, the existence and results of which he was now able to demonstrate. But it was left to the adventurers themselves to provide the means of conquest; and when Pizarro, in January, 1531, sailed from Panama, on his third and last expedition, he had only 180 men under his command, 27 of whom had horses. Some reinforcements reached him after he had landed on the coast near Peru; but the whole force, with which he ultimately advanced into the heart of that empire, did not exceed 110 foot soldiers, 67

cavalry, and two small pieces of artillery called falconets. With this force (aided, however, largely by fraud) Pizarro overthrew the dominion of the Peruvian Incas, which extended over 35 degrees of latitude, over many millions of an orderly, industrious, civilized, and wealthy population, and which was supported by large armies of well disciplined and veteran soldiers. Pizarro, after a march of great difficulty across the mountain chain of the Andes, reached the city of Caxamalca, near which the Peruvian Inca, or sovereign, Atahualpa, was encamped with numerous forces. Pizarro persuaded Atahualpa to visit the Spanish camp, and then suddenly attacked the Peruvians who attended their monarch, and after a frightful massacre succeeded in making the Inca his prisoner. The submission of part of the empire was now easily effected, as the Peruvians obeyed implicitly the commands which their captive monarch issued at the Spaniards' dictation. After immense quantities of gold had been extorted from the natives as a ransom for their sovereign, Pizarro brought him to trial under a charge of exciting insurrection against the Spaniards and put him to death. Pizarro then set up another member of the Peruvian family as Inca, and marched upon Cuzco, the capital of the empire. The Spaniards now encountered frequent and obstinate resistance from the natives; but the terror of the European fire-arms, and of the cavalry, told strongly in favor of the invaders; though consummate generalship and indomitable bravery were also required. Pizarro's skill was ever ready in each emergency, and courage was a quality in which the Spanish soldier was never deficient. Unhappily, he was equally signalized by insatiable avarice, remorseless cruelty, and habits of brutal license and outrage. Cuzco was taken by the Spaniards; and a desperate attempt, which the Indians made a few years afterwards to recapture it, was ultimately repulsed, though not till after the European power in Peru had been brought to the very brink of destruction. Feuds and civil war soon broke out among the conquerors: and Almagro, Pizarro's old comrade, was put to death, after being defeated in a pitched battle which he and his partisans fought against Pizarro's adherents. Pizarro, who now bore the title of marquess, ruled Peru for some time with almost royal power. He had founded the city of Lima as the new capital of Peru, and he devoted himself to its adornment, to planting European settlements in various parts of the provinces, to sending out expeditions of discovery beyond the frontier, and to working the mines, with which the conquered regions abounded. The lot of the natives under him was miserable; and though he lavished wealth and land on his own favorite followers, he treated the other Spaniards, especially those who had followed Almagro, with harshness and contempt. A conspiracy was at last formed against him by some of the surviving friends of that chief. They suddenly attacked Pizarro in his palace on the 26th June, 1541, and killed him after a desperate resistance. [E.S.C.]

PIZZI, J., an Italian writer, 1719–1790.

PLAAT, ANDR. H. J. VANDER, a famous Dutch engineer and hydraulic mechanician, 1761–1819.

PLACE, CL. DE LA, a French priest, 17th cent.

PLACE, FRANCIS, a native of Dinsdale, in the county of Durham. He was bred to the law, and afterwards expended considerable sums in an attempt to make porcelain. He was an excellent painter as well as engraver, but executed all his works for amusement; and he refused a pension of £500 to draw the royal navy. His etchings of land-

scapes and birds are admirable; and his portraits in mezzotinto also prove that he possessed great abilities. Died 1728.

PLACE, FRANCIS, well known as a politician, was born in humble circumstances 1772, and began his public career as secretary to the Constitutional Association, which numbered Hardy and Horne Tooke among its members. He afterwards participated in the agitation for every great measure of reform, and especially in that for the abolition of the corn laws. He was also a great promoter of inventions and the industrial arts. Died 1854.

PLACE, J. DE LA, a Fr. protestant, 1596–1665.

PLACE, PETER DE LA, in Latin *Platanius*, or *Platea*, a French juriconsult, historian, and magistrate, born about 1520, killed at the massacre of St. Bartholomew, 1572.

PLACE, P. A. DE LA, a French novelist and dramatic writer, once editor of the *Mercury*, 1707–93.

PLACENTINUS, or PLACENTIUS, PETER, author of a Latin poem, entitled 'Pugna Porcorum' in 360 verses, every word of which begins with a P, died about 1548.

PLACETTE, J. DE LA, a Fr. protes., 1639–1718.

PLACIDIA, daughter of Theodosius the Great, born at Constantinople about 388, became, in second nuptials, the wife of Constantius, a general of Honorius. Her son by him became emperor of the West under the title of Valentinian III., but the government was really administered by the empress-mother Placidia. Died at Rome 450.

PLANCHE, R. DE LA, a Fr. historian, 16th cent.

PLANCHER, URBAIN, a learned Benedictine of St. Maur, author of a history of Burgundy, d. 1750.

PLANCIUS, P., a Flem. protestant, 1552–1622.

PLANCUS, LUCIUS, a Roman tribune and consul, supposed founder of Lyons, died about 12.

PLANCY, W., a French Hellenist, died 1568.

PLANER, J. J., a German botanist, 1745–1789.

PLANK, T. J., a German historian, 1751–1833.

PLANQUE, F., a French physician, 1696–1765.

PLANT, J. T., a German writer, 1758–1794.

PLANTA, JOSEPH, minister of the German Reformed Church in London, librarian of the British Museum, and historian of the Helvetic Confederacy, 1744–1827.

PLARTIN, C., a French printer, 1514–1589.

PLATEN, D. F. DE, a Pruss. general, 1714–87.

PLATER, F., a physician of Basle, 1536–1614.

PLATIERE, IMBERT DE LA, a French general, known as the marshal de Bourdillon, died 1567.

PLATINA, BARTOLOMEO, an historian, whose real name was Sacchi, was born in 1421. Having fallen under the displeasure of pope Pius II., he was imprisoned and put to the rack, on a charge of being implicated in a conspiracy against him. His sufferings, however, were afterwards recompensed by Sixtus IV., who, in 1475, made him keeper of the Vatican library. His principal work, composed in elegant Latin, is a history of the 'Lives of the Roman Pontiffs.' He also wrote, in Latin, a 'History of Mantua.' Died 1481.

PLATNER, JOHN ZACHARY, an eminent surgical writer and professor at Leipzig, 1694–1747. His son, ERNEST, a physician, moralist, and metaphysician, 1744–1818.

PLATO, born at Athens or Egina about 430 B.C.; died in his eightieth year. There is no other name in Speculative Philosophy like Plato's. He stands to the whole world of Thought, as Shakspeare in Modern Times; not unapproachable, neither unapproached, but possessing an unchallengeable and scarcely explicable supremacy. It is very wonderful—the

[Plato, from an Ancient Gem.]

catholic power and insight of this illustrious man, the entireness of his knowledge and sympathy, and of course the reach of his intuitions. M. COUSIN has recently claimed him as an *Eclectic*; falsely, if by the epithet, he would indicate a philosopher who *selects*; who, roaming through all by-gone speculations, has found a piece here and a piece there, and then fused them cunningly, so that neither Sect nor solitary Thinker might feel that he or it had no part in him: but, with truth in the highest degree, if he desired to claim for the mind of Plato a range so vast, a power to adventure so deep and soar so high, that, what all schools pre-existent, and that have flourished since, saw only partially, he saw completely, and so could round off their contentions, and adjust their correspondences into one grand Orb. The first and most general view we can take of him, tends directly towards such an estimate. Greece—and the preceding and subsequent World as well—was divided between two opposing inclinations, that evolved two hostile camps; the one searching after Unity alone,—the other finding in Phenomena the secret of Things. PLATO, grasped both, with all the force of his powerful and perfectly balanced Soul: he comprehended both sides of the medal of Jove. Athirst, at every moment of his life, and in every movement of his mind, for intercourse with that Absolute Good, which is the Universal Lawgiver, and for whose sake all things are,—he has yet sympathy as thorough, with every discursive tendency of the Intellect, rejoicing in its activities and distinctions, loving Art and Politics, and Human Interests and Laws, no less than the most mundane philosopher of them all. Turn one phase of the Mind of Plato towards Modern Europe, there is no feature of our ever shifting physiognomy—not an event amid the buzz, and whirling around us—on which he would not have cast some welcome light: carry him to Egypt or the land of Menu—there too, he would have felt at home, only aloft, because nearer the centre of Universal Life, than those already absorbed, emotionless Eremites. Notice his *Theodicee*. On the one hand MATTER, the slave of *Necessity*, and itself without Order; on the other, God, *Intelligence*, and *Freedom* transforming and organizing for ever, this rude Substance—incited by his Eternal Goodness: the Idea of Good laboring ever more to emerge through multiplying forms into clearer and clearer expression: hence that march ever onward; hence, also, the possibility of Wisdom and Philosophy. From the extreme beginnings of Thought, what School which has ascended among the Mysteries, ever elaborated a fairer Synthesis? It is not merely the profundity,

but this very spaciousness of Plato, which renders the due comprehension of him arduous. A System, one can at any time survey: but a noble and a full grown Soul, is in variety as well as reach, a type of the incomprehensible Universe: didactic Thinkers, even so great as ARISTOTLE, may by dint of earnestness be gone round and round; but what formula is adequate for a SHAKSPEARE, or a GOETHE? A free Genius, instinct with Poetry as with Knowledge, with which Science is not higher than Art, and which permits no single Faculty to be exclusive, can be defined only by its unexhausted Influence over the unfolding of the World, and therefore belongs essentially to the category of the Inexpressible. Nevertheless the student must be imperatively warned against those ordinary complaints of ordinary interpreters of Plato. No man ever wrote more clearly. The Truths he utters, are often hard to realize; but the Expression is transparent as a mountain brook: no marvel though Plato has been held in this country obscure, seeing that a similar charge is laid, and moderately approved, against a writer of a much more limited order, but in distinctness and precision not inferior to old Euclid himself,—IMMANUEL KANT! It seems too, that Plato is a *Mystic*, and veils, or even defaces Truth, through the excesses of his *Imagination*. Plato is as real as his immortal master: he is not a Mystic, unless SOCRATES was one. *Imagination*, he has to overflowing. BEAUTY hovers ever over him, and immortal fragrance is shed on the fluttering of her wings. The music of his periods reminds one of the murmuring of the Bees on Hymmetus. But Plato's sense of Beauty, only led him nearer to the Centre and Cause of Existence; and his Imagination—unlike fashionable freaks of Fancy—was the purest and loftiest phase of the REASON; it helped him to the discernment of pure Truth, because liker than any other Faculty in the Finite Mind, to the Creative Thought which preluded the birth of these myriads of gorgeous Worlds.—In proceeding to give an account of Plato's writings, we desire to acknowledge our obligations to the sketch by Mr. MAURICE. Unless, in one or two points, at which we may detect the presence of the general Theory of the accomplished Writer, that sketch quite surpasses in its method and sympathy every other known to us:—on behalf of SCHLEIERMACHER, an exception might indeed be entered; but we cannot be detained by AST or SOCHER. Taught by SOCRATES, it could in no wise fail, that Plato should discern, equally with his Master, that the first step in Philosophy, is to persuade men to ascertain that they *know* what they *talk* of—that they really comprehend the significance of the propositions on whose behalf they are prepared to contend. No form or vehicle for teaching could so well subserve this purpose as the Dialogue: it was the written representative of the unforgotten way-side interrogatories of Socrates; and in the hands of Plato—who, as we have said, held Reality as firmly as he held Speculation—the Dialogue was no fiction, but an actual ascent, through the obstructions of Individual Character and Virtues, up towards unseen and manifold *Truths*, lying as a substratum underneath the most vague and confused *Opinion*. How superbly, in this respect, each dialogue unwinds! Never to discourage, far less to countenance the faintest element of Doubt, but to awaken the Conscience, and show Mankind that, superior to shadow-land, there is Reality and Light;—for this, and no lesser purpose, Plato followed his immortal Master, and constructed and exemplified that unrivalled Dialectic. In the *first* (speaking according

to *Method*, not to *Time*) class of the Platonic Dialogues, we find accordingly, an earnest effort to establish the cardinal Truth, that even beneath Fantasy there is Substance; that beneath whatever *end* has been seriously pursued as a true end by Humanity, there is something, which if disentangled from the adventitious, would appear adequate as a purpose to arrest the attention of a healthful mind. While fusing in this way the *Cyrenaic*, *Cynic*, and *Megaric* Schools,—i. e. divesting them of their speciality and exaggeration, Plato, once and again, demonstrates that the main error betokened by incomplete systems, is not the mere incompleteness of such assertions as—'Pleasure is the Good'—'Self-denial is the Good'—'Being is the Good;' but that it lies in the carelessness, often amounting to moral inaptitude for all inquiry, which hinders men from distinguishing between the *reality* inhering in the proposition they maintain, and its simple *accidents*. And his invariable inference is, that the mental condition adequate to Inquiry, is indeed a high *moral* attainment; for that he only who governs himself, who has subjected himself to continuous discipline, and can restrain his lower Nature, will ever be capable of that highest exercise of the Faculties which conducts to Truth. It may be asserted with all justice—that, which, ages afterwards, BACON accomplished for Physical Investigations, by his masterly exposition of the misleading *Idole*, Plato in the course of his Dialogues has thoroughly accomplished, in a way not less masterly, for the wider and more arduous sphere of Moral and Social Inquiry. Men have long practically acknowledged the authority of the dicta of Bacon: unhappily they are as yet little skilled in the precepts of the more ancient *Organon*.—In the *second* class of the Platonic Dialogues, we are led to a more difficult order of contemplations;—our Inquirer now passing to the Ante-Socratic Philosophers, and discoursing of *Xenophanes*, *Parmenides*, *Heraclitus*. It is singular that extremes almost always meet:—*Xenophanes* and *Heraclitus*, or—still farther down—*Protagoras*, no sympathy can bind them, and yet we can trace a closest resemblance. Did not Xenophanes simply inculcate, that, of BEING however real, Man can know nothing? And Protagoras, holding by the flux of Heraclitus, only went to say, that, immersed amid *notions*, and subject to temperament and circumstance, each Man is reduced to frame a Universe for himself. Plato confronted, while, in one sense, accepting both; and during the polemic that ensues, we find gradually coming out into prominent relief, that chief peculiarity of what we may term his Metaphysics, viz.: the DOCTRINE of IDEAS. Most true, with Xenophanes, that BEING, or the Parmenidean ONE, is not representible or expressible, by the floating confused notions which occupy the sensual understanding: nevertheless, is not the existence of these very notions—these efforts, however imperfect, of the Understanding, to express it,—proof that there is in Being a reality to be expressed; nay that attributes belong to it, in so far answering to these notions? So also with *Protagoras*; it is very certain that men practically differ as to the Actions and Forms, entitled to rank under the Categories of Justice, Goodness, and Beauty; but is there not inherent in all men, conviction of the existence of a very Just, a very Good, a very Beautiful,—else, whence sprung those imperfect notions, and what upholds them? Thus far, it is evident that Plato merely asserts the reality of what in modern nomenclature we term *Absolute Truths*; but thereupon the question arises, what are these, and whence come they? How does

the Mind reach them? Can knowledge reposing on mere *Negations*, or on the *Contingent*, ever take on the character of the *Absolute*? Many of our Modern Philosophies have remained satisfied with asserting the existence of Absolute Truths, and offering an enumeration of them. KANT it will be recollected, went farther—he found the *Origin* of the characteristics of *Universality* and *Necessity*, in *Laws* or *Conditions* of the Thinking Organism: that element of our Judgments, he said, is absolute, which—irrespective of their subject-matter—depends on the mind's own essential structure:—*absolutism* with him has thus a purely *subjective* origin. The immortal Greek adventured beyond both. Too scientific to remain with mere enumerations; neither was he arrested, like Kant, at the boundary of mere subjective knowledge: he considered that Absolute Truths or IDEAS, conduct us towards the mist-enshrouded coast of ONTOLOGY—directly connecting the FINITE Mind with the INFINITE. The general cast of his remarkable conception, is the following. Of all things that exist, there are pure forms or archetypes, imperfectly discerned by our senses and sensual understanding; but in the cognition of which alone, *Knowledge*, as distinguished from *Opinion*, consists. This *Form*, or *Archetype*, or *Idea*, is a Thing's very *Essence*: it is the only reality belonging to it. Far from being a notion or conclusion framed by the Mind, it is wholly independent of the perceiving mind; and is felt to be so, whenever true Knowledge is attained. Man, therefore, is not a system-builder; his loftiest attainment reaches no higher than this,—through endeavor, through discipline, through virtue, he may *see* what *is*. Neither, however, are those substantial archetypal Forms in themselves independent. Every Idea depends on some one superior to it, and the root, consummation, and harmony of all, is in the Idea of that Supreme and Perfect Being, to whom, as Thoughts, they belong; and in whose proper Eternity alone, they can be thought of as Eternal. Assuredly we seek not to defend this Platonic system here; scarcely, we fear, have the few words permitted us, availed to offer more than a vague hint of it. Let the student, however, ponder well, on what *Knowledge* must have meant, as conceived by Plato—how lofty the aim of his *Dialectic*—how *real* his objects, and how worthy the energies of, perhaps, the most gifted speculative Genius who has left his impress upon the Earth! Nay, much lower, if our reader has made himself acquainted, through History, with its various proposals regarding this thorny problem as to Knowledge, let him reflect on what these have offered, in relation to that which our Human Spirit demands—and say which of them all has recognized the conditions of that problem, or—down even to this latter day—succeeded in satisfying these, better than Plato's?—Of the *third* chief class of the Dialogues, we have no space to say any thing adequate. Having established the nature of Knowledge and the way to attain it, Plato proceeds to search after Unity in every sphere of Inquiry—in reference to *Man*, *Society*, and *Nature*. Of Plato's Physics as unfolded in that puzzling and wonderful *Timæus*, we decline to speak:—let us just glance at his method and results in social speculation, as set forth in the *Republic*:—earnestly recommending to the English reader the study of the work itself, by aid of the recent translation by Messrs. Vaughan and Davies of Cambridge. The dialogue opens, as usual, dramatically. But as soon as the characters are defined, the question is mooted whether *Justice* is something eternal, or the mere Creature of Society—that is, whether Society has a basis in some

principle of Unity, independent of shifting forms. What then is *Justice* in a *State*? As shown in the first two books, there cannot be two kinds of Justice—a private Justice and a state Justice; the bond which unites man to his fellow, and no other, is the bond which bestows on every Society its proper degree of coherence. In illustration, take up the picture of an actual Society, and criticise its arrangements. Nowhere is Plato less a mere speculator than in this part of the *Republic*. So far from being an *Utopian*, he starts with the premise that every selfishness exists, and every evil result of it: and his practical question is, under what conditions Society may nevertheless cohere? Would that the ensuing discussion had been accepted as a lesson by all Time! Not concerning himself with *outward* or *police* regulations for the *repression* of evil, Plato inquires, what are the Principles of Life in any possible Society, and how they may best be developed? And his extensive treatment of this momentous subject has caused the Republic sometimes to be accounted a formal Essay on Education. Classes are named as essential to all living Societies—the Magistracy representing the idea of Wisdom—Guardians representing the idea of Fortitude—and the Masses, subsisting through temperance of desire, self-restraining and submitting. Underneath all which, lies the fundamental conception of Justice, *that*, by the assertion of whose Supremacy, he preluded the whole. There are parts of this superb dialogue so far reaching, that the conflicts and consequent morals of Modern Civilization can hardly as yet find appreciation for them. We refer especially to what has been termed Plato's *Communism* and his views of the ultimate relation of the *Sexes*. Concerning Problems, whose practical solution lies in the Future, it is wisest not to pronounce over absolutely: suffice it to refer only with indignation to the uses made of his doctrines here to disparage his great name. Again referring to the Dialogue itself, we must close this brief notice. The wisdom of Plato has taught and nourished the most learned and the greatest of past times: there is no healthier exercise for the earnest man now, than the study of his works. Nay there are errors all around us—errors in practical and speculative Politics, errors in speculative Religion—having their roots deep in the imperfect portions of our Modern Civilization, which can find nowhere a surer corrective. The best edition of the works of this immortal Greek, is the recent one by Stallbaum.

[J.P.N.]

[This is the account furnished by the learned professor of astronomy in the university of Glasgow. As the reader may naturally expect to find something of the *biography* of Plato in this book, the following is subjoined:]

Plato, in his youth applied himself to poetry and painting, both which pursuits he relinquished to become a disciple of Socrates. During the imprisonment of his master, Plato attended him and committed to writing his last discourses upon the Immortality of the Soul. He then retired to Megara; after which he extended his travels to Magna Græcia and Egypt. On his return to Athens he formed his school in a grove, called the Academy, over the door of which seminary was this inscription, 'Let no one ignorant of geometry enter here.' He was soon attended by a crowd of hearers of every description; and among other illustrious names to be ranked among his disciples, are those of Dion, Aristotle, Hyperides, Lycurgus, Demosthenes, and Isocrates. The ancients thought more highly of him than of all their philosophers, and

always called him the Divine Plato. Tully, whose regard and veneration for him were boundless, observes that he was justly called by Panætius, the divine, the most wise, the most sacred, the Homer of philosophers; and made him so implicitly his guide in wisdom and philosophy, as to declare, that he had rather err with Plato, than be right with any one else. He thrice visited the court of Sicily; once invited by the elder Dionysius, and twice by the younger. The former he so much offended, that the tyrant caused him to be seized on his passage home, and sold for a slave; and the philosopher was indebted for his liberation to Aniceris of Cyrene. On his return to Athens, Plato resumed his school, and no persuasion could afterwards induce him to quit his peaceful retirement. At his death, which happened in his 79th year, B.C. 348, statues and altars were erected to his memory; and the day of his birth was long celebrated as a festival.

PLATO, a Greek poet, 5th century B.C.

PLATOFF, Count, a celebrated hetman of the Cossacks, was born in the southern part of Russia, about 1763. He entered young into the military service, distinguished himself against the Turks in Moldavia, and was made a general of cavalry. When the French invaded Russia in 1812, Platoff, with twenty regiments of Cossacks, harassed them in their flight, and contributed greatly to the advantages gained over them. He came with the emperor Alexander to England, and, at London, was the object of popular admiration. He retired to the river Don, and died in 1818.

PLATON, BEFFSCHIN, a Russian prelate, and distinguished theological writer, 1737-1812.

PLAUTUS, TITUS MACCIUS, regarded as the father of Latin comedy, is supposed to have been of mean parentage, and was born in Umbria about 227 or 224 B.C. About twenty-one of his plays are still extant, the vast number attributed to him having been reduced within that limit by the critic Varro. These have been frequently translated into Italian, French, German, and English, and Lessing has devoted an essay to the life and writings of Plautus. D. B.C. 184.

PLAYFAIR, JOHN, Professor, first of Mathematics, and then of Natural Philosophy in the University of Edinburgh; born 10th March, 1749, at the Manse of Benvie, Forfarshire; died at Edinburgh, 19th July, 1819. Mr. Playfair, the son of a Scottish clergyman, was destined for the Church; and indeed he occupied the living of Liff and Benvie, for a few years after the death of his father in 1773; but his scientific and literary tastes, and the power he could bring to the illustration of whatever scientific subject arrested his attention, quickly embarked him on a different and very distinguished career. His bent towards Science, manifested itself quite early in life; for, previous to the date just mentioned, he had stood, although a young man, competitor for several Chairs in our Scottish Universities: in his earliest attempt in Marischal College, Aberdeen, he was defeated only by the veterans Trail and Hamilton. From the manse of Benvie, he passed, after a short interval of connection with Mr. Ferguson of Raith, to the joint professorship (in company with Dr. Adam Ferguson) of Mathematics in Edinburgh; and from that year—1785—he devoted himself, with remarkable success, to the advancement and adornment of all leading Inquiries concerning the Laws of Nature. Were proof needed of Playfair's unrelenting activity in the path of his affections, surely that is ample which the pages of the *Edinburgh Review* and of the *Edinburgh Philosophical Transactions*, will, to posterity, always afford. But activity was not his chief charac-

teristic. With the instinct of a Mind placed above the Inquiry of its time, and therefore desecrating its headlands, or the points at which it was passing farthest into the unknown, he seldom thought or wrote, unless on those questions on whose solution in either way, depended the shape and course of some opening and future science. To Playfair, Scotland owes its introduction to the arduous works of Laplace; it was he who first publicly explained the value and criticised the methods of great National Surveys; he was the exponent of the labors of Maskelyne, in determining the density of our globe; earliest he broke ground on the subject of Imaginary quantities, and renewed discussion on Porisms; he led the way in modern Geology by his masterly Illustrations of the Huttonian Theory of the Earth; and he left as a model for Scientific Histories, that exquisite, although unfinished 'Dissertation on the Progress of Mathematical and Physical Science,' which prefaces the recent Editions of the *Encyclopædia Britannica*. Playfair was distinguished by higher attributes. No man ever excelled him in the power of effective exposition; and this is equivalent to asserting that he had that appreciation of *Method*, which appertains only to minds of the highest order, for it involves an almost instinctive power of separating between the important and the unimportant, and seizing the features of that Harmony, which underlies all phenomena. An *intuition*, we say; for the gift seems inexplicable, unless as an expression more or less distinct, of that correlation between Mind and the external Universe, which LEIBNITZ designated as a *Pre-established Harmony*. But even these excellences, great and rare as they are, do not in our estimation equal another—viz.: the exquisite temper and *wholeness* of the Man. The memory of Playfair has yet scarcely faded amid the best circles of Edinburgh; and affection for him, is, with many, as an heir-loom or favorite tradition that will descend. He was an example, in all things, of what *culture*—apart from mere *attainment*—can make a Man. The finest passage of the Roman Orator in his *Archias*, or the well-known lines of OVID:—

—ingenuas didicisse fideliter artes,  
Emollit mores, nec sinit esse feros;

when laid beside practical life and actual character, seem oftener a satire than a laudation; but Playfair might have recited them and never blushed. Mild and manly, liberal, generous and sedate, the best of the rising minds of his time thronged around him, and drew strength and fair resolve from the symmetrical nature they contemplated. It is a good thing to advance science by original discovery; but infinitely greater that scientific thought should advance and emancipate the Man. The Scottish Metropolis was at that period rarely fortunate. Besides Playfair, Dugald Stewart taught,—a man of corresponding equality and command of temper, of singular openness and moral reach. Others resembled them; for, in virtue of their power of assimilation, two Minds so distinguished, could not stand alone. Nor must we omit from the list, Professor John Millar of Glasgow—author of the *Historical View of the English Government*. It is not too much to say, that by giving tone and expansion to the hearts and intellects around them, and growing up under their care, these remarkable persons have exercised most important influence on the recent progress of Britain, and thus on the destinies of the world. [J.P.N.]

PLAYFAIR, WILLIAM, brother of the preceding, born in 1759, was an ingenious projector and author. After serving an apprenticeship to a millwright, he

was engaged as a draughtsman at Boulton and Watt's establishment, Soho, Birmingham. On coming to London, he obtained patents for various inventions, and engaged in many speculations, became a fertile writer on politics and other subjects, and died in 1823. His most important publications are, 'A Commercial and Political Atlas,' 'An Inquiry into the Decline and Fall of Nations,' 'France as it is,' 'History of Jacobinism,' and 'British Family Antiquity.'

PLAYFORD, J., a writer on music, 1613-1693.

PLEE, A., a French botanist, died 1825.

PLEYEL, J., an Austrian pianist, 1757-1833.

PLINY, the Elder, (Caius Plinius Secundus,) a distinguished writer on natural history and botany, was born A.D. 23, most probably at Novocomum, the modern Como (though Verona disputes with it the honor of being his birth-place). He died in A.D. 79. Inferior in grasp of intellect, but ranking only second to Aristotle as a natural historian, the name of Pliny shines out through the mist of antiquity with particular lustre. In his youth he served in the army, and in his more mature years held some important appointments in the state. Possessing an extraordinary aptitude for collecting information, and endowed with an amazing love for study, his whole life was devoted to the prosecution of scientific pursuits. Rising before day-break, the early part of the morning was employed by him as his time for transacting business. The rest of the day was spent in study, and even during his meals, while taking his bath, or while on a journey, he had a reader attending him, to read from some favorite author. He took notes from every work he read, for he used to say, 'There was no book so bad but what might afford something valuable to be derived from it.' His writings were numerous, but the only one that has reached our times is his famous 'Natural History.' This great work is a perfect mine of observations; though unfortunately the true and the fabulous are mixed up in nearly equal proportions. It contains, he says himself, extracts from no fewer than 2,000 volumes, from authors of all kinds, travellers, historians, geographers, philosophers, and physicians. He devotes part of it to the natural history of animals, and in the four books which treat of them, he has amassed an immense number of facts, such as they were known and believed at that time. The only arrangement he adopts is according to their size or importance. The part which treats of botany, occupies a much larger space; ten books containing the history of plants, and five, the remedies derived from them. It is unfortunately impossible now to recognize many of the plants he has described; but his merits as a botanist or zoologist are not to be judged of by comparing his knowledge with ours, but by recollecting the age in which he lived, and the effects which his works have had in keeping alive the knowledge of nature during the dark ages which succeeded him. His death was remarkable. During a tremendous eruption of Mount Vesuvius, Pliny, who had then the command of the fleet, wishing to save the poor inhabitants of the country in the neighborhood of the volcano, and, at the same time, anxious to examine in person the awful phenomenon, sailed to the scene of terror, and was unfortunately suffocated by the noxious fumes. It is generally believed that this was the same eruption of Vesuvius that destroyed Herculaneum. [W.B.]

PLINY, the Younger, a nephew and adopted son of the preceding, distinguished as an orator, historian, and statesman, was born at Como in 61 or 62. His mother, Plinia, was a sister of Pliny the Elder,

[Pliny the Younger, from an Ancient Bust.]

and he remained under the care of the latter till his eighteenth year, when the eruption of Vesuvius took place, which proved fatal to his protector. He began his career as a Roman advocate the year following, and in the reign of Trajan held a government in Bithynia. The time of his death is uncertain.

PLOT, ROBERT, a naturalist, was born in 1640, at Borden, in Kent; was educated at Magdalen College, Oxford, where he graduated as LL.D.; became one of the secretaries of the Royal Society, royal historiographer, archivist of the herald's office, &c.; and died in 1696. His chief works are, 'The Natural Histories of Oxfordshire and Staffordshire.'

PLOTINUS, the most famous teacher of the new Platonic school, was born at Lycopolis in Egypt about A.D. 204. The original bent of his mind was to speculation, and he had prosecuted such studies under Ammonias Saccas, at Alexandria, for eleven years, when, in his thirty-ninth year, he joined the expedition of Gordian against the Parthians, as a means of enabling him to study the philosophy of the East. At the emperor's death he found his way back to Antioch, and afterwards went to Rome, where he taught for six-and-twenty years with great popularity, and where he gradually developed his system and composed many books, which were corrected and arranged by his pupil Porphyry. He died in Campania in A.D. 274. Porphyry divided his master's 54 books into six *Æneads*, or sections of nine. The metaphysics of Plotinus are obscure in their subtlety, though Plato was his acknowledged guide and pattern. He held that in order to perfect knowledge, the subject and object must be united, that the intelligent agent and the thing understood—the apprehending and the apprehended, must not be in separation; the spirit having every thing spiritual within itself. Great stress was laid by him upon pure intuition, as in some one of its gleams even the absolute and unconditioned might be discovered. Out of the spirit is developed the soul, which is brought into contact with the sensuous world. Plotinus had learned Eclecticism from Ammonius, but he added to it a mysticism peculiar to himself, while he attempted to clothe Paganism in the garb of a philosophical theism. Probably towards the end of his life his transcendental visions and ecstasies were the result of a diseased organization, which had been reduced and emaciated by continued abstinence. His system acquired great popularity in subsequent years, and sometimes opposed

Christianity and often modified it. Creuzer's edition of Plotinus in 3 vols. 4to was printed at the Oxford University press in 1835, and the *Æneads* appeared in a Latin translation by Marsilius Ficinus, Florence, 1492. [J.E.]

PLoucQUET, G., a German metaphysician, 1716-90.

PLowDEN, CHARLES, a Jesuit, born in England, in 1743, but educated at Rome, where he entered into the society in 1779. On his return to his own country after the suppression of his order in 1773, he was one of the most zealous advocates for their reuniting in England. He afterwards became president of the Catholic College of Stonyhurst, in Lancashire, and died in 1821.

PLowDEN, EDMUND, a Catholic lawyer, author of 'Commentaries and Reports,' 1517-1584.

PLowDEN, FRANCIS, an historian and miscellaneous writer, was a native of Ireland, and by profession a barrister and conveyancer. He was the author of 'Jura Anglorum,' 'Church and State,' 'A Treatise upon the law of Usury and Annuities,' and 'The History of Ireland.' In consequence of a verdict obtained against him for a libel in the latter work, with £5000 damages, he retired to France, where he afterwards resided; and died, at an advanced age, in 1829.

PLUCHE, NOEL A., a professor of rhetoric at Rheims, distinguished as a naturalist and man of letters, and for his opposition to the bull 'Unigenitus.' He is author of 'Spectacle de la Nature,' 9 vols., 'Histoire du Ciel, Idées des Poètes, des Philosophes et de Moïse,' 2 vols., 'La Mécanique des Langues,' and some lesser works, 1688-1761.

PLUMER, WILLIAM, an Amer. poetical writer, died 1854.

PLUMIER, C., a French botanist, 1646-1706.

PLUMPTRE, JAMES, a Church of England minister, known as a miscellaneous wr., 1770-1832.

PLUNKENET, L., an Eng. Botanist, 1642-1710.

PLUNKET, OLIVER, a Roman Catholic prelate, executed on a false charge of treason, 1681.

PLUNKET, WILLIAM CONYNGHAM, Lord, was the son of the Rev. Thomas Plunket, pastor of a presbyterian congregation, Enniskillen, Ireland. He was born there in 1761: and after practising with success as a barrister, became a member of the Irish parliament, under the patronage of Lord Charlemont. He soon distinguished himself in opposition to the government, and especially in resisting the legislative union, notwithstanding which he appeared for the crown on the prosecution of the patriot, Emmett, and addressed the jury with inhuman earnestness, in order to dissociate himself, it is said, from the failing fortunes of those who were once his friends. Promotion followed as a matter of course. In 1803 he became solicitor-general for Ireland, and two years later attorney-general, from which time his rising fortunes were associated with those of Grenville and Fox in the government. In 1806-7 he was a member of the Whig cabinet with Lord Grenville and the late Earl Grey, and for many years afterwards was attached to the political interests of the former. The discontent which pervaded the country at the period of the Manchester massacre, and, in fact, to the end of the Castlereagh government in 1822, found no sympathy in the bosom of Lord Plunket, who earned the gratitude of the Tories by his oratorical services in the extenuation of their errors, and the defence of their policy. As the first law officer of the Irish government during the vice-royalty of Lord Wellesley, in the time of

Canning, he shared in their general unpopularity, but somewhat later he acquired great credit by promoting the act of Catholic emancipation. In 1827 he was raised to the peerage, and from that time to 1830 was chief justice of the Common Pleas in Ireland. After the retirement of Wellington, Lord Plunket had no further share in the legislation of the country, but remained chancellor of Ireland under the Whigs for many subsequent years, being succeeded in that office by Lord Campbell. His public life ended in 1841, and he died at the advanced age of 89, in January, 1854. [E.R.]

PLUQUET, FRANCIS ANDREW ADRIAN, a learned French abbé, author of a 'Dictionary of Heresies,' 'Essay on Luxury,' and 'The Classical Books of the Chinese,' 1716-1790.

[Plutarch, from an Ancient Gem.]

PLUTARCH (PLUTARCHUS), was a native of Chaeronea, a city of Bœotia. The time of his birth is uncertain. From the few facts which he has recorded of himself, we learn that he was studying philosophy under Ammonius, at Delphi, when the Emperor Nero made his progress through Greece in the twelfth year of his reign, A.D. 66. His family was one of some importance in Chaeronea, and members of it had held the highest civic offices in their native city. Of the events of his life, very little is known. It appears from his writings that he visited Italy and Rome, perhaps more than once; and that he delivered lectures in his vernacular language on philosophy, in the imperial city, during the reign of Domitian, which were attended by most of those who pretended to be employed in the study of philosophy. It is probable that the substance of these lectures was afterwards embodied in his moral writings. At a late period in life he began to read the Latin authors, having, as he states, during his residence in Italy, been prevented from acquiring a knowledge of the language by the circumstance of 'having so many commissions to execute, and so many people coming to him to receive his instructions in philosophy.' The latter part of his life was spent in honor and comfort in his native city, where he passed through various magisterial offices, and enjoyed the honor and emoluments of a priesthood. He had four sons and a daughter. The time and circumstances of his death are unknown; but his intellectual attainments and character have been transmitted to us in his works. The great work, which has immortalized the name of Plutarch, is his 'Parallel Lives,' which contains the biography of forty-six distinguished Greeks and Romans. The Lives are arranged in pairs, each pair containing the life of a Greek and a Roman, followed by a com-

parative estimate of the two. In a few cases the comparative estimate is omitted or lost. Besides these there are four other biographies which were written by Plutarch, and a life of Homer, which is sometimes attributed to him. Fifteen other biographies have been lost. Few of the ancient writers have attained so extensive celebrity as Plutarch. His 'Parallel Lives' have delighted and instructed every successive generation since they were given to the world; and are equally acceptable to people of every age and class. As materials for history they have been found not altogether trustworthy; but the chief object of the author was to delineate character as exhibited by the events of a man's life, whether these were important or trifling, and without a strict regard to the order in which they occurred. His other writings, which amount to upwards of sixty, are comprehended under the title of 'Moralia,' or 'Ethical Works;' though some of these are of an historical or anecdotal character. In all his writings a moral end is apparent. 'A kind, humane disposition, and a love of every thing that is ennobling and excellent, pervade his writings, and give the reader the same kind of pleasure that he has in the company of an esteemed friend, whose singleness of heart appears in every thing that he says or does.'

[G.F.]

POCAHONTAS, a celebrated Indian girl, the daughter of Powhatan, the chief of the Indians of Virginia. She saved the life of the celebrated Captain Smith, who was taken prisoner in 1607, and was about being executed. Smith's head had been placed on a stone, and the club raised to dash out his brains, when the youthful Pocahontas flew to the spot, and interposed her own head between the threatened blows and Captain Smith. The Englishman's life was spared by the savage Powhatan out of love for his daughter. On another occasion she saved the whole colony of the English, by disclosing to Captain Smith a plot on the part of the Indians to destroy it. She fell in love with John Rolfe, an English gentleman, who married her, and took her with him to England, (she having been previously baptized as a Christian,) and received with distinction at court. On preparing to embark for her native Virginia in 1617, she died at Gravesend, at the early age of 22. She left one son, Thomas Rolfe, from whom some of the best families in Virginia are descended, among which was that of the statesman, John Randolph.

POCHARD, J., a French theologian, 1715-1786.

POCOCK, EDWARD, son of a minister of the Church of England, bearing the same name, was born at Oxford 1604, died 1691. He is greatly distinguished as an Oriental scholar, and for his learning as a theologian. His eldest son, EDWARD, published, in 1671, the 'Life of Hai Ebn Yokdan,' translated into English by Ockley; and his son, THOMAS, a translation from Menasseh Ben Israel 'On the Term of Life,' 1699.

POCOCK, SIR G., a brave admiral, 1706-1762.

POCOCK, ISAAC, a native of Bristol, first known as an historical painter, and afterwards as a prolific writer for the stage, 1782-1835.

POCOCKE, RICHARD, a learned prelate and traveller, was born at Southampton, in 1704; received his education at the free school there, of which his father was master, and at Corpus Christi College, Oxford; travelled in the East from 1737 to 1742; was, successively, precentor of Waterford, archdeacon of St. Patrick's, bishop of Ossory, and of Meath; and died in 1765. His 'Travels' are rich

in description, particularly of the 'Curiosities of Egypt and Palestine.'

PODESTA, J. B., an Italian Orientalist, 17th c.

POE, EDGAR A., an Am. poet and miscellaneous writer. His career was an irregular one, in consequence of his vicious habits and loose moral principles, 1812-1849.

POELENBURG, CORNELIUS, a Dutch landscape painter, employed by Charles I., 1586-1660.

POERNER, C. G., a Ger. chemist, 1732-1796.

POGGI, S. M., an Italian dramatist, 1685-1722.

POGGIANI, J., an Italian writer, 1522-1568.

POGGIO BRACCIOLINI, an Italian writer of the 15th century, who contributed greatly to the revival of classical literature in Europe, was born at Terranova, in Tuscany, was educated at Florence, and held the office of apostolical secretary to no less than eight popes. He devoted much of his time in the search after manuscripts; and to him the world is indebted for Quintillian, the orations of Cicero, Lucretius, part of Plautus, and other remains of antiquity. He was a man of eminent talent, but his morals and disposition were most reprehensible. His chief works are a 'History of Florence,' 'Dialogues on Nobility,' and 'Funeral Orations.' Died 1459.

POHL, J. C., a German physician and writer on vampyres, 1706-1780. J. EMMANUEL, his son, a physician and botanist, 1746-1800.

POHL, J. E., an Austrian botanist, 1784-1834.

POILLY, FRANCIS, a French engraver, 1622-1693. NICHOLAS, his brother and pupil, 1626-1696. J. BAPTIST, son of Nicholas, died 1728. FRANCOIS, brother of J. Baptist, died 1723.

POINSETT, JOEL R., an Am. statesman, was b. in South Carolina. During the early portion of his life, he travelled throughout Europe, and extended his journey into the interior of Asia. He subsequently went to Spanish America, and after his return he became a member of Congress, and served from 1821 to 1825. During this time he ably advocated the cause of South American and Greek independence. In 1825 he was appointed by Adams minister to Mexico. On his return to the United States, the nullification excitement was at its height, and he appeared prominently as a Union man. During Van Buren's administration he was Secretary of State. Died 1851.

POINSINET, A., a French dramatist, 1735-69.

POINSINET-DE-SIRRY, LOUIS, a French dramatic writer, translator, and antiquar., 1733-1804.

POINTER, J., an English historian, last cent.

POIRET, PETER, one of the greatest mystical writers produced in the protestant church, was born at Mentz, where his father was a sword-maker, in 1646, and became pastor of Amveil, in the duchy of Deux-Ponts, 1672. He was a master of the Latin, Greek, and Hebrew languages, but having no taste for a merely scholastic divinity, he studied the philosophy of Descartes, and during the four years that he retained his pastoral charge, published a work on Cartesian principles, entitled 'Cogitationes Rationales de Deo, Animâ, et Malo,' which produced a considerable sensation, and was attacked by Bayle. In 1676, the conquests of Louis XIV. occasioned Poiret's retreat to Hamburgh, where he became acquainted with Madame Bourignon, and through her experiences, in the first place, with the grounds of the mystic philosophy, the further study of which led him to point out the defects of the philosophy of Descartes, whose admirers have applied to his criticisms the fable of *the viper and the file*. He published his digest of the mystic philoso-

phy, including the experience of Madame Bourignon, wrought into a system, under the title of 'De Æconomia Divinâ,' or universal system of nature. The principle of it is *abstraction*, or the preference of a presumed illumination to reason; the same in essence as the *quietism* of Molinos, the *annihilation* of the Hindoo philosophy, and the *divine vision* of Boehmen. In all these cases we are presented with a vast treasure of experience, demonstrating the existence of a super-sensual wisdom, as manifested to the present sceptical age in some rare examples of *clairvoyance*, the physical preparation being really the same, though produced by different means. From Hamburgh Poiret removed to Rheinsburg, in the neighborhood of Leyden, where he died in 1719. A complete list of his works would be useless without a description of them, for which we have not space. The curious may consult the *catalogue raisonné*, in the Memoirs of J. P. Nicéron, published at Paris 1727-1745. [E.R.]

POIREY, F., a French theologian, 1584-1637.

POIRIER, G., a learned ecclesiastic, 1724-1803.

POIRSON, J. B., a Fr. geographer, 1761-1831.

POISSON, N. J., a French theologian, died 1710.

POISSON. See POMPADOUR.

POISSON, RAIMOND, a French actor and dramatist of the 17th century, who obtained great celebrity in low comedy. He wrote a number of theatrical pieces, and died in 1690.—His son, PAUL POISSON, was eminent as a comic actor. Died 1735.—The two sons of Paul, PHILIP and ARNOULT DE ROINVILLE, were also distinguished for their theatrical talents: the former was the author of 10 comedies, and was a good tragic performer; while the latter fully supported the reputation of his family as a comic actor. He died in 1753.

POISSON, D. S., a French analyst, 1781-1840.

POISSONNIER, PETER ISAAC, an eminent physician, was born at Dijon, in 1720. He became professor of medicine in the college de France, and was the first who gave chemical lectures at Paris. In 1758, being first physician to the French army, he went to Russia, to attend the empress Elizabeth in her illness. In 1764 he was appointed inspector-general of physic in the ports and colonies, and died in 1798. M. Poissonnier wrote several practical works, but he is chiefly known by his method of procuring fresh water from that of the sea, for which he received a pension of 12,000 livres.

POITEVIN, J., a Fr. astronomer, 1742-1807.

POITIERS, DIANA OF. See DIANA.

POITIERS, P. DE, a Fr. theologian, died 1205.

POIVRE, N., a French naturalist, was born at Lyons, in 1719. He was appointed intendant of the isles of France and Bourbon, where he introduced the bread-fruit tree and other valuable plants. D. 1786.

POIVRE, PETER, a French ecclesiastic, known as a traveller and philosophical observer, 1715.

POIX, L. DE, a French Orientalist, 1714-1782.

POLANEO, C., a Spanish painter, 17th century.

POLANO, P., a doge of Venice, 1130-1148.

POLE, REGINALD, the famous cardinal and papal legate in the reign of Queen Mary, was a younger son of Lord Montacute, cousin of Henry VII. He was born at Stourton castle, in Staffordshire, 1500, and after completing his studies in the English and Italian universities, appeared at the court of Henry VIII. in 1525. In 1529 he went to Paris to avoid any share in the discussion of the king's divorce, but when Henry had resolved to submit the question to the foreign universities, this unlucky step caused his selection of Pole to represent him in that city. Instead of yielding, Pole honestly returned home,

and in 1531 refused the archbishoprick of York, which was offered him on condition of compliance. The king having dismissed him in anger, he consulted his safety by leaving the kingdom, and rejoined the company of the distinguished men he had known at Padua and Venice. The literary circle in which he moved was formed by Caraffa, Sadolet, Gilberto, Fregoso, archbishop of Salerno, Bembo, and Contarini. These men even embraced the doctrine of Justification, and in their social meetings discussed the means of reforming the papacy—their great principle being to preserve the unity of the church under the papal government. In Italy, during the reign of Henry VIII., Reginald Pole rose to great distinction, and, on the accession of Paul III. in 1534, was raised to the cardinalate, as were his friends just mentioned. On the death of Paul, in 1549, it was almost determined to put the triple crown on his head. His place in English history commences under the date 1553, that of the accession of Queen Mary, who at once invited him to England, and gave him the place of Cranmer, whom she deposed, as archbishop of Canterbury. He arrived in London, dignified as papal legate, in November, 1554, and was received by Mary in presence of her husband, Philip II. of Spain, at St. Paul's cross. On this occasion, as we read in the correspondence of Bullinger, he addressed the queen with the salutation of the Virgin—'Hail Mary, full of grace,' &c. He advocated moderate measures in the council, as may be supposed from his humane disposition and his inclination to protestant opinions. After his death, we find Paul IV. complaining that England might have been retained with ease had Cardinal Pole been supported in his measures. In 1556, Pole was created chancellor of both universities, Oxford and Cambridge, having previously been ordained priest, and inaugurated into his archbishopric—the latter after the burning of Cranmer, which took place in March of that year. It is curious that Cardinal Pole survived the queen only a few hours. The circumstance is thus satirically alluded to in a letter addressed to Bullinger by E. Sandys,—'We yesterday received a letter from England, in which the death of Mary, the accession of Elizabeth, and the decease of Cardinal Pole is confirmed. That good cardinal, that he might not raise any disturbance, or impede the progress of the gospel, departed this life the day after his friend, Queen Mary, (17th November, 1558.) Such was the love and harmony between them, that not even death itself could separate them. We have nothing, therefore, to fear from Pole, for dead men do not bite.'—(*Letters from the archives of Zurich, published by the Parker Society.*) Some allowance must be made for the asperity of party, for no one can doubt the sincerity, humanity, and learning of Cardinal Pole. Ranke shows that he injured himself in Italy by boldly stating the doctrines of the Gospel at the council of Trent in 1545. [E.R.]

POLEMBERG. See POELENBURG.

POLEMO, three distinguished Greeks:—1. A philosophical teacher, who had for his disciples Zenone and Arcesilas, and who differed but little from Aristotle, died B.C. 270. 2. A geographical and historical writer, surnamed Periegetes, about 200 B.C. 3. A native of Laodicea, one of the most celebrated rhetoricians at the beginning of the 2d century.

POLEMO, the first of the name king of Pontus under the triumvirate of Mark Antony, died 1. The second, his son and successor, was recognized king by Caligula 39, and deposed by Nero 65.

POLENI, J., a Venetian antiquar., 1683-1761.

**POLHEM, CHRISTOPHER**, Count, a Swedish engineer, member of the Academy at Stockholm, and contributor to its transactions on the subjects of commercial economy and mechanics. The great works over which he presided are the docks at Carlscrona and the Trolhetta canal. The celebrated Swedenborg was his coadjutor, 1661-1751.

**POLI, G. SAVERIO**, an eminent naturalist, was born at Molfetta, in Italy, in 1746, and studied in the university of Padua. He was the friend of Morgagni, Fracchiolati, Poleni, and Valsecchi; and became director of the military academy at Naples, where he died in 1825. He was the author of a very popular 'System of Natural Philosophy' and also of a work on 'Testacea.'

**POLI, M.**, an Italian chemist, 1662-1714.

**POLIER, A. L. H. DE**, a Fr. Orient., 1741-95.

**POLIGNAC, JULES**, Prince De, prime minister of Charles X. of France, whose administration produced the revolution of 1830, was sprung from an ancient family, whose vicissitudes of fortune were remarkable even in revolutionary France, and which numbered among its members the famous Abbé de Polignac, who died 1741. Driven from Paris by the clamor of the mob, his parents repaired to Vienna; but scarcely had they reached that capital, before the fate of her beloved mistress and friend, Marie Antoinette, was communicated to his mother, and within a few days she fell a victim to her grief and affection. Deprived of a mother's care, young Polignac and his two brothers were educated in devoted attachment to their religion and their exiled sovereign; and, before reaching manhood, Jules de Polignac proceeded to Russia, then a refuge for the royalists, and shortly afterwards repaired to Edinburgh, where the Count d'Artois, afterwards Charles X., resided. Under the mingled influences of religion and loyalty, he embarked with his brother Armand in Georges' conspiracy in 1804 against Napoleon. The conspiracy was detected; the brothers were arrested, tried, and condemned to death; but, at the intercession of Josephine and Madame Murat, the emperor's sister, the sentence of death was commuted to imprisonment, and the two young men were sent to Vincennes, where they remained six years. On the restoration of Louis XVIII., Jules de Polignac devoted himself heart and soul to the so-called party of the Congregation, in the interest of the Pope, the Church, and the Count d'Artois; and his services were rewarded by the Pope conferring on him the title of a Roman prince, by which he has since been known. In 1823, Prince Polignac was sent as ambassador to London, where he remained six years; and the intrigues of the priest party being finally crowned with success, he returned to Paris in 1829, to assume the premiership of the new ministry; but the nation was loud in its expression of distrust, till at length the unconstitutional course that he adopted towards the chambers was suddenly arrested by the 'three glorious days,' which led to his own overthrow, and the dethronement of his sovereign. Pursued and taken at Granville, he was tried before the chamber of peers, and condemned; but his life was spared; and, after undergoing a short imprisonment at Ham, he was allowed to go into exile. His remaining years were spent chiefly at Munich. At length he was allowed to return to France, though not to Paris; but the death of Charles X. and the Duke d'Angoulême gave the last blow to a constitution already broken down by many reverses, and he sank into a state of melancholy, from which he never recovered. Born 1783; died 1847. His brother Armand died about a month before him.

**POLIGNAC, MELCHIOR DE**, a French cardinal and statesman, was born in 1661, at Puy en Velay in Languedoc. He was employed as a negotiator at Rome, in Poland, and in Holland, and acquitted himself so well that he was rewarded with the purple. During the regency he was banished to his abbey of Anchin, but afterwards he was recalled, and appointed agent for French affairs at Rome. In 1726 he was made archbishop of Auch, and died in 1741. He wrote a Latin poem, entitled 'Anti-Lucretius,' which has often been reprinted, and was translated into English by the father of the late Mr. Canning.

**POLIGNAC, YOLANDE MARTINE GABRIELLE DE POLASTRON, Duchesse De**, a favorite of the queen Marie Antoinette, and gouvernante of the royal children, 1749-1793.

**POLITIAN, or POLIZIANO, ANGELO**, an Italian scholar who became tutor to the children of Lorenzo de Medici, and was appointed by him canon of Florence. He wrote 'a History of the Conspiracy of the Pazzi,' and edited a collection of Greek epigrams, 1454-1494.

**POLK, JAMES KNOX**, president of the United States from 1844 to 1848, was born in North Carolina in 1795. Emigrated to Tennessee, where he practised law and commenced his political career. In 1825 he was elected member of the House of Representatives, of which he served as speaker for several years. He belonged to the democratic party. The chief measures during his rule, were the Annexation of Texas and the Mexican war. Died 1849.

**POLLAJUOLO, ANTONIO**, a painter, sculptor, engraver, and goldsmith of Florence, 1426-1498.

**POLLEXFEN, SIR HARGRAVE**, an eminent lawyer and member of parliament, acted as counsel for the seven bishops in 1688, and was knighted after the revolution, and appointed chief justice of the Common Pleas; died 1692.

**POLLICH, J. A.**, a Ger. naturalist, 1740-1780.

**POLLINI, C.**, an Italian botanist, 1783-1833.

**POLLINI, J.**, an Italian historian, 16th century.

**POLLIO, CAIUS ASINIUS**, a Roman consul, and friend of Augustus, most celebrated as the patron of letters, and for the protection he afforded to Virgil and Horace; died in the year 3, aged eighty.

**POLLIO, TREBELLIVS**, a writer of Roman history, only fragments of whose works remain, about 300.

[Birth-place of Robert Pollok.]

**POLLOK, ROBERT**, was born in 1798, in Renfrewshire, where his father was a small farmer. After having worked for some years on the farm, he determined on becoming a preacher; and, adding a

little Latin to the elementary education he had previously received, he entered, at the age of nineteen, on a five years' course of study in the university of Glasgow. Afterwards, while he was a student of theology, he published two or three little prose tales of a religious cast; and then, also, he was working up many of his poetical fragments into his 'Course of Time.' This energetic and ambitious poem appeared in the spring of 1827, and speedily obtained a popularity which it is not likely soon to lose. Its deeply religious character recommended it to serious persons; and it was admired by critics for the many flashes of original genius, which light up the crude and unwieldy design, and atone for the narrow range of thought and knowledge, as well as for the stiff pomposity that pervades the diction. There are in it a few passages which are strikingly and most poetically imaginative, and some which are beautifully touching. The poet did not long survive to enjoy his fame, or to prosecute his profession, to which he was admitted, as a preacher in the United Secession Church, very soon after the publication of his poem. He had already shown symptoms of consumption, which now became more decided; friends, gained for him by his genius, furnished him with assistance for going to Italy; but he was able to travel no farther than Southampton, where he died in September, 1827, before completing his twenty-ninth year. [W.S.]

POLLUX, JULIUS, two Greek writers, sometimes confounded together,—the earlier, a grammarian and sophist, born in Egypt about 180 B.C.; the later, an historian of the 4th century.

POLO, MARCO, was the son of a Venetian merchant, Niccolo Polo, and was born about the year 1250. Some months before his birth, his father Niccolo, and uncle Maffio, resolved to make the experiment of opening a trade with the Tartar princes who had lately established themselves in the East of Europe. For this purpose they sailed for Constantinople with a valuable cargo of goods, which they disposed of to great advantage; and investing the proceeds in rich jewels, they crossed the Black Sea, and travelling to Bolgar on the Volga, placed these at the service of a Tartar prince there. He rewarded them with twice the value of the jewels; and as they were well satisfied with their gains they now wished to return home. This they could not compass in consequence of the breaking out of a war between two princes whose territories lay on their route. They accordingly travelled round the north end of the Caspian, and reached Bokhara in safety. Here they remained three years; and were then induced to accompany a Persian embassy to the Grand Khan, Kublai, who then held his magnificent court at Kemenfu, in Chinese Tartary. He received them into favor, and promoted them to honor. This wise prince, like others of his race, held the liberal maxim, which has received in our own day much favor among statesmen, that all forms of faith which are professed by great numbers of persons should have encouragement and support. Accordingly, in prosecution of his purpose he commissioned one of his grandees, and the two Poli, on an embassy to the lord of the Christians, requesting his holiness to send 100 wise men to instruct his people in the religion and arts of the Western world. The Tartar nobleman died by the way; but the Poli pursued their journey in safety, exhibiting the Khan's order and seal upon a golden tablet, which he had given them as a passport. In 1269, having been three years by the way, they reached Acre, and soon after arrived in Venice. Marco was now ap-

proaching manhood, and his mother having died in giving him birth, his father's ties to his native city were less binding. Accordingly, in 1271, the two brothers started on their return to the court of Kublai, taking young Marco with them, and bearing letters from Pope Gregory X. They reached Tai-yuen-foo in safety, where the Khan was then residing. Young Marco was received into the highest favor, and was employed on many important missions, both in China proper, Tartary, and the adjoining countries. He held for three years the high office of governor of the city of Yautchoo-foo, in S.E. China. He thus enjoyed opportunities which no European has ever possessed, of becoming acquainted with the country and its institutions. Polo's travels were at one time regarded as of no value, but his accuracy in relating what he himself saw, has been from time to time in later years confirmed in a remarkable manner. The best edition of his travels is said to be that by Count Baldelli, 4 vols. 4to., Florence, 1827. It contains a map of Africa, drawn in 1351, and another with the routes followed by the Poli in Asia marked upon it. The Arabian and Chinese maps which Polo brought home are thought to have suggested to the Portuguese the passage by the Cape. The three Poli remained seventeen years in China; Kublai refused to let them depart, till at length his grand-nephew, reigning in Persia, sent ambassadors to his court to ask in marriage a young princess of the blood royal. It was found impossible for her to proceed by land, and Marco having just returned from a voyage to India, and represented the safety of the passage, the Khan reluctantly consented to the request of the ambassador, to let the Poli conduct them by sea to Persia, with the young princess destined to be their master's bride. A fleet of fourteen ships was prepared, the Poli were loaded with presents, empowered to act as the Khan's ambassadors at the European courts, and entreated to return after they had visited their friends. The fleet reached Ormuz in eighteen months—and the three Venetians arrived in their native city in 1295, after an absence of twenty-four years. They found themselves forgotten of all their old friends and acquaintances, but a display of their enormous wealth at a great feast which they gave, speedily brought a greater accession of new friends than they found to be quite convenient. Marco was soon after his return taken prisoner in a sea-fight with the Genoese, in which he commanded a galley. He was carried to Genoa, and detained four years; but treated with great kindness so soon as his history became known. He sent to Venice for his papers, and employed his leisure in putting his notes into shape. On his return, he married, led a settled and respectable life, and died at a good old age. His father lived till 1316, and had a second family by a young wife. [J.B.]

POLWHELE, REV. RICHARD, an antiquarian, historian, poet, and miscellaneous writer, whose works are exceedingly voluminous, was born at Truro, in 1760, where he was also educated, and where, when a boy, with the assistance of the celebrated Dr. Wolcott, then a physician in that town, he first essayed as a poet. His principal works are 'The History of Cornwall,' 7 vols. 4to., 'The History of Devonshire,' 3 vols., 'Traditions and Recollections,' 2 vols., 'The Rural Rector,' 3 vols., 'Biographical Sketches in Cornwall,' 3 vols., 'Anecdotes of Methodism,' 'Illustrations of Scriptural Characters,' several volumes of sermons; with numberless poems, and other writings of a miscellaneous character. Died at Truro, aged 78, March 1838.

POLYÆNUS, a Greek author, 2d century.

POLYBIUS, a celebrated Greek historian, son of Lycortus, general of the Achæans, was born in Arcadia, B.C. 203. He was formed for public business by the precepts and example of Philopœmen, and at the funeral of that general he bore the urn which contained his ashes. Being sent to Rome as one of the hostages demanded of the Achæans, his residence at the capital of the world was of great importance to Polybius, who, on his return to Greece, was employed in public affairs by several states. He wrote a 'Universal History,' in 40 books, of which we have only five complete, and an abridgment of twelve others.

POLYBIUS OF COS, a medical writer, pupil and son-in-law of Hippocrates, 5th century B.C.

POLYCARP, ST., a Christian father and martyr, who, according to tradition, was a disciple of the apostle John, and by him appointed bishop of Smyrna. He made many converts, and violently opposed the heresies of Marcion and Valentinus; but during the persecution of the Christians under Marcus Aurelius, he suffered martyrdom with the most heroic fortitude, A.D. 169. His 'Epistle to the Philippians' is the only one of his pieces that has been preserved.

POLYCLES, a Greek sculptor, 4th century B.C. Another sculptor of the name, flourished about 170 B.C.

POLYCLETUS, a Greek sculptor, 5th ct. B.C.

POLYCRATES, a tyrant of Samos, put to death by Orontes, time of Cambyses, 6th century B.C.

POLYCRATES, bishop of Ephesus, 2d century.

POLYDORUS, VIRGILIUS, an Ital. historical writer, who was sent to England by Alexander VI., to collect the tax called Peter's pence, and obtained a living in the Church of England. His works are a 'Collection of Proverbs,' a Treatise on Prodigies, and particularly a History of England. He was a friend of Erasmus, and flourished about 1470-1555.

POLYGNOTUS OF THASES, the earliest recorded painter of Greece, who has attained great fame, appears to have been settled at Athens about 463 B.C., whither he had accompanied Cimon after his conquest of Thasos. With Polygnotus painting was fully developed in all the essential principles of art, though his style might still want the delicacies of execution which distinguished the period of refinement about the time of Alexander the Great. The first portrait on record is the picture of Elpinice, the sister of Cimon, and his own mistress, which Polygnotus introduced in the 'Rape of Cassandra,' painted by him, in the 'Poecile' at Athens, a celebrated portico illustrated with the history of the Athenians, and where the philosophers and others used to meet and gossip. Polygnotus seems to have been a complete painter, though established quite a generation before the execution of the Elgin marbles; his style was, however, doubtless, somewhat similar to the style of those great works, ideal or generic. There is a memorable passage in the *Poetics* of Aristotle, speaking in the very highest terms of this great painter. Aristotle says, comparing him with two of his contemporaries:—'Dionysius paints men as they are, Pauson, worse, and Polygnotus better than they are.' Many other Greek writers speak of him in the highest terms. Lucian enumerates him among the four greatest colorists of the Greeks, these being Polygnotus, Euphranor, Apelles, and Aëtion. The greatest works of Polygnotus were the two extensive series of pictures (*tempera* paintings) executed on the two principal sides of the *Lesche*, or public hall at Delphi, attached to the Temple of Apollo, as a convenient place of meeting for the various Greeks from

every part, who were in the habit of visiting Delphi, for the sake of consulting the oracle there, which was the most famous of all the Greek oracles. These pictures, executed most probably on panels of larch, and inserted into the walls, represented on one side, the *war of Troy*, and, on the other, the Descent of Ulysses into Hades to Consult the Soul of Tiresias. Popular and general subjects which were necessarily interesting to Greeks of every race, and thus the most appropriate subjects for the decoration of so purely a national building. They were known as the 'Iliad' and 'Odyssey' of Polygnotus, though he had consulted all other traditions, as well as Homer, in their composition. The popularity of these works was so great that the Amphictyonic Council (the deputies from the Greek cities who meet every spring at Delphi) voted Polygnotus public hospitality throughout Greece, that is, including all cities in league, and in these towns, should the business of Polygnotus ever call him, he was entitled to be maintained at the expense of the municipality. So great an honor has been conferred apparently only on one man since, Apollodorus, the grammarian. Some similar attention, though in this case doubtless purely personal, seems to have been paid to Albrecht Durer, in his journey in the Netherlands, in 1520-21; he speaks in every case of being entertained by the Nurnberg *Consul* in the several great towns he visited. Great as the art of Polygnotus was, it does not seem to have approached that dramatic truth of representation which distinguishes the works of Raphael, or many less considerable of the moderns. His art was representative almost as much as imitative; its object seems to have been chiefly ethic; objects and events are indicated rather than absolutely presented, but, of course, this is more strictly true of the accessories; a house for instance, or a wall, represented a city; a man throwing down the stones of the wall, the destruction of the city; a tent, an encampment; the striking or taking down a tent, a departure; a ship, a fleet; a few captives, a conquest; a few warriors, an army; and a few dead bodies, a victory. The ultimate value of works of this class depends upon the merit of the execution; perfectly treated they may be made perhaps more impressive than an actual dramatic representation, as the very nature of the treatment compels the mind to reflection, one of the highest objects of all high art.—(Böttiger, *Ideen zur Archaeologie der Malerei*; Wornum, *Epochs of Painting Characterized*.)

POLYHISTOR. See ALEXANDER, SOLINUS.

POMBAL, SEBASTIAN JOSEPH CARVALHO MELHO, Marquis of, a Portuguese statesman, was born at Soura, in 1699. After having been ambassador to London and Vienna, he was, in 1750, appointed secretary of state for foreign affairs, and, in 1756, prime minister. He introduced many reforms and changes in the government; but as his measures were frequently severe and arbitrary, he raised up many enemies, and on the death of the king, in 1777, he was disgraced, and exiled to his estates, where he died in 1782.

POMERIUS, J., a moralist, 5th century.

POMET, PETER, a French chemist, 1658-1699.

POMEY, FRANCIS, a French Jesuit, 1618-1673.

POMFRET, JOHN, whose poetical works are now seldom read, was born in Bedfordshire, 1667, and became rector of Malden, in that county. He published a volume of poems in 1699, the most popular of them being his 'Choice,' a picture of happiness founded on affluence and tranquillity. Some additional compositions were published after his death. That event was the consequence of an attack of

small-pox, while awaiting in London his institution to a richer living in 1703.

POMIS, D. DE, a Jewish writer, 1525-1587.

POMPADOUR, JEANNE ANTOINETTE POISSON, Marchioness De, the mistress of Louis XV., in whose affections she succeeded Madame de Chateauroux, was the daughter of a financier, and born in 1720. At the age of 21 she was married to M. d'Etioles; first attracted the king's notice while he was hunting in the forest of Senart; appeared at court in 1745, under the title of Marchioness of Pompadour; and died in 1764, aged 44 years. She certainly used her influence with the king in promoting the progress of the fine arts, but her cupidity and extravagance were unbounded; and many of the evils which oppressed France in the succeeding reign have been attributed to the power she possessed of filling the most important offices of the state with her favorites, whose measures were generally inglorious, both at home and abroad.

POMPEI, G., an Italian poet, 1731-1788.

[Statue of Pompey the Great.]

POMPEY, CNEIUS, surnamed 'The Great,' son of Pompeius Strabo, a Roman general, was born 106 B.C. He distinguished himself against the enemies of the Roman Senate, both within the state and without, and at last fell in the struggle against Cæsar for absolute power. The events which mark his career are briefly these. Like his father, under whom he commenced his military career, serving against Marius, Pompey ranged himself with the aristocratic party of the republic. He was in his twenty-third year only when he raised three complete legions, 60,000 men, at his own expense, and took the field in behalf of Sylla—at that juncture returning from his expedition against Mithridates. By his twenty-sixth year Pompey had defeated the remains of the Marian party in Cisalpine Gaul, Sicily, and Africa, and on his return to Rome, B.C. 83, was hailed *Magnus*—the great—by Sylla; his audacious perseverance, also procuring for him the honors of a triumph. On the death of Sylla in B.C. 78, Pompey went as proconsul to Spain, where the plebeian war was continued by Sertorius, and after a four years' arduous struggle, he remained master of the field, his opponent having been betrayed and assassinated. He returned to Italy in time to give the finishing blow to the similar victories of Crassus, and in B.C. 70 Pompey and Crassus were elected consuls. In

possession of this office, he restored the tribunitial power, and afterwards dismissed his army, remaining at Rome as a private citizen. In the beginning of the year B.C. 67, he was intrusted with extraordinary powers, in order to destroy the lawless bands and the piratical adventurers who infested the coasts of the Mediterranean, and having effected this, he was made absolute dictator in the East, and superseded Lucullus in the command against Mithridates. The latter he completely routed in B.C. 66, and soon after becoming master of Asia Minor, pursued his conquests through Syria and Palestine as far as the Red Sea. For these services he obtained a third magnificent triumph at Rome, and in B.C. 60 joined Cæsar and Crassus in the *triumvirate*, the former of whom gave him his daughter Julia in marriage. Succeeding events caused Pompey to draw closer to the senatorial party, and with him, as the representative of the patrician republic, went Cato, the honest enemy of the ambition of Cæsar. In B.C. 54 Julia died, in the year following Crassus was slain in Asia, and now the hostility between Cæsar and Pompey rapidly developed itself. The former having applied for the consulship refused to present himself in Rome as a private citizen, and a decree of the senate declared him a public enemy unless he resigned his command. Instead of doing so, Cæsar crossed the Rubicon with his troops B.C. 49, and Pompey, accompanied by Cato, Cicero, and the other nobles of Rome, fell back upon Greece, where the great battle of Pharsalia decided his fate. Pompey was advised to seek an asylum in Egypt, then ruled by a sovereign he had protected, Ptolemy XII. He was received with pretended friendship, but treacherously murdered as soon as he had stepped ashore, B.C. 48, and his head being cut off, it was sent to Cæsar, who turned away from it and could not restrain his tears. Pompey fell, and with him the republic of Rome, for want of the art of government; the brilliance of his early victories carried him to power, but the remembrance of greatness in the field was a poor compensation for the anarchy that prevailed at Rome. [E.R.]

POMPEY, CNEIUS, son of the preceding, endeavored to carry on the war against Cæsar. He was defeated at Munda, and soon after killed, B.C. 45.

POMPEY, SEXTUS, younger son of Pompey the Great, continued the war after the defeat of his brother, and the subjugation of Spain by Cæsar. He made himself master of Corsica, Sicily, Sardinia, and Achaia, and rendered himself formidable as a naval commander against the second triumvirate. Being at length defeated and taken prisoner, he was killed at Miletus, by order of Antony, B.C. 35.

POMPIGNAN, JOHN JAMES LE FRANC, Marquis De, a French scholar and poet, whose works consist of dramas, moral discourses, odes in imitation of Virgil, and many pieces opposed to the new philosophy, 1709-1784. His brother, J. GEORGES, a prelate and writer on credulity, 1715-1790.

POMPONAZZI, PIETRO, a famous Italian philosopher, who argued that the immortality of the soul cannot be proved by any natural reasons, but depends solely on revelation, 1462-1524.

POMPONIUS LÆTUS, JULIUS, sometimes styled Peter of Calabria, a learned antiquary of the 15th century, was professor of rhetoric at Rome, and the founder of an academy, which was opposed by Paul II., and many of the members imprisoned and put to the torture; but Sixtus IV. released them, and restored Pomponius to his professorship. Died 1498.

POMPONIUS, SEXTUS, a Roman jurist, 2d cent.

POMPONIUS. See BELLIEVRE.

POMPONNE or POMPONE, SIMON ARNAULD, Marquise De, a Fr. statesman and diplo., 1618-99.

PONA, FRANCESCO, an Italian writer, 17th cent.

POND, JOHN, F.R.S., an eminent English astronomer, who for a period of 25 years held the important office of astronomer-royal, died at his house, in Greenwich, in September, 1836; and his remains were interred in the same tomb, at Lee, that for 93 years had given shelter to the ashes of his celebrated predecessor, Dr. Edmund Halley. According to the testimony of Sir Humphry Davy, the enthusiasm with which he pursued his favorite science, and the sacrifices of time, health, and money that he made in consequence, were great indeed. As a practical astronomer, he had scarcely an equal; his talent for taking observations was quite unique; and to his zeal our national observatory is indebted for many of the new instruments which have confessedly rendered it so pre-eminent and complete.

PONIATOWSKI, STANISLAUS, Count De, father of Stanislaus Augustus, king of Poland, castellan of Cracovia, and a companion-in-arms of Charles XII., flourished 1678-1762.

PONIATOWSKI, STANISLAUS AUGUSTUS, the last king of Poland, was the son of the preceding, and was born in 1732. Having been fortunate enough to please the grand duchess, afterwards Catharine II., he was elected king in 1764. At the commencement of his reign he gave many proofs of his moderation and love of justice; but his attempts to introduce some modifications into the Polish constitution, rallied a powerful party against him. The Protestants, who were excluded from a place in the diet and from the right of votes, claimed the restoration of the treaty of Olivia, made in 1660. The ministers of Russia, England, and Prussia favored their claim, and Stanislaus was also inclined to grant their request; but the Catholic bishops protested against the measure, as favoring the enemies of the state. Russian troops soon after appeared at the gates of Warsaw, when the Catholics formed themselves into an army, to which they gave the name of 'confederates.' Pulaski, one of their chiefs, proposed carrying off the king; for which purpose he, with two other chiefs and 40 dragoons, disguised as peasants, laid wait for him near the town. When the royal carriage approached, they seized the king, and then placed him in one of their horses. The night was dark, but they forced the animals forward until they were exhausted; they then walked, dragging Stanislaus with them, but at dawn of day, finding they had missed the way, and that they were only a short distance from the city, all, except Kosinski, fled. Struck with remorse, he implored the king's pardon, which the monarch readily granted, and, on his return to his palace, settled a pension on the penitent chief. But Stanislaus still continued to be afflicted by the divisions of his people. In 1787 the empress Catharine visited the Crimea, and the king obtained from her a promise of security for his kingdom; the emperor Joseph II. also made him a like solemn promise. Nevertheless, in 1792 the Russians and the Prussians invaded Poland, and, in defiance of the efforts of the brave Kosciusko, divided the unhappy kingdom between them, and Stanislaus was compelled to sign his abdication. He then retired to St. Petersburg, and lived as a private individual until his death, in 1798.

PONIATOWSKI, Prince JOSEPH, an illustrious Polish general, was the nephew of the preceding, and born at Warsaw, in 1763. At the age of 16 he entered into the service of Joseph II. of Austria, but quitted it for the purpose of aiding his country, the

moment that he saw there were hopes entertained of her throwing off a foreign yoke. He served with courage against the Russians, under Kosciusko, who gave him the command of a division, at the head of which he distinguished himself at the two sieges of Warsaw. After the surrender of the city, he went to Vienna, and, rejecting the offers of Catharine and Paul, lived in retirement, on his return to Poland, at his estates near Warsaw. The creation of the duchy of Warsaw rekindled the hopes of the Polish patriots, and Poniatowski accepted the place of minister of war in the new state. In 1809 he commanded the Polish army against the superior Austrian force, which was sent to occupy the duchy; compelled it to retire, rather by skilful manœuvres than by force of arms, and penetrated into Galicia. In the war of 1812, against Russia, he was again at the head of the Polish forces, and distinguished himself in all the principal affairs of this chequered campaign. After the battle of Leipsic, during which Napoleon created him marshal of France, he was ordered to cover the retreat of the French army. The enemy were already in possession of the suburbs of Leipsic, and had thrown light troops over the Elster, when the prince arrived, with a few followers, at the river, the bridge over which had been blown up by the French. The brave Polander, already wounded, plunged with his horse into the stream, and was drowned, October 19, 1814. His body was found on the 24th, and, having been embalmed, was buried at Warsaw, with all the honors of his rank, by order of the emperor Alexander.

PONIATOWSKI, PRINCE STANISLAUS, a second nephew of Count Stanislaus, distinguished as a master of arts and letters, of which he was the generous protector; b. at Warsaw, 1754, d. at Florence, 1832.

PONINSKI, A. L., a Polish poet, died 1742.

PONS, a count of Toulouse, reigned 1037-1060.

PONS, a count of Tripoli, reigned 1112-1137.

PONS, J. F. DE, a Fr. literateur, 1683-1733.

PONS, J. L., a French astronomer, 1761-1835.

PONSONBY, SIR FREDERIC CAVENDISH, K.C.B., a distinguished cavalry officer and major-general in the British army, was the second son of the Earl of Besborough, and born in 1783. He was appointed to a cornetcy in the 10th dragoons in 1800, and after passing through the intermediate grades of rank, obtained a majority in the 23d light dragoons in 1807. During the Peninsular war this gallant soldier had frequent opportunities of distinguishing himself, and was regarded as the *beau ideal* of a cavalry officer. At Talavera, Barrosa, Vimiera, Salamanca, and Vittoria, he performed some of the most brilliant exploits recorded in that fierce and enterprising era of the war; and during the whole of the retrograde movement of the army from the Douro, a day seldom passed without his being more or less engaged with the enemy's advance. But we must omit the details of his valuable operations in the Peninsula, to describe the termination of his splendid career on the field of Waterloo. In the absence of his commanding officer, General Vandeleur, who had a few minutes before led forward the 16th light dragoons, he observed a French column rapidly advancing into the small valley which lay between the two armies. There was not a moment to lose; Col. Ponsonby, calculating the column at about 1000 exclaimed, 'They must not be allowed to come further,' and with his well-known 'Come on, 12th!' dashed down the field, followed by his men. At the very moment when they had driven their opponents back into the enemy's lines, and the colonel was anxious to draw off his comrades, who were

now fighting at fearful odds, he received a cut on his right arm, which caused his sword to drop, and immediately afterwards he received another on his left, which he raised to protect his head. By the latter he lost the command of his horse, which galloped forward, and Col. Ponsonby, unable to defend himself, received a blow from a sword on his head, which brought him senseless to the ground. There he lay, exposed on the field, during the whole of the ensuing night. After being wantonly pierced through the back by a lancer, plundered by a French *tirailleur*, rode over by two squadrons of Prussian cavalry, and encumbered for some hours by a dying soldier lying across his legs, he was at length accosted by an English soldier, whom he persuaded to stay by him until morning, when a cart conveyed him to the village of Waterloo. He had received seven wounds, but by constant attention he at length recovered. Colonel Ponsonby was one of the brightest ornaments of the army, and a universal favorite. To the most chivalrous bravery he united military talents of no ordinary cast, which were guided by a remarkable calmness of judgment and coolness of decision. No lesson of experience was ever lost upon him; and his authority in matters of his profession, particularly the cavalry service, was regarded with general respect. He died January 11, 1837; being at the time a major-general in the army, K.C.B., and colonel of the royal dragoons, besides enjoying the honor of four foreign orders of knighthood.

PONSONBY, GEORGE, younger son of John Ponsonby, speaker of the Irish House of Commons, distinguished as a lawyer and statesman, 1755–1817.

PONSONBY, SIR WILLIAM, a British cavalry officer, born 1772, killed at Waterloo after a brilliant and successful charge against the French, 1815.

PONTANUS, J., a Bohem. *savant*, 1542–1626.

PONTANUS, J. ISAAC, a Danish philologist and histor. of the city of Amsterdam, 1571–1639.

PONTANUS, the common name of J. JOVIEN PONTANO, one of the most elegant and fertile Latin writers of the 15th century, distinguished as a poet and historian, 1426–1503.

PONTAS, J., a French casuist, 1638–1728.

PONTE, L. DE, a Spanish ascetic writer, known to French literature as DUPONT, 1554–1624.

PONTIANUS, a pope of Rome, 230–235.

PONTIUS, an ecclesiastical writer, 3d century.

PONTIUS, the Latinized form of PAUL DUPONT, an engraver of Antwerp, born 1596.

PONTIUS, CONSTANTINE, a learned Spanish divine, died in prison while awaiting his execution as a protestant, 1559.

PONTOPPIDAN, ERIC ERICSON, a Danish prelate, known as a theologian and Latin poet, 1616–1678. ERIC, his grandnephew, a prelate and antiquary, 1698–1764. J. LOUIS, brother of the latter, a theologian, died 1799.

PONTORNO, JACOPO, whose proper name was CARRUCCI, an eminent Ital. painter, 1493–1558.

PONTOUX, C. DE, a Fr. writer, 1530–1579.

PONZ, ANTHONY, a Span. painter, 1725–1792.

PONZIO, PAUL, an Italian sculptor, 16th cent.

POOL, H., a Dutch poet, 1689–1733.

POOL, J. VAN, a Dutch portrait painter, 1666–1745. His wife, RACHEL, daughter of Ruysch the anatomist, also a painter, 1664–1750.

POOL, M., a Dutch engraver, born 1670.

POOL, or POOLE, MATTHEW, author of a work highly valued by theological students, entitled ‘Synopsis Criticorum,’ was a presbyterian divine, born at York 1624. He was ejected from his living when the act of uniformity was enforced in 1662, and in

1666 made himself obnoxious to another large party by attacking the Roman Church. After this occurrence he retired to Amsterdam, where he died 1679.

POPE, ALEXANDER, was born in May, 1688, in London. His father was a linen-draper in Lombard Street, and, having spent his youth at Lisbon, had embraced the Roman Catholic faith, which his son, in an easy way, retained as it was taught to him. Pope inherited bodily feebleness from both parents: his father was deformed, and his mother gave him his headaches and his Jacobitism. He was a very sickly child, and hardly less so in manhood; he never grew to be taller than about four feet; and his deformity and weakness of limbs were so great that, for many years before his death, he could not dress or undress himself. In these circumstances Pope gathered his scanty education, and wrote poems which placed his name first in the brilliant literature of his time; nor was he prevented by his infirmities from taking, in aristocratic society, the place which, in that age of patronage, was won by his literary celebrity and secured by the agreeableness of manner he had when his temper was not chafed. The poetic endowments of Pope were very fine; and there occur in his works short passages that are among the gems of our poetry, and felicitous images and turns of expression that have become household words. In fact no poet furnishes so many brief quotations as he does; a distinction which he owes in part to the epigrammatic pointedness of his diction, and to the singular skill of his versification. But many of the striking lines and phrases which thus come into the mouths of every one, are either cold in feeling or positively unpoetical in matter: they are apt expressions of worldly shrewdness, not effusions of imaginative susceptibility. His rhythm, too, which in its way is perfect, has a mannerism and a monotonous smoothness, which make it more than doubtful whether, even in his favorite ten-syllable rhymes, he deserves to be held as having really improved on the manly and varied melodies of Dryden. The steadiness, likewise, with which he adhered to the themes and forms that had become fashionable under the guidance of that celebrated poet, made it impossible for Pope’s real and unquestionable genius to develop itself freely; and his principal poems are, both by the nature of their subjects and by the cautious and dissertative character of their tone, so very uncongenial to the poetical taste of our century, that it is not wonderful his writings should now be neglected and his place in the file of our poets degraded below his due. Yet, though the fact is little noticed, it was not without efforts in another direction, that Pope resolved to write for the drawing-room instead of the world; it was not till he had exercised his youthful fancy on higher topics and in worthier forms, that he contented himself with gaining celebrity as an admirable writer of didactic and familiar verse, and as one of the very best of all poetical satirists.—His education, ill begun at home by a Jesuit, was continued with little more success at school; where, till the age of twelve, he learned hardly more than to admire Ogilby’s clumsy translation of the Iliad, and Sandys’ polished version of Ovid. The remainder of his youth was spent at Benfield, in Windsor Forest, where his father, having retired from business, had purchased a house and a few acres of land. Here the young poet was left to educate himself. He never became an accurate scholar, even in Greek, Latin, or French, which were his only studies beyond English literature; but the sickly boy devoured books eagerly, acquired much literary knowledge, and wrote verses which his fa-

ther encouraged and corrected. The 'Ode to Solitude,' printed among his works, dates from his twelfth year; before he was fifteen he had, likewise, made his translations of the first book of Statius, and of Ovid's Epistle of Sappho; and at this time, also, by producing his 'Imitations of English Poets,' he showed some love for those old masters whom afterwards he so unwisely neglected. Now, likewise, he wrote a comedy of which we know nothing; a tragedy on the story of St. Genevieve; and an epic poem called 'Alexander,' which is described as having been an imitation of the Odyssey, and was preserved by him till, in the height of his fame, his friend Atterbury made him burn it. An inclination to linger in the purer fields of poetry was indicated also, though accompanied by little originality of invention or strength of poetic feeling, in the works by which he first introduced himself to the public. These were the 'Pastorals,' printed in 1709 (when the writer was in his twenty-first year), but written a good while before, and already admired in manuscript by persons of rank to whom he had become known. They were received with great applause. In the 'Essay on Criticism,' which appeared in 1711, he stepped at once into that dissertative school of poetry, in which his chief efforts were always afterwards made. The 'Essay,' with all its weakness of principles and barrenness of poetical elements, is not only a wonderful production for a boy, but really equal, in many points, to any thing he subsequently wrote. His celebrity was effectually and most deservedly secured in 1712, by the first edition of his 'Rape of the Lock.' When, in his twenty-sixth year, he republished this poetic immortalization of fashionable trifles, with the addition of the supernatural machinery, he had given to our language a mock-heroic poem, superior to Boileau's 'Lutrin,'

[The Residence of Pope.]

and to every thing else of the sort. In the interval between these two versions of the 'Rape,' appeared 'The Messiah,' 'The Temple of Fame' (founded on Chaucer), the 'Ode on St. Cecilia's Day,' and 'Windsor Forest' (probably written much earlier). The poems which have now been named have more of the essence of poetry than any of Pope's later works.—During a second period, extending through more than a dozen years, his chief employments were prompted by the necessity of securing a livelihood. His father, affected by a political panic, had refused to invest his savings in any way, and had lived on the capital, which was already nearly exhausted; and all Pope's writings had as yet gained him scarcely £150. He now undertook his Translation of the Iliad, which occupied him for more than five years, and, published by subscription (from 1715

to 1720), produced to the author more than £5,000. It was received with an admiration which will readily be yielded by all readers who can forget the original. But it produced a quarrel with Addison, from whom indeed Pope, closely allied both by opinion and friendship with Swift and the Tories, always stood at some distance. Pope's poor edition of Shakspeare was published in 1725; and his Odyssey, of which only 12 books were translated by himself, appeared in that year and the next, and added considerably to the little fortune he had made by its predecessor. He was now hotly engaged in those squabbles with the small authors of his day, which embittered all the rest of his life. In 1727, in three volumes of 'Miscellanies,' partly written by Swift and others, he declared open war on his enemies by the treatise 'On the Art of Sinking in Poetry.' The poet himself took the crowning step of his revenge, in 1728, by issuing his tremendous satire 'The Dunciad.' In 1715, when the Iliad had secured for him the prospect of independence, he became the possessor of the villa at Twickenham, which became famous as his residence for the last thirty years of his life. Here his father died soon, and his mother some years afterwards. Both were keenly regretted by their son, whose affection for his family and for a few friends was as strong as the jealousy and irritability which continually entangled him in quarrels out of doors. From this pleasant retreat, after the publication of the Dunciad, he fired off a good many squibs on his critics; and, among other tasks, he altered his great satire, dethroning its original hero, Theobald (who had edited Shakspeare better than he had), and putting Colly Cibber in his place. But the principal employment of those years was the composition of a new series of works, in which he emulated the half-prosaic poetry of Horace's epistles with great success; while he took a more ambitious flight in ethical meditations, for which he was philosophically very poorly qualified, though he gave much grace and sweetness to the expression of his crude opinions. The poems of this group embrace, besides some minor pieces, the 'Essay on Man,' setting forth, after Bolingbroke, a theory of optimism, the consequences of which he certainly did not understand; the 'Epistle on Taste,' which landed him, for the first time, in squabbles with the great; the 'Imitations of Horace,' with translations from the same poet; and the 'Universal Prayer,' published in 1738. In 1737 he published selections from his 'Correspondence,' containing letters, many of which are very elegant but very artificial pieces of prose writing. He was engaged to the last in his war with the dunces; for he contributed to Arbuthnot's wonderfully witty 'Memoirs of Martinus Scriblerus,' which appeared in 1741. His frail body, which had held out longer than might have been expected, was quite unable to support him into old age. Asthma and the beginnings of dropsy warned him, for several months, that the end was at hand. He set himself to meet the catastrophe with calm seriousness, and died in May, 1744, some days after having completed his fifty-sixth year. [W.S.]

POPE, SIR THOMAS, a statesman and a patron of learning, was born at Dedington, in Oxfordshire, in 1508; was educated at Eaton; and, after studying at Gray's Inn, was called to the bar. He was knighted in 1540, and held various important offices under Henry VIII. and Mary. He was the intimate friend of Sir Thomas More, to whom, by order of the king, he communicated the sad tidings of his intended execution. In 1554 he founded Trinity College, Oxford; and died in 1558.

POPE, WALTER, an English physician, known as a novelist and miscellaneous writer, died 1714.

POPHAM, GEORGE, president of the first company of settlers in New England. Sailed from Plymouth, England, on the 31st day of May, 1607, in company with Raleigh Gilbert, the nephew of Sir Walter Raleigh, who had the command of one vessel, while Popham had the command of the other. On the 11th of August, they made the Island of Monhegan, near the coast of Maine, and shortly afterward landed at the mouth of the Kennebec river.

POPHAM, SIR HOME RIGGS, a naval commander, was born in Ireland, in 1762. He served as a lieutenant in the American war; and rose to the rank of post-captain soon after the commencement of the war with France, having rendered essential service to the Duke of York in Holland. He was next employed in the Baltic, and, in 1800, appointed to a command in the East Indies. In 1803 he entered the Red Sea, and settled advantageous terms of commerce for the English merchants. He was afterwards engaged in an expedition against Buenos Ayres, for which, as he was charged with acting without sufficient authority, he was tried by a court-martial, and reprimanded. He finally obtained the situation of commander-in-chief on the Jamaica station; and had but just returned to England in 1820, when he died.

POPHAM, SIR J., an Eng. judge, 1531-1607.

POPKIN, JOHN SNELLING, a professor of Greek in Harvard University. Born 1771, died 1852.

POPPÆA, a Roman empress, wife of Nero, who took her from her second husband Otho, 62. Killed by a kick from Nero when pregnant, 65.

PORBUS, PETER, a Dutch painter, born about 1510, died 1583. His son, FRANCIS, a portrait painter of rare excellence, 1540-1580. FRANCIS, 'the Younger,' son of the latter, and possessor of his genius, 1570-1622.

PORCARI, STEFANO, a gentleman of Rome, executed for conspiracy against Nicholas V., 1453.

PORCO, J. C., a French theologian, 1636-1722.

PORDENONE, the common name taken from his birth-place, of GIOV. ANTONIO LICINIO REGILLO, a Venetian painter, 1483-1540. BERNARDINO, who bears the same surname, a relation and pupil of the preceding, 16th century. GIULIO, one of his nephews, also a scholar of his, 1500-1561. J. ANTONIO, brother of the latter, died 1576.

POREE, CHARLES, a French Jesuit and rhetorician, 1675-1741. His brother, C. GABRIEL, a canonist, 1685-1770.

PORLIER, JUAN DIAZ, surnamed El Marquesito, a Spanish patriot and general, was born, about 1775, at Carthagena, in South America, where his father held a high public situation. He first entered the navy, and served as a midshipman at the battle of Trafalgar; but when the cry of independence spread through the Peninsula in 1808, he raised a guerilla corps, of which he became the leader, and distinguished himself in a series of brilliant actions, and effected the celebrated retreat from Santander, closely pursued by a corps four times more numerous than his own. The regency then appointed him captain-general of Asturias, in which station he remained till the restoration of Ferdinand VII. Having unsuccessfully attempted to restore the constitution of the Cortes in 1815, he was delivered over to the military authorities at Corunna, condemned, and executed.

PORPHYRY, one of the Neoplatonists, and early opponents of Christianity, was born A.D. 233, probably in a Tyrian colony, settled in Batanea. His

original name was Malchus, the Shemitic term for a king, but Longinus, his master, gave him the appellation of Porphyry, in allusion to the purple vestments of royal persons. He studied under Origen and under Longinus in his youth, but at thirty years of age attached himself, at Rome, to Plotinus, whose works he arranged and corrected. Leaving Rome, where his thoughts had often reverted to suicide as the speediest means of freeing his spirit from its present prison-house, he went to Sicily, where he wrote his attack on Christianity. He seems to have returned to Rome, and he died about the year 304. Porphyry was a man of great abilities and erudition, and his elegant style contributed in no small degree to the popularity of the Plotinian philosophy (PLOTINUS). His asceticism may be found in his treatise 'On Abstinence,' and the strange but not uncommon union of superstition and scepticism may be seen in his doctrine of demons, in his ascription of the power of miracles to Plotinus, and in his record of a special ecstasy enjoyed by him in his sixty-eighth year, in which he was privileged to gaze upon the unveiled Divinity. He labored to find discrepancies in the Scriptures, and he made a special assault upon the authenticity of the book of Daniel. The history of the gospels was also subjected to similar treatment. His 15 books against Christianity were ordered to be destroyed by the emperor Theodosius, so that we are only acquainted with their nature and contents through the replies made to them by such writers as Eusebius and Jerome. Besides his philosophical and antichristian works, Porphyry wrote commentaries on Homer, and treatises on a great variety of miscellaneous subjects. [J.E.]

PORPORA, NICOLÒ, born at Naples in 1689, was the celebrated pupil of the no less celebrated Alessandro Scarlatti. In early life he left home and composed and brought out operas with great success in Vienna, Venice, Dresden, and several other continental cities. In 1773 Porpora was engaged as composer and director of the operas established in opposition to Handel, but in spite of all the science, talent, and industry which he brought to the task he had undertaken, the London public heard his compositions with an indifference which, it is said, 'amounted almost to contempt.' Porpora, therefore, quitted England in disgust and returned to Italy, where he became one of the principal masters in the Conservatory at Venice. He late in life retired to Naples, where he died in great poverty at the age of 82. Porpora was particularly fortunate as a singing master, and amongst his most celebrated pupils were Farinelli, Mingotte, and Caffarelli, besides many other dramatic vocalists. [J.M.]

PORPORATI, A., an Ital., engraver, 1741-1816.

PORQUET, P. C. F., a French poet, 1728-1796.

PORSENNA, a king of Etruria, 6th cent. B.C.

PORSON, RICHARD, an eminent critic, and professor of Greek in the university of Cambridge, was born in 1759, at East Ruston, in Norfolk, where he was first instructed by his father, who was the parish clerk, and afterwards by Mr. Norris, the vicar. His proficiency in the classics was so great, that Mr. Norris sent him to Eton in 1774, and in 1777 he went to Trinity College, Cambridge, where, in 1781, he was elected to a fellowship. In 1785 he took his master's degree, but having an objection to the church, he was under the necessity of resigning his fellowship, and, in 1793, was elected Greek professor. In 1797 he published the 'Hecuba' of Euripides, which was followed by the 'Orestes,' the 'Phœnissæ,' and 'Medea.' His last literary work was an edition of 'Æschylus,' 2 vols. He enjoyed the reputation

of being one of the best Greek scholars and critics of the age in England, notwithstanding which, he experienced little patronage—a circumstance partly attributable to his intemperate habits. Towards the latter part of his life, he was appointed librarian to the London Institution, with a salary of £200 a year; and it was there he died, in 1808. After his death were published his 'Adversaria, or Notes and Emendations of the Greek Poets,' and his 'Tracts and Miscellanies.'

PORTA, BACCIO DELLA, better known as *Fra Bartholomeo di San Marco*, an Italian painter, friend and scholar of Raphael, 1469–1517.

PORTA, GIOVANNI BATTISTA DELLA, a natural philosopher and mathematician, was born at Naples, in 1540. He devoted a great part of his life to the sciences, established two academies for its promotion, and was the inventor of the camera obscura. He wrote treatises on natural history, optics, hydraulics, physiognomy, and agriculture; and also produced nearly twenty dramatic pieces.

PORTA, JAMES DELLA, an Italian sculptor and architect, died about the end of the 16th century. His nephew, WILLIAM, a sculptor, same age. J. BAPTISTE, his relation and pupil, 1542–1597. THOMAS, brother of the latter, dates unknown.

PORTA, JOSEPH, called *Porta del Salvati*, a painter of the Florentine school, about 1520–1570.

PORTA, or PORTIUS, SIMON, an Italian philosopher, pupil of Pomponazzi, 1496–1554. Another SIMON PORTIUS, published Greek lexicons, 17th cent.

PORTAL, A., a French physician, 1742–1832.

PORTAL, P., a French accoucheur, died 1703.

PORTALIS, JEAN ETIENNE MARIE, a French statesman, was born at Beausset, in Provence, in 1746; and was at the commencement of the revolution one of the most distinguished advocates of the parliament of Aix. During the tyranny of Robespierre he was imprisoned, but subsequently became president of the Council of Ancients. He was proscribed by the directory, in 1807, for the moderation of his principles, and fled to Holstein; but when Buonaparte became first consul, Portalis was recalled, and nominated minister for religious affairs, and grand cordon of the legion of honor. Died 1807.

PORTE, ABBE J. DE LA, a French compiler, author of 'Esprit de l'Encyclopédie,' 1713–1779. His nephew, SEBASTIAN, deputy to the Assembly, the convention, and the council of 500, died 1823.

PORTE, A. DE LA, a Fr. statesman, 1737–92.

PORTE, M. DE LA, a French writer, 1530–71.

PORTE, P. DE LA, a valet in the service of Anne of Austria and Louis XIV., author of 'Memoirs of the Reigns of Louis XIII, and Louis XIV.,' 1603–1680.

PORTE-DU-THEIL, FRANCIS JOHN GABRIEL DE LA, an antiquarian and Hellenist, 1742–1815.

PORTER, ANNA MARIA, a popular novelist, was the daughter of a military officer, who died soon after her birth. She resided in the neighborhood of London with her mother and sister, and died at Bristol while making a tour for the re-establishment of her health in 1832. Her works are 'Artless Tales,' written before she was twelve years old, 1793–1795, 'Walsh Colville,' 1797, 'Octavia,' 1798, 'The Lake of Killarney,' 1804, 'A Sailor's Friendship and a Soldier's Love,' 1805, 'The Hungarian Brothers,' 1807, 'Don Sebastian,' 1809, 'Ballads and Poems,' 1811, 'Recluse of Norway,' 1814, 'The Village of Mariendorpt,' 'The Fall of St. Magdalen,' 'Tales of Piety,' 'The Knight of St. John,' 'Tales Round a Winter's Hearth,' and some others.

PORTER, DAVID. Commodore Porter was born

in Boston in February, 1780. After serving some time as a minor officer in the American navy, he was appointed to the command of the Essex, one of the finest frigates in the service. He was engaged in refitting his vessel when the war with Great Britain broke out, in 1812. He sailed from New York July 3, 1812, and shaped his course southward; and having failed to meet Bainbridge, his superior officer, he determined on making a cruise in the Pacific. His career was a brilliant one, as he captured an immense number of the British whaling and trading vessels. Having learned in the autumn of 1813, that the Phoebe frigate, Captain Hillyar, accompanied by two sloops of war, was daily expected in the Pacific, he determined to meet her. After an action of two hours and a half, near Valparaiso, the Essex was captured, Capt. Hillyar having declined to meet her single handed. At the close of the war in 1815, Porter was appointed a naval commissioner, in which capacity he served till 1821. An insult having been offered to the American flag by the authorities of Forardo, in Porto Rico, Porter compelled an apology, in which he exceeded his orders, and after his return to the United States was tried by a court-martial, and sentenced to six months suspension. He threw up his commission, and entered the service of Mexico. He was appointed minister to Constantinople by President Jackson, 1829, and negotiated several important treaties. He died in 1843.

PORTER, JANE, elder sister of Anna Maria, was born 1776, and commenced her literary career in 1803, by publishing her first novel, 'Thaddeus of Warsaw.' This interesting fiction became highly popular, and Miss Porter ever after retained the celebrity it brought her. The principal of her other works are 'The Scottish Chiefs,' 'The Pastor's Fireside,' 'Duke Christian of Luneberg,' 'Tales Round a Winter's Hearth' (to which the sisters contributed in common), 'The Field of Forty Footsteps,' and 'Sir Edward Seaward's Diary.' She went to Petersburg with her brother, Sir R. K. Porter, and after she was left companionless by his death in 1842, resided generally at Bristol. Died 1850.

PORTER, SIR ROBERT KER, born at Durham, in 1780—a gentleman alike distinguished in the arts, in diplomacy, in war, and in literature—was the son of a military officer, and brother to the well-known novelists, Jane and Anna Maria Porter. Having a taste for drawing, he became a student of the Royal Academy, and soon showed his skill by the production of several altar-pieces, of considerable merit, besides his large pictures of the 'Storming of Seringapatam,' the 'Siege of Acre,' and the 'Battle of Agincourt,' which latter was presented to the city of London. In 1804 he was appointed historical painter to the emperor of Russia, and during his stay at St. Petersburg he gained the affections of the Princess Mary, daughter of Prince Theodore von Scherbatoff, to whom he was afterwards married. Though he had cultivated his talents as an artist, he had always shown a decided preference for the military profession; and on leaving Russia he accompanied Sir John Moore to Spain, in the hardships and perils of which unfortunate expedition he shared till its final embarkation at Corunna. From 1817 to 1820 Sir Robert was engaged in travelling throughout the East. In 1826 he was appointed consul at Venezuela, in South America, where he continued to reside till 1841, when he left his mission on leave of absence, and visited his old friends in Russia, with an intention of proceeding thence to England; but as he was on the eve of preparing for the voyage, he was seized with an apoplectic attack, and expired,

May 3, 1842. His works consist of 'Travelling Sketches in Russia and Sweden,' 2 vols. 4to., 'Letters from Portugal and Spain,' 'A Narrative of the late Campaign in Russia,' 'Travels in Georgia, Persia, Armenia,' &c.

PORTER, F., an Irish theologian, died 1702.

PORTER, GEORGE RICHARDSON, an English economist, 1793-1852.

PORTES, P. DES, a French poet, 1546-1606.

PORTEUS, BEILBY, an eminent English prelate, was born at York, in 1731, and entered as a sizar at Christ's College, Cambridge, where he obtained a fellowship. He was, successively, chaplain to Archbishop Secker, rector of Hunton, prebendary of Peterborough, rector of Lambeth, king's chaplain, and master of St. Cross Hospital, near Winchester. In 1776 he was raised to the see of Chester, at the express instance of queen Charlotte; and in 1787 he was translated to the bishopric of London, over which diocese he continued to preside till his death in 1808. Bishop Porteus was a man of deep erudition and considerable ability. Among his works are, a 'Life of Archbishop Secker,' 'Sermons,' and a Seatonian prize poem on 'Death.' It is said that he also assisted Hannah More in the composition of her religious novel, 'Cœlebs in Search of a Wife.'

[Tomb of Bishop Porteus, at Tunbridge, Kent.]

PORTUS, FRANCIS, an eminent Italian scholar and classical critic, 1511-1581. His son, ARMILIUS, a distinguished Hellenist, died 1610.

PORY, JOHN, an English traveller and translator of Leo Africanus, sec. to the colony of Virginia from 1619 to 1621; time of his death unknown.

PORZIO, L. A., an Ital. physician, 1639-1723.

POSADAS, F., a Span. theologian, 1644-1713.

POSIDONIUS, a Stoic philosopher, who taught at Rhodes in the time of Mithridates, 1st century B.C., and to whom Plutarch was indebted for the materials of some of his Lives, especially that of Marius, with whom Posidonius was acquainted. Another POSIDONIUS flourished at Alexandria about 260 B.C. He was a famous astronomer, and well versed in the physical sciences.

POSSELT, E. H., a Ger. historian, 1763-1804.

POSSEVIN, ANTHONY, a learned Italian Jesuit and diplomatist, 1534-1611. His brother, J. BAP-

TIST, a man of letters, 1520-1549. ANTHONY, their nephew, a physician and Latin poet, 17th century.

POSSIDIUS, Sr., an African prelate, 4th cent.

POSSIDONIUS. See POSIDONIUS.

POST, F., a Dutch painter, about 1621-1680.

POSTEL, WILLIAM, one of the most learned men of his age, and one of the wildest visionaries, was born in Normandy, in 1510. In his youth he supported himself at the college of St. Barbe, by waiting upon the other students. His reputation for general learning and antiquarian research induced Francis I., to send him to the east to collect manuscripts, which commission he discharged so well as to be appointed professor of mathematics and languages, but he afterwards fell into disgrace, and lost his appointments. Having wandered about from place to place, he was recalled; but lost his situation again, and died in a monastery in 1581. Among the wild and extravagant notions that he entertained, one was, that he had died, and risen again with the soul of Adam; whence he called himself 'Postellus restitutus;' he also maintained, that women shall have the dominion over men; and that his writings were revealed to him by Jesus Christ.

POSTHUMUS, AULUS, a Roman dictator, consul with Virginius, B.C. 496. See POSTUMUS.

POSTLETHWAYTE, MALACHI, a London merchant and a commercial writer; born about 1707; died 1767. He was a fellow of the Antiquarian Society, and the author of 'The Dictionary of Trade and Commerce,' 'Great Britain's True System,' 'The Merchant's Public Counting-House,' 'Britain's Commercial Interest,' &c.

POSTUMUS, MARCUS CASSIANUS LATINUS, a Gaulish general and governor of that province, who was proclaimed emperor in 257, massacred 267.

POTAMO, a Platonic philosopher, 3d century.

POTEMKIN, GREGORY ALEXANDROVITSCH, a Russian prince and field-marshal, was born in 1736, near Smolensko. He distinguished himself against the Turks, particularly in the war of 1787, when he commanded in chief. He had acquired an unbounded influence over Catharine II., and was accordingly regarded as one of her especial favorites. His introduction to the empress and subsequent elevation are described as follows:—After Catharine had taken the sceptre from her weak husband, she paraded the streets of St. Petersburg, sword in hand. Young Potemkin, then 26 years of age, of a manly appearance, well-made and handsome, seeing that the sword which the empress used had not the dragon, a mark of distinction attached to the swords of the northern commanders, instantly unbuckled his, and presented it with a grace that was highly pleasing to Catharine, and from that day his promotion went rapidly forward. Though Orloff had enjoyed the title of favorite, it soon became known that he had a rival, and one that had the vanity to boast of the favors he received. Orloff had then recourse to intrigue; he availed himself of the absence of Potemkin, whom his royal mistress had honored with a high commission in her army against the Turks, to introduce a youth to the notice of the empress, who was devoted to his service; so that, at Potemkin's return, though he came charged with victory, he found he had been robbed of his dearest treasure, and he instantly retired to a convent of monks at Newsky, and exchanged his military decorations for the coarse habit and the cowl. The empress sent her lady of honor, the Countess de Bruce, to bring her a true report of Potemkin's situation, and having heard of his violent passion and the sacrifice he had made, she sent

for him ; he returned to the court, and soon reigned the master of the state, and even of the proud Catharine herself. Died 1791.

POTENGER, or POTTINGER, JOHN, a barrister, poet, and miscellaneous writer, 1647-1733.

POTENZANO, F., an Italian poet, died 1599.

POTERAT, MARQUIS DE, one of the secret agents of French diplomacy during the revolution, was born in 1740, and was one of the state prisoners delivered from the Bastille in 1789. Died 1808.

POTHIER, ROBERT JOSEPH, an eminent French lawyer, was born at Orleans in 1669. He became professor of law in the university of his native city, and died there in 1772, as much beloved for his virtues as admired for his extensive learning. His treatises on various legal subjects form 17 octavo vols., but his great work is a 'Digest of the Pandects of Justinian,' in 3 vols. fol.

POTIER, C., a French comedian, 1775-1838.

POTOCKI, CLAUDIA, the wife of Count Bernard Potocki, was born in the grand duchy of Posen, in 1802. She was the lineal descendant of the Polish ambassador, Dzialynski, who was sent to England in Elizabeth's reign, to remonstrate against the infraction of a treaty between England and Poland, and whose bold and successful eloquence is recorded in history. During the patriotic struggle for Polish freedom, from 1830 to 1833, the Countess Potocki not only became the munificent benefactress of her countrymen, but devoted her personal energies to the sacred cause, and alleviated by her kind attentions to the sick and wounded, much of the misery that the unequal contest entailed on the gallant spirits who strove to shake off the oppressor's yoke. Surrounded by wounded warriors and the victims of cholera in the hospitals of Warsaw, neither the sight of hideous gashes, nor the fear of contagion, deterred her from her course of charity : there, for seven successive months, she was constantly occupied ; and when the day of adversity came, the remains of her fortune, her influence, her personal exertions, were entirely at the disposal of the unfortunate refugees. At one time, while residing at Dresden, where she had formed a ladies' committee for the relief of these brave men, she pledged her jewels and most expensive dresses, for 40,000 florins, and the whole amount was instantly sent to its pious destination. For this the Poles assembled at Dresden presented to her a bracelet, with an inscription commemorative of the noble act, and pointing it out for national gratitude. She at length fixed her residence at Geneva ; and there, in the exercise of those Christian virtues, which will immortalize her name, but worn out by silent grief, she died in 1836.

POTOCKI, COUNT IGNATIUS, grand marshal of Lithuania before the destruction of Poland, and a fellow-patriot of Kosciusko, was born 1751. In 1791 he took refuge in Saxony, and published a political tract upon the establishment and fall of the constitution,—returning, however, to share in the last struggle for independence. He then passed some time in the prisons of St. Petersburg and Warsaw, and died at Vienna 1809.

POTOCKI, COUNT JOHN, a Polish ambassador in the interest of Russia, author of a 'History of the Primitive Russians,' &c., 1769-1815.

POTOCKI, COUNT STANISLAUS, minister of worship and public instruction for the grand duchy of Warsaw, known as a publicist, 1757-1821.

POTOCKI, COUNT STANISLAUS FELICIE, a Polish nobleman in the Russian service, 1750-1805.

POTOCKI, V., a Polish poet, 17th century.

POTT, J., a German chemist, 1692-1777.

POTT, PERCIVAL, an eminent surgeon, to whom the science is materially indebted for many improvements, was born in London in 1713 ; and became principal surgeon to Bartholomew's Hospital in 1749. He wrote 'On Hernia,' 'On Fistula Lachrymalis,' 'On Hydrocele,' 'On Cataract,' 'On Wounds of the Head,' &c. ; was especially celebrated for the mildness and humanity of his treatment, and was the inventor of many useful surgical instruments. Died 1788.

POTTER, BARNABAS, an English prelate, born in Kendal about 1579, died 1642. CHRISTOPHER, his nephew, an eminent divine and partisan of Charles I., born about 1591, died 1646.

POTTER, F., a learned divine, 1594-1678.

POTTER, JOHN, author of the well-known 'Antiquities of Greece,' was a son of Thomas Potter, a linen-draper of Wakefield, where he was born about 1674. He died Archbishop of Canterbury 1747. He published the first volume of his 'Antiquitates,' and a beautiful edition of Lycophronis Alexandra, before reaching his twenty-fourth year, in 1697. His theological works were published in 3 vols. at Oxford 1753.

POTTER, PAUL, a celebrated Dutch painter, was born at Enkhuyzen, in 1625 ; settled at the Hague ; and painted cattle and landscapes, but was particularly successful in the former, the latter being designed merely to afford an opportunity for exhibiting animals in different attitudes and circumstances. His coloring is uncommonly brilliant, and for fidelity to nature he is unexcelled ; his pictures are consequently held in the highest estimation. D. 1654.

POTTER, ROBERT, an English divine and admirable classical scholar. He held the livings of Lowestoft and Kessingland, with a prebend in the cathedral of Norwich ; and is advantageously known in the republic of letters by his excellent translations of Sophocles, Euripides, and Æschylus. He also wrote several ingenious poems, an 'Answer to Dr. Johnson's Lives of the Poets,' 'A Translation of the Oracle concerning Babylon,' &c. Born 1721 ; died 1804.

POUCHET, F. A., a Fr. theologian, 1666-1723.

POUCHET, L. E., a Fr. economist, 1748-1809.

POUGENS, MARIE CHAPLER JOSEPH DE, a distinguished painter, and philological and archæological savant, 1755-1833.

POUGET, B., an Italian cardinal, 1280-1351.

POULAT, J. B., a French poet, died 1705.

POULLE, LOUIS, preacher to the French king, and abbot of Nogent, died at Avignon in 1781, aged 79. His abilities as a preacher were very great, and his sermons, published in 1778, 2 vols. 12mo., possess a commanding eloquence, enriched with vivid imagery, and replete with noble sentiments.

POUPART, FRANCIS, a French physician and anatomist, was born at Mans, in 1660 ; studied at the Hotel Dieu, and was admitted into the academy of sciences. His name is given to an important ligature ; and many of his papers, chiefly on entomology, are in the memoirs of the Academy. Died 1709.

POUPET, C. DE, a Fr. statesman, 1470-1529.

POUQUEVILLE, F. C. H. L., a celebrated Fr. traveller and historian, 1770-1838.

POURCHOT, E., a Fr. philosopher, 1651-1734.

POUSCHKINE, ALEXANDER, a distinguished Russian poet, was born at St. Petersburg, 1799. Having at an early age incurred the displeasure of the government for the liberality of his opinions, he was removed to a distant province of the empire, where he discharged various offices ; but he was re-

stored to favor on the accession of the emperor Nicholas in 1825, and appointed imperial historiographer. His works, which consist of odes, poetical romances, and dramatic pieces, are chiefly descriptive of the national character and manners. The most popular are his romantic poem, 'Roustan and Ludmila,' published in 1820; 'Tsigani' (the Bohemians), published in 1827; 'Oneghine,' an unfinished poem in the manner of Byron's Don Juan; and his tragedy, 'Boris Godunow,' published in 1831. He fell by the hand of his own brother-in-law in a duel, 1837.

[Statue of Nicolas Poussin.]

POUSSIN, NICOLAS, was born at Andelys in Normandy, about June 19, 1594, of a noble family of Soissons. He learnt painting under Quintin Varin of his native place; then, when only eighteen years old, tried his fortune in Paris, and in 1624, in his thirtieth year, settled in Rome, where, with the exception of a visit paid to France in 1640-2, he dwelt the remainder of his life. He died there, Nov. 19, 1665. Poussin, though by birth a Frenchman, must almost be accounted among the painters of Italy; his style is peculiar, 'no works of any modern,' says Sir Joshua Reynolds, 'have so much of the air of antique painting as those of Poussin.' His pictures have been compared with colored bas-reliefs, a term not inexpressive of his style. His peculiar leaning to this sculptural treatment may in some measure be explained by his close intimacy with his friend Du Quesnoy, the sculptor, known as Fiammingo; they lived in the same house together at Rome. His coloring, compared with his drawing, is inferior and mannered, which is somewhat remarkable, considering that he studied in the school of Domenichino, at Rome, whom he considered to be the best painter of his time. 'The Seven Sacraments,' painted twice by Poussin, are among his most celebrated works, and both sets are now in England, one at Belvoir Castle, the other in the Bridgewater Gallery, London. His works are very numerous; the prints that have been engraved after his principal pictures only, amount to upwards of two hundred. Some of his best works are in the British National Gallery, as the 'Bacchanalian Festival,' No. 42, finely engraved by Doo, which constitutes an excellent exponent of his style, with all his merits and peculiarities in perfection. He was a skilful landscape painter also, indeed one of the ablest of the landscape painters of Italy, though the greater fame in this department of his younger bro-

ther-in-law, GASPARD DUGHET, who took the name of POUSSIN, has eclipsed the reputation of Nicolas. GASPARD POUSSIN was born of French parents in Rome, in 1613, and died there in 1675; like Claude he was exclusively an Italian painter. The National Gallery possesses also some of the finest works of this artist. The sombre character of his landscapes is in some measure due to the dark grounds on which he painted.—(Bellori, *Vita di Nicolo Poussino*, &c., Rome, 1672. Wornum, *Descriptive and Historical Catalogue of the National Gallery*, &c.)

[R.N.W.]

POUTEAU, CL., a French surgeon, 1725-1775.

POWELL, DAVID, a famous Welch antiquarian, and minister of the church, about 1552-1590. His son, GABRIEL, cel. as a controversialist, 1575-1611.

POWELL, E., a popish divine, executed 1540.

POWELL, G., an English actor, died 1714.

POWELL, G., a Welch scholar, 1561-1620.

POWELL, SIR JOHN, bart., an eminent and honest lawyer, was born of a very ancient and wealthy family at Pentymeyrick, in the parish of Llanwrda, Carmarthenshire. He was a judge in the Court of King's Bench, in 1688, and distinguished himself so much by his integrity and ability on the trial of the seven bishops, that James the Second deprived him of his office, but he was restored to it at the revolution, and sat there until his death in 1696. In Heber's life of Jeremy Taylor it is stated that he was a pupil of that distinguished man, and was offered the great seal of England if he would have decided against the bishops. When every effort to influence him against the bishops had failed, the court, it is said, made the same attempt upon his eldest son Thomas, who for many years represented the county of Carmarthen in parliament, which reaching the judge's ears, he sent for him, and told him that if he accepted of any place, or the promise of any place under government, he should consider it as intended to bias his judgment, and would disinherit him; and, as to himself, he would rather live upon his cockle-bank at Langharne, than do any thing so repugnant to his conscience.

POWELL, W., an English actor, died 1769.

POWELL, W. S., a learned divine, 1717-1775.

POWER, TYRONE, was the son of an Irish gentleman, of the county of Waterford, and was born 1795. His mother was left a widow in his infancy, and removed to Glamorganshire in South Wales, near the town of Cardiff, where there was a theatre. Here Power first appeared as *Romeo*; the next notice we have of him is his attempting *Orlando* at Monmouth, after which he returned to the maternal retreat. On his return, some time after, to the stage, he began to discover his unsuitability for tragedy, and went into the comic line, and tried his juvenile strength in *Mercutio*, *Benedict*, *Charles Surface*, and *Belcover*; occasionally, however, we find him doing pathetic parts, such as *Alonzo*, at Newport in the Isle of Wight. At Margate also he served alternately under both muses; but, on the Kentish circuit generally, appears principally to have adhered to Thalia, though at Newcastle-upon-Tyne we find Melpomene again in the ascendant; and at Dublin he actually made his *début* as *Romeo*, to which he added *Jeremy Diddler*. In 1818 Mr. Power retired from the stage, probably disgusted with its difficulties; but in 1821 we find him making a new essay at the Olympic and Astley's theatres, which latter he quitted for the Lyceum, where he appeared on 2d July, 1822, as *Robert Haythorn*, in 'The Turnpike Gate.' In 1823 he was appointed manager of the Olympic, and soon after was granted an appear-

ance at Drury Lane, but produced no effect. Next year, at the Adelphi Theatre, Mr. Power was enabled to make a stand in a new part called *Valmondé*, and to achieve a triumph as *Paddy O'Halloran*, in a neglected Irish farce. It was with great unwillingness that he undertook the part, which, nevertheless, proved the stepping-stone to his fortune. He soon found it to his advantage to devote his abilities exclusively to the delineation of Irish characters. As an Hibernian representative, Mr. Power enjoyed a rich brogue, a smart and vivacious air, a whimsical leer that lighted up the jokes that came trippingly from his tongue, and a voice for singing in which he could indulge in the broadest *patois*. These qualities he exhibited in 'The Irish Tutor,' in *Murtoch Delany*, *Phelim O'Flannigan*, *Rory O'More*, *Pierce O'Hara*, *O'Plenipo*, and a host of other characters, written expressly for him. His triumphs were witnessed within the walls of the three London theatres, Old Drury, Covent Garden, and the Haymarket. In 1840 Mr. Power migrated for America, whence he never returned. After a most profitable career, notwithstanding ill health, he embarked in the steam-ship 'The President,' which sailed from New York, 11th March, 1841. It had 123 souls on board. On the 12th a great storm occurred, which raged for two days and three nights. Whether, as suspected, the vessel foundered while beating between Nantucket shoals and George's Bank, remains unknown. Nothing more was ever heard of that fatal bark and its numerous tenants:—

'There is no ray  
By which her doom we may explore;  
We only know she sailed away,  
Was seen, but never heard of more.'

[J.A.H.]

POWHATAN, the king of the Indians of Virginia, in 1607, and father of Pocahontas. D. 1618.

POWNALL, THOMAS, a learned antiquary and politician, was born at Lincoln, in 1722. He held several situations under government; and having greatly exerted himself in America to suppress the rising spirit of discontent among the colonists, he was, in 1757, appointed governor of Massachusetts Bay, and subsequently of Carolina. On returning to England in 1761, he was made director-general of the control-office, with the military rank of colonel; but the latter part of his life was spent at Bath, in literary retirement. His principal works are, 'On the Administration of the Colonies,' 'Description of part of North America,' 'Treatise on the Study of Antiquities,' 'On the Antiquities of the Provincia Romana of Gaul,' 'Descriptions of Roman Antiquities dug up at Bath,' 'Intellectual Physics,' besides many political tracts. Died 1805.

POYET, B., a French architect, 1742–1824.

POYET, W., a chancellor of France, 1474–1548.

POYNET, or PONET, JOHN, successively bishop of Rochester and Winchester, 1516–1566.

POYNINGS, SIR EDWARD, a statesman of the reigns of Henry VII. and Henry VIII.

POYNTER, W., a theological writer, died 1827.

POZZETT, P., an Italian *savant*, 1769–1816.

POZZI, J. B., an Italian painter, 16th century.

POZZI, J. H., an Italian poet, 1697–1752.

POZZI, STEFANO, a clever Italian painter, 1708–1768. His brother, JOSEPH, a painter, died 1765.

POZZO, ANDREA, an Italian Jesuit, dist. as a painter, architect, and writer on art, 1642–1709.

POZZO, C. DEL., an archæologist, died 1657.

POZZO, COUNT J. DEL., an architect, b. 1718.

POZZO DI BORGO, CHARLES ANDREAS, Count, an eminent diplomatist, was born in the island of

Corsica, in 1768, and belonged to an ancient and honorable family, which for ages had ranked high among the Corsican nobility. When the island was placed under the supremacy of Great Britain, Pozzo di Borgo was elected president of the state council, and the entire administration of the country was re-organized by him. It soon, however, became evident that Corsica must yield to France; the count, therefore, sought refuge first at Naples and Elba, and afterwards in England, where he was received with every mark of respect due to his high abilities and firm fidelity. He was subsequently employed in some secret diplomatic missions, in the execution of which he displayed the greatest zeal and ability; but his labors were ultimately defeated by the successes of Buonaparte. After the peace of Amiens, Pozzo di Borgo entered into the diplomatic service of Russia, and represented his royal master at Vienna, whither he was sent in order to consolidate a new coalition against France. Thence he repaired to Italy, where the combined military operations of England, Russia, and Naples were about to commence. After the battle of Austerlitz, and the secession of Austria from the league, he again went to Vienna, and thence to Petersburg. When Prussia joined the coalition, Pozzo di Borgo was created a count, and attached to the staff of the emperor as a colonel: but after the battle of Jena he was again employed at the Austrian court in the vain attempt to rouse it from its political lethargy. His next mission was to the Dardanelles, for the purpose of co-operating with the British ambassador in treating with Turkey; and in the engagement between the Russian and Turkish fleets he greatly distinguished himself. When the hollow peace of Tilsit brought about a kind of intimacy between Napoleon and the young czar, Pozzo di Borgo saw the impending danger, and requested permission to retire. 'My presence,' said he to the emperor, 'can only tend to injure your majesty's service. Buonaparte is not the man to forget early antipathies, and sooner or later he will seize some opportunity to demand possession of my person.' 'Free your arms,' was his parting advice, 'from your present entanglement, that you may be at liberty for your final, and, I trust, successful struggle with France.' He then retired to Vienna; and from that time, till after the treaty of peace had been signed between Austria and France, this able statesman so energetically employed his diplomatic skill, that Napoleon did actually demand that his persevering enemy should be delivered up to him; but the demand was refused, and in the following year (1810) Pozzo once more came to England. His thorough experience was here appreciated and understood, and to him may much of that energy which subsequently appeared in the councils of Britain be traced. He knew the most vulnerable part in Napoleon's overgrown power, and to that he directed the particular attention of the Marquis of Wellesley. In 1812 the war between France and Russia broke out anew with exterminating fury; and when the mighty army of the French emperor perished on the whitened plains of Russia, Alexander thought that enough of victory had been achieved. Not so, however, thought the great diplomatist; he felt convinced that the safety of Europe was only to be found in the complete destruction of the fallen colossus, and he exerted all his energies to the accomplishment of an event so desirable. At length Sweden and Austria appeared in arms, Pozzo was made a general in the Russian service, and joined Bernadotte, who was then covering Berlin. The defence of Dresden and

the battle of Leipsic soon followed; the allied forces moved slowly and warily towards France; while the moral, physical, and political condition of that country was still considered before they hazarded the decisive blow. In January, 1814, Pozzo di Borgo was despatched to London on the part of the allied monarchs; his mission succeeded, and Lord Castlereagh returned with him to the head-quarters of the allies at Baden. The moderation and irresolution of the emperor Alexander often put the plans of his minister in extreme peril; but his advice eventually prevailed; the allied armies marched *en masse* on Paris; the abdication of the French emperor followed; and when Pozzo di Borgo had at length obtained the promise of Alexander, that no negotiation should be entered into either with Napoleon or his family, he hastened to Talleyrand, exclaiming in the fulness of his joy, 'Not only have I slain Napoleon politically, but I have just thrown the last shovel-full of earth over the imperial corse!' But his labors were not yet at an end. He proceeded to London to announce to Louis his accession to the throne of his ancestors; after which he was summoned to the congress of Vienna, where, with a degree of prescience resulting from his thorough knowledge of the man, he vehemently pressed the removal of Napoleon from Elba to some more remote and obscure corner of the globe. And when the news arrived that the ex-emperor had disembarked on the French coast, he coolly observed to the assembled statesmen, 'I know Buonaparte; he will march on Paris; our work is before us; not a moment must be lost.' Pozzo di Borgo immediately joined the Anglo-Prussian army, forming the vanguard of the allies in Belgium; and, though wounded, he followed Wellington to Paris, and resumed his portfolio as Russian ambassador. His last political mission was as ambassador to England. Here he remained upwards of two years, till ill health induced him to return to Paris, where he died on the 17th of February, 1842, aged 73.

PRADES, J. M. DE, a Fr. theologian, 1720-82.

PRADIER, JAMES, a distinguished Fr. sculptor, 1792-1852.

PRADO, B. DE, a Spanish painter, died 1593.

PRADO, J., a Spanish commentator, 1547-95.

PRADON, N., a French poet, 1632-1698.

PRADT, Abbé DOMINIQUE DE, a French ecclesiastic and a political writer, was born at Auvergne, in 1759. He was grand-vicar at the revolution to the Cardinal Rochefoucauld, and was elected deputy for the Norman clergy to the states-general in 1789. He opposed the union of his order to the *tiers état*, protested against the new order of things, and was consequently obliged to emigrate, establishing himself for a considerable time at Hamburg. In that city he published, in 1788, the first of his voluminous series of political pamphlets, called, 'Antidote to the Congress of Radstadt.' In another, termed 'Prussia and her Neutrality,' he urged a coalition of Europe against the French republic. But after the revolution, which made Buonaparte first consul, he made interest with his patron, Duroc, to enter Buonaparte's service, and, by dint of well-timed flattery, became his grand almoner. On the coronation of the emperor, in 1804, at which he assisted, he was invested with the title of baron, received a gratuity of 40,000 francs, was made bishop of Poitiers, and was ordained by Pius VII. in person, in 1805. He afterwards officiated at Napoleon's coronation as king of Italy. In 1808 he accompanied him to the Bayonne conference, and was invested with the most delicate details of that great diplo-

matic difficulty. For this service Napoleon gave him another gratuity of 50,000 francs, and made him, in 1809, archbishop of Malines, and member of the legion of honor. On the war against Russia occurring in 1812, he was sent ambassador to the duchy of Warsaw, as he states, in his 'History of the Polish Embassy,' painfully and violently against his wish. During the retreat from Moscow, Napoleon had an interview with him at a lone cottage, reproached him with treachery, and divested him of his embassy. On his return to Paris, he found all his employments taken from him. He was ordered to quit Paris for his diocese, and did not return till the fall of Napoleon, and the entry of the Bourbons into France, in 1814. He wrote his 'Vindictory History' then, but did not publish it till after the battle of Waterloo and Napoleon's departure for St. Helena. The attack in this pamphlet on the latter and the chief Buonapartists, drew on him the enmity of the great majority of the public, but served his cause with the restored regime. He stated, in a preceding pamphlet, that it was by his advice the allied sovereigns resolved to break entirely with Napoleon, and restore the Bourbons. He was made by the latter chancellor of the legion of honor; but a new disgrace overtook him; he retired from the scene, and did not re-appear till after the 'hundred days.' He subsequently ceded all the rights of his archbishop's see to the king of the Netherlands, for a yearly pension of 10,000 francs, and, retiring into private life, occupied himself with the continued publication of political pamphlets. In all these latter publications, however, he espoused the cause of wise and temperate constitutional reform. He died in 1837.

PRAM, C., a Danish poet, 1756-1821.

PRASLIN, CÉSAR GABRIEL DE CHOISEUL, Duc De, a statesman and peer of France, cousin of the Duc de Choiseul, 1712-1785.

PRAT, A. DU, a French cardinal, 1465-1535.

PRATILLI, F. M., an Ital. antiquary, died 1770.

PRATO, J. DE, an Ital. philologist, died 1782.

PRATT, CHARLES, earl of Camden, chancellor under the Rockingham administration, 1714-1794.

PRATT, SIR C., a peninsular officer, 1771-1839.

PRATT, S. J., a novelist, 1749-1814.

PRAXILLA, a Greek poetess, 5th century B.C.

PRAXITELES, a famous Grecian sculptor, author of works in bronze and marble, 4th century B.C.

PRAXITELES, a disting. carver, 1st century B.C.

PRAY, G., an historian of Hungary, 1723-1801.

PREBLE, EDWARD, an American naval officer, commanded in the expedition against Tripoli, died 1807.

PREISSNITZ, VINCENT, a celebrated Prussian, discoverer of the water cure, 1799-1851.

PREMONTVAL, PETER LE GUAY DE, a French writer and mathematician, 1716-1767.

PRENTISS, SARGEANT S., an American lawyer and politician, who gave great promise by his early eloquence of eminence as an orator, 1810-1850.

PRESCOTT, WILLIAM, an American revolutionary officer, was born in Groton, Mass., 1725. In 1755 he gallantly defended the position of Breed's Hill against an overwhelming force, and only yielding his ground after one of the most spirited contests on record. Died 1795.

PRESCOTT, OLIVER, an American physician, author of a treatise on Ergot, 1762-1827.

PRESTON, J., a French mathematician, d. 1690.

PRESTON, JOHN, a learned puritan of the Church of England, author of a 'Treatise on the Covenant,' 1587-1628.

PRESTON, T., a dramatic writer, died 1598.

PRESTON, W., a Scotch writer, 1742–1818.

PRETI, M., an Italian painter, 1613–1699.

PREURS, CHARLES, civil engraver, a native of Hanover employed by the United States government in the Coast Survey, died 1854.

PREVOST, CL., a French theologian, 1693–1752.

PREVOST, I. B., a Genev. natural., 1755–1819.

PREVOST, P., a French painter, 1764–1823.

PREVOST, P., a French literateur, 1751–1839.

PREVOST D'EXMES, FRANCIS LE, a French literateur and dramatic author, 1729–1793.

PREVOST DE LAJANNES, M., a French magistrate and professor of jurisprudence, 1696–1749.

PREVOST-SAINT-LUCIEN, R. H., a French writer on public law, 1740–1808.

PREVÔT D'EXILES, ANTHONY FRANCIS, one of the most fertile of French writers, was born in 1697, at Hesdin, in Artois. His early life was extremely unsettled and changeful; he was alternately a Jesuit and a military officer; after which he entered into the monastery of St. Germain de Pres; but quitted that society also, and withdrew to Holland. His next removal was to London; but in 1734 he obtained leave to return to France, where he became secretary to the Prince de Conti. His end was equally singular. In 1763 he was seized with apoplexy in the forest of Chantilly, and was found apparently lifeless. An ignorant magistrate being called in, ordered a surgeon, as precipitate as himself, to open the body, when a loud shriek from the victim convinced the spectators of their error: the abbé opened his eyes, but the incision was mortal, and he almost immediately expired. His works amount to one hundred and seventy volumes. The principal are, 'Mémoires d'un Homme de Qualité,' 6 vols.; 'Histoire de M. Cleveland, Fils naturel de Cromwell,' 6 vols.; 'Pour et Contre,' a literary journal, 20 vols.; 'The Dean of Coleraine,' a novel, 6 vols.; 'History of Margaret of Anjou,' 2 vols.; 'Histoire générale des Voyages,' 16 vols.

PRICE, DAVID, an admiral in the English navy who accidentally shot himself with a pistol while preparing to attack the Russian fortress of Petropolski in Kamschatka in 1854.

PRICE, JOHN, a native of London, who went to Florence and became superintendent of the museum to the grand duke, and professor of Greek at Pisa; author of Scripture and Classical Commentaries, 1600–1676.

PRICE, SIR JOHN, an eminent antiquarian, author of a Defence of British History in answer to Polydorus, died about 1553.

PRICE, DR. RICHARD, an eminent dissenting minister, universally known and celebrated for his great abilities in arithmetical calculations, and for very numerous and valuable writings, theological, moral, and scientific. He was born at Llangunor, in Glamorganshire, in 1723, and was educated at Talgarth, in his native county, whence he removed to a Presbyterian academy in London, and became pastor of a Nonconformist congregation, of Arian or semi-Arian principles, at Hackney, where he continued as long as he lived. He was the friend of man, and the most intrepid assertor of his rights. During the American war, he printed two pamphlets against that measure, one entitled 'Observations on Civil Liberty,' and the other, 'Observations on Civil Government,' for which the corporation of London voted him thanks and a gold box, and the University of Glasgow conferred on him the degree of D.D. In 1778 he had a friendly controversy with Dr. Priestley, on materialism and necessity. On the termina-

tion of the war, Mr. Pitt consulted Dr. Price respecting the best mode of liquidating the national debt, the result of which, it is said, was the adoption of the sinking fund. When the French revolution broke out, the doctor distinguished himself by a sermon, 'On the Love of Country,' in which he hailed that event as the commencement of a glorious era. This drew upon the preacher some strong animadversions from Mr. Burke in his celebrated Reflections. Besides many papers in the Transactions of the Royal Society, of which he was a fellow, he published sermons and pamphlets, which established his character as a sound advocate for civil liberty, and a profound master of financial calculation. Died 1791.

PRICHARD, JAMES COWLES, M.D., whose ethnographical researches have placed him high in the ranks of science, was born at Ross, in Herefordshire, 1786; settled as a physician at Bristol, in 1810, where he rose to eminence; and after devoting five and thirty years to professional duties, varied only by literary avocations, removed to London in 1845 as one of her majesty's commissioners in lunacy—a branch of medical science with which he had long been familiar. Dr. Prichard's contributions to medical and scientific inquiry were neither few nor unimportant: but the work on which his reputation chiefly rests, is his 'Researches into the Physical History of Mankind,' which has been translated into almost every European language, and generally regarded as an authority. Died 1848.

PRICHARD, R., a Welch divine, died 1644.

PRIDEAUX, JOHN, D.D., bishop of Worcester, was born at Stoward, Devonshire, 17th September, 1578. His father not being in circumstances to afford him the advantages of a liberal education, he was indebted to the liberality of a Christian lady in the parish, who sent him to a grammar school, where he acquired an elementary knowledge of the Latin and Greek languages. Having an unquenchable thirst for learning, he travelled on foot to Oxford, and supported himself by some menial services in Exeter college, his time being divided between the servile offices of the kitchen, and the study of elegant literature. A person of such energy and devotion to the pursuit of knowledge could not but rise to distinction, and accordingly his great eminence procured his election as a member, till in due course he became rector, of the college. In 1615, he was appointed regius professor of divinity, with which office was then associated that of canon of Christchurch, and afterwards he filled the high and more influential station of vice-chancellor for a series of years. His last and highest step in the ladder of preferment was his consecration to the see of Worcester in December, 1641. Amid all this dignity of station, however, he was not exempt from trouble, for his devoted loyalty to the cause of Charles I. exposed him to many hardships, and ultimately reduced him to such poverty that he was obliged to sell his library for the maintenance of himself and family. He was a man of mild, amiable, and unassuming manners, of great piety, and such profound and extensive learning, that he was called by his contemporaries 'the Pillar of orthodoxy.' But he was withal the merest child as to knowledge of the world, and so regardless of pecuniary matters, that he involved his family in great difficulties by his imprudence or carelessness about money. He died at Bredon in Worcestershire, 30th July, 1650, leaving to his children no legacy but 'God's blessing and a father's prayers,' as he expressed it in his will. [R.J.]

PRIDEAUX, HUMPHREY, D.D., a divine of as great celebrity as the preceding, was born at Pad-

stow in Cornwall in 1648. He began his education at Westminster school, from which he was sent to Oxford. He distinguished himself at that university by his scholastic acquirements; and it was during his residence there that he became author, by the publication of the 'Marmora Oxoniensia,' or the ancient inscriptions from the Arundelian marbles, a work which procured him the patronage of the lord chancellor Finch, afterwards earl of Nottingham, through whom he was appointed a prebend, and afterwards dean of Norwich cathedral. Having become disabled through constitutional infirmity from discharging the public duties of the ministry, he was obliged, under a conscientious sense of duty, to resign his offices in the church, and devote himself entirely to the cultivation of sacred literature. His 'Connection of the Old and New Testament with the History of the Jews and Neighboring Nations,' and his 'Life of Mahomet,' have long been held in high repute, and obtained an extensive circulation. He died November, 1724. [R.J.]

PRIESSNITZ, HERR, a Bavarian peasant, the founder of the hydropathic system of medical treatment, died at Graefenberg, where he kept up his famous institution for the water cure, 1851, at the age of 52.

PRIESTLEY, JOSEPH, was born at Fieldhead, near Leeds, in 1733, where his father was a woollen cloth manufacturer. From the poverty of his parents he obtained only a medium education; but he became a dissenting preacher, and continued in this vocation with various degrees of success till 1767, when he settled in a chapel at Leeds, and commenced his great literary and chemical career. In perusing the works of this remarkable man it is impossible to fail being struck with his intense love of truth. In his scientific note-books he registers every fact as it appeared to his senses; in his political and theological writings he fearlessly states his opinions as they are brought out by his cross-examination of his own thoughts and meditations, and that liberty of independent thought which he claims for himself, he determinedly demands for others. In his scientific career his object was uniformly to question nature by every possible experimental investigation, and to state his results as he obtained them. He laid the basis of the chemistry of the gases, and of those modes of investigation in the pneumatic branch of the science which are still pursued. He discovered a great variety of facts in this department of the science. To him we are indebted for the knowledge of oxygen, bin oxide of nitrogen, sulphurous acid, fluosilicic acid, muriatic acid, ammonia, carburetted hydrogen, and carbonic oxide. England has produced few men endowed with greater versatility of talent than Priestley. Whether we view him as a pneumatic chemist, a theologian, an electrician, a historian, a politician, his writings bear the impress of an original mind, uncontrolled by any tendency to follow in beaten tracks, but constantly panting for new fields of investigation. It will ever remain a stain upon the name of England that this noble-minded man, this honor to humanity, should have been compelled by persecution, on account of his religion and politics, to flee his native country. He died in America in the year 1804. [R.D.T.]

PRIEZAC, D. DE, a Fr. juricons., 1590-1662.

PILESZKY, J. B., a learned Hungarian Jesuit and hagiographer, born 1709.

PRIMATICIO, or LE PRIMATICE, F., an Italian architect and painter, 1490-1570.

PRIMEROSE, GILBERT, a Scottish divine, chaplain to James I. and minister of the French church

in London, author of 'Jacob's Vow,' and other theological works, died 1642. His son, JAMES, a physician and medical writer, died about 1660.

PRINCE, JOHN, a divine and antiquary, was born at Axminster, in Devonshire, and died about 1720. He published a work, entitled 'The Worthies of Devon,' which is exceedingly curious and valuable, but very scarce.

PRINCE DE BEAUMONT, MADAME LE, a French lady, settled as a teacher in England, author of several works, died 1780. Her brother, JOHN BAPTIST LE PRINCE, a painter, 1733-1781.

PRINCE, OLIVER H., a United States senator from Georgia, and editor of an edition of the laws of that State, was lost by the wreck of the steamboat Home near Ocracoke with 100 others, Oct. 9, 1839.

PRINCE, THOMAS, a New England divine, and an historical and religious writer, 1687-1758. He had two sons, THOMAS and NATHAN, who were favorably known as religious and miscellaneous writers.

PRINCE, THOMAS, governor of Plymouth Colony, New England, a native of England, died 1673.

PRINGLE, SIR JOHN, an eminent physician and natural philosopher, was born in 1707, in Roxburghshire; was educated at St. Andrew's and Edinburgh, and afterwards studied at Leyden, under Boerhave and Van Swieten. After settling at Edinburgh, where he became professor of pneumatics and moral philosophy, he was appointed physician-general to the forces abroad, and was generally on the continent till the peace of Aix-la-Chapelle; after which he took up his residence in London, and engaged in medical practice. In 1750 he communicated to the Royal Society, of which he was a member, his 'Experiments on Septic and Antiseptic Substances,' for which he received the Copley medal. In 1752 he published his admirable 'Observations on the Diseases of the Army,' and in 1761 he was appointed physician to the queen's household. In 1766 he was created a baronet, and, in 1772, was elected president of the Royal Society, which office he resigned, in consequence of ill health, in 1778; and died in 1782.

PRINGLE, THOMAS, a Scottish poet and miscellaneous writer, was born at Blacklaw, Teviotdale, 1789. He began life as a clerk, and having attracted the notice of Scott as a magazine writer, soon after adopted literature as a profession, and endeavored to establish a newspaper at Edinburgh. Failing in this, he emigrated to the Cape of Good Hope, and, returning to England in 1826, became secretary to the Anti-Slavery Society. He was afterwards known as editor of the popular annual, 'Friendship's Offering,' and in 1834 published his 'African Sketches,' followed by his 'Narrative of a Residence in South Africa.' Died 1834.

PRINSEP, JAMES, an Asiatic antiquarian, secretary to the Asiatic Society of Calcutta, 1800-40.

PRIOLO, B., a French historian, 1623-1667.

PRIOR, MATTHEW, whose period of authorship was contemporary with the last years of Dryden and the earliest stage of Pope, was a pleasing poet, possessing little vigor or originality, but remarkable for his skill in versification, and his gay and easy grace of imagery and diction. His occasional epigrams and his lively but indecent tales, are his best productions; though there is merit, also, in his semi-metaphysical poem 'Alma, or the Progress of the Soul,' and in his attempt at religious poetry in 'Solomon.' His poems were only the recreations of a man actively engaged in public life. Born in 1664, he was the son of a joiner in London. Accident having directed the attention of Lord Dorset to the

boy's studious habits, education was procured for him; and, on leaving Oxford, he distinguished himself, under the government of King William, as a dexterous diplomatist in several foreign missions. Deserting his political party, like so many men of higher rank in that slippery time, he shared, in the latter part of his life, the vicissitudes and dangers of the Tories. He lived till 1721. [W.S.]

PRIOR, T., an Irish economist, 1679–1751.

PRISCIAN, a celebrated grammarian of Cæsarea, in the 5th century, whose strict attention to correctness in composition has made it proverbial to say of one who writes false Latin, that he breaks Priscian's head. He was the master of a school at Constantinople, and was the author of several grammatical works.

PRISCILLIAN, a Spanish heresiarch of the fourth century. The errors which misled him had been imported by one Marcus from Egypt. Priscillian had both wealth and influence, so that his conversion gave eclat to the novel heresy, and not a few were seduced by his eloquence and example. After long contests, the matter was brought for judgment before a council at Saragossa, in 380, and the most prominent of the sect were excommunicated. That Priscillian might have a sacred shield thrown over him, he was made by his sect bishop of Avila. By a rescript of Gratian, the party was condemned and banished, though the decree was afterwards recalled. Under Gratian's successor, Maximus, the Priscillianist leaders and bishops were summoned to Bourdeaux for trial. Priscillian himself appealed to the emperor, and the business was committed to Evodius, a minister of state. The spiritual offence was brought before a civil tribunal, and at Treves, in 385, Priscillian was put to the rack, and induced to make sad confessions, not only of error, but of hideous impurities. At length he was executed, and the sword of persecution fell upon his adherents, who flourished for a season in spite of the cruelties to which they were subjected. The heresy of Priscillian was a strange mixture of Gnostic and Manichæan absurdities, combined with allegorical interpretations and mystical rhapsodies. Sabellianism, or the denial of a personal distinction in the Godhead, was a further characteristic of the system. The sect were also severe ascetics, and necessarily so from their opinions of the origin and essence of matter, and, therefore, the accusation of their indulging in lasciviousness and unnatural lusts seems an invention of their opponents. But they held a loose morality in reference to the obligation of speaking truth, and resorted to dissimulation in the diffusion and defence of their dogmas. [J.E.]

PRITCHARD, H., an English actress, 1711–68.

PRITZ, J. G., a German divine, 1662–1732.

PROBUS, MARCUS AURELIUS VALERIUS, a native of Pannonia, who served in the Roman army, and became emperor after the death of Tacitus 276. He distinguished himself by several victories over the barbarians in Gaul, and was killed by his mutinous soldiers 282.

PROBUS, M. V., a Latin grammarian, 2d cent.

PROCACCINI, ANDREA, a pupil of Carle Maratti, painter to the king of Spain, 1667–1734.

PROCACCINI, ERCOLE, an historical painter of Bologna, born 1520, died about 1591. His three sons were his pupils:—CAMILLO, one of the first artists of that age, 1546–1626. GIULIO CESARE, a fine imitator of Correggio, 1548–1626. CARLO ANTONIO, celebrated for his landscapes, fruits and flowers, dates unknown. The son of the latter, called ER-COLE THE YOUNGER, studied under his uncle, Giulio

Cesare, and painted flowers with great skill, 1596–1676.

PROCIDA, GIOVANNI DI, a native of Palermo, chief of the conspiracy against the French known as the 'Sicilian Vespers,' about 1225–1302.

PROCLUS, born at Byzantium 412 A.C.; died at Athens 485. Esteemed by some the most powerful thinker of the Alexandrian School—an opinion in which we cannot concur. His works, however, are very numerous: an excellent edition of many of them, we owe to *M. Cousin*.

PROCLUS, patriarch of Constantinople, d. 447.

PROCOPE-COUTEAU, the received name of M. COLTELLI, a French physician and dramatic writer, 1684–1753.

PROCOPIUS, a martyr and saint, 4th century.

PROCOPIUS, a Greek theologian, 5th century.

PROCOPIUS, a Greek historian, 6th century.

PROCOPIUS, DEMETRIUS, a Greek writer, author of an account of the learned Greeks of ancient times, last century.

PROCOPOWITSCH, FEOPHAN, called the Russian Chrysostom, an archbishop of Novogorod, 1681–1736.

PRODICUS, OF CEOS, afterwards settled in ATHENS; where, in the time of Socrates, he professed Wisdom, and taught like the other Sophists. His success, in one sense, was great; for he accumulated a large fortune—having adapted his terms to all classes of purchasers;—the poor man had his lesson for one drachma, while the rich were charged fifty drachmas a head. Prodicus also, fell under the lash of Aristophanes; and it is understood that, for the crime of Atheism, he was condemned to the fate of Socrates;—most strange association!—Respecting Prodicus himself, there is a certain dispute: the general rumor from Antiquity being, that his life was not a pure one, and that the money acquired by the teaching of Virtue, was dissipated by Pleasure. Mr. Grote, the accomplished historian, has recently questioned this, on grounds, some of which appear of weight, but do not, as a whole, carry full conviction. To Prodicus, it is true, we owe that famous apologue—the *Choice of Hercules*. It is not safe, however, to infer from any abstract teaching concerning Virtue, the character of the Teacher; it is rather the character of the Teacher that gives value to the Teaching; insomuch, that even an imperfect teaching, provided it present the sincerity of its source, will ever contain more to instruct and elevate than extremest purism, which is only—words or prudery. Neither must the inculcation of abstention from what is called worldly pleasure, or of *asceticism*, in any form, be confounded with the Teaching of VIRTUE. True virtue consists in the influence of habits on the Soul; and its chief characteristic is, the *purpose* for which either knowledge or habits are striven for. The celebrated sneer of Gibbon—*That the virtues of the clergy are more dangerous to society than their vices*—strikes deeper perhaps than that acute philosopher thought. Certainly the Asceticism in his eye, was the efficient cloak of all practical vice: but who can misinterpret even the sincere asceticism, and almost unparalleled devotion of the Jesuit, or discern in it, aught other than the sacrifice of his own being—just as he would sacrifice the whole world—to an immoral and most hazardous lust of Dominion?—The question now started is vastly more important, than in its bearing on the personal character of PRODICUS. It involves the entire problem regarding the position of the 'SOPHISTS;' a class of Teachers in Athens, of which Prodicus may be taken as a supreme instance. That these Teachers formed

no *School* is unquestionable; and it was only the sheerest folly, and a gross libel on the Athenian people, through which they were ever imagined, banded, by malice prepense, to unfold and make popular an '*Art of Lying*.' The persons so called, had little connection with each other, taught varying and often opposing doctrines, and assuredly they believed—in a sense—what they taught. Let us look more minutely at the phenomenon. And *first*, as to the so-called '*Art of Lying*.' On nothing does greater confusion of thought exist in society, than with respect to the import of the phrase—'*Speaking Truth*.' It is the meanest who in any age choose to distribute what they know to be false;—even although it *has* become a question of strange casuistry, how far the false in Fact, may be Truth in principle and reality. Truth-speaking is not synonymous with the utterance of our existing convictions; it involves inextricably the far profounder question,—with what impartiality, under what solitudes of conscience have these convictions been acquired? And this again touches on the still deeper Inquiry—In what spirit, and for what purpose may the Soul of Man present itself—as a recipient—before the great Universe? Suppose, for instance, that Truth or Knowledge is sought, merely as an arm whereby to accomplish some specific external purpose, is there much reason to believe that either will be attained in their purity? If Virtue is sought, so that it subserve Power; and Knowledge, so that it enable its possessor to acquire social or professional standing, is it likely that the quest for either will be successful? Are the conditions of any actual country or phase of civilization, so full and absolute, that the Mind in its search for Truth, may safely say, that it desires, and will receive nothing except what can be turned to account, under these conditions? Now the so-called Sophists or public Teachers of Athens, publicly avowed the purpose of enabling young men to obtain power in the State. This, was the coveted prize—the *profession* prepared for: and in subservience to this end, and to no other, they taught. One thing only, could follow: the effort after knowledge became a struggle for effect; the pursuit of truth, the culture of Rhetoric; contests of words, obscured the importance of things; and Conscience is like the unsunned snow;—let a breath touch it, and its virgin whiteness disappears. But, if this state of things was fatal to the discernment of TRUTH, much more certainly, did it render growth in Wisdom, impossible. Wisdom is the property of harmony and nobility of Soul; and no more the result of Knowledge *per se*, than of the exercise of the meanest mechanical employment. The assertion may seem harsh, if not paradoxical; but ask History—nay, *circumspice*. Does knowledge emancipate? Are special acquirements, coveted for special ends, the very slightest guarantee against a poorness of sentiment and heart, of which one finds the exact congener among the rudest and most illiterate? In this direction, it would appear, lay the error of the popular Teachers of Athens; and—with whatever individual exceptions—where have ever lived any extensive *class* of Teachers, who, at these Sophists are entitled to cast a stone? The pure and large Mind of SOCRATES perceived the destructive error; and against it, his life was a protest. 'Make yourself virtuous and noble,' was his cry, 'and your *uses* will come'! A message so terrible and overturning that it has never been delivered in any age even in part, without ruin to the Prophet. In Athens it led to Death; but in Athens it was heard, and permitted to initiate a Revolution. In that great Democracy,

the Prophet had to contend with Men, but not with Institutions; therefore, although he fell, he succeeded. (Article SOCRATES.) [J.P.N.]

PRODICUS, a heretic of the 2d century.

PROKOPHIEV, IVAN PROKOPHIEVITSCH, a famous Russian sculptor, 1758–1828.

PRONY, GASPARD-CLAIR-FRANCOIS-MARIE-RICHE DE, baron de Prony, a distinguished French mathematician. He was the pupil, and subsequently the assistant, of Perronet, and was much employed by Napoleon, though the latter was deeply offended by Prony's refusal to accompany him to Egypt. Independent of his various missions as an engineer, and of his labors as a professor at the Polytechnic School, M. Prony was author of between thirty and forty volumes, chiefly of most laborious and extensive calculations. One work, forming 17 volumes in folio, was executed in obedience to an order of the French government for 'tables which should be as exact as possible, and at the same time, the greatest and most imposing monument of calculation that had ever been executed, or even thought of.' It is supposed that the French government will one day give to the world this truly extraordinary work, which at present is in MS. in the library of the observatory at Paris. Born 1755; died 1839.

PROPERTIUS, SEXTUS AURELIUS, a Latin poet, of the age of Ovid and Virgil, who shared with them the friendship of Mæcenas, died about 12.

PROSPER, St., a learned theologian and historian of the 5th century, known for his opposition to the Pelagians. He was a native of Aquitaine, and survived Augustine, to whom he wrote in 427. Another PROSPER, who lived about the same time, was a native of Africa, and wrote on the call of the Gentiles. A third, called PROSPER PITO, was a poet and chronicler, and lived in Gaul towards the end of the 4th century. His works are often confounded with those of St. Prosper.

PROSSER, RICHARD, an English civil engineer. Died 1854.

PROTAGORAS, one of the most celebrated of those Teachers of Athens, called *Sophists*. We have spoken of them under the article PRODICUS. In its chief features, the philosophy of Protagoras, resembled that of Locke. He denied the Absolute; and his maxim was that Man, or each man, is the measure of all Truth.

PROTOGENES, a Greek painter, 336 B.C.

PROUDFIT, ALEXANDER, an American Presbyterian divine. Died 1843, aged 75.

PROUDHON, J. B. V., a Fr. jurist, 1758–1838.

PROVENZALE, MARCELLO, an artist in mosaic, celebrated for his portrait of Paul V., 1575–1639.

PROYART, L. B., a Fr. histor., about 1743–1808.

PRUDENTIUS, AURELIUS, a Christian, and native of Spain, author of valuable poems, born 348.

PRUDHON, P. P., a Fr. painter, 1760–1823.

PRUDHOMME, L., editor of *Le Journal des Révolutions de Paris*, was born at Lyons, in 1752, where he was brought up to the business of a bookseller. In 1788 he fixed his residence in Paris, and became a zealous promoter of the new principles. In 1789 he established the above journal, which had for its motto, 'The great seem to us to be great, only because we are on our knees; let us rise!' Although he constantly assailed the government in this publication, as well as in the countless pamphlets which were issued by him, he opposed the tyranny of Robespierre, and was in consequence arrested as a royalist; but having speedily obtained his liberty, he quitted Paris, and was absent till the death of that inexorable dictator. Among his nu-

merous works is a 'General History of the Crimes committed during the Revolution,' 6 vols.' Died 1830.

PRYCE, WILLIAM, a physician and mineralogist, author of a Cornish Vocabulary and Grammar, last century.

PRYNNE, WILLIAM, famous in the history of English puritanism, was born of a good family at Swanswick, in Somersetshire, 1600, and became a barrister at law, and member of Lincoln's Inn at the time when Dr. Preston, a celebrated puritan divine, was lecturer there. It was the period when the illegal operations of the Star Chamber, and the courts of high commission had reduced England to a despotism equal to that of France, while the manners of the age were a scandal to religion and good morals. Marshal, Manton, Calamy, Burton, and other preachers in London, kept alive the spirit of earnest piety and love of freedom, which soon after produced the commonwealth—when the mere sight of Burton, as Neale remarks, was a sermon against oppression. Prynne, who was a person of sour temper and austere practices, remarkable for his indefatigable application to study, begun to write in 1627, and in 1632 he published his '*Histriomastix*,' a tedious work of more than a thousand pages, full of learning and curious quotations, and written against plays, masks, dancing, and especially against women-actors. Some passages in this work were supposed to be levelled against the queen, who had acted in a pastoral performed at Somerset House; and the language of the book was certainly, like most others of that age, anything but refined and complimentary. The real cause of offence in the eyes of Archbishop Laud, who originated the prosecution against Prynne, was, of course, far other than this libellous matter, namely, the opposition of Prynne and his entire party to the Armenian system, and the jurisdiction of the bishops. The information included both the aspersions of the author against the queen and the lords of the council, for their share in the diversions of the age, and his commendation of 'factious persons.' The cause was tried before the Star Chamber, and the condemnation of Prynne was a matter of course. After a full hearing he was sentenced to have his book burnt by the common hangman, to be degraded from the bar, and turned out of the society of Lincoln's Inn, to be degraded at Oxford, to stand twice in the pillory at Westminster and Cheapside, and to lose one of his ears at each place, to pay a fine of £5,000, and then to be imprisoned for life. This must have been a moderate sentence in the eyes of some of the lords of the council, for the earl of Dorset addressed their prisoner in these words:— 'Mr. Prynne, I declare you to be a schism-maker in the church, a sedition-sower in the commonwealth, a wolf in sheep's clothing; in a word, *omnium malorum nequissimus*. I shall fine him £10,000, which is more than he is worth, yet less than he deserves. I will not set him at liberty, no more than a plagued man or a mad dog, who, though he can't bite will foam; he is so far from being a social soul that he is not a rational soul. He is fit to live in dens with such beasts of prey as wolves and tigers like himself; therefore, I condemn him to perpetual imprisonment; and for corporal punishment I would have him branded in the forehead, slit in the nose, and have his ears chopped off.' The sentence was executed, and the general raid against nonconformists caused many to seek refuge in Holland. In 1636 Prynne, though in prison, wrote another book, entitled 'News from Ipswich' against the system of Laud (see LAUD), and being condemned again to another fine of

£5,000, and to lose the remainder of his ears, had the very stumps hacked off, and was branded on both cheeks in the presence of indignant thousands, on the 30th of June, 1637. In this last sentence Burton the famous preacher, and Bastwick the physician, were included with him, and the former was accompanied on his road to prison by a vast concourse of the populace. In 1640 Prynne was chosen member of the long parliament for Newport, and was then released by order of the House of Commons, together with his fellow-sufferers, and they entered London in the midst of a triumphant procession which met them some miles from town. The House of Commons likewise voted them money in compensation, which they never got, in consequence of the disturbed state of the times. The cruel punishment these men had undergone excited the spirit of the nation, and prepared it for the change of government, yet Prynne was no party to those measures, and when Colonel Pride took possession of the house, he was among the excluded members; he also published a 'Memento' against the trial of the king, for which he was imprisoned by the parliament. His subsequent history is that of an enemy of Cromwell, and having joined in the restoration of Charles II., he was appointed chief keeper of the records in the Tower, and died in that office at his chambers in Lincoln's Inn, 1669. Wood calculates that he wrote a sheet of MS. for every day of his lifetime after reaching man's estate. 'His custom was, when he studied, to put on a long quilted cap, which came an inch over his eyes, serving as an umbrella to defend them from too much light; and seldom eating a dinner, would every three hours or more be munching a roll of bread, and now and then refresh his exhausted spirits with ale. To this (says the editor of Neale) Butler seems to allude in his address to his muse:—

Thou that with ale or viler liquors  
Didst inspire Withers, Prynne, or Vicars,  
And teach them, though it were in spite  
Of nature and their stars, to write.'

His works amount to forty volumes, folio and quarto. The most valuable, and a very useful performance, is his 'Collection of Records' in four large volumes.

PRZEMYSLAS, a king of Poland, who seized the crown on the death of Lesko VI. 1295, and was assassinated 1296.

PRZIPCOWIUS, SAMUEL, a Polish statesman and zealot of the Socinians, b. about 1592, d. 1670.

PSALMANAZAR, GEORGE, a literary impostor, was born in France, in 1679, and received an excellent education. He commenced his career by leading a wandering life, and assumed the habit of a pilgrim; but this not answering his purpose, he pretended to be a native of Formosa; and to keep up the delusion, he invented a new alphabet, and a grammar of the Formosan tongue. At this time he became acquainted with a clergyman named Innes, who, conceiving he could turn the impostor to good account, persuaded the pretended Formosan to suffer himself to be converted to the Church of England; and the clergyman and his new disciple went to London, where the latter was presented to Bishop Compton and others, and the former was rewarded for his zeal with church preferment. Psalmanazar had the effrontery to translate the Church Catechism, into his newly invented Formosan language: and he published a "History of Formosa," which was considered as authentic by many eminent men; nor was the cheat discovered till after he had been sent to Oxford. After this he gained a subsistence by writing for the booksellers, and became remarkable

in his latter years for his sincere and unaffected piety. A large portion of the ancient part of the "Universal History" was written by him, and he left behind him his own "Memoirs." Died 1763.

PSAMMENITUS, the last Egyptian king named by Herodotus, suc. his father, Amasis, B.C. 525, deposed by Cambyses after a reign of six months.

PSAMMIS, a king of Egypt, 599-594 B.C.

PSAMMETICHUS, a king of Egypt, who reigned fifty-four years, during fifteen of which he was compelled to divide his power with eleven other sovereigns. He reigned alone from 652 to 614 B.C., and was succeeded by his son Necho. Another PSAMMETICHUS reigned 400-397 B.C. A king of Corinth, of the same name, reigned 585-582 B.C., after whose time the republican form of government was established.

PSAMMUS, a king of Egypt, 819-810 B.C.

PSAMMUTHIS, a king of Egypt, 380-379 B.C.

PSAUME, N., a French theologian, 1518-1575.

PSELLUS, MICHAEL CONSTANTINE, a Greek physician, known as a classical commentator and mathematician, about 1105. Another PSELLUS, called MICHAEL THE ELDER, wrote a work, 'De Operatione Dæmonum,' in the 9th century.

PSINACHES, a king of Egypt, who is said to have reigned from 1021 to 1013 B.C.

PSUSENNES, the *first* of the name, king of Egypt, 1077-1037 B.C. The *second*, 1013-979 B.C.

PSYCHRISTUS, a physician of the 5th cent.

PTOLEMY (SOTER) I., king of Egypt, natural son of Philip of Macedon, and an officer of Alexander the Great, succeeded to the government of Egypt on the death of the latter B.C. 324. He took the title of king 307, and raised the new capital of Egypt to the highest importance as the centre of commerce and learning. The museum and library founded by him gave birth to the famous Alexandrian school. Died B.C. 283. PTOLEMY (PHILADELPHUS) II., eldest son of the preceding by Berenice, began to reign in conjunction with his father 285, and became sole king 283. His reign fully sustained the reputation of the former, especially by his generous patronage of letters, one example of which is the Septuagint version of the Hebrew Scriptures, which he caused to be executed. Died B.C. 247. PTOLEMY (EUEGETES) III., son and successor of the preceding, continued his policy, and carried his victorious arms into Syria, Cilicia, and the whole country to the shore of the Euphrates. He restored the idols and much of the wealth ravished by Cambyses, and died, after a short reign, B.C. 222 or 221. PTOLEMY (PHILOPATOR) IV., son and successor of the preceding, whom he was suspected of having murdered, was a cruel and debauched character. He was named Philopator (lover of his father), ironically. He caused his wife, Arsinoe, who was also his sister, to be put to death, and sustained a furious war with Antiochus the Great, whom he defeated near Gaza. Died B.C. 205. PTOLEMY (EPIPHANES) V., son of the preceding, was born B.C. 210, became king 205, and was poisoned by his courtiers 180. He brought the Romans into Egypt by appealing to them for protection against Antiochus the Great. He left three children—Ptolemy Philometor, Ptolemy Physcon, and Cleopatra, who was successively the wife of her two brothers. PTOLEMY (PHILOMETOR) VI., son of the preceding and Cleopatra of Syria, was born B.C. 186, commenced his reign at the age of five years, 181, protected by his mother. He was defeated by Antiochus, and compelled to admit his brother to a share in the government 171. Died of his wounds, fighting against Alexander Balas in

Syria, 146. PTOLEMY (EUEGETES) VII., brother of Philometor, became guardian of the young king, Ptolemy Eupator, and the year after superseded him on the throne by espousing the queen mother, Cleopatra, 145. He then killed Eupator, and continued his reign, stained with debaucheries and cruelty, till 117 or 116 B.C. PTOLEMY (SOTER) VIII., son of the preceding and Cleopatra, succeeded 116, and sustained a war against his mother, who preferred her other son, Ptolemy IX., till 106. After the death of Cleopatra and the expulsion of Ptolemy IX., who had usurped the throne in 88, he assumed the sovereign authority, and died 81 B.C. He left the crown to his daughter, Berenice, called also Cleopatra. PTOLEMY (ALEXANDER) IX., second son of Ptolemy VII. and Cleopatra, usurped the kingdom a short time during the reign of the preceding, and was dethroned, after murdering his mother Cleopatra, 88. PTOLEMY (ALEXANDER) X., son of the preceding, succeeded Ptolemy VIII. 81, under the patronage of the Romans in the time of Sylla. He married Berenice Cleopatra, whom he caused to be assassinated, for which he was himself massacred after a reign of nineteen days. PTOLEMY (AULETES) XI., a natural son of Ptolemy VIII., was the only descendant of this line of princes after the tragedy just mentioned. He assumed the royal authority 81 B.C., but was not acknowledged king till 59. In 58 he was obliged to fly from Alexandria, and was in Rome, soliciting assistance to re-establish himself till 55. He was then restored by Gabinius, the governor of Syria and lieutenant-general of Pompey, and died 52. PTOLEMY (DIONYSIUS) XII., eldest son of the preceding, succeeded to the throne conjointly with his sister, Cleopatra, under the protection of Pompey, 52. He became a partisan of Cæsar in the civil wars, and after the battle of Pharsalia caused Pompey to be assassinated, who sought refuge in his states, 48. Aspiring to be sole king, he then took arms against Cæsar, who had decided that Cleopatra should continue to reign with him, and was drowned in the Nile while flying from the field of battle, B.C. 47. PTOLEMY XIII., younger brother of the preceding, was eleven years of age when Cleopatra was left sole mistress of Egypt by his death. She was compelled to marry him by Cæsar, and he reigned with her till his death, 44 or 43 B.C. PTOLEMY (CÆSARION) XIV., an illegitimate son of Cæsar and Cleopatra, obtained the title of king from the Roman triumvirs, B.C. 42. He was killed by order of Augustus at the age of eighteen, B.C. 30.

PTOLEMY, two kings of Macedonia: the *first* surnamed *Alorites*, a natural son of Amyntas II., usurped the throne to the prejudice of his brother, Perdicas, B.C. 371, and was dethroned by Pelopidas 368. The *second*, surnamed *Craunus*, eldest son of Ptolemy Soter and Euridice, succeeded B.C. 284, and was killed in battle with the Gauls 280.

PTOLEMY APION, king of Cyrene, and all the Libyan dependencies of Egypt, was a son of Ptolemy VII. and his mistress Irene, and succeeded 117 or 116 B.C. by the will of his father. He died B.C. 96, and bequeathed his estates to the Romans, who declined the bargain for a time, and gave the people their liberty.

PTOLEMY PHILADELPHIUS, a son of Antony and Cleopatra, was made king of Syria, Phœnicia, and Cilicia, by his father B.C. 32. He never reigned, however, but lived at the court of Juba, king of Numidia, having first graced the triumph of Augustus together with his brother, Alexander, and his sister Cleopatra.

PTOLEMY, king of Cyprus, a natural son of

Ptolemy VIII., succeeded to the sovereignty of that island at the death of his father B.C. 81. The Romans having resolved to reduce his kingdom to a province, he was poisoned B.C. 58.

PTOLEMY, king of Mauritania, son of Juba II. and Cleopatra, daughter of Mark Antony and of the last Cleopatra of Egypt, began to reign 19 or 20 B.C. Killed by order of Caligula A.D. 40.

PTOLEMY, one of the petty sovereigns who reigned in Syria after the fall of the Seleucides, succeeded his father, Menneus, probably as grand priest, 86 B.C. After the conquest of Mithridates the Great, he was protected by Pompey, and died about 21 B.C. He was succeeded by his son, Lysanias, at whose death the Lebanon sovereignty was given to Cleopatra.

PTOLEMY, an Egyptian priest and historian, flourished in the reign of Augustus.

PTOLEMY, CLAUDIUS, one of the most distinguished men of Science of Antiquity: he lived during the first half of the second century; and his works on Astronomy and Geography continued authorities and text-books for fourteen hundred years. In consequence of the close connection between Ptolemy and Hipparchus, whose discoveries he reported, and whose labors he continued, it is difficult to detect Ptolemy's proper deservings: but Delambre has evidently done him injustice from a desire to exalt Hipparchus. The larger portion of the Planetary theory, as that was represented by the scheme of Epicycles, is unquestionably due to him; and his great work—the *Almagest*, or *Syntax*, is the only complete systematic work on Astronomy which the ancient world produced. As a geographer, Ptolemy is distinguished from Strabo: the work of the latter is confined to descriptive geography; while that of Ptolemy is mathematical. A very admirable edition of it has recently appeared in Germany. The Astronomical and Chronological works of Ptolemy, along with the Commentaries of Theon, were edited and published along with a French translation, in six handsome quarto volumes, by the Abbé Halma.

[J.P.N.]

PTOLEMY OF LUCCA, the ecclesiastical name assumed by BARTOLOMEO FIADONI, an historian, 14th century.

PUBITSKA, F., a Bohemian hist., 1722–1807.

PUBLICOLA, PUBLIUS VALERIUS, successor of Collatinus as consul and founder of the Roman republic, 509 B.C., died 501.

PUBLIUS SYRIUS, a Latin poet or dramatist, of whose writings some fragments, or moral sentences, are preserved in the works of Seneca. He was a native of Syria, and went to Rome in the condition of a slave about 50 B.C.

PUCCI, F., an Italian theologian, died 1600.

PUCELLE, R., a French lawyer, 1655–1746.

PUCELLE. See JOAN OF ARC.

PUFFENDORF, SAMUEL, a historian, jurist, and naturalist, was born at Chemnitz in Saxony in the year 1632. He was educated at Leipzig for the protestant ministry, but the bent of his mind was in another direction. Through the instrumentality of his elder brother he entered the diplomatic service of Sweden. In the course of his duty he was detained at Copenhagen during a rupture between Sweden and Denmark, and it is said to have been during this period of forced leisure that he turned from the practice to the theory of diplomacy and international relations. In the year 1660 he published his well-known '*Elementa Jurisprudentiæ Universalis*,' and twelve years afterwards, the still better known '*De Jure Naturæ et Gentium*.' He wrote some

historical works, chiefly directed to gratify his crowned employes, which have only been known because they were written by the author of the treatise on the law of nature and nations. This work owed its existence in a great measure to the original labors of Grotius. Puffendorf had a clear and systematic mind, and a great capacity for seeing and developing views which were rational and plausible, if not profound. In this he resembled the Scottish school of philosophers with whom his works, and especially a small ethical Treatise '*De Officio Hominis et Civis*,' were deemed of great authority. His views on the anomalous position of the German empire created a vast controversy, and such political influence as it has been rare for theoretical writers to create. He died at Berlin, where he had been ennobled by the elector of Brandenburg, in 1694.

PUGATSCHEFF, JEMELJAN or YEMELKA, a Cossack general, who obtained military rank in the Prussian and Austrian armies, and afterwards passed himself off as Peter III., emperor of Russia. He took the field in 1773, and, soon at the head of 16,000 men, he was marching on Moscow, when he was betrayed and executed 1775.

PUGET, L. DE, a French naturalist, 1629–1709.

PUGET, PETER, one of the greatest artists produced by France, distinguished as a sculptor, architect, painter and ship-builder, 1622–1694. His son, FRANCIS, an architect and painter, died 1707.

PUGHE, WILLIAM OWEN, a Welsh literateur, author of a Lexicon and other works, 1760–1835.

PUGIN, A., a French designer, died 1832.

PUGIN, AUGUSTUS NORTHMORE WELBY, was the son of a French gentleman who fled to England at the period of the revolution. He was born in 1811, and commenced his professional career as a scene painter and decorator at the Theatre Royal, Covent Garden: he published his first work, on '*Gothic Furniture*,' in 1835, and '*The Glossary of Ecclesiastical Ornament*' in 1844. Died 1852.

PUISAYE, Count JOSEPH, an able royalist chief, was descended from an ancient and noble family, and born at Montagne, about 1754. He was intended for the church, but preferred the military profession, and obtained the brevet of colonel in the royal Swiss corps. He sat in the constituent assembly, and regularly voted with the partisans of political regeneration. In 1793, forces having been collected in the northern department to oppose the Jacobins, he was appointed to act as second in command under General Wimpfen, and was consequently proscribed by the convention. He took refuge in Brittany, where he organized a formidable body of Chouans. He visited England in 1794, obtained a considerable succor, was invested with unlimited powers by the Count d'Artois; and, on his return to France, every preparation was made by the Bretons to join the English and emigrant troops as soon as they should appear on the French coasts. But his hopes were blasted by envious intriguers of his own party; the expedition was diverted to La Vendee, and the unfortunate disaster at Quiberon followed. He at length resigned his commission and went to Canada; but he subsequently went to England, where he resided till his death in 1827.

PUISSANT, L., a Fr. geometrician, 1769–1843.

PUJOL, A., a Fr. medical writer, 1739–1804.

PUJOULX, J. B., a dramatist, 1762–1821.

PULCHERIA, ÆLIA, saint and empress of the East, was daughter of Arcadius and Eudoxia. She was born at Constantinople 399, and governed the empire under the name of her brother, Theodosius, from the age of fifteen to the year 447, when she

was disgraced. After the death of Theodosius in 450, she was proclaimed empress, and ruled with Marcianus, whom she married, till her death in 453. She was a woman of exemplary conduct, and has the credit of assembling the council of Chalcedon in 451.

PULCI, LUIGI, an Italian poet, 1431-1487.

PULGAR, F. DE, a Spanish historian, 1436-86.

PULIGO, D., an Italian painter, 1475-1527.

PULLUS, or PULLER, R., an English cardinal, who restored the university of Oxford, 12th cent.

PULTENEY, R., a dist. botanist, 1730-1801.

PULTENEY, WILLIAM, earl of Bath, the political antagonist of Sir Robert Walpole, was born in 1682, and educated at Westminster School and Christchurch, Oxford. After travelling through Europe, he was elected into parliament, and became distinguished as a zealous Whig. On the accession of George I. he was appointed a privy councillor and secretary at war; but a dispute with Sir Robert Walpole caused his removal to the ranks of the opposition. He joined Bolingbroke in conducting a paper, called the *Craftsman*, the object of which was to annoy the minister. This produced a duel between Pulteney and Lord Hervey; and the king was so much displeased with the conduct of the former, that he struck his name out of the list of privy councillors, and also from the commission of the peace. On the resignation of Walpole, in 1741, Pulteney was created earl of Bath; but from that time his popularity and influence ceased. Died 1764.

PULASKI, COUNT, a distinguished Pole, and brigadier-general in the revolutionary army of the U. S. In 1771 he carried off King Stanislaus from the middle of his capital, but his majesty having escaped, he proclaimed Pulaski an outlaw. He then came to the U. S. and offered his services to Congress, which were accepted. He distinguished himself in several engagements, and finally in the assault upon Savannah in 1779, where he conducted himself with great courage, he fell mortally wounded and died soon after.

PULZONE, S., an Italian painter, 1550-1588.

PUNT, J., a Dutch painter, 1711-1779.

PUTIENUS. See MAXIMUS CLODIUS.

PURCELL, HENRY, the greatest of English musicians, was born in 1658, as it is believed, in Westminster. His father and uncle were both musicians, and gentlemen of the Chapel Royal at the Restoration. It is known that Purcell's father died in 1664, so that the young musician could not have received much benefit from his instructions. It is not a little to be wondered at that there is no account of from whom he received his first lessons in musical art, though from the circumstance that he was entered as one of the children of the chapel when Cook was master, it is inferred that he had under him commenced his education. He is supposed, also, to have received lessons from Pelham Humphreys, and afterwards from Dr. Blow, on whose tombstone was inscribed that he had been 'master to the famous Mr. Henry Purcell.' While still a boy, Purcell composed several Anthems that were thought worthy of being performed, and some of these juvenile essays in composition are in use in the English cathedrals to the present time. At eighteen years of age he was appointed organist at Westminster Abbey; and at twenty-four he was promoted to one of the three places of organist to the Chapel Royal. After this his fame was spread far and wide, and his sacred compositions were sought after with greediness and listened to with a feeling akin to religious rapture. From this period until thirty years after his death,

his songs took precedence of all others, and only at length gave way before the fashionable operatic songs of the greater Handel. The works of Purcell embrace every species of composition then known, and all were far beyond those of his contemporaries. Purcell's first dramatic writings were to the songs in Nahum Tate's 'Dido and Æneas.' He afterwards composed music for Nat Lee's 'Theodosius, or the Force of Love,' which was performed at the Duke's theatre in 1690. In the same year he composed music for the 'Tempest.' In 1691 he set the songs of Dryden's 'King Arthur' to original music. In 1692 'The Indian Queen,' by Sir R. Howard and Dryden was brought out with music by Purcell. He next wrote music for D'Urfey's 'Don Quixote.' In D'Urfey's 'Pills to Purge Melancholy' several of his songs are published, as also in Playford's 'Singing Master.' In 1695 he composed music for 'Boadicea.' He also wrote airs, overtures, and interludes for many dramas. He composed three cantatas, two of which, 'Mad Bess' and 'From Rosy Bowers,' are still ranked as unrivalled works of their kind. After his death, which happened in November, 1695, his widow collected and published his works in 2 vols. folio, under the title of 'Orpheus Britannicus.' It is said of Purcell 'that his anthems far exceed in number those of any other composer, and would alone have furnished sufficient employment for a moderately active mind, and a life of average duration.' Purcell's remains were deposited in Westminster Abbey, where a tablet to his memory may be seen, with the following inscription, said to be from the pen of Dryden:—'Here lies Henry Purcell, Esq., who left this life, and is gone to that blessed place, where only his own harmony can be exceeded. Obiit 21mo die Novembris, Anno ætatis suæ 37mo Annoq. Domini 1695.' [J.M.]

PURCHAS, SAMUEL, a divine, was born in 1577, at Thaxted, in Essex; and died in 1628, rector of St. Martin's, Ludgate. His principal work is the well known 'Collection of Voyages,' in 4 vols., and his 'Pilgrimages, or Relations of the World.'

PURE, M. DE, a French writer, 1634-1680.

PURI, D., a Swiss philanthropist, 1709-1786.

PURI, J. P., a Swiss traveller, last century.

PURSH, FREDERIC, a botanist and author of the 'Flora Americæ Septentrionalis,' was born in Tobolski in Siberia, educated at Dresden, and resided in America from 1799 to 1811.

PURVER, ANTHONY, a self-instructed man, of humble birth, was born at Up Hurstbourne, in Hampshire, in 1702, and was apprenticed to a shoemaker. Being afterwards employed in keeping sheep, he found leisure for study; and his curiosity being excited by the perusal of a tract in which some inaccuracies in the authorized version of the Bible were pointed out, he resolved to make himself acquainted with the Scriptures in their original tongues. Accordingly, with some assistance from a Jew, he acquired a knowledge of the Hebrew, then applied to the Greek, and next studied Latin. On settling at Andover as a schoolmaster, he undertook the extraordinary labor of translating the Bible into English; which work he actually accomplished, and it was printed at the expense of Dr. Fothergill, in 2 vols. folio. Died 1777.

PUSCHKIN, A. S., a Russian poet, 1799-1837.

PUSSORT, H., a French jurist, 1615-1697.

PUTACCI, CAMILLO, Chevalier, sculptor of the Vatican Museum at Rome, died 1854.

PUTNAM, ISRAEL, familiarly known as 'Old Put,' an American revolutionary major-general, was born in Salem, Mass., 1718. His education was of the

humblest kind, but he early distinguished himself for his daring and love of adventure. He emigrated to Connecticut, where he cultivated a farm and made himself famous the country round, for his daring in hunting the wolves which at that time committed great ravages in the neighborhood. He was led into all kinds of danger by his adventurous spirit, and had many hair-breadth escapes by flood and field. In Indian warfare he was distinguished before the revolutionary war offered him a wider field for the exercise of his abilities. He won renown at Bunker Hill, and throughout the revolutionary campaign was one of the most effective, as he was one of the bravest officers in the American army. Died 1790.

PUTNAM, RUFUS, an American revolutionary officer, born in Mass., was one of the earliest settlers of Ohio. He held various political offices, and was appointed surveyor-general of the U. S. in 1795. Died 1824.

PUTTEN, HENRY VAN DER, called in Latin *Eri-cinus Puteanus*, and in French *Dupuy*, a learned Dutch writer and poet, 1574-1646

PUTTENHAM, GEORGE, an Oxford scholar, kn. as a poet in the age of Elizabeth, died about 1600.

PUTTER, J. S., a Germ. publicist, 1725-1807.

PUY, A. J. DU, a Fr. statesman, 1753-1832.

PUY, H. DU. See PUTTEN.

PUY, LOUIS DU, a Fr. literateur, 1709-1795.

PUY, PIERRE DU, a learned French antiquarian, historian, and theologian, 1582-1651.

PÜY-SEGUR, JAMES DE CHASTENET, Viscount De, a French officer, who was at thirty battles and a hundred and twenty sieges without ever receiving a wound. He was born in 1600, and is author of *Memoirs* relating to the period, 1617 to 1658; died 1682. His son, JAMES FRANCIS, commander-in-chief in the French Netherlands and marshal of France, author of 'The Art of War,' 1655-1743. The son of the latter, FRANCIS MAXIMUS DE CHASTENET, Marquis de Puysegur, a lieutenant-general, and writer on church property and the military art in China, 1716-1782. His second son, ANTHONY HYACINTHE ANNE DE CHASTENET DE PUYSEGUR, better known as the Count de Chastenet, a navigator and archæologist, 1752-1802. P. L. DE CHASTENET, Comte De Puysegur, son of the marshal, an officer and minister of war, 1727-1807. J. AUGUSTUS, brother of the latter, a distinguished prelate and deputy of the estates-general, 1740-1803. ARMAND MARIE JAMES, son of the minister of war, camp-marshal and physician, famous for his zeal in the propagation of animal magnetism, 1782-1825.

PUZOS, N., a Fr. accoucheur, 1686-1753.

PUY, or PYE, H. J., a native of London, successor of Wharton as poet-laureate, 1745-1813.

PYLE, THOMAS, a minister of the Church of England, known as a Scripture commentator, and partisan of Hoadley in the Bangorian controversy, 1674-1756.

PYM, JOHN, member for Tavistock in all the parliaments of Charles I., and leader of the House of Commons during the struggle preceding the parliamentary wars, was born in Somersetshire, 1584, and educated at Oxford. He was the orator of the day, and such was his popularity, that he was called 'King Pym.' The events which mark his career fill a considerable space in English history. In 1626-1628 he was among those who managed the impeachment of the duke of Buckingham and Dr. Manwaring—the latter for his sermon on the regal prerogative, in which he argued that the consent of parliament was not necessary for the levying of taxes, and that the Divine laws require implicit

obedience to the king. In 1639 Pym and his party came into close relationship with the Scotch Covenanters. When the long parliament met, 3d November, 1640, he harangued them on the grievances of the nation, which they immediately took into consideration instead of the king's speech; thus he was the Mirabeau of the English Tennis Court. About a week afterwards he made a more studied and more impetuous discourse on grievances, and impeached the earl of Strafford not only of crimes against the state, but of immoralities; he was also one of the managers of his trial, as, in short, he was always at the head of the public business, and knew more of parliamentary matters than any man living. In February, 1641, he spoke against Archbishop Laud, on occasion of his impeachment, and after the execution of that prelate he became chairman of the committee appointed by the House of Commons during the recess, which lasted from 9th September to 20th October, by which committee the sovereign authority was in some measure exercised. The next great event, beginning of 1642, was the impeachment of the five members, Hollis, Hazlerig, Hampden, Pym, and Strode, who were demanded by the king for treasonable practices, and protected by the city; on this occasion the king left London, apprehensive of his personal safety. Pym, therefore, saw the commencement of the final struggle between Charles I. and his parliament; but he died before any decisive advantage had been obtained, on the 8th of December, 1643, about a month after he had been appointed lieutenant of the ordnance. It was reported among the royalists that the cause of his death was *morbus pediculosus*; and in order to disprove this calumny his body was exposed for several days to the public gaze; afterwards, it was attended to the grave in Westminster Abbey by most of the lords and commons in parliament. Shortly before his death Pym published a 'Vindication' of his conduct. After alluding to the divisions fomented by the bishops, and their encouragement of the malignants, he adds:—'For these reasons I gave my opinion for abolishing their functions, which I conceive may as well be done as the dissolution of monasteries, monks, and friars, was in King Henry the Eighth's time;' he concludes with declaring that he was not the author of the present distractions; with acknowledging the king for his lawful sovereign; and with the honest conviction that when he was persecuted as a traitor merely for the service of his country, no man could blame him for taking care of his own safety by flying for refuge to the protection of parliament, who were pleased to make his cause their own. The puritan Marshall attended Pym's deathbed, and in the funeral sermon which he preached before parliament, passed the highest eulogium on the strict morality, piety, and serenity of the departed patriot and statesman. It is admitted that Pym was one of the first, to urge the necessity of appealing to the sword. On the restoration of Charles II., Pym's body was dug up in Henry the Seventh's chapel, with those of about twenty others, including the gallant Admiral Blake, the mother of Cromwell, and his daughter Mrs. Claypole, and transferred to the neighboring churchyard. He is said to have left several children, and his lady, who died in 1620, is reported to have been a highly accomplished woman. [E.R.]

PYNAKKER, A., a dutch painter, 1621-1673.

PYNE, WILLIAM HENRY, an English artist and light miscellaneous writer. Died 1843.

PYNSON, RICHARD. See PINSON.

PYRA, J. E., a German poet, 1715-1744.

PYRRHO, born at ELIS, where he lived about the year 340 B.C. Plato was then dead: disputations had arisen in the ACADEMY, which had not had the fortune to obtain a second master: ARISTOTLE attacked it on all sides; and philosophy was in confusion. In the midst of these quarrels, the remarkable person we have named arose, and proclaimed as the dogma of his Philosophy and his rule of Life—'I know nothing about it and abstain.' Of a man who wrote nothing, and whose character must be gathered from scraps preserved by auditors, it is impossible to speak with decision; but to his power over his contemporaries, and, therefore, to his genius, the singular embalmment of his name bears ample testimony. Great mistakes have prevailed regarding the doctrines of Pyrrho:—notable Greeks had never so little common sense, as a personage like what he is vulgarly imagined to have been:—the stories about his doubting the evidence of his senses, and wilfully butting against any post or rock in his way, are simply absurd—even more so than those similar myths, once prevalent regarding our shrewd and sagacious compatriot DAVID HUME! We shall learn the nature of Pyrrho's scepticism, through reflection on his position. The scheme he propounded, or rather the resource to which he fled, was simply a *tertium quid*, in reference to AFFIRMATIVE and NEGATIVE systems, prevailing in his time. Now what were these? Nothing but the very conflict waging in philosophy around ourselves—the conflict, viz., between Idealism and Sensualism—between doctrines of the Absolute, and of the dependence of the Mind for all its functions, on the shows and events of external Nature. There are two Schools, said Pyrrho,—whose systems, viewed from their different points of sight, appear equally probable; and the relation of the strength of the arguments sustaining them seems to be—*par*. Is it not most likely then, that the problem sought to be resolved, is really insoluble by the human faculties, and therefore, that the true position, of the sage, is one of *Indifference*? In the *principle* of a Scepticism of this sort, there is certainly nothing ridiculous: it involves little more than we find in the *Antinomies* of KANT: assuredly it has firmer ground, than thousands of popular dogmatisms on either side. There is no reason whatever to suppose that Pyrrho's doctrines went beyond this:—he never denied subjective certainty, or sought to weaken the evidence of consciousness. One caution to the student may be repeated:—he ought in no case to credit the follies, attributed to these Speculative Greeks; for, if eminently speculative, they were, in their quality of natural Artists, eminently clear and practical also. There is a maxim of Coleridge's, which should, in no attempt at interpretation, be at any time lost sight of:—'*Never suppose that you understand a man's Ignorance, until you are sure that you are not ignorant of his Understanding.*' [J.P.N.]

PYRRHUS, son of Æcides, and king of Epirus, one of the most illustrious generals of antiquity, was born about 318 B.C., and was left an orphan in childhood under the protection of Glaucias, king of Illyria. He was placed on the throne of his ancestors by force of arms when about twelve years of age, and reigned peacefully five years, when advantage was taken of his absence to transfer the crown to his great uncle, Neoptolemus. After serving in the army of Alexander the Great, and greatly distinguishing himself at the battle of Ipsus, B.C., 301, Pyrrhus recovered his dominions, which he shared with his rival, and then caused the latter to be put to death. He next contended with the Romans for

[Pyrrhus, from an Antique Bust.]

possession of the dominions of Alexander the Great, and became master of Macedon. Among his principal battles was that of 279 B.C. against the Roman consuls Sulpicius and Decius. He was killed, gallantly fighting, at the siege of Argos, B.C. 272. The life of Pyrrhus is one of the most interesting written by Plutarch. [E.R.]

PYTHAGORAS lived, according to the chronology of CLINTON, about 570 B.C. CICERO tells us, he settled in Magna Græcia, in the fourth year of TARQUINIUS SUPERBUS, or when ROME had begun to rise—between 520 and 530 B.C.:—One of the most august Forms of which we can descry any outline, through these long twenty-four centuries; nor, if we reflect, how thickly the mists have settled around all acts and Actors of that far past, can it be wonderful, that, as if his Shadow only, is now to be discerned. Before attempting to lay down on a modern canvas, even a space for that Shadow, we must consent to a few principles of applicable historic criticism. And, foremost of all, it is imperative that we disconnect not only with Reality or Fact, but also with the pretensions, and therefore with the reputation of this memorable Teacher, every shred of the marvellous that so soon got fastened to his name. Not merely the story of the *golden thigh*—a myth of the vulgarest kind, and valuable only as evidence that such myths spring up and endure,—but also those manifold traditions concerning his supernatural instruction; for assuredly in the tales of his initiation in the cave of the Cretan Jupiter, or that his system of morals flowed direct from inspired lips at Delphi, there is nothing beyond incidents of travel occurring to one who thirsted for all knowledge; and disfigured through the slavish veneration of disciples, who, instead of being fed by his genius, succumbed to his authority, and slid insensibly into such modes as those, of rendering reason for their ultimate formula and final appeal—the *αυτος εφη*.—Next, and with equal decision, we reject as binding on Pythagoras, the *logical* schemes constructed by his followers, even so early as the times of Philolaus. The schools founded on the name of an illustrious Master, never retain his genius; and as in default of power of Insight, and the difficult power of Thought, there remains the easy exercise of Logic, it uniformly befalls—as already we have required to assert—that the *letter* of the original teaching becomes substituted for its *spirit*; symbols and figures of speech at first simple and catholic, are adduced in defence of mere dogmas and phantasms; and—worst of all—effective and living Morals, touching on the practical relations of Man with Society and God, are displaced by arid Theory.

This is the process by which, in the words of a remarkable writer of our own day, WISDOM is *dried for sale and exportation*; and has not its pestilence followed the steps of all mighty Instructors, whose feet have ever touched the soil of our World? Let us not charge to Pythagoras, that doctrine which defines the Physical World by the number *five*,—the Vegetable by the number *six*,—the Animal by *seven*,—Human Life by *eight*,—Ultramundane Life by *nine*,—and the Divine Life by the *Δεκάς*, or *TEN*! The Mind that has left so great a remembrance, and which fills that imposing portion of the sphere of Antiquity, did not gain its influence over the working Manhood of its time, through the concoction or preaching of enigmas like these!—Lastly: we must not approach these ancient philosophies, or undertake their interpretation, as if they were inherently mysterious, or different *in kind*, from the aspirations of great and sincere Thinkers of our own day:—The concealed lore of Egyptian priests, the secrets at Eleusis or Samothrace, were neither knowledge nor philosophies, but presumption and pretence, founded on the abuse of both. Greatness in Antiquity, is like Greatness now,—its foremost affection being for the simplicity of Truth; and to the right apprehension of what that Greatness was, there is no path save one. The Ingenuous alone can understand the Ingenuous:—The worthy Seeker, will ever carry along with him, faith in Greatness and reverence for it; but this conviction, also,—that, to whatever extent careful criticism of the influences and circumstances, within which an Ancient Teacher lived, does not enable us to translate his thoughts into the universal language of the Heart and Reason of Humanity, to that same extent must he be held as severed from the Present, and therefore effaced from its Past. Under such dim but guiding lights, let us, as best we may, and with rapid crayon, proceed to sketch the features of the Crotonian statesman and sage. And FIRST,—as to the position from which Pythagoras started. He could have no starting point except the fundamental Idea of the Ionian School, which, in an enlarged sense, is the fundamental Idea of all Greek Philosophy—viz.: beneath the endless forms and singular changes of outward things, there is some great Unity or Principle,—just as the unfathomed and deep-sounding ocean, rests underneath the billows that chase each other across its surface, and die in ripples on the shore. Now the Ionians, or the *physical* school, sought this principle in a common *physical element*; and, on the ground of imperfect observation, or ruder experiments, one imagined that the forms of substance could be traced to transformations of *Water*; another to modifications of *Air*; and a third laid it down that *Fire* is the universal substance or Force. This form of the general conception, must be taken as our first systematic statement of that problem, which still occupies Chemical Analysts: it is the glory of Pythagoras, that he struck out a new mode of the same grand search, and laid the foundation of those Physical Sciences, which look not for *elements*, but *relations*, and, through these, for ultimate *Laws*—indicating primal *Forces*. The most consummate and inventive Mathematician of that epoch—he found in NUMBERS the expression of the relation of *Quantity*, and in GEOMETRY, an organ that could evolve the relations of *Form*. It were simply foolish to pretend, that he proceeded far, in the reduction of phenomena within such relations: but the idea of a possible science in this direction, took strong hold of his masculine intellect and Greek imagination; and he embodied the conviction, in the dogma of his

School. These convictions were deepened, and his conception of the character of the Universe vastly enlarged, by what we must consider either a most fortunate guess, or a capital discovery. Struck, as could not fail to a Samian, by that unsurpassed music, which had floated around him from infancy, in the chanted Lyrics, and great Epics of Troy, he seems to have discerned that HARMONY was representable by NUMBER; and hence the second fundamental belief of his Philosophy, that Harmony too is sacred, and one of the first principles of Things. It may not be said, that in the expression of truths so deep, an Inquirer, even sagacious as Pythagoras, must always have avoided fantastic expressions and mystical forms; but then his notions were correct at their root, and his faith a living and practical one: he looked at the scheme of Things around him, no longer as perplexing, but as a mighty order and a solemn music, and he bent in wonder and adoration! Should the student desire a tangible and veritable Image of such a philosophy, he must not go to Philolaus, or Antiquarian Critics, but to the writings of JOHN KEPLER. He too, spoke strangely in his youth; but those dreams about relation and harmony, conducted him in the end to a *κτῆμα, ἐς αἰεὶ*—to Laws which produced the epoch of Newton, and raised him into an everlasting Name. The sage and Lawgiver of Crotona, stands, however, towards the ancient and modern world alike, in a *second* aspect—one that shows him on a platform quite above any which belongs to mere Speculative Physics. First, or at least most clearly in the Greek world, he felt and asserted the indestructible personality of the Human Soul, and that the ground of its Existence, is its Moral State. Children laugh at the doctrine of the *Metempsychosis*; but observe what it really signifies, and the august verities it includes. It is an averment, in the first place, of the independence of the Ego, or of the SOUL, not merely of surrounding and changing accidents, but of its present and apparent Life,—an idea, which, in its majestic proportions can take possession of no Mind, without making it great. Pythagoras, missed none of these proportions. The soul is measured by its moral conditions, and its fates and forms correspond with these. If it has done well its duty in its existing state, if it has been taught and elevated by experience, Death is the gate towards some loftier form and more expanded sphere: if, on the contrary, in the conflict of right and wrong, it has done the wrong, and stooped to be a slave of passion, what fate is possible but descent, and the shape of groveling creatures? Be it remembered, this *metempsychosis* is our earliest practical representation of the notion of Immortality; nor is there a truer account anywhere, at so primal an age, of Man's Moral relation with the Gods. The history of the Soul, indeed, is supposed confined to this Earth; and therefore, the modes of Terrestrial Life, are taken as fully presenting that History. No sublime Revelation announcing a purely *spiritual* Existence, had descended to illumine Pythagoras; and Worlds beyond this, were not then imagined;—he knew not that the lights of the midnight Vault are mighty Orbs, stretching upward and upward, away through serene Ether, and—through every variety of circumstances and condition—merging into the Infinite. Surely it is no slight honor, and was enough to uphold his confidence that knowledge came to him from a Higher Source, that the mind of that illustrious Greek, reached so deep an insight, and could sustain so large a belief. Realize now and combine the two foregoing conditions,—those warm and eager speculations concerning the Harmony of the Uni-

verse, and that profound conviction of Man's large destinies, and the paramount import of his Moral Nature;—could a great Soul possessed by both, remain in inaction, or be satisfied with mere speculative teaching? Pythagoras, appears to have added that highest attribute of Humanity—WISDOM, or the power practically to understand Mankind, and therefore to influence our Human Fates. Hence, his memorable effort in Magna Græcia to found a new Moral Commonwealth—the first and the best Utopia, of which we have any record; the excellence of its aim flowing from the character and principles of its Founder, and its sagacity demonstrated by its great success. Ignorance and external circumstances eventually prevailed to crush it; but many ages elapsed, ere the fame of the great confederacy of Crotona, faded in Greece. We know little that is certain, of the positive laws of that confederacy, but its foundation was this,—as Harmony is the rule of Universal Nature, and the cause of its Stability, so must it be the rule of all Human Societies, which fulfil their object and may reach permanence. It is not easy to refuse assent to such a conception; neither

can one overlook that while it involves the germ of all *Utopias*, framed from that time until now,—it expresses also, that which, as it becomes realized, constitutes the history of Civilization. It is probable that Pythagoras, like his successors, hoped too much from mere laws and external conditions of Order, and trusted too little to that inner and unseen order, which ordains that the ultimate sum of the World, shall be worked out by the efforts, and even through the imperfections of the Individual:—nevertheless, his august Name must stand far up in that bright roll of Worthies, who have practically held by Reason, and not despaired of humanity. Let the great Shade have all honor. [J.P.N.]

PYTHEAS, a celebrated mathematician, astronomer, and geographer, born in the Greek colony of Marseilles, then called Massilia, in the time of Alexander the Great. He is famous for his voyages of discovery, which are said to have extended as far as Iceland.

PYTHODORIS, a queen of Pontus, wife of Polemon I., and queen regent during the minority of her son, Polemon II., beginning of the Christian era.

## Q

QUADE, M. F., a Prus. philologist, 1682–1757.

QUADRATUS, a bishop of Athens, who lived in the early part of the 2d century. He was the successor of Publius, who was martyred in the persecution under Adrian; and when that emperor visited the Athenian capital in 126, Quadratus presented to him 'An Apology for the Christian Religion,' which, Eusebius says, had the desired effect of occasioning a temporary cessation of the persecution. Of this work there is only a fragment remaining; but it is curious for the testimony it gives to the reality of the miracles of Christ and his apostles, asserting, that in his time several of the persons were living in whose favor the miracles were wrought.

QUADRIO, FRANCIS XAVIER, a learned Italian Jesuit, author of a 'History of Poetry,' 1695–1756.

QUAGLIATI, PAOLO, the earliest dramatist who introduced music on the stage at Rome, 1606.

QUAGLIO, G., an Italian painter, celebrated about 1693.

QUAGLIO, LORENZO, a native of Italy, who accompanied his father to Vienna, and was educated and practised there as an architect, 1730–1804. His son, GIOVANNI MARIA, and his nephews, GULIO and GUISEPPE, were distinguished as scene painters, and flourished from 1750 to 1800. DOMINICO, the son of Guiseppe, called the Canaletto of Germany, 1786–1837.

QUAINI, FRANCISCO, an Italian painter, 1611–80. His son, LUIGI, a pupil of Guercino, 1643–1717.

QUANZ, J. J., a Germ. musician, 1697–1773.

QUARENGHI, G., an Ital. painter, 1744–1817.

QUARIN, J., an Austrian physician, 1733–1814.

QUARLES, FRANCIS, an English poet, was born in 1592, near Romford, Essex, and received his education at Cambridge. He obtained the place of cup-bearer to the queen of Bohemia, daughter of James I., and was afterwards secretary to Archbishop Usher in Ireland; from which country he was driven, with the loss of his property, by the rebellion of 1641, and was appointed chronologer to the city of London. At the commencement of the civil wars he wrote a work, entitled the 'Loyal Convert,' which gave offence to the parliament; and, when he afterwards joined the king at Oxford, his property was sequestered, and his books and MSS. plundered. He was

so much affected by his losses, that grief is supposed to have hastened his death, in 1614. Of the works of Quarles, in prose and verse, the most celebrated is his 'Emblems,' a set of designs in prints, illustrated by verses, which, with all their false taste and conceit, have merit, and still continue to be printed. His other works are, 'Argalus and Parthenia,' a romance; 'Enchiridion of Meditations,' 'Divine Fancies,' and 'The Shepherd's Oracles.'

QUARREY, J. H., an ascetic writer, 1580–1656.

QUATREMAIRE, J. R., a Benedictine of the congregation of St. Maur, kn. as a critic, 1611–71.

QUATROMANNI, SERTORIUS, a miscellaneous Italian writer and classical translator, 1551–1606.

QUELLINUS, ERASMUS, an eminent painter, was born at Antwerp, in 1607. He was a pupil of Rubens, and executed several pictures of great merit. He died in 1678, and left a son, JOHN ERASMUS QUELLINUS, whose historical pieces are held in estimation. He had also a nephew, ARTHUR QUELLINUS, who was an excellent sculptor.

QUENSEL, CONRAD, a Swedish mathematician, 1676–1732. A relation of his, of the same name, author of 'The Swedish Flora,' 1768–1806.

QUERENGHI, ANTONIO, an Italian poet, born at Padua, in 1546, distinguished himself at an early age for erudition, was secretary of the Sacred College under five popes, and died at Rome in 1633.

QUERINI, ANGELO MARIA, a famous Italian cardinal and man of letters, 1680–1759.

QUERLON, ANNE GABRIEL MEUSNIER DE, a celebrated French journalist, was born at Nantes, in 1702, and died in 1780. For upwards of twenty years he conducted a periodical paper in Brittany, called *Les Petites Affiches*; he was also a writer in the *Gazette de France*, the *Journal Etranger*, and the *Encyclopédie*. His works are 'Les Impostures Innocentes,' 'Le Testament de l'Abbé des Fontaines,' 'Le Code Lyrique,' 'A Continuation of Prevot's History of Voyages,' and a translation of 'Marsy's Latin Poem on Painting.'

QUERNO, CAMILLO, a Neapolitan poet of the 15th century, who acquired great fame by his facility in extempore versification, and obtained the name (at first given in a joke by some of his convivial friends while at Rome, in 1514) of arch-poet. Leo X. was

much pleased with his buffoonery, and often admitted him to his table. Died 1528.

QUERSTEDT, J. A., a Gr. divine, 1617-1688.

QUER Y MARTINEZ, JOSEPH, a Spanish botanist, born at Perpignan, in 1695. He was a surgeon-major in the army, and made good use of the opportunities which his visits to the coast of Africa afforded him, while attached to his corps, of collecting numerous plants and seeds. This led to the formation of a royal botanic garden at Madrid, over which Quer presided. He wrote and published the first 4 volumes of 'Flora Espanola, o Historia de las Plantas que se crian en Espagna,' which was completed by publication of 2 volumes more, by Orteza. D. 1764.

QUESADA, Don, a Spanish general, who, after having signalized himself as a leader in the army of the Faith, became attached to the queen's cause, and held a chief command. He was very unpopular with the republican party in Spain; and during an insurrectionary movement on the part of the populace and some of the soldiery, which he had been actively engaged in quelling, he found it necessary to make his escape from the capital. He was, however, discovered a few miles off, taken, and placed in confinement; but the infuriated mob being determined to wreak summary vengeance on him, they murdered him in his prison, and carried his mangled relics to Madrid, where, with savage exultation, they exhibited them in the public streets, August, 1836.

QUESNAY, FRANÇOIS, sometimes called the father of the school of French economists, was born in the village of Ecquevilli, in 1694. He was of peasant origin, and raised himself to notice by his acquirements as a physician. He was attracted from his obscure retreat to Paris, where he came under the notice of the potent Pompadour, whose patronage of the philosophical physician was one of the best acts of her life. He published some professional works, but his book on the most advantageous method of governing mankind, published in 1768, is the achievement with which his name has been chiefly connected. At the root of his opinions lay a view long influential from its plausibility, that as the means of human subsistence, clothing, and generally the necessities of life come from the earth, agriculture must be considered the only kind of industry, all others being secondary, as they merely modify what it brings into existence. He inferred from this that the peasantry class ought to be encouraged, to the neglect, or even the prejudice of others. His works have strikingly illustrated the view, that in such matters good is done by earnestly pushing opinions, however extravagant, since it was from Quesnay's teaching that the internal free trade in agricultural produce promoted by Turgot, and the abolition of the feudal exactions, were derived. He died in December, 1774. [J.H.B.]

QUESNEL, ABBE, a Fr. controversialist, last cen.

QUESNEL, Baron, born in 1775; a general officer, who served with distinction in most of Napoleon's campaigns. He was made, on the restoration in 1814, grand officer of the legion of honor; and, during the 'hundred days' in 1815, was found drowned in the Seine.

QUESNEL, PASQUIER, a priest who was born at Paris, in 1634, and became the head of the sect of Jansenists. He wrote a great many books, chiefly of the polemic kind; but gave offence to the court of Rome by his edition of the works of pope Leo the Great; and when his celebrated 'New Testament, with Moral Reflections,' in 8 vols. appeared, it was formally condemned, and the author was obliged to retire to Holland, where he died, in 1719.

QUESNOY, FRANCIS DU, a sculptor, was born at Brussels, in 1592. He acquired the principles and practice of the art from his father, but far excelled him. The Archduke Albert gave him a pension, and sent him to Italy, where he made himself known by some beautiful works, particularly a crucifixion wrought in ivory, which procured him the patronage of pope Urban VIII. He particularly excelled in making models and bas-reliefs of cupids and children, which he finished with peculiar grace and delicacy; but he was at the same time quite capable of executing works of the highest importance; of which a St. Susanna, in the chapel of Loretto, and a St. Andrew, in St. Peter's, afford sufficient proof. D. 1646.

QUETIF, J., a French bibliographer, 1618-98.

QUEVEDO VILLEGAS, FRANCISCO DE, a Spanish poet and satirist, was born at Madrid, in 1570. He was a knight of the order of St. Jago, and was thrown into prison for an alleged libel on the Count d'Olivarez, prime minister to Philip IV.; but when that statesman was disgraced, he recovered his liberty. He died in 1647. He wrote 'The Spanish Parnassus,' 'Visions of Hell,' 'Comic Tales,' and various works, satirical and religious, both in verse and prose; and holds a high rank among Spanish satirists.

QUEVEDO, P., the benevolent Spanish bishop of Orense, who at the revolution maintained 200 French refugee clergymen at his own cost, estimated annually at 80,000 francs. Died 1818.

QUICK, JOHN, an eminent comic actor, was the son of a brewer in London, where he was born in 1748. When only 14 years old he left his home, and joined a company of provincial actors; and as he gradually rose in his profession, he obtained an engagement at the Haymarket in 1769, and subsequently established his fame by his admirable performance of Mordecai in 'Love à la Mode.' He afterwards went to Covent Garden, where for many years he held a prominent station, filling the best parts in light comedy. In 1798 he retired from the stage, and died in 1831.

QUICK, JOHN, a nonconf. divine, 1636-1706.

QUIEN DE LA NEUFVILLE, JAMES LE, an historian, was born at Paris, in 1647. He served first in the army, and afterwards became an advocate, but without success; on which he had recourse to literature for support. He published the 'History of Portugal,' which obtained him a place in the Academy of Inscriptions. His 'Treatise on the Use of Posts among the Ancients and Moderns' procured him the direction of the posts of French Flanders, and a pension. Died 1728.

QUIGNONEZ, FRANCISCO DE, an eminent Spanish cardinal and liturgical writer, died 1540.

QUILLET, CLAUDIUS, a French physician and ingenious Latin poet; born 1602; died 1661. His chief work is a poem in 4 books, entitled 'Callipædia.'

QUILLMAN, EDWARD, an English writer on Portuguese literature, the son-in-law of the poet Wordsworth. His wife was the author of a 'Journal of a Residence in Portugal and the South of Spain.' Died 1851.

QUILLOT, C., a French quietist, 17th century.

QUIN, JAMES, a celebrated actor, was the son of an Irish barrister. He was born in London, 1693, but educated in Dublin. His mother, unfortunately, turning out to be a bigamist, poor Quin was treated as illegitimate, and inherited nothing of his father's fortune. In 1715, with his prospects thus blighted, and his education unfinished, he sought and obtained an engagement at Drury Lane, which he quitted in 1717 for the theatre in Lincoln's-Inn-Fields, acquiring there great reputation in the stately characters of tra-

gedy; such as *Cato*, *Coriolanus*, and *Zanga*, and the stronger parts in comedy, among which were *Sir John Brute*, *Volpone*, *Falstaff*. Subsequently acting at Covent Garden, and in 1735 at Drury Lane, under Fleetwood, he received higher terms than any actor had previously commanded. This pre-eminence he retained until the appearance of Garrick, of whom he could not conceal his envy; and though he consented to act with the new performer in 1747 at Covent Garden, yet the result was so little favorable to his own position, that it is evident he gradually prepared for his final retirement. Quin was one of the admirers and patrons of Thomson, the poet of 'The Seasons,' and, while unknown to him, spontaneously presented him with one hundred pounds to deliver him from an arrest; and after the poet's death appeared in his tragedy of 'Coriolanus,' and spoke a prologue written by Lord Lyttelton, on which occasion the actor is said to have displayed uncommon sensibility. He closed his career in 1753, in the character of *Falstaff*, which he performed for the benefit of his friend Ryan. His celebrity in this part was very great, and there can be no doubt from the accounts we have of it, that it was a masterly and intellectual performance. He died at Bath, where he had resided for many years, in 1766. His monument in Bath cathedral bears an epitaph written by Garrick, in a spirit of appreciation highly honorable to both actors. [J.A.H.]

QUINAULT, PHILIP, a French dramatic poet, was born at Paris in 1636, and died in 1688. His operas were highly and deservedly popular, but they excited the envy of Boileau, who attacked them with characteristic asperity. They were printed at Paris, with his life, in 1778, 5 vols. 12mo.

QUINAULT-DUFRESNE, ABRAHAM ALEXIS, a celebrated French actor, 1695-1767. His sister, JEANNE FRANCOISE, an actress and literary friend of Voltaire, died 1783. JEAN BAPTIST, brother of both the preceding, and an actor, died 1744. Some others of the family were also distinguished on the stage.

QUINCY, C. SEVIN, Marquis De, a French officer and historian, flourished about 1660-1729.

QUINCY, EDMUND, a judge of the Superior Court of Mass., and sent as agent to London for that colony to settle the boundary between N. Hampshire and Massachusetts, was born 1681, at Braintree, Massachusetts. He died in London 1738.

QUINCY, JAMES, member and speaker of the Colonial Council of Mass., 1689-1767.

QUINCY, JOSIAH, an American patriot and a distinguished lawyer of Mass., was born in 1784. He early embraced the popular cause and supported it by his pen with effective readiness and ability; he visited London in 1774, and was in frequent converse with the leading statesmen of Great Britain, and took every occasion to advocate the cause of the American colonies. He died in 1775, on his return from Europe, on board ship, within sight of land.

QUINCY, JOHN, an English physician and medical writer of the last century, who practised his profession, and delivered lectures in London, where he died in 1723. Among the different works he produced was his 'Lexicon Physico-Medicum,' which has served as the basis of Dr. Hooper's Medical Dictionary, and other subsequent compilations of a similar nature.

QUINETTE, NICHOLAS MARIE, was born at Soissons, where, previous to the Revolution, he practised as an attorney. He voted for the death of Louis XVI., was a commissioner in the army of Dumouriez, and was one of the four deputies delivered up to the Austrians, who were afterwards

exchanged for the infant princess. In 1799 he was appointed minister of the interior, was a member of the chamber of peers during the 100 days, and, after the second abdication of Napoleon, he was called by Fouché to form part of the provisional government. In 1815 he was banished as a regicide, retired to Brussels, and died in 1821.

QUINQUARBOREUS. See CINQ-ARBRES.

QUINTILLIANUS, MARCUS FABIVS, a famous teacher of eloquence in the reign of Galba and his successors, was born about 42, probably of a Spanish family settled in Rome. The younger Pliny was one of his pupils, and in the reign of Domitian he was intrusted with the education of two of the emperor's grand-nephews. His work 'De Institutione Oratoria,' is one of the most valuable relics of antiquity. It has been translated into English by Guthrie and Patsall. Date of his death unknown.

QUINTILLUS, MARCUS AURELIUS CLAUDIVS, a Roman emp., who reigned seventeen days, 270.

QUINTINE, JOHN DE LA, a celebrated French horticulturist, was born at Poitiers, in 1626. He was originally an advocate, but took more pleasure in the study of horticulture; to perfect himself in which he visited Italy, and, on his return to France, became director-general of the royal gardens. He died at an advanced age.

QUINTUS CURTIUS RUFUS, a Latin historian, supposed to have flourished in the 2d cent.

QUINTUS CALABER, or QUINTUS SMYRNEUS, a Greek poet, who wrote a supplement to Homer's Iliad. He is supposed to have lived in the 5th century, and to have been a native of Smyrna. His poem was first brought to light by Cardinal Bessarion, who found it in the church of St. Nicolas, near Otranto, in Calabria, whence he had the name of Calaber.

QUINZANO, or QUINTIANUS, the commonly received name of J. F. CONTI, surnamed *Stoa*, an Italian poet and philologist, 1484-1557.

QUIRINI, ANGELO MARIA, a cardinal, was born at Venice, in 1684. Benedict XIII. made him archbishop and cardinal, which dignities he filled with great reputation. He died in 1755. Cardinal Quirini collected a magnificent library, which he gave to the Vatican: and though he was a zealous champion of the papacy, his writings are marked by candor and moderation.

QUIRINO, P., a Venetian traveller, 15th cent.

QUIROGA, JOSEPH, a Spanish Jesuit, was born at Lugo, in Galicia, and distinguished himself as a missionary in America. During his residence there he collected much information respecting the countries he visited, and on his return published his travels. Died 1784.

QUIROS, A., a Spanish missionary, died 1622.

QUIROS, H. B., a Spanish canonist, last cent.

QUIROS, PEDRO F. DE, a celebrated Spanish nav. of the 16th cent., who explored many of the islands afterwards visited by Captain Cook. Died 1614.

QUIROS, T., a Spanish missionary, 1599-1662.

QUISTORP, JOHN, a German minister and Lutheran prof. of divinity, 1584-1648. His son, of the same names, also a divine and professor, 1624-1669.

QUITA, DOMINGOS DOS REIS, a Portuguese poet, was born in 1728. He was apprenticed to a barber, but his attachment to learning enabled him to overcome the difficulties he had to experience; and making himself master of Italian, Spanish, and French, he wrote verses, and at length obtained the patronage of Count San Lorenzo. He was the author of 'Inez de Castro,' and four other tragedies; besides many sonnets, elegies, pastorals, &c. D. 1770.

## R

**RABANUS MAURUS**, was born of French parents at Mayence in A.D. 776. On the completing of his early studies at Fulda in Hesse, he was there made a deacon in 801, and he betook himself to Tour the following year to enjoy the tuition of the famous Alcuin. It is also apparent from his writings that he had in his youth made a pilgrimage to Palestine. In his twenty-fifth year he became head of the convent school at Fulda, where his successful teaching drew around him many pupils, and not a few of the nobility intrusted him with the education of their sons. In 822 he was consecrated abbot, but he still directed the seminary, which supplied many able teachers for the Frankish and German churches. On a complaint of the monks that his absorption in literary pursuits hindered the discharge of his more active conventual duties, he retired in 842 after a presidency of twenty years. He was, however, drawn out of this voluntary seclusion in 847, on being made archbishop of Mayence. In this situation he was the opposer and persecutor of Gottschalk, in consequence of his doctrine of predestination. Rabanus died in A.D. 856. His influence was great among the churches in the diffusion of practical piety, and he had several illustrious disciples. His erudition and general attainments were respectable for the age in which he lived, and as a lecturer, he instructed his scholars in general literature and science as well as theology. He wrote commentaries on all the canonical books and many of the apocryphal ones, and left behind him numerous treatises, sermons, and letters. A collected edition of the most of his works was published at Cologne, 1627, in 6 folios. [J.E.]

**RABAUULT DE ST. ETIENNE, JOHN PAUL**, one of the most steady, moderate, and honorable of the French revolutionists, was born at Nismes, in 1741; for which city he was chosen a deputy for the constituent assembly in 1789. He attached himself to the party of the Girondists. His father was proscribed when he was born; and he relates, in a short memoir of his life, attached to a romance of his publication, called '*Le Vieux Cevenal*,' that his infancy was passed in continual danger and alarm, and that he never knew when he awoke, where his mother and her friends would conduct him to sleep at night. He was proscribed, like the rest of the moderatists, for opposing the excesses of the Mountain party in 1793. He was sheltered by several female friends of his wife for some days; but being at length discovered, he was immediately guillotined, after a short form of identification before the revolutionary tribunal. His wife killed herself, and all those who assisted in concealing him were guillotined. One of his numerous political works is, '*Sur la Nécessité d'Etablir une Constitution*.'

**RABBE, ALPHONSO**, a French journalist, historian, and biographical writer, 1786–1830.

**RABELAIS, FRANÇOIS**, is, of all humorists, the most variously original, and the most remarkable for combining wit and humor; but he is also the most unscrupulously audacious, and for many reasons by far the most difficult to be understood. There are traditionally attributed to him many adventures, most of which are nothing more than coarse practical jokes, or sayings profane or licentious, borrowed from his writings. The facts which we know in regard to his life, few as they are, suffice to make us wonder how it was, that he not only escaped the

stake and the scaffold, but was a parish priest to the hour of his death. He was born of poor parents, about 1483, at Chinon in Touraine; and the time he spent in a conventual school at Angers, is said to have been put to profit in no way, unless by making him intimate with his school-fellow Du Bellay, who was afterwards a cardinal, and his zealous patron and protector. He next became a friar in a convent of the Cordeliers; and there he was a hard student, but is said to have been both dissolute and satirical. At all events, he eloped, studied medicine at Montpellier, took a doctor's degree, practised as a physician, lectured with success, and published, besides other works, translations from Hippocrates and Galen. While he was going through this stage in his history, the patrons he had gained obtained permission for him to transfer himself to the order of the Benedictines. He attended Cardinal Du Bellay when he was sent as ambassador to Rome in 1536; and on his return to France his patron procured for him a prebend, and the curacy of the village of Mudon, near Paris. He is believed to have died in 1553, and to have then been about seventy years old. His famous romance appeared in successive fragments; it is a characteristic specimen of his oddities, that the second book, being published in 1533, preceded the first by two years; and the third book was printed in 1546. When it had proceeded thus far, remonstrances from the clergy induced Francis I. to have it read to him: he pronounced it harmless; and the author continued to be protected by Henry II. The fourth book, in which the attacks on the church, and sneers at religion itself, became yet bolder, appeared only in 1552; and it was not till 1564 that the publication was completed by the whole of the fifth book. The romance commonly goes by the name of its earliest parts:—'*The Inestimable Life of the Great Gargantua, Father of Pantagruel, a Book Full of Pantagruelism*.' Gargantua is a royal giant: the heroes of most of the adventures are Pantagruel, his son and successor, a good easy king; and his favorite Panurge, the quintessence of buffoonery, sarcasm, and knavery. It is not easy to discover any thing which Rabelais either believed or respected; and his satire, with all its enigmatical coverings, tells terribly both on civil and on ecclesiastical governments. But there is in it a large fund of good sense; and the humor and fun, with all their depravity, are often irresistibly comic. [W.S.]

**RABENER, GOTTLIEB WILLIAM**, a German satirist, born near Leipsic, in 1714, was educated for the legal profession, and obtained the office of comptroller of the taxes in the district of Leipsic. He died in 1771.

**RABUS, PETER**, a Dutch critic, 1660–1702.

**RABUTIN, ROGER**, Count de Bussy, a French wit and satirist, was born in 1618, at Epiry, in Nivernois. He entered the army at the age of 12, under his father, and would probably have attained a high rank but for the offence he gave to persons in power by his scandalous lampoons. In 1665 he was sent to the Bastille for writing a libel, entitled '*The Amorous History of the Gauls*;' and on his release he was banished to his estate, where he remained till 1681, when he returned to court. His other works are, '*Mémoires*,' 2 vols.; and '*Lettres*,' 7 vols. Died 1693.

**RACAN, HONORAT DE BUEIL**, Marquis of, an eminent French poet, was born in 1589, at La Roche

Racan, devoted himself to literature, and was one of the first members of the French Academy. Died 1670. Besides his poems, he wrote 'The Life of Malherbe,' his friend and poetical instructor.

RACHEL, the younger daughter of Laban, and wife of Jacob. She was the mother of Joseph and Benjamin, and died at the birth of the latter.

RACINE, BONAVENTURE, a French ecclesiastical historian, was born in 1708, at Chauny. He became head of the college at Rabastens; but being banished by the intrigues of the Jesuits, he retired to the college of Harcourt, and afterwards obtained a canonry in the cathedral of Auxerre, where he died in 1755. He wrote an 'Ecclesiastical History,' 13 vols.

RACINE, JEAN, contests with his immediate predecessor, Corneille, the glory of being the greatest among the French Tragic Dramatists. Submitting implicitly to the code of laws laid down by the critics of his time, he did much towards making the Regular or Classical School of the Drama acceptable and permanent, by imparting to his tragedies all the perfection which it is possible to conceive genius as giving to works constructed on so narrow a model. His grace and melody of diction are exquisite; and his refined tenderness of feeling, often melting into profound pathos, breaks out through all the barriers imposed by the unities, and the simple plots, and the monotony of the rhymed Alexandrine verses. Racine was born in 1639, at La Ferté-Milon, in Picardy, where his father was a tax-collector. The most important part of his education was received in the school of the Port-Royalists, whose earnest piety and severe morality received no discredit either from the writings or from the conduct of their pupil. In his twenty-first year he celebrated the marriage of Louis XIV., in a poem which gained him the favor of the king, exhibited not long afterwards by a pension, and followed by many other benefactions. He began his dramatic career in 1663; but his first two tragedies, though not unsuccessful, really deserved the poor opinion expressed of them by Corneille, of whom they were little more than imitations. Racine's fine genius shone out with all its brightness in 1667, when 'Andromaque' was played; and for ten years more he continued to produce, almost annually, plays, constituting a series of masterpieces, and exhibiting so little inequality that critical opinions are still divided as to their comparative merit. The first of these was the highly-finished comedy, 'Les Plaideurs'; but the success of this piece did not tempt the poet to diverge again from the tragic drama. 'Britannicus,' appeared in 1669, and was followed by 'Bérénice' (in which Racine measured lances with Corneille), 'Bajazet,' 'Mithridates,' the very skilfully constructed 'Iphigénie,' and 'Phèdre,' the work in which the dramatist's power in painting the tenderness and fire of love is most strikingly displayed. In 1677, when the 'Phèdre' came on the stage, Racine and Boileau received honorary appointments as historiographers royal. The dramatist seems to have meditated making the office real; and he is said to have been deterred from publishing histories by a rebuke, which some of his memoranda drew on him when they were communicated by his patroness, Madame de Maintenon, to the king. At all events he ceased, for twelve years, to write dramas, and never again wrote for the public stage. Some would have it that he was disgusted by the critical warfare which had been kindled by his latest plays; others assert him to have been influenced by the religious impressions which, beyond doubt, now acted on him more and

more strongly. He made a happy marriage, superintended carefully the instruction of his children, and was much engaged in serious studies. He wrote a short 'History of Port-Royal.' In 1689 'Esther,' the first, and much the weaker, of his two sacred dramas, was played by the young ladies of St. Cyr. In 1699, the clerical directors of that school having prohibited stage-playing to the pupils, he sent 'Athalie' to the press, and had the mortification to find that it was too devout and earnest for the taste of the public. If no works had ever been written except plays, and if there were no playwrights but those of France, the assertion would be true which Voltaire makes as to this noble drama,—that it comes nearer to perfection than any other literary work which ever issued from the hands of man. It was the last effort of its admirable author. He died from abscess of the liver, in great pain, but with placid resignation, in 1699. [W.S.]

RACINE, LOUIS, a son of the preceding, was born at Paris, in 1692, and educated under Rollin. He was eminent for talent, piety, and modesty, was made an inspector-general in the finance department, and died in 1763. Among his works are two poems, entitled 'Grace' and 'Religion,' 'Epistles,' 'Memoirs' of his father, and a translation of Milton's *Paradise Lost*.

RACLE, L., a French engineer, 1736–1791.

RADAGAIUSUS, leader of one of the German hosts by which Italy was invaded at the beginning of the 5th century. Beheaded by Stilico 404 or 406.

RADCLIFFE, ANN, a celebrated novelist whose maiden name was Ward, was born in London, in 1764; and in her 23d year was married to Mr. W. Radcliffe, proprietor and editor of the *English Chronicle*. Soon after her marriage, Mrs. Radcliffe began to display the powers of her genius in works of imagination. Her first performance was a romantic tale, entitled 'The Castles of Athlin and Dumblaine,' in 1 vol.; which was succeeded by 'The Sicilian Romance' and 'The Romance of the Forest,' each in 2 vols.; but that which stamped the author's reputation, as the first novelist of the age, was the 'Mysteries of Udolpho,' in 4 vols., for which she received the sum of £500. Her next performance was 'The Italians.' She also published a volume of 'Travels through Holland and along the Rhine,' in 1793. Mrs. Radcliffe possessed the art of exciting a high degree of interest in her narrative; her descriptive powers were of a superior order, especially in the delineation of scenes of terror, and in those aspects of nature which excite sentiment, and suggest melancholy associations. To quote the words of Mrs. Barbauld, 'she seems to scorn to move those passions which form the interest of common novels: she alarms the soul with terror; agitates it with suspense, prolonged and wrought up to the most intense feeling by mysterious hints and obscure intimations of unseen danger.' Died 1823.

RADCLIFFE, JOHN, an eminent physician, was born 1651, at Wakefield, in Yorkshire, and was educated at the grammar school there, and at University College, Oxford. Having obtained his medical degree, he settled in London in 1684, where he soon acquired great reputation, to which his ready wit and conversational powers contributed. In 1686 he was appointed physician to the princess Anne of Denmark, and, after the revolution, he was often consulted by king William III., whose favor he lost in consequence of the freedom with which he delivered his opinions when in attendance on his royal master. When Anne succeeded to the crown, Godolphin could not obtain for him the post of chief

[Radcliffe library, Oxford.]

physician, as he had given her offence by telling her that her ailments were nothing but the vapors. But, though deprived of office, he was consulted in all cases of emergency, and received a large sum of secret service money for his prescriptions. Dr. Radcliffe left \$40,000 to the university of Oxford for the foundation of a public library of medical and philosophical science. Died 1714.

RADEGONDA, a princess of the Franks, who became the wife of Clothaire, and died in the monastery of St. Croix, founded by her, 587.

RADEMAKER, two Dutch painters—GERARD flourished 1672–1711. ABRAHAM, 1675–1735.

RADER, M., a Jesuit of Tyrol, 1561–1634.

RADET, STEPHEN, one of Napoleon's generals, by whom Pius VII. was escorted from Rome as a prisoner in 1809, 1762–1825.

RADOWITZ, JOSEPH VON, a German field officer, statesman and author, died 1853, aged 57.

RAE, SIR WILLIAM, an eminent judge of Scotland, died 1842.

RAEBURN, SIR HENRY, a Scottish artist, esteemed second only to Sir Thomas Lawrence, as a portrait painter, was born at Stockbridge, near Edinburgh, 1756. He became president of the Edinburgh Academy of Painting, and when George IV. visited his northern capital in 1822, received the honor of knighthood, and soon after the appointment of first portrait painter to the king in Scotland. Died 1823.

RÆMOND, F. DE, a Fr. historian, 1540–1602.

RAFFAELLE. See RAPHAEL.

RAFFENEL, CLAUDE DENIS, a French author, born in 1797, in the department of Jura. He was attached to the French consulate at Smyrna; went, in 1826, to Greece, and was killed at the siege of Athens in the following year. He wrote '*Histoire Complète des Evénement de la Grèce*,' and other works.

RAFFLES, SIR THOMAS STAMFORD, an eminent public functionary, was the son of a naval captain, and born at sea, off Jamaica, in 1781. He entered the India Company's service early in life, as a clerk in the home secretary's office; was appointed, in 1805, assistant secretary at Prince of Wales's Island; and, in 1811, became lieutenant governor of Java. There he remained till 1816; and during his administration of the government many judicial reforms were effected. In 1818 he was placed at the head of the factory at Bencoolen, in Sumatra, where he

introduced many wise reforms, and eventually succeeded in establishing the settlement and free port of Singapore, in 1819. On his last visit to the island, in 1823, he laid the foundation of a college for the encouragement of Anglo-Chinese literature, with a library, museum, branch schools, &c.; but the impaired state of his health rendered it necessary that he should return to Europe; and he accordingly, in February, 1824, embarked, with his family, on board the *Fame*. On the evening of the same day, when about fifteen miles from Bencoolen, the vessel took fire, and all his valuable collections and manuscripts became a prey to the flames. The crew and passengers, in utter destitution, with difficulty saved their lives in the boats; and Sir Thomas, with his family, again embarked in April, and arrived in England in the following August. He survived this event only about two years, dying of apoplexy, at Highwood Hill, Middlesex, in July, 1826. His chief work is, '*The History of Java*,' 2 vols. 4to.

RAFINESQUE, C. S., professor of botany and natural history, in the Transylvania University, and author of several works upon those subjects. Died 1840.

RAGGI, A., an Italian sculptor, 1624–1686.

RAGHIB PACHA, MOHAMMED, grand vizir of the Ottoman empire, was born in 1702, and manifested, at an early period, such a decided taste for learning, that he acquired the name of Raghîb, or the Student. In 1736 he was appointed secretary-general to the grand vizir; became reis effendi, a pacha of three tails, and successively governor of Aidin, Aleppo, and Egypt. In 1757 he was elevated to the dignity of supreme vizir, and retained that dangerous post till his death, in 1768. He was one of the most enlightened ministers of the Turkish empire, and surpassed by none of his countrymen in literary talent.

RAGLAN, LORD FITZROY JAMES HENRY SOMERSET, created Baron Raglan in September, 1852. He was the eighth son of the fifth Duke of Beaufort, and was consequently grand-uncle of the present duke. He was sixth in descent from the Marquis of Worcester, one of the earliest writers on the application of steam as a motive power. Born on September 30, 1788, he entered the British army in June, 1804, in the sixteenth year of his age, as cornet in a dragoon regiment. Family connection speedily pushed him on. In nine months he was lieutenant, and accompanied the Duke of Wellington (then Sir Arthur Wellesley), on the expedition to Copenhagen in 1807. Later in the year he was attached to the Embassy to Turkey. In the following year, when Wellesley took the command in the Peninsula, young Somerset, by that time a captain, formed one of his staff, and, in 1809, added to his duties as aide-de-camp those of military-secretary to the commander-in-chief,—a connection between the parties which continued down to the death of 'the Duke,' in 1852, whenever Wellington exercised military command. Lord F. Somerset served all through the Peninsular War, the confidential friend of Lord Wellington, and his promotion rapidly went on under such auspices. At the age of 23 he was brevet-major—he was lieutenant-colonel before he was 24—was made lieutenant-colonel of the Guards in his 26th year (after the downfall of Napoleon)—was full colonel in the army in August, 1815, at the special instance of the Prince Regent, who appointed him aide-de-camp and made him knight-commander of the Bath. Rapid as his promotion was, to a certain extent it was the result of active services, with pen and sword. He earned a cross and five clasps

by his services at Fuentes D'Onor, Badajoz, Salamanca, Vittoria, Pyrenees, Nivelle, Nive, Orthes and Toulouse. He obtained the silver medal for Roleia, Talavera, Busaco (where he was wounded), and Ciudad Rodrigo. After the storming of Badajoz, to Lord Fitzroy Somerset, as he penetrated among the foremost into the place, the intrepid governor of the fortress surrendered his sword. The official record of his services thus summarily states them: 'Served as military-secretary to the Duke of Wellington throughout the Peninsular war, and also in Belgium; present at the capture of Oporto, pursuit of Marshal Soult, retreat in the lines of Lisbon; operations in the pursuit of Marshal Massena, affair of El Bodon, capture of Madrid and the Retiro; driving the enemy from Valladolid to Burgos, siege of that castle, and various affairs on the retreat thence to the frontiers of Portugal; action of Irun, passage of the Bidassoa; wounded at Pusaco, and at Waterloo severely—right arm amputated.' Immediately after the peace of 1814, he was secretary to the Embassy at Paris for a short time, and then returned to England, where he married Lady Emily Pole, niece to Wellington; a connection, no doubt, which still closer drew the bonds of friendship between Wellington and himself. The battle of Waterloo took place when he had been only a few months married, and on that field, where an Empire fell, he lost his right arm. From 1816 to 1819 he was secretary of Embassy at Paris. During the same time Wellington was also there in command of the British portion of the army of occupation. In 1819, when Wellington was made master-general of the Ordinance, Lord F. Somerset became his secretary, and continued with him until 1827, when the death of the Duke of York (brother of George IV.) opened the way for 'the Iron Duke' being made commander-in-chief. Lord Fitzroy Somerset accompanied him as military-secretary, and when the duke resigned office in 1827, his successor, continued Lord F. Somerset in office (August 1827), which he continued to hold until Hill's death in 1842. 'The Duke' then resumed the command of the army, which he retained—with Somerset again as his *alter ego*—until his death. Thus, during an uninterrupted period of five-and-twenty years (from 1827 to 1852), Lord Fitzroy Somerset was virtually at the head of the military administration of Great Britain. In the interim, he had attempted a parliamentary career. He was elected member of parliament for the borough of Truro in 1818; but his acceptance of office under 'the Duke,' at the Ordinance speedily occupied him so much that he had little leisure for politics. Indeed, his abstinence from every thing verging on partisanship was one reason why, as military-secretary to the commander-in-chief, he was always very popular. He was just and impartial in his administration, and is stated to have performed numerous acts of kindness and consideration towards deserving veterans and their families. He is understood to have suggested, a long time before they were adopted, several of the ameliorations in military discipline, which have improved the condition, by extending the comforts of the army. During the long period in which he held office, Lord F. Somerset occasionally undertook other duties. When Wellington went to the Congress of Verona in 1821, and that of Vienna in 1822, he was accompanied by Lord Fitzroy Somerset, and again in 1826, when his Grace went to St. Petersburg as Ambassador Extraordinary, to congratulate the late Emperor Nicholas on his ascension to the throne of Muscovy. And in 1823, at the instance of Mr. Can-

ning, who was then foreign secretary, Lord F. Somerset went to Madrid on a special mission without any diplomatic character, but, it was believed, to assure King Ferdinand that France would not be allowed to invade the Spanish territory, as she had threatened. His promotion in the army went on. He was made major-general in 1825; colonel of the 53d regiment in 1830; and lieutenant-general in 1838, and G. C. B. in 1847. His subsequent appointments may be stated in anticipation: major-general of the ordnance, September, 1852, which also made him colonel of the artillery and engineers regiments; general, with local rank and commander-in-chief of the British forces in the East, February, 1854; colonel of the horse guards, May, 1854; general in the army, June, 1854; and field marshal, November, 1854. The only other persons holding this last named rank in the British army at present are the king of the Belgians and Prince Albert, of Saxe Coburg; and in their case the *baton* was conferred on the occasion of their respective marriages with English princesses. To Lord Raglan, to whom it was given after the battle of Inkerman, there was pecuniary advantage as well as particular honor, inasmuch as a field-marshal, when on active duty in the field, receives double the pay given to a commander-in-chief in active service. On the death of the duke of Wellington, Lord Hardinge was appointed to succeed him as commander-in-chief, and Lord Raglan was appointed to fill Hardinge's office of master-general of the ordnance, and was called to the House of Lords as Baron Raglan; Raglan castle having been one of the strongholds of the Somerset family, gallantly defended by the marquis of Worcester during the wars of the Commonwealth. In February, 1854, Lord Raglan, then in his 66th year, was persuaded to accept the command of the British forces in Turkey. After months of inactivity at Varna, it was determined to invade the Crimea, and, notwithstanding the brilliant successes at the Alma and Inkerman, the besieged fortress, which fell ultimately, held out, while neglect, starvation, cold and disease mowed off the British in thousands. These unhappy results, added to annoyance caused by the manner in which, by the press and in parliament, his non-success was condemned, probably tended to act upon his mind to the injury of his bodily health. On June 19, 1855, he wrote his last dispatch, relative to the unsuccessful attack on the Malakoff tower and the Redan battery. The next day he was taken ill, rallied during the week, became worse on the afternoon of the 28th, and died at 25 minutes before 9 that evening. Opinions may vary as to Lord Raglan's generalship, but it will be admitted that he was a gallant soldier. His appearance was plain, but his manners were particularly courteous.

RAGOTSKI, FRANCIS, prince of Transylvania, was born in 1676. Zealous for the independence of his country, he secretly entered into a negotiation with Louis XIV., which being betrayed, he was arrested, and found guilty of high treason. He had, however, the good fortune to escape; receiving assurances of succor from France, he entered Hungary, and, by a manifesto, urged the people to free themselves from the tyranny of the Austrians. For a time he was eminently successful, and in 1704 he was proclaimed prince of Transylvania, and protector of Hungary. The crown of Poland, at that time vacant, was offered to him by the czar Peter, but he refused it; and his patriotic exertions being ultimately defeated by the Hungarian states entering into a treaty with the emperor, he renounced his estates, and withdrew into Turkey, where he d. 1735.

RAGOTZKI, the name of several princes of Transylvania:—1. GEORGE, whose name is sometimes spelt *Racoczi*, an ally of the Swedes during the thirty years' war, 1630–1648. 2. GEORGE the Younger, joined the Swedes against Poland 1659, died fighting against the Turks 1669. 3. FRANCIS, au. of a liturgy used throughout Hungary, d. 1676.

RAGUENET, FRANCIS, a native of Rouen, who, in 1689, gained a prize from the French Academy for a discourse, 'Sur le Mérite et l'Utilité de Martyre.' In 1704 he published 'A Parallel of the Italians and French, in regard to Music and the Opera;' in which he gave the preference to the Italian music, and thereby highly offended his countrymen. He also wrote 'Les Monuments de Rome,' 'Histoire d'Olivier Cromwell,' 'Histoire de l'Ancien Testament,' and 'Histoire du Vicomte de Turenne.' Died 1722.

RAGUET, G. B., a French writer, 1668–1748.

RAGUSA, J., a Sicilian Jesuit, born 1665.

RAHN, JOHN HENRY, a name common to three natives of Zurich:—1. A voluminous writer of Swiss history, 1646–1708. 2. A physician, 1709–1786. 3. A physician, 1749–1782.

RAHN, J. H. G., a Prussian jurist, 1766–1807.

RAIEVSKI, A., a Russian historian, 1813.

RAIKES, ROBERT, the founder of Sunday schools in England, was a native of Gloucester, where he was born in 1735. He succeeded his father as proprietor of the *Gloucester Journal*, a paper in extensive circulation. He was a man of great piety, and, besides attendance on the ordinary duties of public worship, was long in the habit of frequenting early morning prayers every week-day at the Cathedral. As might be expected from a person of such devout and eminently Christian character, he was distinguished for his benevolent support of every scheme and institution which was directed to ameliorate the condition or advance the interests of humanity. To him belongs pre-eminently the high distinction of originating Sunday schools; and the idea of those institutions was first suggested to his mind by witnessing the painful spectacle of youthful profligacy and dissipation, which the streets of Gloucester as well as other large towns in England, exhibited on the Lord's day. At that time, it had long been a subject of complaint among farmers and others that they suffered more from the depredations of juvenile delinquents on that day, than on all the other days of the week together. The lower classes universally allowed their children to roam at large on the highways and the fields, where they came in such numbers that the country people were obliged to remain at home to watch their property. Mr. Raikes himself was unexpectedly led to witness a similar scene, for having occasion, early one morning, to go to a plebeian part of the town of Gloucester, where was a large pin manufactory, he was greatly shocked by multitudes of poor children running wild and riotous in the streets, and swearing such horrid oaths, as afforded sad evidence of the ignorance and depravity that prevailed amongst the class to which they belonged. He resolved on making some attempt to reclaim them from this state of moral degradation, which seemed so extensively prevalent, and to give those wretched little creatures the benefits of, not only a secular, but a moral and religious education. After revolving the subject long and anxiously in his mind, he at length prepared to reduce his scheme to practice. Having engaged the services of four women, accustomed to teach poor children, at the rate of one shilling a-day, and who were to receive and instruct as many as he

should bring every Sunday, he began the operations of his school. But there were more difficulties lying in the way than he imagined, chiefly from the backwardness of the poor and their indifference to send their children. A beginning, however, was made with a few, others soon followed, and the schools began to prosper. Reading, being marched to church under the care of their teachers, and after church, the repetition of the catechism for an hour, constituted the regular routine he established. 'With regard to the rules to be observed, all the children were required to come to school as clean as possible. Many were at first deterred, because they wanted decent clothing, but this was not to be supplied. Although without shoes or in a ragged coat, all were welcome, the only condition being clean hands, a clean face, and the hair combed.' Numbers pressed to the schools, the children varying from six years old to twelve or fourteen. Little rewards were distributed amongst the younger, and good places were procured for the elder children, and both of these produced the effect of exciting emulation. Such was the scheme which this Christian philanthropist devised for the moral and religious improvement of the poor; and it soon drew general attention in England, from the beneficial results it produced. Similar institutions were ere long commenced in most of the large towns of England. A Sunday School Association was formed for the benefit of the poor children in the metropolis, and Mr. Raikes in consequence of his zeal and merits, was enrolled an honorary member. A far higher honor awaited this benevolent gentleman, in its being publicly certified after a long series of years, that not one of the scholars at his institution in Gloucester, had ever been either in the city or the country prisons. Mr. Raikes died in 1811.

[R.J.]

RAIMBACH, ABRAHAM, a native of London, celebrated for his line engravings of Sir David Wilkie's pictures, 1776–1843.

RAIMOND, J. H., a Fr. architect, 1742–1811.

RAIMOND, Sr., the third general of the Dominicans, known as an ascetic writer, 1175–1275.

RAIMONDI, GIAMBATTISTA, a great Oriental scholar, born at Cremona, in Italy, 1540. He founded an Oriental press, under the patronage of the cardinal Medici, at Florence, and put all the Oriental books in order at Rome. From these circumstances, the college of the Propaganda took its rise. His Arabian Grammar was published in 1610.

RAIMONDI, MARC ANTONIO, a celebrated engraver, born at Bologna, in 1748. After studying at Venice, he settled at Rome; was employed by Raphael to engrave several of his designs; and he soon formed a school there, which eclipsed those of Germany, and the Italian style of engraving became the standard of excellence. He was imprisoned by Clement VII. for having engraved a series of abominable designs in illustration of the Aretine verses, but procured his liberation, and was restored to favor by his exquisite martyrdom of St. Lawrence. D. 1540.

RAINBOW, E., an English prelate, 1608–1684.

RAINE, M., a distinguished scholar, 1760–1810.

RAINOLDS, JOHN, a learned divine, was born at Pinho, in Devonshire, in 1549; and became president of Corpus Christi College, Oxford. He was considered the leader of the Puritan party, and distinguished himself greatly at the Hampton Court conference, in 1603, where he suggested the necessity of the present translation of the Bible, in which work he was afterwards engaged. Died 1607.

RAITCH, J., a Servian historian, 1726–1801.

RAJALIN, T., a Finnish admiral, 1673–1741.

RAKUBAH, or RAGUBAH, peishwah, or prince-regent of the Mahrattas, acted an important part in the events which occurred in the East Indies, from 1772 to 1782. Having usurped the sovereign power to the prejudice of his nephew, he was deposed, and abandoned by all the Mahratta chiefs, when he fled to Bombay, and procured the protection of the English government. At length, peace taking place between the East India Company and the Mahrattas, the cause of the peishwah was abandoned by the former; and from that time he sunk into obscurity.

RALEGH, CAREW, son of the great historical character noticed below, was born in the Tower of London 1604, and made several fruitless efforts to regain the forfeited estates of his father. He received a pension of £400 a-year, however, and in 1659 became governor of Jersey, by favor of General Monk. He wrote a vindication of his father. Died 1666. His cousin, WALTER RALEGH, became chaplain to Charles I., and was stabbed by his gaoler 1646.

RALEGH, SIR WALTER, born A.D. 1552, was the most remarkable man of that remarkable period, which is commonly called the Elizabethan age. He was of an ancient Devonshire family, and was educated at Oxford and the Temple. He then served for some years as a volunteer under Coligni and Condé, in France, and afterwards under the prince of Orange in the Netherlands. In 1579 he first displayed that zeal for maritime discovery and colonization, which is the most brilliant feature in his character. He joined an expedition to America, which was designed to form a colony in Newfoundland, but was beaten back by a superior Spanish force. He then served in Ireland, and highly distinguished himself against the Irish rebels and their Spanish auxiliaries. In 1582 he appeared at Elizabeth's court, and was very graciously received. His reputation for soldiership, his learning, which was varied and profound, his eloquence and ready wit, and the personal advantages and accomplishments, in which he was pre-eminent, all combined in raising him high

In 1589 he served in the expedition against Portugal under Drake and Norris. The young earl of Essex was also with the troops employed on this occasion, and it was in a quarrel between him and Raleigh as to the operations of the forces, that the unhappy jealousy between those two originated. A short time afterwards Raleigh fell under Queen Elizabeth's displeasure on account of certain love-passages between him and Miss Throgmorton, whom he subsequently married. He was imprisoned for a time, but was

[Birth-place of Sir Walter Raleigh.]

soon released, and gradually recovered the queen's favor. In 1595 he organized and led an expedition to Central and South America, in the hope of discovering Eldorado, the golden land, in the existence of which all of that age firmly believed; nor can we who have witnessed the discoveries of gold in California, deride that belief as visionary and wholly unfounded. Raleigh sailed to Guiana and the neighboring districts; he explored the river Orinoco for 400 miles from its mouth; and he wrote an account of his voyage and the new countries explored by him, which is remarkable for the eloquence and graphic beauty of style which it displays. During the latter years of Elizabeth's life Raleigh joined Cecil in intriguing against Essex; and he had the evil gratification of witnessing his rival's ruin and death, little thinking that he was himself to experience the retribution of a similar fate. James I. on his accession, at first treated Raleigh with favor; but Cecil, who had in the late queen's reign overthrown Essex by Raleigh's aid, was now determined to put down Raleigh; and the king's mind was soon poisoned against Sir Walter. Deprived of his dignities and lucrative appointments, Raleigh seems to have listened to the schemes of other disaffected men for altering the line of succession to the crown; but the charge on which he was tried and convicted in 1603 of being a traitor in the pay of Spain, was unproved and unfounded. He was sentenced to death, and his property was confiscated; but James kept him close prisoner in the Tower for twelve years, during which time he wrote his great work, the 'History of the World.' In 1615 James released him, and permitted him to sail on an expedition to Guiana. This enterprise proved disastrous, and on Raleigh's return home he was arrested, and James resolved to put him to death under the old sentence of treason that had been passed on him in 1603. There can be no doubt that James was mainly led to commit this disgraceful act by his desire to win the favor of the Spanish court, which never had forgotten the services that Raleigh had done for England against Spain, and now clamored loudly for the blood of the English hero. Sir Walter was beheaded on the 28th October, 1618, in the sixty-sixth year of his age. The versatility of

[Sir Walter Raleigh.]

in his sovereign's favor. Raleigh was very active in schemes for extending England's dominions beyond the Atlantic, and in 1585 he sent out an expedition, which discovered Virginia. He was one of the most trustworthy of the naval heroes of England, who defended her in 1588 against the Spanish Armada.

the genius of this great man is almost unparalleled. He was an excellent classical scholar, and well read in metaphysics and divinity, besides being generally conversant with the literature of his own and other modern countries. His prose writings are eloquent and vigorous; and he was the author of several poems, small in length, but great in beauty. He was eminent in the mechanical arts; and was the originator of many important improvements in ship-building. He was a daring navigator and explorer of new countries; and he was unwearied in his zeal for extending the commerce, and for creating the colonial power of England. He was a sage, as well as a bold captain by sea and by land; he was a skilful (though not always a successful) politician; and he was pre-eminent in all personal accomplishments and courtly graces. He was also a liberal promoter of intellectual energy and eminence in others; and he was the patron and personal friend of many of the most distinguished writers who adorned that bright epoch of English literature.

RALLE, SEBASTIAN, a French missionary among the American Indians, and the author of a dictionary of the Abnakis language. Died 1724.

RALPH, JAMES, a native of Philadelphia, known as a political and historical writer and poet, came to this country in 1725, died at Chiswick 1762.

RAM, KOMAL SEU, a learned Hindoo, honorably known for his promotion of education at Calcutta. Died 1814.

RAMAGE, ADAM, an ingenious mechanic, notable for an improvement in the printing press, was a native of Scotland, but a resident of the U. S., 1770-1850.

RAMAZZINI, BERNARDO, an Italian physician, dist. as a poet and professional writer, 1633-1714.

RAMBERG, J. HENRY, an eminent draughtsman and engraver, was born in 1767, in Hanover; studied under Sir Joshua Reynolds; and, after visiting Italy, was appointed, in 1790, painter to the court of Hanover. He produced an immense number of paintings and etchings, and particularly excelled in caricature.

RAMBOUILLET, a branch of the Angennes family, distinguished by the names of—JAMES, a favorite statesman of Francis I., died 1562. CHARLES, son of James, better known as the cardinal de Rambouillet, author of *Memoirs*, 1530-1587. CHARLES, grandson of James, and Marquis de Rambouillet, camp-martial and ambassador, 1577-1652.

RAMBURES, DAVID DE, commander-in-chief of the French archery, distinguished by his military services, and killed at the battle of Agincourt, 1415.

RAMEAU, JEAN PHILIPPE, was born at Dijon in 1683. After having become acquainted with the rudiments of music, he composed a musical entertainment, which was received with great applause when it was performed at Avignon. He then received the situation of organist of the cathedral church of Clermont in Auvergne, where he commenced his investigations into the principles of music. His fame as a theorist chiefly depends upon his work 'Demonstrations of the Principles of Harmony,' which was published at Paris in 1750. From the principles enunciated in this work his countrymen style Rameau 'The Newton of Harmony.' About this period he was called to Paris, where he was appointed director of the opera. The king of France conferred upon this eminent theorist the ribbon of the order of St. Michel, and raised him to the rank of nobility. Rameau died in the year 1764. Besides his very numerous theoretical works he composed many operas, ballets, serenatas, concertos, songs, &c., &c.

RAMEL, PETER, a member of the French assembly, and general of brigade, killed at the age of thirty

in the campaign of the Rhine, 1761. His brother, JOHN PETER, born at Cahors, in 1770, was chief of a battalion in the army of the Pyrenees in 1794, when he incurred the hatred of the Jacobins, and narrowly escaped falling a sacrifice to their vengeance. Being one of the victims to the revolution of the 18th Fructidor, he was banished with 15 more persons to Cayenne, whence Ramel, Pichegru, Barthelemy, Willot, and others, made their escape in June, 1798, to the Dutch colony of Surinam. After the elevation of Buonaparte to power, Ramel returned to France, and entering into active service, made many campaigns. In 1814 he was made a major-general, and in 1815 appointed commandant at Toulouse. He retained that post after the second restoration of Louis XVIII., and he exerted himself to establish tranquillity among the inhabitants; but having endeavored to disarm the companies of Verdets, whose existence was not authorized by the government, he became all at once the object of public displeasure, and was assassinated by a band of ruffians who rushed into his hotel, August, 1815.

RAMELLI, AUGUSTIN, an ingenious mechanic and engineer, was born at Milan, about 1531, and distinguished himself by his attention to mathematical studies. Having adopted the military profession, he signalized himself on several occasions in the armies of the emperor Charles V., and afterwards going to France, he was well received by the Duke of Anjou, who made him his engineer, and subsequently bestowed on him a considerable pension. He was the author of a rare and curious work, entitled 'Le Diverse ed Artificiose Machine.' Died 1590.

[Ramses the Great.]

RAMESSES, or RAMSES, a name common to seven Egyptian kings, who reigned from the 17th to the 13th century B.C. Ramses V. is supposed to be the same as Sesostris.

RAMEY, C., a French sculptor, 1754-1838.

RAMLER, CHARLES WILLIAM, a German poet and miscellaneous writer, was born in 1725, at Kolberg. He became teacher of the belles lettres at Berlin; where his 'Lyrical Anthology' procured him the name of the German Horace; but though he did much to polish German versification, he was far below his model. He also composed oratorios, and translated some works into his native language. Died 1798.

RAMMOHUN ROY, RAJAH, a philosopher and reformer of British India, was born at Bordouan in the province of Bengal, 1774, or between that and 1780. He belonged to the Brahmin caste, of the class esteemed for their learning and purity of blood,

[Rammohun Roy.]

and seems to have devoted himself when quite young to the study of the sacred literature of the Hindoos. His endeavor was to discover the pure theism of the primitive revelation, and to separate it from the corruptions of the priesthood, and though great hopes were entertained of him by Christian missionaries, there can be no doubt that he regarded some parts of their system as equally idolatrous with the changes that had taken place in the religion of the Hindoos. He adopted the philosophy and the pure morality of the precepts of the Saviour, but accepting no system of faith that was proffered to him, he applied himself to the study of the Hebrew Scriptures in the same independent spirit that he had examined the Vedas of his own country. Rammohun Roy, however, was not a speculative believer, but a practical reformer, and in political sentiments a republican. He had risen from the position of clerk in the office of the collector of Ruggore to that of dewan, or chief native superintendent of the revenue, the highest office that a Hindoo could hold under the British government. In his official situation he acquired such a fortune as enabled him to rank with the zemindars, or proprietors, and applying himself to administrative as well as religious reform, he eventually effected a change in the English jurisprudence of Bengal. Circumstances led to his residence at Calcutta, where he became a political writer and journalist in his native language, and boldly adopted revolutionary principles, at the same time not forgetting the reserve of a statesman. In 1830 he was created rajah by the great Mogul, and sent on a mission to England for the settlement of his claims against the East India Company. He effected this object with great diplomatic skill, and while here he took an enthusiastic interest in the progress of the reform agitation, and the hopes it held out for the better government of India. He was claimed at this time as a convert to Christianity, and though generally considered a Unitarian, he usually attended the services of the Established Church. His Christianity, it should be remembered, was based on a profound acquaintance with the metaphysics of the Hindoos, and on his researches into the primitive theism; and though an ingenious countryman of our own, Thomas Maurice, had long since endeavored to show the similarity between the Christian Trinity and the triad of Brahma, Vishnou, and Shiva, there are few orthodox Calvinists who would be disposed to agree with him. Rammohun Roy did not survive his acquaintance with European manners long enough to master the whole of this problem, but being attacked by sudden illness at Bristol, expired there on the 27th of

September, 1833. As his biographer in the *Gentleman's Magazine* observes:—‘When it is considered that Rammohun Roy was in a great degree self-taught, the extent of his acquirements must be admitted to have been remarkable. He was a thorough master of the Sanscrit language and of the Arabic; he was an exceedingly good Persian scholar, and quoted the Persian poets liberally, appropriately, and gracefully; and of course, he well understood the Hindoo and Bengali tongues. He had read a great deal of English literature, chiefly historical; and he wrote in our language with grammatical accuracy and ability. . . . He was a quick and keen observer of character, and in the ordinary course of life discreet and prudent.’ It may be added that his superiority to the native Hindoos generally, his vast knowledge, his independence of habit, and his well-known patriotism, gained for him the highest consideration in his own country. [E.R.]

RAMOND DE CARBONNIERES, LOUIS FRANCIS ELIZABETH, Baron, who acquired considerable reputation as a philosopher and geologist, was born at Strasburg, in 1775. At the beginning of the Revolution he belonged to the household troops; and when, in 1791, he was chosen a deputy from Paris to the legislative assembly, he appeared there as a zealous defender of the monarchical government. During Robespierre's domination he was an exile; but he subsequently obtained the prefecture of Puy-de-dome, and he became, in 1818, councillor of state extraordinary. He published ‘Observations faites dans les Pyrénées,’ 2 vols., and other works. D. 1827.

RAMOS, H., a Sp. mathematician, 1738–1801.

RAMSAY, ALEXANDER, a physician and anatomical teacher, was born in England, but resided in America. Author of *Anatomy of Heart, Cranium, and Brain*. Died 1824.

[Residence of Allan Ramsay.]

RAMSAY, ALLAN, with the exception of Burns, the most thoroughly national of the Scottish poets, was born in 1685, at Leadhills in Lanarkshire. His father was in the employment of Lord Hopetoun at the lead mines, and is said to have been descended from a branch of the family of the earls of Dalhousie, a circumstance of which the poet was naturally vain, and which shines out in his works in the form of respect and attachment to the claims of ‘gude bluid,’ and gentle ancestry. His father died early, and his mother marrying again, he was sent to Edinburgh, and bound apprentice to a wigmaker, then a profession of a higher grade than in our times. Ramsay continued to pursue this humble avocation for several years after his apprenticeship was finished. In 1712, his first poetical productions appeared, being an address ‘To the most happy Members of the

Easy Club,' Auld Reekie being then and long after, noted for its commercial clubs and associations. In 1716, he published an edition of James the First's poem of 'Christ's Kirk on the Green,' having added a second canto himself, and in two years after, a third. He now abandoned his original profession, and commenced business as a bookseller in Edinburgh, a more congenial and fitting occupation for the poet and literary man. In 1720, he published himself, a collection of his poems, by subscription, and by which he is said to have realized four hundred guineas, a very large sum considering the times, and which establishes the early and wide popularity which he had acquired. The most of the pieces in this collection had been issued by Ramsay as they were written, in sheets at a penny a-piece, and the good folks of Edinburgh had come to look upon them as a luxury, quite as necessary as 'caller had-dies' or strong ale. Allan issued the first volume of his well-known 'Tea Table Miscellany' in 1724, and three more volumes at short intervals afterwards; about the same time he published 'The Evergreen, a collection of Scots poems, wrote by the Ingenious before 1600.' The *Magnum opus* of this ancient writer made its appearance in 1725, 'The Gentle Shepherd,' the finest dramatic pastoral ever published. In a soft and gentle sweetness of expression, and in a rich exhibition of old Scottish manners and habits, interspersed with dramatic touches of nature and character, no Scottish poem has maintained a more permanent or a higher place in the national mind and affections. Some of the higher class poems of Burns can alone compete with it in this respect. In 1730 he published his 'Thirty Fables,' in which the story of 'The Monk and the Miller's Wife,' though somewhat broad in style, and previously told by Dunbar, greatly increased his reputation as a poet and painter of national manners. He now appears to have withdrawn from the labors of composition, and to have given himself up to the enjoyment of the select literary society of the most eminent men of his time and country, by whom his conversation and talents were highly appreciated. He erected a house for himself on the north side of the Castle Hill, which is still we believe in existence, and where he died in 1758, at the advanced age of seventy-two, full of years and honor. [T.D.]

RAMSAY, ALLAN, son of the preceding, distinguished as a painter and writer on art, 1709-84.

RAMSAY, ANDREW MICHAEL, better known as the Chevalier Ramsay, was born at Ayr 1686, and educated at Edinburgh. He was converted to the Roman Catholic faith by Fenelon in 1710, and rose to distinction under his patronage as governor to the duke of Chateau Thierry, and the prince of Turenne. After this he went to Rome as preceptor to the children of the Pretender, called there James III., and, returning to Scotland, was admitted into the family of the duke of Argyll. He died at St. Germain-En-Loire, the retreat of the exiled Stuarts, 1743. His principal works are a 'Life of Fenelon,' 'The Voyages of Cyrus,' 'Discourse upon Epic Poetry,' a 'History of Marshal Turenne,' and a 'Discourse on Freemasonry,' of which order, in France, he was grand chancellor. He wrote in the French language with remarkable purity.

RAMSAY, DAVID, an eminent American physician and historian, was born in 1749; studied medicine in Philadelphia; and practised at Charleston, South Carolina, where he soon acquired celebrity. From 1776 to 1785 he distinguished himself in a political capacity, first as a member of the legislature of South Carolina, and afterwards as a member of

Congress. He labored zealously with his pen to promote the independence of his country; and among his publications are, 'The History of the American Revolution,' 'The Life of Washington,' and 'The History of South Carolina.' But his most important work appeared after his death, and consisted of a series of historical volumes, entitled 'Universal History Americanized, or an Historical View of the World, from the earliest Records to the Nineteenth Century,' &c., 12 vols. 8vo. He died May 8, 1815, in consequence of wounds received two days previous from the pistol of a maniac, who fired at him when close to his own dwelling.

RAMSAY, J., a Scotch divine, 1733-1789.

RAMSDEN, JESSE, an eminent optician and mathematical instrument maker, was born at Halifax, in Yorkshire, in 1735. He was brought up as a hot-presser, and afterwards studied engraving. He next became a mathematical instrument-maker in Piccadilly, and marrying the daughter of Mr. Dolland, the optician, he adopted the same business as his father-in-law. Among other discoveries made by him, was one for an accurate division of instruments, which procured him a premium from the board of longitude. His mural quadrants also are in high estimation. Died 1800.

RAMUS, or LA RAMEE, PETER, a French philosopher, was born in a village of the Vermandois, in 1515. When a boy he obtained the place of servant in the college of Navarre, where he devoted his leisure hours to study, and became a most consummate scholar. Having ventured to attack the doctrine of Aristotle, he was interdicted from teaching philosophy; but this judgment was reversed by Henry II., and in 1551 he was made royal professor of rhetoric and philosophy. His spirit of free inquiry ultimately led him to become a Protestant; as this could not be long concealed, he was obliged to leave Paris, to which city he returned in 1571, and lost his life in the massacre on St. Bartholomew's Day, in the following year. His works on mathematics, philosophy, logic, &c., are numerous.

RAMUSIO, or RAMNUSIO, G. B., a Venetian traveller, geographer, and historian, 1485-1557.

RANCE, ARMAND JOHN LE BOUTHILLIER DE, the reformer of La Trappe, was born in 1626, at Paris, and adopted the ecclesiastical profession. He obtained several benefices before he was in orders, acquired great celebrity as a preacher, and might have risen to the most elevated stations in the church, had he not taken the resolution of retiring from the world. Various reasons are assigned for this; the most probable of which appears to be, that although he was a man of large fortune, and indulged in all the pleasures of the world, the death of the Duchess of Montauban, to whom he was attached, produced such a revulsion in his feelings, that he abandoned society, and retired to his abbey of La Trappe, where he introduced a reform of the most rigid kind in the monastic discipline. He was the author of several theological works, and died in 1700.

RANCHIN, F., a French physician, 1560-1641.

RANCHIN, HENRY, author of a metrical version of the Psalms in French, published 1697.

RANCK, —, a Spanish painter, last century.

RANCONET, AIMER DE, a famous antiquarian, and master of Roman jurisprudence, d. 1559.

RANCONNIER, J., a French missionary to Paraguay, author of Letters, published 1636.

RAND, ISAAC, an American physician, medical author, 1743-1822.

RANDALL, J., an English divine, died 1622.

RANDOLPH, EDMUND, Governor of Virginia,

and an American revolutionist. He was a member of the convention which framed the federal constitution; in 1789 was attorney-general of the United States, and in 1794 Secretary of State, but was compelled to resign in 1795, in consequence of a suspected intrigue with the minister from France. Died 1813.

RANDOLPH, JOHN, known as Randolph of Roanoke, an American statesman, was born in Virginia 1773. He was a member of Congress for thirty years, where he made himself remarkable for his eloquence, power of sarcasm and eccentric conduct. He was subsequently elected a senator of the United States, and in 1830 was sent by President Jackson, as minister to Russia. He always boasted himself a descendant of the Englishman Rolfe, who married Pocahontas. Died 1833.

RANDOLPH, PEYTON, first President of the American Congress, a distinguished lawyer and statesman, was born in Virginia, 1723, died 1775.

RANDOLPH, THOMAS, an English dramatic poet, au. of the 'Muses' Looking-Glass,' 1605-34.

RANDOLPH, THOMAS, a minister of the Church of England, born at Canterbury, where his father was recorder, 1701, vice-chancellor 1756-1759, archdeacon of Oxford 1707, Margaret professor of divinity 1768, died 1783. He wrote several theological works. His son, JOHN, born 1749, was successively bishop of Oxford, Bangor, and London, and a dist. Greek scholar; died 1813.

RANDOLPH, SIR THOMAS, born in Kent 1523, distinguished as ambassador to France, Russia, and Scotland, in the reign of Elizabeth. He is author of Letters, which have appeared in various collections, and of an account of his embassy to Russia, inserted in Hakluyt's Voyages. Died 1590.

RANFAING, MARIE ELIZABETH DE, a religious founder, better known as the venerable Mother Elizabeth, 1592-1649.

RANNEQUIN, RENNEQUIN, or SWALM RENKIN, inventor of a famous hydraulic engine, known as the machine of Marly, 1644-1708.

RANTOUL, ROBERT, an American statesman and lawyer, was born in Massachusetts. Died 1852, at the age of 47.

RANTZAU, JOSIAH, Count de, a French marshal in the 16th century, was descended from an illustrious family in Holstein, and entered when young into the Swedish army. In 1635 he went to France with the Chancellor Oxenstiern; and Louis XIII. being pleased with his agreeable manners, he made him a major-general, and gave him the command of two regiments. He served under the Duke of Orleans and the great Condé, with high reputation, rose to the rank of a marshal, completed the conquest of Flanders, and was made governor of Dunkirk in 1646; but becoming an object of suspicion to Cardinal Mazarin, he was confined 11 months in the Bastille, and died soon after his liberation, in 1650. During his different campaigns he was so often severely wounded, that at last he had but one eye, one ear, one arm, and one leg.

RAOUL or RODOLPH, son of Richard, duke of Burgundy, succeeded Robert, duke of France, with the title of king, 923; died 936.

RAOUL, a Duke of Lorraine, 1328-1346.

RAOUL, archdeacon of Poitiers, 12th century.

RAOUL OF CAEN, a French historian, 11th ct.

RAOUL-GLABER, a Fr. chronicler, 11th cent.

RAOUL. See ROLLO VERMANDOIS.

RAOUL, J., a French painter, 1667-1734.

RAPHAEL, SANTI or SANZIO, was born at Urbino, in the Contrada del Monte, April 6, 1483. His

father, Giovanni Santi, gave him his first instructions in his art, and after the death of his parents, he was placed by his uncles, in 1494, with Pietro Perugino, the most celebrated painter of the Umbrian school, and then engaged on some frescoes on the Sala del Cambio at Perugia. In October, 1504, Raphael removed to Florence, and appears to have made this city his head quarters until he was called to Rome in 1508; with the exception of a few months passed at Perugia, in 1505, and a short interval at Bologna the following year, he resided constantly at Florence. The works executed by him during this period are said to be in his Florentine manner, those executed previously, in his first or Perugino manner, of which the 'Coronation of the Virgin,' now in the Vatican, and the 'Spozalizio,' or 'Marriage of the Virgin,' in

[Residence of Raphael.]

the Brera at Milan, are fine examples; of his second or Florentine manner, 'The Entombment,' in the Borghese Gallery at Rome, is the best example. The 'St. Catherine' in the National Gallery is in the same manner. During his stay in Florence, Raphael made the acquaintance of Fra Bartolomeo, and that of Francia at Bologna, from both of whom he had every opportunity of improving himself, independent of the enlarged views he must have gained by moving from a provincial town to so important a city as Florence, then superior even to Rome as a school of painting. The Brancacci chapel alone was a school of art, and in 1506 Raphael had with other masters the opportunity of studying the world-renowned cartoons of Michelangelo and Leonardo da Vinci, in preparation for the Council Hall. With such opportunities he could not but enlarge his manner, and we accordingly soon find in Rome a very much grander treatment of form, than even in the best of his Florentine works, though the first of his great frescoes in the Vatican is in his Florentine style. Raphael was invited to Rome by Julius II. through his countryman Bramante, and he was already settled there in the beginning of September, 1508; Michelangelo paid his third visit to Rome in the same year, a coincidence which was doubtless of considerable advantage to Raphael, the younger man, the rivalry of Michelangelo being an invaluable stimulus to him. The first fresco of the Vatican *stanze* or dwelling rooms, was the Theology or 'Dispute on the Sacrament' as it is called: this was completed in 1509. In the same room, called the *Stanza della Segnatura*, are the frescoes of 'Poetry,' 'Philosophy,' the celebrated 'School of Athens,' and 'Jurisprudence,' all completed in 1511; his third or Roman style commences with the 'School of Athens.' In the second chamber, known as the *Stanza dell'Eliodoro*, are, the 'Expulsion of Heliodorus from the temple of Jerusalem,' his grandest work, the 'Mass of Bolsena,' the 'Attila,' and 'St. Peter delivered

from Prison,' all finished in 1514, the two former in 1512 during the pontificate of Julius. The third chamber, finished in 1517, called the *Stanza dell' Incendio*, was painted almost wholly by Raphael's scholars; and the great works of the Vatican stanze, for which those chambers are so renowned, are comprised in those of the first two chambers mentioned. The fourth, really the first on entering, called the *Stanza di Costantino*, was nearly entirely executed under the direction of Giulio Romano after Raphael's death. It is worthy of remark, that the ceiling of the Sistine chapel by Michelangelo and the most celebrated frescoes of the Stanze, those painted by Raphael himself, were executed simultaneously between 1508 and 1512, and during the pontificate of Julius, no real lover of art himself, and who little suspected the almost inexhaustible source of wealth which his simple undertakings were destined to prove to his country in after generations. The slow progress of the Vatican frescoes after the painting of the second chamber, was owing to the numerous commissions Raphael received from Leo X., who succeeded Julius, besides many from other art patrons in Rome and elsewhere. Raphael executed, between 1512 and 1520, besides numerous Madonnas, holy families, portraits, &c., the following great works and masterpieces:—the St. Cecilia, at Bologna; the Madonna di San Sisto, at Dresden; the Spasimo, at Madrid; the Cartoons, at Hampton Court (1515–16); the frescoes of the Farnesina (1518), and his last and most celebrated oil picture 'The Transfiguration.' In addition to these labors, from 1515 he had the chief charge of the building of the new Basilica of St. Peter; he was appointed capochietto on the 1st of August of that year, by Leo X. This unrivalled painter died at Rome on his birth-day, April 6, 1520, aged exactly thirty-seven years; and after lying in state, with his own picture of the Transfiguration at his head, he was buried with great pomp in the church of Santa Maria at Martyres, the ancient Pantheon, commonly called in Rome the Rotonda. The inscription on his tomb, written by his friend the Cardinal Bembo, and, therefore, deserving of all reliance, concludes with the following lines:—

Vixit An. xxxvii., Integer Integros.  
Quo die natus est, eo esse Desiit  
Viii. Id. Aprilis, MDXX.

He lived exactly thirty-seven years, he died on the same day of the year that he was born, April 6, which in 1520 happening to fall on Good Friday, led to the popular error that Raphael was born also on Good Friday, 1483, which fell in that year on the 28th of March; should such have actually been the case, and the inscription of the cardinal be wrong, the 28th of March must be substituted for April 6, mentioned above as his birth-day. Raphael is said to have left property to the amount of about 16,000 ducats, a very large sum in those days when money had nearly ten times its present value. He bequeathed his painting materials, works of art, &c., to his two favorite pupils, Gianfrancesco Penni, and Giulio Romano, on condition that they should complete his unfinished works. Raphael was never married, but is said to have been engaged to Maria Bibiena, the niece of the Cardinal Bibiena, who, however, died before him. He was of a slight build, sallow in complexion, with brown eyes, and 'about five feet eight inches high. His tomb was opened in 1833 and the skeleton found entire with all the teeth perfect; a mould was taken from his skull. His numerous school was completely dispersed after the sack of Rome in 1527, but Giulio Romano re-

vived it in some measure at Mantua. Besides the above-mentioned painters, Pierino del Vaga, Polidoro da Caravaggio, and Benvenuto Tisio, commonly called Garofalo, were among his most distinguished scholars; the last has been not inappropriately styled the miniature Raphael. It is matter of common regret that Raphael was removed so prematurely, as is assumed, from the world, many concluding that it is beyond our power to realize the perfection to which he might have carried his art had he been longer spared to prosecute it; this is, however, less than doubtful. Raphael if not too successful to improve, was far too much occupied ever to have had the remotest chance of surpassing his previous great works; the later frescoes of the Vatican were neglected, and besides the important charge of St. Peter's from 1515, he was appointed at the close of the following year superintendent of antiquities, and of the excavations of Rome. He trusted almost entirely to assistants in his latter paintings: the cartoons at Hampton Court are perfect exponents of his later executions, and it would have been impossible for him to have returned to a more elaborate style: neither was it desirable. The rivalry of Sebastiano del Piombo, ardently encouraged by Michelangelo, appears to have given a transitory impulse to renewed efforts at executory skill, but with no real advantage to his own characteristic style. Though more elaborate in composition and more highly finished, the 'Transfiguration' is not equal for simple sublimity and grandeur to the 'Madonna di San Sisto,' executed some years before. Raphael did not escape the pernicious any more than the good influence of Michelangelo, whose style was admirably adapted to his own character and subjects, but very inappropriate to Raphael's; the consequences were injurious. In the *Stanza dell' Incendio* we already find a loose, slovenly style of design, heavy and vulgar, exhibiting mere physical ethics, sentiment being sacrificed to limb. Great art, to approach Raphael's, must consist of something more than vigorous limbs. Raphael's greatest works are unrivalled, but it is not probable, considering all the circumstances, that he would ever have equalled them again in his days of grandeur, much less have surpassed them. As it is, his glory soars above that of all his competitors, not excepting Michelangelo himself; and notwithstanding that in individual qualities he was surpassed by several, he is universally acclaimed the prince of painters, and chiefly for those lofty sentimental qualities of his works which all can feel but few describe. In all his works the treatment is subordinate to the conception. He has scarcely been approached in propriety of invention, composition, or expression; and is almost without an equal in the natural simplicity and grandeur of his forms: for moral force in allegory and history unrivalled, for fidelity in portrait unsurpassed, and for sublimity and grandeur of conception inferior to Michelangelo alone. The prints after Raphael's works, including drawings, amounting altogether to nearly 900, are extremely numerous and well known: from Marc Antonio downwards, no painter has perhaps been better rendered. His biographies are likewise many and voluminous, in Italian, French, German, and in English; one of the latest, the great work of Passavant, *Rafael von Urbino und sein Vater Giovanni Santi*, Leipzig, 1839, is the largest and most complete in every respect. There are besides:—Vasari, *Vite de' Pittori*, &c., in which the notice of the Florentine edition of the *Raccolta Artistica*, 1852, is very complete; further, *Vita inedita di Raffaello da Urbino illustrata con note da Angelo Com-*

*oli*, Rome, 1790; *Notizie intorno Raffaello Sanzio aus Urbino*, by Don Carlo Fea: Rome, 1822; Rehberg, *Rafael Sanzio aus Urbino*, München, 1824; Quatremerre de Quincy, *Historie de la vie et des Ouvrages de Raphael*, Paris, 1814; Longhena, *Istoria della vita e delle opere di Raffaello Sanzio, &c., del Sig. Quatremerre de Quincy, &c.*, Milan, 1829; Pungileoni, *Elogio Storico di Raffaello Santi da Urbino*, Urbino, 1829-31; Desnoyers *Appendice a l'ouvrage intitulé Historie de la vie et Des ouvrages de Raphael, &c.*, Paris, 1853; and in English Duppa, *Life of Raffaello Sanzio*, London, 1816. Raphael is scarcely represented in the National Gallery, notwithstanding, we have a specimen of each of his three manners in—The Vision of a Knight, St. Catharine, and the portrait of Julius II. The fragment of cartoon, belonging to a second and inferior series ordered by Francis I., is not by the hand of Raphael. Even the magnificent cartoons at Hampton Court, and these cannot be too highly valued, do not give an adequate idea of the exquisite sentiment which pervades the majority of his greater Madonna pieces. The cartoons, however, at Hampton Court are of such commanding grandeur of style that they have been almost intuitively admitted now for three centuries as the inalienable type for apostolic representation. [R.N.W.]

RAPHELENG, or REPHELENGIUS, the commonly received name of FRANCIS RANTENGIEN, a learned Orientalist of French Flanders, 1539-1597. His son, FRANCIS, author of Latin poems and notes upon Seneca, published 1587.

RAPIN, NICHOLAS, a French poet, was born at Fontenai-le-compte, in Poitou, in 1535, and died in 1609. The principal of his French poems, entitled 'Les Plaisirs du Gentilhomme Champêtre,' and his Latin epigrams, are much admired.

RAPIN, R., a learned Jesuit, 1621-1687.

RAPIN-THOYRAS, PAUL DE, best known as the author of an English history, was a nephew of the celebrated Pelisson, and son of James Rapin Sieur de Thoyras, descended from a noble family of Savoy. He was born in 1661, and came to England on the revocation of the edict of Nantes in 1685. He subsequently entered into the service of the prince of Orange, and was with him in the Irish wars. On the death of that prince he retired to Wesel, in the duchy of Cleves, where he composed his history. He is considered an impartial and well-informed historian. Died 1725.

RAPP, GEORGE, the founder of the settlement of Economy in Pennsylvania. He was a native of Germany, and emigrated with a band of followers of his peculiar religious and social opinions early in this century. Died 1847, aged 92.

RAPP, JOHN, Count de, a French general, was born at Colmar, in Alsace, in 1772. He attracted notice by his skill and bravery in the early progress of the revolutionary wars; was aide-de-camp to General Desaix during his campaigns in Germany and Egypt, and filled the same situation under Buonaparte when first consul. In 1802 he was employed in the subjugation of Switzerland, defeated the Russian imperial guard, and took Prince Repnin prisoner at the battle of Austerlitz, was appointed governor of Dantzic in 1807, and after the retreat of the French army, he defended the city with consummate ability and valor, till he was compelled by famine to capitulate. Returning to France in 1814, he was received with distinction by Louis XVIII., but joined Napoleon on his return from Elba. He was, however, again taken into favor by the king, and died, lieutenant-general of the cavalry, in 1821.

RASCAS, P. A., a Fr. antiquarian, 1567-1620.

RASCHE, J. C., a Ger. numismatist, 1733-1805.

RASCHI. By this name is known SOLOMON BEN JARCHI, one of the most learned rabbins of the Israelitish wanderers, who is said to have been born at Troyes in Champagne, 1040, and to have died there 1105. Other places have claimed the honor of his birth, and his surname is variously spelt, as *Isaaki, Isarchi, Jarhi, Racca, Raschi, and Raski*. He was remarkable for the precocity of his talents, and the largeness of his mind: this, as well as his adventurous disposition, may be surmised from the fact that he commenced, when about thirty years of age, the extensive programme of his travels, intended to embrace every known country of the world, in order to collect materials for the history of his scattered people. In pursuit of this object he visited his brethren in Italy, Egypt, Greece, Asia Minor, Palestine, Armenia, Persia, Tartary, Muscovy, and Germany; he was dissuaded from using his materials, however, by Maimonides, who considered the design impolitic at that time. He settled at Troyes, therefore, and devoted his acquirements to biblical commentaries and rabbinical learning. Dr. Clarke says, Raschi 'wrote a commentary on the whole Bible so completely obscure in many places, as to require a very large comment to make it intelligible.' On the other hand, it must be admitted that the metaphysics and philosophy of the rabbis is little understood, and though much obscurity may be expected in a mass of writing on traditional and speculative knowledge, it is undeniable that the Jewish learning abounds in marks of genius and in profoundly philosophical reflections. Raschi was buried at Troyes, but when the Jews were driven out of France they carried his remains with them and re-interred them at Prague. [E.R.]

RASCHID. See HAROUN-AL-RASCHID.

RASCHID-EDDIN, a Persian historian, physician, and vizier to the sultan Ghazan-Khan, 13th c. RASES, an Arabian historian of Spain, 9th cent.

RASORI, J., an Italian physician, 1766-1837.

RASPE, R. E., a Ger. antiquarian, 1737-1794.

RASTALL, JOHN, an early English printer, author of several curious and learned works, and brother-in-law of Sir Thomas More, died 1536. His son, WILLIAM, a judge, died 1565.

RATCLIFF, R., an English dramatist, d. 1553.

RATCLIFFE, THOMAS, earl of Sussex, who died in 1583, went as ambassador to Charles V. to negotiate the marriage between queen Mary and Philip of Spain. On his return he was made lord deputy of Ireland, and chief justice of the forests north of Trent, and in the succeeding reign he was appointed to the office of lord chamberlain.

RATRAMN, a French theologian, 9th century.

RATSCHKY, J. F., a German poet, 1757-1810.

RATTE, ETIENNE HYACINTHE DE, an astronomer, was born at Montpellier in 1722. He was secretary to the Academy of Sciences in his native city; also counsellor to the court of aids; and, when the National Institute was formed, he was chosen an associate. De Ratte made important observations on the transit of Venus in 1761, and furnished many articles on natural philosophy to the *Dictionnaire Encyclopédique, &c.* Died 1805.

RAU, or RAVIUS, CHRISTIAN, a learned German professor, was born at Berlin, in 1613. Coming to England, and being an admirable orientalist, he was patronized by Archbishop Usher, who sent him on a voyage to the East for the purpose of procuring manuscripts. He afterwards resided at Utrecht, Upsal, Kiel, &c., where he read lectures in Arabic, and wrote several useful treatises on Hebrew, Samaritan,

RAU, J. E., a Prussian theologian, 1695-1770.

RAU, J. J., a German Hebraist, died 1745.

RAU, J. J., a German anatomist, 1668-1719.

RAU, SEBALD, professor of Oriental languages at Utrecht, 1724-1818. SEBALD FOULQUES JEAN, his son, a poet and Orientalist, 1765-1807.

RAULIN, JOHN, a celebrated French preacher, of the 15th century, whose sermons and letters were greatly admired, and to whom both Rabelais and La Fontaine have been partially indebted for their pathos. Born 1443; died 1514.

RAULIN, J., a French physician, 1708-1784.

RAUWOLF, LEONARD, a distinguished German botanist and physician, who travelled through Syria, Palestine, Egypt, &c., making many valuable observations in natural history. He was a native of Augsburg, became a physician in the Austrian army, and died in 1606.

RAUZZINI, VENAUIO, an excellent musician, and esteemed the greatest pianist of his time, was a native of Rome. In early life he went to Vienna, and afterwards to Munich, where he resided for several years. In 1774 he was engaged as one of the principal singers at the opera in London. After some time he retired to Bath, where he for many years managed the concerts. He composed several operas and a great variety of detached compositions, which were highly popular. He was long classed amongst the first scientific musicians who had made England their home. Amongst his pupils may be mentioned Madame Mara, Mrs. Billington, and Messrs. Braham and Incedon. Rauzzini, who was universally esteemed and beloved in private life, died in 1810, aged 62 years. [J.M.]

RAVAILLAC, FRANCIS, the assassin of Henry IV. of France, was a Roman Catholic fanatic of singular character, born at Angouleme 1578 or 1579. His naturally gloomy temperament was deepened by a lawsuit, followed by an imprisonment for debt, in the course of which he is said to have been haunted by visions, and acquired such a morbid nervousness, that the very name of a Huguenot would excite him to fury. It is not without a certain risk that one expresses any belief in reports of this nature except as symptoms of disease, but it is impossible to overlook the historical evidence bearing on the circumstances alluded to. The king himself also had a presentiment of his fate, and repeatedly gave expression to it; even the courtiers for some time before the event were in a state of preternatural excitement. The design of Ravaiillac, meantime, was the secret of his own bosom, and he took advantage of the queen's coronation, on the 14th of May, 1610, to put it in execution. Henry IV. was proceeding in his carriage along the Rue de la Ferrierie when some obstruction occurred, and Ravaiillac stepping on the wheel, struck his noble victim through the window; he stabbed the king twice through the heart, and death was instantaneous. The assassin made no attempt to escape, but stood still with the bloody knife in his hand, and would have been cut down by one of the gentlemen, but the duke d'Epemon interposed, and he was arrested. Application of torture failed to wring any confession from him implicating others, and he was torn to pieces by horses in the Place de Grève, on the 27th of the same month. The moral complicity of the catholic league in this tragedy cannot be doubted; the fanaticism of the enemies of Henry IV. put the knife in Ravaiillac's hand by a much surer method than that of bargain and sale. The death of Henry was followed by the regency of Marie de Medici.

[E.R.]

RAVENET, SIMON FRANCIS, a French engraver, 1706-1774. His son, SIMON, an engraver, born about 1755.

RAVENNA, M. DA, an Ital. engraver, 16th cent.

RAVENNE, J. DE, a scholar of Petrarch, and one of the restorers of letters in Italy, 1350-1420.

RAVENS-CROFT, THOMAS, a composer and publisher of music, famous for his Psalm tunes and works known to musical antiquaries, 17th et.

RAVESTEYN, JOHN VAN, a Dutch portrait painter, born about 1580. His son, ARNOLD, born at the Hague in 1615, was also a portrait painter, and in 1661 was chosen chief of the Society of Arts in his native place. NICHOLAS, of the same family, a painter of history, 1661-1750.

RAVISIUS-TEXTOR, whose proper name was J. TIXIER DE RAVISI, professor of rhetoric at the college of Navarre, 1480-1524.

RAWENDY, AHMED, an Arabian *savant*, author of a new doctrine of metempsychosis, died 905.

RAWLE, WILLIAM, a learned Amer. jurist and lawyer, was born in Philadelphia, 1759. He was averse to holding office, and never reached higher official distinction than a membership of the legislature, and the district attorneyship of Pennsylvania, to which he was appointed by Washington. He was the author of various professional works, and of the new civil code of Pennsylvania. Died 1836.

RAWLET, J., an English painter, 1642-1686.

RAWLEY, WILLIAM, an English divine, was chaplain and secretary to Bacon, lord Verulam; and to him we are indebted for collecting many of his patron's excellent works. He held the living of Sandbeach, in Cambridgeshire, and died in 1667.

RAWLINSON, CHRISTOPHER, an able scholar, was born in Lancashire, in 1677, and educated at Queen's College, Oxford, where he was distinguished by his knowledge of the Saxon language. He published an edition of King Alfred's translation of 'Boethius de Consolatione Philosophiæ;' and died in 1773.

RAWLINSON, SIR THOMAS, mayor of London in 1706, when he repaired and beautified Guildhall, 1647-1724. His eldest son, THOMAS, a remarkable collector of books and MSS., the supposed original of Addison's Tom Folio, died 1725. RICHARD, a fourth son of Sir Thomas, an eminent antiquarian, died at Islington 1755.

RAWSON, SIR WILLIAM, a celebrated oculist, whose family name was Adams, was a native of Cornwall, and was apprenticed to a surgeon at Barnstaple, in Devonshire. He subsequently devoted his attention to the cure of diseases of the eyes, and especially cataract: was appointed oculist to ophthalmic institutions at Bath and Exeter; and, removing to the metropolis, became a member of the Royal College of Surgeons, and oculist extraordinary to the prince regent, &c. He received the honor of knighthood for his professional skill; and took the name of Rawson, in consequence of the will of a person from whom he received a considerable bequest of property. Died 1829.

RAY, Rev. JOHN, a very celebrated botanist and zoologist, was born at Black Hetley, in Essex, in 1628. He died in 1705. Few events in Ray's life were striking or remarkable. His father filled the humble station of a blacksmith, but was able to give his son a good classical education. At the age of sixteen he went to the university of Cambridge, and in 1660 was ordained both deacon and priest at the same time. He held a fellowship in Trinity College for a number of years; but, in 1662, he was deprived of this by his scruples in conforming to the celebrated Bartholomew Act. During his residence

at Cambridge, he had acted as tutor to many gentlemen of high rank, amongst whom especially was the son of Sir Francis Willoughby. Upon his being forced to leave the university, he travelled with his pupil through various parts of England, and on the continent, and on his return took up his abode for the most part at his friend's house, Middleton Hall, in Warwickshire. Mr. Willoughby was an ardent student of natural history, and Ray, whose name had already become famous as a botanist, assisted him in his studies. His kind patron and friend died in 1672, in the prime of life, leaving two infant sons whom he confided to the care of Ray, appointing him one of his executors, and leaving him an annuity of £60 a year. He soon afterwards married, and finally settled in his native village. The books which Ray published on botany are numerous; and his second edition of the 'Synopsis Methodica Stirpium Britannicorum,' has been said by an eminent botanist to be, of all the systematical and practical floras of any country, the most perfect that ever came under his observation. His method of classifying plants was a natural one, distributing them according to the number of their cotyledons, and has formed the basis of that system, which is now, under the name of Jussieuan, universally received by botanists of the present day. He is termed by Haller 'the greatest botanist in the memory of man;' and by Sir James Edward Smith he is said to be "the most accurate in observation, the most philosophical in contemplation, and the most faithful in description, amongst all the botanists of our own, or perhaps any other time." As a zoologist, Ray ranks also very high. Up to his time naturalists were satisfied with Aristotle's classification of the animal kingdom. Ray, however, conscious of its defects, and daring to think for himself, invented another, founded on the structure of the heart. Cuvier declares Ray to be the first true systematist of the animal kingdom, and both he and Linnæus avow themselves deeply indebted to his labors, in their succeeding systematic arrangements. We may conclude this brief notice of this justly celebrated man in the words of a learned botanist: 'We readily acknowledge we are proud of being able to call him our countryman, for he was in all respects as good as he was great.' Plumier dedicated a genus of plants to the memory of John Ray, under the name Jan-Raia. Linnæus changed it to Ra-jania; but Sir J. E. Smith has more lately with better taste adopted the name Raiania. [W.B.]

RAY-DE-ST.-GEINEZ, JAMES MARIE, a French tactician, author of a military history of Louis XIV., 1712-1777.

RAY, WILLIAM, an Am. poet, 1771-1827.

RAYMOND, several counts of Toulouse:—RAYMOND I., reigned 852-865. RAYMOND II., reigned 918-923. RAYMOND III., son and successor of the preceding, created duke of Aquitaine and count of Auvergne by Raoul, king of France, 923-950. RAYMOND IV., born 1042, succeeded his brother, William IV., in 1088, as count of Toulouse, duke of Narbonne, and marquis of Provence; in 1096 he went to Jerusalem with the first crusade, and refused the crown proffered to him after the capture of the city; died in Syria 1105. RAYMOND V., born 1134, succeeded his father 1148, died 1194. RAYMOND VI., son of the preceding, born 1156, succeeded 1194, and being a friend of the Albigenses, was twice excommunicated 1208 and 1211, and despoiled of his estates by Simon de Montfort, 1218, died 1222. RAYMOND VII., son of Raymond VI., and last count of Toulouse, was born

1197, and after struggling with his father for the recovery of his possessions, vanquished Simon de Montfort in 1224. He was so enfeebled by these continual wars, however, that he submitted to a humiliating peace with the pope and the king of France in 1229. He died 1242, leaving his estates to his only daughter, Jeanne, who had married Alphonso, count of Poitiers, brother of Louis IX.

RAYMOND, J. M., a Fr. general, dist. in the service of the native princes of India, 1755-1798.

RAYMOND, J. M., a Fr. chemist, 1756-1817.

RAYMOND, ROBERT, Lord, solicitor-general in the reign of Anne, and successively attorney-general and chief justice of the King's Bench in the reign of George I.; died 1732.

RAYMONDI. See RAIMONDI.

RAYNAL, JAMES, a French historian of Toulouse, 1723-1807. His brother, FRANCIS, a Greek scholar, 1726-1810.

RAYNAL, WILLIAM THOMAS FRANCIS, a French historian and political writer, was born at St. Geniez, in the Rouergue, 1711, and acquired an European reputation by his 'Philosophical History of the Two Indies.' He was a great partisan of the encyclopédists, and a man of remarkable benevolence. His other historical works are of less note. Died 1796.

RAYNAUD, T., a Fr. theologian, 1583-1663.

RAYNOUARD, FRANÇOIS JUSTE MARIE, a French dramatic writer and philologist, 1761-1836.

RAZI, a celebrated Arabian physician, died 923.

RAZOUX, J., a French physician, 1723-1798.

RAZZI, G. A., an Italian painter, 1479-1554.

RE, PHILIP, an eminent Italian agriculturist, was born at Reggio, in 1763. He studied in the college of his native city, and in 1793 an agricultural professorship was founded there in his favor. In 1803 he was called to the professorial chair at Bologna; and on the re-organization of the university of Modena, in 1814, he became professor of agriculture and botany, to which was added the superintendence of the royal gardens. He published several excellent works on his favorite study; and died in 1817.

READ, JOHN, an American colonial lawyer of distinction of Mass., died 1749.

READ, GEORGE, chief justice of the state of Delaware, an American revolutionist, born in Maryland, 1734. He was president of the convention which framed the constitution of Delaware, member of the convention which framed the U. S. constitution, and Senator of the U. S. Died 1798.

READING, an English divine, 1588-1667.

REAL. See SAINT REAL.

REAL, ANDREW, a French politician, 1765-1832.

REAL-DU-CURBON, GASPARD DE, a French writer 'On the Science of Government,' 1682-1752. His nephew BALTHAZAR, an ecclesiastic and learned writer, 1701-1774.

REAL, PHILIP FRANCIS, Count, an ally of Danton during the French revolution, 1765-1834.

REALINO, B., an Italian Jesuit, 1530-1616.

REAUMUR, RÉNÉ ANTOINE FERCHAULT DE, a philosophic naturalist, was born in 1683, at Rochelle; studied under the Jesuits at Poitiers; and afterwards went through a course of law at Bourges. But his tastes led him to the observation of nature; and, having made himself acquainted with the mathematical sciences, he was chosen a member of the Academy of Sciences at Paris, to which he had presented some memoirs on geometry. He discovered the art of manufacturing porcelain, of converting iron into steel, of tinning iron plates, and of making artificial pearls. He ascertained, also, the existence of mines of tourquoises in France equal to those of

Persia; and he invented a method of hatching eggs by artificial heat. But he is principally celebrated for being the first who reduced thermometers to a common standard; and the instruments constructed upon his principles still go by his name. His chief works are, 'Memoirs of his Discoveries,' 'The History of Insects,' 6 vols.; and a 'History of the Auriferous Rivers of France.'

REBENTISCH, J. FREDERICK, a German surgeon, disting. as a wr. on botany in 1804-1805.

REBOLLEDO, BERNARDIN, Count De, a Spanish soldier, writer, and diplomatist, was born at Leon, in 1597, and died at Madrid in 1677. He rendered important services to his country, and added to his fame by his literary labors. His poetical productions form 4 vols.

REBUFFI, P., a French jurist, 1487-1557.

RECCHI, N. A., a botanist of Naples, 16th ct.

RECHENBERG, ADAM, a learned theologian and philologist of Leipzig, 1642-1721.

RECHTERS, T., a Dutch painter, 1700-1768.

RECORDE, ROBERT, a native of Pembrokeshire, and one of the first mathematicians in England to adopt the system of Copernicus, died 1558.

[House of Red Jacket.]

RED JACKET, chief of the Seneca Indians, died 1830.

REDENTRIELM, or REENTRIELM, JAMES, a Swedish antiquarian, b. at Upsala 1644, d. 1691.

REDESDALE, JOHN FREEMAN MITFORD, Baron, an eminent English lawyer and statesman, was born in 1748. He was educated at New College, Oxford, and having studied at Lincoln's Inn, he was called to the bar. Devoting himself to chancery practice, he soon obtained a high reputation; and in 1782 he published 'A Treatise on Pleadings in Suits in the Court of Chancery.' He was afterwards made a Welsh judge. In 1789 he was chosen M.P. for Beeralston; in 1793 he was appointed solicitor-general, and in that capacity he assisted in conducting the state trials of Hardy, Horne Tooke, and Thelwall. He succeeded Sir John Scott (Lord Eldon) as attorney-general in 1799; and in 1801, when he sat in parliament for the borough of East Looe, he was chosen speaker of the House of Commons, on the resignation of Mr. Addington. In 1802 he was raised to the peerage, and made lord chancellor, and a member of the privy council in Ireland; but he resigned the seals in March, 1806, in consequence of the death of Mr. Pitt. He died in 1830.

REDI, FRANCIS, an Italian physician and naturalist, was born at Arezzo in 1626, and became first physician to the Grand-duke of Tuscany. He distinguished himself as a man of science, by his ex-

periments on the poison of the viper and the generation of insects. Redi was also a good poet, and cultivated the belles lettres with such success, that the academy Della Crusca, when compiling their dictionary, were proud of his assistance. Died 1698.

REDI, J., an Italian painter, 1665-1726.

REDING, ALOYS, Baron Von, landemann and general of the Swiss, was born in 1755. On the invasion of Switzerland by the French in 1798, he commanded the troops raised to repel them; but though he obtained some advantages over the enemy, his forces were inadequate to the task assigned them, and the Swiss were compelled to submission. Having afterwards endeavored to secure some degree of independence for his country, Buonaparte had him arrested and confined in the fortress of Arbourg, but he was set at liberty in a few months. He was subsequently at no pains to conceal his antipathy to Buonaparte; and he is believed to have favored the passage of the allied troops through the Swiss territories over the Rhine, after the campaign of 1813. Died 1818.

REDMAN, or REDMAYNE, JOHN, a dignitary and theol. of the English church, 1499-1551.

REDMAN, JOHN, an American physician of Philadelphia, 1722-1808.

REDOUTE, P. J., a Flemish pain., 1759-1840.

REED, ISAAC, a critic and miscellaneous writer, was born in London in 1742, and brought up to the conveyancing business, which he relinquished for literary pursuits. He published the poems of Lady Mary Wortley Montagu, edited the Seatonian prize poems, and revised and enlarged Dodsley's 'Old Plays.' He afterwards also published the 'Biographia Dramatica,' 2 vols.; and four volumes of humorous pieces, under the title of the 'Repository'; but the work by which he is most advantageously known is an edition of Shakspeare, in 10 vols., which he extended afterwards to 21 vols., embodying in its pages all the most valuable notes and elucidations of former commentators, with much original information. He was also a great book collector, in which he displayed considerable judgment and perseverance. At his death in 1807, his library was sold by auction, and it took 39 days to dispose of it.

REED, JOSEPH, a dramatic writer, was born at Stockton-upon-Tees in 1743, and carried on business as a rope-maker at Stepney till his death in 1787. He was the author of 'Dido,' a tragedy; 'Tom Jones,' a comic opera; several farces, &c.

REED, HENRY, an American writer, was born in Philadelphia near the beginning of the present century, and educated in the university of Pennsylvania. He studied law, but after a short practice of that profession he devoted himself to his favorite pursuit of literature, and was appointed professor of English literature in the university of Pennsylvania about twenty years ago. He was an ardent admirer and student of Coleridge and Wordsworth, and edited the excellent American publication of the latter poet's works. He was the author of the Life of General Reed in Sparks' American Biography, of editions of Reed's Dictionary, Arnold's Lectures on History, &c., and of various miscellaneous essays and reviews. He visited England in the summer of 1854 in company with his wife's sister, who was a grand daughter of Bishop White of Pennsylvania, and on their return both were victims of the tragic catastrophe which occurred to the steamer Arctic, on her voyage to New York in September 1854.

REED, JOSEPH, an American revolutionist. When a member of Congress in 1778 an effort was made by the British commissioner to induce him to use

his influence in conciliating the colonies with the mother country. His memorable answer was as follows, 'That he was not worth purchasing, but such as he was, the King of Great Britain was not rich enough to buy him.' From 1778 to 1781, the year of his death, he was president of Penn.

REES, ABRAHAM, D.D., a dissenting minister, whose labors as an encyclopædist have gained for him great and deserved celebrity, was born in Montgomeryshire in 1743. Being intended for the ministry, he was educated at Mr. Coward's academy, at Hoxton. On the death of Dr. Jennings, in 1762, though Mr. Rees was only 19 years of age, he was appointed mathematical tutor of that institution, which office he filled till the academy was dissolved, in 1784. Soon after this he became theological and philosophical tutor in the new college, founded at Hackney, which place he held till 1795, when that establishment also terminated. In 1776 he was employed as editor of 'Chambers's Cyclopædia,' which he completed in 1786, in four vols. folio. After a lapse of 14 years, the proprietors embarked in a more comprehensive undertaking, which also Dr. Rees brought to a conclusion in 45 vols. 4to. Besides these great literary performances, he published two volumes of 'Practical Sermons' and several other works. It was at the express recommendation of Robertson the historian that Dr. Rees obtained his degree from the university of Edinburgh. He officiated more than 40 years as minister of the congregation in the Old Jewry, was a fellow of the Royal Society and other institutions, and died in 1825.

REESIDE, JAMES, a well-known mail-contractor, in the obsolete days of stage-coaches, died in Phila., 1842. He was familiarly kn. as the 'Land Admiral.'

REEVE, CLARA, a novelist, was born at Ipswich, in 1723, and was the daughter of a clergyman, who gave her an excellent education. She possessed great learning and research, which she displayed in her first literary essay, a translation of Barclay's 'Argenis.' Among her subsequent productions are, 'The Progress of Romance,' 'Memoirs of Sir Roger de Clarendon,' 4 vols., 'The School for Widows,' and the well-known tale of 'The Old English Baron.' Died 1808.

REEVE, JOHN, one of the most popular actors on the London stage, famous for his representation of burlesque character, was born in London, 1799, and made his first appearance at Drury Lane, in the character of 'Sylvester Daggerwood,' in 1819. The principal scene of his later performances was the Adelphi theatre in the Strand. Died 1838.

REEVES, JOHN, the founder of the celebrated association for protecting liberty and property against republicans and levellers, was born in 1752, and died in 1829. This gentleman was called to the bar in 1780, but discontinued the active practice of his profession, and was deputed by government to regulate the administration of justice in Newfoundland, for which purpose he made two voyages there. Soon after his return from the first, he published 'The History of the Law of Shipping and Navigation,' a work that proved highly useful. But having, in 1795, published a pamphlet, entitled 'Thoughts on the English Government,' in which an alleged libellous passage appeared, the author was prosecuted by order of the House of Commons, and underwent his trial at Guildhall, when he was acquitted. He was appointed one of the king's printers in 1799, and from 1803 to 1814 he had an appointment in the alien office.

REEVES, W., an English divine, 1668-1726.

REGA, H. J., a French physician, 1690-1754.

REGGIO, F., an Italian astronomer, 1743-1804.

REGILLIANUS, QUINTUS NONIUS, a Roman emperor, elected 261, killed 263.

REGINALDUS, VALERIUS, otherwise RENAUD or REGNAULD, a Fr. Jesuit and casuist, 1540-1623.

REGIOMONTANUS. See MULLER.

REGIS, JEAN BAPTISTE, a French Jesuit and missionary to China, in the period 1708-1715. He is author of a Latin translation of the Y-King, and a map of the country. His nephew, JOSEPH CHARLES, known as a man of letters, 1718-1777.

REGIS, J. F., a French preacher, 1597-1640.

REGIS, P., a French physician, 1656-1726.

REGIS, PIERRE SYLVAIN, a French philosopher, was born at Agenois, in 1632. After studying in the Sorbonne, he read lectures upon and espoused the Cartesian philosophy, till interdicted from doing so by the royal mandate. He, however, published an elaborate view of that system, in 3 vols. 4to.; and wrote several defences of it, in answer to Huet, Du Hamel, and others. Died 1707.

REGIUS, H. LEROY, or DUROY, a physician and Cartesian philosopher of Utrecht, 1598-1679.

REGIUS, URBAN, or LE ROI, a learned poet and controversialist, distinguished also as one of the early reformers, was born at Langenargen, in Germany. He completed his studies at Ingoldstadt, under Eckius; and when the emperor Maximilian visited that university, he made Regius his poet laureate and orator. He afterwards obtained a professorship; but when the controversy arose between Luther and Eckius, the reformed doctrines operated so strongly upon his convictions, that he sided with the former against his old tutor in polemics. In 1530 he accepted an invitation from the Duke of Brunswick to settle as pastor of the church of Lunenburg, and died in 1541.

REGNARD, JOHN FRANCIS, a comic writer, was born at Paris in 1655. He went to Italy about 1676, and was returning home with considerable property, when he was captured by an Algerine corsair, and sold for a slave. During his captivity he obtained the favor of his master by his skill in cookery; but being caught in an intrigue with one of the women, he was required to turn Mahometan, or suffer death. The French consul, however, saved him by paying his ransom; and Regnard returned to France about 1681. After this he wrote several successful comedies, besides poems and other works; was made a treasurer of France, and lieutenant of the waters and forests; and died in 1709.

REGNAULT, MICHAEL LOUIS STEPHEN, a French advocate and statesman, was born at St. Jean d'Angeli, in 1760. Having distinguished himself at the bar, he was chosen a deputy of the states-general from the tiers état of the country of Aunis, and became the editor of a daily paper called the Journal de Versailles. He was proscribed in 1792, and being discovered and arrested at Douai, he did not obtain his liberty till after the fall of Robespierre. During the consulate and imperial sway of Buonaparte he was honored and promoted, and acquitted himself with great ability as attorney-general, &c. Although he foresaw the fall of Napoleon on the opening of the Russian campaign, he continued faithful to his interests, and followed Maria Louisa to Blois. After the battle of Waterloo he pleaded for the resignation of Buonaparte in favor of his son; and his proposition being rejected he quitted France for America, where he remained four years. He at length, in 1819, obtained permission to return; but being in the last stage of sickness when he landed, he expired in a few hours after his arrival.

REGNAULDIN, THOMAS, a French sculptor, and member of the Academy, died 1706.

REGNAULT, J. B., a Fr. painter, 1754-1829.

REGNAULT, NOEL, a learned mathematician and philosopher, was born at Arras, in 1683; belonged to the society of Jesuits; and died at Paris in 1762. The study of philosophy occupied most of his time, though not to the exclusion of religious and moral duties. He published several scientific and metaphysical works, the principal of which are his 'Philosophical Conversations,' 3 vols., and his 'Ancient Origin of the New Philosophy,' 3 vols.

REGNIER, CLAUDE AMBROSE, duke of Massa, minister of justice under the government of Napoleon, was born at Blamont, in La Meurthe, in 1736; practised as an advocate at Nancy, was a member of the constituent assembly, retired from public affairs during the reign of terror; but, after the fall of Robespierre, became a member of the council of ancients, and took an active part in the senate. He assisted in the elevation of Buonaparte as first consul; and, in 1802, he was appointed grand judge, minister of justice, &c. In 1813 he became president of the legislative body, and died in the following year.

REGNIER, E., a Fr. mechanician, 1756-1825.

REGNIER, a French Latin poet, 1589-1663.

REGNIER, MATURIN, a French poet, and the first who succeeded in France as a satirist, was born at Chartres, in 1573. He was brought up to the church, which he disgraced by his debaucheries; yet he obtained a canonry in the cathedral of his native place, with other benefices, and a pension. Died 1613. His 'Satires' still retain a place in the standard literature of his country.

REGNIER-DESMARAIS, FRANCIS SERAPHIN, a French writer, author of poems in his own language and in Latin and Italian, secretary to the Academy, and one of the most active editors of the dictionary, 1632-1713.

REGNIER-DESTOUBET, H. F., a Fr. writer, and advocate of the Jesuits, 1804-1831.

REGULUS, MARCUS ATTILIUS, a Roman general, celebrated for his patriotism and devotion in the service of his country, was made consul a second time about 256 B.C., and with his colleague, Manlius Vulso, commanded in the first war against Carthage. Made prisoner by his opponents, he was sent to Rome with an embassy, that peace might be procured on favorable terms, and bound himself, by an oath, to return if the terms were rejected. He, however, considered it his duty to advise the continuance of the war; which being determined on, no entreaties or supplications could prevent him from fulfilling his solemn engagement; and the Carthaginians, on his return, put him to an ignominious and cruel death.

REGULUS-SERRANUS, CAIUS ATILIUS, consul of Rome B.C. 257, obtained the naval victory of Lipari in the war with the Carthaginians.

REHFELD, C. F., a Germ. physician, 1735-94.

REHNSCHOLD, CHAS. GUSTAVUS, a distinguished senator and field-marshal of Sweden, 1651-1722.

REICHA, ANTOINE JOSEPH, a celebrated musical composer and theorist, was born at Prague in 1770, and received his education at the university of Bonn. Between the years 1794 and 1807 he lived at Hamburg, at Paris, and at Vienna, where he produced several works which were eminently successful. In 1808 he revisited Paris, when he gave a course of lectures on composition, which were well attended. His career as an operatic composer then commenced. After the death of Mehul he was appointed profes-

sor of the Conservatoire de Musique, where he instituted a new and greatly improved method of tuition, which has had great effect over all Europe in improving the study and advancing the knowledge of music. In May, 1835, he was admitted a member of the National Institute, and he died in May, 1836. [J.M.]

REICHARD, HENRY AUGUSTUS OTTOCAR, a German writer, was born at Gotha, in 1751, and died in 1828. He is extensively known by his 'Traveler's Guide in Europe,' 2 vols. He also wrote poems, comedies, &c.; and held a considerable office in the government of Saxe-Gotha.

REICHARD, H. G., a Ger. philologist, 1742-1801.

REICHARDT, CHRISTIAN, author of 'The Science of Agriculture and Gardening,' 1685-1775.

REICHARDT, JOHANN FRIEDRICH, was born at Königsberg in Prussia, in the year 1752. This composer, whose talents developed themselves in a remarkable degree even in early infancy, studied for two years at the university of Königsberg, under the great philosopher Emanuel Kant, and afterwards two years at the university of Leipzig. He then travelled through Germany, and on his return to Prussia he was appointed Director of Salt-works under government. Reichardt was chapel-master under three kings of Prussia, namely, Frederic the Great, and Frederic William II. and III. He was also manager of the French and German theatres, and conductor of the orchestra to the king of Westphalia, and member and correspondent of several learned societies. He composed an immense number of literary and musical works, the list of which is much too long to be given here. His musical works embrace all classes of compositions, operas, sonatas, and concertos for the harpsichord, concertos for the violin and violoncello, choruses, songs, odes, overtures, and church music. He died in the year 1814.

REICHENBACH, GEORGE OF, a distinguished mechanical artist, was born at Mannheim in 1772, and died at Munich in 1826. He and his coadjutor, Fraunhofer, were unsurpassed in the manufacture of optical instruments generally, and quite unrivalled in the execution of telescopes, heliometers, theodolites, &c.

REICHSTADT, NAPOLEON FRAN. CHARLES JOSEPH BUONAPARTE, Duc De, only son of Napoleon and his Austrian bride, Maria Louisa, was born at Paris, 20th March, 1811. His birth was an event of great political importance, and Napoleon himself announced it to the crowds who thronged the Tuileries with the ambitious words:—'C'est un roi de Rome!' Napoleon, at this time at the height of his power, was preparing for the struggle which every one foresaw must take place with the might of Russia, and as usual with him, he anticipated the coalition by a sudden invasion of the North. The young king of Rome had just completed his third year when the disasters of Moscow and Leipzig opened the gates of Paris to the allied armies, and was with his mother at Blois when the capital capitulated, 30th March, 1814. The emperor was exiled to Elba, and his wife and son conveyed to Vienna, where the young prince received the title of Duc de Reichstadt, a petty principality of Bohemia, and was confided to the care of the count Dietrichstein. His father made vain attempts to recover possession of the child, for whose existence he had paid a heavy price in the divorce of Josephine, and on his second abdication in 1815, he endeavored to secure his succession as Napoleon II. The Bourbons, however, were restored by the allied sovereigns, Maria Louisa became duchess of Parma and mistress of Count

[Cradle of the King of Rome.]

Neippert, and her son was consigned to oblivion at the court of his grandfather. The eyes of Europe were often turned upon the young Napoleon as he grew to manhood, and displayed some of the rare qualities possessed by his father; the government of Louis XVIII. and Charles X. also may be supposed to have felt that his existence at the court of Vienna was a perpetual menace. Whatever hopes or fears he may have excited were set at rest by his death in 1832, when a rapid decline terminated his life at the early age of twenty-one. The duc de Reichstadt bore a strong resemblance to Napoleon; the finely chiselled mouth and chin, the massive forehead, and the deep brilliancy of his eyes, were remarkably alike; the same may be said of his capacity for the penetration of character, and his general temperament. He applied himself intensely to military and historical studies, and especially to all that concerned the career of his father, but he had no real freedom at the court. His portrait was almost the last object that the exile of St. Helena gazed upon, whose last testament is an evidence how much he still hoped for the child of his ambition:—"I recommend him never to forget that he was born a French prince, and never to permit himself to become an instrument in the hands of the sovereigns who oppress the peoples of Europe. He must never be found in the ranks of those who combat with France, or in any manner annoy her. Let him adopt my motto, "All for the French people." [E.R.]

REID, THOMAS, born at Strachan in Kincardineshire, 26th April, 1710; died in Glasgow, 7th October, 1795; the illustrious founder of the 'SCOTTISH SCHOOL' in Philosophy. The events of Reid's Life were few, but most honorable to him; and the entire tenor of his Life, that which befitted an unobtrusive, but earnest, and successful Inquirer into Truth. Under the influence of early connections, his thoughts naturally turned towards Philosophy, and the profession of the Church; and he completed the studies needful to that end at Marischal College, Aberdeen. But about this period, Hume's *Treatise on Human Nature* astonished and troubled Philosophy. Until then, REID had accepted Locke,

and even the startling deductions of Berkeley did not alarm him. But Hume went much farther. Along with the Material World, he had banished those Spiritual conceptions which Reid held in greatest account; he denied the Personality, and therefore the Liberty and Responsibility of Man. The sincere Scottish Clergyman, felt and *knew*, that, in a Philosophy whose conclusions were so false, the most serious error must inhere; and that, as its *Logic* showed no flaw, the fault must lie in the foundations. Soon after, in 1763, his great work appeared—the '*Inquiry into the Human Mind on the Principles of Common Sense*,'—that vigorous protest on behalf of our Human Consciousness, which determined the long subsequent course of Scottish Philosophy. Previous to the publication of this work, Reid had left his parish (in 1752) for the Chair of Moral Philosophy in his *Alma Mater*; but the reputation established by the '*Inquiry*,' procured his translation to a more important sphere;—he was chosen in 1764 to succeed Adam Smith in the corresponding Chair in the University of Glasgow. In 1785 and 1788, he published his *Essays on the Intellectual Faculties, and the Active Powers*. Philosophy has recently obtained the classic edition from SIR WILLIAM HAMILTON. We shall state as succinctly as possible the characteristics of Reid's Reform. The first fallacy in the system of Locke and his successors, at which he struck, was the doctrine of Perception. The problem, in what way does the Mind reach the external world,—had always been held fundamental in Philosophy. And a favorite mode of conceiving it was this—certain Images or Ideas, intermediate between mind and matter—representing the latter, and apprehensible by the former—constitute the bridge between these two contrasted substances. That being the case, said BERKELEY, we do not perceive matter or the External World at all; and, added Hume, we perceive and can know nothing save Ideas. The various forms and modifications of this cumbrous and purely fantastic conception have recently been scientifically arranged and expounded by Sir William Hamilton; who has shown afresh that Reid's solution of the vexed problem is the only tenable one. Perception, said he, is not a *representation*, but a *presentation*. We do not reach it, from Sensation, through any medium; the world—the cause of the sensation—appears in the mind along with the sensation itself, and with the same evidence. The root or beginning of all our knowledge is thus essentially a *Dualism*:—the *Intuition* is as immediate as the *Action* that gives rise to it. (Article LEIBNITZ.) And by this simple solution, which is but the assertion of a *fact*—attested to be such by Consciousness—Reid dispersed the perplexities of preceding Thinkers, and ought to have prevented the rise of many of the ambitious and baseless schemes in which Germany has since then been unhappily so fertile. Reid's next point, touched the rationale of our JUDGMENTS. According to Locke, a Judgment is the mere comparison of terms or ideas furnished by simple apprehension: we receive ideas, said that Philosopher, altogether from Sensation; the Mind compares these Ideas; and, from this comparison, results knowledge or *judgments*. Reid overthrew this doctrine also. Judgments, he said, are not mere abstract terms; neither mere statements of the identity or discordance of abstract terms. They come from analyses of concrete notions by the Mind, acting according to *its own inherent Laws, and under the sway of principles, belonging to its constitution, and of which none of its operations are independent*. This doctrine of Judgment,

led our Inquirer, inevitably, to a farther and yet higher question, viz. : What are those laws ? What those Fundamental Principles of the Reason ? Reid replies, by a summary of First Truths, or Truths of Common Sense ; and next by an analysis of the Faculties. Very few persons will now be disposed to say, that in the details or phraseology of these replies, Reid's system is unimpeachable. The name Faculty, was perhaps unfortunate, and no scientific, precise, or exhaustive method, guided his research after First Truths ;—he merely enumerates a few principles, which he says are evident to Common Sense. Nevertheless, the solution offered is correct in the main ; and it is not an exaggeration, that it overturned Sensationalism in Scotland. He carried with him the same method into Moral Investigations, re-establishing on surest foundations, the Personality and Liberty of Man. It is of moment that a correct apprehension be obtained of the exact place occupied by Reid and the Scottish School generally, in the history of later Mental Philosophy. That he stands among the foremost of that class of Thinkers who have contended with Scepticism in all its forms, and Sensationalism under whatever modification, does not require to be reasserted : the really important question is, what is the relationship of Reid's system to those of other Modern Leaders, who, in so far as his main object is concerned, have made common cause with him ? Among the great men, whose general aim was identical with Reid's, we easily distinguish two—DES CARTES and KANT : let us fix, then, the relations between Cartesianism, the Scottish Reform, and the Critical Philosophy. Now, it is not to be doubted that the foundation—the starting point of *unquestionable certainty*—is—in all these systems—the same : neither is the glory of having first described that Common Sense Foundation, to be withheld from the illustrious Frenchman. Previous to the labors of Des Cartes, the metaphysicians of Modern Europe, had discerned no absolute starting point ; their schemes usually reposed on some abstract and often fanciful postulate ; nor can more forcible illustration be given of the merit of Des Cartes' achievement, than the *subsequent* aberrations of SPINOZA. The foundation, whose claims and sufficiency are so fully vindicated in the *Treatise on Method* and the *Meditations*, is simply this :—it is a First Truth—possessed of an Absolute Certainty, from which the certainty belonging to all other Truth is derived—that *I, a Thinking Subject, exist*. This Ego, then, being our first or primary sphere of observation and scrutiny ;—*what find we there ?* And in establishing this foundation and putting this question, Des Cartes spread out the entire domain of Psychology. Sciences are built up slowly ; and psychological observation is peculiarly difficult : Des Cartes did not advance far with the superstructure ; he left hints merely and separate truths ; and he often erred. The earliest subsequent progress may most justly be attributed to REID, for Locke, with all his acuteness, was not a sound Psychologist,—he started from a Theory regarding the Origin of our Ideas. *Consciousness*, said Reid, which assures us of the existence and personality of the Thinking Subject, declares in a manner equally imperative, the phenomena and attributes of that subject. It tells in the *first* place, of certain Faculties, or modes of action—demanding faith for the operations of these Faculties. And it declares *secondly*, the existence of certain absolute principles or beliefs, from which in none of its actions, the *Ego* can shake itself free : principles which, when mixed up with the subject-matter of sensations, give rise to equally imperative

contingent truths. As already indicated, Reid was rather a sound Thinker than possessed of the Scientific Spirit. Although therefore he discovered the foregoing Truths, and fully appreciated and unfolded their importance, he penetrated no farther. He descried fundamental *facts* in Psychology, but he never entertained an idea that Psychology—any more than any other branch of Inquiry—cannot be elevated into a Science, if attention be confined to examination of its separate fundamental Facts. That loftier question was beyond him—What is the *Organic Structure* of the Intellect of which these facts are products or phenomena ? In other words,—In what way are principles possible, which are not evolved by our faculties, but rather govern them, seeing that no faculty can construct any notion which does not presuppose these principles ? And again,—How comes it, that knowledge relative to the nature and action of the Faculties of an Individual Mind, can ever assume to be *Absolute* ? It is into this arduous Sphere of pure Science that KANT boldly entered, and where his triumphs have been won. His arrangement or classification of the Mind's Modes of Energy (Faculties) is simpler and better discriminated than Reid's ; he has traced the absolutism of First Truths to the fact, that *à priori* or constituent Laws, govern the Mind's action in every Mode of its Energy ; and he has exhausted the list of such Truths, by detecting these *à priori* Laws.—Such, the relationship among these remarkable Thinkers. It has been signally unfortunate for the progress of Philosophy in Scotland, that the Scotch have not been disposed to regard Reid as a *contributor* merely. Not satisfied with recognizing his immense merits, they have supposed that he sounded all the depths of Psychologic knowledge ;—thus wilfully shutting up their sympathies from the memorable advances achieved since his time. Of late years, indeed, they have been growing sensible of their mistake. [J.P.N.]

REIFESTEIN, JOHN FREDERICK, a Prussian cameo painter and improver of the art, 1719–1793.

REIFFENBERG, FRANCIS DE, a French Jesuit, historian, theol., and Latin poet, 1719–1764.

REIGNY, LOUIS ABEL BEFFROI, an eccentric and fertile French writer, commonly called Cousin Jaques, was born at Laon, in 1757, and died at Charenton, in 1810. He was the author of several successful plays and works of a burlesque character ; and he commenced a periodical publication, entitled 'Dictionnaire des Hommes et des Choses,' which, on account of its offensive politics, was suppressed.

REIL, J. C., a Germ. physiologist, 1759–1813.

REIMAR, or REIMARIUS, HERMAN SAMUEL, a philologist and naturalist, professor of Philosophy at Hamburg, 1694–1748. His son, J. A. HENRY, a physician and naturalist, 1729–1801.

REIMMANN, JAMES FREDERICK, a German *savant*, author of a 'History of Logic,' 1668–1743.

REINA, F., a French writer, 1770–1825.

REINBECK, J. G., a German theologian and philosophical disciple of Wolf, 1682–1741.

REINECCIUS, C., a theologian and Hebraist, editor of a Bible in four languages, 1668–1752.

REINECCIUS, REINIER, an antiquarian and disciple of Melancthon, one of the restorers of historical studies in Germany, 1541–1595.

REINEGGS, J., a German traveller, 1744–1793.

REINER, W. L., a German painter, 1686–1743.

REINESIUS, THOMAS, a learned physician and archæologist of Gotha, 1587–1667.

REINHARD, F. VOLKMAR, a protestant theologian and moralist of Sulzbach, 1753–1812.

REINHART, C. F., Count, a diplomatist, member of the Institute, and peer of France, 1751-1837.

REINHOLD, C. LEO, a Ger. philos., one of the first to enforce the doctrines of Kant, 1758-1823.

REINHOLD, ERASMUS, a German mathematician and astronomer, was born at Salfeldt, in Thuringia, in 1511; became professor of mathematics at Wittenberg, and died there in 1553. His works are, 'Theoria nova Planetarum,' 'Ptolemy's Almagest, with a Latin version,' 'Prutenicæ Tabulæ Cœlestium Motuum,' and 'Primus Liber Tabularum Directionum.'

REISER, A., a German theologian, 1628-1686.

REISKE, JOHN JAMES, an eminent philologist and oriental scholar, was born at Zorbig, in Saxony, in 1716; studied at Halle and Leipsic, became Arabic professor at the latter place, was appointed rector of the college of St. Nicholas, and died in 1774. His works and translations of classic authors are numerous and erudite; among them are valuable editions of the 'Moslem Annals of Abulfeda,' the 'Greek Anthology,' 'Plutarch,' the 'Greek Orators' &c. He was assisted in his researches by his wife, ERNESTINA CHRISTINA, who learned Greek and Latin for the express purpose; and after his death she completed some of his undertakings, and published his autobiography.

REITZ, JOHN FREDERICK, a learned philologist, 1695-1778. His brother, G. OTHO, a Greek editor, 1702-1769.

REIZ, or REITZ, FREDERIC WOLFGANG, a German philologist, born in 1733. He successively held the professorships of philosophy, Latin and Greek, and poetry, in the university of Leipsic, of the library of which he was also director. He edited the works of Herodotus and some other classic authors. Died, 1790.

RELAND, ADRIAN, a learned orientalist, was born at Alkmaar, in 1676. He studied at Amsterdam, Utrecht, and Leyden; and was successively professor of philosophy at Harderwick, and of oriental languages and ecclesiastical history at Utrecht, where he died in 1718. Among his works are 'De Religione Mohammedica,' 'Dissertationum Miscellanearum,' 'Antiquitates Sacræ Veterum Hebræorum,' 'Dissertationes quinque de Nummis Veterum Hebræorum,' 'Palæstina ex Monumentis veteribus illustrata et Chartis Geographicis,' &c. 2 vols. 4to.

RELTAN, RICHARD, a Church of England minister, naturalist, and classical editor, 1755-1823.

REMARD, C., a French bibliopole, 1766-1828.

REMBERSUS, one of the first promoters of Christianity in Denmark, d. abp. of Hamburg 888.

REMBRANDT VAN RHYN, PAUL, one of the most celebrated painters and engravers of the Dutch school, was born in 1606, near Leyden. His passionate love for art disappointed his father's desire of educating him as a scholar; but he received some instruction in the art of painting from Peter Lastmann of Amsterdam, but soon returned home, and pursued his labors there, taking nature as his sole guide. He came into notice by taking a picture to the Hague, where a dealer gave him 100 florins for it; which circumstance procured him employment and pupils. Rembrandt was master of all that relates to coloring, distribution of light and shade, and the management of the pencil, and though he was deficient in some of the other requisites of a true artist, it cannot be denied, that his pencil is masterly and unique, possessing an energy and effect belonging to no other painter. His etchings possess a wonderful freedom, facility, and boldness, and are truly picturesque. Rembrandt mar-

[Rembrandt, first picture.]

ried the handsome daughter of a peasant, who used to sit to him as a model. He resided during the greater part of his life at Amsterdam, and he soon acquired a large fortune. His habits, however, were low, and his avarice insatiable; so that he lived like a beggar, and descended to the meanest tricks to increase his hoard. He died in 1674, or, according to some accounts, in 1688.

REMER, J. A., a Germ. historian, 1736-1804.

REMI, or REMIGIUS, the name of two saints of the Roman calendar:—1. An apostle of the Franks who baptized Clovis, and became archbishop of Rheims, died 533. 2. An archbishop of Lyons, who was of Gaulish origin, and wrote against Godeschalcus, presided at the council of Valence 855, died 875. A third of the name, called REMI, or REMIGIUS OF AUXERRE, was a Benedictine monk and commentator, died 980.

REMI, A., a French poet, 1600-1646.

REMI, J. H., a French jurist, 1738-1782.

REMONDI, BALTHASAR M., a Venetian bishop of Zante, distinguished as an Orientalist, 1698-1777.

REMUSAT, CLAIRE ELIZABETH JEANNE, Countess De, lady of the palace to the empress Josephine, authoress of an Essay on Female Education, 1780-1821.

REMUSAT, JEAN PIERRE ABEL, an eminent linguist, was born at Paris, in 1788. He was professor of the Chinese and Tartar languages at the College de France; was admitted into the Academy of Inscriptions in 1816; and, after Visconti's death, in 1818, he was appointed editor of the Journal des Savans. His principal works are, 'Essai sur la Langue et Littérature Chinoises,' 'Plan d'un Dictionnaire Chinois,' 'Mélanges Asiatiques,' and 'Comtes Chinois,' 3 vols. Died 1832.

REMUSAT, P. F. DE, a Fr. writer, 1755-1803.

RENANUS. See RHENANUS.

RENARD, J. A., a French architect, 1744-73.

RENAU D'ELISAGARAY, BERNARD, an able French naval architect, was born in Bearn, in 1652. He was employed at Brest in the construction of large ships; and, in 1680, he conceived the idea of bomb-vessels, which were used at the bombardment of Algiers, and the success of which led to his being appointed to conduct several sieges under Vauban. For these services he was made a captain in the navy, honored with the cross of St. Louis, and rewarded with a pension of 12,000 livres. He wrote 'Théorie de la Manœuvre des Vaisseaux,' and died in 1719.

RENAUD, the *first* of the name, count of Burgundy, reigned 1027–1057; the *second*, succeeded 1087, died in the Holy Land, 1097; the *third*, succeeded 1126, died, and was succeeded by his daughter, Beatrix, 1148.

RENAUD, the *first* of the name, count of Bar, reigned 1105–1149, and sustained a long struggle with the emperor Henry V. The *second*, succeeded his brother, Hugh, 1155, died 1170.

RENAUD, L., a French preacher, 1690–1771.

RENAUD, or REGNAULD. See REGINALDUS.

RENAUDIE, GODFREY DE BAPAY, Seigneur De La, a party to the conspiracy of Amboise, 1560.

RENAUDOT, THEOPHRASTUS, a physician, was born at London, in 1583; and died at Paris, in 1653. He was the first projector of gazettes, or newspapers, in France, which he published under the title of ‘*Mercurius Francicus*,’ from 1635 to 1643. He was the author of a ‘*Life of Henry II., Prince of Condé*,’ and other biographical works.—His son EUSEBIUS, who died in 1720, was a learned oriental scholar. He became prior of Frossey, in Bretagne; was admitted a member of the academy Della Crusca, and of that of the Inscriptions; and was the author of several works illustrative of the literature and manners of the East.

RENAULT, A. C., a young woman, executed at Paris for attempting the life of Robespierre, 1794.

RENAZZI, P. M., an Italian jurist, 1747–1808.

RENE OF ANJOU, the last of his dynasty who sat on the throne of Naples, and the father of Margaret of Anjou, wife of Henry VI., king of England, was born at the castle of Angers in 1409, and succeeded his brother as duke of Anjou and count of Provence, 1434. He had previously become duke of Lorraine by his marriage with Isabella, the heiress of that state, and had suffered a long captivity, and been deprived of the succession by his competitor, Anthony, count of Vaudemont. He was still the prisoner of that polite gentleman when he succeeded to the duchies of Anjou and Provence in 1434, and when the death of Joan II. of Naples in 1435, gave him a claim to the Two Sicilies. These events, and the warlike employment they promised to René, were a sufficient inducement for Anthony to rid his hands of him, and the heir of Naples and Sicily was permitted to fight his way to the throne. The succession was disputed by Alfonso of Arragon, who took Naples in 1442, and chased René back to Provence. But the conquests of the English had also deprived him of his whole heritage in France, and René found himself a titular king of some of the fairest portions of the earth, and duke of Anjou, Maine, and Bar, without a province under his own command. Such was his position when the duke of Suffolk negotiated the marriage of René’s daughter with Henry VI., and it is thus alluded to in the taunts put in the mouth of York by Shakspeare:

‘Thy father bears the type of king of Naples,  
Of both the Sicils and Jerusalem;  
Yet not so wealthy as an English yeoman.  
Hath that poor monarch taught thee to insult?’

Margaret, however, if poor, was a finely accomplished woman, and possessed the heroic spirit of many others of her sex in that age; her father, René, also was distinguished by many of the qualities of a good and wise king, whose lot was cast in evil times; and he was called ‘the good King René’ by his subjects of Provence. Anjou and Maine were restored to him by the treaty with Henry VI., but Louis XI., in 1473, deprived him of the former, and attached it definitively to the French crown. It was according to the necessity and the spirit of the

times, for the European monarchies were then absorbing the old feudal lordships and petty sovereignties into themselves, and forming the national monarchies, such as France became in the next cent under Louis XIV. René died at Aix in Provence, 1470, and so lately as 1823 a marble statue was erected to him in that city. He was the last count of Provence, that portion of his hereditary dominions having been annexed to France at his death. [E.R.]

RENE II., duke of Lorraine, born 1451, succeeded to the duchy in right of his mother, daughter of Rene of Anjou, 1493, died 1508.

RENEE OF FRANCE, duchess of Ferrara, second daughter of Louis XII., was born 1510. In 1528 she married Hercules II., duke of Ferrara, and was distinguished for her love of letters, and her friendship for Calvin and the protestants. Died 1575.

RENNEL, MAJOR, an East Indian officer, and distinguished geographical writer, 1742–1830.

RENNELL, THOMAS, D.D., dean of Winchester, and one of the most learned and eloquent preachers of his time, was born 1753. In 1786 he was inducted to the living of Alton, in Hampshire; and in 1805 he was appointed to the deanery of Winchester, by his admirer and friend, Mr. Pitt. Though his scholarship was at once profound and various, he published nothing but a volume of sermons, principally a selection from those which he preached at the Temple church, London, and in the cathedral of Winchester. The perusal of this one volume causes us to regret that he published no more; for in addition to the most fervent and sound piety, couched in the most glowing and nervous language, they incidentally afford abundant proof of the correctness of an opinion given by a contemporary writer, that, ‘both as a theologian and a scholar, in the most comprehensive sense of the words, Dr. Rennell was one of the most remarkable and accomplished men of the age.’ Late in life he lost his wife, the daughter of Sir William Blackstone. Died 1840.

RENNELL, THOMAS, son of Dr. Rennell, the learned and venerable dean of Winchester, was born in that city, in 1787, and was placed at an early age at Eton, where he distinguished himself by his proficiency in classical literature, and obtained Dr. Buchanan’s prize for the best Greek Sapphic ode ‘On the Propagation of the Gospel in India.’ In 1806 he removed to King’s College, Cambridge, and two years after gained the Brunonian prize for the best Greek ode. On taking his first degree, he entered into orders, and became assistant preacher to his father at the Temple church; in 1811 he published ‘*Animadversions on the Unitarian Version of the New Testament*,’ about which time he undertook the editorship of the *British Critic*. In 1818 he was presented to the vicarage of Kensington, and in the same year he was elected Christian advocate in the university of Cambridge, in which capacity he published two excellent treatises; one, entitled ‘*Remarks on Scepticism, especially as connected with the Subjects of Organization and Life*,’ the other, ‘*Proofs of Inspiration on the Grounds of Distinction between the New Testament and the Apocryphal Volume*.’ In 1823, Mr. Rennell was presented to the mastership of St. Nicholas’s hospital, and a prebend in Salisbury cathedral; but a violent attack of fever, which terminated in a gradual decline, put an end to the hopes of his friends and admirers in the following year. He died at Winchester, June, 1824, just as he had completed his last work, a new translation of ‘*Munster’s Narrative of the Conversion of Count Struensee*.’

RENNEVILLE, CONSTANTINE DE, author of a

'History of the Bastile,' in which he had been confined on a charge of treason; born at Caen 1650, died in England 1724.

RENNEVILLE, SOPHIE, a French lady, author of works on education, 1771-1822.

[John Rennie.]

RENNIE, JOHN, a distinguished civil engineer, and the first perhaps who in the execution of machinery carefully distributed and accurately calculated the strains of the different parts, so that these were *justly proportioned*, a feature which up to a very recent period was a peculiar characteristic of British machinery. He was born at Phantassie in Haddingtonshire, 7th June, 1761. His father was a farmer, celebrated for his skill and desire to improve agriculture. As early as 1780, on being asked at what season he began ploughing, answered that he ploughed at all seasons! John Rennie acquired the rudiments of education at the school of Phantassie and afterwards at Dunbar, where, on the promotion of the master, he, for a short time, conducted the school. He early displayed a love of nature, and an aptitude for mechanical contrivance, and the use of tools. He worked as a mechanic for some years under Andrew Meikle, a millwright of the district, under whose superintendence he assisted in the erection of some mills in Haddingtonshire, and went as far as Dundee to erect one on his own account. The opportunity presented itself, and Rennie took advantage of it, to attend the course of lectures on mechanical philosophy and chemistry, by Robison and Black, in Edinburgh college. Prepared thus with what books and professors could teach, he entered the world; and it may be said, that during all the course of his useful life, he was adding to his stock of knowledge, or seeking the means of improving his practice by observing the operations and effects of his own works, as well as of those which had been executed by other engineers. About 1781, or when in his twenty-first year, feeling himself qualified to practise the profession of civil engineering on a greater scale than Scotland then afforded field for, he set out for London. On his way he spent some months with Watt at Soho. Soon after he was established in London, Bolton and Watt employed Rennie in the construction of two steam engines, and the machinery connected with them, at the Albion Flour Mills. All the wheel work was of *cast iron* instead of wood, which had been always previously used in such machinery. The works were finished in 1789, and obtained Watt's highest com-

mendation. Rennie continued to the last to be employed in the construction of steam engines and other machinery, and, at the same time, he was almost constantly engaged in designing or superintending those public works which have given him so just a claim to celebrity. Rennie designed and executed innumerable bridges, but his masterpieces are Waterloo bridge, the Southwark cast iron bridge, and New London bridge, the execution of which latter was left to his sons to complete. His great engineering genius was displayed besides in numerous canals for navigation successfully carried out under his direction; in the extensive drainage schemes for the Lincolnshire fens, which he planned and executed; in the magnificent London, and East and West India docks; the Hull docks, where he constructed the first *dredging machine* used in this country. But the catalogue of his works cannot be recited here. He was indefatigable in business, and personally directed minutest details. He was a man of noble presence, of somewhat austere temper, and not very social habits. Chantrey, who made a bust of him, said of it that it was his (Chantrey's) *Jupiter*. Until within a few years of his death he enjoyed excellent health. He died October 16, 1821, at the early age of sixty-one, leaving many magnificent designs to be executed by his two elder sons, GEORGE and JOHN, the latter now Sir John Rennie; he was buried in St. Paul's Cathedral. [L.D.B.G.]

RENNIGER, or RHANGER, MICHAEL, a native of Hampshire, chaplain to Queen Elizabeth, and author of Latin poems, 1529-1609.

RENOU, A., a French painter, 1731-1806.

RENOUARD, ANTOINE AUGUSTIN, a famous Fr. bibliographer, died 1853, aged 98.

RENTI, GASTON JEAN BAPTISTE, a French nobleman, remarkable for his ascetic devotion to religion, and for his charities, 1611-1649.

RENZI, A., an Italian writer, 1780-1823.

REPNIN, NICHOLAS WASILIEWITSCH, Prince, a celebrated Russian diplomatist, 1731-1801.

REPTON, HUMPHREY, a private gentleman, distinguished by his skill in ornamental gardening and architecture, was born at Bury St. Edmunds, in 1752. In 1783 he accompanied Mr. Windham to Ireland, and for a short time held a situation at Dublin, under government. On his return to England, he adopted the profession of landscape gardening, in which he soon obtained extensive celebrity. He published several works on miscellaneous subjects, but his principal productions are on the theory and practice of his art. Died 1818.

REQUENO Y VIVES, VINCENT, a Spanish Jesuit, numismatist, and archæologist, 1743-1811.

REQUIER, J. B., a French writer, 1715-1799.

RESENIUS, JOHN PAUL, a learned divine, son of a Lutheran clergyman of Denmark, 1561-1638. His grandson, PETER JOHN, professor of moral philosophy and jurisprudence at Copenhagen, 1625-88.

RESTAUT, P., a Fr. grammarian, 1696-1764.

RESTIF-DE-LA-BRETONNE, N. E., a fertile and cynical French novelist, 1731-1806.

RESTOUT, JOHN, a French painter, was born at Rouen, in 1692, became director of the Academy of Paintings and died in 1768.—His son, who was also a good painter, and a member of the Academy; died at Paris in 1797.

RESTY, J. A., a Latin poet, 1755-1814.

RETZ, GILLES DE SAVAL, Seigneur De, a French marshal, born 1396, distinguished himself in the wars with the English, and acquired a disgraceful celebrity by his cruelties and infamous debaucheries; hung and burnt 1440.

RETZ, or RAIZ, ALBERT DE GONDI, Marshal De, a native of Florence, who came to France with Catharine de Medici, and was rewarded with the barony of Retz and a marshal's baton, 1522-1601. His brother, PIERRE, Cardinal de Retz, advanced by favor of Catharine, 1533-1616. Their grand-nephew is the subject of the following article.

[Castle of Vincennes, where De Retz was imprisoned.]

RETZ, JEAN FRANÇOIS PAUL DE GONDI, Cardinal De, the hero of the civil wars of the Fronde in the minority of Louis XIV., was the son of Philip Emanuel de Gondi, general of the French Galleys, and was born at Montmirail, 1614. He was educated by St. Vincent de Paul, and destined for the church, but turned out a licentious and turbulent character in his youth, and preferred entering into the intrigues of the court, and heading the popular party opposed to Mazarin and Conde. The only sincere parties in this cabal, for it hardly possesses the dignity of a civil war, though it was marked by all the sufferings of one, was the distressed people, who became the mere tools of ambition and faction. The popular manifestations provoked by De Retz were similar to those which marked the commencement of the French revolution; and the year 1649 was signalized by the resort to arms and the erection of barricades. The court was obliged to leave Paris till De Retz was purchased by a cardinalate, to which he was nominated by the king in 1651; he was then arrested, during the lull which followed, by Mazarin, and remained a prisoner from 1651 to 1654, when he escaped to Spain, and going from that country to Rome, engaged in the intrigues at the papal court. In 1661, the death of Mazarin enabled him to return to France and make his peace with the king; he resigned, however, the titular archbishopric which he had held since the death of his uncle, and received the abbey of St. Denis in lieu of it. The remainder of his life presents a singular contrast with the part we have sketched; he abandoned his magnificent manner of living, and sequestered the greater part of his income to the payment of his debts, amounting to more than a million and a half sterling; twice it is said, he wished to renounce the purple, which he confessed to have purchased too dearly. He died at Paris, universally esteemed, in 1679, leaving 'Memoirs' which are highly valued for their impartiality, and for the sketches of character with which they are replete.

[E.R.]

RETZIUS, A. J., a Swed. botanist, 1747-1821.

REUCHLIN, JOHN, a celebrated German philologist, born at Pfortzheim, in 1455. Having studied the law, and obtained the diploma of licentiate in

that faculty at Poitiers, he was employed in several diplomatic missions; and while at Rome with Everard, count of Wirtemberg, he was received with the distinction due to his talents, and was particularly noticed by Lorenzo de Medici, at Florence. After the renewal of the league of Suabia, in 1500, Reuchlin was appointed judge of a tribunal at Tübingen, which office he held eleven years. In his old age he was reduced to poverty, and was persecuted by the ecclesiastics for opposing Pfeffercorn's design of burning all the Jewish books except the Bible. Reuchlin was the preceptor of Melancthon, and died in 1522. He composed the first Hebrew grammar and lexicon for the use of Christians, and he was the author of several other works.

REUILLY, J. DE, a Fr. traveller, 1780-1810.

REUSCH, J. P., a Ger. philologist, 1691-1754.

REUSNER, N., a German juriconsult and statesman, author of some compilations and Latin poems, 1545-1602. His brother, ELIAS, an antiquary and historian, 1555-1612.

REUSS, J. D., a German philologist, 1750-1837.

REUTH, B., a Russian historian, last century.

REUVEN, P., a Dutch painter, 1650-1718.

REUVENS, JOHN EVERARD, one of the most profound lawyers Holland ever produced, was born at Haarlem, in 1763; studied at Leyden; acquired great reputation at the Hague as an advocate; and was appointed, in 1795, counsellor to the court of justice of the province of Holland. In 1801 he became president of the high court of justice; and under the regal government, in 1806, he was nominated counsellor of state extraordinary, and subsequently vice-president of the council. On the union of Holland to France, in 1810, he became president of the court of appeal at the Hague; but was soon after invited to Paris, and made counsellor of the court of cassation; which office he relinquished, when, in 1814, the independence of his native country was secured, and returned to the presidency he had quitted at the Hague. He went to Brussels in 1816, on a legal mission, and there perished, the victim of a dark conspiracy, the authors of which have never been discovered. His judicial and political knowledge enabled him to fill his different offices with vigor and ability; and he earned a lasting reputation by the criminal code of the Netherlands, which may be said to be almost entirely his work.

REVEL, J., a French painter, 1684-1751.

REVELEY, WILLEY, an English architect and antiquary, was a pupil of Sir William Chambers. He accompanied Mr. Stuart to Greece, and completed the great work on the 'Antiquities of Athens' left by that eminent artist. Mr. Reveley built the church of All Saints at Southampton, and various other structures. Died 1799.

REVELLIÈRE-LEPAUX, LOUIS MARIE, one of the members of the French directory, was born at Montaigne, in 1753, and brought up to the profession of the law. On the breaking out of the revolution, he displayed great ardor in supporting popular opinions; became a member of the Constituent Assembly; and, in 1792, of the National Convention. He procured the decree of the convention, purporting 'that the French nation would give assistance to all oppressed people who wished to recover their liberty;' and voted for the death of the king, and against the appeal to the people. He afterwards opposed Danton, and in vain defended the proscribed Girondists; was compelled to seek for safety in concealment, but returned to Paris after the death of Robespierre. On the creation of the Institute, he was nominated a member of the class of moral and political sciences;

advocated some religious ceremonies which resembled the principles of the theophilanthropists; and was represented as the high-priest of that once prevalent sect. He refused to take the oath of allegiance to Napoleon required from the members of the Institute, and retired to the neighborhood of Orleans, where he lived in obscurity for a time; afterwards returned to Paris, and died in 1824. He left 'Memoirs,' with directions for their being published at a future time.

REVER, M. F. G., a Fr. antiquary, 1753-1828.

REVIUS, J., a Dutch *savant*, 1586-1658.

REWBELL, JEAN BAPTISTE, one of the directors of the French republic, was born at Colmar, in 1746. On being chosen a deputy from the tiers état to the states-general in 1789, he displayed a decided enmity to the existing government. He became attorney-general syndic of the department of the Upper Rhine; and on being nominated a deputy to the convention in 1792, he voted for the establishment of a republic, and strenuously recommended the trial of Louis XVI. After filling several important situations, he was at length raised by his colleagues to the highest magistracy of the state. He held the office of director till 1799, when he was replaced by the Abbé Sieyès; and he died in comparative obscurity, in 1801.

REY, JEAN BAPTISTE, an eminent French musician, was born at Lauzerte, in 1734. While at Nantes, his reputation, as a composer having reached the ears of the court, he was sent for, and appointed chamber musician to the king, with a salary of 2000 francs; and though the revolution interfered with his promised advancement in the royal household, he continued to direct the opera orchestra for more than thirty-five years, and under Napoleon was appointed to superintend that of the chapel royal. He composed a number of operas, &c., and died in 1810.

REY, JOHN, a French physician, of the 17th century, who may be regarded as one of the precursors of the science of pneumatic chemistry. He published an interesting work in 1630, by which it appears he had discovered that the increase of weight in calcined metals arises from the absorption and solidification of air; and on this the antiphlogistic theory of chemistry is, in a great measure, founded. He died in 1645.

REYHER, S., a German *savant*, 1635-1714.

REYN, J. DE, a Flemish painter, died 1678.

REYNA, C. DE, a Spanish Hebraist, 16th cent.

REYNEAU, CHARLES RÉNÉ, an eminent French mathematician, was born at Brissac, in 1656, and entered into the congregation of the Oratory. Having become well acquainted with geometry, and studied the Cartesian philosophy, he taught mathematics and physics at Toulon and Angers. He was the author of 'Analyse Démonstrée,' 2 vols. 4to.; and 'Science du Calcul des Grandeurs.' Died 1728.

REYNER, EDWARD, a Nonconformist divine, was born in Yorkshire, and educated at Cambridge, where he took his degrees in arts, and, about 1627, settled at Lincoln; but in 1662 was ejected from his living, and died soon after. He wrote 'Precepts for Christian Practice,' 'Vindication of Human Learning and Universities,' &c.

REYNIER, JOHN LOUIS EBENEZER, a French general, was born at Lausanne, in 1771. He entered into the army, and in the early campaigns of the French republic he so far signalized himself as to be appointed a general of brigade during the conquest of Holland in 1724. He afterwards served under Moreau, as chief of the staff; and in the memorable

retreat in 1796, as well as on other occasions, gave proofs of his superior military talents. In 1798 he accompanied Buonaparte to Egypt, was present at the battle of the Pyramids, commanded for a time at Acre, overthrew the janizaries, and thus contributed greatly to the victory of Heliopolis; but having subsequently quarrelled with General Menou, he was coolly received by Buonaparte on his return to France. Having killed General d'Estaing in a duel, he was exiled from Paris; but in 1805 he was recalled, and served in Italy. Soon after, he entered into the service of Joseph Buonaparte, at that time king of Naples, and was defeated by the English, under General Stuart, at the battle of Maida. He commanded the Saxons at the battle of Wagram; was engaged, in 1812, in the Russian campaign; was made prisoner at the battle of Leipsic; and, on being exchanged, he went to Paris, where he died in 1814.

REYNOLDS, E., an Engl. prelate, 1595-1676.

[Sir Joshua Reynolds.]

REYNOLDS, SIR JOSHUA, considered the founder of the English school of painting as regards its special characteristics, was born at Plympton in Devonshire, where his father was rector, July 16, 1723. He was intended for the medical profession, but was induced by the perusal of Richardson's Essays on Painting, &c., to take up painting as a profession. A handsome edition of these essays was in 1773 dedicated to Sir Joshua by Richardson's son, comprising -- *The Theory of Painting, Essays on the Art of Criticism, and The Science of a Connoisseur*. Reynolds' first master was Hudson the portrait painter, with whom he was placed in 1741. He first set up as a portrait painter at Devonport, but in 1746 settled in London in St. Martin's Lane. In 1749 he accompanied Commodore Keppel in the Centurion to the Mediterranean, and remained altogether about three years in Italy. He commenced business again in London in 1752, and soon became the most prominent painter of the capital. In 1768, when the Royal Academy was established, Reynolds was unanimously elected president at the first meeting of the members, December 14, of that year, and he was knighted by George III. in consequence. In 1784 he succeeded Allan Ramsay as principal painter in ordinary to the king; and after an unrivalled career as a portrait painter, died at his house in Leicester Square, February 23, 1792. He was buried with great pomp in St. Paul's Cathedral, where a fine statue by Flaxman is placed immediately below the dome, in honor of his memory.

His large fortune, about £80,000, was inherited by his niece, Miss Palmer, who became afterwards marchioness of Thomond. His collection of works of art sold for nearly £17,000. Sir Joshua Reynolds, notwithstanding his careless and feeble drawing, was indisputably a great painter; some of his portraits are among the first masterpieces of the art, whether as simple portraits, or as fancy pieces, as for instance, 'Lord Heathfield' in the National Gallery, of the former class, and 'Mrs. Siddons as the Tragic Muse,' at Dulwich, of the latter. His pictures are necessarily very numerous, their chief excellence is their natural grace, fulness of expression, substantial character, and frequently a charming richness of color and light and shade. His eulogium cannot be better expressed than in the words of Burke:—'He was the first Englishman who added the praise of the elegant arts to the other glories of his country;' 'The loss of no man of his time can be felt with more sincere, general, and unmixed sorrow.' Sir Joshua has bequeathed to posterity besides his paintings, fifteen elegant and valuable 'Discourses,' of which a magnificent edition edited by John Burnet, was published by James Carpenter in 1842. There is a full life of Reynolds by Northcote, two vols. 8vo, London, 1819. [R.N.W.]

REYNOLDS, J. HAMILTON, an English poet, died 1852, aged 59.

REYRAC, FRANCIS PHILIP DELAURENS DE, a French ecclesiastic and poet, 1734–1782.

REYS, ANTHONY DAS, a Portuguese divine, known as a poet and biographer, 1690–1738.

REZEANO, F., an Italian poet, 1731–1780.

REZZONICO, ANTHONY JOSEPH, Count, an Italian nobleman, born at Como, in 1709. He became marshal of the camp, chamberlain to the Duke of Parma, and governor of the citadel. He devoted much of his time to literary pursuits, and produced several, among which are two volumes of poems possessing considerable merit. Died 1795.

RHAY, T., a French controversialist, 1603–71.

RHAZES, or ALBUBECAR MOHAMMED, an Arabian physician, was born in Khorasan about 852, and resided at Bagdad, where he was superintendent of the public hospital. He was the first who gave a distinct account of the small-pox, which disease made its first appearance in Egypt, in the reign of the caliph Omar. Died 932.

RHEINEK, CHRISTOPHER, a German musical composer, born at Memmingen, in 1748. He produced the operas of 'Le Nouveau Pygmalion,' 'Le Fils Reconnoissant,' and 'Rinaldo;' besides the oratorio, 'Der Todgesang Jesu,' and a collection of songs, in 4 vols. Died 1796.

RHENANUS, BEATUS, a learned critic, and one of the restorers of letters in Germany, 1485–1547.

RHENFERD, J., a Ger. Orientalist, 1654–1712.

RHESE, J. D., a Welch philologist, 1534–1609.

RHETICUS, G. J., a Swiss astron., 1514–1576.

RHIANUS, a Greek grammarian, B.C. 200.

RHIGAS, or RIGAS, a modern Greek patriot, born at Velestini, in Thessaly, about 1753. He was soon distinguished for his ready apprehension and extensive acquirements, being intimately acquainted with the ancient literature of Greece, as well as with the Latin, French, German, and Italian languages. Looking forward for an opportunity when his country might throw off the Turkish yoke, he conceived the project of a grand secret society, and among the discontented chiefs who became associated with him, was the pacha Passwan Oglou. He then proceeded to Vienna, which place he made the focus of an extensive correspondence with persons of intelligence

possessing similar principles with himself in various parts of Europe. He also commenced a Greek journal for the instruction of his countrymen, composed a treatise on military tactics, drew up a grand chart of all Greece, in 12 divisions, and translated the travels of Anacharsis the Younger and other French works. But being treacherously denounced to the Austrian government by one of his associates, as a conspirator against the state, he was arrested at Trieste, and ordered to be delivered up to the Ottoman Porte. His conductors, however, fearing to be intercepted by Passwan Oglou, drowned him in the Danube, together with 8 of his companions, who had been arrested at the same time. May, 1798.

RHO, J., an Italian ascetic, 1590–1662.

RHODES, FOSTER, an excellent American naval constructor, died 1846.

RHODE, JOHN GEORGE, an eminent orientalist, of Breslau, in Silicia; particularly distinguished for his scientific researches into the natural history and antiquities of India and Bactria. Died 1827.

RHODES, ALEXANDER DE, a French Jesuit missionary, who in 1618 went to the East Indies, and after residing for some time at Goa, proceeded to Tonquin and Cochin China to preach Christianity; but being, through persecutions, compelled to relinquish his labors there, he returned to Europe, and afterwards engaged in a new mission to Persia, where he died in 1660. He wrote several works, relating chiefly to the progress of the gospel in those parts of the East which he had visited.

RHODES, J., a Danish *savant*, 1587–1659.

RHODIGINUS, CELIUS, a learned Italian, called by Scaliger, who was a pupil of his, the Varro of his age. His proper name was LODOVICO CELIO RICCHERI, 1450–1525.

RHODOMAN, L., a Germ. *savant*, 1546–1660.

RHUNKEN, or RUHNEKEN, DAVID, an eminent critic and professor at Leyden, 1723–98.

RHYNE, WILLIAM FEN, a celebrated Dutch physician and naturalist, born at Deventer, about 1640. Being appointed physician to the Dutch East India Company, in 1673, he remained some time at the Cape of Good Hope, to examine the productions of the country and the manners of the inhabitants; after which he went to Java with the same object, and employed himself in scientific researches. While there, it is said, he made a voyage to Japan, and cured the emperor of a dangerous malady. On his return he published the result of his observations.

RHYZELIUS, ANDREW, a Swedish antiquarian, chaplain to Charles XII., bishop of Lincoping, and member of the Upsala Academy, 1677–1755.

RIBALTA, FRANCISCO, a Spanish painter, 1541–1628. JUAN, his son and pupil, 1597–1628.

RIBAS, JOSEPH DE, a general in the Russian army, was a native of Naples, and born about 1735. Being at Leghorn at the time Alexis Orloff arrived there with his fleet for the purpose of carrying off the natural daughter of the empress Elizabeth, whom Prince Radzivil had taken to Rome, and then abandoned, he assisted in this undertaking, and then went to Russia to obtain from Catherine II. the reward of his services. After attending on the son of the empress by Gregory Orloff, in his travels, he obtained a regiment of carabineers; and in 1790 he commanded, with the rank of admiral, the fleet destined for the attack of Kilia and Ismail, to the success of which he greatly contributed. Having again signalized himself in her service, both as an officer and a diplomatist, the empress, in 1792, made him a rear-admiral, and further rewarded him with a pension of 20,000 rubles.

RIBAS-Y-CARASQUILLAS, F. DE, a Spanish Dominican, and adversary of the Jesuits, 1612-87.

RIBERA, ANASTASIUS PANTALEON DE, a Spanish poet and wit, time of Philip IV., 1580-1629.

RIBERA. See SPAGNOLETTA.

RIBES, ANN ARNAUD DE, a French officer of engineers, born in 1731, was a lieutenant-colonel at the commencement of the revolution, and in 1793 contributed to the capture of Rosas and several other fortified towns, while attached to the army of the eastern Pyrenees. He had afterwards the direction of the fortifications in the isle of Elba; and in 1808 he added to his reputation by triumphing a second time at Rosas over the strength of the fortifications and the resistance of the besieged. Died 1811.

RIBIER, W., a French historian and deputy to the states-general, 1575-1663.

RIBIT, J., a French Hellenist, 16th century.

RIBOUTTE, F. L., a Fr. dramat., 1770-1834.

RICARD, D., a French translator, 1741-1803.

RICARDO, DAVID, celebrated for his writings on finance and statistics, was born in London, of a Jewish family, in 1772. His character for probity, industry, and talent, early procured for him the means of support; and, becoming a member of the stock exchange, he accumulated immense property. In 1810 he appeared as a writer in the *Morning Chronicle*, on the subject of the depreciation of the national currency; he advocated the principles of Malthus concerning population; and published a treatise on 'Political Economy and Taxation,' which affords a luminous exposition of the origin and fluctuation of national wealth and expenditure. In 1819, Mr. Ricardo was elected into parliament for the Irish borough of Portarlington; but he never spoke, except on subjects of finance and commerce, on which occasion he was always attended to with great deference. Died 1823. His works have been collected and published by Mr. M'Culloch.

RICAUT, or RYCAUT, SIR PAUL, an English traveller and historical writer, was the son of a merchant in London; received his education at Trinity College, Cambridge; and in 1661 went to Constantinople, as secretary to the embassy, and there wrote his 'State of the Ottoman Empire.' He was next appointed consul at Smyrna, where, by the command of Charles II., he wrote 'The present State of the Greek and Armenian Churches;' and on his return home he was made secretary to the lord lieutenant of Ireland, a privy councillor, and a judge of the high court of admiralty. William III. employed him as the English resident in the Hanse Towns, where he continued 10 years. Besides the works before mentioned he wrote a continuation of Knolles's 'History of the Turks,' a translation of Platina's 'Lives of the Popes,' and Garcilasso de la Vega's 'History of Peru.' Died 1700.

RICCATI, VINCENT DE, an Italian mathematician and engineer, 1707-1775. His brother, JOURDAIN, a musician, 1709-1790.

RICCHERI. See RHODIGINUS.

RICCI, ANTONIO, an Italian painter, surnamed *Barbalunga*, taught by Domenichino, 1600-1649.

RICCI, C., an Italian painter, 1580-1620.

RICCI, J. B., an Italian painter, 1545-1620.

RICCI, LORENZO, the last general of the Jesuits previous to their suppression by pope Clement XIII., was born at Florence, in 1703; entered into the order of St. Ignatius at the age of 15; became, successively, spiritual director at the Roman college, and secretary of his order; and succeeded, on the death of Centurioni, in 1758, to the office of general. On the suppression of the Jesuits he was confined as

a prisoner in the castle of St. Angelo, and there died in 1775.

RICCI, MATTHEW, a Jesuit and missionary in China, who was in such high favor with the emperor, that he gave him permission to build a church there. Died 1610.

RICCI, M. A., an Italian cardinal, 1619-1682.

RICCI, SEBASTIANO, an Italian painter, who executed in this country the staircase at Montague House, 1660-1734. MARCO, his nephew and pupil, born 1676, died at Venice 1730.

RICCIARELLI. See VOLTERRA.

RICCIO, B., an Italian painter, 16th century.

RICCIO, DOMENICO, generally called *Brusasorci*, an Italian painter, 1494-1567. His son, FELIX, called Brusasorci the Younger, 1550-1605. BAPTISTA, the brother of the latter, and CECILIA, his sister, were also painters.

RICCIOLI, GIOVANNI BATISTA, a learned Italian Jesuit and astronomer, 1578-1671.

RICCOBONI, LODOVICO, an eminent comedian and author, was born at Modena, in 1674, acquired an early reputation on the stage, and was popular both in his own country and at Paris. In 1729 the Duke of Parma appointed him inspector of the theatres in his dominions; but in 1731 he returned to Paris, where he devoted his last years to literature, and died in 1753. He wrote several comedies and poems, besides a 'History of the Italian Theatre,' and other works on dramatic subjects. ANTHONY FRANCIS, son of the preceding, was born at Mantua, in 1707, and was also an actor and a dramatic writer. His comedies were very successful; but what he gained by the stage he spent in foolish attempts to discover the philosopher's stone. Died 1772.—His wife was a celebrated French novelist; but, from the neglect of her husband, she suffered much, and died in poverty, in 1792.

RICE, JOHN, an American Presbyterian divine of Va., and writer on religious subjects, 1779-1831.

RICH, CLAUDIUS JAMES, the distinguished traveller and Orientalist, was born in 1787, near Dijon, in Burgundy, and was brought to England in his infancy, and educated at Bristol. He became so remarkable for his skill in the Eastern languages that he obtained an appointment in the East India Company's service as early as 1803, when in his seventeenth year. In 1807 he resided with Sir James Macintosh, at Bombay, and married his daughter. His researches in Babylonia date from 1811 to 1820, and he died prematurely at Shiraz in 1821. His Oriental antiquities and MSS. were purchased by parliament for the British Museum. His memoirs were published by his widow, and went through a second edition in 1839.

RICH, PENELOPE DEVEREUX, Lady of Lord Robert Rich, was a daughter of the old earl of Essex, and the affianced bride of Sir Philip Sidney. She is the Stella of his exquisitely beautiful love verses, and is admitted to have been the finest woman of her age. The love story of 'Astrophel' and 'Stella,' is one of the most painful romances of real life. It has been illustrated by the graceful pen of Mrs. Jameson among others.

RICHARD I., king of England, surnamed *Cœur de Lion*, the 'Lion-hearted,' was the second son of Henry II. and Eleanor of Guienne, who had been divorced by Louis VII. of France. He was born at Oxford in 1157, and succeeded to the throne by the death of his father in 1189; having previously displayed so haughty and rebellious a spirit, that it had contributed to lay the aged king in his grave. Remorse for his past misconduct was instantly followed

by preparations for a crusade in Palestine, which had been resolved on during Henry's lifetime, in consequence of the progress in arms of the renowned Saladin. On the 1st of July, 1190, Richard met Philip Augustus of France in the plain of Vezelai, and agreed upon the terms of a mutual expedition; he was then accompanied from Marseilles by the English barons, and the kings rejoined company at Messina, the appointed rendezvous of the two armies. Here the romantic episode of Richard's expedition against Cyprus, and his marriage with Berengaria took place. In the middle of 1191 these interesting proceedings ended in the arrival of the armament before St. Jean d'Acre, then and for two years past besieged by the crusaders, under the emperor Frederic. The English monarch immediately became popular among the knights, and took a leading part in the operations of the siege. The fortress surrendered, notwithstanding the efforts of Saladin to raise the siege on the 12th of July, and soon afterwards Philip Augustus departed for France, pretending sickness, but really disgusted with the supremacy of Richard, and far outshone by him in feats of arms. Richard now marched from St. Jean D'Acre at the head of 100,000 men, and defeated Saladin in a general engagement on the road towards Ascalon. This victory put the crusaders in possession of the principal towns along the sea-coast, and furnished such a basis of operations that Richard was enabled to press forward to the capture of Jerusalem. Disaffection among the Christian forces prevented the accomplishment of this design, and Richard, hearing of the perfidy of his brother, John, and Philip of France, concluded a truce with Saladin, and embarked for Europe on the 9th of October, 1192. His fame had already been spread far and wide by the songs of the troubadours, and the reports of the pilgrims. Armed with a heavy battle-axe, he never hesitated to rush single-handed into the midst of the enemy, and such deeds are recorded of him as would be incredible if they were not well at-

[Castle of Tiernsteigen, the prison of Richard.]

tested by eye-witnesses. On the passage home he was shipwrecked near Aquilei, on the coast of Italy, and disguising himself as a pilgrim, he endeavored to reach England by way of Germany. When near Vienna his real character was discovered, and Leopold, duke of Austria, caused him to be arrested, both in revenge of his brother-in-law, the king of Cyprus, and of the contempt that Richard had shown for his flag at Acre. On his captivity becoming known, which was concealed as long as possible, Richard was ransomed by his subjects at the price of 100,000 marks, and arrived in London on the 20th of March, 1194. His contemptible brother, John,

had been in connivance with Philip to usurp the kingdom, and that monarch advised him of Richard's return, with the laconic warning to 'take care of himself, for the devil had broke loose.' Richard, however, generously forgave him, and having been crowned again at Winchester, crossed over to France to chastise Philip. Hostilities were interrupted by a truce, and being resumed again a second truce was agreed upon, both which events occurred within the three years, 1196-1199. In the last-mentioned year Richard was preparing to return to England, when Vidomar, the count of Limoges, discovered a treasure, part of which he sent to Richard as his feudal superior. The latter claimed the whole. Avariciousness could be no part of such a character, but it should be considered that he had been at great costs in his recent wars, and his conscience may have told him that his subjects had paid a far higher ransom for him than he was worth as their sovereign. Provoked at the refusal of the Limousan, Cœur de Lion invested the castle of Chaluz, and haughtily refusing all overtures, threatened to hang the whole garrison as soon as he had taken the place. While reconnoitering this stronghold, he was shot in the shoulder with an arrow by a cross-bow-man, named Bertrand de Gourdon. The wound proved mortal, and Richard expired in the 10th year of his reign, on the 16th April, 1199. The garrison in the meanwhile had been defeated, and the king displayed his usual magnanimity by ordering that Gourdon should be set at liberty. On the contrary, the hapless man was flayed alive and then hung, by order of Marchadee, the leader of the Brabantine soldiers in Richard's army. The fame of Richard Cœur de Lion has been no less widely spread in the East than in his own country, and his daring passed into a proverb among the Saracens. He had qualities also that must have made him a great king, in every sense of the word, had he outlived his martial enthusiasm, or had war been pursued for political ends in those times as in later ages. [E.R.]

RICHARD II., eldest son of Edward the black prince, and of Jane, daughter of Edmund, earl of Kent, was born at Bourdeaux 1366, and succeeded his grandfather, Edward III., 1377. He was called to govern in difficult times, when the nobles were turbulent and powerful, and the commons were just acquiring a knowledge of the power they might possibly exercise; his minority also was disturbed by the continuance of the French wars of his grandfather. At that time the modern principles of taxation were not understood, and disaffection was provoked by the exactions necessary for the public service. A priest, named John Ball, became the orator of the multitude, and the people rushed to arms under Wat Tyler, a poor man, whose daughter had been outraged by the indecent conduct of the collector of the poll-tax. This was in 1381, when the king was only fifteen years of age. Tyler, who lived at Dartford, in Kent, collected a body of 100,000 insurgents under his banner, and having pitched his camp at Blackheath, made a disastrous descent upon the metropolis. The promises of the government caused the greater part of this force to disband, and their leader was stabbed in Smithfield while conferring with the king, by Walworth, mayor of London. Assassination under such circumstances was a dangerous experiment, but Richard at this critical moment, with great presence of mind, rode up to the insurgents, and declaring he would redress their grievances, finally persuaded them to disperse to their homes. By similar means the insurrection, which had spread from county to county, was everywhere

[Richard II., armed.]

suppressed in detail; and when all was supposed to be over the concessions were withdrawn, and commissioners being sent to all parts, supported by a large army, 1,500 of the insurgents were executed. The display of spirit by Richard on this, and a few other occasions subsequently, was mere impulse or empty vanity, unsupported by any steadfast resolve or sense of justice; and the remainder of his reign would be wholly comprehended in the history of his fall, and the assumption of power by a man of stronger will and more politic judgment, in the person of his cousin, Henry Bolingbroke, duke of Lancaster. It is the history of favoritism and weakness on the one hand, giving abundant scope to ambition and strength of resolve on the other. Richard became the prisoner of Henry, was solemnly deposed on the 29th of September, 1399, and was either killed or starved to death in Pontefract castle at the beginning of 1400. The usurpation of the duke of Lancaster, now Henry IV., commenced the civil wars of England between the red and white roses. [E.R.]

RICHARD III., the most execrated of all English princes, was the youngest son of Richard duke of York, and was born at Fotheringhay castle in Northamptonshire, 1452. He was created duke of Gloucester in 1461, on the accession of his brother, Edward IV., who claimed the throne as a descendant of Phillipa, only daughter of the duke of Clarence, who was the second son of Edward III. In 1472 Richard married Ann, widow of the Lancastrian prince of Wales, and daughter of the great Warwick; the sister of that lady having previously wedded his brother Clarence. The latter prince being his elder brother, stood in the way of Richard's ambition, who fomented the intrigues which proved fatal to him; so that on the death of Edward in 1483, Richard became the natural guardian of his nephews, and was appointed legal protector of the kingdom. The elder of the boys was immediately proclaimed king as Edward V., the other was duke of York. The history of the times is only obscurely known, but the tradition of the murder of these princes in the Tower by order of Richard, is in all human probability substantially true, and a darker deed of treachery is not on record in any language. This event took place

about the middle of 1483, and in January, 1484, the succession of Richard was confirmed by a servile parliament, his other rivals, the children of Clarence, having been declared illegitimate by defamation of the usurper's own mother. In about three months afterwards Richard lost his son, the prince of Wales, and within another year the daughter of Warwick followed her child to the tomb. Richard, thus made a widower, proposed to marry the Princess Elizabeth, eldest daughter of his brother Edward, who was destined for the earl of Richmond, the heir of the house of Lancaster. The latter was abroad at the time, but now hastened the preparations for his intended return to deliver England from Richard's tyranny, and in fine, landed at Milford Haven on the 7th of August, 1485. Richard took the field at the head of 15,000 men, and met Richmond at the head of 10,000, with the assurance, however, of aid from Lord Stanley, who commanded another body of 7,000. The encounter took place at Bosworth field, near Leicester, on the 21st of August, and Stanley keeping his promise at the critical moment, secured the victory to Richmond. Richard III. was as brave as he was cruel and politic. As the action grew desperate he fought with the courage of a hero, and making a last determined rush at his opponent, he fell under the number of assailants that closed around him. Richmond then became king under the title of Henry VII., and having married Elizabeth, united thereby the houses of York and Lancaster, and thus

[Richard III., armed.]

terminated the civil wars. In so short a time, passed in expectation of his last struggle, Richard can hardly be said to have reigned, yet he distinguished himself by acts which mark the statesman. Such acts, however, can never be admitted to cancel crime; the first good act is to avoid evil; the first possible right, is its independence of all wrong. [E.R.]

RICHARD, two dukes of Normandy:—RICHARD I., son and successor of William Long-Sword, reigned 993–996. RICHARD II., son and successor of the preceding, 996–1027. A duke of Burgundy, reigned 877–921. A count of Evreux, who accompanied

William the Bastard in his expedition against England, reigned 1037–1067. Two *princes of Capua*:—RICHARD I., succeeded his father as count of Aversa 1059, and was invested with the principality of Capua by the pope, Nicholas II., 1062; died 1078. RICHARD II. succeeded 1091, and, being deposed by his subjects, was re-established by Roger, duke of Apulia, 1098, died 1105. Lastly, a *count of Rhodes*, who died after a long reign about 1135.

RICHARD, bishop of Chichester, died 1253.

RICHARD, surnamed ARMACHANUS, a pious and sensible prelate, who, after having been commissary-general of the university of Oxford and dean of Lichfield, was raised to the see of Armagh in 1347, and honorably distinguished himself by his opposition to the mendicant orders, whose affectation of poverty, superstitious practices, and irregularities, he exposed in his lectures. For this he was obliged to repair to Avignon, to defend himself before pope Innocent VI., who decided against him. Died 1360.

RICHARD OF BURY, a learned statesman and patron of learning, was born at Bury St. Edmunds 1287. He commenced his career as tutor of Prince Edward, afterwards Edward III., became bishop of Durham in 1333, and chancellor and high treasurer of England in 1334. Died 1345.

RICHARD OF CIRENCESTER, so named from his native place, was an historian of the 14th century. He became a Benedictine monk of the abbey of St. Peter, Westminster; devoted his leisure to the study of English natural history and antiquities; wrote 'The Description of Britain,' first published in Latin at Copenhagen, in 1767; and died in 1401.

RICHARD OF CORNWALL, an uncrowned emperor of Germany, son of John, king of England, was born 1209, and first distinguished himself in Palestine. He was crowned king of Germany at Aix-la-Chapelle to the prejudice of Conrad in 1257, and was remarkable for the wisdom of his administration; died 1272.

RICHARD OF ST. VICTOR, a Scottish divine and Scripture commentator of the 12th century.

RICHARD, C., a Fr. mathematician, 1589–1664.

RICHARD, C. L., a political and ecclesiastical writer, author of 'Dictionnaire des Sciences Ecclesiastiques,' born in Lorraine 1711, shot at Mons 1794.

RICHARD, CLAUDE LOUIS, an excellent botanist, was born in 1754. He died in 1821. His grandfather was one of Bernard de Jussieu's gardeners at the Jardin du Roi at Paris, and his father had the superintendence of Louis XVth's garden at Auteuil. Inheriting thus a love for botany, his passion for the study was carried to the extreme. His parents wished him to study theology, as they had good prospects for him in the church, but neither tears, entreaties, nor threats, could prevail upon him to follow the line of life chalked out for him, and his father at last turned him out of doors at the age of fourteen, with a miserable pittance to support him. Nothing daunted by this rigorous treatment, the young enthusiast made his way to Paris, where he studied botany under Bernard de Jussieu, and in a few years afterwards received an appointment to proceed as botanist to Cayenne and the other French colonies in America. He remained there for eight years, and during that time made extensive collections both in botany and zoology. Arriving in France in 1789, he found the men in power too much absorbed in their own struggles for existence to attend to scientific pursuits. He had thus the mortification to find the little money he had previously accumulated gone, his health injured and himself cruelly neglected. Unfortunately for science

these disappointments and blighted hopes rendered him misanthropical and churlish. He shut himself up from the scientific world, and henceforth studied for himself alone. The fine collections he made, thus became of no avail to his countrymen, and he was exceedingly chary even in communicating to any one the results of his researches. In 1795 he was appointed professor of botany at the Ecole de Médecine. His lectures were excellent and well attended; and fortunately a portion of them has been published by one of his pupils from notes taken at the time. This work and a few memoirs which he published in some of the scientific journals show that he possessed original views in botany, and could express them with great conciseness and accuracy. He had in view the intention of producing a new philosophy of botany in the style of Linnæus, as also a new terminology of the science, but he did not live to bring them to maturity. [W.B.]

RICHARD, G., a French missionary, 1764–1832.

RICHARD, J., an ecclesiastical wr., 1639–1719.

RICHARD, J. P., a Fr. preacher, 1743–1820.

RICHARDSON, J., an African traveller, d. 1851.

RICHARDSON, JOHN, a learned Irish prelate, au. of 'Observations on the Old Testament,' d. 1654.

RICHARDSON, JOHN J., an American judge of South Carolina and member of Congress, d. 1850.

RICHARDSON, JONATHAN, a painter and author, was born about 1665. He quitted the profession of a scrivener to become a pupil of Riley, the portrait painter, whose niece he married. After the death of Kneller and Dahl, he was considered at the head of his profession in this country. He was the author of an 'Essay on the Art of Criticism in Painting,' 'An Argument in behalf of the Science of a Connoisseur,' 'Account of Statues, Bas-reliefs, Drawings, and Pictures, in Italy;' 'Notes and Remarks on Paradise Lost,' &c. Died 1745. In the two last-mentioned performances he was assisted by his son, who died in 1771.

RICHARDSON, JOSEPH, a lawyer and poet, was born at Hexham, in Northumberland; was entered of St. John's College, Cambridge, in 1774; became a student of the Middle Temple in 1779, and was called to the bar in 1784. He wrote 'Criticisms on the Rolliad' and 'Probationary Odes for the Laureateship,' two satirical works on public characters, which were very popular at the time, and 'The Fugitive,' a successful comedy. Died 1803.

RICHARDSON, SAMUEL, the son of a joiner, was born in Derbyshire in 1689. After passing through a village school, he was bound to a printer in London, and, after having been a few years foreman to his master, set up in business for himself. He prospered as rapidly as his good conduct and industry deserved, was appointed printer of the journals of the House of Commons, and enjoyed domestic happiness in two successive marriages. He was always fond of reading, was a voluminous letter-writer, especially to ladies, and furnished prefaces to the booksellers. But his authorship went no farther than this, till he had completed his fiftieth year. He then agreed, on the request of two publishers, to compose a series of familiar and instructive letters; and, when he had worked for three months at his task, what he produced was his novel of "Pamela, or Virtue Rewarded." It was published in 1740. It was the first novel of domestic life which had broke in on the unnatural romances (for Defoe had barred himself from polite patronage by his unlucky choice of subjects); and it had therefore novelty, besides its great merit in natural and minute description, to recommend it to the extraordinary popularity which

it immediately attained. In 1749 it was followed by 'The History of Clarissa Harlowe,' a novel whose pathos is so profound as to be positively painful. In 'The History of Sir Charles Grandison,' published in 1753, the author aspired somewhat above the sphere of manners which he was best qualified to describe; but, in spite of this, and of the wearisome prolixity which reigns here yet more than in his other novels, this is really a fine picture of the ideal gentleman. It is to the immortal honor of Richardson that he, the earliest of our modern novelists (unless Defoe should be ranked among them), produced works untainted by the immorality which disgraced Fielding and his other successors. He passed his old age in comfort and fame, being only a good deal spoiled by the homage of his admirers, particularly the ladies who flocked about him. He died in 1761. [W.S.]

RICHARDSON, WILLIAM, a poet and miscellaneous writer, was a son of the minister of Aberfoyle, and was educated at the university of Glasgow. He accompanied Lord Cathcart, who had been his pupil, to Russia; and was for more than 40 years professor of humanity at Glasgow. Among his works, all of which are marked by elegance and erudition, are 'Anecdotes of the Russian Empire,' 'Essays on Shakspeare's Dramatic Characters,' 'Observations on the Study of Shakspeare,' poems and tales. Died 1814.

RICHARDSON, W., a learned antiquarian and minister of the Church of England, 1698-1775.

RICHARDSON, WILLIAM M., a chief justice of the Superior Court of New Hampshire, and author of 'The New Hampshire Justice,' 'The Town Officers,' and editor of N. H. Reports. Died 1838, aged 64.

RICHE, CLAUDE ANTHONY GASPARD, a French physician, distinguished as a naturalist, 1762-1797.

RICHELET, CÉSAR PETER, was born at Chemignon, in 1631, and died in 1691. He compiled a dictionary, full of information, but interspersed with much satire. It was first published in 1680, in 1 vol. 4to.; but was afterwards enlarged to 3 vols. folio.

RICHELIEU, ARMAND JEAN DU PLESSIS, Cardinal, was born at Paris on the 5th of September, 1585. The family name was Plessis, but many members of it became distinguished in connection with the territorial title of Richelieu. Armand was a younger son, and was consecrated bishop of Luçon in 1607. It was a period when the possession of the great ecclesiastical dignities was not supposed in France to turn the habits of a young man of noble family from the usual licentious pursuits of his rank, but Richelieu was fonder of power than of pleasure, and he soon acquired it by ably and rigidly performing the functions of his high office. His court success is said to have commenced with a harangue which it fell to him to deliver to the young monarch, Louis XIII., and which secured the attention and approval of the queen mother, Mary of Medicis. He received his cardinal's hat in 1622, and two years afterwards became chief minister of the crown. His ministry was remarkable for the development of great systems, and the chief of them was the breaking down the territorial power of the nobility, and confirming the influence of the crown, which had long before brought the commons under subjection to a perfect despotism. His career was distinguished at once by daring and success. All who resisted him, including the highest princes of the blood, were remorselessly executed as common criminals, and thinking it necessary to his purpose, he drove his old patroness the queen dowager into exile. He broke the power of the Calvin-

ists by besieging and taking their stronghold Rochelle. But his antipathy to them seems to have originated less in religious intolerance than in a desire to uproot those singular secular privileges which made them supreme even over the royal prerogative in the districts assigned to them. In counteracting the power of Austria, which was the second main principle of his ministry, he used for his purpose the Calvinists of the north, and the Mahommedans of the south, with thorough impartiality. He combined with his courage and great talent many ludicrous weaknesses. He died on the 4th of December, 1642. [J.H.B.]

RICHELIEU, LOUIS FRANCIS ARMAND DU PLESSIS, Duke of, a French marshal, descended from the same family as the cardinal, was born in 1696. After the death of Louis XIV. he was admitted into the court of the regent, Duke of Orleans, and he largely participated in its profligacy. He was sent to the Bastille in 1716, for fighting a duel with the Count de Gacé, and again in 1719, as an accomplice with the Spanish ambassador, in a conspiracy against the regent. He distinguished himself under Villars, and afterwards at Kehl, Philippsburgh, Dettingen, and Fontenoy; conquered Minorca, forced the Duke of Cumberland to submit to the capitulation of Glossterseven, and devastated the electorate of Hanover. In 1781 he obtained the rank of dean of the French marshals; and he concluded his long career, varied as it was with acts of heroism and villany, in 1788.

RICHELIEU, ARMAND EMANUEL DU PLESSIS, Duke of, grandson of the preceding, was born at Paris, in 1776, and eventually became prime minister to Louis XVIII. He emigrated at the commencement of the revolution, entered the Russian service, and distinguished himself at the siege of Ismail, for which he was rewarded with the rank of major-general. In 1801 he revisited France, when Buonaparte endeavored to attach him to his service; but he returned to Russia, and in 1803 he was appointed governor of Odessa, which city, by his prudent measures, he raised from insignificance to the height of prosperity. On the restoration of the Bourbons, he took his seat in the chamber of peers; accompanied Louis XVIII. to Ghent; and, returning with him to Paris after the battle of Waterloo, was appointed president of the council of ministers, and placed at the head of the foreign department. He soon resigned his post, but again held the office of prime minister in 1820, and died in 1822.

RICHER, ADRIAN, a distinguished French historian, 1720-1798. His brother, FRANCIS, a juriconsult and writer on mythology, &c., 1718-1790.

RICHER, E., a learned French divine, author of a work on ecclesiastical and political power, which gave rise to much controversy, 1560-1631.

RICHER, E., an elegant and learned French writer, author of 'La Nouvelle Jerusalem,' d. 1835.

RICHER, H., a dramatic writer, 1685-1748.

RICHER, J., a French astronomer, died 1696.

RICHERAND, BARNO, a celebrated French surgeon and writer on physiology, died 1840.

RICHMAN, G. W., a native of Livonia, prof. of natural philosophy at Petersburg, 1711-1753.

RICHMOND, CHARLES LENNOX, duke of, secretary of state and grand master of artillery, 1735-1806. His nephew, and heir of the same name, governor of Plymouth, lord-lieutenant of Sussex and governor of Canada, 1764-1812.

RICHMOND, LEGH, a clergyman of the established church, was born at Liverpool, in 1772; became chaplain to the Lock Hospital, London, and afterwards rector of Turvey, in Bedfordshire. He

is principally known as the author of 'Annals of the Poor,' containing the 'Dairyman's Daughter,' and other devotional tales, written with great force, originality, and pathos. He also wrote a work, entitled 'The fathers of the English Church,' &c. Died 1827.

RICHTER, A. G., a Ger. surgeon, 1742-1812.

[Richter.]

RICHTER, JEAN PAUL FRIEDRICH, was born in 1763, in the principality of Baireuth, in Franconia. His father, a Lutheran village pastor, was so poor that his son's education was carried on with much difficulty; and, dying before Jean Paul reached the university, he left his family in great distress. The youth, bent on attaining scholarship, and intending at first to be a clergyman, struggled on for a while at Leipzig, often wanting bread; and in 1783 he found his way to the press with a work (the 'Grönländische Prozessen,') which showed him to have already opened his peculiar vein. Another of his strange sketches, 'An Extract from the Devil's Papers,' lay unpublished for several years, during which Jean Paul remained in the depths of penury. In 1793 he opened a school in the little town of Schwarzenbach, in his native province; and then also he attracted public applause for the first time, by the publication of 'The Invisible Lodger.' Thus encouraged, he devoted himself entirely to authorship, poured forth his works with rapidity, and became one of the most celebrated among the German writers of his time. He shifted his residence often till 1803, and then settled at Baireuth for the remainder of his life, which closed in 1825. Jean Paul wrote philosophical treatises, such as his 'Levana; or the Theory of Education,' and the 'Introduction to Æsthetics' (Vorschule der Æsthetik). But his fame rests on a kind of compositions which are almost, yet not quite, novels or romances. They unite narrative, description, and reflection; they pass from the wildest flights of grotesque and original humor to the depths of pathetic tenderness; they contain as much of striking thought as ever was embodied in any work of fiction, and as much of poetic imagination as ever was expressed in prose. His thinking is unsystematic, but often wonderfully suggestive as well as acute; and his style is entirely his own, and so eccentric, that his books are not less difficult for Germans than for foreigners. Among the works which fill his sixty volumes a few may be named:—'Hesperus,' 'Quintus Fixlein,' 'Biograph-

ical Diversions under the Skill of a Giantess,' 'Flower, Fruit, and Thorn-Pieces,' 'The Journey of the Regimental Chaplain Schmelzle,' 'Titan,' 'The Life of Fibel,' 'The Comet, or Nicolaus Markgraf.' [W.S.]

RICHTER, OTTO VON, a Russian traveller, who accompanied Lindmann, a learned Swede, to Egypt and Nubia, where they discovered several remains of ancient architecture. They returned to Cairo, in 1815, and proceeded by water to Jaffa: at Acre the two friends separated, and Richter went alone by the way of Tyre and Sidon, to Balbec, after which he traversed Syria as far as the mountains of Lebanon, and went to Tadmor, in the desert; but on his return to Smyrna, in 1817, he died.

RICIMER, a Roman patrician and general, of Swedish origin, regarded as the ablest commander of the age. From the period of his first great success against the enemies of Rome in 456, he deposed and created the emperors at his will. In 472 he stormed Rome, and gave it up to the pillage and cruelty of his soldiers. He died soon after.

RICIUS, P., a learned German, 16th century.

RICKMAN, JOHN, F.R.S., clerk assistant at the table of the House of Commons. This gentleman first brought himself into public notice by the great attention he paid to the means of obtaining accurate statistical knowledge of the population, &c. of Great Britain. He was for 38 years officially connected with the House of Commons, and his life may be best described as one course of laudable zeal in the service of the public. He lived on terms of intimacy with Southey, Coleridge, Charles Lamb, Telford, the celebrated engineer, and many other men, whose congenial tastes and acquirements rendered the connection mutually pleasant and desirable. Born 1771, died 1841.

RIDDLE, EDWARD, an English mathematician and a writer on nautical astronomy, died 1854, aged 67.

RIDER, JOHN, an Irish prelate, 1562-1633.

RIDER, WILLIAM, an English divine, several years under-master of St. Paul's School, and lecturer of St. Vedast, Foster Lane. He published a 'History of England,' a 'Commentary on the Bible,' and other compilations. Died 1785.

RIDGEWAY, JACOB, at the time of his death considered the wealthiest man in the city of Philadelphia, died 1843, leaving behind him six millions of dollars!

RIDGLEY, T., a nonconf. divine, 1667-1734.

RIDINGER, J. E., a Germ. painter, 1695-1767.

RIDLEY, GLOSTER, an English divine and theologian, best known as a dramatic writer and poet, 1702-1774. His son, JAMES, a chaplain in the army, author of 'Tales of the Genii,' died 1765.

RIDLEY, NICHOLAS, a martyr of the English Church during the Marian persecution, was born in Northumberland, and educated at Newcastle-on-Tyne, at the commencement of the sixteenth century. He was soon known for his high attainments in theological learning, and his promotion commenced by his appointment as chaplain to the archbishop of Canterbury (Cranmer) in 1537. On the accession of Edward VI. in 1547, he had become a popular preacher of the doctrines of the reformation; in September of that year he was appointed bishop of Rochester, and in 1549, on the deprivation of Bonner, bishop of London. Ridley and Cranmer worked heartily together during the reign of Edward VI., but with this difference, that Cranmer was more willing to trim his sails to the current winds, and Ridley stood firmer by his individual convictions. It was a long time before he gave up the doctrine of the

corporal presence in the eucharist, and he never abandoned his preference for episcopalian distinctions, the use of vestments, and the priestly manner of administering the Lord's supper. Ridley tried in vain to reconcile Hooker, the bishop elect of Gloucester, to the retention of these 'rags of superstition,' and the latter underwent a long imprisonment before he

[Balliol College, Oxford, where Ridley and Latimer were burnt.]

submitted to wear them. It is to Ridley, in short, more than to any other prelate, that we are indebted for the English liturgy as it exists at present; and no one acquainted with the history of Edward the Sixth's reign will require to be told under what difficulties it was formed. When the health of Edward was declining in 1553, he induced that prince to endow the public charities which bear his name, viz., Christ's Hospital, St. Bartholomew's, St. Thomas's, and Bridewell; and on the king's death joined the party who endeavored to place the crown on the head of Lady Jane Grey. Though he submitted himself to Mary, he was committed to the Tower in July, 1553, and in March, 1554, was conveyed to Oxford, together with Latimer and Cranmer, to be tried for heresy. He walked to the place of execution in his episcopal robes, a striking proof of his regard for those distinctions, and was burnt with Latimer on the 16th of October, 1555, in front of Balliol college. He endured the torments of the stake with great courage, and as the flames did not reach the vital parts so soon in his case, Latimer expired before him. His works have been republished by the Parker Society. [E.R.]

RIDLEY, Sir THOMAS, a learned civilian, of the same family as the preceding, but born at Ely, was educated at Eton, and at King's College, Cambridge; he afterwards became a master in chancery, and vicar-general to the Archbishop of Canterbury; and died in 1628. He wrote 'A View of Civil and Ecclesiastical Law.'

RIDOLFI, C., an Italian painter, 1570-1644.

RIDOLFI, C., a painter and historian, 1602-60.

RIEBOV, G. H., a German theologian, 1708-74.

RIEDELSEL, FREDERICA CHARLOTTE LOUISA, Baroness, wife of Colonel Riedesel, who commanded the troops at Brunswick, employed in the English service in America, in 1777, accompanied her husband, and wrote an interesting account of her adventures, entitled 'Voyage de Mission en Amérique,' &c. She returned to Europe in 1783; and, having lost her husband, fixed her residence at Berlin, where she died in 1808.

RIEDELSEL, J. H., a Germ. diploma., 1740-85.

RIEDINGER, JOHN ELIAS, a native of Ulm in Suabia, dist. as a painter of animals, 1695-1757.

RIEGGER, J. A. G., a Ger. canonist, d. 1795.

RIEGO, RAFAEL DEL, a Spanish patriot officer, was

born in the Asturias, in 1785. The enthusiasm with which he embraced the cause of independence rendered him a zealous patriot, and a long imprisonment in France afforded him leisure to contemplate the miseries of his countrymen. Before he returned to Spain, he visited Germany and England. Till 1820 every effort for liberty had been followed by exile, and the horrors of the inquisition; nearly all the chiefs who favored liberty were in confinement; but the valor of Riego was at once triumphant; he delivered Quiroga from the hands of his gaolers, and, on the 1st of January, his troops proclaimed the constitution. General O'Donnell made his victory difficult, but he was victorious; and in the first sitting of the Cortes, in 1822, they appointed him their president. At the height of his glorious career his moderation was most conspicuous; he avoided parade, and displayed real magnanimity, prudence, and disinterestedness. Fortune, however, changed; Ferdinand VII. was reinstated; and the popularity of the brave Riego exciting the jealousy of those in power, he was calumniated as a promoter of anarchy. Still he preserved the confidence of the people, and again appeared in arms to assert the liberty of his country, but it was destined to fall before foreign foes. He was taken prisoner after the surrender of Cadiz, and conveyed to Madrid on the 2d of October. His wife and brother came to England, where they hoped to obtain friends for Riego; but their supplications were vain, and he was condemned to an ignominious death, viz. that his limbs should be sent to different parts of the Peninsula, and his head kept at Las Cabezas, where the constitution was first declared. He suffered, Nov. 7, 1823; and his wretched wife died of grief a few months after.

RIEN, J., a German agriculturist, 1739-1807.

RIENZI, or RIENZO, COLA, or NICOLA GABRINO DE RIENZO, famous in Roman history for his assumption of the dictatorship in that capital, was born of humble parents about 1310, and was known in 1340 as a friend of Petrarch, and like the poet, was distinguished by his love of the ancient republican institutions of Rome, and by his profound knowledge of antiquity. He was also a great orator, and was in the habit of addressing the people on their political degradation and the oppression of the nobles. His most frequent theme was the destruction of the noble monuments of ancient Rome, the conversion of palaces and tombs into fortresses by the rival factions, and the total abandonment of the city by the popes, who then resided at Avignon. His eloquent appeals borrowed force from the ruins, in the midst of which he addressed the people, and it was always easy to give that political meaning to his harangues that the anarchy of the times dictated. The papal authority favored a movement which held out some prospect of depressing the factions, and on the 20th of May, 1347, Rienzo was accompanied to the capitol, at the head of an immense multitude, by the bishop of Orvieto, the pope's vicar, and was then appointed the people's tribune with his sanction. In this character Rienzo, surrounded with a regular militia, re-established the administration of justice, sent ambassadors to other states, and was courted, as the mediator between them and the pope, by some of the principal sovereigns of Europe. His power lasted no longer than the December of the same year, when a reaction took place, headed by the great families he had depressed, and Rienzo, abandoned by the people, sought refuge in Bohemia. In 1352 he was conveyed a prisoner to Avignon, and would have been executed, but his own eloquence, the intercession of his friend Petrarch, and the death of Clement VI., saved

him. Innocent VI., who succeeded Clement, found it politic to restore Rienzo to his dictatorship, but he was now hampered with restrictions, and with the necessity of raising supplies of money for the pope. These circumstances, and the severities he found it necessary to exercise, alienated the city, and a popular tumult being excited, Rienzo was massacred on the 8th of October, 1354. The popes continued to reside at Avignon till 1376, a period, in the whole of seventy years, bewailed by Petrarch as a time of barbaric devastation. [E.R.]

RIES, FERDINAND, a celebrated musician, was born at Bonn, in Germany, in the year 1784. His father and grandfather were both musicians, the one having been first violinist, and the other leader of the orchestra, at Cologne. The young Ferdinand received his musical education from Bernhard Romberg, and from Albrechtsberger. In 1801 he removed to Munich, and afterwards to Vienna, where he became the first acknowledged pupil of Beethoven, and where he laid the foundation of his future fame as a composer. In 1805 he was drawn as a conscript for the French army, but having in early life lost the sight of one eye from small-pox he was dismissed as being disqualified to serve as a soldier. He afterwards visited Russia, where he remained till 1813, when he arrived in England and was admitted a member of the Philharmonic Society, where several of his compositions were performed with great applause, and where he was much admired as a piano-forte player. Having acquired a well-merited independence he returned to his native town, when he produced two German operas and an oratorio 'David.' He died at Frankfort in 1838. [J.M.]

RIETER, H., a Swiss painter, 1751-1818.

RIGAUD, HYACINTH, a celebrated painter, called the Vandyke of France, 1659-1743.

RIGAUD, STEPHEN PETER, Savilian professor of astronomy in the university of Oxford, was born at Richmond, in Surrey, and may almost be said to have been the inheritor of scientific pursuits, both his father and grandfather having filled the office of observer in the royal observatory at Kew. His contributions to the scientific works of the day were both numerous and valuable. Born 1775, died 1839.

RIGAULT, N., a Fr. philologist, 1577-1654.

RIGHINI, V., an Italian composer, 1758-1812.

RIGHTWISE, or RITWYSE, JOHN, a classical scholar, and master of St. Paul's school, died 1532.

RIGORD, RIGORDUS, RIGOTTUS, or RIGOTUS, a French ecclesiastic and historian of Philip-Augustus of France, died about 1207.

RIGORD, J. P., a French antiq., 1656-1727.

RIKER, RICHARD, the Recorder of the City of New York for nearly thirty years. Died 1842, aged 69.

RILEY, JOHN, an eminent painter, born in London in 1646. After the death of Sir Peter Lely he was appointed painter to the king, and rose greatly in public estimation; but, according to the opinion of Lord Orford, he was so distrustful of his own merit, that his modesty and humility were great impediments to his advancement. He died in 1691.

RILEY, JAMES, an American sea captain, author of 'Riley's Narrative,' containing an account of his captivity and sufferings in Northern Africa, died at sea, 1840.

RINALDI, ODESICO, a learned ecclesiastical historian, born at Treviso, 1595, died 1671.

RINCON, A. DE, a Spanish painter, 1446-1500.

RING, JOHN, an eminent surgeon, was born near Salisbury, in 1751; was a pupil of the two Hunters, at St. George's Hospital; and practised in the metropolis, with deserved reputation, till his death,

which occurred in 1821. He was a zealous defender of vaccination, to support which he established an institution at a considerable expense, and he also liberally gave his assistance to other charities. Besides his medical works, he occasionally composed Latin and English verse, with fluency, spirit, and elegance; among which should be noticed his 'Translation of the Works of Virgil, partly original, and partly altered from Dryden and Pitt,' 2 vols.

RINGELBERGIUS, JOACHIM FORTIUS, German SHERCK, a distinguished Flemish philos., 16th cent.

RINGGLI, G., a Swiss painter, 1575-1635.

RINGGOLD, SAMUEL, a brevet-major in the U. S. Army, born in Maryland, was killed in an engagement with the Mexicans in Texas, 8th May, 1846, at the age of 50. He organized the corps of flying artillery in the army and brought it into efficient use.

RINK, F. T., a German Orientalist, died 1811.

RINNANN, S., a Swiss mineralogist, 1720-92.

RINNUCCINI, OTTAVIO, a Florentine poet, who went to France with Mary de' Medici, and is said to have been the first who invented the opera, or musical drama, in the year 1600. He wrote three pieces, 'Daphne,' 'Eurydice,' and 'Ariadne.' Died 1621.

RIOJA, FRANCISCO DE, an eminent Spanish poet, was born in 1600, and became librarian and historiographer to Philip IV. Besides his poems, he produced several excellent comic dramas, and other pieces adapted for scenic representation. Died 1659.

RIOLAN, JEAN, a French physician of considerable celebrity, born at Paris in 1580, and died there in 1657, aged seventy-seven. He was a vigorous controversialist, and his somewhat numerous treatises were collected into 1 volume folio, in 1650. In conjunction with La Brosse he was the founder of the Royal Botanic Garden at Paris, to establish which he had obtained permission from Mary de Medicis, the mother of Louis XIII. [J.M.C.]

RIPAULT, L. M., a French *savant*, 1775-1823.

RIPLEY, GEORGE, or GREGORY, an English alchymist and poet, time of Henry VII., died 1490.

RIPPERDA, JOHN WILLIAM, Baron De, a celebrated adventurer, was born of a noble family in Groningen, in 1680; served some time as colonel of infantry in the Dutch army; and, in 1715, was sent on a mission to Spain, where he acquired such an ascendancy over Philip V., that the monarch took him into his service, made him prime minister, and created him a Duke. At length he fell into disgrace, and was imprisoned in the castle of Segovia, whence he escaped in 1728, and came to England. In 1731 he went to Morocco, where he was favorably received by Muley Abdalla, and declaring himself a convert to the Mahometan religion, and taking the name of Osman, he obtained the chief command of the Moorish army at the siege of Ceuta. But the Moors being defeated, he fell from his second elevation; and, retiring to Tetuan, he there died in 1737.

RIQUET, PETER PAUL DE, the engineer of the noble canal of Languedoc, to the execution of which he devoted the whole of his fortune, 1604-1680. This canal unites the Mediterranean with the Bay of Biscay, and the works were completed by Riquet's two sons.

RISBECK, G., a Dutch historian, 1750-1786.

RISDON, TRISTRAM, a native of Devonshire, author of a 'Survey' of that county, 1580-1640.

RISLEY, T., a puritan divine, 1630-1716.

RITCHIE, JOSEPH, an English traveller, who, in 1819, in conjunction with Captain Lyon, engaged in the mission to explore the interior of Africa. They

set out from Tripoli, and reached Mouzouk, the capital of Fezzan, where for some months they resided in circumstances of distress, arising from the want of funds, heightened by the treacherous conduct of Mukin, the bey of that country. Mr. Ritchie fell a sacrifice to the hardships and vexation he experienced; but captain Lyon returned to England, and published his well-known 'Narrative' in 1821.

RITSON, ISAAC, a medical pupil, distinguished as a professional and miscellaneous wr., 1761-89.

RITSON, JOSEPH, an English lawyer and antiquary, was born at Stockton, in Durham, in 1752; settled in London as a conveyancer, and purchased the office of high-bailiff of the Savoy; and died in 1803. As an antiquary, particularly in our early national poetry, he exhibited much industry and intelligence; but his morbid singularities of temper, and his avowed contempt for religion, more than counterbalanced whatever merit he might have otherwise possessed. It would, however, be uncharitable not to attribute his imperfections to a species of long protracted mental derangement, of which distressing malady he died in 1803. His principal publications are, 'A Collection of English Songs,' 3 vols.; 'The English Anthology,' 3 vols.; 'Metrical Romances,' 3 vols.; 'Biographia Poetica,' &c.

RITTANGELIUS, or RITHANGEL, JOHN STEPHEN, professor of Oriental languages at Konigsberg, author of several books founded on his Judaical learning, died about 1652.

RITTENHOUSE, DAVID, a celebrated American mathematician, was born in Pennsylvania, in 1732. In 1769 the American Philosophical Society employed him to observe the transit of Venus; and he afterwards constructed an observatory, where he made some important discoveries. After the revolutionary war, he was appointed director of the mint, and treasurer of his native province. He also had the degree of LL.D. conferred on him, and he succeeded Franklin as President of the Philosophical Society. Died 1796. Dr. Rittenhouse is regarded by his countrymen as the Newton of America. That he possessed great talents and industry is indisputable; and it is more than probable that his exertions in the cause of science contributed in no small degree to the diffusion of a taste for mathematical and physical knowledge in the United States.

RITTER, J. B., a German chemist, 1762-1807.

RITTER, JOHN WILLIAM, a celebrated German philosopher, was born at Samitz, in Silesia, in 1776. The study of electricity occupied his chief attention; and in 1798 he started the idea that the phenomena of animal life are connected with galvanic action; but, though highly scientific, he advocated the reveries of animal magnetism, &c. He wrote 'Physico-Medical Memoirs,' 3 vols., and other works. Died 1810.

RITTERSHUYS, CONRAD, an eminent civilian and philologist, born at Brunswick, in 1560. He became professor of law at Altorf; wrote some works on civil law, and notes upon Greek and Latin authors. Died 1618.—NICHOLAS RITTERSHUYS, his son, became professor of feudal law at Altorf, where he died in 1670. He published a collection, entitled 'Genealogia Imperatorum, Regum, Ducum, Comitum,' &c., 4 vols. folio.

RITWISE. See RIGHTWISE.

RIVARD, D. F., a French mathematician, 1697-1778.

RIVAROI, ANTHONY, Count De, an able French writer, was born at Bagnols, in Languedoc, in 1757, and settled at Paris, where he formed an acquaint-

ance with the most eminent literary characters of the age; but, on the breaking out of the revolution, he went to Germany and obtained the patronage of Prince Henry of Prussia. He was much admired for his powers of wit and satire; and died at Berlin, in 1801. His chief works are, 'Discours sur l'Universalité de la Langue Française,' 'L'Enfer,' translated from Dante; 'Lettres sur la Religion et la Morale,' 'Petit Almanach des grands Hommes,' and 'Lettres à la Noblesse Française.'

RIVAROLA, A., an Italian painter, 1607-1640.

RIVAUT, DAVID, a French mathematician, born at Laval, about 1571, who became tutor in mathematics and military tactics to Louis XIII., and was made a counsellor of state. Died 1616.

RIVAUTELLA, ANTONIO, a native of Piedmont, dist. as an archæologist and bibliop., 1708-53.

RIVAZ, PETER JOSEPH DE, a skilful French mechanist and chronologer, born in 1711. He made a watch which had the singular property of winding up spontaneously, invented an improved pendulum, &c. He also drained the mines of Pontpeau, in Brittany, and made many mechanical discoveries. Died 1772.

RIVE, JOHN JOSEPH, a French bibliographer, was born in 1730, at Apt, in Provence. He was brought up to the church; but, on the breaking out of the revolution, he became a furious anarchist, and ended a turbulent life at Marseilles, in 1792. He wrote numerous works, the most important of which is, 'La Chasse aux Bibliographes et Antiquaires mal avisés,' 2 vols.

RIVET, A., a French Calvinist, 1572-1651.

RIVET DE LA GRANGE, ANTHONY, a learned Benedictine, author of a 'Literary History of France,' 1683-1740.

RIVIERE, C. F., Duc De, an emigrant noble and officer in the army of Condé, who was governor of the young duc de Bourdeaux; born 1765, condemned to death as a spy of the Bourbons, but saved by Josephine, 1804, died 1828.

RIVIER, L., a French physician, 1589-1655.

RIVIERE, MERCIER DE LA, a celebrated French political economist, who obtained the post of counsellor of the parliament of Paris in 1747; was afterwards made intendant of Martinique; and, on his return, published his noble work, entitled 'L'Ordre naturel et essentiel des Sociétés Politiques.' The singularity of his schemes and his high pretensions were ridiculed by Voltaire, Grimm, and others; but had some of his precautionary advice been attended to, it is possible that the revolution, which he lived to witness, would not have taken place. Died 1794.

RIVIERE, P. J. H. LA. See LARIVIERE.

RIVIERE, ROCH LEBAILLIF, Sieur De La, a celebrated empirical physician and astrologer, died 1605.

RIVINUS, the Latinized name of ANDREW BACHMAN, a Ger. phys. and philologist, 1600-56.

RIVINUS, AUGUSTUS QUIRINUS, but whose family name was Bachmann, an excellent botanist, was born at Leipzig in 1652. He died in 1723. The son of a learned father, he soon became equally distinguished himself; and filled the chair of physiology and botany at the university of his native town. He was a correspondent of John Ray's, and published a classification of plants about the same time as he did. His system was founded on the flower, on the number, regularity and irregularity, of the petals. He was the first to abandon the division of plants into trees, shrubs, and herbaceous plants, an arrangement which was still clung to by Tournefort and Ray. His controversy with the latter upon this subject, is the chief thing which has made Rivinus

known to the botanists of this country; though the value of his works and his great merits as a botanist, entitled him to higher consideration than he has hitherto received at their hands. Plumier has named a genus of plants after him, *Rivina*. [W.B.]

RIZI, J., a Spanish painter and art-writer, 1595-1675. His brother, FRANCIS, a painter and architect, 1608-1685.

RIZZIO, RIZZIO, or RICCI, DAVID, the son of a music and dancing-master at Turin, was born there in the earlier part of the 16th century. His musical abilities procured him notice at the court of Savoy, while his talents as a linguist caused him to be selected by the ambassador from the grand duke to Mary, queen of Scots, as a part of his suite. In 1564 he first made his appearance at Holyrood House, where he soon became so great a favorite with the queen, that he was appointed her secretary for foreign languages. The distinction with which he was treated by his royal mistress excited the envy of the nobles, and the jealousy of Darnley. A conspiracy, with the king at its head, was accordingly formed for his destruction; and before he had enjoyed two years of court favor, the Lord Ruthven and others of his party were introduced by Darnley himself into the queen's apartment, where they assassinated the unfortunate object of their revenge, who fell at the feet of his royal mistress, having received no less than 56 stabs in her presence. A.D. 1566.

ROA, M. DE, a Spanish historian, died 1637.

ROBBIA, L. DELLA, an Ital. sculptor 15th ct.

ROBERT, earl of Annandale, father of Robert Bruce, who became king of Scotland, was related to the blood royal by his mother, Isabella of Scotland. He was the competitor of Baliol for the crown on the death of Alexander III. in 1285. Died soon after the battle of Falkirk, which was fought 22d July, 1298.

ROBERT I., king of Scotland. See BRUCE.

ROBERT II. and III. See STUART.

ROBERT, surnamed 'The Strong,' regarded as the stock of the Capet dynasty, died 866.

ROBERT, king of France, son of the preceding, received the crown at Soissons from the lords opposed to Charles the Simple 922, killed 923.

ROBERT, called 'The Devout,' king of France, shared the throne with his father, Hugh Capet, 988, succeeded him as sole king 996, died 1031.

ROBERT, emperor of Constantinople, 1219-28.

ROBERT, emperor of Germany, 1400-1410.

ROBERT, *first* of the name, duke of Normandy, called 'Le Magnifique,' and 'Le Diable,' succeeded his brother, Richard III., in 1027, or 1028. Having gone on a pilgrimage to the Holy Land, he was poisoned at Nicæa in Bithynia, 1035. His natural son, WILLIAM THE CONQUEROR, succeeded him.

ROBERT II., surnamed 'Short Shanks,' son of the latter, obtained the duchy of Normandy after his father's death, 1087, died the prisoner of his brother Henry, at Cardiff Castle, 1134.

ROBERT, called 'The Old,' duke of Burgundy, third son of King Robert, was invested with the duchy by his brother Henry I., 1032, and died 1075. ROBERT II. succeeded his father, Hughes IV., before his death, 1272, and was married to Agnes, daughter of St. Louis, died 1305.

ROBERT, count of Burgundy, reigned 1303-15.

ROBERT, duke of Bar, reigned 1351-1411.

ROBERT, count of Evreux, reigned 989-1037.

ROBERT, the *first* of the name, count of Flanders, second son of Baldwin V., succeeded his nephew, Arnoul, 1072, died in Palestine 1093. ROBERT II., son and successor of the preceding, greatly distin-

guished by his exploits at Jerusalem, the crown of which was offered to him; died 1111. ROBERT III., reigned 1305-1322.

ROBERT I., count of Artois, third son of Louis VII., and brother of St. Louis. Having accompanied the latter into Egypt, he was killed at the battle of Mansourah 1250. ROBERT II., a posthumous son of the preceding, was distinguished in the second crusade, and was killed in a battle with the Flemings near Coutrai 1302. ROBERT III., grandson of Robert II., born 1287, was mortally wounded in a battle with the French, and died in London 1343.

ROBERT OF ANJOU, king of Naples, distinguished in the struggle of the middle ages between the Guelphs and Ghibellines, was the third son of Charles II., and succeeded that sovereign by a decision of the pope in 1309. It is not easy to express the real principles at issue between those parties, but in general terms, the Ghibellines were the friends of the ascendancy of imperial government, and the Guelphs were identified with the separate nationalities under the ascendancy of the Church of Rome. Hence, the Guelph sovereigns were often on the side of the popes, and were always opposed to the emperors of Germany and their allies. With the crown of Naples conferred upon him to the prejudice of his nephew, Carobert, Robert of Anjou received the remission of all the debts of his father to the papal see, and, besides that, the lordship of several cities in Piedmont, and the alliance of the Guelph cities of Tuscany; the advantages which he offered in return being the combined resistance of Italy to the pretensions of Henry VII. The policy of Robert was to temporize, and hold his power in reserve rather than hazard a battle: and he was known to say that he rather gloried in the title of poet and philosopher (to which he had some claim) than in that of king. His championship of the church lasted from 1310 to 1324, when the Neapolitan and Roman armies were beaten, and Raimond of Cordova, who commanded them, taken prisoner. Robert, however, in the interval, had acquired Genoa, and defended his acquisition with some show of military talent against the Ghibellines of Lombardy, in 1318. In all his other projects he was disappointed. Two attempts to conquer Sicily failed, and his only son, Charles, after being defeated in his attempts to carry on the war, died in Tuscany, 1328. Robert endeavored to sustain the fortunes of his house, by marrying his daughter, Joan, to prince Andrew, son of his nephew, Carobert, who had become king of Hungary, with what result may be seen in another article (JOAN OF NAPLES). He died, esteemed by his own subjects, 1343. [E.R.]

ROBERT OF AUXERRE, a French monk, author of a chronicle of that place, died 1212.

ROBERT OF GENEVA, an antipope, elected under the name of Clement VII., in opposition to Urban VI., 1378, died 1394. It was this election which commenced the famous schism of the West.

ROBERT OF GLOUCESTER, an old annalist, supposed to have been a monk, reign of Edward IV.

ROBERT OF LINCOLN, bishop of that see, and one of the most learned men of his age, died 1253.

ROBERT OF VAUGONDY, GILES, geographer to Louis XV., 1688-1766. DIDIER, his son and successor, 1723-1786.

ROBERT, FRANCIS, a modern geographer, born at Chalons, in France. In 1780 he obtained the title of royal geographer; in 1789 he joined the most active partisans of the revolution; was nominated mayor of the commune of Besnote, in 1793;

and, in 1797, was chosen a member of the council of five hundred. The latter part of his life was spent in travelling; and he died at Heiligenstadt, in Saxony, in 1819. Besides some useful elementary works on geography, &c., he published his 'Travels in Switzerland,' and a 'Description of France.'

ROBERT, HUBERT, an eminent French painter, was born at Paris, in 1732, and may be considered the first artist of the French school who studied with effect the decline and ruin of the monuments of ancient architecture. He resided in Italy several years, and during that time he painted the gardens and cascades at Rome in a most masterly manner. On his return to France he obtained admission into the academy; but his merit could not screen him from persecution in the revolution, and he was thrown into prison, where he amused himself by designing, even though he expected every hour to be dragged to the scaffold. At length he obtained his release, and continued in the exercise of his profession till his death, in 1808.

ROBERT, PETER FRANCIS JOSEPH, a French revolutionary statesman, born near Givet, in 1743. Becoming secretary to Danton, he was elected a deputy to the convention, in which he voted for the death of the king. Having married Mademoiselle Keralio, he adopted the literary profession, and wrote several political works. — His wife, LOUISE FELICITE DE KERALIO, was born at Paris in 1758, and died at Brussels, in 1821. Among her various works were 'Histoire d'Elizabeth, Reine d'Angleterre,' 5 vols.; 'Amélie et Caroline,' 5 vols., &c.; besides several translations from English and Italian authors.

ROBERTI, JOHN BAPTIST, Count, an Italian writer, was born in 1719. He was successively professor of philosophy in the college of Brescia, director of that at Parma, and, lastly, superior of the one at Bologna. He acquired great reputation by his writings, which relate to polite literature generally, and form 15 vols. Died 1786.

ROBERTI, J., a learned Jesuit, 1562–1651.

ROBERTIS, DENIS DE, an Italian ecclesiastic, professor of philosophy and theology at Paris, dist. as an orator, poet, and astrologer, died 1342.

ROBERTS, B. C., an antiquar. wr., 1789–1810.

ROBERTS, EMMA, a lady of distinguished literary talent, and an early friend of the highly gifted but ill-fated Miss Landon. Miss Roberts was the author of 'Memoirs of the Rival Houses of York and Lancaster, Historical and Biographical,' 2 vols.; 'Oriental Scenes, Sketches, and Tales,' &c. She died at Poonah, in India, Sept. 1840; the object of her mission thither having been the further illustration of life and manners in the East.

ROBERTS, F., a puritan divine, 1609–1675.

ROBERTS, P., a Welsh divine, died 1819.

ROBERTS, WILLIAM, an Am. writer, author of an account of the discovery and natural history of Florida, 1763.

ROBERTSON, JOSEPH, a minister of the Church of England, author of an 'Introduction to the Study of Polite Literature,' an 'Essay on Female Education,' and other works, 1726–1802.

ROBERTSON, PETER, a Scotch judge, author of a book of poems, and famous for his conviviality and wit, b. in Edinburgh 1794, d. 1855.

ROBERTSON, S. G., a Fr. aeronaut, died 1837.

ROBERTSON, THOMAS, a dignity in the church in the reigns of Mary and Elizabeth, author of some grammatical tracts in Latin, 16th cent.

ROBERTSON, DR. WILLIAM, was born in 1721, at Borthwick, in Mid-Lothian, where his father was then the parish minister. He went through the

usual education for the Church of Scotland, and in his twenty-second year became minister of the rural parish of Gladsmuir, in Haddingtonshire. He speedily displayed, in the ecclesiastical courts, that ability as a debater and orator, which afterwards, assisted by the weight of his literary reputation and his exemplary character, made him the leader of one of the two great parties in the church. In his retired manse he busied himself also with literature, associated with the men of letters who were then gathered in the Scottish capital, and in 1755–6 co-operated with Blair and Adam Smith in their attempt to establish an 'Edinburgh Review.' History of Scotland during the reigns of Mary There, too, he wrote his first historical work, 'The and of James VI.' It was received with great favor, and appreciated by none more highly than by David Hume, between whom and Robertson there was a cordial good-will, in spite of literary rivalry and serious differences of opinion. Both in this and in his other works, Robertson shows himself an admirable story-teller, writing with remarkable animation, and in a style which, though not possessing Hume's ease, is wonderfully correct; and he was also a conscientious and successful investigator of original authorities. In the year of his first publication he removed to Edinburgh, being appointed to one of the city churches; and in 1762 he became also Principal of the University. About this time he refused a proposal from the government to take orders in England, with a view to his being made a bishop; and in 1764 he was named historiographer-royal for Scotland. His literary industry was not checked, either by his success or by his multifarious occupations and his close attention to his pastoral duties. In 1769 he published his most masterly work, 'The History of Charles V.,' and two other productions less valuable followed, 'The History of America' in 1777, and 'An Historical Disquisition concerning Ancient India' in 1791. Of his pulpit eloquence, to which a warm tribute is paid by Dr. Erskine, his friendly colleague, though his opponent in the church courts, no specimen has been printed except one sermon. His death took place in 1793.

[W.S.]

ROBERTSON, WILLIAM, an Irish divine, author of 'An Attempt to explain the words Reason, Substance, Person, Creeds, Orthodoxy, Catholic Church, Subscription, and Index Expurgatorius.' For this publication he was rewarded by the University of Glasgow with the degree of D.D., and was afterwards master of the Wolverhampton grammar school, 1705–1783.

ROBERTSON, W., a grammarian, 1650–1686.

ROBERVAL, GILES PERSON DE, an eminent geometer, professor of mathematics in the College Royal of France, author of numerous memoirs, and party to a controversy with Descartes, 1602–1675.

ROBESPIERRE, FRANCOIS JOSEPH MAXIMILIEN ISIDORE, the chief actor in the French revolution, was born at Arras in 1759. His father was of English origin, by profession an advocate, and though not rich, as few could be at a provincial bar, he was sufficiently well off to pay for the education of his children. Maximilien, therefore, was sent to Paris, and educated for the same profession, at the college of Louis le Grand, where Camille Desmoulins was his fellow-student. At the outbreak of the revolution he was but thirty years of age, yet he had already acquired a literary and professional celebrity in his native province, and possessed so much of the public confidence that he was sent as a deputy to the estates-general. Like many others in that as-

sembly whose names, in the course of the next five years, filled every mouth in Europe, Robespierre was unknown and unmarked as a man of any likelihood, and was destined to remain so until the popular applause had been exhausted by a Necker, a Lafayette, and a Mirabeau. Of all those assembled, however, he was the only man who went with a predetermined conviction, with a design as complete as his own devotion to it proved to be constant, and with a nature so impassible that his heart would never prevent him from adopting whatever means might recommend themselves to his conscience as necessary. His character was that of a man formed by study, whose sentiments were fashioned as of cold, polished steel, and whose sense of justice, if it came warm from the heart in early youth, had hardened into marble, human in its proportions, incorruptible in its nature, but statue-like in its frigid insensibility. Such was Robespierre as he played his part on the stage of public events, yet this man apparently so insensible, had a brother whom he loved, and who in return almost idolized him; a sister to whom he had given up the little independence he had inherited from his father; and all those cherished memories of a first love, to which the heart in secret clings but the more fondly, as the outward features are moulded into indifference by disappointment. To state the whole truth, the friends of Robespierre, and his political colleagues, exhibited the utmost devotion for his person, and the object of a later attachment, on his part, could never comprehend the maledictions heaped upon his memory; he was so pure, so virtuous, so gentle as she remembered him! These facts may be incomprehensible, but they are such as we find on record, and no public life can be understood if the private character and the circumstances created by it are insufficiently known. Robespierre's sense of justice, and his indifference to the means of accomplishing it, may account for his public influence, but they would leave the devoted friendship of a Lebas, a St. Just, and of a brother well acquainted with his private life inexplicable unless there were some chord in his heart that responded to it. The secret of that devotion must be sought in their knowledge of his character, and their admiration of the perfect command that Robespierre possessed over his sensibilities, and the subjugation of his whole nature to a stern logic, working by mathematical rule, and resolved to extract the symmetrical order of his dreams out of the elements around him, regardless of all human feeling. For a long time this disposition remained unknown, and few could have supposed that his studied manners and his sickly countenance concealed the real hero of the revolution. Such, however, was the fact. Robespierre was deeply read in the history of the Grecian and Roman republics, and next to his admiration for the examples set by the free states and heroes of antiquity, may be mentioned the *Contrat Social* of Rousseau. These were the models according to which he had formed his ideal of a state, and whether a Mirabeau declaimed in the tribune, or a Necker and a Roland contrived in the cabinet, he advanced steadily, but with a deadly certainty, towards his object. During the early sittings of the estates-general, he was the close observer of those who represented public opinion in that body, but said little himself; but when the discussion of the constitution came on, he frequently occupied the tribune, and grew bolder in the expression of his republican sentiments as he found them acceptable to the people. Trial by jury, the enfranchisement of the slaves, the liberty of the

press, the abolition of capital punishment, were among the special subjects advocated by him. It was on a question of very different import, however, that he was first recognized as the man of the people. We must here briefly review events. In May, 1789, the states-general had assembled at Versailles. In June, the third estate or commons had virtually rebelled against the crown, and being joined by some of the clergy and nobility, had assumed the title of a national assembly, against which the guards had refused to act. In July the Bastille was destroyed, the national guard enrolled under Lafayette, and the 'Rights of Man' promulgated as the basis of a constitution; the national assembly then changed its title to that of constituent assembly. In the course of the next three months the revolutionary journalism commenced, and the creation of clubs; the first of these was the *Breton's Committee*, which changed its name successively to *French Revolution Club*, *Club of the Friends of the Constitution*, and *Jacobin's Club*, so called from its meeting in the hall of a Jacobite convent; it was definitively formed on the 6th October, 1789. Soon after it the *Cordeliers*, a still more violent body, agitated by Danton and Camille Desmoulins, was formed; and, in May, 1790, the *Club of Feuillants*, which was intended to rally the constitutionalists against the Jacobins. In one or other of these clubs all the characters who figured in the reign of terror rose to note, and most of the orators in the constituent assembly were in alliance with them. Chief of these was Mirabeau, who died suddenly in March, 1791, and with him expired the hopes of the court ever to come to an understanding with the people. Shortly after, therefore, in the month of June, the king and the royal family attempted to fly, and being arrested at Varennes, were brought back to Paris. This was Robespierre's opportunity. The people had lost their idol in Mirabeau, and were now in a state of the highest excitement and exasperation. The orator addressed the assembly in the dispassionate and well studied periods customary with him, and demonstrated by arguments drawn from antiquity, and by quotations from the *Contrat Social*, that the king was responsible to the people as their chief magistrate, intrusted with certain executive functions, but himself forming no part of the national representation. From this moment Robespierre took the place up to which he had steadily advanced from the beginning, as chief of the revolutionary movement, and he now began to hint that the constitution was only a first step in the end to be achieved. Soon after, in September, 1791, that document was completed and formally accepted by the king; and the day following, the first biennial parliament, or legislative assembly, met for business; this body was composed wholly of new members by the advice of Robespierre, who was crowned with oak leaves, and being placed in a carriage, from which the horses had been detached, was drawn through the streets by the enthusiastic people, who proclaimed him the 'real defender of their rights.' In the June previous Robespierre had been appointed public accuser at the criminal tribunal of Paris, and he retained this function till April, 1792, when he resigned it in order to devote himself to the popular cause in the Jacobin's Club. He studiously preserved himself free from all taint of violence or inconsistency, and yet acquired such influence in this body that he was named one of the new municipality after the insurrection of August, and in this capacity had to bewail the prison massacres; on this occasion he betrayed more sensibility than on any other in the course of his history.

The convention met in September, and Robespierre, supported by an immense popularity, became one of its members, and entered upon the last eventful stages of his political journey. The first event was an accusation commenced against him by Barbaroux, who accused Robespierre of an attempt to concentrate the public authority under his own hands in the Paris municipality; this, however, ended in words. The fate of the king was then decided on by the majority of all parties. Robespierre said little, but his words were, as usual, cold and decisive; there was no rational doubt that the king must die, though he said it with regret, in order that the republic might live. The temper and policy of Robespierre was that of reason incarnate, and the lives of men, or thousands of men, were admitted into his balance of probabilities, as so many figures in a mathematical problem. The fate of the king and the other members of the royal family hardly required the acceleration given to it by his hand; the real struggle for him, as he felt conscious, was with the two great parties who would resist the dictatorship at which he was determined to arrive; these were the *Girondins* and the *Montagnards*, the former including nearly all the respectability, talent, and eloquence of France; and the latter, the atheism and immorality. Robespierre's calculation of means was admirably ingenious, but it was still such as the circumstances dictated. The most scrupulous were to be sacrificed first, by aid of those less so; the effect of which would be to throw all the odium of the terror upon the last and worst class, whom the dictator would then, in the face of the admiring world, vanquish himself; thus Robespierre the Apollo, born of France the Latona in the midst of her terrors, was to vanquish the dreaded sea monster, and institute the new Pythian games. This programme was exactly followed. The struggle with the Girondins was terminated by the proscriptions of the 31st May and 2d of June, 1793; the Dantonists, who stood next on the roster, fell with their chief on the 5th of April, 1794; and there now remained the vile faction of Hebert and Chaumete. Perhaps Robespierre had not calculated on the remains of the vanquished parties forming a coalition with these scoundrels against him; such, however, was the case when he commenced the last struggle, by calling the Jacobin leaders and proconsuls to account for their atrocities. The critical hour was the 27th of July, 1794, called, according to the republican calendar, the 9th Thermidor. A month previous Robespierre had withdrawn from the Committee of Public Safety, and completely isolated himself from the men he had doomed to destruction; in this interval the committees of death (those of Public Safety and General Surety) had grown more insatiate of blood daily. In a speech of remarkable daring Robespierre apostrophized the men of violence, and, as he well knew, staked his life upon the issue of it in the convention. The conspiracy against him in that body instantly betrayed itself, and he proceeded to the club of Jacobins; their enthusiasm was immense, and they urged him to arrest the two committees, and march upon the convention. This he absolutely refused to do, as an act that would brand him with the name of tyrant, and the next day, repeating his visit to the national representatives, was arrested by that body in the midst of a tumultuous scene; the younger Robespierre, Lebas, St. Just, and Couthon, stood by him nobly, and became his fellow-prisoners. There might now have been a fierce struggle, but Henriot, mad with drunkenness, who should have headed the troops of the municipality, was arrested by the officers of the convention

at the very moment when the prisoners were released and conveyed to the Hotel de Ville by Fleuriot, Pagan, and Coffinhal. Robespierre remained passive, and refusing to lend his sanction by word or gesture to any illegal act against the convention, was seized again by the soldiers of Barras, a small party of whom, conducted by Leonard Bourdon, forced their way into the *Salle de l'Egalite*. Here, it has been repeatedly said Robespierre attempted to destroy himself, and was found with his jaw shot through; it is now proved, however, that it was the cowardly act of his enemies as they entered the room. He spoke no word and betrayed no emotion after his arrest, though he was subjected to every conceivable indignity and insult. The formalities at the bar of Fouquier Tinville soon gone through, Robespierre and his party were conveyed to the scaffold. His end is thus recorded: 'Before the knife was loosened the executioners pulled off the bandage which enveloped his face, in order to prevent the linen from deadening the blow of the axe. The agony occasioned by this drew from the wretched sufferer a cry of anguish that was heard to the opposite side of the Place de la Revolution; then followed a silence like that of the grave, interrupted, at intervals, by a dull sullen noise; the guillotine fell, and the head of Robespierre rolled into the basket. The crowd held their breath for some seconds, then burst into a loud and unanimous cheering.' It was the second day only after Robespierre had made his last desperate effort for the Republic in the National Convention, July 28th, 1794. [E.R.]

ROBESPIERRE, AUGUSTIN BON JOSEPH, called *the Younger*, brother of the preceding, was born at Arras 1764, and became a deputy to the convention 1792. He was the devoted friend of his brother, and came forward to share his fate in the convention on the 8th Thermidor: the previous year he had opposed himself with great courage to the sanguinary proceedings of the pro-consuls. When his brother was arrested, and Lebas had shot himself dead, Augustin threw himself from a window of the Hotel de Ville, which, however, only broke his leg. He was executed with the elder Robespierre and his colleagues the following day.

ROBESPIERRE, CHARLOTTE, sister of the preceding, took up her abode at Paris when they became members of the convention, and had for her admirer Fouché, who was no favorite of the dictator. She was arrested on the 9th Thermidor, but soon after set at liberty and pensioned. Her 'Memoirs' contain some interesting particulars. Died at Paris 1834.

ROBILANT, ESPRIT BEN NICOLAS DE, a Sardinian officer, engineer, and mineralog., 1724-1801.

ROBIN, JEAN, a French botanist, keeper of the Garden of Plants, 1550-1597. His account of the king's garden was published 1601. VESPASIAN, a brother of Jean, was also a botanist.

ROBINET, J. B. R., a Fr. writer, 1735-1820.

ROBINS, BENJAMIN, an English mathematician of great genius and eminence, was born at Bath, in 1707; was a teacher of mathematics, became engineer-general to the East India Company, wrote 'New Principles of Gunnery,' and was the real narrator of Lord Anson's 'Voyage round the World,' though it was published under the name of Walter. Died 1751.

ROBINS, J., an astronomer, died 1558.

ROBINSON, ANASTASIA, a public singer of some eminence, in the early part of the last century. She was placed under the tuition of the celebrated Dr. Croft and Signora Cuzzoni Sandoni; and though she

never ranked as a first-rate vocalist, she sang at the opera for some years, more admired perhaps for her personal charms, accomplishments, and irreproachable conduct, than for her acknowledged talents. At length she quitted the stage, in consequence of her marriage with the Earl of Peterborough, though the connection was not publicly acknowledged till some years after it took place. Died 1750.

ROBINSON, SIR FREDERICK, an English officer, who reached the rank of general in the British army, was born on the banks of the Hudson, in the state of New York. He was the son of Colonel Beverly Robinson, an American loyalist, whose house near West Point was the scene of Arnold's intrigues preparatory to his treason, which led to Major Andre's execution. He entered the British army in 1777, served against the Americans in the war of the Revolution, and of 1812. Died in England in 1852, at the advanced age of 89.

ROBINSON, JOHN, an English Puritan minister, who removed to Holland with his congregation, from which came the first New England settlers to America. Died 1625.

ROBINSON, MARY, a poetess and miscellaneous writer, whose maiden name was Darby, was born in 1758, at Bristol. At the age of 15 she was married to an attorney of the name of Robinson, which precipitate step appears to have embittered the rest of her life. Being reduced in circumstances, she had recourse to the stage, and made her first appearance at Drury Lane in the character of Juliet, in which she was instructed by Mr. Garrick. Her reception was very flattering, and she continued to perform in various characters till her representation of Perdita, in the 'Winter's Tale,' when her beauty attracted the admiration of the Prince of Wales (afterwards George IV.) in consequence of which she quitted the stage, and became his mistress. This connection, however, was but of short duration. In 1784 she had the misfortune to be attacked by a violent rheumatism, which progressively deprived her of the use of her limbs, and she was partly dependent on her pen for the means of living. She wrote a number of poetical pieces under the name of Laura Maria; besides which she was the author of 'Vancenza,' a romance; 'Poems,' 2 vols.; 'Walsingham,' a novel, 4 vols.; her 'Memoirs,' 4 vols., &c. Died 1800.

ROBINSON, ROBERT, a nonconformist minister, born at Swaffham in Norfolk, 1735, died a convert to Socinianism 1790. He wrote on the question which has again become the subject of public discussion, concerning marriage with a deceased wife's sister, a 'History of Baptism,' &c.

ROBINSON, THOMAS, a minister of the Church of England, author of 'Scripture Characters,' &c. Born 1749.

ROBINSON, THOMAS, an English naturalist, was an episcopal clergyman, and held the rectory at Ousley, in Cumberland, where he died 1719. His long residence in the neighborhood of a mountainous and mineral district led him to turn his attention to the study of mineralogy, geology, &c. He wrote an interesting 'Essay towards a Natural History of Westmoreland and Cumberland,' &c.

ROBISON, JOHN, professor of natural philosophy at Edinburgh, was born at Boghall, in Stirlingshire, 1739, and died in 1805. He is chiefly remarkable as the author of a book which attracted considerable attention at the close of the century, entitled 'Proofs of a Conspiracy against all the Religions and Governments of Europe, carried on in the Secret Meetings of Free Masons, Illuminati, and Reading Societies.' This work ran through

four editions in the course of a few months, but it now only creates a smile. It contains some curious particulars, however, bearing on the French revolution. Mr. Robison, when a youth, was attached to the royal navy, and was in the boat with General Wolfe when he landed on the heights of Abraham before the taking of Quebec. He is known as a writer in natural philosophy, and as a contributor to the 'Encyclopædia Britannica.' [E.R.]

ROBORTELLO, FRANCESCO, an Italian writer, was born at Udina, in 1516, and died at Padua, where he was professor of rhetoric and philosophy, in 1567. He wrote 'De Vita et Victu populi Romani sub Imperatoribus' and other treatises, besides editing the works of many of the classic poets.

ROB ROY, which signifies *Robert the Red*, was a celebrated Highland freebooter, whose true name was Robert Macgregor, but who assumed that of Campbell, on account of the outlawry of the clan Macgregor by the Scotch parliament, in 1662. He was born about 1660, and was the younger son of Donald Macgregor of Glengyle, said to have been a lieutenant-colonel in the service of James II., by his wife, a daughter of Campbell of Glenfalloch. Like other Highland gentlemen, Rob Roy was a trader in cattle previous to the rebellion of 1716, in which he joined the adherents of the Pretender. On the suppression of the rebellion, the Duke of Montrose, with whom Rob Roy had previously had a quarrel, took the opportunity to deprive him of his estates; and the latter began to indemnify himself by a war of reprisals upon the property of the duke. An English garrison was stationed at Inversnaid, near Aberfoyle, the residence of Rob Roy; but his activity and courage saved him from the hands of his enemies, from whom he continued for some time to levy black mail. The time of his death is uncertain, but he is known to have survived the year 1733, and died at a very advanced age.

ROBSON, GEORGE FENNEL, an eminent draughtsman and landscape painter in water-colors, was born at Durham; and as he showed a decided taste for the art while a mere child, he was placed under the tuition of Mr. Harle, a drawing-master in that city. His progress was extremely rapid; and before he attained the age of 20 he visited London, where his talents soon became known. His first publication was a view of his native city, the profits of which enabled him to undertake a journey to the Scottish highlands, with whose wild and romantic scenery he had long wished for an opportunity to make himself acquainted. In the dress of a shepherd, with a wallet at his back, and Scott's poem, 'The Lay of the Last Minstrel,' in his pocket, he wandered over the mountains, winter and summer, till he had become familiar with the various aspects they presented under different changes of seasons, and was enabled to lay up a rich store of materials for the improvement of his taste and skill. On his return to London, where he took up his future residence, he published 'Outlines of the Grampian Mountains,' which, as well as his future productions, obtained him patronage and fame. One of his last and best pictures was a 'View of London Bridge before Sunrise.' He died in 1833. Among the engravings and published works of Robson may be mentioned, 'Picturesque Views of English Cities,' with descriptive letter-press by J. Britton, F.S.A.; and 'Landscape Illustrations of the Waverley Novels,' engraved by the Findens.

ROBY, JOHN, whose varied acquirements and benevolence of disposition have gained him extensive fame, was long a banker at Rochdale in Lancashire, the 'Traditions' of which county he made known to

the world in two works, published respectively in 1829 and 1831. His first literary production was 'Sir Bartram,' a poem in six cantos, published in 1815; and his last was his 'Seven Weeks in Belgium, Switzerland, Lombardy, &c.,' the result of a continental tour made in 1838. But besides conducting an extensive business, and engaging in literary pursuits with a view to publication, Mr. Roby was in the habit of delivering lectures on various subjects of literature and science; and many a large audience has been delighted with the homely but forcible illustrations of the banker, poet, and historian. His active career was cut short by the calamity which befell the 'Orion,' on her passage from Liverpool to Glasgow, June 17th, 1850.

ROCABERTI DI PERELADA, JUAN TOMASO, general of the Dominicans, distinguished as a writer in favor of the papacy, born in Spain 1624, d. 1699.

ROCCA, ANGELUS, a learned ecclesiastic, born at Rocca Contrata, in the marche of Ancona, in 1545. He studied at Rome, Venice, and Padua; and in 1579 obtained a place in the Vatican, where also he had the superintendence of the apostolic press. His works display great learning, and chiefly relate to morals and history. At his death, which happened in 1620, he left his valuable library to the Augustinian monastery at Rome, on condition that it should be accessible to the public.

ROCHAMBEAU, JEAN BAPTISTE DONATIEN DE VIMEUR, Count De, marshal of France, was born at Vendome, in 1725, and entered the army at the age of 16. In 1746 he became aide-de-camp to Louis Philippe, duke of Orleans; and afterwards obtaining the command of the regiment of La Marche, distinguished himself at the battle of Lafeldt, where he was wounded; he obtained fresh laurels at Creveldt, Minden, Corbach, and Clostercamp; and, having been made lieutenant-general, was, in 1780, sent with an army of 6000 men to the assistance of the United States of America. Having embarked in Rhode Island, he acted in concert with Washington, first against Clinton, in New York, and then against Cornwallis. Rochambeau was raised to the rank of marshal by Louis XVI., and, after the revolution, he was appointed to the command of the army of the north; but he was superseded by more active officers, and, being calumniated by the popular journalists, he addressed to the legislative assembly a vindication of his conduct. A decree of approbation was consequently passed in May, 1792, and he retired to his estate, near Vendome, with a determination to interfere no more with public affairs. He was subsequently arrested, and narrowly escaped suffering death under the tyranny of Robespierre. In 1803 he was presented to Buonaparte, who granted him a pension, and the cross of grand officer of the legion of honor. His death took place in 1807; and his 'Mémoires' were published in 1809.

ROCHE, E. DE LA, a Fr. mathematic., 16th cent.

ROCHE, J. DE, a French commander, of Swiss descent, famous for his defence of the castle of Villemont against the duc de Rohan in 1621. It is remarkable that his portrait, still in possession of the family, bears a striking resemblance to that of Oliver Cromwell.

ROCHE, JAS., an English antiquarian and miscellaneous writer, died 1853, aged 83.

ROCHE, J. B. L. DE LA, a doctor of the Sorbonne, author of a panegyric of St. Genevieve, died 1780.

ROCHE, P. L. LEFEBVRE DE LA, a French clergyman and learned writer, about 1740-1806.

ROCHE, REGINA MARIA, a novelist, whose productions were very popular in their day, was born in

1765. Among her fictions were 'The Children of the Abbey,' 4 vols., a great favorite, also 'The Nocturnal Visit,' 4 vols.; 'The Monastery of St. Columb,' 5 vols.; and many others. But they have almost faded from the memory, or been overwhelmed by the myriad volumes which have succeeded them. Died at Waterford, May, 1845.

ROCHE, SOPHIE DE LA, a Ger. novelist, daughter of a physician named Guttermann, 1750-1807.

ROCHE-AYMOR, CHARLES ANTOINE DE LA, cardinal and archbishop of Rheims, 1692-1777.

ROCHECOTTE, F. GUYON, Count De, a royalist general, born 1769, shot as a conspirator 1798.

ROCHE-FLAVIN, BERNARD DE LA, a French Jesuit and historian of the parliaments, 1552-1627.

ROCHEFORD, WILLIAM DE, a French writer, was born in 1731, at Lyons, and died at Paris, in 1788. His principal work is entitled 'Réfutation du Système de la Nature,' but he also wrote some tragedies, and translated the Iliad and Odyssey of Homer, the plays of Sophocles, &c.

ROCHEFOUCAULD, F. DE LA, bishop of Senlis, cardinal and Roman ambassador, 1558-1645.

ROCHEFOUCAULD, FRANCIS, Duc De La, prince of Marsillæ, a famous name in French literature, and in the troubles of the Fronde, 1513-1680. Several others of the name have been distinguished at later periods of French history, and the last duke of this house was massacred at the Abbaye prison, in September 1792.

[Henry de la Rochejaquelein.]

ROCHEJAQUELEIN, HENRI DE LA, a famous chief of La Vendée, who became generalissimo at the age of twenty-two, and sustained a struggle with the republican troops for ten months with great skill and intrepidity, born 1773, killed at Nouaillé 1794.

ROCHELLE, B. LA, a French actor, 1748-1807.

ROCHESTER, JOHN WILMOT, Earl of, a witty and profligate nobleman of the court of Charles II., was born in 1648, and, on the death of his father, succeeded to his titles and estates, the latter of which, by extravagance, he soon dissipated. He became the personal friend and favorite of his sovereign, who is said to have encouraged and shared many of his exploits. The levity of his disposition frequently brought him into disgrace, and he was more than once forbidden the royal presence: his companionable qualities, however, which made him necessary to the amusement of his master, prevented his occasional exile from being ever of long continuance. His constitution at length gave way under such excesses; and, at the age of 30, he was visited with

all the debility of old age. He lingered for some time in this condition, and died, professing great penitence for his misspent life, in 1680. His satirical poems are keen, but their obscenity and impiety render them alike dangerous and disgusting.

ROCHETTE, RAOUL, a Fr. antiquarian, d. 1854.

ROCHON, A. M. DE, a Fr. astron., 1741–1817.

ROCHON DE CHABANNES, MARC ANTHONY JAMES, a French dramatic writer, 1730–1800.

ROCKINGHAM, CHARLES WATSON WENTWORTH, second marquis of, leader of a section of the Whig party, and prime minister, was born in 1730, and succeeded to the estates and dignities of his father in 1750. On the accession of George III. party feeling ran high, and was greatly aggravated by the intrigues of the sovereign with his favorite, Lord Bute. These circumstances rendered it difficult to keep a ministry together, and recourse was frequently had to politicians of very middling qualifications. Such was Lord Rockingham, a man of unostentatious integrity and sound constitutional feeling, but on the other hand, neither a great orator, nor a statesman of very brilliant parts. He became minister in July, 1765, when the Grenville ministry was turned out, during the debates on the regency bill, which had become necessary in consequence of the mental afflictions of the king. The first measure of the marquis of Rockingham was the repeal of the American stamp act, which had received the royal assent in the March previous, but he reserved to parliament the right of taxing the colonies, and proceeded quietly with some constitutional reforms, such as the prohibition of *general warrants*. He also encouraged trade, in the way of protection from competition, then, and till lately, the political fashion. The weakness of this ministry yielded place to that of Pitt, afterwards earl of Chatham, in June, 1766, and when the latter was succeeded by the administration of Lord North, the marquis of Rockingham went into opposition with the Whig chief. He became minister again after the fall of Lord North in March, 1782, but retired from office and from the world on the succeeding 1st of July. In this latter period Lord Rockingham appears to have been willing to sanction some measure of parliamentary reform, but it would be difficult to believe he was equal to any great emergency. A *jeu d'esprit* of the times runs thus:—

'Truth to tell, if one may without shocking 'em,  
The nation's asleep, and the minister—Rockingham!'

[E.R.]

ROCOCLES, J. B., a Fr. historian, died 1696.

RODE, CHR. BERNARD, a German painter and engraver, 1725–1797. His brother, J. HENRY, an engraver, 1727–1759.

RODE, P., a French violinist, 1774–1833.

RODELLA, J. B., an Italian writer, 1724–94.

RODERIC, or RODERIQUE, last king of the Visigoths of Spain, killed in battle 711.

RODGERS, JOHN, an American commodore, who distinguished himself at Tripoli, and in the war of 1813 with the British. Born in Maryland 1771; died 1838.

RODNEY, CÆSAR, president of Delaware, and a signer of the American declaration of independence, was born in 1730, died 1783.

RODNEY, GEORGE BRYDGES, Lord, a gallant English admiral, was the son of Captain Henry Rodney, a naval officer, who, at the time of his son's birth, was commanding the yacht in which the king, attended by the Duke of Chandos, used to pass to and from Hanover: hence he was christened George Brydges, the name of his royal and noble godfathers. He entered the navy early in life, and ob-

tained the command of a ship in 1742. In 1749 he was appointed governor of Newfoundland: and on his return, in 1753, married the sister of the Earl of Northampton. In 1759 he was made admiral of the blue; and in the same year he destroyed the stores prepared at Havre de Grace for an invasion of England. In 1761 he served on the West India station with such activity, that, at the conclusion of the war, he was made a baronet. In 1768 he was elected into parliament for Northampton; but the contest ruined his estate, and he found it necessary to retire to the Continent. The French government made some overtures to him, which would have recruited his fortune. These he rejected; and, the fact having transpired, he was placed in command of a squadron destined for the Mediterranean. In 1780 he fell in with Langara's fleet, off Cape St. Vincent, and completely defeated it; and on the 12th of April, 1782, obtained a decisive victory over the French fleet under De Grasse, capturing five and sinking one of his largest vessels. A barony and a pension of £2,000 were bestowed upon him for his services: and on his decease, in 1792, a monument was voted to his memory, at the national expense, in St. Paul's cathedral.

[Monument of Rodney in St. Paul's Cathedral.]

RODOLPH I., emperor of Germany, and founder of the imperial house of Austria, was born in 1218 being the eldest son of Albert IV., count of Hapsburg and landgrave of Alsace. He first served under Ottocar, king of Bohemia, against the Prussians, and distinguished himself by his prudence, valor, and the spirit of justice with which he protected the inhabitants of the towns from their baronial oppressors. In 1273, as he was encamped before the walls of Basle, he received the unexpected intelligence that he was elected king of the Romans and emperor, in preference to Alphonso, king of Castile, and Ottocar, king of Bohemia, the latter of whom opposed his election, but was defeated and slain. After a reign of 19 years he expired, in 1291, aged 72. He was brave, indefatigable, affable, magnanimous, intelligent and just. RODOLPH II., born at Vienna 1552, was crowned king of Hungary 1572, king of Bohemia and king of the Romans 1575, and emperor on the death of his father, Maximilian II., 1576. He lost the kingdoms of Hungary and Bohemia by the revolt of his brother, Mathias, and died 1612.

RODOLPH I., king of Burgundy, shared the throne with his father, Conrad II., count of Auxerre 886, took the title of king 888, died 912. RODOLPH II., his son and successor, made himself king of Italy 922, and, on renouncing this enterprise, founded the

kingdom of Arles and Burgundy 933; died 937. RODOLPH III., called the *Devout*, and the *Do-nothing*, grandson of the preceding, born 993, succeeded his father, Conrad, 994, died 1032.

RODOLPH, three dukes of Saxony :—RODOLPH I., son and successor of Albert II., reigned 1298–1356. RODOLPH II., son and successor of Rodolph I., 1356–1370. RODOLPH III., nephew of the latter, succeeded 1388, died a prisoner in Bohemia 1418.

RODOLPH, the *first* of the name, count palatine, succeeded his father, Louis II., 1294, declared against Albert, duke of Austria, in favor of Adolphus of Nassau 1300, died in England 1319. The *second* of his name, son of the preceding, succeeded his brother, Adolphus, 1327, concluded a peace with the emperor, Louis of Bavaria, 1329, died 1353.

RODOLPH, count of Rheinfelden, and duke of Suabia, elected king of Germany, 1077, killed 1080.

RODON, or DE RODON, DAVID, a French professor of philosophy and reformer, died 1664.

RODRIGUEZ, ALPHONSO, a Jesuit of Valladolid, whose work on Christian Perfection ranks high in mystic divinity, and has been translated into all the European languages, 1526–1616.

RODRIGUEZ, A. J., a theologian, 1705–1781.

RODRIGUEZ, J., a Portuguese missionary, 1559–1633.

RODRIGUEZ, V., a Sp. architect, 1717–1785.

RODWELL, GEORGE HERBERT, an English composer and writer, died 1851.

ROE, SIR THOMAS, an able statesman and ambassador, was born about 1580, at Low Layton, in Essex, and educated at Magdalen College, Oxford. In 1604 he was knighted, and soon after went to make discoveries in America. In 1614 he was sent on an embassy to the Great Mogul, at whose court he remained three years. In 1621 he went in the same capacity to the Grand Seignior; in which post he continued under Osman, Mustapha I., and Amurath IV. During his residence there, he collected a number of manuscripts, which he presented to the Bodleian library, and also brought over the Alexandrian MS. of the Greek Bible, as a present to Charles I., from Cyril, patriarch of Constantinople. In 1629, Sir Thomas negotiated a peace between Poland and Sweden; and it was by his advice, that Gustavus Adolphus entered Germany, where he gained the battle of Leipsic. After the victory, the king sent him a present of £2,000. In 1640 he was chosen to represent the university of Oxford in parliament. The next year he was sent ambassador to the diet of Ratisbon, and on his return was made chancellor of the garter and a privy councillor. Died 1644.

ROEBUCK, JOHN, a physician and natural philosopher, was born at Sheffield, in 1718, was educated at Edinburgh and Leyden, and engaged in practice at Birmingham. He devoted his attention particularly to chemical experiments; and, in conjunction with Mr. Garbett, he established a sulphuric acid manufactory at Preston Pans, in Scotland, which proved very successful. In 1759 they also founded the celebrated Carron iron works. An unfortunate speculation, however, in attempting to work mines of coal and salt, on the estate of the Duke of Hamilton, ruined his fortune; and he died, in embarrassed circumstances, in 1794.

ROEDERER, COUNT, a French statesman, professor of moral science and politics, 1754–1835.

ROEHL, L. H., a Ger. astronomer, died 1790.

ROEL, HERMANN ALEXANDER, a protestant German divine and Cartesian philosopher, died 1718.

ROELAS, J. DE LAS, a Sp. painter, died 1625.

ROELAS, P. DE LAS, a Spanish painter, taught

by Titian, and regarded as the rival of Murillo, 1560–1620.

ROEMER, OLAUS, a Danish astronomer, was born at Arhusen, in Jutland, in 1644. He studied at the university of Copenhagen, where he applied so diligently to the mathematics, that he was appointed tutor to the Dauphin of France. In 1681 he returned to his native place, and held several considerable offices previous to his decease, which took place in 1710. He made many scientific discoveries, the most important of which was that of the velocity of light, from the observation of the eclipses of Jupiter's satellites. Died 1710.

ROENER, J. J., a Swiss botanist, 1761–1819.

ROEPEL, C., a Dutch painter, 1679–1748.

ROESEL, A. J., a German painter, 1705–1759.

ROESTRAETEN, P., a Dutch portrait painter, who distinguished himself in England, 1627–1698.

ROGER, the name of several European princes :

—ROGER I., *count of Sicily*, is known to history from 1058 to his death in 1101. ROGER II., son of the preceding, became *king of Sicily* 1130, and died 1154.

A cousin of the latter, ROBERT, *duke of Apulia*, succeeded his father, Robert Guiscard, 1085, died 1111.

ROGER I., *count of Carcassonne*, reigned 1130–1150.

ROGER II., whose reign was greatly disturbed by quarrels with Raymond V., count of Toulouse, 1167–1194. ROGER OF MONTGOMERY, *count of Alençon*, nephew of William the Conqueror, succeeded 1070, and, having accompanied William to England, commanded his advanced guard at the battle of Hastings, and was created earl of Shrewsbury, died 1094.

ROGER, or RICHARD, OF HEXHAM, a monk of that abbey, known as an historian, 12th century.

ROGER OF HOVEDEN. See HOVEDEN.

ROGER, A., a Dutch protestant, 17th century.

ROGER, E., a French missionary, 17th century.

ROGER, F., a French author, 1776–1842.

ROGER-MARTIN, a French mathematician and physician, member of the council of 500, 1741–1811.

ROGERS, B., an English composer, 17th century.

ROGERS, C., an antiquarian, 1711–1784.

ROGERS, D., a statesman, about 1540–1590.

ROGERS, the Rev. GEORGE, who, for upwards of half a century, was the rector of Sproughton, near Ipswich, was born in 1741; and died at the patriarchal age of 94, in 1855. He was the author of several treatises on theological subjects, a strenuous advocate for civil and religious liberty, and an impressive preacher.

ROGERS, JOHN, the first martyr of the reign of Queen Mary, was first known as chaplain at Antwerp, and afterwards as collaborateur of Tyndale and Coverdale in effecting a translation of the Bible. He preached against popery at St. Paul's Cross immediately after the accession of Mary, and was burnt at Smithfield, February 4, 1555.

ROGERS, JOHN, rector of St. Giles', Cripplegate, and a writer against Hoadley, 1679–1729.

ROGERS, JOHN, an American commodore, see RODGERS.

ROGERS, JOHN, a president of Harvard University in 1683, died 1684.

ROGERS, ROBERT, famous in the American colonial wars with the French and Indians, was born in New Hampshire. In the revolution he sided with the royalists. He retired to England, where he died about 1780. He published several books, treating of North America, the Indian wars, &c.

ROGERS, P. H., an English landscape painter, died 1853, aged 65.

ROGERS, THOMAS, chaplain to Bancroft, bishop of London, author of several works, 1568–1616.

ROGERS, THOMAS, an episcopal clergyman, author of 'Providence Displayed in the Coronation of King William and Queen Mary,' 1660-94.

ROGERS, WOODS, an English circumnavigator, who belonged to the royal navy in 1708, when he was invited by the merchants at Bristol to take the command of an expedition to the South Sea. He set sail with two vessels, taking out Dampier as a pilot. Passing to the south of Terra del Fuego, in January, 1709, they entered the Pacific Ocean, and in February arrived at the isle of Juan Fernandez, where they found Alexander Selkirk: they then visited the coast of California, crossed the Pacific, and returned to England in October, 1711. Captain Rogers was afterwards employed with a squadron to extirpate the pirates who infested the West Indies. Died 1732.

ROHAN, a noble French family, numbering the following eminent churchmen:—ARMAND GASTON, cardinal and bishop of Strasburg, 1674-1749. ARMAND, called *the cardinal of Soubisse*, grand-nephew of the preceding, and holder of the same dignities, 1717-1756. ARMAND JULE, his cousin, cardinal and archbishop of Rheims, 1695-1762. LOUIS CONSTANTINE, brother of the latter, cardinal and bishop of Strasburg, 1697-1779. LOUIS RENE EDWARD, Prince De Rohan, ambassador to Vienna, bishop of Strasburg, cardinal and grand-almoner of France, best known by the affair of the diamond necklace, 1734-1803. J. H. MERIADEC, Prince De Rohan-Guéménée, elder brother of the necklace cardinal, born 1726, rendered himself notorious by his prodigalities, and by his failure for more than a million sterling in 1783. LOUIS FRANCIS AUGUSTUS, Duc De Rohan-Chabot, and lieutenant-general in the French army, born 1733, was massacred at the Abbaye, prison 1794. LOUIS FRANCIS AUGUSTUS, Duc De Rohan-Chabot, prince of Leon, and cardinal, a descendant of the Montmorencies by his mother, 1788-1833. Besides these, are the names distinguished in the religious wars, as follows:—

ROHAN, HENRY, Duc De, and prince of Leon, one of the most distinguished characters of his age, was born in Brittany 1579, and first acquired distinction at the siege of Amiens under Henry IV., when in the sixteenth year of his age. He became chief of the Calvinist party on the accession of Louis XIII., and acted a principal part in the insurrection of 1620, and all the ensuing wars. He was a great political writer, and has left memoirs which are highly valued by historians. Died of his wounds, received at the battle of Rheinfeld 1638. His wife, MARGARET DE BETHUNE, daughter of Sully, famous for her heroic defence of Castres against the Marechal de Themines in 1625, died 1660. His sister, ANN, distinguished by her courage at the siege of Rochelle, and for her great learning and capacity, 1584-1646. His brother, BENJAMIN DE ROHAN, lord of Soubisse, was also a Calvinist leader, and died in England, where he had taken refuge, 1630. TANCRED, a presumed son of Duke Henry, was killed during the troubles of the Fronde, in the nineteenth year of his age, 1649.

ROHAN, LOUIS, Prince De, or *Chevalier de Rohan*, b. abt. 1635, executed for conspiracy, 1674.

ROHAULT, JAMES, a French mathematician and natural philosopher, was born at Amiens, in 1620. He was a zealous Cartesian, and wrote a popular treatise on that system, which Dr. Clarke translated into English. Rohault was also the author of 'Elements de Mathématiques,' a 'Treatise on Mechanics,' and 'Dialogues on Philosophy.' Died 1675.

ROHDICH, F. W., a Prussian general, 1719-96

ROI, GILBERT, a French juriconsult, 16th cent.

ROKES, H., a Dutch painter, 1621-1682.

ROLAND, the supposed nephew of Charlemagne, a popular hero of the romance of chivalry, killed at the battle of Roncevaux 778.

ROLAND, count of Savoy, died 1263.

ROLAND, P. L., a French sculptor, 1746-1816.

ROLAND DE LA PLATIERE, JEAN MARIE, born at Villefranche, in the neighborhood of Lyons, 1732, was Inspector General of manufactures and commerce in that city when the French revolution commenced, and having embraced popular principles, became, in 1790, member of the Lyons municipality. In February 1791, he was sent to Paris as deputy extraordinary, to defend the commercial interests of Lyons in the committees of the Constituent Assembly, and remained there seven months, accompanied by his noble-hearted wife, who is the subject of the following notice. This period dates from the contemplated flight of the king, just before the death of Mirabeau, to the dispersion of the assembly after the acceptance of the new constitution, and it made the Rolands acquainted with the rising popularity of Robespierre and the Girondins, who were not yet divided into distinct parties. They now returned home to La Platière for a short period, but in December returned to Paris; the office of inspector having been abolished, Roland had to claim a retiring pension; but he was also invited back by the patriots to take a part in the movement, for at this juncture the invasion of the emigrants was impending, and the veto of the king had brought the parliament to a stand-still. The practical philosophy, commercial knowledge, and strict simplicity of Roland, recommended him to men of all parties, and when the patriot ministry was formed in March, 1792, he was made minister of the interior. He kept his position till 13th June, when the royal veto upon the proposal to form a patriot camp around Paris, and upon the decree against the priests, provoked his celebrated letter to the king, written, however, by Madame Roland, and, as a consequence, his almost instant dismissal. This event was followed by the arrival of the Marseillaise in Paris, and the conflict at the Tuileries, on the 10th of August, when Roland was recalled, and Danton became minister of justice. The struggle between the Girondists and the municipality under the guidance of Robespierre filled up the period till the 31st May; the former party were then vanquished, and Roland was among the number who saved their lives by flight. He found an asylum with his friends at Rouen, but deliberately killed himself with his cane-sword on hearing of the execution of his wife, 15th November, 1793. His body was found by the road-side, and a paper in his pocket contained his last words, among which were these:—'Whoever thou art that findest these remains, respect them, as those of a man who consecrated his life to usefulness, and who dies as he has lived, virtuous and honest. . . . On hearing of my wife's death I would not remain another day upon this earth so stained with crimes.' [E.R.]

ROLAND, MANON JEANNE PHILIPPON, MADAME, wife of the preceding, and herself the spirit of the Girondin party, was the daughter of a Paris engraver, and was born in that city 1754. She was the only child of nine left to the care of her father, who provided her with masters regardless of expense, and gave her a brilliant education; the best grounds for which existed in her native talents, her firm spirit, her personal beauty, and her undoubted virtues. Antiquities, heraldry, philosophy, and,

[Madame Roland.]

among other books, the Bible, made up her earliest studies; her favorite authors, however, were Plutarch, Tacitus, Montaigne, and Rousseau. She became the wife of Roland in 1779, and as her love for him was founded on his antique virtues and his philosophic spirit, she has been called 'The Heloise of the eighteenth century;' he was also twenty years her senior. She became the sharer in all his studies, aided him in editing his works, and during his two ministries acted as his secretary, and entered into all the intrigues of his party without debasing herself by their meanness. She was the angel of the cause she espoused, the soul of honor and the conscience of all who embraced it; while her boldness, her political sagacity, and her sarcastic eloquence were equally dreaded by their adversaries. After the flight of her husband, Madame Roland was arrested by order of the Paris commune, under the dictation of Marat and Robespierre, and consigned to the Abbaye prison, from which, on the 31st of October, she was removed to a more wretched abode in the Conciergerie. When sentenced, at the bar of Fouquier Tinville, she was eager to embrace her fate, and rode to the guillotine clad in white, her glossy black hair hanging down to her girdle. She declared her conviction that her husband would not survive her. On the scaffold, this noblest victim of the cause in which she suffered, apostrophized the statue of liberty, and bowing her head before it exclaimed, 'Ah Liberty! what crimes are committed in thy name!' The moment before, she had asked for pen and paper 'to write the strange thoughts that were rising in her,' a request which was refused. She was executed on the 8th of November, 1793. Besides her miscellaneous works, Madame Roland left Memoirs composed during her captivity, and a last affecting composition in the Counsels of a Letter, addressed to her little girl; the former, it is suspected, have been since tampered with. [E.R.]

ROLANDER, DANIEL, a Swedish naturalist and traveller, flourished about 1720-1776.

ROLANDINO, an Ital. chronicler, 1200-1276.

ROLANDO, L., an Ital. anatomist, 1775-1831.

ROLDAN, PETER, a Span. sculptor, 1624-1700. LOUISA, his daughter and assistant, 1654-1704.

ROLLA, A., a French violinist, 1757-1837.

ROLLE, DENNIS, a native of Devonshire, who traced his descent from Rollo, first duke of Normandy. In 1766 he purchased a whole district in Florida,

whither he proceeded with a thousand persons to people his new possessions; but through the unhealthiness of the climate, and the desertion of those who escaped disease, he soon found himself without colonists and without money; so that, in order to revisit England, he was compelled to work his passage back in an American vessel. He was then satisfied to live on his paternal estate, had a seat in the House of Commons, and filled the office of sheriff for the county. He devoted much of his time to the improvement of the condition of the lower classes. Died 1797.

ROLLE, HENRY, an eminent lawyer and judge, was born at Heanton, in Devonshire, in 1589, and educated at Exeter College, Oxford; after which he became a student of the Inner Temple, and was called to the bar. In 1640 he was made a sergeant-at-law, and in 1648 he accepted the office of chief justice of the court of king's bench. He wrote 'Reports,' 2 vols. folio; and 'An Abridgment of Cases and Resolutions of the Law,' which was published by Sir Matthew Hale.

ROLLE, M., a Fr. mathematician, 1652-1719.

ROLLI, P. A., an Italian poet, 1687-1767.

ROLLIN, CHARLES, an eminent historian, born at Paris in 1661. He was intended for business, but his talents obtained the notice of a learned Benedictine, by which he was enabled to gratify his inclination for learning. After going through a course of theology at the Sorbonne, he received the tonsure, and was twice chosen rector of the university of Paris. When elected a third time, he was deprived of his situation by the intrigues of the Jesuits; but he employed his leisure in composing his excellent work, 'On the Manner of Studying and Teaching the Belles Lettres,' 4 vols. This was followed by his 'Ancient History' and nine volumes of the 'Roman History.' Died 1741.

ROLLIN, C. L., a French numismatist, died 1853, aged 76.

ROLLO, the leader of an adventurous band of Normans, who conquered the French province named after them in the 9th century, was the son of a Norwegian earl, named Ragnvald, whose father, again, was one of the petty chiefs or kings of Drontheim. This is the highest point to which his ancestry can be traced, notwithstanding the mistaken zeal of genealogists in honor of the English sovereigns descended from William the Conqueror. The circumstances which produced the expedition of Rollo, were briefly these. Harold Harfaga having, from 870 to 880, made himself master of all Norway, which had previously been divided into several petty states, caused many Norwegian chieftains to emigrate, who sought fresh homes in Iceland, the Orkneys, and the isles of Faro and Shetland, and infested the northern seas with their piratical excursions. One such was this Rolf, or Rollo, who, prohibited from ever returning to Norway by Harold, retired to the Hebrides, where many of the Norwegian nobility had taken refuge. His first attempts at the head of these adventurers were against England, but the order established by Alfred rendered his efforts fruitless. He then tried the security of the coast of France, and venturing up the Seine took Rouen, at that time called Neustria, from whence he proceeded to the siege of Paris. Charles the Simple, king of the Franks, was glad to purchase a peace by ceding the territory already conquered by Rollo, and which is supposed to have comprised that part of the ancient Neustria which corresponds to the department of the *Seine Inferieure*, and a portion of the department of the *Eure*. He

also gave him his daughter, Giselle, in marriage. The bargain was concluded at St. Clair in the year 912, soon after which Rollo, or Raoul I., as he was afterwards called, was baptized by the archbishop of Rouen, in the cathedral of that city. He is said to have exhibited all the virtues of a religious, wise, and liberal prince; he was also intrepid as a warrior, and of such a noble stature that no horse could carry him. Rollo died in 917, or, according to other accounts, in 932, and was succeeded by his son, William, surnamed Long-Sword. [E.R.]

ROLLOCK, R., a celebrated Scottish divine, 1555-1598.

ROLT, RICHARD, supposed to have been born at Shrewsbury 1724 or 1725, a miscellaneous writer and historian, time of Johnson, died 1770.

ROMAGNOSI, GIAN DOMENICO, a disting. political economist, born at Piacenza, 1761, died 1835.

ROMAINE, WILLIAM, born at Hartlepool, in the county of Durham, 1714; distinguished as a religious writer and divine of Calvinistic principles. After several curacies he was successively chaplain to the Lord Mayor, 1741; lecturer to the united parishes of St. George's, Botolph Lane, and St. Botolph's, Billingsgate, 1748; lecturer to St. Dunstan's-in-the-West, 1749; assistant morning preacher at St. George's, Hanover Square, 1750; and rector of St. Anne's, Blackfriars, 1764. About 1752, he was also appointed professor of astronomy in Gresham College, but is said to have resigned in consequence of his zeal for the doctrines of Hutchinson. His principal works are 'Discourses upon the Law and Gospel,' 'The Life of Faith,' 'The Walk of Faith,' 'The Triumph of Faith,' 'Doctrine of the Sacrament,' and an enlarged edition of Calasio's Hebrew Concordance and Lexicon. He acquired considerable popularity by writing against the naturalization of the Jews, a measure then under discussion in parliament. Died 1795.

ROMAN, JOHN HELMICH, a Swedish musician, time of Ulrica Eleonora, 1694-1758.

ROMAN, J. J. T., a French writer, 1726-1787.

ROMANA, DON PETER CARO Y SUREDA, Marquis De La, a Spanish general, was born at Majorca, in 1761. He distinguished himself in the campaigns against the French, on the Pyrenean frontier, from 1793 to 1795; and commanded the auxiliary Spanish corps of 14,000 men, which was sent to the north of Germany by Napoleon; but when Spain rose against her oppressor, La Romana, aided by an English squadron, succeeded in embarking his troops from the island of Funen, and leading them home in safety. During 1809 and 1810, he displayed great talents both as a general and a statesman; and his death, in 1811, was a real loss to his country.

ROMANELLI, ABBE D., an antiquary and topographer of Naples, 1756-1819.

ROMANELLI, GIOVAN FRANCESCO, an Italian painter, 1617-1662. His son, URBAIN, 1638-82.

ROMANINE, G., an Italian painter, famous as an imitator of Titian, 16th century.

ROMANO, ECCELINO, or EZZELINO, DA, an Italian warrior, distinguished in the second crusade under Conrad III. 1147, died soon after 1175. His son, of the same name, succeeded to his father's lordship, and became a distinguished Ghibelline chief, died after 1235. The son of the latter, also of the same name, born 1194, was invested by his father, in 1215, with the principality of Bassano, and greatly increased his power. Such was his tyranny that Alexander IV., in 1256, proclaimed a crusade against him, and he fell at Cassano, September 16, 1259. His brother, ALBERT, who ruled at Treviso, was

hunted down and killed, together with all his family, by the Guelphs, 1260.

ROMANO, GIULIO, the name by which Giulio Pippi, or rather Dé Giannuzzi, is commonly known, was born at Rome in 1499, and early distinguished himself as one of the ablest and favorite pupils of Raphael. He completed with Penni (see RAPHAEL) the frescoes of the *Stanza di Costantino* in the Vatican after the death of Raphael, in 1523, and in the following year entered the service of the duke Federico Gonzaga at Mantua, where he succeeded in establishing a considerable school; the celebrated Primaticcio who carried the Italian principles of painting into France was one of his pupils. Giulio died at Mantua, November 1, 1546, aged only forty-seven, leaving extensive works in fresco and many admirable oil paintings to justify his fame as the principal of all Raphael's scholars. He was also a distinguished architect, and may be considered perhaps the ablest of the Italian ornamental decorators. His principal frescoes are 'The Fall of the Giants,' and the 'Story of Cupid and Psyche,' in the Palazzo del Té at Mantua. A specimen of his fresco painting has been recently presented to the National Gallery by Lord Overstone; as regards oil painting, he is supposed to have had a great share in at least the under painting of the principal of the later pictures of that class by Raphael.—(Vassari, *vite de Pittori*, &c., Ed. Flor., 1846, seqq.; Gaye, *Carteggio Inedito d'Artisti*.) [R.N.W.]

ROMANOFF. See MICHAEL.

ROMANUS, a pope of Rome, 897-898.

ROMANUS I., emperor of the East, surnamed *Lecopenus*, was an Armenian soldier, who became the associate of Constantine X., in 919; he was de-throned by his sons, Stephen and Constantine, in 945, and died in a monastery, 948. ROMANUS II., called *The Younger*, succeeded his father, son of Constantine X., 959, and died of intemperance, 963. ROMANUS III., called *Argyrus*, became emperor by marrying the princess Zoe, 1028; he was murdered by his wife and her paramour, Michael (Michael IV.), 1034. ROMANUS IV., surnamed *Diogenes*, was a condemned conspirator, who was married by Eudoxia, the widow of Constantine Ducas, and associated with her on the throne, 1068. Died, after being deposed and mutilated by Michael (Michael VII.), 1171.

ROMANZOFF, PETER ALEXANDROVITCH, Count, a Russian general, born about 1730, succeeded Prince Galitzin as commander-in-chief against the Turks, 1770. He obtained many advantages, and concluded the treaty of Kainardji, 1774. Named general of the second army directed against the Turks, he threw up his command in 1789, in consequence of his disgust with Potemkin. Died 1796. His son and successor in the title, NICHOLAS, distinguished as a diplomatist, and for the devotion of his wealth to patriotic and benevolent objects, flourished 1753-1826. MICHAEL PAUL, brother and heir of the latter, died 1838.

ROMANZOFF, MICHAEL PAUL, Count, son of the preceding, entered early on his diplomatic career, by accompanying his sovereign, in 1808, to the conference at Erfurt. He also executed other missions to the satisfaction of Alexander, who, after his rupture with France, appointed him minister at St. Petersburg. Having obtained leave to retire after the emperor's return, Romanzoff begged permission to devote the pension which had been settled upon him, as also the valuable presents made him during his diplomacy, for the use of the Russians who had been wounded in the previous campaign. He also employed his wealth in erecting churches, schools,

and other patriotic establishments; and was at the expense of constructing and fitting out the ship in which young Kotzebue made his voyage of discovery. The sculptor Canova, a short time before his death, sent him as a present, a colossal statue representing the Goddess of Peace holding the olive branch, and leaning against a pillar, on which is engraved, 'Peace of Abo, in 1743; Peace of Rudschuck Kairnadji, in 1774; Peace of Fredricksham, in 1809;' these treaties having been severally signed by himself, his father, and his grandfather.

ROMBERG, A., a German violinist, 1767-1821.

ROMBOUTS, T., a Flemish painter, 17th cent.

ROME DE L'ISLE, JOHN BAPTIST LOUIS, a French mineralogist, was born at Grai, in 1736; went to the East Indies as secretary to a company of artillery and engineers, and was made prisoner at Pondicherry, next visited China, and returned to France in 1764. He afterwards studied natural history, and gave lectures on mineralogy; wrote works on crystallography, meteorology, &c., and died in 1790.

ROMEYN, THOMAS, an American divine of the Dutch Reformed Church in the State of New York, 1744-1804.

ROMILLY, JOHN, a watchmaker, born at Geneva 1714, who wrote on horological subjects in the *Encyclopédie*, and in 1777 established the '*Journal de Paris*,' died 1796. His son, JOHN EDME, a Calvinist minister, and writer in the *Encyclopédie*, 1739-1770.

[Romilly.]

ROMILLY, SIR SAMUEL, was born in London on 1st March, 1757. His father traded as a retail jeweller, but was descended from a French refugee family of consideration, and Romilly when subsequently taunted in parliament about the obscurity of his origin, could smile at the allusion as peculiarly inapplicable to him, were it even of importance. His education was versatile and undecided, and it was long ere it took its final professional direction, for it was first intended that he should follow his father's trade, and when this view was abandoned he was articled to an attorney. He was called to the bar in 1783. By that time he had deeply studied his profession. He was at the same time master of a vast quantity of miscellaneous knowledge which, however vaguely and irregularly acquired, was subject to the mellowing influence of his own inquiring and deeply reflective mind. From early youth he was grave, earnest, and sensitive. He perhaps never in any of his sayings or writings approached nearer to wit or fancy than an occasional dry caus-ticity bred of contempt, as when speaking of some

complaints that a bill proposed by a very formal lawyer was not drawn like an act of parliament, he said that the writer had certainly defects of style, but that of being unlike an act of parliament was not one of them. He early and almost insensibly obtained a great share of chancery practice. Ever favorable to the progress of constitutional freedom, he naturally took a deep interest in the great questions arising in the land of his fathers. Coming in contact with Mirabeau and other celebrated men of the revolution, they in their turn brought him in alliance with Lord Lansdowne and the heads of the British Whig party. He declined a seat in parliament until he was made solicitor-general by the Whig ministry of 1806. The dissolution of that ministry in a few months concluded his tenure of office, but he cut out a career to himself by remaining in parliament as a law reformer. The main objects for which he fought were the removal of irregularities in the bankruptcy law, the subjection of land like other property to the attachment of creditors, and the institution of moderate and certain for sanguinary and uncertain punishments in the penal law. He was thus the practical experimenter in parliament of the jurisprudential views of Bentham, and the best testimony to their soundness is that they have now been the accepted law of the land for many years. He had married in 1798 a young lady whom he met at Bowood. His affection for her, originally very strong, deepened with advancing years, and her death in the autumn of 1818, so affected his then weakened nerves, that on the 2d of November he put an end to his own existence.

[J.H.B.]

ROMNEY, GEORGE, an excellent painter, was born at Dalton, in Lancashire, in 1734. Having served his time to an artist named Steele, whom he soon surpassed, he came to London with a picture of the '*Death of General Wolfe*,' which obtained the second prize in the exhibition, and sold for a considerable sum. After visiting Italy he returned to London, where he obtained great reputation. Died 1802.

ROMULUS, the founder of Rome, and brother of Remus, was the son of Rhea Sylvia, daughter of Numitor, king of Alba. He died B.C. 715.

RONALDS, H., an agriculturist, 1759-1833.

RONCAGLIA, CONSTANTINE, a learned theologian of the duchy of Lucca, 1677-1737.

RONCALLI, CAVAL. CRISTOFORO, an Italian painter, b. at Pomarance in Volterra, 1552-1626.

RONDANI, F. M., an Italian painter, 15th cent.

RONDELET, F., a Fr. architect, 1743-1829.

RONDELET, W., a Fr. naturalist, 1507-1566.

RONSARD, P. DE, a French poet, 1524-1586.

RONSIN, C. P., a Fr. dramatist, 1752-1794.

ROOKE, SIR GEORGE, a famous British admiral, was born at his father's seat, near Canterbury, 1650, and was first employed as commodore on the accession of William III. in 1689. In 1692 he was vice-admiral of the blue, and greatly distinguished himself at the battle of Cape la Hogue, on which occasion he was knighted, appointed vice-admiral of the red, and received a pension of £1,000 a year. In 1702 he destroyed the French and Spanish fleets in Vigo Bay, and on the 22d of July, 1704, assisted at the capture of Gibraltar. Died 1709.

ROOKE, LAURENCE, prof. of anatomy at Gresham College, and mem. of the Royal Society, 1623-1662.

ROOKER, M. A., a landsc. painter, 1743-1801.

ROOS, a family of German painters:—JOHN HENRY, a pupil of Adrian de Bie, 1631-1685. THEODORE, his brother, 1638-1698. PHILIP, second son

of John Henry, commonly called Rosa da Tivoli, from his long residence there, a great painter of animals and landscapes, 1655-1705. JOHN MELCHIOR, brother of the latter, 1659-1731. JOSEPH, grandson of Philip, a painter and engraver, about 1728-1790.

ROOSE, NICHOLAS, whose proper name was LIE-MACKER, a painter of Ghent, 1575-1646.

BOOSE, T. G. A., a Ger. anatomist, 1771-1803.

ROOT, JESSE, an American revolutionary officer and judge, 1737-1822.

ROOT, ERASTUS, an active politician of the State of New York, b. in Conn., 1772, d. 1846.

ROPER, JOHN, professor of philosophy, and one of the most learned theologians of Oxford, d. 1534.

ROPER, WILLIAM, attorney-general in the reign of Henry VIII., and son-in-law of Sir Thomas More. A Life of More, written by him, was published in 1712. His daughter, MARGARET, was a lady of great accomplishments, and translated Eusebius into English.

ROQUE, G. A. DE LA, a learned heraldist and genealogical writer of Normandy, 1597-1686.

ROQUE, JOHN DE LA, a French writer of his voyages and travels in the East, 1661-1745. His brother, ANTHONY, a journalist, 1672-1744.

ROQUES, PETER, a French divine, 1685-1748.

ROSA, SALVATOR, a celebrated painter, poet, and musician, was born at Naples, in 1615. After studying under Francanzani, he became a disciple of Ribera, with whom he went to Rome. But his taste was formed more from the study of nature among the wilds of the Apennines, than from the lessons of other artists; and he delighted in delineating scenes of gloomy grandeur and magnificence. He also wrote plays, and performed parts in them; besides which he composed many cantatas. He was liberally patronized by the grand-duke of Florence while residing in that city; the Maffei family also proved great friends to him, and it was at their seat that he wrote his celebrated satires. On his return to Rome, he executed many pictures for churches;

[House of Salvator Rosa.]

but his principal merit lay in the representation of the wild scenery of nature, storms, &c. Died, 1673.

ROSALBA CARRIERA, MADAME, a famous Venetian portrait painter, 1675-1757.

ROSAMOND, commonly called 'Fair Rosamond,' a famous name in our legendary history, was a daughter of Walter Clifford, baron of Hereford, and mistress of Henry II. One of her sons by him became archbishop of York. The facts of her history are not well ascertained, but she is said to have perished, a victim of the jealousy of Queen Eleanor, about 1173.

ROSAPINA, FRANCESCO, a celebrated Italian en-

graver, was born near Rimini, in 1762, and settled at Bologna. Many noble engravings from the old masters owe their existence to his superior skill; but his greatest performance is the work known as the 'Gallery of Bologna,' of which all the drawings and most of the engravings were executed by his own hand. Died 1841.

ROSCCELLINUS, RUZELIN, or RUCELIN, an ecclesiastic and scholastic philosopher of Brittany, 11th century.

ROSCHID IBN. See AVERROES.

ROSCIUS, QUINTUS, a celebrated Roman actor, and friend of Cicero, to whom he gave lessons in declamation, lived about 129-62 B.C. Another Roscius, proscribed by Sylla, and accused of having slain his father, was like the former a client of Cicero, but little is known of him.

[Birth place of Wm. Roscoe, near Liverpool.]

ROSCOE, WILLIAM, an eminent biographer and miscellaneous writer, whose life affords a memorable instance of what may be effected by the persevering efforts of unassisted genius, in acquiring a taste for the arts and sciences, with an extensive knowledge of ancient and modern literature. His parents, who were in an humble sphere, gave him the mere rudiments of a common education; and even of this young Roscoe neglected to avail himself. But he early began to think for himself; and his habits of mental application soon gave evidence of that genius which afterwards shone forth with so much splendor. Placed very early in a lawyer's office, he found leisure, without neglecting any of the duties of a clerk, to make himself master of the Latin language, so as to translate the classics, and also to study other ancient languages; and he then went through the same course with the modern languages, reading the best authors in each. At the age of 16 he published 'Mount Pleasant,' a poem that was well received. On the expiration of his clerkship, he entered into partnership with Mr. Aspinall, an attorney of considerable practice. But while he strictly attended to his professional duties, he did not lose sight of literature and the arts. Painting and statuary were objects of his regard; and in 1773 he read, at the society in Liverpool, an ode on those subjects: he also occasionally lectured there. When the projected abolition of the slave trade became a subject of public discussion he warmly interested himself in its success; and his 'Scriptural Refutation of a Pamphlet on the Licitness of the Slave Trade' and his 'Wrongs of Africa' appeared in 1788. His ardent love of liberty induced him to hail the commencement of the French

revolution as an era of promised happiness to the human race; and under the influence of such feelings he composed two songs, 'O'er the vine-covered hills and gay regions of France' and 'Millions be free,' which were, for a time, highly popular both in France and England. In 1795 he brought out that great work on which his fame chiefly rests, entitled 'The Life of Lorenzo de Medici,' 2 vols. 4to; soon after which he retired from the practice of an attorney, and entered himself as a student at Gray's Inn, with a view to the bar. During this period he had leisure for other studies. In 1798 he published 'The Muse,' a poem, from the Italian; and in 1805 appeared his second great work, 'The Life and Pontificate of Leo X., the Son of Lorenzo de' Medici,' 4 vols. 4to. He also subsequently wrote several political pamphlets, and scientific treatises. Mr. Roscoe being attached to the Whig party, they supported him as a candidate to represent Liverpool, and after a severe contest with General Tarleton, in 1806, he was returned. His senatorial career, however, was brief, for after the dissolution of parliament in 1807, he retired from the representation. Some time previous to this, he had become a banker at Liverpool; but the house to which he belonged ultimately failed, and his private property was wrecked; his valuable library, prints, drawings, &c., producing about 8000*l.* Mr. Roscoe had long been considered as the head of the literary and scientific circles of his native town; and much of his time was spent in promoting the objects of its many noble public institutions. He died, June 30, 1831.

ROSCOE, HENRY, youngest son of the preceding, was born in 1800; studied the law, and was called to the bar in 1826. Like his father, he united with his professional studies an extensive acquaintance with polite literature, and was an accomplished writer. Independent of many 'Digests' of different branches of the law, he was the author of 'Lives of eminent British Lawyers,' in Lardner's Cyclopædia; a 'Life' of his father, 2 vols.; and the editor of 'North's Lives.' Died 1836.

ROSCOE, W. S., son of the celebrated scholar and banker of Liverpool, resembled his illustrious father in his love of learning and the arts, and was specially conversant with Italian literature; but has left, as the monuments of talents that were admired by those who knew him, only a volume of miscellaneous poems and some MSS., including a translation of Klopstock's Messiah. Died, October, 1843, aged 61.

ROSCOMMON. See DILLON.

ROSE, GEORGE, a statesman and political writer, was the son of an episcopal clergyman of Brechin, Angus-shire, where he was born in 1744. He was brought up by an uncle who kept a school in London; and after serving as purser in the navy, became keeper of the Exchequer records, through the interest of the earl of Marchmont. While in this office he superintended the publication of the Domesday Book, and completed the Journals of the Lords, in 31 vols. folio. Under the ministry of Mr. Pitt he became president of the board of trade, and, with the exception of his retirement during the Grenville administration, retained this post till his death, in 1818. He wrote several valuable works on subjects connected with the revenue.

ROSE, J. B., a French divine, 1716-1805.

ROSE, H. J., a minister of the Ch. of England, dist. for his learning as a theologian, 1795-1838.

ROSE, SAMUEL, a lawyer, 1767-1804.

ROSE, WILLIAM, a French prelate, and violent partisan of the catholic league, died 1602.

ROSEL, J. A., a German painter, 1705-1759.

ROSELL, A. G., a Sp. mathematician, 1731-94.

ROSELLI, A., an Ital. juriconsult, 1380-1466.

ROSELLINI, IPPOLITO, one of the most celebrated archæologists of modern times, was born at Pisa, 1800; completed his studies at the university of his native town, in 1821; three years later obtained the chair of oriental languages, which he had prosecuted at Bologna meanwhile with great zeal under the celebrated Cardinal Mezzofante. Having made Egyptian antiquities his peculiar study, he followed eagerly in the steps of the illustrious Champollion, whom he accompanied first to Paris and then to Egypt in the prosecution of his researches; and on whose death he undertook the publication of the splendid work, the result of their united efforts, entitled the 'Monuments of Egypt and Nubia,' &c. Died 1843.

ROSEN, FREDERICK AUGUSTUS, an eminent Oriental scholar, was born at Hanover, 1805, and became professor of Oriental languages in the university of London. Died prematurely, after he had written or edited several important works, 1837.

ROSEN, GREGORY, Baron, a Russian officer, distinguished in the wars of Napoleon, 1789-1832.

ROSEN DE ROSENSTEIN, NICHOLAS, commonly called Dr. Rosen, a physician and professional writer, 1706-1773.

ROSENHANE, SHERING, Baron De, a Swedish senator, diplomatist, and governor of Ostrogothia, 1609-1663. His descendant of the same name and title, secretary of state, and commander of the order of the Polar Star, author of Memoirs, &c., 1754-1812. GUSTAVE, of the same family, a sonneteer, date 1680-1681.

ROSENMULLER, JOHN GEORGE, a celebrated German theologian, was professor of theology at Erlangen and Leipsic, and distinguished himself as a preacher, and by his activity in the cause of education. Born 1736, died 1815. His son, ERNEST FREDERIC CHARLES, a distinguished Orientalist, was born at Leipsic, in 1768; in which university he became professor of Arabic, &c., and rendered important services to oriental literature by various learned works. Another son, JOHN CHRISTIAN, celebrated as an anatomist, was born at Hessberg, in 1771; became professor of anatomy and surgery at Leipsic, and died in 1820. He was the author of 'Anatomico-Surgical Delineations,' a 'Manual of Anatomy,' &c.

ROSIN, or ROSINUS, in German ROSZFELD, JOHN, a learned antiquarian, about 1550-1626.

ROSINI, C. M., an Ital. archæologist, 1749-1837.

ROSNY, A. J. N. DE, a Fr. novelist, 1771-1814.

ROSS, ALEXANDER, a Scotch poet, 1699-1784.

ROSS, ALEXANDER, a Scottish divine, who became chaplain to Charles I. and master of the free school at Southampton, 1590-1654. Ross was a man of considerable attainments in classical learning and philosophy, and made great pretensions to a knowledge of the secrets of antiquity. Butler thus alludes to him:—

'There was an ancient sage philosopher,  
That hath read Alexander Ross over.'

His 'View of All Religions' is the work by which he is best known.

ROSS, DAVID, a theatrical performer at Drury Lane, contemporary with Garrick. He was educated at Westminster School; and having the advantages of a good figure and a classical education, he acquired reputation both as a tragic and a comic actor. Died 1790.

ROSS, GEORGE, an American revolutionist and judge of the Court of Admiralty, 1730–1779.

ROSS, JOHN, a learned prelate, was born in Herefordshire, and educated at St. John's College, Cambridge, where he took the degree of D.D. In 1746 he published a pamphlet in defence of Dr. Middleton against the criticisms of Mr. Markland; and, in 1749, an edition of Cicero's *Epistolæ ad Familiares*, 2 vols. 8vo. He was presented to the vicarage of Frome, in Somersetshire; and, in 1778, advanced to the bishopric of Exeter. Died 1792.

ROSS, or ROUSE, JOHN, called the antiquary of Warwick, of which town he was a native, studied at Baliol College, Oxford, and afterwards became canon of Osney. After travelling over the greater part of the kingdom to collect information respecting historical events, he settled at Guy's Cliff, in Warwickshire, where he died, in 1491. He wrote a work on the 'Antiquities of Warwick,' and the 'History of our Kings,' and left a MS. on the 'History of the Earls of Warwick,' which is in the Bodleian Library.

ROSSELLI, ANNIBAL, a friar of Calabria, author of a 'Commentary' upon Pimander, 1578.

ROSSELLI, COMO, a Florentine painter, 1416–1484. PIERO DE COSIMO, a pupil of Como Rosselli, 1441–1484. MATTHEW, a pupil of Pagani and Passegnano, 1578–1650.

ROSSELLI, COMO, a Florentine preacher, and writer on the art of memory, died 1578. STEPHEN, his relation, an historian, 1598–1664.

ROSSET, F. DE, a Provençal poet, born 1570, died after 1630. JOSEPH, a sculptor, 1706–1786.

ROSSI, the name of several Italians distinguished in art:—ANTONIO, a painter of the Venetian school, master of Titian, 14th century. ANTONIO, a Bolognese painter, 1700–1753. ANGELO, a Genoese sculptor, 1671–1715. J. ANTONIO, an architect of Rome, 1616–1695. MATHIAS, a Roman architect, 1637–1695. MURIO, a painter of Naples, taught by Stanzioni and Guido, 1626–1651. PAQUALINO, a painter of Vicenza, b. 1641. PROPERZIA, a female sculptor of Bologna, b. 1495.

ROSSI, ADELAIDE HELEN JOSEPHINE CHARLOTTE, Countess De, Madame CELLIER, a French lady, author of numerous works connected with education, 1778–1822.

ROSSI, B. DE, an Italian critic, 16th century.

ROSSI, D. J. B., an Ital. Orientalist, 1742–1831.

ROSSI, IGNATIUS DE, a Heb. scholar, 1740–1824.

ROSSI, GIOVANNI V., in Latin *Janus Nicus Erythræus*, a philologist and biographer, 1577–1647.

ROSSI, GIROLAMO, in Latin *Rubens*, a physician and historian of Ravenna, 1539–1607.

ROSSI, N., an Italian bibliopole, 1711–1785.

ROSSI, O., an Italian archæologist, 1570–1630.

ROSSI, PELLEGRINO, Count, a noble victim of the popular cause in Italy, was born at Carrara, in 1787, and being admitted to the profession of an advocate at Bologna, was practising at the bar in that city from 1809 till 1814. In the latter year he was obliged to fly the country, through his complicity with the false movement excited by Murat, who had deluded the patriots of Italy with a prospect of their independence, which it was out of his power to realize. Rossi, after the fall of Murat, escaped to Geneva, and there rose to such professional eminence that we find him, in 1819, professor of law; in 1820, a member of the council; and shortly after, a deputy to the diet, and an active party to the revision of the federal constitution. In 1833 he was induced to take up his residence in Paris, and being naturalized, was appointed, in 1845,

ambassador from the French court to Rome. Two series of circumstances would here require consideration in a more extended notice; the first, strictly biographical, exhibiting the formation of Rossi's political convictions in the atmosphere of the *doctrinaires* of the French chamber; and, the second, the state to which the abominable government of Gregory XVI. and the several factions of Italy had reduced that unhappy country. The brief facts are, that the Papal court had maintained an unrelenting war against every shade of liberal opinion; the administration was wretchedly bad; no equality existed in the eye of the law; there were no statistics; an enormous public debt; education and religious instruction utterly inadequate to the needs of the people, and a censorship of the press as dark as the Inquisition of the middle ages: add to this, the rancorous opposition of the political sects, the constantly increasing persecution to which they were all alike subject, and the general perversion of the moral sense and political conscience resulting from these causes, and we have a faint outline of the state of Italy at the period of Count Rossi's mission. In the following year, 1846, Gregory XVI. died, and Pius IX. succeeded him with a disposition to grapple with the difficulties of the country, supported as he was by the French influence represented by Rossi, and with the countenance of England exhibited in the mission of Lord Minto and the famous letter of Palmerston. A general amnesty, and the progress of administrative reform, were suddenly enlivened by the revolution of Naples and Paris in February, 1848, and the impetus given in Italy drove two distinct political movements to a sudden head; that of *Giovine Italia*, which had been fostered by Mazzini ever since the revolution of 1831, and that which the writings of Gioberti and Balbo had ripened under the sun of Carlo Alberto in northern Italy. The latter came to issue first. Carlo Alberto, with the chivalrous blood of the house of Savoy in his veins, proclaimed the independence of Italy under one native sovereign at 'Glorious Milan,' and Rossi warned the pope that if he did not grasp this sword, it would be turned against him; the weak old man, however, proffered his services to Austria and Charles Albert as a mediator for peace, and the latter was the sacrifice. This hope being disappointed, the next effort of Rossi, who had been deprived of his employments by the French republic and become prime minister in Rome, was to form a league of the separate constitutional states, with deputies from each sitting in parliament; and as this scheme acquired form and stability it became more and more distasteful to the republican party of Mazzini, by which, also, the efforts of Carlo Alberto had been paralyzed. All through these transactions there had been great tumults and some bloodshed apart from that of the war in Sardinia, and the demand which Mazzini and *Giovine Italia* opposed to the plan of Rossi, was that for a national convention. In fine the deputies were appointed to meet on the 15th of November, 1848, and Rossi himself represented Bologna. Precautions had been taken against an outbreak, and the carriages of the deputies went through masses of people into the court yard of the Vatican. As that of Rossi stopped at the portico, there was a cry for help, close at hand, and in the confusion created by it, the bystanders closed round the statesman, there was a momentary scuffle, and the quick flash of a dagger was seen; for a while it was hardly known what had occurred, but it was only the corpse of Rossi that the doors were closed upon.—The flight of the pope, and the establishment

of the Roman republic, afterwards put down by French bayonets, which are still held at her throat, are matters of history, and too recent, perhaps, to be righteously judged. There is a serious question also, whether Rome, considering the geography of Italy and the requirements of commerce, can ever be the seat of government for a united Italy; whether the dominion, whatever its form, of that beautiful but hapless country must not occupy two seats—Milan perhaps in the north, and Naples in the south.

[E.R.]

ROSSI, PIERO DE, a celebrated general of the 14th cent., chief of the Guelphs in Parma, d. 1357.

ROSSI, QUIRICO, an Italian poet, 1696–1760.

ROSSIGNOL, J. A., a republican general, commander in La Vendée, 1759–1802.

ROSSIGNOLI, BERNARDINO, an Italian Jesuit, who first produced the MS. of the 'Imitation,' bearing the name of J. Gersen, died 1613.

ROSSLYN, ALEXANDER WEDDERBURN, Earl of, an eminent lawyer and statesman, was born in Scotland, in 1733. He received his education at Edinburgh, and was called to the bar in 1757. His application was indefatigable, and in 1763 he obtained a silk gown as king's counsel. Not long afterwards he was returned to parliament for Richmond. He joined Mr. Grenville in opposition to the administration, and distinguished himself by his eloquence and political firmness. In 1771 he was appointed solicitor-general; in 1778, attorney-general; and, in 1780, chief justice of the common pleas, with the title of lord Loughborough. He adhered to the party of Mr. Fox when Mr. Pitt first came into power; but joined the administration, with many others, under the alarm produced by the French revolution in 1793, when he succeeded Lord Thurlow as chancellor, which office he held till 1801, when he retired with the title of the earl of Rosslyn, and died in 1805. In legal affairs, he was able, plausible, subtle, and eloquent; in his political capacity, a steady partisan, highly serviceable to the cause he espoused. His lordship wrote a pamphlet, entitled 'Observations on the State of the English Prisons, and the Means of improving them.'

ROSSLYN, JAMES ST. CLAIR ERSKINE, Earl of, eldest son of Lieutenant-General Sir Henry Erskine, and nephew of the preceding, succeeded his father as a baronet in 1763, and commenced his military career in 1778, as cornet in the 1st horse-guards. In 1782 he served on the staff in Ireland, as aide-de-camp to the lord-lieutenant, and was subsequently appointed assistant-adjutant-general in that country. In 1783 he obtained a majority in the 8th light dragoons, and in 1792 the lieutenant-colonelcy of the 12th light dragoons. He served with that regiment at Toulon in 1793, and afterwards as adjutant-general to the forces in the Mediterranean, under Sir David Dundas and Sir Charles Stuart. In 1795 he obtained the rank of colonel, being appointed aide-de-camp to the king. He was employed as brigadier-general and adjutant-general to the British army in Portugal, from November 1796 to the end of 1797. In 1798 he was appointed major-general, and was present at the reduction of Minorca. In 1805 he was appointed lieutenant-general, and placed on the staff in Ireland; in 1806 he was again appointed to serve in Portugal, was at the siege of Copenhagen in 1807, and in 1809 in the Zealand expedition. In 1810 his lordship received the colonelcy of the 9th lancers; and in June, 1814, he was appointed general. Sir James Erskine was a member of the House of Commons for 23 years before his accession to the peerage in 1805.

In 1829 he was appointed a keeper of the privy seal, and sworn a member of the privy council; and in December, 1834, he was lord president of the council in Sir Robert Peel's brief administration. The Earl of Rosslyn was one of the most intimate friends of the Duke of Wellington, and a firm upholder of conservative principles. He died in 1837, and was succeeded by his son, Lord Loughborough.

ROSSO, DEL, called by the French *Maitre Roux*, a distinguished Florentine painter, died 1541.

ROSSO, J. DEL, an Ital. architect, 1760–1831.

ROSTAN, C., a French botanist, 1774–1833.

ROSTGAARD, FREDERICK DE, archivist to the king of Denmark, and a great scholar, 1671–1745.

ROSTOPSCHIN, FEODOR, Count, a Russian statesman and military officer, was born in 1760; entered the army as a lieutenant in the imperial guards; received high promotion from the emperor Paul, but was dismissed in disgrace; and subsequently, under Alexander, became governor of Moscow. He exercised an important influence over the campaign of 1812, and is charged by the French with having caused the conflagration of Moscow, which is the general opinion even in Russia, although Rostopschin has positively denied it. It is certain, however, that he took measures for the destruction of the magazines in that city; and should it be proved that his emissaries set fire to the ancient capital of Russia at his express commands, desperate as the measure may appear, it ever ought to be regarded as the act of a patriot, rather than that of an incendiary, inasmuch as it deprived the French invaders of a resting-place, and was the death-blow to Napoleon's boundless ambition. In 1814 Count Rostopschin accompanied the Emperor Alexander to the Congress of Vienna, afterwards spent several years in France, and died at Moscow, in 1826.

ROSWEIDE, HERIBERT, a learned and voluminous wr. in ecclesiastical antiquities, 1569–1629.

ROTA, B., a Neapolitan poet, 1509–1575.

ROTA, J. B., an Italian historian, died 1786.

ROTA, M., an Italian designer, 16th century.

ROTA, M. A., a Venetian physician, 1589–1662.

ROTA, V., an Italian dramatist, 1703–1785.

ROTARI, PIERO, Count, painter to the court of St. Petersburg, born at Verona 1707, died 1764.

ROTGANS, LUKE, an eminent Dutch poet, was born in 1645, at Amsterdam, and died in 1710. He wrote the 'Life of William III., King of England,' an epic poem, in eight books, and several other less important pieces.

ROTHARIS, king of the Lombards, 636–652.

ROTHELIN, C. D'ORLEANS DE, a Fr. *savant* and man of letters, m. of the Academy, 1691–1744.

ROTHENBOURG, FR. RODOLPH, Count Von, a Prussian general and diplomatist, 1710–1751.

ROTHENHAMER, or ROTTENHAMER, J., a painter of Munich, style of Tintoret, 1564–1606.

ROTHERHAM, JOHN, a clergyman of the established church, was born in Cumberland, and educated at Queen's College, Oxford. He became a curate in Yorkshire, where he wrote a valuable treatise on the 'Doctrine of Justification by Faith,' for which the university conferred on him the degree of M.A.; and the Bishop of Durham gave him the living of Houghton-le-Spring, where he died, in 1788. He also wrote, 'An apology for the Athanasian Creed,' 'Sketch of the grand argument for Christianity,' 'Essay on the Soul and Body,' &c.

ROTHERHAM, JOHN, an English physician, and writer on 'The properties of Water,' d. 1787.

ROTHSCHILD, MAYER ANSELM, founder of the house by which the financial operations of Europe

have been controlled since the commencement of the present century, was a native of Frankfort. He was educated for the priesthood, but preferring the profession of a banker, acquired great credit and wealth at the period of Napoleon's occupation in Germany. Died 1812.

ROTHSCHILD, NATHAN MAYER, the greatest *millionnaire* of his day, and son of the preceding. When the father died in 1812, he left an immense fortune and unbounded credit to his five sons. They placed themselves in different cities and carried on their operations in concert. ANSELM lived at Frankfort, SOLOMON at Berlin and Vienna, NATHAN MAYER at London, CHARLES at Naples, and JAMES at Paris. Nathan Mayer went to England in 1800, and there had large sums placed under his control by some of the German princes. These he employed with great fidelity and judgment. The consequence was a rapid accumulation of fortune. He established agencies in various parts of the world; had the co-operation of his brothers, and could readily command also the funds of other capitalists whose confidence in his judgment induced them readily to join him in his loans and other enterprises. Nothing, therefore, was too great or extended for him. His great success in loan operations made it a matter almost of rivalry with all those states who wanted to borrow money, to obtain his co-operation; and yet he continued literally to steer clear of all the bad bargains which were made during the zenith of his career as a banker and financial merchant. His transactions in bullion and foreign exchanges were also on an immense scale, and not less lucrative, perhaps, than his foreign loans; in short, as they were not subject to the reverses which his loan contracts necessarily at times were, they might even be the most important branch of the whole concern. Mr. Rothschild had gone to Frankfort, to be present at the marriage of his eldest son, Lionel, with one of his cousins, a daughter of Baron Anselm, when he was taken ill and speedily died. His corpse was conveyed to London, and deposited in the burial-ground belonging to the German synagogue in Duke's Place, on the 8th of August, 1836.

ROTHOU, JOHN DE, a French dramatic poet, was born in 1609, at Dreux; and died in 1650. He was the author of 37 plays, many of which were highly popular; but he willingly bore public testimony to the superior merit of his rival Corneille. Being at Paris when a pestilential disorder broke out at Dreux, he hastened to afford relief to his fellow-citizens; but, three days after his arrival, in 1650, he died, the victim of his benevolent exertions.

ROTTENHAMER. See ROTHENHAMER.

ROTTECK, CHARLES VON, a celebrated modern historian, was born at Freiburg, in Baden, in 1775. Carefully educated under the care of his father, who had been ennobled for his medical skill, he joined the university of his native town in 1790 as a law student; and eight years later he obtained the chair of history, where his lectures laid the foundation of the great historical work which has secured him so high a place among the historians of Europe. In 1818 he exchanged his chair of history for that of politics and the law of nations; in 1819 he was chosen member for the university in the first chamber of the states of Baden; and the liberal tenor of his lectures and speeches was well seconded by numerous able works which flowed from his pen on various constitutional questions. The outbreak of the French revolution in 1830 having given fresh vigor to his liberal views, he founded various journals to enunciate and propagate his opinions; but his zeal

was viewed with a jealous eye by the government, which not only deprived him of his chair in 1832, but interdicted him from editing any political journal for five years, and sought in various other ways to thwart his designs. Henceforth he was regarded as a martyr to the liberal cause; his name became a watchword to the opposition; and though in 1848 he was restored triumphantly to the enjoyment of his previous rights, the redress came too late, for he died the same year, to the general regret of his countrymen. A list of his various productions would occupy more space than we can afford; but his fame chiefly rests upon his '*Allgemeine Welt-Geschichte*,' which has been translated into nearly every European language.

ROUBANE, B. G., a Russian author, 1739-95.

ROUBAUD, PETER JOSEPH ANDREW, a French economist and grammarian, 1730-1792.

ROUBILLIAC, LOUIS FRANCIS, an eminent sculptor, was a native of Lyons, but came to England in the reign of George I., and was employed on several great works; among which are, the monument of the Duke of Argyle, in Westminster Abbey; the statue of Handel, at Vauxhall; that of Sir Isaac Newton, at Trinity College, Cambridge; and many other statues and monuments in various parts of the kingdom. He long stood at the head of his profession, and had also a talent for poetry. Died 1762.

ROUBIN, GILES DE, a French poet, died 1712.

ROUCHER, JOHN ANTHONY, a French poet and miscellaneous writer, was born at Montpellier, in 1745, and obtained from Turgot a place in the revenue department. When the revolution took place, he opposed the excesses of the more violent politicians; and for his moderation suffered by the guillotine, in 1794. His principal work is '*Les Mois*,' a poem, in 2 vols.

ROUELLE, WILLIAM FRANCIS, one of the earliest of the modern chemists in France, was born at Caen, in 1703. Having devoted great attention to chemical science, botany, and pharmacy, he settled at Paris as an apothecary, and afterwards became professor of chemistry at the royal botanic garden. He also held the office of inspector-general of pharmacy at the Hotel Dieu, and was a popular lecturer. Died, 1770.—His brother, HILARY MARINUS, who was a clever experimental philosopher, assisted him in his lectures, and succeeded him as professor at the royal garden. Born 1718; died 1779.

ROUGEMONT, F., a native of Maestricht, kn. as a Chinese missionary and scholar, 1624-1676.

ROUGET DE LISLE, JOSEPH, the writer and composer of the *Marseillaise*, was a French officer of artillery, born at Lons-le-Saunier, among the Jura mountains, 1760. In the winter of 1791-1792 he was in garrison at Strasburg, and is said to have passed most of his leisure at the house of the mayor of that city, where his skill on the clavicord and his social qualities made him a welcome visitor. It was here the republican hymn was first composed and sung, at that particular juncture when the king's veto had stultified every act of the first constitutional parliament, and the country was threatened with the invasion of the emigrants and their German allies. The resemblance between this marching song and Burns' '*Scots wha hae wi' Wallace bled*,' is most striking, and it would be difficult to believe that the one had not suggested the other if Lamartine had not given a somewhat romantic account of the manner of its composition, which precludes the idea. The song was just become known when the departments were preparing to obey the call of Paris for a body of 20,000 patriot troops, and the band from

[Rouget de Lisle.]

Marseilles were the first to chant its threatening measures as they traversed France; it afterwards made the round of Europe, and the footfall of Napoleon's troops as they scaled the Alps kept time to its wild notes. Rouget de Lisle's kind host was accompanied to the scaffold by this song, and the composer himself only escaped by the fall of Robespierre. He found no favor with succeeding governments, but carried his republican principles into private life and pursued the career of a lyrical composer and author. Died 1836. [E.R.]

ROUGNON, N. F., a Fr. physician, 1727-1790.

ROUILLE, P. J., a French Jesuit, 1681-1740.

ROUPELL, GEORGE LEITH, an English physician and medical author. Died, 1854, aged 57.

ROUS, FRANCIS, an English republican writer, was born at Halton, in Cornwall, in 1579; educated at Oxford; and became a member of Parliament in the reign of Charles I., when he was distinguished by his zeal for the establishment of a commonwealth, on the plan of the Hebrew republic. He was afterwards the tool of Cromwell, whom he compared to Moses, and, in consequence, was made one of his lords. He was also appointed provost to Eton, where he died, in 1659.

ROUSE, or ROSS, John. See Ross.

ROUSSEAU, J., a French painter, 1630-1693.

ROUSSEAU, JEAN BAPTISTE, a distinguished lyric poet, was born at Paris, in 1669. His father, though a shoemaker, gave him a liberal education, and at an early period he displayed a decided taste for poetry. In 1688 he became page to the French minister at the court of Denmark; after which he was secretary to Marshal Tallard, in his embassy to England. In 1701 he was admitted into the Academy of Inscriptions; but, in 1712, he was banished from France, on the charge of writing some grossly libellous verses, which, during the remainder of his life, and even in his last moments, he solemnly declared were forgeries, devised for his ruin. He then went to Switzerland, and afterwards to Vienna, under the patronage of Prince Eugene. Some of his odes and epigrams are excellent, but among the latter are many which are unfit for perusal from their obscenity.

ROUSSEAU, JEAN FRANCOIS XAVIER, of the same family as the celebrated philosopher (following article), a man of letters, and consul in Persia, 1738-1808. His son, J. B. L. XAVIER, consul at Aleppo, Bagdad, and Tripoli, 1781-1831.

ROUSSEAU, JEAN JACQUES, son of a watchmaker at Geneva, was born there on the 28th of June, 1712.—The first half of the extraordinary life of this extraordinary man, occupying thirty-three years, was spent in a succession of adventures, making the most painfully interesting part of the record he has himself bequeathed to us, a record exhibiting a hardy daring of self-inquisition, which (as he justly says) no other man ever ventured to communicate to the world. The history of this period in Rousseau's career was not only quite unproductive of literary promise, but would have appeared to forebode little or nothing either of moral worth or of intellectual achievement in any path. After learning something in a village school, he began life as the apprentice of an engraver; and, on being harshly treated, he became addicted to idleness, lying, and stealing. At length he ran away into Savoy, and, giving hopes of his conversion to catholicism, was received into an ecclesiastical school at Turin, where he read his recantation, but refused to prosecute his education for the priesthood. Being dismissed, he became a domestic servant: in one of his places he committed a theft, and charged a waiting-maid with it; from another he was dismissed for insolent insubordination. Now, when he was in his eighteenth year, he was received by Madame De Warens, a Swiss lady, residing at Annecy, and afterwards at Chambéry. His patroness sheltered him in her house for ten years, pardoned him for two elopements, induced him to study French writers, and supported him even when he disdained to retain employments which she more than once procured for him. The shameful issue is too well known. In 1741 he walked to Paris, having in his pocket fifteen louis, and a new scheme of musical notation, which was at once condemned by the musicians. He found his way, it is not clear how, into the society of men of science and letters, such as Marivaux, Fontenelle, and Diderot; and, in 1743 friends obtained a place for him

[The Hermitage, residence of Rousseau near Paris.]

as a kind of secretary or clerk to the French ambassador at Venice. There he spent nearly two years, with no apparent improvement of morality, and with as little evidence of devotion to any pursuit either profitable or honorable. His dismissal by his master, and his return to France, closed his long period of aimless wandering. Rousseau came to Paris in 1745. Hiring a room in an obscure lodging-house, the strange man conceived a liking for the servant-maid, Therèse Levasseur, a vulgar, unattractive, and dull young woman of twenty-four. He took her to live with him as his mistress, and

married her twenty years afterwards; the attachment of the fantastic dreamer to her was only strengthened by time; and Thérèse and her mother not only preyed on his narrow means, but aggravated his suspicious temper, and were continual mischief-makers between his friends and him. Five children born to the pair were coolly deposited in the Foundling Hospital; and their father appeared to receive with profound indifference the failure of an attempt which some of his patrons made to identify and recover them. In the year of his arrival in Paris, after an unsuccessful attempt at the composition of operatic music, Rousseau found a place as a clerk in the employment of a farmer-general, whose wife had laughed at him for making love to her some years before. About 1748 Diderot and D'Alambert engaged him to write musical articles for the *Encyclopédie*, which, as he said himself, he executed very quickly and very ill. He had great musical genius, but is pronounced to have never acquired more than a very middling knowledge of the science. Soon afterwards, being thirty-seven years old, he made the first attempt in authorship that indicated any true vocation for the pursuit. He read in a newspaper a prize-question proposed by the Academy of Dijon:—‘Has the progress of the sciences and arts contributed to the corruption or to the purification of morals?’ It seemed to him as if a new world of thought had revealed itself to his mind; he dashed off a vehement denunciation of civilized life, sent it in, and obtained the prize. His indistinct visions soon began to assume shape and color. He was, it is true, little qualified either by knowledge of history, or by exact philosophical habits, for working out true results in the problem of social progress: but his meditations brooded eagerly over the task; his impregnable self-confidence satisfied him that he was able to perform it, and the power of passionate eloquence which lurked within, soon enabled him to impress the world marvellously with the representation he gave of his irregular conceptions. Rousseau was not great, either as a poet or as a philosopher; but he possessed, in an extraordinary degree, and with a felicitous proportion of the elements, that union of the two characters, which seems to be more powerful than any thing else in commanding the sympathy and guiding the opinions of the world. In the works which he composed after the date now in question, he exercised this power with a success which no writer has ever surpassed. Meanwhile, however, he saw his way but dimly. His musical reputation was raised by the success of his opera, ‘*Le Devin du Village*,’ and he wrote also a tragedy and three comedies, all of little worth. A second, but less successful prize-essay, ‘*On the Origin of Inequality among Mankind*,’ developed further his political speculations. He dedicated it to the magistrates of his native town, visited Geneva, was full of republican enthusiasm, and professed himself again a Calvinist. And here it is worth while to notice, that, so far as any fixed opinions can be attributed to such a mind, Rousseau was never either atheist or deist: he was a desponding sceptic, who felt himself compelled to reverence the morality of Scripture, little as he obeyed it in his life. He had now given up his clerkship for a government appointment, which he immediately resigned in a panic; and henceforth, for a long time, his very narrow income was chiefly made up by copying music, in which his friends employed him as a delicate way of giving aid to a proud man. In 1756 he accepted the invitation of Madame D’Epinay to take up his residence on her

estate, in the valley of Montmorenci, at the retired country house called L’Hermitage. There he composed some of his most brilliantly eloquent writings. His touching but very equivocal novel, ‘*La Nouvelle Eloise*,’ appeared in 1759; ‘*Emile*,’ an acute but chimerical treatise on education, published in 1762, was condemned with reason, both by the archbishop and the parliament of Paris. Immediately afterwards, the ‘*Contrat Social*,’ the most systematic exposition of his dream of social equality, was received with still more serious disapprobation by the government, and Rousseau found it wise to take refuge in Switzerland. Thence, passing secretly through Paris, he departed for England in January, 1766, on the kindly invitation, and in the company, of David Hume, who found a friendly home for him at Wootton, in Derbyshire. There he wrote the first six books of his extraordinary ‘*Confessions*,’ published after his death. If Rousseau was sane before, he certainly was not so now: his zealous and suspicious temper had become aggravated into a monomania; he treated both Hume and his Derbyshire host with ungrateful abuse, and quitted England in May, 1767. After a time of wandering through France, he was

[Tomb of J. J. Rousseau.]

allowed to return to Paris in 1770, with a caution to shun publicity, which he took a pride in setting at defiance. His literary activity had now ceased. He mixed much in society, though he had formerly been shy to excess. But his rudeness of manners, and suspicious testiness, were worse than ever; and his despondency seemed often to pass into despair. His health was failing, and his poverty becoming severe. The marquis De Girardin offered him, as his residence, a pavilion in the beautiful grounds of his chateau of Ermenonville, near Chantilly. There, after inhabiting it for a few weeks, he died on the 3d of July, 1778. [W.S.]

ROUSSEAU, J. L. C., a Ger. chemist, 1724–94.

ROUSSEAU, P., a French writer, 1725–1785.

ROUSSEAU, S., an orientalist, died 1820.

ROUSSEAU-DE-RIMOGNE, JEAN LOUIS, a Flemish mineralogist, 1720–1788.

ROUSSEL, P., a Fr. physician, au. of ‘*Système Physique et Morale de la Femme*,’ 1742–1802.

ROUSSEL, P. J. A., a Fr. writer, 1750–1815.

ROUSSEL, W., a French *savant*, 1658–1717.

ROUSTAN, A. J., a theologian and controversial writer of Geneva, 1734–1808.

ROUTH, B., an Irish Jesuit, confessor to the Princess Charlotte of Lorraine, 1695–1768.

ROUX, A., a French physician, 1726–1776.

ROUYER, C. M., a French jurist, 1745–1810.

ROVERE, DELLA, a noble family of Savona, in the state of Genoa, two of whom were popes (Julius II. and Sixtus IV.) the other principal members are—JOHN, nephew of Sixtus IV., and

brother of Julius II., præfect of Rome 1475. **FRANCESCO MARIA**, son of John, duke of Urbino, and general of Julius II., in whose interest he conquered Romagna and Ferrara. He was deprived of his estates by Leo X. 1516, and recovered them on the death of that pontiff 1522, died of poison 1538. **GUIDO**, his son and successor, a debauched and cruel character, died 1574. **FRANCESCO MARIA**, last duke of Urbino, an accomplished writer and patron of letters, 1551-1631. **F. UBALDO**, son of the latter, was a dissolute character, and died 1623.

**ROVERE**, J. S., a character of the French revolution, who acted as lieutenant of the infamous 'Journé Coupe Tête,' 1748-1798.

**ROVIGO**. See **SAVARY**.

**ROVIRA DE BROCANDEL**, **HIPPOLYTUS**, a Spanish painter, taught by E. Munoz, 1593-1675.

**ROWAN**, **JOHN**, an American statesman and lawyer, born in Virginia, 1773, but removed to Kentucky, where he successively rose to the various stations of member of the Convention which framed the constitution of Kentucky, Secretary of State, member of Congress, and Judge of Appeals, and United States Senator. Died 1843.

**ROWE**, **ELIZABETH**, known as a moralist and religious writer, was the daughter of a dissenting minister named Singer, and was born at Ilchester, in Somersetshire, 1674. In 1709 she became the wife of Thomas Rowe, who died in 1715. He wrote some poetical pieces, and a supplement to Plutarch's Lives. Mrs. Rowe then distinguished herself by publishing, in 1728, 'Friendship in Death, in Twenty Letters from the Dead to the Living,' and soon afterwards 'Letters, Moral and Entertaining, in Prose and Verse,' and 'The History of Joseph,' a poem. She died in 1737, and two years later Dr. Watts published her 'Devout Exercises of the Heart.'

**ROWE**, **NICHOLAS**, a poet and dramatic writer of considerable eminence, was born at Little Brookford in Bedfordshire, in 1673. His father, descended from an ancient family of that county, was serjeant-at-law, and having educated his son for the same profession, the latter was called to the bar; he paid little attention to the law, however, after the death of his father, but rather devoted himself to the cultivation of polite literature. He published his first tragedy 'The Ambitious Stepmother,' at the age of twenty-four; it was followed by 'Tamerlane,' intended as a compliment to King William; 'The Fair Penitent;' 'The Biter;' 'Ulysses;' 'The Royal Convert;' 'Jane Shore;' and 'Lady Jane Grey.' His original poems consist of some pathetic ballads: his version of Lucan's 'Pharsalia' is esteemed a masterpiece, but it is not his only classical production, as he also translated 'The Golden Verses of Pythagoras,' and the first book of 'Quillett's Callipædia.' He also wrote a Life of Shakespeare. Rowe became under secretary to the duke of Queensberry, when the latter was secretary of state, and on the accession of George I. he was appointed poet-laureate. Died 1718.

**ROWE**, **THOMAS**, a nonconformist minister, author of 'The Christian's Work.' Died about 1715. See **ELIZABETH ROWE** (above).

**ROWE**, **PETER**, sculptor and wax modeller. Died 1852, aged 82.

**ROWLANDS**, **HENRY**, a Welsh divine and antiquary, was a native of Anglesey, of which island he published an elaborate account, entitled 'Mona Restaurata.' Died 1722.

**ROWLANDSON**, **THOMAS**, an artist celebrated for his skill in caricature, was born in London, in 1756. He studied drawing at Paris; and, on his

return, availed himself of the advantages which an attendance at the Royal Academy afforded him; rose to some degree of eminence in his profession, and died in 1827. Among his works are the plates to 'Dr. Syntax,' 'The Dance of Life,' and 'The Dance of Death.'

**ROWLEY**. See **CHATTERTON**.

**ROWLEY**, **WILLIAM**, a dramatic writer and actor, of the age of Queen Elizabeth.

**ROWLEY**, **WILLIAM**, an eminent physician, born in London, in 1743. After having served abroad as a surgeon in the army, and made professional visits to Cuba and the Leeward Islands, he settled in London, where he obtained considerable reputation as a practitioner, though he somewhat marred his fame by his endeavors to oppose vaccine inoculation. He wrote 'Schola Medicinæ universalis nova,' and several tracts on medical subjects. Died 1806.

**ROWNING**, **J.**, an Eng. divine, au. of 'A compendious System of Natural Philos.,' 1699-1771.

**ROXANA**, a Persian lady of great beauty, who became the wife of Alexander the Great, and was put to death by Cassandra, B.C. 311.

**ROXBURGH**, **WILLIAM**, a physician and botanist, was born at Craigie, in Ayrshire, in 1759. He received his education at Edinburgh, served his time to a surgeon, went to India, and was appointed keeper of the botanical garden at Calcutta, where he formed an intimacy with Sir William Jones, and became a member of the Asiatic Society. Dr. Roxburgh made several important discoveries, particularly in the coloring matter of the lacca insect, and the cultivation of hemp in Bengal, for which he received three gold medals from the Society of Arts. His principal work is, 'The Plants of the Coasts of Coromandel,' 2 vols. 4to. He died at Edinburgh, in 1815.

**ROY**, **COUNT ANTOINE**, an able French statesman, was born at Savigny, in 1764. Soon after the first revolution broke out, he quitted the bar, to which he had been admitted in 1785, and took part in several mining speculations, which turned out most successful. After the fall of Napoleon he ably maintained constitutional principles in opposition to the ultra-royalist opinions then in vogue. He also displayed such a thorough acquaintance with financial questions, that he was made minister of finance in 1819-20; and short as was his tenure of office, it was distinguished by various measures of reform, which won for him the honors of the peerage. He was a member of the Martignac administration in 1828, but retired from office when Prince Polignac became minister in 1829; and though he accepted of no office under the regime of Louis Philippe, his long experience, sagacious judgment, and moderate counsels were for many years placed at the service of the chamber of peers. His private fortune was immense. Died 1847.

**ROY**, **JULIAN LE**, a celebrated clock and watch-maker, was born at Tours, in 1686. When very young, he showed a decided partiality for mechanical pursuits, and acquired the reputation of being a first-rate horologist. Died 1759.—His son, **PETER LE ROY**, was watch-maker to the king, and died in 1785. He published 'Mémoires pour les Horlogers de Paris,' 'Etrennes Chronométriques,' &c.—**JULIAN DAVID**, another son, became a member of the National Institute, and attached himself to architecture. He wrote 'On the Ruins of the finest Monuments of Greece,' 'On the Construction of Christian Temples,' &c.

**ROY**, **PETER CHARLES**, a French satirist and dramatic poet, was born at Paris, in 1683. His

principal pieces adapted for theatrical representation are, the operas of 'Callirhoe' and 'Semiramis,' the ballets of 'The Elements' and 'The Senses,' and the comedy of 'The Captives,' imitated from Plautus. His satires against the members of the French Academy prevented his gaining admission into that assembly, and he died in 1764.

ROYALL, ANNE, an American writer of political squibs and scandal, was born in Virginia. At an early age she was kidnapped by the Indians, and lived among them for fifteen years, when she escaped, married Capt. Royall, and took up her residence in Alabama. She was well known in political circles throughout the country, which she kept in terror, and from which she extracted subsidies, by her threats of exposure. She established two papers in Washington, first the 'Paul Pry,' and subsequently 'The Huntress,' and filled their columns with smart personalities. Died 1854, at an advanced age.

ROYE, F. DE, a French jurist, died 1686.

ROYE, GUY DE, archbishop of Rheims, and partisan of the popes of Avignon, killed 1409.

ROYEN, A. VAN, a Dutch botanist, 1705-79.

ROYER, J. N. P., a French musician, 1705-1755.

ROYER-COLLARD, ANT. ATHANASIUS, prof. of medicine to the faculty of Paris, 1768-1825.

ROYER-COLLARD, PIERRE PAUL, one of the select class of philosophical thinkers produced by France since the era of the Revolution, was born at Sompuis, near Vitry-le-Français, 1763, and in 1789, when the Revolution commenced, was only obscurely known as an advocate of the parliament of Paris. In political sentiments he was a royalist and a friend of popular freedom; in philosophy he became a disciple of Reid, and one of the first to lead the reaction against the mere sensationalism of Cabanis and Condillac. From the end of the Terror till 1810, however, Royer-Collard was more active as a politician; especially as a member of the council established in France by Louis XVIII., consisting of himself, and Clermont Gallerande, the Abbé de Montesquiou, Becquey, Cuvier, and others. Most of this period he was, according to the prevailing fashion, a sensualist, but the works of Reid were destined to enlighten him; and, from 1811, when he was appointed professor of modern philosophy and history, he commenced reforming his opinions, and as he possessed great power as a logician and an orator, he soon began to be looked upon as the founder of a new school. On the restoration of the royal family, in 1815, Royer-Collard returned to political life, and his famous scholar, Victor Cousin, succeeded him as professor at the Sorbonne; he now joined in the parliamentary opposition, and such was the reputation he enjoyed that, at the general election of 1827, he was returned for seven different places at the same time. The party in the chamber of representatives of which he was considered chief, is known to European fame as that of the *doctrinaires*, and its birth dates from the session of 1817; its history is marked by much philosophical pedantry, and its deficiency in momentum was shown by the helpless situation in which Guizot found himself at the revolution of 1848. What is the value, read by this light, of such namby-pamby diletanteism in philosophy and politics as eclecticism signifies? Royer-Collard had the happiness to die, without reading that severe lesson, in 1845. [E.R.]

ROYOU, T. M., a French ecclesiastic and journalist, founder of the 'Ami du Roi' in 1790, 1741-1792. His brother, J. CORENTIN, a royalist, historian, and publicist, 1745-1828.

ROZEE, Mademoiselle, an ingenious artist, was born at Leyden, in 1632. She neither used oil nor water colors in her pictures, but silk floss on the ground, disposed according to the different degrees of the bright and dark tints, which she applied with great judgment and taste. In this manner she executed historical subjects, landscapes, and portraits. Died 1682.

ROZIER, FRANCIS, a botanist and agricultural writer, was born at Lyons, in 1734. He was an ecclesiastic, and obtained a priory, but devoted himself almost wholly to botany and natural history. He conducted the *Journal de Physique et Histoire Naturelle*, and was the author of a 'Course of Agriculture,' 'Elementary Demonstrations of Botany, &c.' He was killed during the siege of Lyons, in 1793.

RUAR, M., a German Socinian, 1588-1657.

RUAULT, J., a French *savant*, 1580-1636.

RUBBI, A., a celebrated Venetian poet, 1739-1810.

RUBENS, ALBERT, son of Peter Paul, was born at Antwerp, in 1614. He succeeded his father as secretary to the council, and was greatly esteemed by the Archduke Leopold, governor of the Low Countries. Died 1657. He wrote 'De Re Vestitaria Veterum,' 'Regum et Imperatorum Romanorum Numismata,' 'De Vita Flavii Manlii Theodori,' &c.

RUBENS, PETER PAUL, was born at Cologne, June 29, 1577, where he remained with his parents, natives of Antwerp, until his father's death in 1587, when he removed with his mother to Antwerp. After receiving some preliminary instruction from two other masters Rubens was finally placed with Otto Venius, the most celebrated master of his time at Antwerp; he remained with Venius for four years,

[Rubens' Chair at Antwerp.]

until 1600, when he went to Italy and entered the service of Vincenzo Gonzaga, as gentleman of the chamber, and copied several pictures for that duke, both at Rome and Venice. In 1605 he was sent by the duke on a mission to Philip III. of Spain, and while at Madrid, as previously at Rome, he was much occupied in portrait painting, but it is remarkable what a contrast the delicate and elaborately finished portraits of this early period, present, when compared with the bold masterpieces of his later years. This travelling, however, from one country to another, and thus early making himself acquainted with the various schools, was evidently of infinite advantage to him; the glorious works of the Venetians seem to have made the most lasting impression on him. His return home was hastened by the illness of his mother in 1608, but he did not arrive at

[House of Rubens.]

Antwerp until after her death. The appointment of court painter to Albert and Isabella, in the following year, induced Rubens to give up his intention of returning to Mantua, and he decided upon settling at Antwerp. In 1610 he was married to his first wife, Isabella Brants, who died in 1626. In 1620 he visited Paris, by the invitation of Marie de Medici, and made there the sketches for his celebrated Luxembourg series of painting in honor of that princess, and her marriage with Henry IV., now in the Louvre. In 1628 he was sent by the Infanta Isabella a second time to Spain, on a diplomatic mission to Philip IV., and in the following year on a similar mission to Charles I. of England, who knighted Rubens in 1630, who appears to have presented the king with the picture of Peace and War, now in the National Gallery, on the occasion of this mission, when also Charles gave him the commission to decorate the ceiling of Whitehall palace, the pictures for which were afterwards executed in Antwerp. In 1630, also, he married his second wife, Helena Forment, a beautiful girl, in her nineteenth year only. Rubens died at Antwerp, May 30, 1640, possessed of great wealth, and after one of the most remarkable careers recorded in the history of art. His success was, however, only commensurate with his ability. 'He was perhaps the greatest master,' says Sir Joshua Reynolds, 'in the mechanical part of the art, the best workman with his tools, that ever exercised a pencil.' His works are extremely numerous, the prints alone after him amount to about 1,200; but the majority of his pictures were chiefly executed in large from his own sketches, and finished only by himself; it is a physical impossibility that he can have executed entirely all the pictures that are accredited to him. His pupils were able and numerous, the principal were A. Vandyck, A. Van Diepenbeck, J. Van Hoeck, F. Van Thulden, G. Segers, Jordaens, Snyders, and Erasmus Quellinus. He is still seen to the utmost advantage at Antwerp, but he is also gloriously represented in the Picture Gallery at Munich. His masterpiece is generally considered the Descent from the Cross, in the cathedral at Antwerp, but now sadly obscured; there is, however, a fine old print of it by Lucas Vorsterman.—(Grimbergen, *Historische Levensbeschryving van P. P. Rubens*, 1774–1840; Waagen, *Peter Paul Rubens, his Life and Genius*, trans. by R. R. Nael, edited by Mrs. Jameson, London, 1840.)

[R.N.W.]

RUBENS. See ROSSI, GIROLAMO.

RUBINI, GIAMBATISTA, the celebrated tenor opera singer, was born at Romano, in Lombardy, 1795. His parents spared from their poverty a sufficient pittance to send him to Brescia for a scanty education, in which to the mere elements of general learning were added some brief lessons in music; at a later day, however, he was taught by Nozani and Rossini. He was apprenticed in his youth to a baker in Adro. While serving the morning rolls at the gate of the neighboring castle of the Bergniani, its lord marked his joyous air and the sweet voice with which he carolled his early song. He was taken into favor and was welcomed at the castle, and his evident talent for singing warmly encouraged. His greatest friend, however, was the housekeeper of the Curé of the village, who being remarkably fond of a sweet voice or a youthful face, made favor with her master in Rubini's behalf with such success, that he was honored by the Curé and elevated to the church choir, as one of the choristers. In spite of his ecclesiastical beginning, Rubini was attracted within the profane circle of the theatre, and made his debut at Palassola, where, as dancer and singer, he proved himself as nimble of foot as he was flexible of voice. From the humble success and more humble reward at the little theatre at Palassola, he passed to higher prices and greater triumphs at the operas of Brescia, Venice, Naples, Paris, London, and St. Petersburg. He soon became renowned everywhere as the greatest of tenor singers. He retired with a large fortune in 1845, and died in his own villa at Romano, on the 2d March, 1854, leaving behind him four millions of francs, the accumulated profits of fifty years of singing.

RUBINI, P., an Italian physician, 1760–1819.

RUBYS, C. DE, a French historian, 1533–1613.

RUCELLAI, BERNARD, an Italian statesman and historian, born at Florence, in 1449. Having married the sister of Lorenzo de Medici, he was promoted to the office of gonfalonier of justice, and employed on several important diplomatic missions. After the death of Lorenzo, he protected the members of the new Platonic academy, for whose use he erected a palace with gardens, embellished with noble monuments of ancient and modern art. Died 1514. His son JOHN, born in 1475, was sent ambassador to Venice, in 1505; and, in 1512, he took an active part in the measures which led to the restoration of the Medici family. He was afterwards papal nuncio in France, apostolical prothonotary, and governor of the castle of St. Angelo. D. 1525.

RUCHAT, A., a French theologian, 1680–1750.

RUDBECK, JOHN, a Swedish prelate, chaplain of Gustavus Adolphus, and promoter of the publication of the Bible, called by his name, 1581–1636.

RUDBECK, OLAUS, father and son, were both eminent Swedish physicians and natural philosophers. The elder, who died in 1702, wrote an able work, entitled 'Exercitatio Anatomica;' he was also the author of a whimsical but learned work, on the locality of Paradise, which he places in Sweden; and assigns that country as the common parent of the German, English, Danish, and even Greek and Latin nations. The son is known chiefly as the author of a work on the natural history of the Bible. Died 1740.

RUDBORNE, THOMAS, warden and architect of Merton College, Oxford, died about 1442.

RUDDIMAN, THOMAS, a distinguished grammarian and critic, was born in 1674, at Boyndie, in Banffshire; was educated at King's College, Aberdeen; became assistant keeper of the advocates' library at Edinburgh; set up a printing-office in

conjunction with his brother; was one of the founders of the earliest literary society in Scotland, in 1718; and died in 1757. His 'Rudiments of the Latin Tongue,' long used as an elementary book in schools, is the most popular of his productions; but he wrote other grammatical works, and was the editor of the works of George Buchanan, in Latin. He also established the Caledonian Mercury.

RUDENSCHOELD, COUNT, a Swedish statesman, who negotiated the marriage of the prince royal of Sweden with the sister of the king of Prussia in 1739, and was afterwards minister for foreign affairs and chancellor, 1698-1783.

RUDING, ROGERS, an English divine, born at Leicester, in 1751; became fellow of Merton College, Oxford; was presented to the living of Morden, in Surrey; and soon after was elected a fellow of the society of antiquaries, to whose *Archæologia* he was a contributor. He published 'Annals of the Coinage of Britain and its Dependencies,' in 4 vols. 4to. Died 1820.

RUDOLPH, C. A., a Swed. natural., 1771-1832.

RUE, CHARLES DE LA, a learned French Jesuit, poet, and classical editor, 1643-1725.

RUE, CHARLES DE LA, a learned Benedictine of the congregation of St. Maur, editor of an edition of Origen, which was finished by his nephew, 1684-1739. The latter, VINCENT DE LA RUE, also a learned Benedictine, died 1762.

RUE, P. DE LA, a Dutch poet, 17th century.

RUFFHEAD, OWEN, a miscellaneous writer, was born in London, about 1723; entered at the Middle Temple, and was called to the bar; published an edition of the statutes, and conducted a periodical paper, called the Contest. He also wrote the 'Life of Pope,' &c. Died 1769.

RUFFI, ANTHONY DE, a French lawyer and historian, 1607-1689. His son, L. ANTHONY, known as a man of letters, 1657-1724.

RUFFINI, P., an Italian mathemat., 1765-1822.

RUFFO, D. F., a cardinal of Naples, 1744-1827.

RUFINUS, or RUFFINAS, sometimes called by the surname TORANIUS, a celebrated Italian ecclesiastic and Scripture commentator, born at Aquileia about the middle of the 4th century. He embraced the monastic life about 371, and accompanied St. Jerome to the East; that father, however, afterwards wrote against him on account of his apology for Origen. In 410 he was condemned as a heretic by Anastasius, and soon after was driven to take refuge in Sicily by an irruption of the Visigoths, where he died either that year or the following. Besides his original works, he translated from the Greek into Latin the works of Josephus, Eusebius's Ecclesiastical History, the Recognitions of St. Clement, and the works of Basil and Gregory Nazianzen.

RUFUS, a physician of Ephesus, flourished in the reign of Trajan. He discovered the origin of the nerves of the brain, and made observations on the crystalline lens of the eye. He also wrote treatises on the diseases of the urinary organs, &c.; and was esteemed by Galen to have been one of the ablest physicians who had preceded him.

RUFUS, CAIUS MUSONIUS, a Stoic philosopher, distinguished at Rome in the age of Tiberius.

RUFUS, PUBLIUS RUTILIUS, consul and tribune of Rome, time of Sylla.

RUGENDAS, GEORGE PHILIP, a celebrated battle-painter, born at Augsburg, in 1666. Such was his zeal for the advancement of his art that, during the siege of Augsburg, he freely exposed himself amidst the fire and carnage, that he might be able to sketch the scenes around him. Died 1742.

RUGGIERI, C., an Ital. astrologer, 16th cent.

RUGGIERI, C., an Ital. philologist, 1714-1766.

RUGGLE, G., an Eng. dramatist, 1575-1622.

RUHL, PHILIP JAMES, a member of the French convention, killed himself 1795.

RUHNKEN, D., a Greek critic, 1723-1798.

RUHS, FREDERIC, a German historian, born in Swedish Pomerania, in 1780; studied at Gottingen; was made professor at Griefswald; wrote a 'History of Sweden,' 4 vols.; afterwards became a professor of history at Berlin; and died at Leghorn, in 1820.

RUINART, THIERRY, a French theological writer, was born at Rheims, in 1657. He became a Benedictine, and was the associate of Mabillon in his literary labors. He also printed an edition of the works of Gregory of Tours, a volume on the Martyrs of the first four centuries, and other books on ecclesiastical history. He died in 1707.

RUYSDAEL, JACOB. This celebrated Dutch painter was born at Haarlem, about 1635, and died 1681, and was originally educated for the medical profession. With whom he studied painting is not known. His landscapes are numerous, and are all distinguished for a simple natural treatment, and for secluded, rugged scenery; generally of a cold and sombre character, but executed with great accuracy and selected with a true appreciation of the picturesque, of that character generally designated the romantic; they are further distinguished for their ordinary daylight, in contradistinction to the sunny effects of Cuyp or Berghem. Ruysdael's style has much of the character of the works of Gaspar Poussin and Salvator Rosa in color and general effect, but is distinguished from the works of these great painters by a much more elaborate treatment of detail, and the chief portion of the picture by the special prominence of the foregrounds generally with Ruysdael. The peculiar scenery he represents rocky, and yet on a small scale, reminds much more of the neighborhood of the Ardennes, than of Italy or Switzerland, both of which countries he is supposed to have visited, but very improbably; his favorite subjects are cascades. He sometimes painted marine pieces, and with great success; figures he never painted, those we find in his landscapes were introduced either by Ostade, Wouverman, A. Vandevelde, or Berghem. His brother, SOLOMON RUYSDAEL, was also a good landscape painter, and being many years older than Jacob, was probably his instructor in the art; some of the pictures attributed to Jacob may belong to Solomon, as considering his moderately short life, the pictures of Ruysdael are very numerous; he also etched a few plates.—(*Houbraken, Groote Schonburgh der Nederlantsche Konstschilders*, &c. Amsterdam, 1721.) [R.N.W.]

RUIS-GONZALEZ, a Sp. painter, 1633-1709.

RULHIÈRE, CLAUDE CARLOMAN DE, a French historian, who acted as confidential secretary to the baron de Breteuil, and accompanied him in his embassy to Russia, author of historical works concerning the Revocation of the Edict of Nantes, the Revolution in Russia 1762, and the Assembly of Poland, 1735-1791.

RULMAN, ANNE, a French jurist, 1583-1639.

RUMFORD, BENJAMIN THOMPSON, commonly called Count Rumford, one of those practical geniuses and indefatigable workers in the cause of humanity by whom society will be carried to a far higher perfection than we know at present, was born at Rumford in New Hampshire, now Concord, 1753. He was married to a rich widow at nineteen, and had risen to some consequence when the American revolution broke out, but being a royalist was obliged

to fly, and his wife soon after died in childbed. In 1776 he brought the news of Washington's success to the English court, and for his services to the crown received an appointment in the foreign office; this, however, he abandoned in 1782 to take up arms in the colony, where he organized a troop of dragoons, and commanded them himself with the rank of colonel. At the peace in 1784 Colonel

[Rumford House, Concord, N. H.]

Thompson received the king's permission to enter into the service of the king of Bavaria, and not only so, but was knighted on the occasion, and had half his military pay secured to him. In this service he rose step by step till the administration of the kingdom was in his hands, and he made such use of his power and influence that the face of things was entirely changed, and the country rescued from the abyss of squalid poverty into which it was sinking. It was for these services that he received among other honors the title of count taken from his native place. In 1802 he married the widow of Lavoisier, and afterwards lived at Auteuil, near Paris, devoted to researches in natural philosophy. Died 1814.

[E.R.]

RUMPH, G. E., a German botanist, 1626-1693.

RUNCIMAN, ALEXANDER, a Scottish painter of subjects from Ossian, 1736-1785.

RUNEBERG, EPHRAIM OTTO, a Swedish surveyor, mapmaker, and engineer, 1722-1770.

RUNG, P., an English biographer, 1750-1823.

RUNIUS, J., a Swedish poet, 1679-1713.

RUNJEET-SING. See SINGH.

RUNNINGTON, CHARLES, serjeant-at-law, was born in Hertfordshire, in 1751; and in 1768 he was placed with a special pleader, who employed him on a digest of the law of England. In 1778 he was called to the bar; in 1787 he was made serjeant-at-law; and, in 1815, appointed commissioner for the relief of insolvent debtors, which office he resigned in 1819. He published 'Hale's History of the Common Law,' 2 vols.; 'Gilbert's Law of Ejectments,' and 'Ruffhead's Statutes at large,' 4 vols. 4to. Died 1821.

RUPERT, a Flemish abbot, 1091-1135.

RUPERT, PRINCE, otherwise Prince Robert of Bavaria, a distinguished name in the history of Charles I., was the third son of Frederic V., elector palatine of the Rhine, by the princess Elizabeth, eldest daughter of James I., king of England. He was born in 1619, and though hardly of age at the commencement of the parliamentary wars, he offered

his services to his uncle, who naturalized him, and advanced him to the dignity of a peer of England, and knight of the Garter. He exhibited little prudence in his conduct of military operations, but was remarkable for his impetuous gallantry and chivalrous bearing. He was in all the principal actions with the parliamentary forces, and led the charge at the battle of Naseby; soon after which he surrendered Bristol to General Fairfax, with little show of defence. For this luckless step the king hastily dismissed him his service, and ordered him beyond seas, and Rupert had no further share in events till the disaffection of part of the English navy in 1648, of which he took the command in the interest of Charles II. With these ships he harassed the English trade, until Admiral Blake compelled him to retire from the English seas, and he lost many of them by shipwreck. He was subsequently at the French court with Charles II., and after the restoration distinguished himself as naval commander in the Dutch war against De Ruyter and Van Tromp. His successes again were rather the reward of his daring courage than good management. They were such, however, as fully sustained the reputation won by the British navy under the great admiral whose outraged ashes were now reposing in St. Margaret's churchyard. Prince Rupert retired from warlike enterprise after the second Dutch war, 1672-4, and devoted his time to scientific pursuits, which had always indeed occupied his leisure. Chemistry and the arts were his favorite studies, and the composition of the well-known 'prince's metal,' is said to have been discovered by him. Died 1682. [E.R.]

RUPPRECHT, F. C., a painter, engraver, and architect of Bavaria, 1779-1831.

RUSBROCK, or RYSBROECK, JEAN, a celebrated mystic writer, founder and reformer of the monastery of Groendal, author of *De Nuptiis*, or *Spiritual Marriage*, and several other works, 1294-1381.

RUSCA, E., an Italian physician, 1801-1834.

RUSCA, F. D., a French general, 1761-1813.

RUSCELLI, J., an Italian *savant*, died 1566.

RUSH, BENJ., a celebrated American physician, was born in 1741, at Bristol, in Pennsylvania; was educated at Princeton College; took his degree at Edinburgh, in 1768; was chosen a member of Congress for Pennsylvania, in 1776; was appointed professor of medicine and clinical practice at the university; and died in 1813. During the devastation caused by the yellow fever in 1793, Dr. Rush highly distinguished himself, and his history of that epidemic is a work of great value. He also wrote 'Medical Inquiries and Observations,' and 'Essays, Literary, Moral, and Philosophical.'

RUSH, JACOB, an American judge, brother of the celebrated Dr. Rush, 1746-1820.

RUSHTON, E., a catholic writer, 1572-1586.

RUSHWORTH, JOHN, secretary of Fairfax, general of the parliamentary forces, distinguished for his valuable historical compilations connected with the period, 1607-1690.

RUSSEL, A., a Scotch physician, 1726-1805.

RUSSEL, G., a divine and poet, 1728-1767.

RUSSEL, WILLIAM, an historical writer, was born in the county of Midlothian, in 1746. He was brought up as a printer, which business he for a time followed, and then became an author by profession. His works are, 'A History of America,' 2 vols. 4to.; 'A History of Modern Europe,' 4 vols. 8vo.; and 'A History of Ancient Europe,' which was completed in 3 vols. by Dr. Coote, the work being unfinished at his death, in 1793.

RUSSELL, a noble family which has given sev-

eral illustrious names to English history. The first of any note is SIR JOHN RUSSELL, speaker of the House of Commons in the reign of Henry VI., and companion-in-arms of Henry VIII. in his French wars. He was created earl of Bedford, and enriched with the lands of the abbey of Tavistock and the monastery of Woburn; died 1555. WILLIAM, fourth earl, and first duke of Bedford, was made a knight of the Bath at the coronation of Charles I., and became a member of the 'long parliament' which met in November, 1640. At the battle of Edgehill 1642, he was general of horse for the parliament, but soon after that event he retired to private life, and appeared again at the restoration, when Charles II. created him a knight of the Garter. He survived to be present at the coronation of William and Mary, who created him (1694) marquis of Tavistock and duke of Bedford; died 1700. LORD WILLIAM RUSSELL, second son of the preceding (next article). EDWARD, cousin of duke William, and earl of Orford, an admiral, distinguished at Cape la Hogue, 1651-1727. JOHN, duke of Bedford, lord-lieutenant of Ireland, ambassador to France 1762-1763, died 1771. FRANCIS, son of the latter, and his successor in the dukedom, chiefly distinguished as a patron of agriculture, 1765-1802.

RUSSELL, LORD WILLIAM, second son of the fourth earl of Bedford, was, according to the biography written by his descendant, born on the 29th of September, 1639. His wife, the worthy participator in his fame, to whom he was married in 1660, was a daughter of the earl of Southampton, and the widow of Lord Vaughan. He was not a man of brilliant qualifications, his temper and habits seem

[The Rye House.]

to have been adapted more to domestic repose than public life, and a strong sense of duty appears alone to have caused his memorable connection with the history of the reign of Charles II. He was seriously listened to in the House of Commons, and he acquired as much influence there as it was perhaps possible for one independent man to have in an assembly so little influenced as it then was by the spirit which has usually guided the parliament of England. It is a question in historical criticism, whether reliance ought to be placed on the documents which show that many distinguished members of the opposition were bribed by the king of France, but it is worthy of remark that Russell's name does not appear in the list. The explosion of the Ryehouse plot, his trial and fate, are important matters of

history. Contemporary with the projects for rescuing the constitution, there was an under plot for the assassination of the king and his brother, with which certainly Russell was not concerned, though he had some intercourse with its contrivers. Yet it can hardly be said that he did not intend to take up arms against the existing power, and that his fate, presuming that power to be a legitimate one, was a stretch of the law. His merit, in fact, consisted in, after serious and earnest consideration, resorting to resistance as better than submission to a government which had invaded the constitution. And though he himself bore the penalty of the unsuccessful revolter, the country reaped the fruits of his martyrdom in the revolution. He was beheaded on the 21st July, 1683. [J.H.B.]

RUSSELL, Lady RACHEL, wife of the preceding, was daughter of the Earl of Southampton, and widow of Lord Vaughan. In 1667 she was married to Lord William Russell; and the affectionate zeal with which she assisted him when in trouble, and the magnanimity of her behavior after his death, have excited for her a general feeling of respect and sympathy. Being refused counsel upon his trial, and allowed only an amanuensis, she stood forth in that capacity, and took down the notes. She survived his lordship 40 years, which period she occupied in the exercise of pious and social duties. Her 'Letters,' which do equal credit to her understanding and heart, have been often reprinted. Died 1723.

RUSSELL, MICHAEL, LL.D., bishop of Glasgow and Galloway, was born at Edinburgh 1781; studied at Glasgow, and having received ordination, was in 1808 appointed to St. James's chapel, Leith, where he continued to officiate till his death. To extensive acquirements, theological and literary, Dr. Russell added the pen of a ready and elegant writer. His contributions to the *Encyclopædia Metropolitana* and the *British Critic* were remarkable for their learning and research; his works on Palestine, Egypt, and various other publications written for the Cabinet Library, still hold their ground; and his 'Connection of Sacred and Profane Histories,' extended his fame far beyond the limits of his native land. On his elevation to the episcopal chair in 1837, the university of Oxford marked its respect for his character and attainments by conferring on him the degree of D. C. L. by diploma; an honor never before bestowed on a Scotchman not educated at Oxford. Died 1848.

RUST, GEORGE, a learned prelate, was born at Cambridge. He became fellow of Christ's College; but, at the Restoration, he went over to Ireland, and was preferred to the deanery of Connor and the rectory of Magee. He was afterwards made bishop of Dromore, where he died in 1670.

RUSTICI, J. F., an Italian sculptor, died 1540.

RUTGERS, HENRY, an Am. revolutionary officer, died 1830.

RUTGERS, JOHN, a Dutch critic, 1589-1625.

RUTHARD, C., a Dutch painter, 17th century.

RUTHERFORD, DANIEL, a natural philosopher and physician, was born at Edinburgh in 1749; studied in that university; succeeded Dr. John Hope as professor of botany and keeper of the botanic garden, in 1786; and died in 1819. Dr. Rutherford was the discoverer of nitrogen, and was the first who represented oxygen gas (then called vital air) as the necessary constituent of all acids.

RUTHERFORD, J., a Sc. physician, 1695-1779.

RUTHERFORD, SAM., a dist. Scotch divine of the 17th cent., professor of divinity in New College, St. Andrews, author of several controversial works.

**RUTHERFORTH, THOMAS**, an English divine, was born at Papworth Everard, in Cambridgeshire, 1712; was educated at St. John's College, Cambridge; where, in 1745, he was appointed professor of divinity; and died, rector of Barley in Hertfordshire, with the archdeaconry of Essex, in 1771. His most important works are, 'A System of Natural Philosophy,' 2 vols.; 'An Essay on the Nature and Obligations of Virtue,' 'A Discourse on Miracles,' 'Institutes of Natural Law,' 2 vols.; and 'Sermons.'

**RUTHVEN, WILLIAM**, earl of Gowrie, a Scottish nobleman, whose name is famous in history as chief of the conspiracy formed in the reign of James VI., with the view of compelling that monarch to expel the duke of Lennox and the earl of Arran from the kingdom. He perished on the scaffold in 1584. His sons, JOHN and ALEXANDER, were massacred by the armed followers of James VI. under circumstances which have never been satisfactorily cleared up, in 1600.

**RUTILIUS LUPUS**, a rhetorician, 1st century.

**RUTILIUS NUMATIANUS, CLAUDIUS**, a native of Gaul, known as a Latin poet, and præfect of Rome under Honorius, 5th century.

**RUTLEDGE, JAMES**, an English writer, who went to Paris and died there in prison, 1796.

**RUTLEDGE, EDWARD**, an Amer. revolutionist, signer of the Declaration of Independence, a famous lawyer, and governor of South Carolina, was born in that State in 1749. Died 1800.

**RUTLEDGE, JOHN**, chief justice of the U. S., was a brother of the preceding. He took an early part in behalf of the revolutionary cause, was a member of the first Congress in 1774. In 1776 he was appointed the president of South Carolina, and commander in chief of that colony. In 1779 he was governor of his State, and after having been successively made judge of the court of chancery, judge of the supreme court of the United States, chief justice of South Carolina, was finally promoted to the high function of chief justice of the U. S. D. 1800.

**RUTTZ, J.**, an Irish physician, 1698-1775.

**RUVIGNY, H. DE.** a French general, 1647-1720.

**RUXTON, GEORGE F.**, a lieutenant in the British army and well-known traveller, the author of 'Life in the West,' and 'Adventures in Mexico and the Rocky Mountains,' first published in Blackwood's Magazine. Died at St. Louis 1848, aged 38.

**RUYSCH, FREDERIC, M. D., F. R. S.**, a famous Dutch anatomist, born at the Hague, 23d March, 1638, and died in 1731 at the great age of ninety-three. He was an ingenious and indefatigable anatomist, and having discovered a method of arresting the decay of animal bodies by the use of a peculiar kind of injection, he collected a museum which for the beauty of the preparations was one of the wonders of the world. It was sold, in 1698, to the czar Peter, and was transported to St. Petersburg. At the age of eighty, Ruysch collected and arranged another, but the secret which he possessed died with him, and is no longer known; though it is now believed that the antiseptic element employed by him was arsenic. [J.M.C.]

**RUYTER, MICHAEL**, a famous Dutch admiral of the period of the English commonwealth, was born at Flushing in 1607, and having entered the navy in boyhood, became captain of a vessel as early as 1635. His first laurels were won in the West Indian seas, where he was sent to co-operate with the Portuguese in opposition to the Spaniards, with whom the rising Dutch republic was now fighting

the battle of their independence. These achievements, and his operations on the coast of Barbary, date from 1641 to about 1650, and such was the courage of Ruyter that, on one occasion, he entered the roadstead of Sallée in a single ship, when the passage was disputed by five Algerine corsairs of large size. The action was witnessed by the inhabitants of the city, who placed Ruyter on a finely caparisoned horse, and conducted him in triumph through the streets, with the commanders he had defeated led in sullen captivity. In 1652, when the war broke out between the English, and Dutch republic, Ruyter was appointed to the command of a squadron, ordered to convoy home a rich fleet of merchantmen, and he succeeded in his mission, notwithstanding two days' hard fighting with Sir George Ayscough off Plymouth. In October of the same year he was joined by De Witte, and the two commanders contended with Blake and Ayscough on the Flemish coast. During the remainder of the war he fought under Van Tromp, and it is difficult to say whether the English or the Dutch most distinguished themselves in the series of battles fought in the English channel: in the action off Folkestone, Ruyter compelled Blake to fly for safety to the Thames. The war lasted two years, and in the final action, near Scheveling, Ruyter and Van Tromp were opposed to the English under Monk and Lawson: success declared for the English, and Van Tromp being killed, Ruyter withdrew the wreck of the Dutch navy to the Meuse. The Dutch republic was now reduced to sue for peace; but Ruyter found immediate employment as commander of an expedition to Barbary, and in the recapture of the Dutch establishments on the coast of Africa; besides which, in 1659, he was sent to aid the king of Denmark, and obtained two victories over the Swedish fleets. In 1665 the commercial rivalry of the two nations induced the English government, under Charles II., to declare a fresh war with Holland, and Ruyter was matched with varying success against Monk duke of Albemarle, Prince Rupert, Sir G. Ayscough, duke of York, and the earl of Sandwich. In the course of two years several great actions were fought, and then negotiations for peace were entered upon. The preliminaries, however, were foolishly and insincerely protracted, and Ruyter, taking advantage of the opportunity, sailed up the Thames as far as the Medway, and not only destroyed much shipping, but spread consternation as far as London. The peace of Breda, which immediately followed, lasted from 1667 to 1672, when Charles II. wantonly provoked fresh hostilities in gratification of the French alliance; that court having been at war with Holland, and Ruyter actively engaged in it, since 1671. The first great action between an armament of about 150 vessels on both sides, the Dutch fleet commanded by Ruyter, was fought off Solebay, on the coast of Holland, and again the English and Dutch seamen dealt terrible destruction against each other without either side obtaining a decided advantage. Peace was concluded between England and Holland in February, 1674, and Ruyter was despatched to the Mediterranean to carry on the war with the French. One object was to relieve Messina, which was occupied by French troops, and guarded by a fleet of thirty sail, under the Admiral Duquesne; the squadron of Ruyter numbered twenty-four sail, but it was reinforced previous to action by four Spanish vessels. These armaments encountered each other in desperate conflict off the eastern coast of Sicily, and Ruyter, almost at the beginning of the action, had both

his legs shattered; he continued, nevertheless, to direct the battle, till there was no longer any probability of success, and then ordered a retreat into the port of Syracuse, where he died of his wounds on the 26th of April, 1676. [E.R.]

RUUVEN, PETER VAN, a Dutch painter of history, taught by Jordaens, and occupies high rank among the artists of his country. Many of his historical tableaux are in the chateau of St. Loo; he was employed on the embellishments at the Hague when it was visited by William III., 1650-1718.

RUZZINI, a doge of Venice, 1732-1735.

RYCKAERT, MARTIN, a Flemish landscape painter, 1591-1636. DAVID, his son and pupil, famous for his skill in the grotesque, was born 1615, and became director of the academy at Antwerp 1667, date of his death unknown.

RYCKE, J., a Flemish writer, 1587-1627.

RYCKEH, T., a Dutch philologist, 1640-1690.

RYDELIUS, ANDREIS, a Swedish theologian and philosopher, 1671-1738. His brother MAGNUS, professor of history and theology, 1676-1712.

RYDER, SIR DUDLEY, a native of Yorkshire, born 1691, attorney-general 1736 to 1754, died 1756.

RYFF, JAMES, a Swiss surgeon, 16th century.

RYLAND, J., a Baptist minister, died 1794.

RYLAND, W. WYNNE, an engraver of London, born 1732, executed for forgery 1783.

RYMER, THOMAS, historiographer royal, collector

of a vast mass of public documents relative to the history of England and its connection with other states, was born in Yorkshire 1638 or 1639, and received his appointment 1692. The publication of his collections was commenced in 1704, but the greater part remains in MS. at the British Museum. Died 1713.

RYSBRACH, JOHN MICHAEL, an eminent sculptor, was born at Antwerp in 1694. He came to England early in life, and derived considerable reputation and profit from the exercise of his art. Westminster Abbey and other cathedral churches contain specimens of his abilities, among which should be noticed the monuments of Sir Isaac Newton and the duke of Marlborough. Died 1770.

RYVES, BRUNO, a dignitary of the Church of England, born in Dorsetshire, distinguished as an historical writer and annalist of the civil wars, died 1677. His relation, SIR THOMAS RYVES, a distinguished civilian, advocate to Charles I., died 1651.

RZEWSKI, WENCESLAS, a Polish nobleman and general, who underwent a long imprisonment in Russia for his opposition to the pretensions of that country. He was remarkable also for his extensive knowledge of literature, philosophy, and the arts, and distinguished himself as a dramatic author and poet, 1705-1779. His son, SEVERIN, born 1745, has the reputation of being a traitor to his country, and was hung in effigy 1794.

## S

SAA, EMANUEL, a Portug. Jesuit, 1530-1596.

SAA DE MIRANDA, FRANCESCO, a Portuguese poet, who ranks next to Camoens, 1495-1558.

SAAD EDDIN MOHAMMED BEN HASSAN, a Turkish historian of great eminence, and preceptor of sultan Amurath III. He was well known under the name of Khodja Effendi, and became appointed to the office of mufti to the sultan, which he held till his death in 1600.

SAADI, SHEIK MOSLEHEDIN, one of the most celebrated poets of Persia, was born at Shiraz, in 1175, and died in the 120th year of his age. He studied at Bagdad, and pursued a religious course of life under the direction of the famous Sophi Abd al Kadir Ghilani, whom he accompanied on a pilgrimage to Mecca. He fought against the infidels, and carried his arms into India and Asia Minor. Being, however, taken prisoner by the Turks, he was put to work on the fortifications of Tripoli; but was redeemed by a merchant of Aleppo, who gave him his daughter in marriage with a dowry. Towards the close of his life he built a hermitage near the walls of Shiraz, where he passed his time in exercises of piety; and his tomb, on the spot where he had lived, was long visited by the admirers of his genius and devotion. He wrote 'Gulistun, or the Garden of Roses,' and other works.

SAADIAS GAON, a celebrated Jewish rabbin, 892-941.

SAARFIELD, a Spanish general, 1795-1837.

SAAS, JOHN, a French bibliographer, 1703-74.

SAAVEDRA FAXARDO, DIEGO DE, a Spanish writer and diplomatist, was born at Algezares, in Murcia, in 1584. He became secretary to the embassy at Rome, and afterwards was appointed sole agent for Spain at the papal court. He also assisted at some diets in Switzerland, and enjoyed for his reward, the collar of St. Jago, a canonry of the church, and a seat in the council-board for the Indies. He died in 1648.

SABACON, an Ethiopian conqueror, who founded a new dynasty in Egypt, 8th century B.C.

SABAS, the head of the sect of the Messalians, in the third century, whose doctrine enforced a strict adherence to every part of the Scriptures; and who, literally interpreting the divine instruction, 'Labor not for the meat that perisheth,' refused to engage in any employment.

SABATAI SEVA, a Jewish impostor of Smyrna, who, in 1666, arrogated to himself the character of the Messiah. He obtained such belief and so numerous were his adherents, that the jealousy of the Turkish government caused him to be seized and sent a prisoner to Constantinople. He here saved his life at the expense of his religion, and turned Mahometan. This pretender was the last of the false Messiahs.

SABATIER, A. H., a Fr. writer, 1726-1806.

SABATIER, ANTOINE, or SABATIER DE CASTRES, was born at Castres, in 1742. He was a very celebrated French writer, and was early connected with Helvetius and the philosophical party of the literati; but he soon left these, and showed his opposition to them in his work, 'Les Trois Siècles de la Littérature Française,' &c., which procured him many enemies, but brought him into notice. He next advocated religion and morality, but his practices being so discreditable, he emigrated at the revolution. On the restoration of the king he obtained but a comparatively small income, and continued his satire on the court and clergy, till sickness reduced him to find alleviation in the house of the Charitable Sisters at Paris, where he died in 1817. Among his numerous works are, 'Les Siècles Païens, ou Dictionnaire Mythologique, Heroïque, Politique, Littéraire, et Géographique de l'Antiquité Païenere,' 9 vols., and 'Les Caprices de la Fortune,' &c.

SABATIER, PETER, otherwise SABATHIER, and SABBATHIER, author of an edition of all the Latin versions of the Bible, 1682-1742.

SABATIER, R. B., a Fr. surgeon, 1732–1811.

SABBAGH, MICHEL, an Orientalist and poet, b. of catholic parents at St. Jean d'Acre, 1784–1816.

SABATHIER. See SABATIER.

SABBATHIER, T., a Fr. compiler, 1732–1807.

SABBATI, L., an Italian botanist, last century.

SABBATINI, ANDREA, or ANDREA DEL SALERNO, the first painter of the Neapolitan school, was born about 1480. He studied under Raphael, and imitated his manner with great success. He died at Naples, in 1545.—LORENZO, called also Lorenzo di Bologna, was another admired artist of the 16th century, and his pictures are frequently mistaken for those of Andrea. He died at Rome, in 1577.

SABBATINI, L. A., an Ital. composer, d. 1809.

SABELLICUS, M. A., an Ital. hist., 1436–1508.

SABELLIUS, was a presbyter of Ptolemais, a city in Pentapolis—a province of Lybia Cyrenaica, and lived about the middle of the 3d century. Amidst the metaphysical attempts to explain the relation of the Persons in the Trinity, he struck out a peculiar system. In opposition to the prevalent Alexandrian theology, which taught the doctrine of subordination, he held that the three names in the Trinity not only referred to relations wholly co-ordinate, but that the epithets Father, Word, and Spirit, were but the designations of three separate phases or aspects of operation in which the one Divine Essence had chosen to exhibit itself. He thus denied all immanent distinctions in the Godhead. The human and personal element in Christ was, according to him, only the fleeting form of a Divine manifestation, and the Holy Ghost was merely a Divine energy in the hearts of believers. In fact, in his general doctrine of personality, there is an approach to Pantheism, and the Arian heresy was its antagonistic product. The heresy of Sabellius was stoutly opposed by Dionysius of Alexandria, and Arianism laid hold of several of the orthodox bishop's extreme expressions. [J.E.]

SABIN, a king of the Bulgarians, 763.

SABINA, JULIA, wife of Adrian, by whom she was compelled to take poison, and died 138.

SABINIANUS, pope of Rome, 604–606.

SABINUS, AULUS, a Roman poet, 1st century.

SABINUS, GEORGE, in German '*Schellen*,' a modern Latin poet, was born in Brandenburg in 1508. He studied at Wittemberg, when but 15 years old, under Melancthon, whose eldest daughter he ultimately married. He became professor of the belles lettres at Frankfort-on-the-Oder, and afterwards rector of the new university of Königsberg. His great reputation made him known to the emperor Charles V., who ennobled him, and employed him on several embassies. Died 1560.

SABINUS, JULIUS, a Gaulish nobleman, who assumed the title of Cæsar during the contest between Vespasian and Vitellius, and was executed in the year 70. His two children and his wife, Eponina, who had displayed the most unbounded devotion for him, were also put to death.

SABLIÈRE, ANTOINE RAMBOUILLET DE LA, a French author, died 1680. His wife, Mademoiselle Hessein, better known as MADAME DE LA SABLIÈRE, is distinguished by her love for the serious studies and the friendship of La Fontaine. She died 1693.

SABLIÈRE, C., a French philologist, 1693–1786.

SABOLI, N., a Provençal poet, 1660–1724.

SABUNDE, R., a Spanish philosopher, d. 1432.

SACCHETTI, F., an Ital. novelist, 1335–1410.

SACCHETTI, G., an Ital. architect, died 1764.

SACCHI, three Italian artists:—ANDREA, a distinguished portrait painter of Rome, 1600–1661.

CARLO, a painter and engraver of Pavia, 1616–1705. PIERO FRANCESCO, renowned for his perspective, flourished at Pavia about 1460–1526.

SACCHI, J., an Italian musician, 1726–1789.

SACCHINI, F., an Italian Jesuit, who continued Orlandino's History of his Order, 1570–1625.

SACCHINI, A. M. G., a composer, 1735–1786.

SACHEVERELL, HENRY, a notorious high churchman and demagogue of the reign of Queen Anne, was born about 1672, at Marlborough, where his father was a poor clergyman; and in 1705 became preacher at St. Saviour's, Southwark, at the same time that he held the living of Cannock, in Staffordshire. The Toleration Act of 1689 had secured the free exercise of their religion to the protestant dissenters, then known under the three denominations of Presbyterians, Independents, and Baptists, but its operation was strenuously resisted by such men as Sancroft the primate, and other conscientious non-jurors, including the mystic divine William Law, and Collier, the ecclesiastical historian. These were men of high principle, who held themselves aloof from the government they supposed were ruining religion, being content to sacrifice their every hope of preferment in the cause. On the contrary Sacheverell and his party made political stock of the general alarm, and were continually preaching abusive sermons against the Whig government and the dissenters. Sacheverell was at length brought to trial for two such discourses, in which he had abused Lord Godolphin, then high treasurer, under the scurrilous name of *Volpone*. We live in times when the miserable libels of a Sacheverell would only create an hour or two's amusement, but it was far otherwise then; he was seriously impeached, and being brought to trial before the peers, on the 27th of February, 1710, he occupied that high court nearly a month, and was then condemned to suspension for three years, and to have his sermons burnt by the hangman. The whole country was now inflamed with resentment; Sacheverell was escorted about by processions of horse and foot, the queen was everywhere followed by shouts for Sacheverell, and the dwelling-houses of eminent dissenters were shamefully plundered, and no one friendly to them could appear without being abused; in fine, the general election of the ensuing autumn was so much influenced by this movement, that the Godolphin ministry was overthrown. On the expiration of his sentence, Sacheverell recommenced his incendiary harangues, chiefly, perhaps, to save appearances, and he was presented by the queen, now under Tory influence, and always zealously attached to the Church of England, to the rich living of St. Andrew's, Holborn. He died in obscure retirement 1724, the last thing recorded of him being a bequest of £500 to Bishop Atterbury, his friend and representative among the prelates. [E.R.]

SACHS, HANS, a German poet, 1494–1578.

SACKEN, BARON, a Russ. general, 1770–1837.

SACKVILLE, GEORGE, Viscount, third son of the first duke of Dorset, was born 1716, and was commander of the English and Hanoverian cavalry at the battle of Minden, 1759. Instead of bringing his troops into action when ordered, he was panic-stricken, and his pale looks and want of self-possession were marked by the other officers. He was tried by court-martial on the charge of cowardice, and not only dismissed the service, but had his name erased from the list of privy councillors. This man, however, became colonial secretary in the factious times of Lord North from 1775 to 1782, the period of the American war of independence. Died 1785.

The affair of Minden is very fully discussed in the valuable history, now in course of publication, by Lord Mahon. [E.R.]

SACROBOSCO. See HOLYWOOD.

SACROVIRUS, JULIUS, the principal author and chief of the revolt of the Gauls under Tiberius, defeated at Autun by Silius, and slew himself, 21.

SACY, ANTOINE ISAAC SILVESTRE, Baron De, one of the most universal scholars of our age, and particularly renowned for his Oriental learning, was born at Paris 1758, and occupied the first rank as professor under every form of government in France, from 1795 to the reign of Louis Philippe. He is author of several original works, and of many highly valued translations from the Oriental languages. Died 1838.

SACY, LOUIS DE, a Fr. advocate, 1654-1724.

SACY, LOUIS ISAAC, whose proper name was LE MAISTRE, was born at Paris, in 1613. He entered into orders, but being a zealous Jansenist, he was sent to the Bastille, where he continued two years, and wrote some works, particularly one, entitled 'The Figures of the Bible.' He also published a new translation of the Scriptures, 'Letters of Piety,' 2 vols; 'Heures de Port Royal,' 'An Attack on the Jesuits,' &c. Died 1684.

SADE, an illustrious Provençal family, one of whose lords is supposed to have been the husband of Petrarch's Laura. This family has given several statesmen and prelates to France since the 14th century. In recent times, two names distinguished in literature:—JAMES FRANCIS PAUL ALPHONSO DE, a native of France, was born in 1705. After becoming vicar-general of the archbishops of Toulouse and Narbonne, he was employed on a mission from Languedoc to the court at Paris; and in 1744 he was nominated abbot of Ebrueil, in Auvergne. After the lapse of eight years, he retired to Saumane, where he devoted himself to literary pursuits; and died in 1778. DONATIAN ALPHONSO FRANCIS, Count de, nephew of the above, was born in Paris in 1740. He was educated at the college of Louis le Grand, and then entered the army. He was one of the most abandoned and profligate of the French nobility. At length, however, his friends terminated his career by procuring his confinement in the madhouse at Charenton, where he died in 1814. He had great talent, but wrote only the most licentious novels.

SADEEL, ANTHONY, a learned French Huguenot and theological writer, was born of a noble family, in the Maçonnais, in 1534. At an early age he preached the reformed persuasion; for which, however, he was imprisoned, but obtained his release through the interposition of his royal patron. Henri Quatre made him his chaplain, and he attended that monarch in some of his campaigns; but, on the reconciliation of Henri to the Church of Rome, he retired to Geneva, where he was chosen pastor and Hebrew professor. He died in 1591, and his works were printed the following year.

SADELER, JOHN, a distinguished engraver, was born at Brussels in 1556. He executed many masterly works, and was honored by the patronage of the Elector of Bavaria. Died 1600. RAPHAEL, brother and pupil of the above, was born in 1555. He worked in conjunction with his relative, and executed upwards of 500 religious engravings. GILES, who was the nephew and pupil of the above brothers, excelled both of them in correctness and taste.

SADI. See SAADI.

SADLER, A., chaplain to Charles II., d. 1680.

SADLER, J., a political writer, 1615-1674.

SADLER, MICHAEL THOMAS, F.R.S., was born at

Snelston, in Derbyshire, in 1780; and it may be truly said of him that he was a scholar, an orator, a gentleman, and a philanthropist. He had, however, chiefly devoted himself to mercantile pursuits at Leeds, in connection with a brother, until 1829, when he was invited by the electors of Newark-upon-Trent to become a candidate for the representation of that borough in parliament, and for which he was ultimately returned, in opposition to Mr. Serjeant Wylde. At the general election (1830) he was again returned for Newark; and, in the ensuing year, for Aldborough, Yorkshire. His political opinions were generally more conscientious than popular, and he never failed, if not persuasively, yet honestly and fearlessly, to express them. His chief object in parliament appeared to be nothing less than conferring the largest portion of substantial benefits upon the great mass of the poor, for the agricultural portion of whom he sought to obtain parliamentary aid, to provide them with allotments of ground, &c.; while for Ireland, in the distresses of which he felt a deep sympathy, he eloquently urged the justice and necessity of a well-regulated system of poor laws. To spare the sacrifice of life among the children employed in the manufactories was another of his great objects; and on each he wrote as forcibly and clearly as he had spoken. To his perseverance, the amelioration of the condition of these poor children is owing; since, although his benevolent intentions were frustrated in the first instance, by the too powerful opposition of those whose cupidity rendered them deaf to any appeal against their pecuniary interests, yet his impressive eloquence had so thoroughly aroused the public to a sense of the evil, that, in the ensuing session of parliament, the late opponents of the measure were compelled to carry a similar bill to that which had been proposed by himself. His parliamentary exertions, and the intense anxiety they occasioned, are said to have been the primary cause of his death, which occurred in July, 1835, while he was in Ireland. Mr. Sadler's two principal works were, 'Ireland, its Evils, and their Remedies,' and his 'Law of Population,' in which the Malthusian doctrines were impugned and refuted.

SADLER, or SADLIER, SIR RALPH, an English statesman, was born in 1507, at Hackney, in Middlesex. In early life he enjoyed the patronage of Cromwell, earl of Essex, who introduced him to Henry VIII., in consequence of which he was employed in many political affairs, and had a share in the dissolution of the monasteries, partaking also of the spoil. He was sent on some embassies to Scotland; and at the battle of Musselburgh, in that kingdom, Sir Ralph greatly distinguished himself, and was made a knight banneret in reward of his services. At the accession of Elizabeth he was again sent to Scotland; and when the unfortunate Mary went to England, she was committed to his care. He died in 1587. A collection of his 'Letters and Negotiations' was published in 1809, in 2 vols. 4to., with a memoir, written by Sir Walter Scott.

SADLER, WILLIAM WINDHAM, a well-known aeronaut and chemist. He was in the establishment of the first gas company in Liverpool, where he also erected accommodations for warm, medicated, and vapor baths. During this period, however, he practised aerostation, and made 30 aerial voyages, in one of which he crossed the Irish Channel, from Dublin to Wales. In the last attempt from Blackburn, in Lancashire, Sept. 30, 1824, while descending, the car of his balloon struck against a chimney, and violently precipitated him to the earth and caused his death, aged 28.

**SADOC**, a learned Jewish doctor, in the 3rd century B.C. He was the disciple of Antigonus Sochæus, president of the Sanhedrim. Joining Baithosis, a fellow-disciple, he denied the resurrection, and from him and his name originated the sect of Sadducees. His followers disclaimed also the existence of angels and the doctrine of predestination. They believed there was no distinct principle like the soul, and, in consequence, opposed the idea of a future state of rewards and punishments.

**SADOLET, JAMES**, a learned cardinal, was born at Modena, in 1477. His father was a professor of jurisprudence at Ferrara, where he received his education, and attained great celebrity by his Latin poetry and philosophy. On the election of Leo X. to the pontificate, he was made one of his secretaries, and soon after bishop of Carpentras. He suffered much from the vicissitudes of war, and was several times compelled to quit the city, leaving his palace, &c. to the plunder of the soldiery. Clement VII. restored him to his office; and the succeeding pontiff, Paul III., again recalled him to Rome, raised him to the purple, and employed him on many negotiations. Died 1547.

**SAEMUND, SIGFUSON**, a celebrated Icelandic priest, poet, legislator, and historian in the 11th century. He had a share in forming the ecclesiastical code, wrote a 'History of Norway,' and was the compiler of that Scandinavian collection of poetry, termed 'Edda,' printed at Copenhagen in 1787, 4to. Died 1135.

**SAGE.** See **LE SAGE**.

**SAGE, B. G.**, a French chemist, 1740-1824.

**SAGE, JOHN**, a Scottish prelate, 1652-1711.

**SAGITTARIUS, GASPAR**, whose proper name was **SCHUTZE**, a Saxon archæologist, 1633-1694.

**SAGREDO, GIOVANNI**, a Venetian historian, who was elected doge in 1675. He resigned his office because not agreeable to the people.

**SAHED-IBN-ABAD**, a celebrated Persian vizier, historian, and literary *savant*, 940-995.

**SAINCTES, CLAUDE DE**, a French catholic theologian, and partisan of the league, 1525-1591.

**SAINT-AIGNAN, FRANÇOIS DE BEAUVILLIERS**, successively Count and Duke De, a French commander and statesman, remembered as a patron of learning, 1610-1687. **PAUL**, his son and successor in the dukedom, one of the most virtuous statesmen of the court of Louis XIV., governor of Burgundy, Anjou, and Berri, and a friend of Fenelon, 1648-1714. **PAUL HIPPOLITE**, brother and successor of the latter, a diplomatist and member of the Academy, 1684-1776.

**SAINT-ALBAN.** See **SAINT-GILES**.

**SAINT-ALBAN, RICHARD DE BURGH DE**, earl of Clanricard, an Irish nobleman, who aided in extinguishing the rebellion of 1600, 1565-1635.

**SAINT-AMAND, J.**, a French critic, d. 1754.

**SAINT-AMANS, J. FLORIMOND BOUDON DE**, a French agriculturist and botanist, 1748-1831.

**SAINT-AMANT, MARK ANTONY GERARD, Sieur De**, a French poet, 1594-1660.

**SAINT-AMOUR, WILLIAM DE**, a doctor of the Sorbonne, who wrote against the friars, died 1272.

**SAINT-ANDRE, J. B.**, a protestant minister and member of the French convention, 1749-1813.

**SAINT-ANDRE, J. D'ALBON, Maréchal De**, a famous commander of the catholic league, colleague of Guise and Montmorency, killed at the battle of Dreux, 1561.

**SAINT-ANDRE, NATHL.**, an anatomist, whose singularities of character are recorded by Nichols in his *Anecdotes of Hogarth*, died 1776.

**SAINT-ANGE, ANGE FRANÇOIS FARIAU DE**, a French poet and classical translator, 1747-1810.

**SAINT ARNAUD, JAKES LEROY DE**, marshal of France, and commander in chief of the French expedition to the East, against Russia, was born at Paris in 1801. His family was not a wealthy one, but controlled sufficient influence to obtain him a commission in the army, which he entered at an early age. During the reigns of Louis XVIII. and Charles Xth, the young subaltern shared in the dissipation of the gay French metropolis with all the unchecked ardor of youth. Scandal has been busy with that period of his life, and has marked it as being so disreputable as to have incurred the interposition of the police, which resulted in the subsequent imprisonment of St. Arnaud. He was at that time one of the body guard of Charles X., a position he was obliged to resign. He afterward passed some time in London, where his career was frivolous and dissipated. After the revolution of 1830, he returned to France and re-entered the army, and while his regiment was stationed at Fort de Blaze, where the Duchess de Berri was imprisoned, his energy and spirit were favorably noticed by Marshal Bugeaud, who marked the young subaltern as a promising officer and determined to promote him. In 1837 he was made Captain of the Foreign Legion and sent to Algiers. St. Arnaud soon justified the expectations of his superiors by his activity and dashing courage. His successes in subjecting the fierce tribes of Africa to the French dominion, won for him rapid promotion, and in the course of ten years, he rose from the grade of chief of a battalion to the high rank of Marshal of France. In 1849 he was appointed to the command of the Province of Constantine, and succeeded in rapidly subduing its revolted tribes by his resolute conduct, and keeping them in willing subjection by his conciliatory policy. In the expedition of 1851, against the Kabyles, St. Arnaud greatly distinguished himself, having, with the small force of six thousand men, completely subdued the extensive mountainous region inhabited by that ferocious tribe. Soon after, St. Arnaud returned to France, and Louis Napoleon, who was then President of the Republic, singled him out for the important post of minister of war, and he finally became the chief confederate of the French usurper, in the daring *coup d'état* of Dec. 2, 1851, by which Louis Napoleon became dictator and subsequently emperor. In 1852 he was created marshal, senator, and grand écuyer to Louis Napoleon. St. Arnaud had claimed as a privilege the command of the first army which should carry the French eagle on a European field of battle, and accordingly when the army was sent to the East, Arnaud, in spite of a mortal disease with which he was afflicted, insisted upon his privilege, and was appointed commander-in-chief of the French forces. He reached Varna, and being the superior in rank, assumed at once the position of commander-in-chief of the allied armies of England and France, and devoted his whole energies to the trying duties of the campaign against the Russians. He bore up against his disease until the expedition against the Crimea, where on his arrival, his disease, which was an organic affection of the heart, increased with redoubled severity. On the day of the great battle of the Alma, he mounted his horse in spite of his sufferings, and rode along the whole line of the battle, which was five miles in length, several times, neither uttering a complaint nor showing by the slightest expression, the agonies of the fatal disease of which he was the victim. Finally, however, when the battle began, he was so exhausted, that he could only keep

on his saddle by the aid of two of his soldiers, who held him in his seat, and thus the intrepid St. Arnaud won the great victory of the Alma on the 20th day of September, 1854. Six days afterward he was forced to resign his command in consequence of his approaching death, which came on the 29th September, 1854.

SAINT-AUBIN, A., a Fr. engraver, 1736-1807.

SAINT-AUBIN, AUG. ALEXANDER D'HERBER, called, a French singer and actor, 1754-1818.

SAINT-AUBIN, C., a publicist, 1755-1820.

SAINT-AUBIN, G. C. See LEGENDRE.

SAINT-AULAIRE, FRANÇOIS JOSEPH DE BEAUPOIL, Marquis De, a Fr. poet, 1643-1742.

SAINT-AULAIRE, member of institute of France and ambassador to England under Louis Philippe.

SAINT-CHAMOND, CLAIRE MARIE MAZARELLI, Dame De, a learned Fr. writer, 1731-1784.

SAINT-CLAIR, ARTHUR, an American revolutionary officer, was born in Edinburgh, and came to America as lieutenant in the British army under General Wolfe. On the breaking out of the American revolution he joined the cause of the colonies, and was made a major-general in the American army, serving throughout the war with distinction. In 1783 was chosen president of the Cincinnati Society of Pennsylvania, his adopted state. He was president of Congress in 1787, subsequently governor of the north-west territory, and in 1790, held the command of the forces sent against the Miami Indians. After an old age of poverty he died 1818.

SAINT-CLOST, PERROS DE, or PIERRE DE ST. CLOUD, writer of a satirical allegory, called the *Romance of Reynard*, which consists of 2,000 verses, and has been translated into most European languages, 13th century.

SAINT-CONTEST, DOMINIQUE CLAUDE BARBERIE DE, a French statesman and diplomatist, 1668-1730. His son, F. DOMINIQUE, minister of state for foreign affairs in 1751, under the influence of Madame de Pompadour, 1701-1754.

SAINT-CYR, ODET JOSEPH DE VAUX DE GIRY, Abbé De, a Greek scholar, preceptor of the dauphin, son of Louis XV., died 1761.

SAINT-CYRAN, JEAN DUVERGIER DE HAURANNE, Abbé De, a Jansenist theolog., 1581-1642.

SAINT-BEUVE, JACQUES DE, a writer on Grace and Predestination, 1613-1677.

SAINT-CROIX, GUILLAUME EMANUEL JOSEPH, Baron De, a learned French writer, was born at Mormoiron, in 1746; studied at the Jesuit's College, Grenoble; obtained the rank of captain in the grenadiers, but quitted the army for literary pursuits; suffered greatly during the revolution, and died in 1809. His principal works are, a 'History of the Naval Power of England,' 2 vols.; and a 'Critical Examination of the Historians of Alexander the Great.'

SAINT-CROIX, or SANTA CROCE, PROSPER DE, cardinal and papal nuncio, 1513-1589.

SAINT-EVREMOND, C. MARGUERITE DE ST. DENIS, Seigneur De, a royalist and *protégé* of Mazarin during the troubles of the Fronde, distinguished as an elegant writer, 1613-1703.

SAINT-FAL, S. M., a French actor, 1760-1835.

SAINT-FLORENTIN, L. PHELYPEAUX, Count De, son of Phelipeaux de la Vrillière, minister in various functions for more than fifty years to Louis XV., and a debauched character, 1705-1777.

SAINT-FOIX, GERMAIN FRANÇOIS POULAIN DE, a French writer and antiquarian, 1698-1776.

SAINT-GALL, THE MONK OF, an anonymous Latin writer of the 9th century.

SAINT-GELAIS, OCTAVIUS DE, a poet and bishop of Angoulême, and biographer of Louis XII., 1466-

1502. MELLIN, his natural son, an ecclesiastic, and author of Latin and French poems, d. 1559.

SAINT-GENIES, J. DE, a Fr. poet, 1607-63.

SAINT-GENIS, A. N., a Fr. lawyer, 1741-1808.

SAINT-GEORGE, CHEVALIER DE, a mulatto, born of a negress at Guadaloupe, greatly distinguished by his accomplishments at the French court, and especially for his skill as a swordsman. He commanded a troop of horse at the beginning of the revolution, 1745-1801.

SAINT-GERAN. See GUICHE.

SAINT-GERMAIN, COUNT DE, a singular character, some way connected with the *illuminati* of last century, and equally remarkable for the extent of his knowledge and his communications with the French court, especially with Louis XV. and Madame de Pompadour. He is said to have died at Schleswig in 1784. The curious should compare with his pretensions the traditions of *The Wandering Jew*, which are collected together in the *Chronicles of Cartophilus* (so called), lately published by David Hoffman.

SAINT-GERMAIN, ROBERT, Count De, a Jesuit and statesman, minister of war to Louis XVI., author of *Memoirs*, 1708-1778.

SAINT-GERMAN, or, SEINT-GERMAN, CHRISTOPHER, an English lawyer of the 16th century.

SAINT-GILES, otherwise *Joannes Anglicus*, or *Jean de St. Albain*, a learned theologian, and doctor of medicine to Philip Augustus, king of France, died about 1255.

SAINT-HILAIRE, AUGUSTE, a Fr. bot., died 1853.

SAINT-HILAIRE. See GROFFROY.

SAINT-HUBERTI, ANTOINETTE CECILIA CLAVEL, a French opera singer, 1756-1821.

SAINT-HURUGE, MARQUIS DE, a character of the French revolution, about 1750-1810.

SAINT-HYACINTHE, HYACINTHE CORDONNIER, better known as *Thémiseul de Saint Hyacinthe*, an ingenious French critic, 1684-1714.

SAINT-HYACINTHE. See CHARRERIE.

SAINT-JOHN. See BOLINGBROKE.

SAINT-JORRI, PIERRE DUFAUR DE, in Latin *Petrus Faber*, a learned French Jesuit, 1540-1600.

SAINT-JOSEPH, ISIDORE, a theologian and historian of the Carmelites of Italy, died 1666.

SAINT-JOSEPH, PIERRE MATHIEU DE, otherwise *Pierre Foglia*, an Asiatic missionary and botanist, born in Naples 1617, died 1691.

SAINT-JULIEN, L. G. BAILLET, Baron De, a miscellaneous writer, 1720-1780.

SAINT-JULIEN, PIERRE DE, a partisan of the league, and historian of Burgundy, 1520-1593.

SAINT-JURE, J. B. DE., an ascetic, 1588-1657.

SAINT-JUST, ANTOINE, one of the most remarkable characters, all things considered, produced by the revolutionary epoch of France, was born at Décise in the Nivernais 1768, and was only twenty-four years of age when the revolution had grown to a white heat in 1792-3. He was the son of a knight of St. Louis, descended from a distinguished family, and had passed through a brilliant career as a student, when he became adjutant-major in a legion of the national guard; and in this position made the acquaintance of Robespierre. The alliance of these two men is one of the most interesting studies presented by the history of those times. The intelligence of St. Just was as cold, clear, and glassy as that of Robespierre, his character as austere, his ambition as great, his personal courage, moral and physical, unsurpassed by any character known to history, and his enthusiasm *distinctly sui generis*, for we are not only not acquainted with any thing resembling it, but it appears as we scan it, to contradict

the word itself. Light, sparkling, and dauntless, in Camille Desmoulins, this character of mind strikes us as one common to all ages and to every cause; in St. Just, on the contrary, heated to the highest pitch, and star-like in its brightness, it is yet fixed in preternatural fascination, or if it ever stir, seems only to string up his nerves as by a magnetic tension to make them the stronger and more resonant organ of the resolute spirit. In cold impassive reason, the two men, St. Just and Robespierre, resemble each other, as in the strict purity of their lives, but in this quality there is no comparison, and to explain St. Just, we must suppose the wildest enthusiasm in the outward nature transfixed and bound down to its cruel purposes by the gleam of the frigid intelligence in the inner. His almost feminine countenance, and his perfect devotion to Robespierre, obtained for St. Just this striking but profane appellation: *the Saint John of the Messiah of the People*. He surpassed his master in impassibility as the terrible events of the revolution swept by, and on the night of the September massacres slept soundly in the same chamber where Robespierre paced up and down watching, as he expressed it, 'like remorse or crime.' At this time, the name of St. Just was almost unknown to the people, but he took his place in the National Convention, which met soon afterwards, with the air of one accustomed to be heard and obeyed as an oracle. He was the mask of the spirit of Robespierre, and so perfectly devoted to him, that the ideas of the one were uttered by the voice of the other, not in slavish subjection, but with more axiomatic and unanswerable simplicity, and with a more daring application to emergencies; it was, as if the soul of Robespierre had two bodies, the one more plausible in utterance, the other sharper and more remorseless. The devotion of St. Just was entirely due to the acquiescence of his reason in the sentiments of Robespierre, and to his solemn conviction that the republic could only triumph by those ideas: he was strictly *the minister* of Robespierre *the dictator*, and he embodied the conceptions of his master in those practical measures which could alone carry him to power. The overthrow of the Gironde and the Dantonists was only a step towards the concentration of every power of the state in the committees of the convention, formed to work under one head; the struggle which he directed, in fact, was that of a republic one and indivisible, opposed to the idea of a confederation which it was impossible to form in imitation of the United States that had been the natural growth of time and circumstances. After the fall of the Girondins, the triumvirate of Robespierre, Couthon, and St. Just, was formed definitely in the committee of *Salut Public*, and under the dictation of this body, at the time when France was menaced with destruction, no right, whether of life or property, was allowed to be pleaded in preference to the supreme right of the nation to save itself. The inexorable logic of this argument, put in force, became *the terror*, and they who look upon a Robespierre and a St. Just as mere spirits of darkness, and agents of iniquity, should consider well the sorrowful nights and days which this young man of twenty-five or six must have passed when he wrote in his diary: 'It is but a small matter to quit a life like this, a state of being so miserable that the only choice left us, is to become the accomplice of crime or the helpless witness of it.' The most striking proof of his heroism was given when the Austrians, reunited to the army of Condé, had forced the lines of Weissembourg, and were advancing upon Strasburg. Sent there with Lebas, in the

character of a proconsul, St. Just charged at the head of the Alsatian peasantry, hastily armed, and, with an intrepidity that astonished the soldiers, rolled back the invaders, and saved his country. In this character he was the legal autocrat of the entire district, and in the emergency the lives and properties of all were at his disposal; was he therefore merciful or cruel when he saved 'thousands of heads,' as it is confessed, by sending one scoundrel to the guillotine? In short, there is only one honest way of judging these men, and that is by the exceptional character of the times, and not as Christians, for such they were not, but as the heathen avengers of the crimes and errors of many generations of pretended Christians. St. Just, true to the last, accompanied Robespierre to the scaffold, and regarded with a disdainful air the crowd vociferating around him. He was executed on the 27th of July, 1794, or according to the republican style, on the 9th Thermidor, year 2. His poems and political writings bear witness to his literary talents. [E.R.]

SAINT-JUST, GODARD D'AUCOURT DE, a dramatic and miscellaneous writer, 1770-1826.

SAINT-LAMBERT, CHARLES FRANCIS DE, a member of the National Institute of France, was born at Nancy, in 1717. He entered the army, which he left at the peace of Aix-la-Chapelle, and obtained an office in the court of Stanislaus of Poland; became a devoted adherent of Voltaire's, and a favored admirer of Madame de Chatelet; again entered the army, and died in 1805. Among his works are, 'The Seasons,' a poem; 'Oriental Tales,' and a philosophical work, in 3 vols., entitled 'Catéchisme Universelle.' He also contributed to the *Encyclopédie*.

SAINT-LAURENT, BARON DE, a French artillery officer in the wars of Napoleon, 1763-1832.

SAINT-LEU. See HORTENSE.

SAINT-LO, A. DE, a Fr. missionary, died 1638.

SAINT-LOUIS. See LOUIS (IX.)

SAINT-LOUIS. See PETER OF ST. LOUIS.

SAINT-LUC, FRANÇOIS D'ESPINAY DE, a French commander, who distinguished himself against the Calvinists, and became a master of artillery under Henry IV., killed 1597. His son, TIMOLEON, ambassador to England and Marshal of France, 1580-1644.

SAINT-MARC, CHARLES HUGH LEFEBVRE DE, a French author, born at Paris, in 1698. His most important work is, 'A Chronological Abridgment of the History of Italy, from the Downfall of the Western Empire,' 6 vols. 8vo.

SAINT-MARC, J. P. ANDREW DES ROSINS, Marquis De, a poet and dramatist, 1728-1813.

SAINT-MARCELLIN, a natural son of the celebrated Fontanes, distinguished by his valor at the battle of Borodino, in the Russian campaign of 1812, and as an opera writer, 1791-1819.

SAINT-MARS, a French officer of quality, whose name has been preserved in history in connection with that most perplexing of all secrets, 'The Man in the Iron Mask.' Vague rumors of such a prisoner were all that existed till the publication of Voltaire's Louis XIV., when for the first time they assumed due consistency. After all that has been written on the subject, it cannot be said that more is known at this hour than had been related by Voltaire, except some confirmations of the substantial accuracy of his account, and some additional traits of character, which may help to solve the riddle, if ever fresh light should be thrown upon it by the publication of hitherto unedited state documents. Briefly, the story is as follows:—Towards 1662, a state prisoner of noble stature, and the most accomplished demeanor, wearing a mask of black velvet,

was consigned to the custody of Saint-Mars, at that time governor of the castle of Pignerol. In 1686, Saint-Mars was transferred to the Isle of Saint Marguerite, in the sea of Provence, and he took his prisoner with him: he did the same when he became governor of the Bastille in 1690. This mysterious person was uniformly treated with the highest respect by the governor, who himself waited upon him, and the same deference was shown by the marquis of Louvois on occasion of a visit previous to his removal from St. Marguerite: his mask was so constructed with steel springs that he had perfect liberty to eat and drink; he was served in the richest manner, and was accustomed to entertain himself with books and music. Before his transference to the Bastille, he seized an opportunity to scratch some intelligence on a silver plate, which he threw out near a fishing boat that he perceived moored to the shore; the fisherman, however, was unable to read, and he carried the plate to Saint-Mars, who would not allow him to depart until perfectly satisfied that no discovery had been made. In the end the prisoner died in the Bastille, and was buried in the parish cemetery of Saint Paul, by midnight, November, 1703, under the evidently feigned name of Marchiali: the furniture of his room, the window casements, and every possible thing on which he could have left any record, were then carefully burnt; the ceiling was pulled down and reduced to powder; finally, the Bastille records, since perused, were found to contain only the obscurest allusions to him. The last statesman who possessed this secret was Chamillac, who, on his deathbed refused to make a discovery of it: though entreated by his son-in-law, the second marquis de Feuillade, he said he had been bound by an oath. The medical attendant of the prisoner had never seen his face, but says that he informed him a few days before his death that he believed he was near sixty years of age; the registry of the burial, on the other hand, gives forty-five as the age of the pretended Marchiali, but this again may have been designed to baffle investigation. This strange history, it will be observed, commences about the period of Mazarin's death, and it covers the greater part of the reign of Louis XIV. It would be inconsistent with our limits to discuss the conjectures to which it has given rise—some of them sufficiently romantic. What surprises us is, that historians do not observe how little reason would be left for the careful preservation of the secret beyond the lifetime of the prisoner, if it could be proved *he was any one of the persons hitherto supposed.* [E.R.]

SAINT-MARTHE, CHARLES FRANCIS, Marquis De, a French fabulist and poet, 1717–1803.

SAINT-MARTIN, J. ANTOINE DE, cel. for his researches into the history of Armenia, 1791–1832.

SAINT-MARTIN, J. DIDIER DE, a Chinese missionary and writer in Chinese, 1743–1801.

SAINT-MARTIN, LOUIS CLAUDE DE, called by himself *le Philosophe inconnu* (which we read *philosopher of the unknown*), was born at Amboise, of a noble French family, 1743, and is said to have commenced his metaphysical studies upon the 'Art of Knowing One's Self,' written by James Abbadie, a French protestant theologian. He is sometimes confounded with MARTINEZ PASQUALIS, who was the real founder of the sect of *Martinists*, and the first teacher, but by no means the master, of Saint-Martin. The period when these two philosophical inquirers became acquainted, was marked by a reaction against the sceptical philosophy of the encyclopedists, against whom Saint-Martin launched the first

and most valued of his writings, entitled *Des Erreurs et de la Vérité*, published at Lyons 1775, between which period and 1778 the operations of the genuine Martinists in France had become extinct. The name, indeed, still remained. The *Chevaliers Bien-faisants*, reformed under the name of *Philalethes*, and said to have embraced the doctrines of Saint-Martin and Swedenborg, invited the former to take the president's chair in 1784, but he refused the honor; as to Swedenborg, the writer has before him an original letter, written by a French disciple of his in 1785, utterly disavowing the connection, and charging these very Martinists, so called, with the pursuit of magic:—so much for the right of such societies to assume names, and for the sarcasm of Lamartine ('Girondins,' vol. i. p. 188), 'The theosophists, disciples of the sublime but obscure Swedenborg, the Saint-Martin of Germany, pretended to complete the gospel, and transform humanity,' &c. It is a point of some interest in the history of those times, for not only were the occult societies of Germany and France influential among the people, but the most distinguished princes were enrolled amongst them, as may be read in the article WEISHAUF. Saint-Martin was neither faithful to one system nor another, but coquetted with them all, Martinez Pasqualis, Alchymy, Animal Magnetism, Swedenborg, and Jacob Boehmen, until he was cast ashore in the midst of the French revolution, and became, as he regarded himself, 'the Robinson Crusoe of spiritualism.' He possessed vast original genius and metaphysical insight, and as a thinker he digested and assimilated whatever he found to his taste; we should not be far from the truth, perhaps, in pronouncing that the principles of Boehmen had taken the deepest hold of his imagination and reason; and that much in his later writings may be regarded as a modern reproduction of them, tinctured, however, by what he had acquired from Swedenborg, and by his experience in animal magnetism. The first of his works is mentioned above. It was followed by 'Tableau Naturel des Rapports entre Dieu, l'Homme, et l'Univers,' 1782, the principal of which is the explanation of *things* by *man*, and not of *man* by *things*. In 1790 he published 'l'Homme du Désir.' In 1792 the 'Ecce Homo,' intended to correct the rage at the time for magnetic prodigies, and to elevate the soul to sublimer mysteries. In 1796 appeared 'Le Nouvel Homme.' In 1800, 'De l'Esprit des choses, ou coup d'œil Philosophique sur la Nature des Etres et sur l'Object de leur Existence,' a work which we have seen denounced as 'a tissue of foolish propositions,' on the strength of an extract, which is, notwithstanding, of great philosophic depth. In 1802 he ushered to the light of day 'Le Ministère de l'Homme Esprit,' with these remarkable words:—'Although the subject of this work promises greater clearness than my others, it is too remote from ordinary ideas to let me hope for much success. I have often felt while writing that the result would be much as if I had played a selection of waltzes and contre-dances on my violin in the cemetery of Mont Martre, where would be fine to do with my bow, but really the corpses lying there would neither understand my music nor dance to it!' Besides these and other works of his own, Saint-Martin translated into French the 'Three Principles,' and the 'Aurora,' of Jacob Boehmen. The Russian statesman, Prince Gallitzin, is said to have been his convert, but we are not aware whether any connection exists between this fact and the rise of the Martinists in the city of Moscow: a very insufficient account of the latter will be found in Pinkerton's

translation of a work concerning the state of the Greek church, from the Slavonic of Platon. Saint-Martin, like so many others of the noblesse of France, suffered by the French revolution, and being implicated in a conspiracy, owed his life to the revolution of Thermidor. Died 1803. [E.R.]

SAINT-MARTIN, MICHEL DE, a religious founder and writer, 1614-1687.

SAINT-MAURICE, ALEX. MA. ELEONOR, Prince De Montbarey, minister of war to Louis XVI. from 1776 to 1780, au. of *Memoirs*, 1732-96.

SAINT-MAURIS, J. DE, a French juriconsult, statesman, and diplomatist, died 1555.

SAINT-MAURIS, PRUDENT DE, a juriconsult and ambassador, of another family, died 1584.

SAINT-MEARD, FRANCOIS JOURGNIAC DE, a journalist and chevalier of the order of Saint Louis, born at Bourdeaux 1745, and known at the period of the revolution as the editor of a royalist paper, entitled '*Journal de la Cour et de la Ville*.' After the installation of the revolutionary leaders in the Paris Commune, by the insurrection of August 10, 1792, Saint-Meard was arrested and imprisoned in the 'Abbaye,' where he became an eye-witness of the September massacres. He has related his terrible experience in a brochure entitled, '*My Thirty-six Hours' Agony*,' the thrilling interest of which carried it through above a hundred editions. After the 'terror' Saint-Meard continued to frequent the literary salons of Paris, and received the humorous title of '*President and General-in-chief of the Universal Society of Gobe-mouches*.' Died 1827. [E.R.]

SAINT-MICHEL, A. DE, a Fr. wr., 1795-1827.

SAINT-MORYS, ET. BOURGEVIN-VIALART, Count De, a French general, known as a naturalist and miscellaneous writer, 1772-1817.

SAINT-NON, JEAN CLAUDE RICHARD, Abbé De, a celebrated amateur in the arts, 1727-1791.

SAINT. PALAYE, JEAN BAPTISTE DE LA CUNNE DE, a learned and ingenious writer, born at Auxerre, in 1697; died 1781. He studied the manners and customs of ancient France with great diligence and success, and wrote '*Mémoires sur l'ancienne Chevalerie*,' 3 vols., which have been translated into English. After his death, the Abbé Millot published another work of his, entitled '*L'Histoire des Troubadours*,' 3 vols.; and he left a voluminous collection of MSS.

SAINT-PARD, otherwise *P. N. Van Blotaque*, a French Jesuit and religious writer, 1734-1824.

SAINT-PAVIN, DENIS SANGVIN DE, a French poet and ecclesiastic, 1600-1670.

SAINT-PERAVI, J. N. M. GUERINEAU DE, a political writer and poet, 1732-1789.

SAINT-PHILIP. See BACCALAR Y. SANNA.

SAINT-PIERRE, CHARLES IRENEE CASTEL, Abbé De, a political writer and philanthropist, who was educated as an ecclesiastic, and devoted himself theoretically and practically to the public good. Among his works is a '*Project for a Perpetual Peace*,' conceived at the congress of Utrecht (1713), and pronounced by the cardinal Dubois '*the dream of a good man*.' He was far in advance of his age; and being excluded from the French Academy for the courageous expression of his opinions concerning the government of Louis XIV., that body took more than half a century to revise their judgment of him; at length, in 1775, his eulogium was pronounced by D'Alembert. The French are indebted to him not only for his philosophical '*dreams*,' but for that expressive word *bienfaisance*, which he introduced into the language. [E.R.]

SAINT. PIERRE, EUSTACE DE, a patriotic citizen

of Calais, who distinguished himself when Edward III. of England besieged that place in 1347.

SAINT. PIERRE, JACQUES BERNARDIN HENRI DE, a most ingenious and philosophical French author, was born at Havre, in 1737, was educated in the engineer school in Paris, for a time followed the military profession in the service of Russia, afterwards obtained a commission in the engineer corps of France; and, retiring from a military life, he devoted the remainder of his days to literature. In 1784 appeared his '*Etudes de la Nature*,' and, in 1788, his '*Paul et Virginie*,' which, after passing through 50 impressions in one year, has been translated into almost all the languages of Europe. Napoleon conferred on him the order of the legion of honor, and Joseph Buonaparte granted him a pension of 6000 francs. St. Pierre was also the author of '*La Chaumière Indienne*,' and several other works, all replete with elegant taste and philosophical feeling. Died 1814.

SAINT. PRIEST, FRANCIS EMANUEL GUIGNAD, Count De, a French statesman, born at Grenoble, in 1735. He first served in the army, and was afterwards engaged in diplomatic missions to Portugal, Constantinople, and the Hague; at which last place he was residing when the revolution commenced. In 1789 he succeeded Baron de Bretueil as minister of the royal household; but subsequent events drove him from France, and he remained in exile till after the restoration of the Bourbons. He was raised to the peerage in 1815, and died in 1821.

SAINT-PRIEST, or SAINT-PRET, JEAN YVES, an archivist and historian, died 1720.

SAINT-RAMBERT, GABRIEL DE, a Cartesian philosopher and friend of Rousseau, died 1720.

SAINT-REAL, CESAR VICHARD, Abbé De, a controversialist and historian, 1639-1692.

SAINT-REMY, PIERRE SURIREY DE, a French officer and writer on artillery, died 1716.

SAINT-SAPHORIN, A. F. L. DE MESTRAL DE, a diplomatist employed by the Danish court, a great connoisseur in art, 1738-1805.

SAINT-SILVESTRE, J. L. DU FAURE, Marquis De, a commander under Turenne, 1627-1719. C. F. DU FAURE, of the same family and title, an historical writer, 1752-1818. N. H. MAURICE DU FAURE, called President St. Silvestre, a magistrate and political writer, died 1811.

SAINT-SIMON, C. F. DE ROUVROY SANDRICOURT, a learned French prelate, and collector of a valuable library, 1727-1794. His brother, LOUIS DE ROUVROY, Duc De Saint-Simon, a statesman and diplomatist during the regency of the Duke of Orleans, author of memoirs of the highest value towards the history of his times, 1675-1755.

SAINT-SIMON, CLAUDE HENRI, Count De, founder of a school of social science and rational doctrine named after him, was born at Paris 1760. Member of an illustrious family which traced its origin, through the Counts of Vermandois, to Charlemagne, he had the best education that his country could then afford, and one of his teachers was the great encyclopedist D'Alembert. He entered the army, according to the prevailing fashion with the young nobles, in 1777, and though he hated war, he embarked, two years later, for America, and served under Washington, thinking only of some vast social design that would be promoted by the emancipation of America. In 1783 he returned to France, and quitting the military career, he was known at the period of the revolution as a speculator, conjointly with a count de Redern, in the national domains: his object was to acquire property as a means of

realizing his ideas, and he regarded the convulsions which then agitated society as nothing more than the preparatory destruction of the old order of things. During the Terror, St. Simon was arrested in mistake for another of the same name, and only recovered his liberty after the revolution of Thermidor, 27th July, 1794. His time and fortune were now devoted with apostolic enthusiasm, to what he considered his mission, and, in 1807, he gave his ideas to the world in his 'Introduction to the Scientific Labors of the Nineteenth Century.' This work was intended as a supplement to the reports demanded by Napoleon on the progress of science since 1789, and in connection with Saint-Simon's other works, may be said to contain the germ of all that is valuable in Comte's positive philosophy. It declares the time arrived to generalize the whole body of science with a view to social progress, and lays down the principle that useful labor is the proper destiny of all men. It was followed in 1808, by Letters addressed to the Institute; in 1810 by a 'Prospectus of a New Encyclopedia;' in 1814 by the 'Re-organization of European Society;' and nearly every year, in short, by some fresh development of his philosophical speculations. The sum of his meaning may be expressed somewhat in these terms: as Newton had reduced astronomy to a positive law when he discovered gravitation, so may all the sciences and speculations of men be brought, practically, to a positive doctrine; chemistry and the other branches of experimental philosophy come first; metaphysical and theological knowledge follow in the order of their remoteness from demonstration; and social science as the most complex of all completes the encyclopædia of human knowledge and experience. Newton, it is argued, laid the foundation of this temple of science by demonstrating the law of gravitation; and Locke proved that it could be carried to completion by demonstrating the perfectibility of the human spirit. This, we say, is the fundamental conception of Saint-Simon's, as it has become more recently of Comte's, philosophy; it is to be regretted that, in the carrying out of this idea, they are both deficient in the sense of all that constitutes religion; and in any true, or even tolerable recognition, of revealed truth; the church and its doctrines are at best a kind of spiritual police force, easy to be dispensed with when the positive theism is reached. These works, however, are valuable political studies, they point to many results at which society must arrive, and they suggest a valuable method of reviewing history and philosophy: to be safely used they must be treated like crude ore, from which the true metal is only to be extracted by a severe process. Saint-Simon exhausted his resources to such a degree that he passed a severe winter without fuel and almost without food. He once attempted suicide, but the pistol-shot only deprived him of the sight of one eye. He died at Paris May 19, 1825, with these last words on his lips, 'L'Avenir est à nous' (the future is ours). He left a small, but devoted body of disciples at his death, who had for their organ a periodical entitled 'Le Producteur;' the then leader died of a broken heart, and his party being scattered by the interference of government, his successor, M. Enfantin, became an active promoter of railways and other objects of immediate utility.

SAINT-SIMON, MAXIMILIAN H. DE, a botanist, tactician, and historian, 1720-1799.

SAINT-URSIN, M. DE, a medical writer, physician in the French army, 1763-1818.

SAINT VINCENT. JOHN JERVIS, earl of St. Vincent, and admiral of the British fleet, was born

in 1734, at Meaford in Staffordshire. He entered the navy at the age of ten, under Admiral Rodney. He served in 1759 in the expedition against Quebec; and had risen to the rank of post-captain when the American war broke out. He distinguished himself greatly in the course of this war, and was knighted; and early in the next great war against revolutionary France he was made an admiral. In 1797 he had the command of the Mediterranean fleet, and was specially employed in watching the fleets of Spain, which country was in alliance with France against England. The Spanish admiral at last put to sea with 27 large ships of the line, and was brought to action by Sir John Jervis, who had only 15 ships of much inferior size and weight of metal. This glorious battle was fought off Cape St. Vincent, 14th February, 1797, and ended in the complete defeat of the Spaniards, and the capture of four of their ships. The English admiral was raised to the peerage for this victory by the title of Earl St. Vincent, and received a pension of £3,000 a-year. In 1800, Lord St. Vincent was placed in command of the channel fleet, and in 1801 he was made first lord of the admiralty, from which station he was removed when Pitt returned to power in 1804. Lord St. Vincent was a stern reformer of abuses, having no respect to persons, and visiting the misdeeds of men in rank and authority as severely as he dealt with the faults of the humblest seaman in the fleet, or the meanest artisan in the dockyard. England is indebted to him not only for his splendid services in action against the enemy, but for the improved discipline and spirit, which he introduced into every department of her navy, among officers as well as men, and for the noble example of devotion to duty which he always set in his own person. He saw and brought forward into notice the abilities of Nelson, Duckworth, Strachan, Troubridge, Parker, and many more of our best officers during the war; and he was as firm a friend to honor and merit, as he was an unflinching foe to dishonesty and incompetency. Earl St. Vincent died 15th March, 1823.

SAINT-VINCENT, GREGORY DE, a French mathematician and writer on comets, 1584-1667.

SAINT-VINCENT, PAUL DE. See PAUL.

SAINT-YVES, C., an oculist, 1667-1733.

SAITER, D., an Austrian painter, 1674-1705.

SALA, ANGELO, an Italian physician and hermetic chemist, died 1639.

SALA, N., an Italian composer, 1710-1800.

SALA, V., an Italian painter, 1803-1835.

SALADIN, otherwise SALAH-ED-DEEN, sultan of Egypt and Syria, one of the most enlightened and chivalrous of Saracen princes, was born at the castle of Tecrit on the Tigris, of which his father was governor in 1137. His family had given many warriors to the princes of Mesopotamia and Aleppo, and Saladin was about 30 years of age when he accompanied his uncle, Shiracoh, in an expedition to Egypt; on whose death, in 1168, he became commander of the forces. Like Mehemet Ali in recent times, he possessed power and ambition sufficient to render himself independent; and, to omit details of his wars, we find him master of Syria and Egypt in 1183, so far at least as to be in no dread of opposition from the native princes. The Christian knights, however, had carried their arms to the East, and Saladin had been defeated some years before by Reginald De Chatillon, grand-master of the Templars, who was now in possession of Jerusalem, and in the habit of committing great outrages upon the Saracens. Saladin wisely consolidated his own authority before attacking these invaders; and among his national improvements may

be mentioned the foundation of colleges and hospitals, and the fortification of his cities, especially of Cairo. In 1187 he gave battle to the Christian army of 80,000 men on the plain of Hittin, or Tiberias, and having completely vanquished them, he slew Chatillon with his own hand, and took Guy of Lusignan, the Christian king of Jerusalem, prisoner; soon afterwards he captured the Holy City, and though he put the templars and knights hospitallers to the sword, the other Franks had the alternative of becoming slaves or paying ransom. News of these disasters arriving in Europe, produced the second crusade, in which Richard Cœur de Lion took part in alliance with Philip Augustus of France; preceded a year or two by the emperor Frederic Barbarossa, who died before their arrival, and an immense host of combatants. The key of Syria, then as it is now, was the fortress of St. Jean D'Acre, and the siege endured two years, 1189–1191, in which interval prodigies of valor were performed on both sides; the fortress at length surrendered, and the crusade was concluded by another year's truce between Saladin and Richard, after which the latter embarked for England. Neither of these remarkable characters were destined to survive their acquaintance with each other very long. Saladin was seized with a bilious fever at Damascus, and died there at the moment he was contemplating an extensive programme of conquests, in 1193. Christians and Saracens have vied with each other in writing panegyrics on the justice, valor, generosity, and political wisdom of this prince, who possessed the art, not simply of acquiring power, but of devoting it to the good of his subjects. Seventeen sons and a brother survived him to share his power, and his conquests were presently divided into several states. [E.R.]

**SALADIN II.**, great-grandson of the preceding, assassinated after a vain attempt to recover the dominion of Egypt, 1229–1261.

**SALADIN, J. B. M.**, a Fr. politician, d. 1810.

**SALARIO, A.**, a painter of Milan, died 1559.

**SALAZAR Y MARDONES, P. DE**, a Spanish historian of the emperor Charles V., died 1570.

**SALAZAR Y MENDOZA, P. DE**, a Spanish historian of that monarchy, 17th century.

**SALDEN, W.**, a Dutch divine, died 1694.

**SALE, A. DE LA**, a French writer, 1398–1462.

**SALE, LADY FLORATIA**, author of 'Journal of Disasters in Affghanistan.' Died 1853.

**SALE, GEORGE**, an Oriental scholar, best known by his translation of the Koran, was born in 1680, and died in 1736. But little is known of his personal history. He contributed the cosmogony, and a small portion of the other matter to the 'Universal History,' and his MSS. in the Radcliffe-Library, comprise some valuable articles from Arabic, Persian, and Turkish literature.

**SALE, SIR ROBERT HENRY**, an illustrious name in the annals of Anglo-Indian warfare, was born in 1782, and entered the army as ensign in the 36th foot 1795. He was just in time to take a subordinate part in the achievements at the close of last century, which secured that magnificent country to the British crown; his name was more distinctly marked, however, in the Burmese war of 1824–6, in the course of which he was commissioned as lieutenant-colonel. From that period till the commencement of our enterprises in Affghanistan, there was little opportunity for reaping other laurels; but events were ripening which soon demanded the soldier's prowess, and were destined to tax the utmost resources of our commanders. These circumstances date from 1835, commencing with the mis-

sion of Alexander Burnes, the envoy of Lord Auckland, whose object was to negotiate for consolidating the government of Dost Mahomed, as a bulwark against the designs of Russia and Persia. There appears to have been much insincerity, and certainly a good deal of procrastination and timidity in these overtures, so that eventually Dost Mahomed, instead of becoming our ally threw himself into the arms of our enemies. In 1838 Sale was appointed to the command of the 1st Bengal brigade in the impending war, and his troops formed the advance throughout the whole Affghanistan campaign; finally, in September, 1840, he defeated Dost Mahomed at Purwan-Dutray, and compelled him to surrender to Sir William M'Naghten. In 1841 the war was renewed, and Sale commanded the brigade which stormed the Khoord Cabul Pass, but was compelled to retreat upon Jellalabad, followed by the army of Akhbar Khan. Shut up in this place, Sale and his gallant troops were closely besieged from the 12th of November, 1841, to the 7th of April, 1842, on which day he made a grand attack upon the besieging army, and so completely routed it, that he captured the guns, the ammunition, and the camp. In 1845 the Sikh army, commanded by Sirdar Tej Singh, crossed the Sutlej, and Sale was now with the British forces under Sir Hugh Gough, as quartermaster-general; the two armies met in deadly conflict at the battle of Moodkee, Dec. 18, and victory being declared for the British, Gough pushed on, and four days later, fought the decisive battle of Ferozeshah. In the first action Sir Robert Sale had his left thigh shattered by a grape-shot, which proved mortal to him; he was then in the sixty-fifth year of his age. The principal works illustrating this series of events are a 'Narrative of the War in Affghanistan in 1838–9,' by Capt. H. Havelock, 2 vols., 1840; 'A Memoir of India and Affghanistan,' by J. Harlan, 1842, and 'The History of the War in Affghanistan,' by J. W. Kaye, 2 vols., 1851. A curious little work was also published, by H. T. Prinsep, in 1844, entitled 'Note on the Historical Results deducible from Recent Discoveries in Affghanistan.' We may add that the Sikhs are the representatives of a religious reformation preached in India by a contemporary of Luther. [E.R.]

**SALERNE, F.**, a French naturalist, died 1760.

**SALES, ST. FRANCIS DE**. See FRANCIS.

**SALES, LOUIS**, Count De, brother of St. Francis, a soldier and diplomatist, famous for his defence of Savoy against the Spaniards, and of the city of Annecy against Louis XIII.; he also negotiated the treaty of Dôle, 1577–1654. **CHARLES**, his son, governor of St. Christopher, 1625–1666.

**SALFI, F.**, a French dramatist, 1759–1832.

**SALGAR**, a Turcoman chief, founder of the dynasty named after him, died 1171.

**SALIAN, J.**, a French Jesuit, 1557–1640.

**SALICETI, G.**, an Italian physician, died 1250.

**SALICETTI, CHRISTOPHER**, a native of Corsica, who promoted the union of that country to France, and was successively deputy to the constituent assembly, member of the convention, and the council of 500, and finally minister of war at Naples under Joseph and Murat, 1757–1809.

**SALIEVI, A.**, an Italian composer, 1750–1825.

**SALIMBEIN, CAVALIERE VENTURA**, an Italian painter of sacred subjects, 1557–1613.

**SALINAS, FRANCIS DE**, a Spanish scholar, and writer on musical theory, 1513–1590.

**SALIUS, HUGUES DE**, a French physician and antiquary, 1632–1710. His brother, **JEAN BAPTISTE**, a writer on the wines of Burgundy, 1704.

SALISBURY. See CECIL, JOHN.

SALISBURY, W., a Welsh lawyer, first translator of the liturgy into that language, died 1570.

SALLE, J. A., a French Jesuit, 1712-1778.

SALLE, J. B. DE LA, a French priest and founder of a religious order, 1631-1719.

SALLENGRE, A. H. DE, a Dutch writer, counsellor to the prince of Orange, 1694-1723.

SALLO, DENIS DE, a French writer, the founder of modern periodical criticism, 1626-1669.

SALLRE, P. DE LA, a designer, 1723-1804.

[Sallust, from an Antique Bust.]

SALLUST (CAIUS SALLUSTIUS CRISPUS), the Roman historian, was born at Amiternund, a town of the Salines, to the north-east of Rome, B.C. 86. Though a member of a plebeian family he was educated for the service of the state, and entered upon public life during the struggle between the aristocracy and the democracy which ended in the subversion of Roman liberty. About the age of twenty-seven he obtained the quæstorship; and as tribune of the people in B.C. 52, he took an active part in connection with the outrages which resulted in the murder of Claudius and the banishment of Milo, identifying himself with the popular party, and thereby incurring the deadly hatred of the nobility. Two years after the expiry of his tribuneship he was expelled from the senate by the accusers on the ground of immoral conduct; but it is quite possible that his greatest offence was his attachment to the cause of the people, while his judges belonged to the opposite faction. After his degradation, he seems to have repaired to Cæsar's camp in Gaul, and to have accompanied him during his invasion of Italy. By Cæsar's interest he was restored to his seat in the senate, and elected to the office of prætor B.C. 47, in which capacity he accompanied his patron to Africa, and, on the conclusion of the war, was left as governor of Numidia. While invested with this important trust he is said to have enriched himself by plundering the country placed under his charge; and the allegation is to some extent confirmed by the fact of the immense wealth which he afterwards possessed, and which he profusely expended in forming splendid gardens on the Quirinal hill. On his return from Africa Sallust withdrew from public affairs, and spent the remainder of his life in his luxurious retreat, engaged in the composition of the historical works which he left behind him. His death took place B.C. 34. His historical works consisted of—1. The *Catiline*, or History of the Conspiracy of Catiline in B.C. 63, of the events of which he was a spectator. 2. The *Jugurtha*, or History of the War

maintained by the Romans against Jugurtha, king of Numidia, from B.C. 111 to 106, the materials for which he had probably collected during his residence in that country; and 3. The *Historiæ*, or histories, in five books, which are said to have comprised the period from the death of Sulla, B.C. 78 to B.C. 66. The first two works have come down to us entire, of the last we have only fragments; and the loss of it is the more to be regretted, as it must have contained an account of one of the most important periods of Roman history, respecting which our information is very meagre and unsatisfactory. Of Sallust's character; as a politician and historian, very contradictory opinions have been expressed both by the ancients and the moderns. As a devoted partisan of Cæsar, he was exposed to the censure of the party of Pompey; and it is therefore probable that the charge of immorality, though not unfounded, was somewhat exaggerated by party malevolence. The allegation of extortion in his province appears to rest on a firmer foundation. His philosophical introductions have been blamed as misplaced, and as containing opinions with which the writer did not sympathize, charges which must perhaps be to some extent admitted. His two works, however, must be judged as historical essays, illustrative of great political facts, and thus admitting a greater degree of latitude on the part of the writer, than would be admissible in continuous narrative. His style, though elaborate and artificial, is generally concise and perspicuous, but is occasionally marred by the use of archaic words, and by a love of brevity which is obviously the result of imitation. He is, however, entitled to the merit of being the first Roman who wrote what is now regarded as history. [G.F.]

SALLUSTIUS, a Platonist of the 4th century.

SALMANAZAR, a king of Nineveh, 8th c. B.C.

SALMASIUS. See SAUMAISE.

SALMERON, A., a Span. theologian, 1515-85.

SALMON, E. G., a Spanish statesman, died 1832.

SALMON, F., a French priest, 1667-1736.

SALMON, J., otherwise *Maigret* or *Macrinus*, a Latin poet, teacher of the children of René of Savoy, 1490-1517. His son, CHARLES, a Latin poet, massacred on Bartholomew's day, 1572.

SALMON, NATHANAEL, a non-juring divine, known as an antiquary and extensive writer of county history, died 1742. THOMAS, his brother, a chronologist and historian, died about 1750.

SALMON, R., an Eng. mechanician, 1763-1821.

SALMON, U. P., a Fr. mineralogist, 1767-1805.

SALMON, WILLIAM, an empirical physician and a voluminous compiler of books, among which are, 'The Complete Physician,' 'The Universal Herbal,' a 'Treatise on Astrology,' 'Polygraphice, or the Art of Painting.' He died about 1700.

SALOME, a Jewish princess, died 72.

SALOMON, J. P., a Ger. musician, 1745-1815.

SALONIUS, a French prelate, 5th century.

SALT, HENRY, a traveller and philologist, author of an 'Essay upon Hieroglyphics,' died 1827.

SALTER, S., a learned divine, died 1773.

SALTMARSH, JOHN, an Antinomian minister, chaplain in the army under Fairfax, died 1647.

SALTONSTALL, GURDON, governor of Connecticut from 1707 to 1724, was born in Massachusetts 1666, died 1724.

SALUTATO, L. COLUCCIO PIERIO, a Latin poet and chancellor of Florence, 1330-1400.

SALUZZO, COUNT, a Piedmontese poet and general writer, died 1853.

SALVA, F., a Spanish physician, 1747-1808.

SALVATOR ROSA. See ROSA.

**SALVERTE, ANNE JOSEPH EUSEBIUS BACONNIERE**, a member of the French chamber of Deputies, to which he was first returned in 1828. He was a liberal in politics, and wrote an 'Historical Essay upon the Names of Men and Places,' and a work on the 'Occult Sciences.' In the latter he ascribes all the mysteries of antiquity to the knowledge possessed by the priests in natural philosophy, and, that failing them, to trickery and imposture, 1771-1839.

**SALVI, N.**, an Italian architect, 1699-1751.

**SALVI, TAQUINIO**, an Italian painter, 16th century. **GLAMBATISTA**, his son and pupil, 1605-85.

**SALVIANI, H.**, an ichthyologist, 1514-1572.

**SALVIATI, FRANCESCO ROSSI**, an eminent Italian painter, whose style of designing approached that of Raphael, though greatly inferior in sublimity and grandeur of composition. Born in Florence 1510; d. 1563.

**SALVIATI, GIOVANNI**, an Ital. cardinal, dist. as a great protector of arts and letters, 1490-1553.

**SALVINI, A. M.**, a learned Italian, 1653-1729.

**SAMBUCUS, JOHN**, a learned Hungarian physician, antiquary and historian, 1531-1584.

**SAMERIUS, H.**, a German Jesuit, 1540-1610.

**SAMMES, A.**, an English antiquary, died 1679.

**SAMPSON, DR. HENRY**, an English divine and physician, was born at South Leverton, in Nottinghamshire; studied physic at Padua and Leyden; and, on his return to England, was chosen a member of the college of physicians. Died 1705.

**SAMPSON, THOMAS**, an eminent reformer and companion of the refugees at Geneva, nephew by marriage to Latimer, 1517-1589.

**SAMSON, OLE JOHAN**, a Danish dramatist and author of Scandinavian Tales, 1759-1796.

**SAMSON**, a judge of Israel, 12th century B.C.

**SAMUEL**, the last judge of Israel, and one of their prophets, supposed date 1132-1043 B.C.

**SAMUEL**, a king of Bulgaria, 971-1014.

**SAMWELL, DAVID**, a native of Nantglyn, in Denbighshire. He was surgeon of the ship *Discovery*, with Captain Cook, and was an eye-witness of the death of that celebrated navigator; of which event he wrote a circumstantial account. He was also the author of some Welsh poems. Died 1799.

**SANADON, N. S.**, a French Jesuit, 1676-1733.

**SANCERRE, L. DE**, constable of France, distinguished in arms against the English, 1342-1402.

**SANCHEZ, ANT. NUNEZ RIBEIRO**, a Portuguese physician in the Russian army, 1699-1783.

**SANCHEZ, F.**, a Portug., philoso., 1562-1632.

**SANCHEZ FRANCISCO**, in Latin *Sanctius Brocensis*, a Spanish grammarian, 1523-1601.

**SANCHEZ, G.**, a Spanish Jesuit, died 1628.

**SANCHEZ, PETER ANTHONY**, a learned Spanish ecclesiastic and philanthropist, 1740-1806.

**SANCHEZ, T.**, a Spanish casuist, 1550-1610.

**SANCHEZ, T. A.**, a bibliographer, 1732-1798.

**SANCHO, IGNATIUS**, a negro, whose literary abilities attracted much notice, was born in 1729, on board a slave-ship, and carried to Carthage. While a boy he was brought to England by his master, and given to three maiden ladies, sisters, living at Greenwich, who named him Sancho. The Duke of Montague afterwards took him into his service, and encouraged his love of learning; and the duchess left him an annuity at her death. He numbered among his friends, Sterne, Garrick, and other literary characters; and was the author of 'Letters,' 'Poems,' &c. Died 1780.

**SANCHONIATHON**, a Phœnician historian, regarded as the most ancient writer of the heathen world, is supposed to have been a native of Berytus, but as the age to which he is referred is beyond the

historical epoch, nothing certain can be related of him. Even the authenticity of the fragments attributed to him has been disputed, but it only requires an ordinary acquaintance with the understanding of those remote ages to be convinced that they are genuine remains of a very high antiquity, whether written by Sanchoniathon or any other. The history attributed to him was composed in the Phœnician language, and its materials collected from the archives of the Phœnician cities, and from the registers preserved in the Phœnician and Egyptian temples. It was translated into Greek by Philo Byblius, in the reign of Hadrian, and the existing fragments of it preserved by Eusebius amongst the citations of his 'Evangelical Preparation.' One fragment is called 'The Cosmogony,' professedly derived from Tautus, Thoth, Athothis, or Hermes. Another, and by far the larger, is called the 'Generations;' it presents many interesting points of comparison with the Mosaic Scriptures, and professes to be the real history of these times stripped of Allegory. 'All these things, the son of Thabion, the first Hierophant of all among the Phœnicians, allegorized and mixed up with the occurrences and accidents of nature and the world, and delivered to the priests and prophets, the superintendents of the mysteries, and they, perceiving the rage for these allegories increase, delivered them to their successors and to foreigners; of whom one was Isiris, the inventor of the three letters, the brother of Chna, who is called 'the first Phœnician.' The third and last fragment is a few lines preserved from Sanchoniathon's history of the Serpent. The whole will be found in Cory, who suggests that Sanchoniathon's omission of any direct notice of the flood, in which he differs from all other ancient writers, may be accounted for by his determination to reject whatever was allegorical. [E.R.]

**SANCROFT, WILLIAM**, archbishop of Canterbury, was born at Fresinfield, in Suffolk, in 1616. In 1664, he was made dean of York; then dean of St. Paul's; and, in 1677, he was raised to the highest station in the church, where he conducted himself with zeal and judgment. He was one of the seven bishops sent to the Tower by James II.; but at the Revolution he refused to take the oaths, for which he was deprived of his see. Died 1693. He wrote 'The Predestinated Thief,' 'Modern Politics, taken from Machiavel,' &c.

**SANCTIUS.** See **SANCHEZ**.

**SANCTORIUS, SAUCTORIUS**, whose true name was Santori Sautorio, an Italian physician of considerable distinction, was born at Capo D'Istria, in 1561, and died at Venice 1636, aged seventy-five. He was the founder of what is called the Statical School in Medicine, and in 1612 published a treatise entitled, *Ars de Medicina Statica*, in which he endeavored to estimate the loss of weight that the body undergoes by the various excretions, particularly by insensible transpiration, to which he attached much importance. [J.M.C.]

**SAND, CHRISTOPHER VAN DEN**, in Latin *Sandius*, a German Socinian, 1644-1680.

**SAND, C. L.**, a German student, member of a secret society, and assass. of Kotzebue, 1795-1818.

**SANDBY, PAUL**, an eminent artist, born at Nottingham, in 1732. He took numerous views in Wales and Scotland, which he transferred to copper-plates, in imitation of drawings in India ink; a method of aquatint engraving which he carried to great perfection. On the institution of the Royal Academy he was elected a member; and, in 1768, he was appointed chief drawing-master at Woolwich. Died 1809.

SANDE, JOHN VAN DEN, a Dutch juriconsult and historian, died 1638.

SANDEMAN, ROBERT, founder of the sect who took from him the denomination of *Sandemanians*, was a native of Perth, in Scotland, where he was born 1723. He was educated at the university of Edinburgh, and having married a daughter of the Rev. John Glass, became a follower of his opinions and an elder in one of his churches. The subject of controversy which led to the formation of this party, was a particular view of the nature of justifying faith, but they differ, also, from other communions in the matter of discipline and church fellowship, especially in the administration of the sacrament of the Holy Supper. Their fundamental tenets are Calvinistic. Sandeman died at Danbury, aged forty-eight, 1771.

SANDEN, H. DE, a Ger. physician, 1672-1728.

SANDER, ANTHONY, in Latin *Sanderus*, a Flemish topographer and antiquary, 1586-1664.

SANDERS, NICHOLAS, a zealous Roman Catholic writer, was born at Charlewood, in Surrey. About 1560 he went to Rome, and was sent by pope Gregory XIII. as nuncio to Ireland, where, to avoid falling into the hands of the English, he wandered about in the woods and bogs, and perished of want in 1581. His principal work is his treatise against the Reformation, entitled 'De Origine ac Progressu Schismatis Anglicani.'

SANDERS, R., a miscellaneous wr., 1727-1783.

SANDERSON, JOHN, an American miscellaneous writer and classical scholar, was born at Carlisle, Pennsylvania, 1785, died 1844. The 'American in Paris,' a book of lively travelling sketches, and the 'Lives of the Signers of the Declaration,' are his two best known works.

SANDERSON, ROBERT, an English antiquarian, historian of Henry V., &c., 1660-1741.

SANDERSON, ROBERT, bishop of Lincoln, distinguished for his extensive antiquarian, scholastic, and historical information, known as a casuist and polemical writer, 1587-1663.

SANDERUS. See SANDER.

SANDES. See SANDYS.

SANDFORD, SIR DANIEL KEYTE, D.C.L., professor of Greek in the university of Glasgow, was the son of Dr. Sandford, one of the bishops of the Scottish episcopal church. This accomplished scholar and brilliant orator was not more distinguished for his classic attainments, than for the enthusiasm with which he advocated the reform bill, and other measures which had for their objects the extension of popular rights and privileges. As a teacher he was highly successful; and to his efforts Scotland is indebted for much of her present eminence, as a school for the study of classic literature. Died Feb. 9, 1838.

SANDFORD, F., a heraldist, 1630-1693.

SANDINI, A., an Italian historian, 1692-1751.

SANDIUS. See SAND.

SANDOVAL, F. P. DE, a Sp. histor., 1560-1621.

SANDRART, JOACHIM VON, a native of Frankfurt, disting. as a painter and art-writer, 1606-88.

SANDS, ROBERT C., an American journalist and poet, editor of New York Commercial Advertiser, and the principal author of *Yamoyden*, died 1832, aged 34.

SANDWICH. See MONTAGU.

SANDYS, or SANDES, EDWIN, a dignitary of the church, who was vice-chancellor of Cambridge on the accession of Queen Mary, and suffered deposition and imprisonment as a partisan of Lady Jane Grey. In the reign of Elizabeth he was successively bishop of Worcester and London, and archbishop of York,

and had a share in the translation known as the Bishops' Bible, 1519-1588. SIR EDWIN, his second son, a traveller and diplomatist, to whom some sacred poems have been attributed, 1561-1629. GEORGE, brother of the latter, and seventh son of the archbishop, a traveller and classical translator, 1577-1643.—Pope declared that English poetry owed much of its beauty to the translations of George Sandys, who was highly esteemed by his contemporaries for his learning and virtues.

SANE, A. M., a French writer, 1773-1818.

SANGALLO, GIULIANO GIAMBERTI, called, an Italian artist and architect, son of Francesco Giamberti, 1443-1517. ANTONIO, his brother, employed by Alexander VI. to convert Hadrian's mausoleum into a fortress, now the castle of St. Angelo, died 1534. ANTONIO, an eminent Italian architect of the 16th century, was born at Florence; and on visiting Rome, where he had two uncles who were architects, he was instructed by them, and subsequently perfected himself in the art under Bramante, whom he succeeded as architect of the church of St. Peter's. He was much employed under the popes Leo X., Clement VII., and Paul III., both in fortifying places, and in the construction of public buildings, the grandeur and solidity of which have been much admired. Died 1546. ANTONIO BAPTISTA GOBBO, brother of the latter, a translator of Vitruvius. His nephew, BASTIANO, a painter, decorator, and architect, 1481-1551.

SAN-GIORGIO, BENVENUTO DA, an Italian historian and diplomatist, 1450-1525.

SANGIOVANNI, BENEDETTO, an Italian refugee and sculptor of animals, died 1853, aged 72.

SANMICHELLI, MICHELE, an Italian architect, friend of Bramante and Michelangelo, 1484-1559.

SANNAZARIUS, or SANNAZARO, JACOPO, a distinguished Italian poet, who wrote both in Latin and Italian, was born in 1458, at Naples, where he died in 1533. He was the author of sonnets, canzoni, elegies, eclogues, epigrams, and a poem entitled, 'De Partu Virginis.' His elegance of expression, no less than the poetical beauty of his thoughts, gave him a distinguished place among the modern Latin poets.

SANSEVERO, RAYMOND DI SANGRO, eminent for his mechanical inventions and scientific discoveries, was born at Naples, in 1710, and died 1771. Among the multifarious and extraordinary machines invented by himself was a four-wheeled vehicle, to pass over the surface of the water, which he exhibited on the bay of Naples.

SANSON, NICHOLAS, a celebrated geographer and engineer, was born at Abbeville, in 1600; and constructed, even while a youth, a map of ancient Gaul, remarkable for its excellence and accuracy. He subsequently produced upwards of three hundred maps, all on a large scale, with several volumes to illustrate them; reached the head of his profession, and was appointed geographer and engineer to the king. Died 1677.—His three sons, NICHOLAS, WILLIAM, and ADRIAN, who also were excellent geographers, collected and published the works of their father, as well as several of their own.

SANSOVINO, GIACOMO FATTI, an eminent sculptor and architect, was born at Florence, in 1479. He ornamented Rome and Venice with many splendid structures, and enjoyed so great a reputation, that when a general impost was levied at Venice, he and Titian were the only persons exempted from the tax. Died 1570.

SANTA-CRUZ, ALVAREZ DE BASSANO, Marquis De, a Spanish admiral, died 1587.

SANTA-CRUZ DE MARZENADO, ALVAR, Marquis De, a Spanish general, diplomatist, and tactician, born 1687, killed by the Moors at Oran, 1732.  
SANTEN, L. VAN, a Dutch poet, 1746-1798.

[Santerre.]

SANTERRE, ANTOINE JOSEPH, an actor in the French revolution, a brewer, of Flemish descent, was born at Paris 1752. He was by no means the rude character sometimes represented, but well educated, and the possessor of a large fortune, acquired in trade. His familiarity with the workmen in his employ, and his extreme generosity (for in famine time, he gave away nearly £12,000 worth of meat and rice) made him popular in St. Antoine, and he became commander of the battalion of that quarter. He displayed great courage and presence of mind at the storming of the Bastille, and would deserve remembrance if it were only for one other act about the same time, that of saving the invaluable Bibliothèque du Roi from destruction by the mob. In May, 1792, he became commander of the national guard, and on the 20th of June, when the Marseillaise had arrived, and the palace was invaded by the populace, he thrust his fellow patriots out of the queen's chamber and protected Marie Antoinette and her children from further outrage; it is said that from this time may be dated the secret understanding that the queen had with the agitators of the faubourgs. Many other instances of the good nature of this Ajax of the Parisian populace might be mentioned, as that of causing the drums to cease beating for a few moments when Louis was on the scaffold; this gave the king the opportunity of addressing a few words to the people, and so provoked the Marseillaise that they would have commenced firing had not the drums instantly struck up again by order of another general. Santerre possessing little talent, but a vast deal of courage, often run immense risk to save life and property, and there is no wonder that he miscarried, when despatched to La Vendée, in command of an army, to oppose Rosignol. For this mischance, however, he was thrown into prison, and did not recover his liberty until after the fall of Robespierre. His good-natured, and useful, though not very brilliant part in this strange drama of history was now at an end, and he died in obscurity 1809. [E.R.]

SANTERRE, JEAN BAPTISTE, a French painter, was born at Magny, near Pontoise, in 1651. He painted historical subjects, on a small size, and with great delicacy. Died 1717.

SANTEUL, or SANTOLIUS, JOHN DE, a distinguished modern Latin poet, was born at Paris, in 1630; and after studying under the Jesuits, entered

among the canons of the abbey of St. Victor, and died in 1697. He was eccentric, witty, and capricious; generally licentious, but at times endeavoring to atone for it by sudden fits of devotion.

SANTORIO. See SANCTORIUS.

SANTOS, J. Dos, a Portuguese missionary, died 1622.

SANUDO, MARCO, a Venetian general who signalized himself in the army of crusaders who overthrew the Greek empire, 1153-1220. ANGELO, son of the preceding, and his successor as duke of the Archipelago, 1195-1254. MARCO, son of Angelo and third duke, died 1263. GULIELMO, son and successor of Marco, 1284. NICOLO, son and successor of the latter, distinguished against the Genoese and the Turks. GIOVANNI, brother of Nicolo, sixth and last duke, married his daughter to the prince of Negropont, who became prince of Naxos.

SANUTO, LIVIO, a Venetian noble, distinguished as a poet, historian, geographer, 1530-1586.

SANUTO, MARINO, a Venetian traveller in the East, author of a curious work, 14th century. His relative, of the same name, historiographer to the state of Venice, author of valuable Diaries, 1466-1531.

SANZIO, J. DE, an Italian painter, 15th century.

SAPOR I., king of Persia of the Sassanide dynasty, succeeded his father, Artaxerxes, 240. He invaded Mesopotamia 242, and having conquered Armenia, Syria, and Cilicia, he put to death the emperor Valerius with great cruelty. He was defeated by Odenatus 269, and died 271. SAPOR II., a posthumous son of Hormisdas II., was proclaimed 310, before his birth. He became an active and warlike prince in conflict with the Romans, and was a great enemy to Christianity, died 380. SAPOR III., succeeded Artaxerxes II., 384, he kept peace with the Romans, died 389.

SAPOR, a king of Armenia, 420.

SAPPHO, a lyric poetess of old Greece, born at Lesbos, and supposed to have flourished about 610 B.C. Nothing certain is known of her life, but she is represented as a woman of dissolute morals, and is said to have drowned herself in consequence of the neglect of a youth with whom she had become enamored. The invention of the *Sapphic verse* is attributed to her, but there only remains of her writings a 'Hymn to Venus,' and an 'Ode to a Young Female,' which have been rendered into English by Ambrose Philips. The contradictory traditions concerning her life have led to the supposition that other celebrated women of the same name must have lived at different epochs.

SARABIA, J. DE, a Span. painter, 1608-1669.

SARAVIA, H. A., of Spanish origin, but reckoned among English divines, was a professor of divinity and friend of Hooker, 1531-1613.

SARAZIN, JACQUES, a sculptor, was born at Noyon, in 1598. After learning the rudiments of his art at Paris, he went to Rome, where he studied painting as well as sculpture, and, on his return, he was much employed at the palace of Versailles. Died 1660.

SARAZIN, JOHN, a French marshal, born in 1770. He served in the German campaigns during 1805 and 1806; but, in 1809, deserted from Boulogne, obtained employment from the English ministry, and followed the English invading army into Spain. He was condemned for trigamy in 1819. Died 1824.

SARBIEWSKI, MATTHIAS CASIMIR, a Polish poet, usually known by the name of Casimir, was born in 1595, became a professor in the Jesuits' col-

lege at Wilna, wrote some elegant Latin poems, and died in 1640.

SARCHIANI, GUISEPPE, an Italian economist, archivist of Tuscany during the revolution, 1746-1821.

SARCMASIUS. See SCHURTZFLEISCH.

SARDANAPALUS, the name of several princes of Assyria, the most celebrated of whom was the last sovereign of the first Assyrian empire. His reign dates from 836 to 817 B.C., when he was dethroned by Arbaces and Belesis, at the head of a revolt of the Medes, Persians, and Babylonians. In the last extremity, Sardanapalus, who had withstood a siege for three years in Nineveh, placed himself, his treasures, his wives, and his eunuchs on a funeral pile, which he fired with his own hand. He had ceased to exist when the city was taken, and that event was followed by the dismemberment of the Assyrian empire. The above date is only an approximation to the true one, as authorities vary.

SARDINIA, QUEEN OF, MARIA ADELAIDE, was the eldest daughter of Renier Joseph, archduke of Austria, and viceroy of Lombardy. She was born on the 3d of June 1822, and married on the 12th of April, 1842, to Victor Emanuel, the present king of Sardinia. Died January 20, 1855.

SARDINIA, QUEEN DOWAGER OF, MARIA THERESA, wife of Charles Albert king of Sardinia, died 1855.

SARGENT, WINTHROP, an American revolutionary officer, and governor of Miss. Died 1820.

SARPI, PETER, better known as Father Paul, was born at Venice in 1552, distinguished himself as a theologian, anatomist, and astronomer, and became provincial of the order of Servites, to which he belonged. He successfully aided the Venetian government in its resistance to the encroachments of the papal see; and nearly fell a victim to its vengeance, five ruffians having, it is alleged, at its instigation, made an attempt to assassinate him. The work by which he is best known is 'A History of the Council of Trent.' Died 1628.

SARRABAT, N., a French botanist, 1698-1737.

SARRASIN, J. A., a French physician, 16th century.

SARRASIN, JOHN FRANCIS, an eminent French poet, born in Normandy, in 1604. He was secretary to the Prince of Conti, wrote a 'History of the Siege of Dunkirk,' poems, and various other works; and died in 1654.

SARRASIN, M., a naturalist, 1659-1736.

SARTI, JOSEPH, a graceful musical composer, born at Faenza, in 1730; who, after having been master of the conservatorio of La Pietà at Venice, was invited to St. Petersburg, by the empress Catharine, who appointed him director of music at the conservatory of Catharineslaß, with a munificent salary, to which she afterwards added a title of nobility and an estate. Died 1802.

SARTO, ANDREA VANNUCCHI, called DEL, the most distinguished painter of the Tuscan school, 1488-1530.

SASSI. See SAXI.

SAUL, the first king of the Israelites, perished in combat with the Philistines B.C. 1040.

SAULI, the apostle of Corsica, 1535-1592.

SAUMAISE, CLAUDE, in Latin *Salmasius*, a native of Burgundy, eminent for his learning as a critic, commentator, Orientalist, and archæologist. He was born in 1588, and having retired to Holland on account of his protestantism, succeeded Scaliger as professor of history at Leyden in 1631. In 1649 he wrote a Latin memorial in defence of Charles I.,

which was answered by Milton for the parliament. In 1650 he visited the court of Sweden by invitation from Queen Christina, and is said to have suffered from the climate, so that he never recovered, but died in 1658. His father, BENIGNE DE SAUMAISE, was a Greek scholar, and counsellor to the parliament of Burgundy, 1560-1640.

SAUMAREZ, Right Hon. JAMES, Lord De, a distinguished officer in the British navy, was born in the island of Guernsey, in 1757, and was descended from a French family, whose ancestor accompanied William the Conqueror to England. He entered the naval service at the age of fifteen, accompanied Sir Peter Parker across the Atlantic, and having signalized himself in an attack upon Fort Sullivan, received the command of the Spitfire; but the cutter having been much damaged, was burnt, to avoid falling into the hands of the enemy, and he returned a passenger to England. After being actively engaged, under Sir Hyde Parker, at Dogger Bank, and with Admirals Hood and Rodney, he was sent to cruise on the French coast, where he captured *La Recession*, a fine French frigate, without the loss of a single man, while 120 were killed or wounded on the part of the enemy; which gallant action procured him the honor of knighthood. He afterwards sailed with Sir John Jervis in the Mediterranean, and shared in the victory of Cape St. Vincent in 1797; and going again to the Mediterranean, was second in command to Lord Nelson in the glorious victory of the Nile. On his return to England, Sir James received the decoration of the order of the Bath, and was appointed colonel of marines; and in 1801 he was made a rear-admiral of the blue, created a baron, and appointed to the command of the squadron off Cadiz. On the 6th of July he made a daring attack on a superior force in the bay of Algeiras; but owing to the protection of the batteries, and the wind failing, he was compelled to withdraw his ships after an action of five hours, and repair to Gibraltar to refit. With unparalleled expedition he again put to sea, and offered battle to the enemy's fleet, now amounting to ten sail of the line, his own squadron consisting of only half the number; which ended in two of the enemy's 3-deckers being blown up, and a 74-gun ship captured; and though the darkness of night gave the remainder an opportunity of escaping, they were so crippled that they were laid up at Cadiz, and never again during the war left that port. For this brave action Sir James received the thanks of both houses of parliament, and a pension of £1200 per annum. After this he performed a series of signal services to his country, as commander-in-chief of the British fleet in the Baltic; and when this country was visited by the Emperor of Russia and the King of Prussia, he received the personal thanks of those monarchs, together with those of Prince Metternich, on the part of the Emperor of Austria, for the services he had rendered to the common cause of Europe. In 1831 he was appointed vice-admiral of England, and not long afterwards general of marines; and at the coronation of William IV. he was called to the House of Peers, as Baron De Saumarez. Died at Saumarez, his seat in the island of Guernsey, 1836.

SAUNDERS, SIR EDMUND, an English judge in the reign of Charles II., who was originally an errand-boy at the inns of court. A lawyer of St. Clement's Inn perceiving his genius, took him into his office, and made him his clerk. He afterwards became an eminent counsel, and rose to be chief justice in the court of king's bench. Died 1683.

SAUNDERS, JOHN CUNNINGHAM, a surgeon and

oculist, was born in 1773, in Devonshire, and became demonstrator of anatomy at St. Thomas's Hospital, London. He was particularly skilful in the treatment of disorders of the eye, for which he instituted an infirmary in 1804. He wrote 'On the Anatomy and Diseases of the Ear' and 'On the Diseases of the Eye.' Died 1810.

SAUNDERS, WILLIAM, an eminent physician and medical writer, was born in 1743, became senior physician to Guy's Hospital, and died in 1819. Among his works are, treatises on the 'Structure, Economy, and Diseases of the Liver,' on 'Indian Hepatitis,' on 'Mineral Waters,' &c.

SAUNDERSON, NICHOLAS, a native of Thurleston, in Yorkshire, who distinguished himself as a mathematician, though he was deprived of his sight by small-pox when only twelve months old. He was born in 1682, and succeeded Whiston as professor of mathematics at Cambridge university in 1711. The account of Saunderson's experience, the quickness to which his senses of hearing and feeling were heightened, and his surprising acquisitions, is one of the most interesting in biographical literature. Died 1739.

SAURIN, ELIE, a French protestant minister, 1639-1703. JOSEPH, his brother, a natural philosopher and mathematician, remarkable for his independent spirit, and for his controversies with Rolle, Huyghens, and Rousseau; he also abjured Calvinism, 1659-1737. BERNARD JOSEPH, son of the latter, a dramatic writer, 1706-1791.

SAURIN, JAMES, an eminent French protestant preacher, was born at Nismes, in 1677. Upon the revocation of the edict of Nantes, in 1685, his father retired with his family to Geneva, where the subject of this article made a considerable progress in learning, but quitted his studies, and went into the army. When the Duke of Savoy, under whom he served, made peace in 1696, he returned to Geneva, with a view to engage in the ministry. In 1700 he visited England, where he preached nearly five years to his fellow refugees in London. He subsequently became pastor to a congregation of French refugees, who assembled in a chapel belonging to the Prince of Orange, at the Hague. He was the author of 12 vols. of 'Sermons,' 'The State of Christianity in France,' 'Discourses, Historical, Critical, and Moral, on the most remarkable Events of the Old and New Testaments,' &c. Died 1730. His brother, JOSEPH, was born in 1659, and distinguished himself as a mathematician. He was originally a protestant minister; but, in 1690, he embraced the catholic faith, and was pensioned by Louis XIV. He contributed for some years to the *Journal des Savans*, and died in 1730.

SAURIN, BERNARD JOSEPH, son of the last-mentioned, was born in 1706, at Paris; and quitted the bar to become a dramatic writer. He was the author of 'Spartacus,' a tragedy; 'Mœurs de Temps,' a spirited comedy; and a variety of other dramas. Died 1781.

SAURIN, RIGHT HON. WILLIAM, an eminent Irish lawyer. He was called to the bar in the year 1790; in 1798 he received a patent of precedence, which was soon followed by his appointment to the office of solicitor-general. As a member of the Irish parliament he took an active part in the politics of the latter end of the 18th century; yet, turbulent as were the times, and fierce as were the political antagonists to whom he was opposed, his personal integrity and highly honorable feelings were on all hands admitted. His powers as a debater, and his eminence and celebrity as a lawyer, caused him, in

1807, to be made attorney-general for Ireland, and he held that important office until 1822, when he was succeeded by Mr., now Lord, Plunkett. Though for many years previous to his death he had been greatly afflicted in health, his faculties remained unimpaired to the last. Born 1767; died 1840.

SAUSSAY, A. DU, a French theologian, 1589-1675.

SAUSSURE, HORACE BENEDICT DE, a celebrated naturalist, was born at Geneva, in 1740; attained an early proficiency in the mathematical and physical sciences, and was for several years professor of philosophy at Geneva. He travelled in France, England, Italy, &c.; and by the valuable observations which he made, particularly among the glaciers of the Alps, he contributed much to the advancement of geology and meteorology. He also showed great ingenuity in the construction of improved instruments adapted to scientific uses, viz., a thermometer, a hygrometer, a eudiometer, an electrometer, &c. Died 1799.

SAUSSURE, NICHOLAS THEODORE DE, born at Geneva, October, 1767; died April, 1845; son of the preceding. He accompanied his father in his travels, and assisted him in many of his researches. He afterwards devoted himself to physiological chemistry, and contributed many important papers to this department of science. Priestley had shown that plants absorbed carbonic acid; Saussure confirmed this observation, and proved that a small proportion of this gas in the atmosphere favors vegetation, but that a larger amount asphyxiates plants. He likewise devoted much time to a subject originally broached by Kirwan, viz., the connection between the inorganic constituents of plants and the soils on which they grow, and established Kirwan's view that inorganic food is necessary for vegetation. He likewise made numerous researches on the composition of the air, at Geneva, particularly on the proportion of carbonic acid which is present in different conditions of the atmosphere; and obtained results which have been confirmed by the experiments of more modern chemists with all the delicate appliances of recent discovery. He was one of the first persons to point out the identity of sugar of starch and of grapes; and to invent modes of analyzing organic substances so early as the beginning of the present century. [R.D.T.]

SAUVAGE, D., a French historian, 1520-1587.

SAUVAGES, FRANCIS BOISSIER DE, a celebrated French botanist and physician, born in 1706, at Alais; became professor of medicine and botany at the university of Montpellier, was a member of nearly all the learned societies in Europe, and acquired, by his writings and lectures, as well as by his zeal, a high reputation. His principal work is entitled 'Nosologia Methodica,' 5 vols. Died 1767.

SAUVAL, H., a French historian, 1620-1670.

SAUVEUR, JOSEPH, a French mathematician, born in 1653, at La Flèche. He was dumb till he had passed his 7th year, but such was his love for the mathematical sciences, that he acquired them with scarcely any instruction, and became professor at the royal college. He was the discoverer of that branch of science called musical acoustics, and died in 1716.

SAVAGE, EDWARD, an American portrait painter and engraver, 1761-1817.

SAVAGE, HENRY, chaplain to Charles II., and historian of Baliol college, 1604-1672.

SAVAGE, JAMES, an English architect. Many of the public works of London, churches, bridges,

&c., remain as monuments of his art. Died 1852, aged 74.

SAVAGE, JOHN, a facetious divine, supposed author of a 'Collection of Letters,' &c., died 1747.

SAVAGE, RICHARD, has very little claim to remembrance as a poet. Yet he threw off some happy lines and phrases, and, among others, the often-quoted verse, 'The tenth transmitter of a foolish face.' His best poems, too, 'The Wanderer,' and 'The Bastard,' have, especially the latter, the interest which belong to strong feeling vented on real facts. The history of this unfortunate man was a tragic romance; and it has preserved his name by having been related in one of the most impressive of narratives. His biographer, Samuel Johnson, who became acquainted with him when the two were alike destitute and hopeless, speaks of him with an affection which, amidst all the unlucky man's faults, must have been justified by some good points in his character. From Johnson's 'Life of Savage' the facts may be best learned. He was born 1698, the illegitimate child of two persons of rank, was persecuted by his mother, narrowly escaped execution for murder, and, after a miserable life of forty-five years, died, a prisoner for debt, in 1743. [W.S.]

SAVARON, J., a French writer, 1550-1622.

SAVART, F., a French physician, 1791-1841.

SAVARY, A. C., a French physician and pupil of the physiologist Bichat, 1776-1814.

SAVARY, JAMES, farmer of the revenues of the French crown, and a writer on commercial law, 1622-1690. His two sons, JAMES and PHILEMON, compiled 'The Universal Dictionary of Commerce,' published 1723.

SAVARY, NICHOLAS, a French traveller and author, was a native of Vitre, in Brittany; travelled to Egypt and the Levant, where he gathered much information relative to the antiquities, manners, and customs of the country, and died in 1788. He translated the Koran, wrote a 'Life of Mahomet,' 'Letters on Egypt,' &c.

[Savary.]

SAVARY, RENE, a distinguished French general. He was a native of Ardennes, and was appointed colonel of gend'armes by the first consul for his bravery, but perhaps more for his ready obedience in executing the sentence against the unfortunate Duke D'Enghien. He was created DUKE OF ROVIGA for his services in Prussia, and commanded the army

in Spain until the arrival of Joseph; he succeeded the Duke of Otranto as minister general of police. After the restoration he lived in retirement; but at the revolution in July, 1831, he was appointed commander-in-chief of the African army, 1774-1833.

SAVERIEN, ALEXANDER, a French mathematician and writer on naval tactics, 1700-1805.

SAVIGNY, C. DE, a French writer, born 1540.

SAVILLE, SIR HENRY, one of the most profound and elegant scholars of the age, was born in 1549, and after graduating at Brazenose College, Oxford, removed on a fellowship to Merton College, in the same university. In his 29th year he made a tour on the Continent for the purpose of perfecting himself in elegant literature, and on his return was appointed tutor in Greek and mathematics to Queen Elizabeth. Seven years after, the wardenship of his college was conferred on him, which he held for about 36 years, the provostship of Eton being added to it in 1596. Among his works are, 'Commentaries on Roman Warfare,' and other learned treatises. Died 1622.

SAVILLE, GEORGE. See HALIFAX.

SAVIOLI, L. V., an Italian poet, 1729-1804.

SAVOLDO, G., an Italian painter, 16th cent.

SAVONAROLA, J. M., a physician of Padua, 1384-1462. His grandson, GIROLAMO, next article. RAPHAEL, of the same family, a compiler, 1646-1730. INNOCENT RAPHAEL, nephew of the latter, and an author, 1680-1748.

SAVONAROLA, GIROLAMO, or JEROME, was born at Ferrara, 12th October, 1452. He enjoyed a religious education, and was in some respects a precocious youth. Though originally intended for his father's profession, as a physician, he secretly became a Dominican monk in 1474. After teaching philosophy for a season, he devoted his whole attention to preaching, and produced a great sensation by the pointedness and vehemence of his pulpit oratory. In 1489 he removed to Florence, lived in the convent of St. Marco, and declaimed with extraordinary freedom and daring, and with unusual success, against every form of hypocrisy, vice, and unbelief. His unbounded influence and constitutional ardor, seem to have heated his imagination, and he ventured on occasional predictions, at once novel and startling, and published them in the form of authentic oracles, and under the impression that they were genuine revelations to himself from heaven. With characteristic boldness and energy, he interfered with the politics of Florence, inculcated democracy, and opposed the ascendancy of the Medici, so that when they were expelled, he became a leader of the triumphant party. These victors formed a vast deliberative council, and discussed with great pomp the affairs of state, while Savonarola was exalted by them into a kind of prophetic and judicial president of the republic. His enemies, in the meantime, accused him to the pope, Alexander VI., as an impostor and a heretic. His holiness summoned him to Rome, but the reformer refused to obey the citation. On this refusal he was excommunicated and forbidden to preach. But this sentence only excited him to more terrible denunciations, in which the pope himself was styled a usurper. A Franciscan inquisitor was sent to challenge and confront Savonarola, but the citizens interfered and sheltered him. The popular tide at length turned, when he shrank, after some vacillations, from subjecting his cause to an ordeal by fire. His antagonists entered the convent, dragged him out, placed him on the rack, and extorted some ejaculations from the unhappy victim, which

their malignity easily construed into confessions of guilt. On being ultimately condemned to death with two of his associates, he was first strangled, then his body was tossed into the flames, and his ashes were thrown into the river, 23d May, 1498. The most of Savonarola's writings were in Italian, and only a few in Latin. He left behind him about 300 sermons and 50 tracts. His 'Triumphus Crucis,' is a work of some power, but his genius is principally seen in those sermons in which the errors of Romanism are unsparingly condemned, and many evangelical truths illustrated and enforced, and which are also distinguished and filled with peculiar unction and piety. The opinions of Roman Catholic writers vary widely as to the character of this hero-martyr, some holding him to be a saint, and others branding him as a heretic. Burned by one pope, he was tacitly canonized by another. Over the room he inhabited in the convent of St. Mark, still stands an inscription with the epithet—'Vir Apostolicus.' Savonarola was in many things in advance of his age, and was a reformer before the reformation. Eloquent, sincere, and devout, he labored with heart and soul for his church and country, and met with that fate which the patriot and apostle have so often received from a fickle people, and an alarmed and vindictive despotism. [J.E.]

SAVOT, L., a French numismatist, 1579–1640.

SAWYER, SIR ROBERT, one of the chief counsel for the seven bishops, reign of James II., d. 1692.

SAXE CHRISTOPHER, in Latin *Saxius*, a German philologist and literary historian, 1714–1806.

SAXE, COUNT MAURICE of Saxony, better known in history as Marshal Saxe, was the natural son of Augustus II., king of Poland, and elector of Saxony. Maurice was a soldier, and saw actual service at the siege of Lisle, when he was only 12 years old. He was at Malplaquet in 1709; and he afterwards served under Prince Eugene against the Turks. In 1720 he was introduced to the Regent Orleans, who persuaded him to enter into the French service, and gave him the rank of marshal. Though a married man, he was as notorious for the frequency of his love adventures, as for his military abilities. He obtained the Duchy of Courland in 1726, through the fondness of the Duchess Anna for him, but he soon lost his new principality. He alienated the duchess by his inconstancy, and thus lost also the chance of becoming emperor of Russia, when Anna succeeded to the throne of the czars in 1730. When the war broke out between France and Austria, in 1733, Marshal Saxe solicited and obtained employment in the French armies. He distinguished himself greatly at the siege of Philipsburg; and when peace was made in 1736 he devoted some time to the study of the art of war, and to the composition of a treatise on that subject, which is still cited by military writers. It was in the general European war, which began in 1740, that he gained the triumphs by which he is best known. He commanded the French army at Fontenoy in 1745, and won a memorable victory over the English and their allies, which was followed by the conquest of all Belgium. At the commencement of the campaign of that year, Marshal Saxe was lying ill at Paris, with his constitution utterly ruined by the dissolute life which he had long led, and suffering under a severe attack of dropsy. His physicians told him that if he left Paris for the army they could not answer for his life. His answer was, 'The question now is not how I am to live, but how I am to go,' and he went and conquered accordingly. He was obliged to be tapped only five days before the battle was fought; and he was car-

ried about in a litter during the engagement. The victory of the French was due mainly to his skill and energy, and to the valor of the Irish brigade in the French service. In 1747 he gained a second victory over the English and their allies at Laffelt. He survived the conclusion of the war about two years, and died in 1750, loaded with honors by the French, who were indebted to him for the two chief of the very few successes which they have ever had in fair pitched battles against the English. [E.S.C.]

SAXE-COBOURG. See COBURG.

SAXE-GOTHA, ERNEST, duke of, a commander in the German wars of Gustavus Adolphus, 1601–1675. ERNEST II., a great patron of the sciences and letters, 1745–1804.

SAXE-GOTHA and ALTENBERG, E. LEOPOLD, duke of, distinguished as a poet and musician, 1772–1822.

SAXE-TESCHEN, ALBERT, duke of, son of Augustus II., king of Poland, and brother of the dauphiness, mother of Louis XVI., known as an enemy of the French republic, 1738–1822.

SAXE-WEIMAR, BERNARD, duke of, one of the most celebrated generals of the protestants during the thirty years' war, 1600–1639.

SAXI, or SASSI, GUISEPPE ANTONIO, an ecclesiastical historian of Milan, 1675–1751.

SAXO, called GRAMMATICUS, on account of his learning, a Danish historian, 12th century.

SAXONY, king of, FREDERICK AUGUSTUS, the son of Duke Maximilian, of Saxony, was born 1797. He succeeded his uncle, King Antony, June 6, 1836; his tastes were more those of a private person than of a monarch: he was fond of literary and scientific pursuits, and translated Dante into German. Died from the effects of an accident at Innspruck, 9th August, 1854.

SAY, JEAN BAPTISTE, an eminent French writer on political economy, born in 1767. He concerted with Chamfort (who was guillotined) the 'Decade Philosophique,' during the revolution. Buonaparte, on going to Egypt, made him his librarian extraordinary, and afterwards appointed him a member of the tribunate, from which post he was dismissed by his patron, for having the consistent honesty to vote against the creation of an emperor and empire. His 'Traité d'Economie Publique' is a most valuable work, and has been compared to Adam Smith's Wealth of Nations. Among his other works are, 'Observations sur l'Angleterre et les Anglais,' 'Cours complet d'Economie Politique,' 6 vols., &c. In his private life, M. Say is said to have exhibited a model of the domestic virtues; and, as a political character, though assailed by trials and temptations, throughout the stormy periods of the French revolution, as well as during the despotism of Napoleon, he maintained an unsullied reputation. Died 1832.

SAY, SAMUEL, a dissenting minister, known as a poet and essayist, died 1743.

SAY, THOMAS, an American naturalist, a large contributor to the knowledge of American zoology, was attached to the exploring expeditions under Major Long. Died 1834, aged 47.

SCACCHI, F., an Italian *savant*, 1573–1643.

SCACCIA, J., an Italian engineer, 1778–1833.

SCÆVOLA, MUTIUS, one of the heroes of Roman story, said to have conspired with 300 others against Porsenna. He saved his life by an act of heroism, of which the record will be found in Livy.

SCALA, BARTOLOMMEO, gonfalonier of Florence, and the historian of his state, 1430–1495. His daughter, ALESSANDRA, wife of the poet Marullus, celebrated for her great learning, died 1506.

SCALA, DELLA, a famous Ghibelline family of Ferrara, principal of whom are MASTINO, elected podesta about 1260, assassinated by the Guelphs 1277. ALBERT, his brother, who avenged his death and governed after him from 1277 to 1300. CAN FRANCESCO, called 'The Great,' the most illustrious of the family, grandson of Mastino, podesta from 1312 to his death in 1329. Dante, who found a refuge at his court, has immortalized him in verse. A second MASTINO, nephew of the latter, reigned 1329-1351. He was followed by CAN II. and CAN III., both his sons, the latter of whom died 1375. ANTONIO, a natural son of Can III., reigned with his brother, Bartolommeo, and had him put to death 1381. He afterwards lost his estates, and died 1388.

SCALA, D. DE LA, a physician, 1632-1677.

SCALIGER, JULIUS CÆSAR, called the 'Elder,' a famous classical scholar and commentator, was born at Padua or Verona in 1484, and being naturalized in France, died at Agen in 1558. His history is disputed, as he is not believed to be the person he represented himself, but rather a *Guilio Bordone*, son of Benedetto Bordone, a Paduan, who followed the profession of an illuminator at Vienna. His inordinate vanity is supposed to have prompted him to pretend to a relationship with the Scalas of Verona. He acquired great reputation in France by his skill in polemics.

SCALIGER, JOSEPH JUSTUS, son of the preceding, and the creator of the chronological science, was born at Agar in 1540, and in 1593 became professor of polite literature at Leyden. He far surpassed his father in learning, and drew largely upon his stock of words in all languages to abuse his learned contemporaries, with many of whom, like his father, he entered into angry controversies. The merit belongs to him of inventing the Julian period. Died 1609.

SCAMOZZI, V., an Italian architect, 1552-1616.

SCANDERBEG, or BEY ALEXANDER, a celebrated Albanian chief, whose proper name was George Castriotto. His father, Prince John of Albania, gave him in hostage to Amurath II. The sultan had him educated in the Mahommedan faith, and at the age of eighteen gave him the command of a body of 5,000 troops, which he led against the Servians. His father dying in 1432, he resolved to acquire possession of his hereditary principality. Being a man of great prowess and energy of character he soon effected his purpose; having previously renounced the Mahommedan faith and allegiance to the sultan, by deserting to the Christians and joining Hunniades, general of the Hungarian army. Becoming chief of the Albanians, a protracted and harassing war followed, with various fortune, until, by repeated successes, he completely consolidated his power, and preserved the independence of his country. He was a great terror to the Turks, who styled him the 'White Devil of Wallachia,' and the Albanians still celebrate him in their national songs. After his death, however, his country soon again submitted to Mussulman rule, 1404-1467.

SCANDIANESE, whose proper name was TITUS GANZARINI, an Italian dramatist, 1518-82.

SCAPULA, J., a Germ. lexicographer, 16th ct.

SCARAMUCCIA, L. PELLEGRINI, a Milanese painter and engraver, 1616-1680.

SCARBOROUGH, SIR CHARLES, physician to Charles II., known as a mathematician, 1616-93.

SCARDONA, J. F., an It. phys., 1718-1800.

SCARLATTI, ALESSANDRO, born at Naples, in 1658, was educated at Rome under Carissimi, and

died in 1728. The Italians called him the 'glory of the art,' and the first of composers. He composed about 100 operas, a great number of motets, and nearly 200 masses. DOMENICO SCARLATTI, his son, born in 1683, resided for a time at Rome and Naples, but finally settled at Madrid, where he obtained the appointment of chapel-master to the Queen of Spain. He produced several operas and some good church music, and was on terms of friendship with Handel.

SCARPA, ANTONIO, a celebrated Italian anatomist, was born in 1746, at Friuli, and died at Pavia, in 1826. He enjoyed an extensive reputation throughout Europe, by his admirable description of the nerves in his '*Tabula Necrologiæ*.' His treatises on the organs of hearing, sight, and smell, and on aneurism, hernia, and lithotomy, &c., further contributed to his surgical fame; while his exquisite taste for the fine arts, and his amiable disposition, rendered him a great favorite in a more extended sphere.

SCARRON, PAUL, a comic poet and satirist, was born at Paris, in 1610, and was intended for the church, to which he was averse, and for which his habits were decidedly unfit. At the age of 24 he travelled into Italy, where he gave himself up without restraint to indulgences of every kind, and continued his excesses after his return to Paris. At the age of 27, having appeared during the carnival at Mans as a savage, he was pursued by the populace, and being obliged to hide himself in a marsh, he lost the use of his limbs. Notwithstanding his sufferings, he never lost his gaiety; and, settling at Paris, his wit and social powers gained him a wide circle of acquaintance, among whom was the beautiful Mademoiselle d'Aubigné, who after his death was known as the widow Scarron, and who was eventually rendered still more famous as Madame de Maintenon. His principal writings are his '*Comic Romance*' and his '*Virgilie Travestie*.' Died 1660.

[Fontenay, birth-place of Scarron.]

SCARSELLA, SIGISMUND, surnamed *Modino*, an Italian painter, 1530-1614. His son, IPPOLITO, surnamed *Scarlepino*, a painter, 1551-1621.

SCARSGILL, W. P., an English writer. d. 1836.

SCAVINI, J. M., an Ital. physician, 1770-1825.

SCHAAF, C., a German Orientalist, 1646-1719.

SCHAARSCHMIDT, ANTONY and SAMUEL, distinguished surgeons and anatomists, the former 1720-1791, the latter 1709-1747.

SCHABOL, J. R., a Fr. agriculturist, 1690-1768.

SCHADOW, JOHANN GEOFFROY, a distinguished modern sculptor, was born at Berlin 1764. Having

evinced an early predilection for the fine arts, he repaired to Rome in 1785 for the cultivation of his taste, and after initiating himself in the school of the best Italian masters, he returned to Berlin in 1788, where he was appointed professor of sculpture in the university of that city, and subsequently director in chief of the academy of the fine arts. Here he lived and labored for the long period of 62 years, not only designing and producing the great works which have placed him in the first rank of artists, but forming the distinguished school, which is so nobly represented by such men as Rauch, Dannecker, Zauner, Tieck, and many others. One of his earliest works was the monument of Count van der Mark, in the church of St. Dorothy, at Berlin; and among his most celebrated productions may be mentioned, the statues of Frederick the Great at Stettin, Marshal Blucher at Rostock, Luther at Wittenberg, and the Quadriga in bronze on the Brandenburg gate at Berlin. Died 1850. One of his sons has attained great distinction as an artist at Rome.

SCHADOW, ZONO RIDOLFO, an Italian sculptor, was born at Rome in 1786; and was instructed by Canova and Thorwaldsen. He executed many admired sculptures and bas-reliefs, and died in 1822.

SCHAEFFER, GEOFFROY HEINRICH, a distinguished philologist, professor of Greek literature and librarian at Leipzig, where he was born, 1764. He is chiefly known for his edition of the Greek authors, published by Tauchnitz. Died 1840.

SCHAEFFER, J. C., a German naturalist, 1718-1790. His brother, J. GOTTLIER, a physician, 1720-1795.

SCHALKEN, G., a Dutch painter, 1643-1706.

SCHALL, J. A., a Ger. missionary, 1591-1659.

SCHANK, JOHN, a naval officer, was born in 1740, at Castlerig, in Fifeshire; entered the service early in life, and distinguished himself on the Canadian lakes during the American war as an able engineer. After the peace, he devoted himself chiefly to the improvement of shipping, and, among other contrivances, invented one for navigating vessels in shallow water, by means of sliding keels. He was actively employed in the defence of the British coast and in the transport service, during the war with France, and rose to the rank of admiral of the blue in 1821. He was one of the first founders of the society for promoting naval architecture, and wrote several valuable papers for the institution. Died 1823.

SCHANNAT, J. F., a Ger. historian, 1683-1739.

SCHARD, S., a German compiler, 1535-1573.

SCHARFENBERG, G. L., a German entomologist, duchy of Saxe-Meiningen, 1746-1810.

SCHARROK, R., an English philosopher of the school of Hobbes, 17th century.

SCHATTEN, N., histor. of Westphalia, 1608-76.

SCHATZ, G., a German poet, 1763-1795.

SCHAUFLEIN, J., a Dutch painter and engraver, taught by Albert Durer, 1487-1550.

SCHEDE, E., a German antiquarian, 1615-1641.

SCHEDE, P., a German poet, 1539-1600.

SCHEDONE, or SCHIDONE, BARTOLOMEO, an Italian painter, style of Corregio, 1570-1615.

SCHEELE, CHARLES WILLIAM, a native of Sweden, born 19th December, 1742, at Stralsund, Sweden; died 21st May, 1786, at Köping on Lake Moeler. This distinguished chemist, the son of a tradesman, was educated at a private academy in his native town, and afterwards at a public school, and then served his apprenticeship as an apothecary at Gotheborg. He subsequently acted as assistant to apothecaries at Malmo, Stockholm, and Upsala.

There his genius attracted the attention of the professors at this celebrated university, who encouraged him in his pursuits; but it is remarkable that the Swedish government, although aware of his talents, allowed, perhaps the ablest man which that country has produced, ultimately to end his days as a humble apothecary in a village on the banks of Lake Moeler. To him we owe the discovery of fluorine, chlorine, and of molybdic, tungstic, arsenic, lactic, gallic, tartaric, oxalic, citric, malic, purpuric, and sacclactic acids, glycerine and oxygen. He ascertained the nature and the constituents of ammonia and prussic acid, the characters of barytes and manganese, and the elements of the atmosphere. Few men of his century, with the exception of Priestley, can be compared with him as a discoverer. The last act of his life exhibited his character in a highly honorable phase. When in 1777 he bought the apothecaries' shop at Köping, he formed the intention of marrying the widow of his predecessor, and only delayed for the purpose of saving so much property as to make such an alliance desirable on her part. While laboring under a mortal rheumatic affection he declared his intention of marrying her in March, 1786; but his disease increasing rapidly, it was not till the 19th May that the ceremony was performed. On the 21st he left her all his property, and on the same day he breathed his last.

[R.D.T.]

SHEELS, R. H., a Dutch *savant*, 1622-1664.

SCHIEFFEL, C. S., a Ger. physician, 1693-1763.

SCHIEFFER, JOHN, a German archæologist and literary *savant*, professor at Upsala, 1621-1679. His grandson, HENRY THEOPHILUS, a Swedish chemist and botanist, 1710-1759.

SCHIEBE, J. A., a Ger. composer, 1708-1776.

SCHIEID, E., a Dutch Orientalist, 1742-1795.

SCHIEIDT, BALTHAZAR, a German theologian and Orientalist, 1624-1670. His son, VALENTINE, a physician, 1651-1731.

SCHIEIDT, CHR. L., a legist and historiographer to the king of Denmark, 1709-1761.

SCHIEINER, C., a Ger. astronomer, 1575-1650.

SCHIEHAMMER, CHRISTOPHER, a Dutch botanist, 1620-1652. His son, GONTHIER CHRISTOPHER, a physician and botanist, 1649-1716.

SCHIELLER, E. J. G., a German lexicographer and philologist, 1735-1803.

SCHIELLING, FREDERICK WILLIAM JOSEPH; born at Leonburg in Wirtemberg, 27th January, 1775; died 1854. We shall certainly not attempt to give a critical account of the speculations of this remarkable man. It must suffice if we can point out his place in the history of recent German philosophy, and define his practical influence over his contemporaries: nor do we undertake even this, unless under concession of the license to employ such general language as alone may convey to the reader of notices like these some distinct conception of the character of an obscure and difficult theme.—The order of recent German speculation, as marked by its authors, is the following—KANT, FICHTE, SCHIELLING, HEGEL. In the article devoted to him, we have explained pretty fully the peculiar achievements of KANT, which were briefly these;—living in an age when the pure sensational philosophy had arrived at its lowest stage, denying activity and even personality to Mind,—he re-established by irresistible criticism, that Mind is an essential Energy and Force; and farther unfolded the specific Laws according to which that Force acts. He showed that whatever the external Universe on which the Mental Force acts, our Substantive Knowledge de-

pend, for its form and nature, wholly on these Mental Laws. Nay—overlooking to a large extent the possible power of INTUITION properly so called (article LEIBNITZ)—he went so far as to say that, of the external Universe itself, we can know nothing save that it exists, or rather that an obscure *something*—called the NOUMENON—exists. It is evident wherein Kant's merit lies; he established the prime Reality of Subjective or Mental Laws.—Next, came FICHTE. Can it be alleged, said he, that Philosophy is complete, so long as it recognises, on the one hand, a Subjective Force, and opposite to it that hidden and impenetrable Externality called the Noumenon? Let us look deeper into things! What necessity for this Noumenon? Do we in reality know any thing except the movements of Mind itself; and is not the thing we term Externality, only our sense of obstacles in the way of the Mind's Efforts to develop itself? Hence his pure SUBJECTIVE IDEALISM:—he rejected the existence of every thing except his *Ego*; and it cannot be denied that he had several *logical* advantages over Kant.—When Fichte's philosophy—sustained by his wonderful ardor and eloquence—promised to become supreme, SCHELLING arose, and ventured a loftier flight. On first entering the philosophic arena, he was quite young; and a Temperament essentially poetic, warm with the enthusiasm of early years, possessed as its companion and fellow-worker, an Intellect, which—whatever its degree of incompleteness—must, by all the world, be confessed to have been endowed with extraordinary powers. With FICHTE, Schelling rejected Kant's *dualism*—the first and fatal step of both (article HAMILTON). The ultimate principle of Philosophy, he said, must be One, or the Absolute. Now this Absolute cannot be in the *Object* or in *Externality*; for *that* is not perceived or known to exist unless by a Mental Force distinct from itself; neither in the Mental Force of Kant, which needs a *Noumenon* to stir it to action; nor in the *Ego* of Fichte, which only develops itself under the experience of *obstacles*. What, then, is that, which all Philosophy seeks,—the *One* of PARMENIDES, the *Substance* of SPINOZA,—that Absolute and Transcendent Reality, which is the foundation at once of all existence and all knowledge; and, for itself, has no foundation except itself? It will be observed how nearly this Inquiry touches on the thought of all Religious Philosophy,—so near is it, that the solution might appear contained in the Idea of a SUPREME MIND, in whom we live, move, and have our being. And Schelling actually finds it, in an Idea closely analogous—the Idea of an *Absolute Subject*—of an *Ego*, not *special* like Fichte's, but Absolute and Transcendent, characterized by perfect unity, by liberty, reality, absolute substantiality,—cause imminent, infinite, indivisible, immutable. The correspondence, however, is not more than apparent: at least, there is soon a widest divergence. From this Absolute, according to Schelling, all things flow, or rather they are only its developments: Material Creation is an expression of its Infinite Reality, its positive manifestation within the limits of the Finite; and Mind is the act of its Self-consciousness, it is the act or power by which its Laws and Ideas are directly seen and felt. No use then, he exclaims, of a *Pre-established Harmony* between the realms of Thought and Existence; for they are the SAME: the actual World is only the representation of Ideas, and Mind is the type of the Universe. The SUBJECT and OBJECT are thus not only mere harmonious Opposites: they are IDENTICAL.—There are two distinct aspects under which this extraordi-

nary and daring *Philosophy of Identity* must be regarded: a few remarks on each will enable us to comprehend the nature and limits of Schelling's influence.—I. And, *first*, on that point of loftiest moment as to the character of any Philosophy—the place it assigns to the Nature and Duties of MAN. Now, it cannot be doubted, that, whatever the glowing and gorgeous account it can give of the attributes and dignity of the Reason—attaining in its high Inspirations, identity with the Absolute itself—Schelling's philosophy is open to that fatal objection already alluded to under article HEGEL—it builds upon Ideas obtained through our human Consciousness, and finally demonstrates that these Ideas are untrue! We should despair of success in an attempt to communicate here, any thing of a distinct account of the conceptions of this remarkable German, as to the position of the individual *Ego*; but it is plain, that there is no room among them either for our Human Personality, or our Human Liberty. His writings, indeed, are full of impressive references to Moral Liberty; but he tells us, when narrowly questioned, that Liberty, as a power of independent action, is incompatible with the idea of the Absolute. Neither on Schelling's system can personality of any kind inhere in the individual Mind. If we understand him aright, the soul is nothing more than an Idea of the soul of God. Its Individuality perishes with the body of which it is the living principle; although, as an Idea, it must live for ever, within the Thought of the Absolute, to which it returns. If, as has been alleged, this Pantheism is the most gorgeous of all similar schemes that Philosophy, ancient or modern, has evolved; certainly it is also one of the least disguised. It was understood that after silence during those twenty years within which the system of Hegel rose, flourished and fell, Schelling had undertaken to state his Philosophy anew, and to supplement it, so that Human Duty and Responsibility should be saved. For this end in 1841, he reappeared, in possession of the Chair at Berlin; but after occupying that distinguished place for three years, he finally retired, without affording the world assurance of his success.—Turning from the views of Schelling regarding *Man*, to those which inspire his conceptions of the External Universe, we pass from darkness into light. Considering this vast scheme of Material Nature, not as a mere collection of dead forces, held together by external relationship; but as a development now and for ever—a development incessantly unfolding, of the attributes of that SUPREME INTELLIGENCE—how profound, and impressive the Thought! It is no exaggeration that this exalted and most true Idea, has infused alike into the Science, Art, and Literature of Germany, the greater portion of that loftiness and inhering life, which has stamped it with the impress of Immortality. The Universe, said Schelling, is not merely an existence, it is a *becoming*, an *about-to-be*. It is not a *mechanism*, but a gigantic ORGANISM: and on this ground OKEN and many of his compeers wrought out those wonderful and prophetic views, which—even now—to elaborate and discern in their details, is perhaps the highest glory of the illustrious OWEN.—II. We must hasten, however, with a few and brief remarks, on the second main feature of this singular Scheme. Schelling's philosophy is a Philosophy of IDENTITY. He does not deny either Mind or Matter—*i.e.*, either the *Ego* or the *non-Ego*; but he declares them variations in *form* only, and that they are the *same*. The Mind is in one sense a mirror of the external universe; the

Ideas of the former, are the Laws of the latter :—hence, every true Philosophy of Nature must aim at discerning the Identity of these Laws with these Ideas ; for the discovery of such Identity is its ultimate triumph. Likewise from this essential aspect of Schelling's system, much error, and much of highest value have flowed. His own systematic '*Natur Philosophie*,' is certainly very strange ; and no one can recognize any accuracy in its *method*. Undervaluing the guidance of Induction, he institutes a description of *à priori* inquiry,—starting from the Mental Pole ; and, laying down what he finds there, as a sort of *à priori* *schema*, he sets about constructing Laws of Nature, in correspondence with it. Nothing can well be conceived farther from truth than his actual results ; although even amid that extraordinary medley many curious germs and indications, lie hid—flashings of unquestionable genius. But the general Idea has not been unproductive. It has inspired many of the noblest productions of GOETHE ; and we can trace its influence through all German poetry since Schelling first wrote. Its greatest achievements, however, lie in the Philosophy of Art. It has raised Art, from being a mere imitation or copy of Nature, to a high research after ARCHETYPAL IDEAS,—a research conducted in the main by that mysterious and profoundest Faculty belonging to our Human Spirit—the Faculty of IMAGINATION. The English reader will find many conceptions drawn from Schelling, scattered through the prose writings of COLERIDGE, whose remarkable mind such a philosophy was especially calculated to fascinate. Of his successor HEGEL, we have already endeavored to speak. See also article SPINOZA.

[J.P.N.]

SCHELLINGS, WILLIAM, a Dutch painter of landscape and history, 1631–1678. DANIEL, his brother and pupil, 1633–1701.

SCHERMER, L., a Dutch painter, 1688–1710.

SCHERZ, J. G., a German antiquarian, 1678–1754.

SCHEUCHZER, JOHN JAMES, a Swiss physician and naturalist, 1672–1733. His brother, JOHN, a botanist, 1684–1738. His son, JOHN GASPAR, a naturalist, 1702–1729.

SCHEYB, F. C. DE, a German poet, 1704–1777.

SCHIAMINOSI, RAPHAEL, an Italian painter and engraver, born at Borgo-San-Sepolcro, 1580.

SCHIAVONE, ANDREW, whose proper name was MEDULA, a painter of Dalmatia, 1522–1582.

SCHIDONE. See SCHEDONE.

SCHIEFERDECKER, JOHN DAVID, a German theologian and Orientalist, 1672–1721.

SCHIERSCHMIDT, J. J., a German juriconsult, and partisan of the doctrines of Wolfe, died 1778.

SCHILL, FERDINAND VON, a distinguished Prussian officer, was born in 1773, and entered the army in 1789. He was severely wounded at the battle of Jena ; but took the field again at the head of a free corps, displaying great ability. Indignant at the subjection of his country to the influence of Buonaparte, he resolved to make a great effort for the liberation of Germany. With that view he collected a small body of troops, and commenced operations on the Elbe ; but, after having obtained some successes, he was overpowered, and slain at Stralsund, in May, 1809.

SCHILLER, FRIEDRICH, is the only German poet who can contest the supremacy of Goethe. His range of thought is incomparably narrower ; his imagery not only wants the inexhaustible variety of Goethe's, but also fails in reaching his romantic cast of refined ideality ; and his tone of feeling is less

purely and abstractedly poetical. But his poetry, while its richness of imagination within its own sphere is magnificent, and while it is ruled by a very high sense of art, glows with a flame of intense and elevated moral emotion, which is irresistibly and delightfully impressive. It communicates the spirit which prompted it, and which governed the character of the warm-hearted and conscientious poet,—the spirit of love and reverence, of love for mankind, and reverence for all that is truly great and noble. It was accident and emulation, rather than innate aptitude, that led him to put forth his strength most frequently on the drama ; and his greatest works are less excellent in their portraiture of character (which is monotonous and often unreal), than in their deep passion, their moral purity and dignity, and their beautiful array of imaginative adornment. Many of his smaller poems, his odes and ballads, are as fine as those of Goethe ; and he was not only an animated and eloquent historian, but also an acute expounder of the laws of philosophical criticism. The short life of Schiller, beginning at a time whose literary character for Germany has been noted in the memoir of Goethe, is distributed, by his biographer Carlyle, into three periods. The first of these reaches from his birth, on the 10th of November, 1759, to 1783, when he was in his twenty-fourth year. This was the time of his irregular youthful aspirations, a stage in his history which was in some points like the youth of Goethe. His father, a retired army surgeon, was still in the service of the Duke of Wurtemberg ; and the poet was born at Marbach, in that duchy. After shifting from school to school, he was, in 1783, by the command of the duke, placed for six years in a college recently founded at Stuttgard, and administered with a military formality of discipline, which proved highly irksome to the pupil. He had contemplated being a clergyman. He was now compelled to study law ; and it was only as a change of evils that he accepted, after two years, the permission to betake himself to medicine. His favorite books were the critical and philosophical works of Lessing ; the '*Goetz*,' lately published by Goethe, which prompted a juvenile tragedy ; and, among other poems, the '*Messias*' of Klopstock, which tempted him to an imitation in his fourteenth year. In his nineteenth year he began to write '*The Robbers*,' an irregularly impressive monument of youthful fantasy, an exaggerated picture of human passion and error, drawn by one who, in his own words, had '*presumed to delineate men two years before he had met one.*' In 1783, having been appointed a regimental surgeon, he was able to print his tragedy : it caused universal excitement and much alarm, and brought on the author a ducal censure. In October, 1782, he absconded from Stuttgard to seek freedom and fame. In 1783, he published two other prose tragedies, '*Fiesco*' and '*Cabal and Loveie*.' Both are remarkable works, and the latter is deeply interesting ; but neither is worthy to have been any thing more than a youthful essay-piece of Schiller. The second period of his life opens here. Becoming, for subsistence, '*poet*' to the theatre at Manheim, he produced, besides small poems, the '*Philosophical Letters*,' which show the continuance of his chaotic and unsettled state of mind ; and, in the '*Thalia*, a periodical devoted to criticism, and chiefly written by himself, he printed, in 1784, the first three acts of the noble '*Don Carlos*,' his earliest dramatic piece in verse. In the spring of 1785 he gave up his place in the theatre, and went to live in the pretty village of Gohlis, in the woodland meadows near Leipzig. There he wrote, in a more cheerful vein than hitherto

his beautiful 'Song to Joy.' 'Don Carlos,' completed in 1786, made him celebrated as one of the first of all German poets; but he was weary of dramatic writing, and occupied himself much with lyrical and narrative ballads, like 'The Song of the Bell,' 'The Walk to the Forge,' 'Knight Toggenburg,' and 'The Cranes of Ibycus.' About this time also, he printed his extraordinary prose romance (never finished) called 'The Ghost-Seer.' He was next busied much with historical studies, and printed in part a 'History of Remarkable Conspiracies and Revolutions.' Soon afterwards he visited Weimar, where he became acquainted with Herder and Weiland, and afterwards with Goethe, between whom and him there was at first much dryness, giving place by degrees to cordial esteem. In 1788 appeared the first volume of his admirable 'History of the Revolt of the Netherlands,' which procured for him what he had long panted for, a quiet and independent social position. His attainment of this object begins the third and last period of his life. In 1789, being in his thirtieth year, he was appointed to the professorship of history at Jena, a few miles from Weimar; and in the beginning of the next year he married happily. He retained his professorship for ten years, removing, in 1799, to Weimar, where he lived on a pension from the duke, and on the fruits of such literary labor as he was able to undertake. He had been threatened with a disease of the chest as early as the time of his settlement at Jena; and the air of that place was pronounced too keen for him. The physicians indeed ordered, without effect, a total abstinence from intellectual exertion. Among the earliest fruits of this period were 'The History of the Thirty Years' War' (1791), regarded his best work of this kind; and several treatises on the Philosophy of History, taken from or prompted by his lectures. Afterwards, studying the philosophy of Kant, he endeavored to apply its principles to Literary Criticism in several singularly interesting essays, among which may be noted the 'Letters on the Æsthetical Education of Mankind' (1795). A good many critical and other papers were furnished to periodicals; and large additions were made to the stock of his minor poems. But, amidst all these exertions, and with a disease which he knew to be killing him, Schiller composed also the last and finest series of his long Poems. He contemplated writing an historical epic: but the design was never executed, and he fell back on the drama. His last historical work suggested the idea of 'Wallenstein;' and this fine play, or series of plays, which has with justice been declared to be 'the greatest dramatic work of the eighteenth century,' appeared in 1799. The tragedy of 'Maria Stuart' was published in 1800; the admirable 'Maid of Orleans' in 1801; in 1803, in the beautiful but imperfect tragedy of 'The Bride of Messina,' Schiller tried how far the forms of the Greek drama could be accommodated to modern ideas; and, in 1804, the career of an illustrious poet was worthily closed by the animated and poetical drama, 'Wilhelm Tell.' That year, at Berlin, where he saw his last play acted, Schiller's disease brought him to the brink of the grave. He recovered sufficiently to return to Weimar, and died there on the 9th of May, 1805. [W.S.]

SCHILLER, J. G., father of the great poet, known as an agriculturist, 1723-1796.

SCHILLING, F. A., a Ger. novelist, 1766-1839.

SCHILTER, J., a Ger. juriconsult, 1632-1705.

SCHIM, H., a Dutch poet, 1695-1742.

SCHIMMELMANN, ERNEST HENRY, Count Von, a statesman and patron of letters, died 1833.

SCHIMMELMANN, HENRY CHARLES, Count Von, a Danish minister of finance, 1724-1782.

SCHIMMELPENNINCK, RUTGER JOHN, a Dutch statesman and revolutionist, 1761-1825.

SCHINNER, or SKINNER, MATTHEW, known in history as the *Cardinal of Sion*, legate of the pope Julius II., and chief of the intrigues opposed to the pretensions of the French, died 1521.

SCHINDLER, V., a learned German, died 1611.

SCHLEGEL, JOHN ELIAS, a German poet and dramatic writer, some of whose plays are still acted in his native country, ancestor of the distinguished brothers of that name, 1718-1749. JOHN HENRY, his brother, professor of history, 1724-1780. JOHN ADOLPHUS, a third brother, distinguished for his literary talents as a theologian, and poet, and particularly for his eloquence as a minister of the Lutheran church, 1721-1793. CHARLES AUGUSTUS, eldest son of the latter, an officer in the service of the English East India Company, and a student of Sanscrit literature, died young. His other two sons are the subjects of the following articles.

SCHLEGEL, AUGUST WILHELM VON, the son of a Lutheran clergyman, was born at Hanover in 1767. At Göttingen, where he was first educated for the church, he passed to philosophical studies, and distinguished himself by contributing both prose and verse to the leading periodicals. In 1797 he began to publish his excellent translation of Shakspeare, which, after some years, he left to be completed and improved by Tieck. In the same year he obtained a professorship at Jena. He married a daughter of Michaelis; but, soon separating from her, and resigning office, he spent several years at Berlin. He there published the first of two volumes of poems, which, with his classical tragedy 'Ion,' were for a time highly estimated: and he also translated Calderon. But his chief occupation was the contribution of critical and other papers to periodicals, in which, with his brother Frederick and Ludwig Tieck, he aimed at inculcating those views of literature which make up the system, called by the Germans the Romantic. In 1805 he became acquainted with Madame de Stael, whom he taught pretty nearly all she ever learned of German literature, and attended during her travels for several years. The eloquent and striking 'Lectures on Dramatic Art and Literature,' which have made his name so popular in England, were delivered at Vienna in 1808, and printed the year after. On the fall of Napoleon he went to Coppet, and resided there till Madame de Stael's death in 1818. Next year he was appointed professor of history at Bonn, an office which he held till his death. Here he married a daughter of the theologian, Paulus; and this marriage, like the other, soon ended in a separation. His ambition now, besides some minor objects, aimed mainly at skill and fame as an Orientalist; and by his essays, translations, and teaching, he did very much for the study of the Sanscrit language. He died in 1845. [W.S.]

SCHLEGEL, FRIEDRICH VON, the younger brother of Wilhelm, possessed both greater exactness of knowledge, and greater power of philosophical thought: but he was obscure and mystical, and carried completely away by that dream of reverence for the middle ages, which he, his brother, Tieck, Novalis, and others, laid as the foundation of their so-called Romanticism. He was born at Hanover in 1772, and died in 1829. Classical literature was the theme of his earliest works. In 1796, he and his brother set on foot the 'Athenæum,' the first organ of their peculiar critical opinions. His history

afterwards exhibits a constant changing of place, and an industrious and versatile series of literary works; while his pursuits were further varied by political and official employment. The seriousness and consistency with which he carried out his admiration of the mediæval period showed themselves, in him as in some of the poets and artists, by a change of religion: he and his wife, a daughter of Moses Mendelssohn, became Roman Catholics in 1801. The same turn of mind made him act, with sincerity but much unpopularity, as a zealous abettor of the political system of the Austrian government. The works of his which are best known in this country are the 'Lectures on the History of Ancient and Modern Literature' (1815), and the 'Philosophy of History' (1829). [W.S.]

SCHLEGEL, T., a Ger. philologist, 1739-1810.

SCHLEGEL, T. A., a Ger. physician, 1727-72.

SCHLEIERMÄCHER, FREDERIC DANIEL ERNEST, an eminent German divine, was a native of Breslau, where he was born in 1768. His education was obtained in the Moravian institution at Niesky, and on leaving that academy in 1787 to pursue the study of theology, to which he had resolved on dedicating his future life, he repaired to the university at Halle. Having received orders, he was in 1794 appointed assistant preacher at Landsberg, on the Warthe; and afterwards minister of the charité, a large hospital in Berlin. In that situation he continued six years, and during his incumbency published a variety of little works, such as a German translation of Fawcett's Sermons, the Monologues, Letters of a Minister out of Berlin, and various contributions to religious and literary periodicals. His translation of Plato was begun at an early period; and as that was a great undertaking, comprising several large volumes, the publication extended over a series of years. Having been appointed to a situation at Stolpe, he left Berlin, in 1802, and settled in that curacy, where he published a volume of sermons. He had not, however, been a year resident at Stolpe, when he was chosen professor extraordinarius of divinity at Halle and preacher to the university. On the separation of Halle from Prussia, in 1807, he returned to Berlin as a public lecturer, and in two years after was appointed first minister of Trinity church, and afterwards professor ordinarius of the new university in that city. At this period he published his celebrated 'Study of Theology,' and in consequence several literary honors were conferred on him, for he was elected a member of the Royal Academy of Sciences, and secretary to the Philosophical Society. It must be acknowledged, that, however eminent his literary and philosophical acquirements, he brought at this part of his career a spirit of rash theoretical speculation to the discussion of theological subjects, that was deeply deplored by all simple hearted believers in the Gospel. Among his productions of this character must be ranked his 'Essay on the Gospel of Luke,' which was published in 1817; his 'Body of Divinity' (Christliche Glaube) was given to the world in 1822. This remarkable work, it is difficult to describe, for its plan is altogether unique, consisting of a regular consecutive series of philosophical propositions, the elucidation of which by turns astonishes the reader with its profundity, perplexes him with its intricacy, and delights him with the ardent piety that pervades it. In 1828, Schleiermacher accepted an invitation to come to London, to preach on the re-opening of Dr. Steinkopff's German church of the Evangelical Lutheran School. His text on that occasion was taken from Ephes. iv. 23, and the sermon, amid much that

was of an eminently devotional and impressive strain, produced a great sensation by its novel and startling peculiarities. He was the author of several volumes of sermons, besides his last work on 'The Doctrine of the Christian Faith.' He died 12th February, 1834, in the full enjoyment of the comforts of the gospel. A posthumous portrait of him soon after his death was published, accompanied by an admirable hymn of Claus Harms, or 'Heaven as the Christian's Fatherland,' and under the picture the following inscription, 'Happy end of a celebrated Divine.' The early writings of this eminent man abounded in a strain of sentiment, that led to his being extensively classed with the Neologian divines of Germany. Nay, the bold and startling opinions he announced in his larger works gave rise to impressions still more unfavorable to his theological soundness, for he has been characterized by various writers as a Sabellian, Hegelian, Fatalist, and even a Pantheist. Those who are most intimately conversant with his works, regard all such epithets as entirely unwarranted at any period of his life. There can be no doubt, however, that as he advanced in life his views became more scriptural and orthodox, and he must be considered as the great leader in that happy movement, which broke up the old school of German theology,—as occupying a midway place between a Hegel and a Hengstenberg, between a dead Rationalism and a living Evangelism. He was a person of the most active habits. He preached every Sabbath, without notes, to a crowded audience, and his lectures at the university during the week attracted as great a crowd of admirers as his sermons in the church. He exercised an immense influence over the intellectual, and especially the religious character of his countrymen. [R.J.]

SCHLICHTEGROLL, A. H. FREDERIC VON, a German biographer and numismatist, 1764-1822.

SCHLICHTINGIUS, JONAS DE BUCCOWIEC, a Socinian writer of Poland, 1596-1664.

SCHLOETZER, AUGUSTUS LOUIS, a German historian, was born in 1737, became professor of philosophy and politics at Göttingen, and died in 1809. Among his works are, 'A History of Lithuania;' and he was one of the conductors of what may be called the Literary Gazette of Göttingen.

SCHLUTER, A., a Dutch sculptor, 1662-1713.

SCHMAUSS, JOHN JAMES, historian and publicist, was born at Landau, in 1690. He was educated at Halle, and commenced a life of literary labor at the age of 21, from which he was relieved by the Margrave of Baden-Durlach, who gave him official employment at his court. In 1734 he was appointed professor of history at the university of Göttingen, which was then regarded as a school of diplomacy for the youth of the greatest families in Europe. Among his principal works are, 'A Sketch of the History of the Empire,' 'Corpus Juris publici Academicum,' 'Corpus Juris gentium Academicum,' and an 'Introduction to the Science of Politics.' Died 1757.

SCHMIDT, B., a German jurist, 1726-1778.

SCHMIDT, CHRISTOPHER, a writer of Russian history, Hanover, 1740-1801. His son, CONRAD FREDERIC, a theologian and philosopher, 1770-1832.

SCHMIDT, E., a Germ. philologist, 1560-1637.

SCHMIDT, F. W., a German botanist, d. 1796.

SCHMIDT, G. F., a Germ. engraver, 1712-75.

SCHMIDT, J. A., a Lutheran div., 1652-1726.

SCHMIDT, M. I., a Germ. historian, 1736-94.

SCHMIDT, S., a German Orientalist, d. 1697.

SCHMITH, NICHOLAS, a learned Jesuit and historian of Hungary, died 1767.

SCHMITZ, H. N., a Dutch engraver, 1758-90.

SCHMUCK, E. J., a Germ. physician, the first to write on magnetism in that country, died 1792.

SCHNEIDER, C. V., a Ger. anatom., 1610-80.

SCHNEIDER, E., or J. G., a German Hellenist, and actor in the French revolution, 1756-1794.

SCHNEIDER, JOHN GOTTLIEB, a German lexicographer, and naturalist, 1750-1822.

SCHNEIDER, J. C. F., a German musical composer, died 1853.

SCHNOW, JULIUS VON KAUFFELD, a German artist, died 1853, age 59.

SCHNURRER, C. F., a German theologian and Orientalist, 1742-1822

SCHÖBER, G., a Germ. physician, 1670-1739.

SCHÖEFER, PETER, one of the inventors of printing, was a native of Gernsheim in Darmstadt, and in early life followed the trade of a copyist at Paris. He was connected with Guttemberg and Faust from about the year 1450, and the daughter of the latter became his wife. He is supposed to have died in 1502.

SCHÖEPF, J. D., a Ger. naturalist, 1752-1800.

SCHÖEPFLIN, JOHN DANIEL, a learned German historian, was born in 1694, and became professor of history and rhetoric at Strasburg; where he died in 1771. He published several works of great research, and was for more than half a century one of the most distinguished ornaments of the university of Strasburg. His valuable library and museum he left to the public.

SCHOLARIUS, a patriarch of Constantinople, who was secretary to John Palæologus, and changed his name to Gennadius, died 1460.

SCHOLEFIELD, JAMES, an English divine and professor of Greek, in the University of Cambridge, died 1853, age 64.

SCHOLZ, Dr., a German oriental scholar, d. 1852.

SCHOMBERG, A. C., a divine, 1756-1792.

SCHOMBERG, ARMAND FREDERIC DE, descended from a German family, was born of an English mother of the house of Dudley in 1619, and began his military career in the army of Gustavus Adolphus. From 1661 to 1685 he was in the service of France, and became marshal, but in the last mentioned year he retired to Brandenburg, in consequence of the revocation of the edict of Nantz, and became Prussian commander-in-chief and prime minister. In 1688 he joined the prince of Orange, and was shot at the battle of the Boyne, 15th July, 1690.

SCHOMBERG, HENRY DE, marshal of France, was descended of a German family. He served in 1617, in Piedmont, under Marshal d'Estres, and afterwards against the Huguenots in the civil wars. In 1625 he was made field-marshal, and two years afterwards defeated the English at the isle of Rhé. In 1629 he forced the passage of Susa, on which occasion he was severely wounded. The next year he took Pignerol, and relieved Casal. In 1632 he defeated the rebels in Languedoc at the famous battle of Castelnaudari, for which he was made governor of that province. He wrote a narrative of the war of Italy, and died in 1633.

SCHOMBERG, ISAAC, a naval officer and historian. He served as lieutenant in the American war, distinguished himself in the victory gained by Admiral Rodney over Count de Grasse, and was captain of the Culloden in Lord Howe's fleet on 'the glorious first of June,' 1794. He eventually became a commissioner of the navy, and at his leisure devoted his attention to the composition of a work, entitled 'Naval Chronology,' 5 vols. D. 1813.

SCHOMBERG, ISAAC and RALPH, two sons of a

Jewish physician of Cologne, who died in London 1761. ISAAC was a graduate of Leyden and Cambridge, but was refused a fellowship in the College of Physicians, and died 1780. RALPH practised as a physician at Yarmouth and Bath, defrauded a public charity, and published a stolen Life of Mæcenas as his own, died 1792.

SCHONER, J., a Ger. mathemat., 1477-1551.

SCHOOCKINS, M., a Dutch critic, 1614-1669.

SCHOORL, SCHOREL, or SCHOREEL, JOHN, a Dutch painter of the Italian school, 1495-1562.

SCHOOTEN, F., a Dut. mathemat., 17th cent.

SCHOPENHAUER, JOHANNA, a German authoress of great celebrity, was born at Dantzic, 1770. Her father, whose name was Trosina, was a wealthy citizen of that town; and under the paternal roof she enjoyed every facility for the improvement of her great natural abilities. Soon after her marriage she entered on an extensive tour through France, Italy, and the British Islands, of which she subsequently published an account; and, on the death of her husband, she went to reside at Weimar, where she lived in the closest intimacy with Goethe, her home being the resort of all the eminent persons who were attracted to that court. Her chief works are, 'Fernow's Leben,' 'Ausflucht an den Rhein,' 'Jugendleben und Wanderbilder' (an English translation of which was published in 1847), 'Sidonia,' 'Die Tante,' and above all 'Gabriele,' which presents a charming picture of female character. Died 1838.

SCHOPP, GASPARD, in Latin *Scioppius*, a learned German, called the 'Grammatical Cur,' 1576-1649.

SCHOTANUS, C., a Dutch historian, 1603-71.

SCHOTT, AND., a learned Flemish Jesuit, 1552-1629. FRANCIS, his br., an author, 1548-1622.

SCHOTT, GASPARD, the pupil and friend of Father Kische, famous for his discoveries in natural and experimental philosophy, 1608-1660.

SCHOTTE, J. P., a Ger. physician, 1744-1785.

SCHRADER, J., a Dutch *savant*, 1721-1782.

SCHREIBER, J. F., a surgeon, mathematician, and prof. of anatomy at St. Petersburg, 1705-1760.

SCHREVELIUS, CORNELIUS, a learned critic, was born at Haarlem, about 1614. His father was Rector of the school at Leyden, in which office he succeeded him. His name is now principally known by his 'Greek and Latin Lexicon.' Died 1667.

SCHROECH, L., a Ger. physician, 1646-1730.

SCHROECKH, J. M., a native of Vienna, author of a History of the Church, 1733-1803.

SCHROEDER, C., an Austr. general, died 1807.

SCHROEDER, JOHN JOACHIM, a learned orientalist, born in Hesse Cassel, in 1680. He undertook a journey to Armenia, in order to prosecute his researches concerning the language of that country, and on his return published his 'Thesaurus Linguae Armenicæ.' He was, successively, professor of the oriental tongues, ecclesiastical history, and theology, at Marburg; where he died in 1756. His son, PHILIP GEORGES, a physician and medical writer, 1729-1772.

SCHUBART, C. F. D., a Germ. poet, 1739-91.

SCHUBERT, FRANCIS, an eminent musical composer, was born at Vienna, 1795. His melodies, known by their German name, 'Lieder,' have attained great celebrity throughout Germany, France, and England; among the best known are the 'Erl König,' 'Ave Maria,' 'Der Wanderer,' and 'Die Erwartung,' &c. Died 1830.

SCHRYVER, PETER. See SCRIVERIUS.

SCHULEMBOURG, JOHN MATTHIAS, Count De, a celebrated general, born at Magdeburg, in 1661.

He first served in the Danish army; after which he distinguished himself as a brave and skilful general in the wars of Poland, under Sobieski; on quitting which service he became generalissimo of the Venetian forces, and in 1716 gained great renown by his noble defence of Corfu against the Turks. Died 1747.

SCHULTENS, ALBERT, a German divine, who has been designated the restorer of oriental literature in the 18th century, was born at Groningen, in 1686; became professor of eastern languages at Franeker, and afterwards at Leyden; wrote several learned works, among which are 'Origines Hebraicae,' and a 'Commentary on the Book of Job,' and died in 1750.—JOHN JACOB, his son, who died in 1778; and HENRY ALBERT, his grandson, who died in 1793, were both distinguished by their knowledge of the oriental tongues, and filled the same situations at Leyden.

SCHULTET, ABRAHAM, in Latin *Scultetus*, an eminent protestant divine of Germany, 1566–1625.

SCHULTING, A., a German jurist, 1659–1734.

SCHULTING, C., a D. theologian, 1540–1604.

SCHULTZ, BARTHOLOMEW, in Latin *Scultetus*, a Ger. mathematician, who was employed by Gregory XIII. in reforming the calendar, 1540–1614.

SCHULTZE, E. C. F., a Ger. poet, 1789–1817.

SCHULZE, BENJAMIN, an Orientalist scholar and Lutheran missionary to India, died 1760.

SCHULZE, G. E., a Ger. philosopher, author of a work opposed to Kant and Reinhold, 1761–1833.

SCHULZE, J., a German philosopher, partisan of the doctrines of Kant, 1739–1805.

SCHULZE, P. H., a Ger. physician, 1687–1744.

SCHUMACHER, HEINRICH CHRISTIAN, a distinguished astronomer, was born in Holstein, 1780; was successively professor of astronomy at the university of Copenhagen, director at the observatory of Mannheim, in the grand duchy of Baden, and for many years astronomer in the observatory at Altona, and editor of the *Astronomische Nachrichten*. From 1817 to 1821 he measured, by order of the government, the degrees of longitude from Copenhagen to the western coast of Jutland, and the degrees of latitude from Skagen (the northern extremity of Jutland) to the frontiers of the kingdom of Hanover; a work which was afterwards continued by the astronomer Gauss. Among many other important works which came from his hands, he executed for the English government the measure of the difference of longitude existing between the observatories of Greenwich and of Altona. He was a diligent and accurate observer, one of his latest labors being connected with Encke's planet *Astræa*. Died 28th Dec., 1850.

SCHURER, J. L., a Ger. physician, 1734–1790.

SCHURMANN, ANNA MARIA DE, born at Cologne, in 1607, whose acquirements in the learned languages, the fine arts, and polite literature were so great, that she obtained the appellation of the modern Sappho. This erudite and accomplished lady, who understood the Hebrew, Greek, Latin, Chaldee, and several modern languages, and who was mistress of painting, engraving, sculpture, and music, at length became the victim of fanatical delusion. In 1650 she appeared as a zealous disciple of the enthusiast Labadie, to whom, it is said, she was secretly married; and, after his death, she retired to Weivart, in Friesland, where she died in 1678. Her 'Opuscula, or Pieces in Latin, Greek, and Hebrew,' were printed in 1652. She also wrote 'Latin Poems,' and a 'Defence of Female Study.'

SCHURTZFLEISCH, CONRAD SAMUEL, in Latin *Sarcmasius*, a German savant, 1641–1708.

SCHUSTER, G., a Ger. physician, 1701–1785.

SCHUTZ, C. G., a Ger. philologist, 1747–1832.

[General Schuyler's residence, Schuylerville.]

SCHUYLER, PHILIP, an American revolutionary officer, with the rank of major-general, was born in New York. He was, during the revolution, a chief in command on the frontier of New York, preparing to invade Canada, when he was superseded, in consequence of some doubts of his fitness, by the appointment of General Gates. He was a senator of the United States in the latter part of his life, and died 1804.

SCHUYLER, PETER, an Am. colonist, Mayor of Albany, New York, in the year 1691.

SCHWAB, J. C., a German mathematician and philosopher, opposed to Kant, 1743–1821.

SCHWANTHALER, LUDWIG VON, an eminent sculptor, descended from a family that for generations had been distinguished in the arts, was born at Munich, 1802. At the age of 16 he entered the academy of Munich, where he soon attracted the attention of Cornelius, by whose advice he repaired to Rome; and after enjoying there the friendship and instructions of Thorwaldsen, he returned to his native city in 1827, where he found ample scope for the development of his genius in the numerous commissions intrusted to him by the royal family of Bavaria. It would be difficult with our limits to point out even a tithe of his productions; suffice it to say, that rich as Munich has become in works of art, it owes no small portion of its celebrity to this artist, whose marvellous power of composition and versatility of genius showed themselves no less in his admirable statues and reliefs, than in his frescoes and cartoons. Died 1848.

SCHWANTHALER, HAVER, a German sculptor of Munich, died 1854.

SCHWARTZ, BERTHOLD, otherwise CONSTANTINE AUCLITZEN, a German monk, to whom the invention of gunpowder has been attributed. He was preceded, however, by Roger Bacon, who died 1292. Cannon were first used by the Venetians in 1300, and were employed by the English at the battle of Cressy, 1346.

SCHWARTZ, C., a Germ. painter, 1550–1594.

SCHWARTZ, CHRISTIAN FREDERIC, a German missionary to the East Indies. In 1767, he was employed by the English Society for the Promotion of Christian Knowledge, and he continued throughout his life to labor in the sacred cause with unceasing zeal. He was held in high esteem for his character by the Hindoos, and the rajah of Tanjore made him tutor to his son. Died 1798.

SCHWARTZ, C. T., a Ger. *savant*, 1675–1751.

SCHWARTZENBERG, CHARLES PHILIP, Prince, an Austrian field-marshal, was born of an ancient and illustrious family at Vienna, in 1771. He entered into the army early, and rapidly proceeded through all the grades of military rank until he became a general officer. After serving two campaigns against the Turks, he was employed in the first campaign against the French in the war that followed the execution of Louis XVI. On the death of the emperor Paul in 1801, he was sent to St. Petersburg to congratulate Alexander on his accession. He

[Prince Von Schwarzenberg.]

served under General Mack in 1805, and succeeded in withdrawing the cavalry under his command from the consequences of the capitulation of Ulm. He also took a share in the battle of Austerlitz, which was fought against his advice, as well as in that of Wagram. In 1812 he was appointed to the command of the auxiliary force of 30,000 Austrians, extorted by Napoleon in aid of his disastrous invasion of Russia; and in 1813 he was invested with the rank of field-marshal, with the commandership-in-chief of all the armies allied against France. On the return of Buonaparte from Elba he was again intrusted with the command of a great portion of the allied forces; and at the conclusion of the war he was made president of the aulic council, which post he occupied until his death, in 1820.

SCHWARZENBERG, PRINCE, the celebrated Austrian statesman, succeeded Metternich as prime minister in November, 1848, when the Austrian empire was almost in ruins; 1800–1852.

SCHWEDIAUR, or SWEDIAUR, F. X., a French physician and naturalist, 1748–1824.

SCHWEINITZ, LEWIS D., a Moravian clergyman, the secular head of the Moravians and author of several botanical works, died 1834, aged 52.

SCHWERIN, CURT CHRISTOPHER, Count Von, field-marshal in the service of Prussia, companion-in-arms of Marlborough and Prince Eugene, born 1684, killed at the battle of Prague 1757.

SCIÀVONI, M., an Italian painter, 1522–1582.

SCILLA, AUG., an Italian painter, 1639–1700.

SCINA, D., an Italian physician, 1765–1837.

SCIOPIUS. See SCHOPP.

SCIPIO, the name of several illustrious Romans:—1. PUBLIUS CORNELIUS, general of cavalry and

consul, 393 B.C. 2. LUCIUS CORNELIUS, surnamed *Barbatus*, consul 297 B.C. 3. LUCIUS CORNELIUS, consul 259 and censor 258 B.C. The inscription on his tomb, discovered in 1780, is one of the oldest monuments of the Latin tongue. 4. CNEIUS CORNELIUS, surnamed *Asina*, twice consul, 260 and 254 B.C.; he distinguished himself against the Carthaginians in Sicily. 5. PUBLIUS CORNELIUS, consul 218 B.C., in which year he lost the battle of Picinus, which left Hannibal master of northern Italy; he went as proconsul to Spain, and was killed there in the contest with Asdrubal 212. 6. CNEIUS CORNELIUS, surnamed *Calvus*, brother of the preceding, filled the same offices, and reaped his laurels and his death in Spain about the same time. 7. PUBLIUS CORNELIUS, surnamed *Africanus the Elder*, son of Publius Cornelius and nephew of the preceding (next article). 8. CNEIUS CORNELIUS and LUCIUS (or PUBLIUS) CORNELIUS, sons of Scipio Africanus, have little place in history; the latter, however, is memorable as an historical writer, and for his adoption of the second Africanus. 9. LUCIUS CORNELIUS, surnamed *the Asiatic*, son of the Publius who was killed in Spain, and companion-in-arms of his brother, Africanus. He was consul 189 B.C., and defeated Antiochus, king of Syria, but afterwards died in obscurity. 10. PUBLIUS CORNELIUS, surnamed *Nasica*, son of the Cneius Cornelius killed in Spain; he is remembered as a man of the rarest public virtue, distinguished himself as a jurisconsult, defeated the Lusitanians, and was consul 200 B.C. 11. PUBLIUS CORNELIUS SCIPIO NASICA, surnamed *Corculum*, son of the preceding, consul 162 B.C. 12. PUBLIUS CORNELIUS, surnamed *Serapion*, son of the preceding, was consul 138 B.C., and became sovereign pontiff by the choice of his fellow-citizens, without presenting himself at the election. He suppressed the sedition of Tiberius Gracchus, his cousin, at the cost of three hundred lives, B.C. 133, and was then sent on a mission to Asia, where he died 131. 13. His son, PUBLIUS CORNELIUS, was consul 112 B.C., and died the same year. 14. SCIPIO NASICA, son of the latter, known, in consequence of his adoption, as *Metellus Scipio*, and the enemy of Cæsar, exercised great influence at the declining period of the republic; he killed himself after the defeat of Thapsus B.C. 46. 15. His son, PUBLIUS CORNELIUS, was consul in the reign of Augustus, B.C. 15, and was exiled for his incestuous intercourse with Julia. 16. The last of the Scipios known to history, grandson of the preceding, was a vile character of the reigns of Tiberius, Claudius, and Nero. He distinguished himself, however, as a soldier.

SCIPIO AFRICANUS THE ELDER (*Publius Cornelius Scipio Africanus Major*), the greatest man of his age, was born B.C. 234. He was the son of P. Cornelius Scipio who encountered Hannibal on the banks of the Ticino (B.C. 218); and perished in Spain B.C. 211. When only seventeen years old, Scipio saved the life of his father in the battle of the Ticino; two years after (B.C. 216) he fought at Cannæ as a military tribune; and, being one of the few officers who survived that fatal carnage, was principally instrumental in preventing the Roman nobility from leaving Italy in despair. The distinction which he had thus acquired secured his unanimous election to the ædileship in B.C. 212; and in B.C. 210 he was sent as proconsul to Spain, nearly the whole of which country had reverted to the possession of the Carthaginians. Here his remarkable talents first displayed themselves; his military skill defeated the enemy in the field of battle, while his personal influence, his humanity and courtesy, gained

[Scipio Africanus the Elder.]

for him the affections of the inhabitants of the country. Returning to Rome in B.C. 206, he was unanimously elected consul for the following year, and obtained the province of Sicily, with power to cross over into Africa, if he should deem it necessary for the interest of the state. The senate resolutely refused him an army, thus rendering his command worthless; but the celebrity of his name soon attracted volunteers from all the towns of Italy; and having obtained a prolongation of his command, he proceeded as proconsul to Africa (B.C. 204), where, in conjunction with Masinissa, king of the Numidians, he obtained some advantages over the enemy. The Carthaginians in the mean time had collected a powerful army under the command of Hasdrubal, the son of Gisco, and were aided by Syphax, a Numidian prince, who brought with him a numerous force. In the early part of B.C. 203, Scipio made an unexpected attack upon the two encampments, burnt them to the ground, and destroyed nearly the whole army. The two generals, who escaped, soon returned with a fresh force, but were again defeated with great slaughter. The Carthaginians now becoming alarmed by these repeated disasters, resolved to recall Hannibal from Italy; and at the same time opened negotiations for peace, during which they obtained a truce for forty-five days. Before the specified time expired, the Carthaginian populace, who had never been desirous of peace, plundered some Roman ships which were bringing provisions for Scipio's army, and insulted the Roman envoys who were sent to demand reparation. Hostilities were resumed on the arrival of Hannibal, who soon collected an army far superior in number to that of Scipio. Hannibal, however, foreseeing that the loss of a battle would be ruinous to Carthage, was anxious, before it was too late, to conclude a peace; and Scipio, fearing lest his enemies at Rome might succeed in supplanting him in the command, was not unwilling to put an end to the war; but the terms which he offered were such as the enemy could not, without entire submission, accept, and Hannibal was thus forced to continue to act on the defensive. Scipio now resolved to hazard a decisive battle, which his opponent cautiously avoided, till on the Roman army feigning a retreat, Hannibal followed with his cavalry, and was defeated in the neighborhood of Zama. The decisive battle was at last fought on the 19th of October, B.C. 202, not far from the city of Zama. Scipio's victory was complete; 20,000 of the Carthaginians were slain, and an equal number taken prisoners. The negotiations

which ensued were concluded during the following year, when Scipio returned to Rome, and was received with the greatest enthusiasm. He entered the city in triumph, and obtained, in honor of his victories, the surname of Africanus. The rest of his life was passed in comparative quiet. He was censor in B.C. 199 and consul a second time in B.C. 194. He served as a legate in Greece under his brother, Lucius, who was consul B.C. 190; and having on his return been accused of receiving bribes from Antiochus, king of Syria, he quitted Rome and retired to his country seat at Liternum, where he spent the remainder of his days in the cultivation of his estate. He is believed to have died B.C. 183, leaving two sons and two daughters, the younger of whom was the mother of the Gracchi. Scipio, as a general, was second to none but his great opponent Hannibal; as a Roman citizen he does not deserve equal praise; he disregarded the laws of the constitution whenever these stood in the way of his own views and passions. [G.F.]

SCIPIO AFRICANUS THE YOUNGER (*Publius Cornelius Scipio Æmilianus Africanus Minor*), was the younger son of Lucius Æmilius Paullus, the conqueror of Macedonia, and the adopted son of Publius Scipio, the elder of the sons of the great Africanus. Scipio must have been born B.C. 185, as he took an active part, at the age of seventeen, in the battle of Pydna (B.C. 168), in which his father defeated Perseus, king of Macedonia. From his earliest years he appears to have devoted himself to the study of literature; and even his arduous duties as a military commander did not prevent him from embracing every opportunity of extending his knowledge of Greek letters and philosophy. The historian Polybius, with whom he probably became acquainted in Greece, was his intimate friend, and accompanied him in nearly all his campaigns; and the poets Lucilius and Terence, at a later period of his life, enjoyed his friendship and patronage. His fondness for Greek literature and refinement excited feelings of uneasiness in the minds of his friends; but to this Scipio added the virtues and patriotism of a genuine Roman. He first attracted notice in B.C. 151, when, in consequence of the disasters which had befallen the Romans in Spain, great difficulty was experienced in raising troops, which he at once removed by offering his services. As military tribune in the army of Lucullus he distinguished himself by personal courage, while his disinterested integrity gained the affections of the barbarians as well as his own countrymen. On the breaking out of the third Punic war in B.C. 149 he went to Africa, still holding the rank of military tribune, and again distinguished himself so much by his courage, prudence, and justice, as to gain the unlimited confidence of all with whom he came in contact. In B.C. 148 he returned to Rome, accompanied by the wishes of all the soldiers that he might soon be sent back as their commander; and such was the impression produced by his character and achievements that, when he offered himself a candidate for the ædileship for B.C. 147, he was elected consul, though he had not attained the legal age, and had Africa assigned to him as his province. On his arrival in the Roman camp he speedily restored discipline, and commenced a series of operations which ultimately confined the Carthaginians to their capital. In the spring of the following year he attacked the devoted city, which was defended from street to street, and from house to house, and, after a struggle of three days, razed it to the ground. When the arrangements necessary for reducing Africa to the form of a

province were completed, Scipio returned to Rome, where he obtained a splendid triumph, and also the surname of Africanus. He was censor in B.C. 142. Meanwhile, the war continued to rage in Spain, the inhabitants of Numantia still continuing to refuse to acknowledge the supremacy of Rome. Scipio was accordingly appointed consul a second time B.C. 134, and succeeded in reducing them to submission (B.C. 133) after they had suffered the most dreadful extremities of hunger. For this victory he received the surname of Numantinus. During his command in Spain, Tiberius Gracchus, to whose sister, Sempornia, he was married, had fallen a victim to his efforts in favor of an Agrarian law; and the conqueror of Numantia, on his return to Rome in B.C. 132, became the leader of the aristocracy in preventing the law from being carried into effect. He thus sacrificed the favor of the people. After making a violent speech in the Forum, in which he a second time publicly avowed his approval of the death of Tiberius Gracchus, he went home in the evening, accompanied by the senate and a great number of the allies, and retired to his bed-room with the intention of preparing a speech for the following day. Next morning he was found dead in his bed-room; and a general opinion prevailed that he had been murdered. Suspicion fell upon various persons; and among others, upon his wife, Sempornia, and her mother, Cornelia. [G.F.]

SCLATER W., an English divine, died 1647.

SCOPAS, a Greek sculptor, 4th century B.C.

SCOPOLI, JOHN ANTHONY, an Italian naturalist and physician, was born in 1723, at Cavalese in the Tyrol; and became, successively, first physician of the Tyrolese mines, professor of mineralogy at Chemnitz, and professor of botany and chemistry at Pavia. He wrote several works on botany and entomology. Died 1787.

SCORZA, S., a Genevese painter, 1589-1631.

SCOTT, a family of dissenting ministers, the principal of whom was DANIEL, a writer of much learning on the Trinity, died 1759. THOMAS, his half-brother, author of Sermons, died 1746. The son of the latter, of the same name, published a version of the book of Job in 1774; and his second son, JOSEPH NICHOL, both a minister and physician, died about 1774.

SCOTT, CHARLES, governor of Kentucky, and brigadier general in the army of the revolution. Died 1807.

SCOTT, DAVID, a Scottish historian, and partisan of the Stuarts, 1675-1742.

SCOTT, DAVID, was born at Edinburgh in the month of October, 1806. His father, Robert Scott, brought him up to his own profession, that of an engraver, but this pursuit being extremely distasteful to the younger Scott, he took to painting in 1827, after the expiration of his apprenticeship. Having made several preliminary studies and efforts in Edinburgh, and attended the anatomical lectures of Dr. Monro, he considered himself sufficiently prepared for an Italian tour. He started in the autumn of 1832, and spent the greater portion of 1833 in Rome, where he painted a large unintelligible picture, which he called 'Discord,' or 'Household Gods Destroyed,' a composition recalling Flaxman's Prometheus Chained, but in this case absurdly applied; it suggests, if any thing, Samson awaking after the treachery of Delilah. He returned to England in the spring of the following year, to find 'the coloring of English pictures of the day, white and vermilion, flimsy, raw, unnatural, and sketchy,' in common no doubt with many other travellers on the

continent some years back. David Scott came home a devoted victim to the *grand style*, as foreshadowed in his 'Discord,' but to the poetic or ethic, rather than the religious; like Michelangelo, he was a lover of the abstract, but wanting the deep pious devotion which certainly pervaded the grand conceptions of that extraordinary man. Scott now exhibited a long succession of pictures at the Royal Scottish Academy, of which he was a member, of varied merit, but all of an unusual character and subject, classic and other history, however, gradually asserting its claim to share attention with abstract æsthetics, generally too abstruse to be felt at all by Scott's public; but in some instances the work was a compromise between the two, as in his 'Paracelsus,' or 'Alchymist,' and in his truly magnificent work, indeed his masterpiece, 'Vasco de Gama encountering the Spirit of the Cape,' now placed in the Trinity House at Leith. His perseverance in this unbeaten path in spite of an almost constant succession of disappointments as regards the more substantial rewards of art, gradually undermined his constitution, and he sunk at last into a premature grave March 5, 1849, in his forty-third year. With all his ill-timed abstractions, and moral peculiarities, and they are abundantly shown in the very interesting memoir of him by his brother, Scott was unquestionably a very superior artist, and may claim the martyr's branch with far more justice than Haydon. Most of his works show a high intellectuality, and many as pictures are vigorously drawn and even gorgeously colored, as for instance his admirable 'Triumph of Love,' in the possession of his brother, a subject offering a delightful spot of sunshine among the usually prevailing gloomy abstractions of his pessimist philosophy. Among his unquestionably good works, also, either for sentiment or execution or both, are:—Queen Elizabeth in the Globe Theatre; Peter the Hermit; Jane Shore; Richard III.; Achilles addressing the Manes of Patroclus. To these must be added some series of designs, as those illustrating the Pilgrim's Progress; and his very remarkable and admirable series on 'The Ancient Mariner,' fully worthy of that extraordinary poem. For further details the reader may consult the *Memoir of David Scott, R.S.A., containing his journal in Italy, notes on art and other papers, with seven illustrations*, by William B. Scott, an ably planned work, and calculated to afford, if any thing can, an invaluable lesson to all inordinately ambitious young artists, suffering under an impatient morbid hankering after the praise of those collectively, whose judgments individually they invariably profess to despise when unfavorable to themselves. [R.N.W.]

SCOTT, G. L., a mathematician, died 1780.

SCOTT, HELENUS, an eminent physician, who, after receiving his education at Aberdeen and Edinburgh, visited London, and went to Venice with an intention of travelling overland to India; but his pecuniary resources failing, he was under the necessity of returning to England. He, however, subsequently went thither, and realized a considerable fortune. He was the author of a romance, entitled 'The Adventures of a Rupee.' He died, while on a voyage to New South Wales, in 1821.

SCOTT, JAMES, an eloquent preacher, belonging to the Church of England, was born at Leeds, in 1733; studied at Cambridge; and afterwards distinguished himself as a pulpit orator at Trinity Church, Leeds, where he was lecturer. But he was still more noted as a political partisan, by writing in the public journals under the signatures of 'Anti-

Sejanus' and 'Old Slyboots.' Through the interest of Lord Sandwich he was presented to the rectory of Simonbourn, in Northumberland, where he unfortunately got into a litigation with his parishioners, which lasted twenty years, and created such a hostile feeling against him, that he was compelled to move to the metropolis, in order to insure his personal safety. Died 1814.

SCOTT, JOHN. See ELDON.

SCOTT, JOHN, a quaker poet, born at Bermondsey, in 1739. He resided, during the greater part of his life at Amwell, and died in 1783. He was the author of 'Amwell,' and other poems; a 'Digest of the Highway Laws,' 'Critical Essays.'

SCOTT, JOHN, a miscellaneous writer, who commenced the publication of the 'London Magazine' in 1820, and was killed in a duel arising out of a literary quarrel 1821. His works are 'A Visit to Paris in 1814,' and 'Paris Revisited in 1815 by Way of Brussels, including a Walk over the Field of Waterloo.'

SCOTT, JOHN, a learned minister of the Church of England, author of 'The Christian Life from its Beginning to its Consummation in Glory,' and of some critical and casuistical works, 1638-1694.

SCOTT, JOHN, an American lawyer and judge of Virginia, 1782-1850.

SCOTT, MARTIN, lieut. colonel in the American army, fell in the battle of El Molino del Rey, Sept. 8th, 1847. He was remarkable in his youth, for his certainty of aim with the rifle; none of the sharpshooters of the Green Mountains, in Vermont, his native place, could compete with him.

SCOTT, SIR MICHAEL, generally reputed a magician, was a native of Scotland, remarkable for his learning and skill in the occult sciences. His works are 'The Secrets of Nature,' 'The Sun and Moon,' 'Mensa Philosophica,' an edition of Aristotle, and a translation of Avicenna's History of Animals from the Arabic into Latin; died 1293.

SCOTT, MICHAEL, the well-known author of 'Tom Cringle's Log,' was born in Glasgow, 1789; received his education at the high school and university of that city, repaired to Jamaica in 1806, where he remained till 1822, and finally settled in Scotland, where he embarked in commercial speculations. During his leisure he composed the entertaining sketches above mentioned, which first appeared in 'Blackwood's Magazine' (but which have since been published separately); and he preserved his incognito so well, that it was not until after his death that they were found to have proceeded from his pen. Died 1835.

SCOTT, REYNOLD or REGINALD, a gentleman of Kent, remarkable for his work written against the common belief in witchcraft, which was replied to by Casaubon, Glanvil, and James I.; died 1599.

SCOTT, SAMUEL, an English painter, died 1772.

SCOTT, THOMAS, an English divine, born in 1747, at Braytorf, in Lincolnshire, was intended for the medical profession, but entered the church, and rendered himself celebrated as a theological writer. He became chaplain of the Lock Hospital in 1785, and rector of Aston Sandford in 1801; was the author of 'The Force of Truth,' a 'Defence of Calvinism,' a 'Commentary on the Bible,' and 'Sermons.' Died 1821.

SCOTT, THOMAS, otherwise *Rotherham*, from his birth-place in Yorkshire, a prelate and statesman, died 1500.

SCOTT, SIR WALTER, had a pedigree, his sense of which affected materially both the spirit of his writings and the events of his life. From the great

border family, now represented by the dukes of Buccleuch, there came in the fourteenth century, as an offshoot, the family of Harden, the heads of which are barons of Polwarth. The poet's great grandfather was a younger son of Scott of Harden; his grandfather, poorly provided for, became a farmer in Roxburghshire; and his father, Walter Scott, was a writer to the signet or attorney in Edinburgh, and married the daughter of a medical professor in the university. Walter, the fourth child of this couple, was born in the Old Town of Edinburgh, on the 15th of August, 1771. He was a sickly infant, and became incurably lame in his second year; and, after this, till he was about eight years of age, his childhood was principally spent at his grandfather's farmhouse of Sandyknowe, where he became lovingly familiar with the scenery and traditions and ballads of the border. In this stage he was fond of reading; but, on being placed at the High School of Edinburgh, towards the end of 1779, he failed to distinguish himself in the regular studies of the class. He was, however, eminent for his historical and miscellaneous knowledge, for his skill in story-telling, and for his personal courage. In his twelfth year his love of ballad-poetry was ineradicably established, by the delight with which he perused Percy's 'Reliques.' In the winter of 1783 he entered the university of his native city, attending only one session, with little or no apparent profit. He never understood Greek beyond the elements, and had but a loose scholarship in Latin; and the acquaintance, which he obtained in early manhood, with French, Italian, Spanish, and German, was very superficial. In May, 1786, when he was nearly fifteen years old, he was articled to his father, and attended regularly in chambers for about four years. For literary avocations he was making, undesignedly, full preparation, by devouring romances, novels, histories, and old plays; while he continued to distinguish himself by telling and inventing stories. His father's intention, as well as his own, was, that he should come to the bar; and his attendance in the debating-club, called the Speculative Society, was one of his steps of training, while it gave occasion for his writing of essays, exhibiting his turn for antiquarian and poetical studies. In 1792 he was admitted as a member of the Scottish Faculty of Advocates. In 1796 he published translations, in verse, of Bürger's German ballads, Lenora, and the Wild Huntsman; and he contributed to Lewis's Tales of Wonder. In 1798 appeared his translation of Goethe's prose drama, 'Goetz Von Berlichingen;' and in 1799 he wrote, and made known to his friends, the earliest of his considerable efforts in original poetry, the ballads of 'Glenfinlas,' 'The Eve of St. John,' and 'The Grey Brother.' Still he had gained no high literary reputation; nor was literary composition more than an occasional employment for him. He paid an average amount of attention to his profession, and was desirous to secure an independent livelihood from some source other than literature. In the end of 1797 he married Miss Carpenter, the daughter of a French emigrant, whose small fortune added something to his income: his father's death next gave him a moderate patrimony; and, in 1799, the patronage of the duke of Buccleuch and Lord Melville, to whose politics he steadily and warmly adhered, bestowed on him the sheriffship of Selkirkshire, an easy office, with a salary of three hundred pounds. In the same year, his poetical taste, both in rhyme and in diction, (if not in more important matters,) received a new impulse and direction from hearing unpub-

lished poems of Wordsworth and Coleridge, especially 'Christabel.' Now, likewise, easy in circumstances and occupying a good position in society, Scott was sufficiently independent of professional labor to devote himself more and more to less uncongenial pursuits; and he gradually made authorship the main business of his life. The brilliant period of Scott's literary career extends from 1802, when he was in his thirty-first year, to 1825, when he was in his fifty-fourth. In the first of those years he published the first and second volumes, and in the next year the third volume, of 'The Minstrelsy of the Scottish Border.' This publication gave him at once a distinguished reputation. The old ballads were excellently edited; the annotations showed great sagacity, good sense, and various knowledge; and there was undeniable promise in the few ballads of his own that were inserted in the collection. In 1802, likewise, he had begun to write what he called, in a letter to Ellis, 'a kind of romance of border-chivalry, in a light-horseman sort of stanza.' This piece, insensibly swelling in dimensions, soon became too bulky for the 'Minstrelsy,' and was reserved to be the foundation-stone of Scott's celebrity as an original poet. It was circulated among his friends, and warmly approved by Jeffrey, Wordsworth, and others; while the author was editing the ancient romance of 'Sir Tristrem.' It appeared at length, in 1805, under the title of 'The Lay of the Last Minstrel.' Its success was immediate and unexampled. Surprise, doubtless, aided the result: the poem appeared when genuine poetry had long been unheard by the public, unless in the earliest volumes of Crabbe and Campbell; and it was also the first vigorous poetical narrative that had been produced in England for more than a century. But, further, it was the earliest poem which was inspired by the animation and eagerness of the age that gave it birth. The 'Lay' was not, any more than its successors, the effort of a poet aiming at the highest effects of his art: but it was a work of great genius and originality; and, if inferior to some of Scott's later poems in mechanism, and less rich in strikingly poetical passages, it was more faithful than any of them to his design, of reconstructing the chivalrous romance in a shape accommodated to modern sympathies. 'Marmion,' containing, in its description of the battle, one of the most spirited passages in the whole range of our poetry, appeared in 1808; the beautiful metrical romance of 'The Lady of the Lake' in 1810; in 1811 came the 'Vision of Don Roderick,' indicating a decrease of strength, which showed itself next year also in 'Rokeby'; in 1815 was published 'The Lord of the Isles'; and the list of the metrical romances closes with 'The Bridal of Triermain,' and 'Harold the Dauntless,' published respectively in 1813 and 1817, and both of them anonymously. In the course of this period, also, the poet edited the works of Dryden and Swift, contributed for a time to the *Edinburgh Review*, and in 1808 assisted zealously in establishing its formidable rival the *Quarterly*. He wrote also biographical and critical prefaces, and performed much of other miscellaneous labor. To such work he was led by those commercial engagements which he now formed, and which exercised in the end so disastrous an influence on his fortune. His school-fellow, James Ballantyne, having been the editor and printer of a newspaper in Roxburghshire, was assisted by Scott in setting up a printing-house in Edinburgh; and the poet, after having lent money to the firm, became really a partner of it in 1805. Not long afterwards, his

connection with trade became yet closer. He quarrelled with his bookseller, Constable; he desired to obtain facilities for giving to the world literature of a higher stamp than that on which publishers are likely to venture; and, not very consistently with his desire, he entertained sanguine hopes of profit from a publishing business guided by a man of knowledge and influence like himself. Accordingly, in 1808, John Ballantyne, a brother of James, was placed at the head of a new publishing firm; but here, as in the former case, Scott was a partner to the extent of a third. All these arrangements were kept profoundly secret; in the eyes of the public, and even of his most intimate associates, Scott was merely the patron and friend of the Messrs. Ballantyne.—A few years after the formation of these partnerships, Scott entered on the second stage of his literary progress. He was one of the first to discover the waning popularity of his poetry; and he cheerfully set himself at work to regain his laurels on a new field. He wished for fame; he wished also for gain. He had long cherished the ambition of territorial possession; and this ambition he could not hope to gratify speedily from his ordinary means, though his appointment as one of the principal clerks of the Court of Sessions in Scotland (an honorable and very easy post), added, from about 1812, thirteen hundred a-year to his income. From this passion arose many of the rash adventures which finally ruined the publishing firm; hence also, in no small degree, arose the eager industry with which, when his prose works proved so profitable, he poured forth volume after volume. In 1805, while he was engaged on *Marmion*, he had begun to write a novel; in three weeks during the summer of 1814 he added two volumes to it; and it was published anonymously in July of that year, bearing the name of 'Waverley, or, 'Tis Sixty Years Since.' For a dozen years afterwards, the *Waverley Novels*, popular beyond example, admired by critics as well as devoured by the public, were showered out in ceaseless succession; and, although a few of the earliest are decidedly the most vigorous and life-like, it was not till towards the close of the series that the falling off was steady or remarkable. The dates are, in themselves, enough to prove marvellous activity and fertility, and indomitable steadiness of working. From 'Waverley' in 1815, to the 'Tales of the Crusaders,' in 1825, eighteen novels appeared within eleven years.—This was the last year of Scott's prosperity, or rather the last year during which the world was allowed to believe him prosperous. The extraordinary success of the novels had enabled him to assume, more rapidly than he could have hoped, that place among the landed gentry, which it was his fatal weakness to overvalue so immensely. Purchasing, in 1811, a farm on the banks of the Tweed, naming it Abbotsford, and building a cottage on it, he acquired land around it till he possessed a considerable estate. He erected the baronial castle which we now behold, filled it with antiquarian nick-nacks and ornaments, planted and improved his grounds, and dispensed hospitalities which the most distinguished men in Europe were proud to partake. In 1820 he received a baronetcy; and in the following year he figured as the director of the whimsical pageantry which celebrated the visit of George IV. to Scotland.—Even before this time both firms of Ballantynes were tottering; and they were brought to the ground in the beginning of 1826, by the failure of Constable's house, with which they were deeply involved. The mortifying disclosure of Sir Walter's concealed partnership followed of course; and his liabilities were

found to amount to a sum not much short of £150,000. He acted like a man of courage and a high-minded gentleman. He refused to offer to the creditors any composition, or to accept from them any discharge; he pledged himself to devote the whole labor of his subsequent life to the payment of the debt; he fulfilled the pledge, and died before his time through the toil which it cost him. A great part of the debt was satisfied during his lifetime; and the balance of the principal was paid by his executors. One main aid in effecting the result was the collected edition of his works, with the personal notes which he condescended to furnish to it. But he produced likewise a new series of writings, which, although the later are distressingly indicative of decay, and the best of them are not of a very high order, must be looked on with the respect due to the motive which prompted them.—In 1826 he published his novel of 'Woodstock,' written while his pecuniary anxieties and humiliation were at their height; afterwards appeared the 'Life of Napoleon' (partly written before the bankruptcy), the 'Tales of a Grandfather,' the first and second series of the 'Chronicles of the Canongate,' 'Anne of Geierstein,' a 'History of Scotland' for Lardner's Cyclopædia, two Dramas, and 'Letters on Demonology.' In 1831 the failure of the active intellect was shown unequivocally by 'Count Robert of Paris,' and 'Castle Dangerous.' In 1830 Sir Walter had been attacked by paralysis, which recurred acutely more than once; and, prevailed on at last to pause from labor, he set out, in September, 1831, for the continent, of which, in his better days, he had seen very little. Naples was the farthest point he reached; the mind gave way completely; he was hurried home, and reached Abbotsford in July, 1832. There, after some days of unconsciousness, he died on the 21st of September. He was buried in Dryburgh Abbey.

[W.S.]

SCOTT, WILLIAM. See STOWELL.

SCOTTI, C. G., an Ital. dramatist, 1759–1821.

SCOTTI, J. C., an Italian Jesuit, 1602–1669.

SCOTTI, MARCELLO, a learned Neapolitan, born in 1742; having been nominated against his will a member of the legislature of the short-lived Neapolitan republic of 1799, he fell a victim to the fury of Ruffo and the counter revolutionary party on the triumph of the latter. He had been previously proscribed and persecuted for the too great freedom of his remarks in the 'Monarchia Universale Dei Papi.'

SCOUGAL, H., a Scottish divine, 1650–1678.

SCRIBANI, C., a Flemish Jesuit, one of the twelve apostles commissioned by that body in Flanders, known as a controversial writer, 1561–1629.

SCRIBONIANUS, a Roman commander, proclaimed emperor in Dalmatia, and assassinated 42.

SCRIBONIUS, a Roman physician, 1st cent.

SCRIVERIUS, the Latinized name of PETER SCHRYVUR, a Dutch philologist and historian, 1576–1660.

SCRIMZEOR, H., a Scotch writer, 1506–1571.

SCROGGS, SIR W., an English judge, 1623–83.

SCROPE, WILLIAM, a writer on sporting subjects, 1772–1852.

SCUDDER, H., a presbyterian writer, 17th cent.

SCUDERI, GEORGE DE, a French poet, novelist, and dramatic writer, 1601–1667. His wife was equally celebrated in epistolary composition. His sister, MADELEINE, eminent for her wit and writings as a novelist, 1607–1701.

SCULTETUS. See SCHULTET, SCHULTZ.

SCULTETUS, or SCULTZ, JOHN, a writer on surgery, born at Ulm 1595, died 1645.

SCUPOLI, L., an Italian ascetic, 1530–1610.

SCYLITZES, J., a Greek historian, 11th cent.

[Bishop Seabury's Monument.]

SEABURY, SAMUEL, the first bishop of the Episcopal Church of the United States, was born in Connecticut, 1728. He was ordained in London, 1753. Having been appointed bishop of Connecticut, he proceeded to England for consecration, but finding some difficulty in obtaining his object, he had recourse to the Scotch bishops, by whom he was consecrated in 1784. Died 1796.

SEAMAN, L., an English divine, died 1675.

SEARCH, EDWARD. See TUCKER.

SEBA, ALBERT, a Dutch naturalist and pharmacoplist, Amsterdam, 1665–1736.

SEBASTIAN, king of Portugal, was born in 1554, and ascended the throne at three years of age, on the death of his grandfather, John III. Possessed of a romantic disposition and an extravagant admiration of the glories of chivalry, he rashly determined to carry on war against the Moors in Africa, hoping thereby to effect something for Christianity and the fame of Portugal. He accordingly equipped a fleet and an army, which comprised the flower of the Portuguese nobility, and sailed for Africa in 1578, at the age of 23 years. A general engagement soon took place, and the ardor of the young king bore him into the midst of the enemy, who were already pouring on the rear of his troops. Sebastian fought with the most determined bravery, while most of his attendants were slain by his side. He at length disappeared; and so complete was the slaughter, that no more than 50 Portuguese are said to have survived this wild and ill-fated expedition. The mystery which involved the fate of this royal madman led several adventurers to assume his person and his claims, but there seems to be no doubt that he died on the field of battle.

SEBASTIANI, FRANCIS HORACE DE, a celebrated French marshal, distinguished during the republic, empire, and the monarchy, 1772–1851.

SEBASTIANO, DEL PIOMBO, the name by which SEBASTIANO LUCIANI is commonly known, from his office of the pope's keeper of the leaden seals. He was born at Venice in 1485, and was one of the pupils of Giovanni Bellini. He went to Rome about 1512, by the invitation of Agostino Ghigi, and soon contracted a friendship with Michelangelo, by whom, as an oil painter, he was pitted against Raphael. The large picture of the Raising of Lazarus, in the National Gallery, was painted by Sebastiano, in which he is said to have been assisted by Michelangelo, in rivalry with the Transfiguration of Raphael. They were both painted for Giulio de Medici, the bishop of Narbonne, and were exhibited together in Rome, and are not so unequal as to make the choice a matter of course. Sebastiano found his advocates. Sebastiano was created Frate del Piombo by Clement VII. It is the duty of this officer to fix

the leaden seal to the bulls, &c. A salary is attached to it, and Fra Sebastiano del Piombo was no longer the painter Sebastiano Luciani had been; his ease made him lazy, Michelangelo reproved him for idleness; he was a great portrait painter. He died at Rome in 1547.—(Vasari, *Vite de' Pittori*, &c.)

SEBER, W., a German philologist, 1573–1634.

SECHELLES, J. MOREAU DE, a French statesman and financial administrator, 1690–1760.

SECKENDORF, GUY LOUIS VON, a German statesman, divine, and ecclesiastical historian, 1626–1692. His nephew, FREDERICK HENON, Count Von Seckendorf, a field-marshal and diplomatist in the interest, successively, of Prussia, Poland, and Austria, 1673–1763. LEON, Baron De Seckendorf, a poet, of the same family, 1773–1809.

SECKER, THOMAS, archbishop of Canterbury, an eminent and pious prelate, was born at Sibthorp, in Nottinghamshire, in 1693, and was educated with a view of becoming a dissenting minister. He, however, declared that he could not conscientiously assent to the tenets held by his family, and he therefore conformed to the Church of England, took orders, and obtained preferment. He became, successively, rector of Houghton-le-Spring, prebendary of Durham, king's chaplain, and rector of St. James's, Westminster. In 1735 he was elevated to the see of Bristol; whence he was translated to that of Oxford, in 1737; and, in 1758, he was raised to the archiepiscopal see of Canterbury; in which situation he conducted himself with great dignity, munificence, and proper severity against any laxity in the morals and manners of the clergy under his more especial superintendence. His sermons, charges, and other works, form 12 vols. Died 1768.

SECOUSSE, D. F., a Fr. historian, 1691–1754.

SECUNDUS. See EVERARD.

SEDAINE, M. J., a Fr. dramatist, 1719–1797.

SEDANO, JOHN JOSEPH LOPEZ DE, a learned Spanish writer and numismatist, 1729–1801.

SEDGWICK, three puritan divines:—OBADIAH, preacher of St. Paul's, Covent Garden, &c., member of the Westminster Assembly, 1600–1658. WILLIAM, called the apostle of Ely, dates unknown. DOOMSDAY SEDGWICK, so called from preaching the approaching end of the world, died about 1669.

SEDGWICK, THEODORE, a judge of the Supreme Court of Mass., was born in Connecticut 1746. He served as an officer in the revolution, and he was subsequently a member of Congress and of the Senate. Died 1813. His son, THEODORE SEDGWICK, is favorably known as a writer on miscellaneous, literary, and agricultural subjects. Born in Mass., 1780, died 1839.

SEDILLOT, J. J. EMMANUEL, a French Orientalist and astronomer, 1777–1832.

SEDLEY, SIR CHARLES, a celebrated wit, courtier, and poet, of the age of Charles II., was born at Aylesford, in Kent, in 1639, and was educated at Wadham College, Oxford. He was a conspicuous character among the licentious circle which surrounded the gay monarch; but though himself a profligate, he was so much annoyed by an intrigue which James II. carried on with his daughter, afterwards created by that monarch, countess of Dorchester, that he took an active part in promoting the revolution. Died 1701.

SEDULIUS, CÆLIUS or CÆCILIUS, an Irish or Scotch priest, known as Latin poet, 5th century.

SEED, JEREMIAH, a learned divine, died 1747.

SEEGERS, or SEGHERS, GERARD, a Flemish painter of altar-pieces, 1589–1651. His brother, DANIEL, a flower painter, 1590–1660.

SEELLEN, J. H. DE, a German philologist, 1687–1762.

SEEMILLER, SEBASTIAN, a Bavarian Orientalist, and bibliographical writer, 1752–1798.

SEETZEN, ULRIC JASPAR, a celebrated German traveller, was a native of East Friesland, and received his education in the university at Gottingen, where he particularly studied natural history and philosophy. Seconded by the patronage of the Dukes Ernest and Augustus of Saxe-Gotha, in a desire to visit the interior of Africa, he commenced his perilous undertaking in 1802, at Constantinople, where he stayed six months. The ambassadors there assembled, encouraged his enterprise; and at Smyrna, the Russian prince Oczakow, who had been over Asia Minor and Egypt, assisted him with many useful instructions. Seetzen stopped one year at Aleppo to learn the Arabic language, and to collect MSS. for the library of the Duke of Saxe-Gotha, and reached Damascus in April, 1805. From thence he explored many parts of Syria, Palestine, and Arabia, which had not before been visited by any European; and in order that he might be able to undertake a pilgrimage to Mecca and Medina, he made a profession of Mahometanism. In 1810 he was at Mocha, whence he wrote the last letters that arrived from him in Europe. Having had his property seized by the Arabs, under the pretence of his being a magician, he proceeded towards Saama, to complain to the iman of that place; and, a few days after his departure (December, 1811), he died suddenly at Taes, probably from the effects of poison given him by order of the iman.

SEGAR, SIR WILLIAM, garter-king-at-arms, author of 'Honor, Civil and Military,' died 1633.

SEGAUD, W. DE, a French Jesuit, 1674–1748.

SEGHERS. See SEEGER.

SEGNER, J. A., a Hungarian mathematician and philosopher, 1704–1777.

SEGNERI, PAOLO, an Italian Jesuit, distinguished as a preacher and theologian, 1624–1694. His nephew, PAOLO, a Jesuit and preacher, 1673–1713.

SEGNI, B., an Italian historian, died 1559.

SEGRAIS, J. R. DE, a French poet, 1624–1701.

SEGUIER, J. F., a learned botanist and numismatist, allied to the noble family of that name, whose names occur in the next article, 1703–1784.

SEGUIN, CAMILLE, a French engineer, who first introduced suspension bridges into France. Died 1852, aged 59.

SEGUIER, PETER, French diplomatist, whose talents were opposed to the policy of Pope Julius II., 1504–1580. His son, ANTHONY, a lawyer and ambassador, 1552–1626. PETER, grandson of the first of that name, chancellor of France, and one of the founders of the French Academy, 1588–1672. ANTHONY LOUIS, of the same family, a royalist at the period of the revolution, 1726–1791.

SEGUR, JOSEPH ALEXANDER, Viscount De, second son of the Marshal De Segur, engaged when young in the military service, but having attained the post of mareschal de camp in 1790, he gave up his time entirely to the cultivation of literature, and published several romances, &c. Died 1805.

SEGUR, LOUIS, Count De, a French diplomatist and historical writer, was the eldest son of the Marshal De Segur, and born in 1753. He served during two campaigns in the American war, and was afterwards ambassador to St. Petersburg and Berlin. On the overthrow of the French monarchy he relinquished his connection with affairs of state; he was, notwithstanding, arrested by order of the committee of public safety; but being liberated shortly af-

ter, he quitted France, and did not return till after the fall of Robespierre. In 1803 he was nominated to the council of state; and, under the imperial government, he was appointed to the office of grand-master of the ceremonies at court. In 1813 he was made a senator; and, on the restoration of the Bourbon family, he was created a peer of France; notwithstanding which, after Buonaparte's return from Elba, he resumed his legislative functions, and again became grand-master of the ceremonies, and one of the peers appointed by Napoleon. On the final restoration of Louis XVIII. in 1815, the count was stripped of all his dignities, and passed the remainder of his life in literary retirement. He died in 1830. Among his works are, 'A Political Picture of Europe,' 'The Reign of Frederic William II.' the 'History of Modern Europe,' &c.

SEILER, G. F., a Ger. philosopher, 1733-1807.

SEISSEL, or SEYSSEL, CLAUDE DE, a French historian and political writer, translator of Eusebius, and historian of Louis XII., 1450-1520.

SEJAN, N., a French composer, 1745-1819.

SEJANUS, LUCIUS ÆLIUS, a prætorian general of Rome, a favorite of the Emperor Tiberius, put to death for aiming at the supreme authority 31.

[House of Selden, Salvington, Sussex.]

SELDEN, JOHN, an English antiquary, law writer, and historian, of most extensive acquirements, was a native of Sussex, and born in 1584. After receiving his education at Chichester, and Hart Hall, Oxford, he studied the law in the Temple, and was called to the bar. He practised chiefly as a chamber counsel, and devoted much of his time to studying the history and antiquities of his country. So early as 1607 he drew up a work, entitled 'Analectum Anglo-Britannicum,' which was quickly succeeded by several others; and in 1614 appeared his 'Titles of Honor.' Next followed his 'De Diis Syriis' and 'Mare Clausum,' in which latter he endeavors to historically establish the British right of dominion over the circumjacent seas. He now entered the field of politics, and in 1640 was elected member of parliament for Oxford; at which time he was so well affected to the existing constitution of church and state, that when the king withdrew to York, he had some notion of appointing him chancellor. At the commencement of the disputes between Charles and the parliament he acted with great moderation, and uniformly endeavored to prevent an ultimate appeal to the sword. In 1643, the House of Commons appointed him keeper of the records of the Tower, and, the following year, one of the commissioners of the admiralty, voting him £5000 as a reward for his services. He employed all his influence for the protection of learning, and was universally esteemed for his urbanity of manners and goodness of heart. Died 1654.

SELEUCUS, surnamed *Nicator*, founder of the race of Syrian princes called *Seleucidae*, was one of the generals of Alexander the Great, and, on the death of that prince, was governor of Media and Babylonia. He extended the dominion of his arms and policy as far as the Indus, and in 280 B.C. was acknowledged king of Macedon, Thrace, and Asia Minor. He reigned only a few months, and was assassinated by Ceraunus 279 B.C. SELEUCUS II., surnamed *Callinicus*, succeeded Antiochus II. 247 B.C., and after losing many of his provinces by the invasion of Ptolemy III. 242, was taken prisoner by the Parthians. He died in captivity B.C. 225. SELEUCUS III., surnamed *Ceraunus*, son and successor of the preceding, was assassinated B.C. 222. SELEUCUS IV., surnamed *Philopator*, was son of Antiochus the Great, to whom he succeeded B.C. 186, poisoned by his minister, Heliodorus, 174. SELEUCUS V., was son of Demetrius II., and was proclaimed king with Antiochus Grypus B.C. 125. He was killed by the order of his mother, Cleopatra, 122. SELEUCUS VI., son of Antiochus Grypus, became king over a part of Syria in 97 B.C., and took the remainder from his uncle, Antiochus Cyricus, 94. He was killed the year following in the contest which ensued with the son of the latter.

SELIM, three emperors of the Turks:—SELIM I., son of Bajazet II., born 1467, dethroned his father and killed his two brothers 1512, defeated the shah of Persia 1514, conquered Syria and Egypt 1516-1517, died 1520. SELIM II., succeeded his father, Soliman II., in 1566, took Cyprus from the Venetians 1570, and Tunis from the Spaniards in 1571. In the same year he lost the great naval battle of Lepanto; died 1574. SELIM III., son of Mustapha III., was born 1761, succeeded his uncle, Abdoul Hamid, 1789, sustained a disastrous war against Russia and England, which was terminated by the peace of Jassi in 1792. He was afterwards the ally of England against France at the period of the expedition to Egypt, and signalized his reign at the conclusion of hostilities, by introducing our European civilization into his states. He was dethroned in 1807, and strangled the following year by order of Mustapha IV., who succeeded him.

SELIS, N. J., a French writer, 1737-1802.

SELKIRK, ALEXANDER, upon whose adventure the story of Robinson Crusoe was founded by Daniel Defoe, was a native of Largo, in Fifeshire, where he was born about 1680. He was left on the island of Juan Fernandez in 1704 by a Captain Stradling, to whom he had given some cause of offence. He was rescued by Captain Wood Rogers in 1709, and is said to have related his adventures to Defoe, with a view to their publication.

SELLE, CHRISTIAN THEOPHILUS, born at Stettin, in Pomerania, in 1748, was physician to Frederic the Great, a particular detail of whose last illness he published. In 1790 he went to Paris, where he visited the hospitals and other public establishments; and on his return he published two memoirs on animal magnetism, and others against the critical philosophy of Kant, in the Transactions of the Berlin Academy of Sciences, of which he was a member. He wrote several medical works, and was appointed privy councillor and director of the college of medicine, &c. Died 1800.

SELLER, A., an English divine, 1647-1720.

SELLIUS, ADAM BUCKHARDT, a Russian monk and writer, originally of Denmark, died 1746.

SELLIUS, GODFREY, a native of Dantzic, known as a naturalist and historian, died 1767.

SELLON, BAKER JOHN, a barrister, was born in

1762. He was the son of the Rev. W. Sellon, minister of Clerkenwell church, and educated at St. John's College, Oxford. He was called to the bar in 1792, and afterwards admitted to the rank of serjeant-at-law in 1798. For the last twenty years of his life he sat as a police magistrate, having been compelled by deafness to relinquish his avocations as a pleader. He published an 'Analysis of the Practice of the Court of King's Bench and Common Pleas,' 2 vols. 8vo., which, by the profession generally, is regarded as a standard book. Died 1835.

SELVES, J. B., a Fr. juriconsult, 1757-1823.

SEMERY, A., a French theologian, 1630-1717.

SEMIAMIS, a queen of Assyria, of whom we have little certain historical knowledge. She is generally regarded as the wife of Ninus, and is said to have put him to death. The traditions agree that she reigned forty-two years after Ninus: she was called *Rea* on account of her atrocities.

SEMLER, JOHN SOLOMON, a celebrated Lutheran divine, born at Saalfeld, in Saxony, in 1725, and became professor of theology at Halle, where he remained till his death, in 1791. He was so determined to explain away every thing miraculous in the gospel history, and criticised the Bible with such temerity, that he appeared more like an advocate of infidelity than revelation. His principal work is entitled '*Historiæ Ecclesiasticæ selecta capita*,' 3 vols.

SEMPRONIA, two Roman ladies:—1. The wife of Scipio Æmilianus, a sister of the Gracchi, who is accused of having contributed to the death of her husband. 2. A lady concerned in the conspiracy of Catiline.

SEMPRONIUS, a name of frequent occurrence in Roman history. The principal who have borne it were the GRACCHI (see that article); besides these may be mentioned—SEMPRONIUS ASELLIO, a military tribune of Rome, distinguished in Spain B.C. 137. SEMPRONIUS LONGUS, consul of Rome B.C. 217, distinguished in the field against Hannibal. SEMPRONIUS TUDITANUS, a Roman tribune and commander, who was consul B.C. 203, and defeated Hannibal at Crotona. The others of the name are of less mark.

SENAULT, J. F., a Flemish ecclesiastic, 1599-1672.

SENDIVOG, M., a Polish alchymist, 1566-1646.

SENEBIER, JOHN, a natural philosopher and historian, was born at Geneva, in 1742. He adopted the ecclesiastical profession, but his attention was more particularly directed to philosophy and natural history. He obtained the office of public librarian at Geneva in 1773, became one of the conductors of the Geneva Journal in 1787, and died in 1809. Among his chief works are, 'A Literary History of Geneva' and 'Vegetable Physiology.'

SENECA, LUCIUS ANNAEUS; born at Cordova in the second year of our era; put to death at Rome by order of Nero in the sixty-sixth. A literateur, rhetorician, and philosopher, whose practical life is marked by all the singular contradictions that abound in his writings. At first a stern self-denying Stoic; then the ambitious politician intriguing with ladies at the court. Banished at the instance of Messalina, he writes his famous work on *Consolations*; the next production of his restless pen being a new *Consolation*, addressed to Polybius, a freedman—a mean and miserable flattery intended for the ear of Claudius. Recalled by Agrippina, we find him installed, in company with Burrhus, as preceptor and guardian of Nero; laboring avowedly during a few years, along with his firmer colleague, to

restrain the passions of that disgrace of humanity; boldly defending Burrhus in defiance of Nero,—winking, meanwhile, at his pupil's worst excesses; even prompting to evil, for if we can credit antiquity, Seneca suggested that revolting and most monstrous parricide—all the while preaching the austerities of Stoicism; lastly, rising into the vigor of his best days, and, if with some ostentation, still meeting death as becomes a brave man!—Seneca, is perhaps the type and ideal, alike in action and thinking, of that large class of minds, possessed by a

[Seneca—From an Antique Bust.]

lively and restless fancy, and of remarkable quickness in appreciating, who have yet no steadiness either of heart or intellect, and are totally deficient in that invaluable power—the *Faculty of Belief*. High and low, large and small, in all grades of society and manners of life, we meet with such persons; and although never consistent, they are yet in one sense always sincere—i.e., they are ruled by the plan or opinion which is authoritative for the hour. Having no real Originality—that which cannot be divorced from ability to penetrate towards Truth—Seneca's literary writings are worthless: nor are his moral speculations stamped with the *Tower-mark*. In theory he is a copyist, and a bad one, for he seldom reaches the positive ground of any theory; and although in his practical writings he always displays great acuteness, and expresses himself clearly and pleasantly—qualities much increased by his large acquaintance with the surface of the world,—even the best of his maxims are tarnished by the vice of exaggeration. Generally, the *color* is of Gold, but the *ring* of the true metal is wanting. [J.P.N.]

SENECAI, SENECAI, or SENECE, ANTOINE BAUDERON DE, a French poet, 1643-1737.

SENEFELDER, ALOYS, a native of Munich, inventor of the art of lithography, 1771-1834.

SENKENBERG, H. C., Baron De, a juriconsult, and aulic counsellor of the emperor, 1704-1768. His brother, J. CHRISTIAN, a physician and founder of an hospital at Frankfort, 1707-1772. R. CHAS., son of the first named, a juriconsult and German and Latin poet, died 1799.

SENNACHERIB, king of Assyria, B.C. 712-707.

SENNERT, DANIEL, physician to the elector of Saxony, 1572-1637. His son, ANDREW, an Oriental scholar, 1606-1689.

SEPTIMIUS. See SEVERUS.

SEPULVEDA, JOHN GINEZ DE, born in 1491, was historiographer to the emperor Charles V., and rendered himself ignobly conspicuous as the author of a 'Vindication of the Cruelties of the Spaniards

against the Indians,' in opposition to the benevolent representations of Las Casas. He was also the author of a 'Life of Charles V.,' 4 vols.

SERAIN, P. E., a Fr. agriculturist, 1738-1821.

SERAO, F., an Ital. archæologist, 1702-1793.

SERAPION, a physician of Alexandria, supposed to have written against Hippocrates, 3d century B.C. A second of the name was a Syrian physician, author of two works still existing, 8th or 9th century. A third, called SERAPION JUNIOR, was an Arabian physician and medical writer of the 11th century.

SERARIUS, NICHOLAS, a learned Jesuit, called 'the luminary of the German church,' 1555-1609.

SERASSI, PIER ANTONIO, an Italian biographer, born at Bergamo, in 1721. He wrote the lives of Tasso, Dante, Molza, Politian, Petrarch, and other eminent Italians, which are much esteemed. Died 1791.

SERENUS, A. L., a Roman poet, 1st century.

SERGARDI, L., an Italian satirist, 1660-1726.

SERGEANT, JOHN, an American lawyer of eminence, and statesman, was born in Philadelphia. While a member of Congress he distinguished himself in 1820 by his position on the question of the Missouri Compromise, boldly advocating the northern interests, of which he was considered the leading champion. President Adams appointed him to represent the United States in the Panama Congress. In 1832 he was the whig candidate for vice-president. Gen. Harrison on being elected president offered the embassy to England to Mr. Sergeant, which he declined. Died 1852, aged 73.

SERGEĽ, JOHN TOBIAS, a celebrated Swedish sculptor, was born at Stockholm, in 1740; studied in Italy, and rose to great eminence in his art; was ennobled on his return to Sweden, and died in 1814. His numerous able works are chiefly confined to Sweden, but an admired 'Diomedes stealing the Palladium of Troy' is in England.

SERGIUS, the first of the name, pope of Rome, time of Justinian II., 687-701. The second, in whose pontificate Italy was invaded by the Saracens, and Louis II. was consecrated king of Italy, 844-847. The third, one of Marozia's lovers, and father by her of John X., 904-911. The fourth, said to be the first who changed his name on assuming the tiara, 1009-1012.

SERGIUS, a patriarch of Constantinople, 610-39.

SERIEYS, A., a French compiler, 1755-1819.

SERIMAN, Z., a Venetian writer, 1708-1784.

SERLIO, S., an Italian architect, 1475-1552.

SEROUX D'AGINCOURT, JOHN BAPT. LOUIS GEORGE, a French historian and antiquarian, 1730-1814.

SERPILIUS, G., a Hungarian ecclesiastic, controversial writer and poet, 1668-1723.

SERRA, A., an Italian economist, 16th century.

SERRA, M., an Italian painter, 1658-1728.

SERRANO, T., an Italian Jesuit, 1715-1784.

SERRAO, J. A., an Italian prelate, 1731-1799.

SERRE, HERCULES, Count De, a French statesman attached to the party of Richelieu, 1777-1822.

SERRES, JOHN DE, in Latin *Serranus*, a learned French Calvinist and historiographer, 1540-1598. His brother, OLIVER, an agriculturist, 1539-1619.

SERRES, OLIVE, the self-styled princess of Cumberland, was born at Warwick, in 1772, and educated under the protection of her uncle, the Rev. Dr. Wilmot. At an early age she married Mr. Serres, marine painter to George III.; but after a few years they separated, and she had to support herself and children by her own efforts. She was both an artist and an authoress, and was appointed landscape-

painter to the Prince of Wales; but her literary performances were certainly of no very high order. As this female attracted a large share of the public attention for a number of years; and as there were not a few who, after inspecting the mass of documents she possessed, really believed her to be the legitimate daughter of Henry Frederick, duke of Cumberland, by a marriage with the sister of Dr. Wilmot, we shall here give the outlines of a history, which those who opposed her claims declared was a barefaced imposture. That she had convinced many, there is no doubt, and, perhaps, the striking 'family likeness' observable in her features, contributed not a little to give a plausibility to her statements. In 1815, it appears, she first became acquainted with the secret of her birth; at least it was so alleged in the affidavits produced by her counsel in the prerogative court, in order to obtain the sum of £15,000 bequeathed to her by a will of George III., to which the sign-manual and attesting signatures were attached. It was also alleged that, in the year 1815, the Earl of Warwick, in presence of the Duke of Kent, informed her, at her own house, in Seymour Place, that she was the lawful daughter of the late Duke of Cumberland. He exacted a solemn pledge, both from her and the Duke of Kent, not to disclose this communication until after the death of the king; and ultimately (in presence of the royal duke) deposited with her the proofs she possessed; among which was the sign-manual for the £15,000. The folly, inconsistency, want of principle, and, it may be truly added, insanity of many of her actions, would certainly go far towards defeating her claims, whether just or unjust. In June, 1822, Sir Gerard Noel was induced to move for an investigation of her claims in the House of Commons, and was seconded by Mr. Hume; but Sir Robert Peel saw there was abundant room for a laugh at the expense of the *soi-disant* princess and her supporters; and, in a vein of successful irony, he overturned the whole fabric that had been raised to support 'the Princess Olive's claims.' Her latter years were passed in poverty, within the rules of a prison, in consequence of debts contracted while under her delusion of royalty; having at that time commenced a splendid establishment, assumed the royal livery, &c. She was at length liberated, and went to reside with Miss Macauley, at Somers's Town, a short time previous to her death, which occurred in 1834, at the age of 52.

SERRONI, H., an Ital. theologian, 1517-1587.

SERRY, J. H., a French theologian, 1659-1738.

SERTORIUS, QUINTUS, a partisan of Marius in the civil war between the plebeians and the senatorial oligarchy, headed by Sylla, was born in Italy about 121 B.C. He reaped his earliest laurels in the war against the Cimbri and Teutones, on the Gaulish frontier, and there also became acquainted with the chief of the people. When Sylla triumphed in Italy, Sertorius retired to his prætorial government in Spain; and though he was continually harassed by Metellus, he virtually rendered that country independent under his command, and endeavored to give it the benefits of a paternal government. He was assassinated at a banquet to which he had been invited by the Roman general Perpanna B.C. 72. [E.R.]

SERVETUS, or SERVEDE, MICHAEL, was born at Villa Nuova in Arragon, A.D. 1599. From his birth-place he assumed the cognomen of Villanovanus; and the surname Reves, which he put on the title-page of his books, appears to be a quaint transposition of the first two syllables of Servetus. His father was a lawyer, and wishing his son to study for

his own profession, sent him for that purpose to Toulouse. But literature and theology occupied his attention and engrossed his leisure. On returning to Spain he attached himself to Quintana, confessor to the emperor Charles V., and accompanied him first into Italy and then to Germany. In the year 1550 he took up his residence at Basle, and often conferred with Oecolampadius on matters of theology. His mind now began to evolve its peculiar speculations, all in antagonism to the current beliefs. In 1531 appeared his first work at Hagenau, 'De Trinitatis Erroribus,' in which the notion of a Trinity was not only discussed, but caricatured. The emperor ordered the book to be suppressed, and the year following Servetus published apologetic dialogues, condemning the juvenility of the work, but still maintaining the same doctrines. In 1533 he went to France, studied at Paris, afterwards removed to Orleans, and resided for two years as corrector of the press at Lyons, busying himself with the study of medicine. In 1537 he revisited Paris, and took the degrees of master of arts and doctor of medicine. Leaving Paris, after an accusation by the Sorbonne, he settled ultimately at Vienne, and for a series of years practised medicine. He had been a considerable time composing a book on Theology, and under the title of 'Christianismi Restitutio' it appeared at Vienne in 1553, but without author's name or date. The book produced a great sensation—suspicion, in consequence of some Genevan correspondence with a French refugee called De Trie, fell at length on Servetus, and he was imprisoned by the inquisitors. During the process he contrived to escape and fled at once to Geneva, where he lay in concealment for a month, waiting an opportunity to set out for Naples. After his flight from Vienne he was burned there in effigy, having been previously condemned as an outlaw, and he would have been burned in person, if he had not so opportunely made his escape. As he was about to leave Geneva for Zurich he was discovered, and at the suggestion of Calvin he was at once apprehended, on the 13th August, 1553. The accuser of the Spaniard was Nicholas de la Fontaine, a Frenchman, but Calvin himself framed the eight-and-thirty articles of charge, as we learn from one of his own letters. At the first hearing of the case Servetus made explanations, and at the second hearing Calvin himself attended. In the mean time the council of Geneva wrote to Vienne, with information that Servetus was in custody, and resolved as the trial went on to send communications to several of the cantons. The council of Vienne demanded back the prisoner, but with tears in his eyes he entreated the Genevan syndics to retain him, and sist him before their own tribunal. The Genevan magistrates stood upon prerogative, or the burning of Servetus would have happened at popish Vienne, and the protestant syndics were proud to rival a catholic city in severity of penalty. His prosecution was now given to the attorney-general, and the charge of sedition was specially pressed against the accused; for politics superseded theology in the discussion. Servetus replied at some length, and in his subsequent petition one of his principal endeavors is to clear himself from the charge of being a disturber of society. Calvin and he were confronted—they had maintained a correspondence some months previous, and Servetus actually craved an indictment to be preferred against the reformer. Calvin, in the mean time, had quarrelled with the council in a case of discipline; the Libertine or anti-Calvinist party were growing in power, and Servetus hoped apparently to turn the tables on his principal antagonist. The opinion of the churches in Switzer-

land had now been asked, and they unanimously condemned Servetus, though they differed as to the amount of punishment which should be inflicted on him. Toward the end of the protracted investigation the influence of Calvin was little felt, and on the 26th of October, the unhappy Servetus was doomed to the stake the following day. Calvin interfered for a more lenient form of punishment, but his request was not granted. Servetus was greatly affected when he heard his sentence, though he gradually resumed his composure. Farell attended him, but seems to have made no impression upon his mind. The next day the sentence was carried into effect in all its cruel barbarity. The sufferer, during the half-hour of his consciousness amidst the flames, cried repeatedly—'Jesus, thou Son of the Eternal God, have mercy on me.'—This execution of Servetus has acquired an adventitious eminence from its circumstances. Had he been burned at Vienne, the deed would have been known only as one of thousands inflicted by papal mandate. But the scene of the martyrdom in the protestant republic of Geneva, and the theological notoriety of Calvin, have given it an extraordinary and a polemical celebrity. Much has been said and written about it: it has barbed many a declaration; and the harsh and vindictive spirit of Calvin has been often reprobated. But the fact is, that only in the year 1842, were the original records of the trial discovered and employed in the account. M. De La Valayre in 1842 made good use of those documents, and so did Rilliet in 1844, in his 'Relation du Procès Criminal Intenté à Genève en 1553 Contre Michel Servet,' &c. The result throws a better and more faithful light on the whole transaction. It is proved that while Calvin approved of the punishment of death according to a theory then commonly entertained, yet that he had little or no direct influence with the council during the latter portion of the trial. (See CALVIN.) The union between religion and politics in the government of Geneva, led its rulers to believe themselves invested with the power of punishing heresy as a sin against God and a crime against the state. Nay, at the very same period Berthelier, a citizen, had been excluded from the church by Calvin, but the council declared him capable of receiving the communion. In 1547 Gruet, a leader of the Libertine party, had been beheaded for sedition, though religious opinion formed a special charge against him. In the document which contains the sentence against Servetus, assaults on Calvin and the Geneva ministers are not mentioned at all. Servetus himself held the same theoretic views, and in his indictment against Calvin he puts the alternative—'Till the cause be decided for his death or mine.' So that had he obtained supremacy in Geneva, he would not have scrupled to burn Calvin. What a miserable misconception of human right and Divine enactment! And it was certainly a sad and inconsistent thing for reformers to deny to others the toleration which they had claimed and gained for themselves. The career of Servetus was peculiar. Born in the land of the *Auto-da-Fé*, he was sent out of it to study, his father being afraid that his son's free speculations and pugnacious propensity would place him within the grasp of the inquisition; and yet he perished neither in Spain nor France. Coleridge has said, that 'if any poor fanatic ever thrust himself into the flames, that man was Servetus.' We cannot use these words in all their latitude; yet, certainly Servetus, with all his acknowledged talents and gifts, was ambitious and arrogant, was, in short, what Mosheim calls a 'semifanatic.' But surely such a character did not merit so awful a penalty, and we may read in the

flames of Servetus that man is responsible to God alone for his belief, that truth does not suffer by toleration, for fire is not able to extirpate what argument cannot overthrow. A passage is found in the 'Restitutio' of Servetus, which has been understood by some as anticipating by seventy years, Harvey's famous discovery of the circulation of the blood. While we admit the boldness and eloquence of Servetus, his rare acquirements and restless industry, we are compelled to add that the equivocations made by him on his trial, both at Vienne and Geneva, do not place his moral character in the same favorable light. [J.E.]

SERVIEZ, JACQUES ROERGAS DE, a French historian, 1679-1727. His grandson, EMMANUEL GERVAISE, a soldier and writer, 1755-1804.

SERVIN, LOUIS, a French juriconsult, who died suddenly when in the act of remonstrating with Louis XIII. against his tyrannical acts, 1626.

SERVIUS, MAURUS HONORATUS, a Roman grammarian and commentator upon Virgil, 5th century.

SERVIUS, SULPITIUS RUFUS, a Roman jurist and statesman, died in Antony's camp, B.C. 43.

SERVIUS TULLIUS, the sixth king of Rome, succeeded his father-in-law, Tarquin the Elder, B.C. 578. Murdered at the instigation of Tullia and her husband, B.C. 534. See TARQUIN.

SESSA, an Indian mathematician, the reputed inventor of the game of chess, 11th century.

SESTINI, D., an Italian antiquarian, 1750-1832.

SESTO, CÆSAR DA, called the Milanese, an Italian painter of the 16th century.

SETTALA, LODOVICO, in Latin *Septalius*, an eminent Milanese physician, 1552-1633. His son, MANFRED, an able mathematician, 1660-1680.

SETTLE, ELKANAH, an English poet, was born at Dunstable, 1618; educated at Trinity College, Oxford; was much engaged in the political squabbles of the age, and wrote some smart pieces both in prose and verse. He was also an indefatigable writer for the stage, but none of his dramas are now acted. Died 1724.

SEUME, J. T., a German writer, 1763-1810.

SEVERINUS, a pope of Rome, 640.

SEVERUS, three Roman emperors:—1. LUCIUS SEPTIMIUS SEVERUS, the most important, was born on the African coast 146, and having commanded the legions of Illyria, was proclaimed on the death of Pertinax 193. He made many conquests in the East, and in 208 went to Britain, where he built a wall between the Forth and the Clyde, as a check against the Picts. He died at York in 211. 2. FLAVIUS VALERIUS SEVERUS, killed by Maxentius, after a short indulgence in power, 307. 3. VIBIUS SEVERUS, proclaimed by the legions of Illyria, 461, died 465. 4. See ALEXANDER.

SEVERUS, founder of a Christian sect, 2d century.

SEVERUS, A., a Greek rhetorician, 5th century.

SEVERUS, CORNELIUS, a Roman poet, who lived in the reign of Augustus. He was the author of 'Ætna,' a poem, which has been attributed to Virgil.

SEVERUS, S., a Christian poet, 4th century.

SEVIGNE, MARIE DE RABUTIN CHANTAL, Marchioness De, celebrated for her fine understanding and epistolary talents, was born at the chateau de Bourdilly, in Burgundy, 1627. After the death of the marquis de Sevigne, she lived in widowhood twenty-five years, devoted to the education of her children. Her famous letters were addressed to her daughter, Madame de Grignan. Died 1696.

SEVIN, F., a French philologist, 1682-1741.

SEWALL, JONATHAN MITCHELL, an American poet, 1749-1808.

SEWALL, STEPHEN, an American scholar, and author of a Hebrew grammar, a Chaldee and English dictionary, and various learned works, was born in Maine, 1734, appointed professor of Hebrew in Harvard University, 1762, and died 1804.

SEWALL, SAMUEL, chief justice of Mass. in 1718. He was a warm advocate of the negro slave, and wrote 'The selling of Joseph' in vindication of his rights. He was the author of various religious works. Died 1730.

SEWALL, THOMAS, an American physician and medical writer, author of an essay on phrenology and a tract on temperance. Died at Washington, where he resided, 1845, aged 58.

SEWARD, ANNA, a once popular writer, known as the friend and biographer of Dr. Darwin, was the daughter of the Rev. T. Seward, rector of Eyam, in Derbyshire, where she was born 1747. Her publications were the poetical romance of Louisa, 1782; a Collection of Sonnets, 1799; and the Life of Darwin in 1804. She died in 1809, since which her Literary Remains and Correspondence have appeared.

SEWARD, WILLIAM, a biographical writer, was born in London, 1747. He was educated at the Charter House, and at Oxford; was intimate with Dr. Johnson, and other eminent literary characters; and was the author of 'Anecdotes of distinguished Persons,' 'Biographiana,' &c. He died in 1799.

SEWELL, GEORGE, a poet and miscellaneous writer, was born at Windsor, and after completing his education at Peterhouse, Cambridge, studied medicine in Holland under the celebrated Boerhaave, and settled at Hampstead as a physician. His chief literary productions are, 'Sir Walter Raleigh,' a tragedy; 'A Vindication of the English Stage;' translations of parts of Lucan, Ovid, and Tibullus; and 'Epistles to Mr. Addison.' Died 1726.

SEWELL, WILLIAM, the son of an English refugee at Amsterdam, who, though brought up as a weaver, made himself master of several languages, and compiled an 'English and Dutch Dictionary;' but he is best known by his 'History of the Quakers,' of which sect he was himself a member. Died 1725.

SEWELL, W., an English veterinary writer, died 1853, age 72.

SEXTIUS, a Pythagorean philosopher, 1st cent.

SEXTIUS-EMPIRICUS, a Greek philosopher and physician, time of Commodus.

SEYBERT, ADAM, an American physician, and author of Statistical Annals of United States from 1789 to 1818, died 1825.

SEYBOLD, D. C., a German philologist, 1747-1804.

SEYDLITZ, FREDERIC WILLIAM, Baron Von, a companion-in-arms of Frederic the Great, distinguished in the seven years' war, 1722-1773.

SEYMOUR, ARABELLA. See ARABELLA.

SEYMOUR, EDWARD, duke of Somerset, and uncle to Edward VI., was brother to Queen Jane Seymour, and on his sister's marriage to Henry VIII. in 1536, was created Viscount Beauchamp. He distinguished himself in the Scottish and French wars, and in the struggle for power after the death of Henry, became governor of the young king and protector of the realm. In 1548 he was created duke of Somerset, and took the functions of lord-treasurer and earl-marshal; in the same year he headed the troops in Scotland, and won the battle of Musselburgh. His power was at last broken by the intrigues of the earl of Warwick, afterwards

[Edward Seymour, duke of Somerset.]

duke of Northumberland, and he was beheaded on Tower Hill, 22d January, 1552.

SEYMOUR, HEZEKIAH C., engineer in chief of the State of New York, and chief engineer of the New York and Erie Railroad, died 1853, aged 42.

SEYSSEL. See SEISSEL.

SFORZA, a noble Italian family founded by GIACOMO ATTENDOLO, a peasant of the Romagna, who was born at Cottignola in 1369, and enlisting in a company of soldiers that passed through the village, rose gradually to the rank of general. He was called *Sforza* on account of his great vigor. He was drowned in effecting the passage of the river Pescara, in the service of Joan of Naples, 1424. FRANCESCO ALESSANDRO, duke of Milan, was a natural son of the preceding. He was born in 1401, and rose to distinction in the service of Joan, afterwards as general of the Milanese troops; he was created duke by the leaders of a revolt in 1450, died 1466. The descendants of the latter possessed the duchy through several generations. The principal of them was MAXIMILIAN, who figured in the events that followed the league of Cambrai, and died at Paris, in the reign of Francis I., 1530. See VISCONTI.

SFORZA, BONA, daughter of J. G. Sforza, one of the preceding dukes, and of Isabella of Arragon, became queen of Poland by her marriage with Sigismund I. in 1518; she died 1557.

SHADWELL, the Right Hon. Sir LANCELOT, vice-chancellor of England, was born 1779; educated at Eton and Cambridge, where he took his degree of B. A. in 1800, as seventh wrangler, obtaining also the second chancellor's medal. He was called to the bar by the honorable society of Lincoln's Inn in 1803, was appointed a king's counsel in 1821, sat for Ripon as M. P. in 1826, and was elevated to the vice-chancellorship of England in 1827. His honor also twice filled the office of a commissioner of the great seal; first in 1835, after Lord Brougham's, and in 1850, after Lord Cottenham's, resignation of the chancellorship. As a judge, Sir Lancelot gave great satisfaction. He disposed with great rapidity of the mere routine business of his court, and he was no less remarkable for his affability and courtesy, than for the humorous and classical wit with which he seasoned his dicta. Died Aug. 10. 1850.

SHAFTESBURY. The first earl of Shaftesbury was the brilliant but inconsistent statesman of Charles II.'s reign. His son, the second earl, was the father of ANTHONY ASHLEY COOPER, the third earl, the subject of this notice. He was born in London in 1671, and educated under the superintendence of his grandfather. He travelled for some years on the continent, and in 1693 entered the House of Commons, where he acted energetically with the Whig party. His health already threatening to fail, he went abroad in 1698, and studied in Holland under the advice of Bayle and Le Clerc. Next year his father's death called him to the House of Lords; but, early in the reign of Anne, his premature infirmities forced him to retire altogether from public life. Thenceforth he busied himself exclusively with philosophy and literature, till he died at Naples in 1713.—In 1711 he had collected his writings into a series, which he entitled 'Characteristics of Men, Manners, Opinions, and Times.' The most important pieces in the collection are, the 'Inquiry concerning Virtue or Merit,' first published in 1699; and the platonic dialogue, called 'The Moralists, a Philosophical Rhapsody,' whose first appearance was in 1709. Both as a philosopher and as a writer, Shaftesbury has encountered extremes, equally undeserved, of admiration and of censure. His style is elaborate, artificial, affected, and studded all over with foreign and pedantic terms of his own invention; and he very seldom puts off his offensive air of foppish condescension. But there is hardly a page of his volumes in which we are not struck by the elements of fine writing; and some passages of his, with their lofty thoughtful eloquence, and their exquisite music of rhythm, are among the most beautiful things in the English language. The moral elevation and purity of the sentiments are always worthy of the amiable and irreproachable character of the author. The great defect in Shaftesbury's philosophical thinking is its indistinctness; he merely throws out hints, in a manner not unlike his master and model Plato, and often gives reason for believing that he himself had apprehended very obscurely the ideas he strives to express. Inconsistency, real or apparent, is a natural accompaniment of this mistiness of thought; and the vacillating uncertainty of opinion betrays itself most of all when questions of religion are directly handled. His mind had received a wrong bias through the scorn he felt for the Toryism and Jacobitism then rampant in the Church of England; and the tendency was augmented by his observation of the popularity possessed, among the clergy as elsewhere, by the philosophy of Locke, which Shaftesbury believed to contain the germ of evil religious consequences. Although, likewise, no thinkers could be more unlike than the cold and sceptical Bayle and the enthusiastic and aspiring Shaftesbury, the intercourse of the two did not improbably affect in some degree the opinions of the young Englishman. Accordingly, Shaftesbury gives vent, especially in 'The Moralists,' to expressions and assertions, which fully justified Leland in uttering a warning against him in his 'View of Deistical Writers;' while elsewhere he contradicts such passages directly, or neutralizes them by fine trains of devout meditation. In the philosophical system (if such it can be called) of the author of the 'Characteristics,' there are two or three peculiarities calling for hasty commendation. First, in Metaphysics he strenuously vindicated the possibility of *a priori* notions against the sensualistic philosophy of Locke; and his views on this great question, while they called forth the

warm admiration of Leibnitz, and accorded with the opinions of that great thinker, were likewise a foretaste of the creed taught afterwards in fragments by Reid and systematized (not in all points safely) by Kant and his disciples. In the second place, Shaftesbury's Ethical doctrines placed him, at two points, in opposition to systems then prevalent in England. He combated eagerly and convincingly the Selfish theory of Hobbes: he directed thinkers into a psychological track that had recently been neglected, when, refusing to confine himself exclusively (like Cudworth and Clarke) to the region of Reason or Intellect, he indicated Feeling as an essential element in all Facts of Conscience or operations of the Moral Sense or Faculty. [W.S.]

SHAH-ABBAS. See ABBAS.

[Shakspeare.]

SHAKSPERE, WILLIAM, 'born at Stratford-upon-Avon, married and had children there; went to London, where he commenced actor, and wrote poems and plays; returned to Stratford, made his will, and died.' 'This,' says Steevens, 'is all that is known, with any degree of certainty, about Shakspeare.' We should have cared very little about the birth and marriage, the will, or the death, of this native of a petty country-town in the sixteenth century, but for the one other certainty, 'he wrote poems and plays.' That fact renders the minutest incident in the life of this son of a Warwickshire yeoman a matter of interest to the whole human race; for out of the cottage in which he was born, has gone forth a voice which is the mightiest in modern literature; which has had no small influence in forming our national character; and which, in connection with the higher teaching from above, is refining and humanizing wherever its sound is heard. Steevens was in a great degree right, as far as regards a mere biographical notice of Shakspeare. His real biography lies in a critical estimate of his writings, as compared with others of his time, and in his relation to the age in which he flourished. The documentary biography, beyond that furnished by the facts that tell us the dates of his several works, lies in a very narrow compass. William Shakspeare was born in 1564. His baptism was registered in the parish church of Stratford, on the 26th of April, in that year. It was usual to baptize within three days of birth, and, therefore, his birth-day is held to be the 23d of April, the St. George's day of England. The probability, though not the certainty, is that he was born in the town of Stratford. The old house there, in which he is said to have been

born, was unquestionably the property of his father, John Shakspeare. His father was married and living in Stratford in 1558. His mother was Mary Arden, of the ancient family of the Ardens. The course of John Shakspeare may be traced by the parochial and municipal records, from the office of Jurymen of the court leet in 1556, to that of bailiff, or chief magistrate, in 1568. He has been held to have been a butcher, or a wool-stapler, or a glover. In an age when there was little subdivision of occupations, the yeoman cultivating his land, might have sold the carcasses of his sheep, dressed their wool, and prepared their peltries. The occupier of grazing land had no large separate markets for such commodities. There was a free grammar school at Stratford. We have no record that William Shakspeare went to that school; but why should we doubt that he was educated there; it was the natural place of his education. Some persons have endeavored to show that there is no tincture of grammar school studies in his writings; that he was essentially unlearned. Such a belief is now wholly abandoned, except by those pedants, if there be any left, who think that there can be no learning without a constant parade of it. It has been stated by Rowe, that John Shakspeare had 'a large family, ten children in all.' There were other Shaksperes in Stratford. The registers distinctly show that the father of the poet had five children who survived the period of infancy. We have no trace how William Shakspeare was employed in the interval between his school-days and manhood. Some hold that he was an attorney's clerk. The tradition is that he was a wild young fellow, stealing deer. The certainty is that he was treasuring up that store of knowledge, and cultivating that range of genius, which made him what he became.—At Shottery, a pretty village within a mile of Stratford, is an old farm-house, now divided into several tenements, where dwelt a family of the name of Hathaway, and this property remained in the possession of their descendants. Anne Hathaway became the wife of William Shakspeare in 1582. The marriage-bond and license are preserved in the Consistorial Court, at Worcester. By this marriage there were three children, Susanna, Hammet, and Judeth. Hammet, the only son, died in 1596. The two daughters survived their father, and inherited his property. Soon after his marriage William Shakspeare became connected with the Blackfriars Theatre, in London. In 1589, when he was only [R.J.]

[Birth-place of Shakspeare.]

twenty-five years of age, he was a joint proprietor of that theatre, with four others below him in the list. The players of the Blackfriars' were the Lord Chamberlain's company, those who acted under royal patronage. We know nothing of the date of

the production of his first play. We can absolutely assign very few dates to any of his plays, except by the following table, which has been given by Mr. Knight, of the positive facts which determine dates *previous* to which they had been produced:—

Henry VI., Part I.....	Alluded to by Nashe in 'Pierce Pennilesse,'	1592
Henry VI., Part II.....	Printed as 'The First Part of the Contention,'	1594
Henry VI., Part III.....	Printed as 'The True Tragedy of Richard Duke of York.'	1595
Richard II.....	Printed.....	1597
Richard III.....	Printed.....	1597
Romeo and Juliet.....	Printed.....	1597
Love's Labors Lost.....	Printed.....	1598
Henry IV., Part I.....	Printed.....	1598
Henry IV., Part II.....	Printed.....	1600
Henry V.....	Printed.....	1600
Merchant of Venice.....	Printed, 1600. Mentioned by Meres....	1598
Midsummer Night's Dream.....	Printed, 1600. Mentioned by Meres....	1598
Much Ado about Nothing.....	Printed.....	1600
As You Like It.....	Entered at Stationers' Hall.....	1600
All's Well that Ends Well.....	Held to be mentioned by Meres as 'Love's Labors Won.'.....	1598
Two Gentlemen of Verona.....	Mentioned by Meres....	1598
Comedy of Errors.....	Mentioned by Meres....	1598
King John.....	Mentioned by Meres....	1598
Titus Andronicus.....	Printed.....	1600
Merry Wives of Windsor.....	Printed.....	1602
Hamlet.....	Printed.....	1603
Twelfth Night.....	Acted in the Middle Temple Hall.....	1602
Othello.....	Acted at Harefield....	1602
Measure for Measure.....	Acted at Whitehall....	1604
Lear.....	Printed 1608. Acted at Whitehall.....	1607
Taming of the Shrew.....	Supposed to have been acted at Henslow's Theatre, 1598. Entered at Stationers' Hall.....	1607
Troilus and Cressida.....	Printed 1609. Previously acted at Court	1609
Pericles.....	Printed.....	1609
The Tempest.....	Acted at Whitehall....	1611
The Winter Tale.....	Acted at Whitehall....	1611
Henry VIII.....	Acted as a new play when the Globe was burned.....	1613

Of the thirty-seven plays of Shakspeare, the existence of thirty-one is thus defined by contemporary records. The six which are not so defined, are Cymbeline, Macbeth, Timon, and the three Roman plays. There are not many instances of the mention of Shakspeare, during his lifetime, by writers of his period; but one writer, Francis Meres, notices many of his more important plays, in 1598. His poems carry their own dates, 'Venus and Adonis' was published in 1593; 'Lucrece' in 1594; the 'Sonnets' in 1609. Meres had mentioned, in 1598, Shakspeare's 'sugered sonnets amongst his private friends.' Shakspeare became rich in connection with the theatres. He purchased the principal house in Stratford in 1597, and parcels of land in that parish. He became the tithe-owner also by purchase. It is supposed that he ceased to be connected with the theatres in 1609, for there is a valuation of his property in that year, for which he asked £1,433 6s. 8d. His father died in 1601; and it is more than probable that the greatest of poets succeeded him as a practical farmer in his native place. He had his actions in the bailiff's court for corn sold and delivered. He was looked up to by his neighbors, as there is evidence in letters. His eldest daughter, in 1607, married Dr. Hall, an eminent physician residing in Stratford. Judeth married Thomas Quiney, a tradesman of substance, in February, 1616. The register of Stratford has another register two months after-

wards. On the 25th April, William Shakspeare was buried in the parish church. Anne, the wife, survived till 1623. She was amply provided for by the laws of her country; for the greater part of Shakspeare's property was freehold, and the widow was entitled, for her life, to the dower of one-third. The bequest to her of the second-best bed was one of affection, and not of neglect. The best bed was always an heir-loom. The eldest daughter, Susanna, died in 1649. Judeth died in 1662. Neither left any heir-male. The one grand-daughter of Shakspeare, Elizabeth Hall, inherited the bulk of his property. By her second marriage she became the wife of Sir John Barnard. In half a century the family estates were all scattered, and went to other races; with the exception of two houses in Henley-street, which Lady Barnard devised to her kinsman, Thomas Hart, the grandson of Shakspeare's sister, Joan. These houses were purchased by the British nation, in 1847, of the descendants of the Harts. [C.K.]

SHAMMAL, a Jewish rabbi, president of the Sanhedrim, at first a disciple of Hillel, but afterwards dissented from his master, and set up a new college; 1st century B.C.

SHALER, WM., American consul at Havana and consul-general at Algiers, where he wrote his 'Sketches of Algiers.' Died 1833.

SHANFARAH, an Arabian poet, 6th century.

SHARP, ABRAHAM, an astronomer and mechanician, who became assistant to Flamsteed at the Royal Observatory, 1651-1742.

SHARP, GRANVILLE, was born in 1734 at Durham, and was apprenticed in trade, but, having a strong turn for literature, he abandoned the uncongenial pursuit of business. His friends having procured him a situation in the Ordnance Office, he continued for some time discharging the duties of that department until the declaration of war against America, and entertaining strong conscientious objections to the policy and justice of that measure, he resigned his place. Being possessed of some means, he now resolved to dedicate his life to study and to the duties of active benevolence. He instituted the society for the abolition of the slave trade, and distinguished himself by his zeal in devising measures for the extensive distribution of the Bible. He was the author of various literary works. Besides several pamphlets on slavery, he published Tracts on the Hebrew language, and Remarks on the Definite Article in the Greek New Testament. Mr. Sharp died on 6th July, 1813. [R. J.]

SHARP, JAMES, archbishop of St. Andrew's, a distinguished prelate of the 17th century, was born in Banffshire, in 1618, and obtained a professorship in the university of St. Andrew's. The presbytery being overturned by parliament, under Charles II., Sharp, who had treacherously promoted that measure, was rewarded with the primacy, and appointed archbishop of St. Andrew's. The wanton cruelties which followed confirmed the horror entertained against him, and raised the fury of some of his more bigoted opponents to conspire against his life. His carriage, in which he was travelling, about three miles from St. Andrew's, on the 3d of May, 1679, was met by some fanatics, headed by John Balfour of Burley, who were waiting there to intercept a servant of the archbishop's, named Carmichael. To tempers thus heated by fanaticism, the appearance of the archbishop himself was deemed a sign of the intention of Providence to substitute a more important victim; and, regardless of the tears and entreaties of his daughter, they dragged him from his carriage, and with savage ferocity murdered him before her face.

SHARP, JOHN, a learned prelate and theological writer, was born at Bradford, in Yorkshire, in 1644; studied at Christ's College, Cambridge; and rose, by gradual preferments, to the deanery of Norwich. In the reign of James II. he gave such offence to the court by preaching against popery, that an order was sent to the bishop of London to suspend him; but the bishop having refused on the ground of its being contrary to law, he, as well as Dr. Sharp, were suspended by the ecclesiastical commission. The doctor, however, was soon restored to the exercise of his function; and, after the revolution, he was made dean of Canterbury; from whence, in 1661, he was elevated to the archbishopric of York. Died 1713. His 'Sermons,' published after his death, form seven vols.

SHARP, THOMAS, a younger son of the preceding, was born about 1693; received his education at Trinity College, Cambridge, of which he became a fellow and D.D. in 1729; obtained various preferments in the church; finally became archdeacon of Northumberland and a prebendary of Durham; and died in 1758. He wrote 'Discourses on the Hebrew Tongue,' &c.

SHARP, RICHARD, a gentleman well known in the literary world as 'Conversation Sharp,' and whose taste and judgment as a critic were equal to his conversational powers, died, aged 76, while on the road from Torquay to his residence in London, March 30, 1835. Mr. Sharp was deeply engaged in commercial concerns, but employed his leisure hours in literary pursuits; and had he more devoted himself to study and composition, he might have taken a high station among the best writers of the day. He was the author of 'Letters and Essays in Prose and Verse.' He had formerly been an M.P. adhering to the Whig interest; and few men displayed more anxiety than he did for the extension of civil and religious liberty, and the moral improvement of the community. He left £250,000, which was divided between his nephews and nieces.

SHARP, S., a writer on surgery, died 1778.

SHARP, WILLIAM, an eminent engraver, was born in London, January 29, 1749. His father, who was a gunmaker, early apprenticed him to a bright engraver, and he commenced his career by engraving such works as door plates, &c., his first effort being on a pewter pot; but in 1782 he completely resigned this business, and commenced as a line engraver, executing plates after Stothard and others, for the booksellers, but he soon acquired a great reputation, and engraved many considerable works from the old and modern masters, and such is the delicacy and precision of his lines, that some of his plates are considered, both in this country and abroad, the finest specimens of line engraving extant; as for instance, the portrait of John Hunter, after Sir Joshua Reynolds, or his 'Lear,' after West. Sharp died at Chiswick of dropsy in the chest, July 25, 1824. He was a member of the academies of Munich and Vienna, but had declined the honor of 'Associate Engraver' in the Royal Academy of his own country, considering the exclusion of engravers from the full honors of the academy, an affront to the profession. This exclusion is now (1853) suspended. Sharp is reputed latterly to have resigned his mind to the reveries of Richard Brothers, Joanna Southcote, and Emanuel Swedenborg. That he may at one time have had faith in all these is possible, but not simultaneously. To confound the sublime morals and doctrines of Swedenborg with the reveries of Brothers, or the delusion of Joanna Southcote, is not less ridiculous than to assume that

an orthodox Mahometan could at the same time be a good Christian. [R.N.W.]

SHARPE, GREGORY, an eminent Oriental scholar and able divine, was born in Yorkshire, in 1713, was educated at Westminster and Aberdeen, and eventually became master of the Temple. Among his writings are, 'A Review of the Controversy on the Demoniacs,' 'Defence of Dr. Clarke against the attacks of Leibnitz,' 'Dissertations on the Origin of Languages, and the Powers of Letters with a Hebrew Lexicon,' 'Dissertations on the Latin and Greek Tongues,' 'Three Discourses in Defence of Christianity,' an 'Introduction to Universal History,' and 'The Rise and Fall of the City and Temple of Jerusalem.' Died 1771.

SHARROCK, ROBERT, a dignitary of the Church of England, and a writer on morality, 17th century.

SHAW, CUTHBERT, a poet of very humble origin, born at Richmond, in Yorkshire, in 1739. He was usher at a school in Darlington, and while there he published a poem, entitled 'Liberty.' He afterwards joined a company of comedians, under the name of Seymour; but he relinquished the stage about 1762, and became a professional writer. In 1766 he published the 'Race,' a satire against most of the living poets; and, on the death of his wife, he produced a pathetic 'Monody,' esteemed his best performance. He lived a life of intemperance and debauchery, and he died in wretchedness and poverty, in 1786.

SHAW, GEORGE, a distinguished writer on zoology, &c., was born in 1751, at Birtton, in Buckinghamshire; was educated at Magdalen College, Oxford; studied medicine at Edinburgh, and graduated as M.D. at Oxford. He then settled as a physician in London, was elected F.R.S., and appointed a vice-president of the Linnæan Society; delivered lectures on zoology at the Leverian Museum and at the Royal Institution; and was made librarian and assistant keeper of natural history at the British Museum. He was the author of several works on 'Zoology,' conducted the 'Naturalist's Miscellany,' and was one of the editors of the abridged Philosophical Transactions. Died 1813.

SHAW, SIR JAMES, bart., was born at Riccarton, in the county of Ayr, in the year 1764; became a junior clerk in a mercantile house of the city of London; and, by constant diligence and great ability, gradually rose to a partnership in the firm. In 1798 his character was so high alike for probity and industry that he was elected alderman for his ward of Portsoken; in 1803 he served the office of sheriff, and in 1805 that of lord-mayor; and, on the very day previous to his vacating the civic chair, he was elected M.P. for the city of London, which honorable position he retained till 1818, when he retired, having been created a baronet in 1809. In 1831 he was elected chamberlain of London, when he resigned his aldermanic gown. On occasion of the memorable forgery of exchequer bills, Sir James was supposed to have been unfortunate enough to have received £40,000 of them in his capacity of banker to the city. But the bills happily proved to be genuine, and Sir James received the full amount, with interest to the day of payment. Simple in his habits, singularly industrious and persevering, Sir James was also extremely charitable. Died Oct. 22, 1843, aged 80.

SHAW, JOHN, an English divine, died 1689.

SHAW, PETER, a medical writer, 1695-1763.

SHAW, SAMUEL, a divine and schoolmaster, author of miscellaneous works, 1635-1696.

SHAW, STEBBING, a divine and topographer, was born in 1762, at Stone, in Staffordshire, and was

educated at Queen's College, Oxford, where he obtained a fellowship. He became tutor to Sir Francis Burdett, with whom he made a tour to the Highlands, and published an account of the journey. He also wrote a 'Tour in the West of England,' 'A History of Staffordshire,' and 'The Topographer,' published in periodic numbers. He died rector of Hartshorne, in Staffordshire, in 1802.

SHAW, THOMAS, a native of Kendal, who became chaplain to the English factory at Algiers, and wrote an account of his travels, 1692-1751.

SHAYS, DANIEL, the instigator of the Shays rebellion in Massachusetts, in 1787. Died 1825.

SHEA, DAVID, one of the professors of Oriental languages at Haileybury College, was born at Dublin, in 1772, and educated at its university. Having held a situation as chief clerk to a large mercantile establishment in Malta, which had extensive connections in the East, he studied the Arabic and Persian tongues; and his Oriental acquirements becoming known, a situation at Haileybury was provided for him. He translated 'Mirkhoud's History of the early Kings of Persia,' and at the time of his death was engaged in the translation of the Dabistan. This work he had completed, and it was presented to the Asiatic Society after his death. Died 1836.

SHEBBEARE, JOHN, a physician and political writer, was born at Bideford, in Devonshire, in 1709, where he was apprenticed to an apothecary. Having made a visit to Paris, he there obtained the degree of M.D., and was admitted into the academy of sciences. He settled in London, and commenced his career as a party writer; for his violence in which character he was once pilloried and twice imprisoned. Afterwards, under the administration of Lord Bute, he apostatised from the popular cause, and obtained a pension. His chief works are, 'Letters to the People of England,' 'The Marriage Act,' a satirical romance; 'Lydia, or Filial Piety,' 'Letters on the English Nation,' and the 'History of the Sumatrans,' a political satire. Died 1788.

SHEE, SIR MARTIN ARCHER, at once president and senior member of the Royal Academy, was born in Dublin, 1769. On his first arrival from Ireland in the British metropolis, he was introduced to the notice of Sir Joshua Reynolds, and to some other distinguished persons, by his illustrious friend and countryman, Edmund Burke. He became an exhibitor at the Royal Academy for the first time in the year 1789. In 1791 he sent four portraits to the exhibition; in 1792 he exhibited seven works; and in 1796 he reached what is now the full academical number of eight portraits, including that of Mrs. S. Kemble in the character of Cowslip, in 'The Agreeable Surprise.' He continued equally industrious for many successive years; and was in such favor with his fellow artists, that he was elected an associate of the Royal Academy in 1798. In 1800 he was elected a full royal academician; and of his 39 brethren by whom he was chosen he was the last survivor. He continued to produce numerous portraits with amazing readiness; and for a time he was in nearly as great request as Lawrence. In 1805 he made his appearance as a poet by the publication of his 'Rhymes on Art, or the Remonstrance of a Painter; in two parts, with Notes and a Preface, including Strictures on the State of the Arts, Criticism, Patronage, and Public Taste;' and this was followed in 1809 by a second poem, in six cantos, entitled 'Elements of Art,' to which Byron alludes in his 'English Bards and Scotch Reviewers.' A third poetical production, entitled 'The Commemo-

ration of Reynolds,' &c., appeared from his pen in 1814. In 1824 he published a tragedy called 'Alasco,' with an angry preface directed against Mr. Colman, the licenser of plays, who had some years previously put a veto on its being brought upon the stage. On the death of Lawrence in 1830, he was elected president of the Royal Academy, and immediately knighted. Sir Martin excelled in short, well-timed, and well-delivered speeches, and his eloquence was highly appreciated within the walls of the academy. His name, says a contemporary from whom this memoir has been abridged, will descend in the history of painting as a clever artist with greater accomplishments than have commonly fallen to the class to which he belongs, and as a painter who has preserved to us the faces and figures of Sir Thomas Munro, Sir Thomas Picton, Sir Eyre Coote, Sir James Scarlett, Sir Henry Halford, and the poet Moore. Died August 19, 1850.

SHEFFIELD. See BUCKINGHAMSHIRE.

SHEIL. See SHIEL.

SHELBURNE, WILLIAM PETTY, Lord, and first marquis of Lansdowne, born 1737. Became president of the Board of Trade in 1763, and joined Lord Chatham's administration in 1766. After the dissolution of that ministry he was a zealous oppositionist till 1782, when he was appointed secretary of state for foreign affairs. He became head of the cabinet on the death of the marquis of Rockingham, which position he retained till the coalition of Lord North and Mr. Fox; afterwards he was created marquis of Lansdowne, died 1805.

SHELBY, ISAAC, a revolutionary officer and first governor of Kentucky in 1792.

SHELDON, GILBERT, a munificent prelate who succeeded Juxon in the primacy, and besides expending above £66,000 in charitable objects, remained at his post in the midst of the afflicted during the plague of London. Among the works executed at his expense is the theatre which bears his name at Oxford. Born at Stanton, in Staffordshire, 1598, died 1677.

SHELLEY, G., a writing-master, died 1736.

SHELLEY, PERCY BYSSHE, a poet of admirable genius, was, in the words which he applied to himself, 'a power girt round with weakness.' There is something marvellous in the rich originality of his imagination, and the ideal loveliness of the forms which it pours forth. But his figures float in the air without touching earth; he wants both practical strength of sympathy and intuition of human character; and while always wedding thought with fancy, he thinks so obscurely that his attempts at narrative fail completely, while even those lyrical flights which are his best efforts, are often mystical or unintelligible. This ambitious turn of speculation, ill-directed and uncurbed, caused the unhappiness of his life as well as the chief faults of his poems. With the utmost gentleness and amiability of personal demeanor, he united an extreme confidence in his own opinions on abstract questions; and, setting himself up, with the presumption of youth, in opposition to received principles which he did not understand, he made himself voluntarily an outcast, and remained through life a martyr to his own indistinct chimeras. —Shelley, the son of a wealthy baronet in Sussex, was born in that county in 1792. His school-days were made uncomfortable by his sensitive and retired temper; and he was not distinguished as a scholar. But he laid the foundation of good Greek scholarship, and wrote two novels before he was sixteen. In 1808 he was sent from Eton to Oxford. Here, with very slight philosophical reading, he became

entangled in metaphysical difficulties, and, at seventeen, was pleased to publish, with a direct appeal to the heads of colleges, a pamphlet entitled 'The Necessity of Atheism.' He was immediately expelled. Soon afterwards he printed his poem of 'Queen Mab,' in which singular poetic beauties are interspersed through a wild mass of speculative absurdities. His alienation from his family was completed when, at the age of eighteen he married the daughter of a person who had, kept a coffee house. After three years of misery to both parties the ill-assorted marriage issued in a separation; and not very long afterwards Shelley was agitated into temporary derangement, by learning that his wife had destroyed herself. His children were taken from him by a decree of the Court of Chancery, on the ground of the atheism which he had avowed, and which he was too proud to retract on compulsion. Already, among his various wanderings, he had, in 1816, become acquainted with Lord Byron, who lived near him on the Lake of Geneva. There, and by the Lake of Como, he began to write poetry very sedulously, having for some time written oftener in prose. He studied and admired Wordsworth and Coleridge; he was familiar with the Greek dramatists, from whom he made some fine translations; but probably no models influenced him so much as Goethe and Calderon. Not long after his wife's death he married the daughter of Godwin, a lady well known as the authoress of 'Frankenstein' and other novels. They resided for a few months in Buckinghamshire, where they made themselves beloved by their charity to the poor; and Shelley's generosity had been remarkable even in the poverty which he had more than once suffered. During this time Shelley wrote his exquisite 'Alastor,' and the gorgeously obscure 'Revolt of Islam.' In the spring of 1818 he and his family removed to Italy, where they at length settled themselves at Pisa. In that country, with health already failing, Shelley produced some of his principal works, in a period of about four years. Such were the beautiful though dreamy lyrical drama called 'Prometheus Unbound;' the gloomy tragedy of 'The Cenci;' the mysterious but attractive 'Epipsychidion;' 'Julian

the ashes were carried to Rome, and buried beside the grave of Keats in the Protestant cemetery beneath the shadow of the pyramid. [W.S.]

SHELLEY, MARY WOLSTONCROFT, wife of the poet, was born in 1797, and acquired great reputation by her 'Frankenstein.' Among her other works is an edition of her husband's poems; died 1851.

[The Leasowes, Residence of Shenstone.]

SHENSTONE, WILLIAM, was born in 1714, in Shropshire, where his father owned the small estate of the Leasowes. He spent his youth at Oxford, and elsewhere, in literary idling, and verse-making. About his thirtieth year he succeeded to the family property; and his principal employment afterwards was the execution of those operations in landscape gardening, which made the Leasowes one of the show places of England, but involved the owner in pecuniary embarrassment. Shenstone was a pleasant but not vigorous writer, both in verse and in prose. His 'Pastoral Ballad' is one of the best pieces we have of its artificial kind, and contains some fine touches, both of description and sentiment; and his 'Schoolmistress,' a semi-burlesque imitation of Spenser's diction and stanza, has a spirit and originality which he never elsewhere showed. He died in 1763. [W.S.]

SHEPREVE, or SHEPERY, JOHN, one of the most learned men of his age, professor of Hebrew at Oxford about 1538, and author of Latin poems, &c., died 1542.

SHERARD, or SHERWOOD, WILLIAM, a learned botanist and antiquarian, who became British consul at Smyrna, and devoted much time in exploring Natolia and Greece; born in Leicestershire 1659, died 1728. His brother, JAMES, born 1666, cultivated a fine botanical garden at Eltham, in Kent, died 1737.

SHERBURNE, SIR EDWARD, clerk of the ordinance in the time of Charles I., known as a poet and classical translator, 1618-1702.

SHERIDAN, THOMAS, grandfather of the dramatist (next article), was born in the county of Cavan about 1684, and though of poor parentage became a clergyman in the Irish Church. He was a friend of Dean Swift, and an incorrigible wit, a genuine Irish sloven, a 'quibbler, a punster, and a fiddler,' died in extreme indigence, 1738. His son, THOMAS, born

[Tomb of Shelley.]

and Maddalo,' in which he portrays himself and Byron, and many singularly fine small pieces, lyrical and reflective. In July, 1822, when he had not quite completed his twenty-ninth year, he was drowned in a storm which he encountered in his yacht on the Gulf of Spezia. In obedience to his own desire, his body, when thrown ashore, was burned, under the direction of Lord Byron and other friends; and

at Quileá in 1721, went upon the stage in 1742, and was very successful as a tragedian; he wrote a 'Life of Swift,' 'Lectures on Elocution,' and an 'Orthoepical Dictionary of the English Language,' died 1788. FRANCES, wife of the latter, and granddaughter of Sir Oliver Chamberlane, acquired considerable repute as a novelist, especially by her delightful romance of 'Nourjahad,' 1724-1767.

SHERIDAN, RICHARD BRINSLEY, was born at Dublin in 1751. His grandfather, Dr. Sheridan, a clergyman and schoolmaster in Ireland, was an improvident wit, and a friend and coadjutor of Swift; his father, Thomas Sheridan, was well known as an actor and a teacher of elocution, and as the author of a Pronouncing Dictionary; and his mother, a remarkably amiable and accomplished woman, wrote, besides other pieces, the fairy tale of 'Nourjahad.' Richard, an idle and mischievous boy, passed at school for a hopeless blockhead. But, though he had not learned to spell English when he left Harrow, at the age of eighteen, he was ambitious enough to join his friend, Halhed (the Orientalist), in publishing a translation from the Greek. He professed to study law in the Middle Temple; but his prospects were very hazy indeed, when, being barely of age, he made a runaway marriage with Miss Linley, a beautiful and accomplished singer. He refused to allow his wife to perform in public; and a small fortune she brought him was speedily dissipated by that careless way of living, which he practised at all stages of his life.—His career falls into two periods, exhibiting an alternation such as few men have gone through. The comic play-writer and theatrical manager transformed himself successfully into a statesman and orator.—His earliest comedy, 'The Rivals,' appeared in 1775, when the author was not much more than twenty-three years old. This humorous and lively play was succeeded next year by the commonplace farce of 'St. Patrick's Day,' and the witty and clever little opera of 'The Duenna.' In 1777, was played his celebrated comedy 'The School for Scandal,' an inimitable picture of the surface of society as seen on its weak side, and fuller of sparkling wit than any English play except those of Congreve. Sheridan's course of play-writing may

[Richard Brinsley Sheridan.]

be said to have closed in 1779, with his witty and ill-natured farce 'The Critic.' While engaged in bringing out his earliest plays, he became one of the proprietors of Drury Lane Theatre; and, acting as manager, he conducted his affairs with his usual carelessness. The wit which he exhibited in society

was even more remarkable than that which glittered in his comedies; but the one as well as the other was really gained (as his biographer, Moore, amusingly shows) by careful premeditation, and owed very much to unscrupulous and dexterous borrowing. Becoming intimate with Fox and Burke, and impressing these eminent men with a strong belief in his political and oratorical talents, he obtained a seat in parliament in 1780. He worked hard for the House of Commons, and was, in his great efforts, one of the most showy and striking of parliamentary orators. Of his famous speech on the trial of Warren Hastings, no record has been preserved that at all accounts for the extraordinary impression which it unquestionably made. Losing his wife in 1792, he married again, in 1796, a lady with whom he received five thousand pounds; and with this money and fifteen thousand pounds from shares in the theatre, he purchased an estate, and dreamt of living in splendor. But his affairs were already deranged beyond retrieval; and his sottish habits were becoming more and more confirmed. The last dozen years of his life were spent in continual difficulties, which made it the more honorable to him that he adhered steadfastly to the Whigs, even when his patron and boon-companion, the Prince Regent, deserted them. He was treasurer of the navy during the short ministry of Fox and Grenville; but after 1812 he was no longer able to speak in the house. Abandoned by friends, hunted by bailiffs, and sunk in habits and feelings, the wit and orator died in 1816. Those who had not offered to cheer his death-bed, gave him a grave in Westminster Abbey.

SHERLOCK, R., an English divine, 1613-1689.

SHERLOCK, WILLIAM, an episcopalian divine, was born in London, 1641, and received his education at Eton. Having distinguished himself at the university by his talents and acquirements, he obtained rapid preferments in the church, for, in 1669, he was appointed rector of the parish of St. George's, London; in 1681, prebendary of Pancras, St. Paul's cathedral; master of the Temple, and rector of Thetford; in 1691, dean of St. Paul's. His best known works are a 'Practical Treatise on Death;' 'A Discourse on Providence;' and 'The Future Judgment.' He died in 1707. [R.J.]

SHERLOCK, Dr. THOMAS, son of the preceding and a clergyman of the Church of England also. He was born in 1678, and having repaired in due time to St. Catharine Hall, Cambridge, to prosecute his education, he became eventually master of that college. He afterwards succeeded his father as master of the Temple; and it may be stated, as somewhat remarkable, that both father and son held this situation for the long period of seventy years. In 1728 he was elevated to the bench as bishop of Bangor, and thence, in 1734, he was translated to the see of Salisbury. A still higher promotion was put in his offer, for he was urged, in 1747, to accept the primacy. But that high honor he was obliged to decline on account of his bodily infirmities. He was prevailed on, however, in the following year to accept the see of London. His death took place in 1761. He was a popular and voluminous author. His 'Sermons,' his 'Use and Intent of Prophecy,' and his controversial writings on the Bangorian Controversy form the chief of his published works. [R.J.]

SHERMAN, ROGER, an American statesman and signer of the Declaration of Independence, was born in Massachusetts 1721. His origin was an humble one, and he commenced life as a shoemaker. With a taste for study he devoted himself to the law, and

became an eminent practitioner and judge. He had early removed to Connecticut, and became a delegate for that state to Congress, in 1774, and continued a member of that body for the long period of nineteen years. He was also a member of the convention which framed the federal constitution. Died 1793.

SHERWIN, JOHN KEYSE, an eminent engraver, who, till the age of 19, exercised the humble occupation of a wood-cutter. He was at that period employed on the estate of Mr. Mitford, near Petworth, in Sussex; and being one day at the house of that gentleman, the attention with which he observed some of the family who were drawing, attracted Mr. Mitford's notice, who asked him if he could do anything in that way! Sherwin said that he could not tell, but he should like to try. On this a portraiture was put into his hand, and he produced such a drawing as astonished all present; and the society of arts, to whom it was presented, voted him the silver medal. He was then placed under Bartolozzi, and became his favorite pupil. His engravings are of the first excellence. Died 1790.

SHERWOOD, MRS., a popular English novelist and writer of juvenile books, 1775-1851.

SHIEL, RICHARD LALOR, born in Dublin 1793, and best known as a parliamentary orator, was called to the Irish bar in 1814, when he had already distinguished himself as a speaker at public meetings. His connection with politics dates from 1822, when he became an active supporter of the Catholic Association; and his career in parliament from 1829, after the passing of the Catholic Relief Act. In 1850 he went as her majesty's minister to the court of Tuscany; died there 1851.

SHIELD, WILLIAM, an eminent English composer, was born at Smalfield in the county of Durham, in the year 1749. He was apprenticed to a boat-builder at North Shields, during which period his musical talents began to develop themselves in such an extraordinary manner that he was induced to devote himself wholly to the study of the science. Shield first appeared as a dramatic composer in 1778. In rapid succession he produced music to the 'Fletcher of Bacon;' 'Rosina;' 'The Poor Soldier;' 'Robin Hood;' 'Fontainebleau;' 'Marian;' 'Oscar and Malvina;' 'The Woodman,' &c. In 1807 he made a tour of the continent, and soon after his return home published his 'Introduction to Harmony,' which reached a second edition in 1817. He published also a volume of glees, and 'The Rudiments of Thorough Bass.' In 1817 the prince regent (George IV.) appointed him to the situation of master of the band of musicians in ordinary to the king, in which situation he conducted the musical services at the coronation of George IV. He died in 1829.

[J.M.]

SHIPLEY, JONATHAN, a prelate and poetical writer, one of whose daughters became the wife of Sir William Jones, born about 1714, died 1788.

SHIPPEN, WILLIAM, an American physician and the first lecturer on anatomy in America, was born in Pennsylvania, died 1808.

SHIRLEY, SIR ANTHONY, a famous Eastern traveller, who became the ambassador of Shah Abbas to various courts of Europe, and Spanish admiral in the Levant; born at Weston, in Sussex, 1565, supposed to have died in Spain about 1630. His brother, SIR THOMAS, travelled with him, and published an account of Turkey. A third brother, SIR ROBERT, was also his fellow-traveller, and, like Sir Anthony, acted as ambassador of the shah, 1570-1623.

SHIRLEY, JAMES, an eminent English dramatic

writer and poet of the Elizabethan age, was born in London, about 1594; was educated at Merchant Tailors' School, and at St. John's College, Oxford; obtained a curacy at St. Alban's, which he resigned on becoming a Catholic; and then endeavored, though without success, to establish a grammar school there. He next removed to London, and became a fertile writer for the stage; and, having obtained considerable celebrity, he was taken into the service of queen Henrietta Maria. He afterwards accompanied the Earl of Kildare to Ireland, but returned on the breaking out of the rebellion, and resumed his scholastic employment in the Whitefriars. At the Restoration many of his plays were again acted, and he appears to have been comparatively prosperous; but having lost all his property by the fire of London, in 1666, both he and his wife were so affected by the calamitous event, that they died of grief and terror within 24 hours of each other, on the 29th of October, and were buried in the same grave. Shirley was the author of 37 tragedies, comedies, &c., besides a volume of poems; which are now well known, a complete edition of his works having been published by the late Mr. Gifford.

SHIRLEY, THOMAS, a relation of the traveller of that name, known as a medical writer, 1638-78.

SHIRLEY, the Right Rev. WALTER AUGUSTUS, bishop of Sodor and Man, was born at Westport, in Ireland, 1797; was educated at Winchester, and New College, Oxford; ordained in 1820; and took up his residence with his father at Ashbourne, where he undertook lectureships and service, and performed all the duties of an able and active clergyman. While residing here he gained a prize for an able essay on 'The Study of Moral Evidence.' In 1826 he took the situation of examiner at Oxford; and, in the autumn of the same year, he repaired to Rome, where he officiated as minister of the English chapel. On his return in 1828 he became vicar of Shirley in Derbyshire, on the nomination of Earl Ferrers, a family connection; and here, besides discharging his ministerial duties with great faithfulness and success, he devoted himself with unwearied attention to what he considered the calls of professional duty, such as Bible societies, missionary deputations, evening lectures, curate societies, training schools, boards of education, and all other means for improving and extending the influence of the church. In 1846 he was selected as preacher of the Bampton Lectures at Oxford. The same year he was nominated to the bishopric of Sodor and Man, and had just entered on what promised to be a career of extensive usefulness, when he was cut off, after a short illness, April 21, 1847. The 'Letters and Memoirs of Bishop Shirley' have been published by Archdeacon Hill.

SHIRLEY, WILLIAM, governor of Massachusetts in 1741, was born in England. He was a lawyer by profession, and practised on his arrival in America. He was the author of 'Electra,' a tragedy, and 'Birth of Hercules,' a masque.

SHLOEZER, A. L., a Ger. writer, 1737-1809.

SHOBUL, FREDERICK, an English miscellaneous writer and translator. Died 1853, aged 78.

SHORE, JANE, the beautiful and unfortunate mistress of Edward IV., was the daughter of a London citizen, and the wife of a rich jeweller in Lombard Street. Her personal charms are represented as being transcendent; her connubial state, infelicitous; and the monarch's admiration of her, unbounded. Her virtue was not sufficiently strong to resist her royal lover, and she reluctantly yielded

to his desires. She had an entire command over his heart and his purse; but she made no improper use of his munificence, her greatest happiness consisting in relieving the necessitous, and in being the mediatrix between the sovereign and those who were under his displeasure. After the king's death she became attached to Lord Hastings; and their known partiality to the young princes rendered them obnoxious to the Duke of Gloucester, who accused them of witchcraft. On this charge Hastings was beheaded, and his pretended accomplice committed, by the tyrant's order, to the Tower. After undergoing the form of a mock trial, she was ordered to do penance in St. Paul's, in a white sheet, and was paraded through the public streets, the bishop of London heading the procession. Her house and fortune were seized by the protector, and the unfortunate woman was reduced to the greatest distress; but her perishing in a ditch, which is said to have given rise to Shoreditch, does not appear to be founded upon fact. Where or when she died is not known; but it is certain she was living in the reign of Henry VIII. Sir Thomas More mentions her in terms of the highest commendation; and observes that although time and affliction had destroyed her personal charms, still she retained that softness of manners which had conspired to enslave the monarch's heart.

SHORT, JAMES, a natural philosopher and eminent optician, was born at Edinburgh, in 1710; received his education at the high school and the university, and studied mathematics under Maclaurin, by whose interest he became mathematical tutor to the Duke of Cumberland and a fellow of the Royal Society. In 1739 he was employed on a survey of the Orkney islands; and, on his return to London, obtained deserved celebrity for his skill in the construction of telescopes. Died 1768.

SHORT, THOMAS, a physician and medical writer, was a native of Scotland, and was educated at Edinburgh. He settled first at Sheffield, but removed to Rotherham, where he died in 1772. He wrote a variety of works, among which were the 'Natural History of Mineral and Medicinal Waters,' a 'Chronological History of the Air, Weather, Seasons, Meteors,' &c., 2 vols.

SHORT, WILLIAM, an American diplomatist, chargé to France, minister to Spain during the administration of Washington, was born in Virginia, 1759. Died 1850.

SHOVEL, Sir CLOUDESLEY, a gallant British admiral, was born near Clay, in Norfolk, about 1650. In 1674 he was a lieutenant under Sir John Narborough, who sent him to the dey of Tripoli with a requisition, which the latter treated with contempt. On his return he stated to the admiral the practicability of destroying the enemy's shipping, which service he performed the same night without the loss of a man. For this exploit he was appointed to the command of a ship, and he gradually rose in his profession, till he became a rear-admiral. He had a share in the victories off La Hogue and Malaga. While in command of the Mediterranean fleet in 1705, he sailed for England, and in the night of October 22d fell by mistake upon the rocks of Scilly, where his ship was totally lost with some others, and all on board perished. His body being found by the fishermen, they stripped and buried it; but the fact becoming known, his remains were brought to London, and interred in Westminster Abbey.

SHOWER, Sir BARTHOLOMEW, a celebrated lawyer, was born at Exeter, studied in the Temple, and became so eminent as a counsellor, that James II.

appointed him recorder of London. He published 'Cases in Parliament resolved,' &c.—His brother, JOHN, was an eminent Puritan divine, and of very opposite principles to Sir Bartholomew. Disgusted with the measures of James II., he retired to Holland until after the revolution; and, on his return, he preached at the chapel in the Old Jewry. He was the author of 'Reflections on Time and Eternity,' 'The Mourner's Companion.' Died 1715.

SHRAPNEL, Lieut-general HENRY, the inventor of the case-shot known as Shrapnel-shells, received his commission as second lieutenant in the royal artillery in 1779, and attained the rank of lieutenant-general in 1837. Shortly after the siege of Gibraltar he invented the spherical case-shot; this consists of a hollow globe of iron, filled with musket-balls and gunpowder, which, when the shell explodes, are projected about 150 yards, and do as much injury as the same number of muskets in addition to the effects produced by the splinters of the exploded shell. On the adoption of these shells by the artillery, General Shrapnel was granted a pension of 1200*l.* per annum in addition to his regular pay. Died March, 1842.

SHUCKFORD, S., a learned divine, died 1754.

SHUTE, J., a divine and royalist, died 1643.

SHUTE, SAMUEL, colonial governor of Massachusetts in 1716. Died 1742.

SHUTER, E., a popular comedian, died 1776.

SHUTTLEWORTH, the Right Rev. PHILIP NICHOLAS, bishop of Chichester, was born in 1782, at Kirkham, Lancashire. He received his education at Winchester, and New College, Oxford, and was distinguished at both these learned seminaries by his superior attainments. For some considerable time he resided in Oxford, and filled the situation of tutor to his college; and when, in 1822, the wardenship of New College became vacant, he was unanimously elected to that honorable station. In 1840, Dr. Shuttleworth was promoted to the see of Chichester, but his episcopal dignity was of brief duration, this able prelate dying in January, 1842. His principal works are a 'Discourse on the Consistency of the whole Scheme of Revelation with itself and with Human Reason,' 'Scripture not Tradition,' in which his objections to *Puseyism* are stated with great force and learning; a volume of excellent sermons, &c.

SIAUVE, S. M., a Fr. antiquarian, died 1812.

SIBBALD, Sir ROBERT, a physician and naturalist, born near Leslie, in Fifeshire, about 1643. He was physician and geographer to Charles II.; and contributed to the foundation of the college of physicians at Edinburgh, of which he became the first president. Among his works are, 'Scotia Illustrata,' and 'Liberty and Independency of the Kingdom and Church of Scotland.' Died 1712.

SIBBS, R., a puritan divine, 1577–1635.

SIBILET, M., a French poet, 1512–1589.

SIBTHORP, JOHN, a very learned naturalist and regius professor of botany in the university of Oxford, was a native of that city, and received his education at Lincoln College. After studying medicine at Edinburgh, he visited France, Switzerland, and Greece, for the purpose of making botanical researches. In 1794 he published 'Flora Oxoniensis,' and left an estate of 300*l.* a year to the university, in order to defray the expense of publishing a splendid work, entitled 'Flora Græca,' and towards the foundation of a professorship of rural economy. Died 1796.

SIBYL, daughter of Amaury I., king of Jerusalem, and successively wife of William Longsword, by whom she was mother of Baldwin V., and of

Guy of Lusignan. With the latter she mounted the throne of Jerusalem 1186, the year preceding his death by the hand of Saladin.

SICARD, an Italian prelate and historian, author of a 'Chronicle,' published by Muratori, died 1215.

SICARD, C., a French Jesuit, 1677-1726.

SICARD, ROCH-AMBROSE CUCURRON, an eminent teacher of the deaf and dumb, was born in 1742, at Fousseret, near Toulouse. On the death of l'Epee, in 1789, the Abbé Sicard was called to Paris, to succeed him in the direction of the establishment there. In 1792 he was arrested amidst his scholars, sent to prison, and was in imminent danger of becoming a victim in the ensuing massacres. He, however, obtained his liberty, and in 1796 took part in compiling the 'Religious, Political, and Literary Annals of France,' for which he was sentenced to transportation, but escaped. When this storm had passed away, he resumed his situation as a teacher of the deaf and dumb, which office he held for many years with great credit to himself and advantage to his pupils. He wrote several valuable works relating to tuition, &c.; and died in 1822.

SICHEM, C. VAN, a Dutch engraver, died 1580.

SIDDONS, SARAH, the most eminent of English actresses, was the eldest daughter of Roger Kemble, and was born at Brecknock in South Wales, 14th July, 1755. Notwithstanding her father's connection with the theatre, there seemed at first small chance of her becoming an actress, as her parents placed her out as lady's-maid in the family of Mrs. Greathead of Guy's Cliff, near Warwick, and in that position the incipient queen of tragedy remained for two years. They resorted to this measure for the purpose of separating her from Mr. Siddons, a member of her father's company, for whom she had an attachment; but to whom, notwithstanding such opposition, she was married in 1773. Two years afterwards she made her appearance in London, 29th December. Her *début* had been procured by Lord Bruce, afterwards earl of Aylesbury, who had recommended her to Garrick, but the result was not flattering. The character, perhaps, was ill chosen—*Portia*, in 'The Merchant of Venice.' In the summer of next year we find her at Birmingham playing with Henderson, and subsequently at Bath with increasing success, in such parts as *Euphrasia*, *Alicia*, *Rosalind*, *Matilda*, and *Lady Townley*. On her next appearance at Drury Lane, 10th October, 1782, the actress proved triumphant. The part was better suited to her powers—*Isabella*, in 'The Fatal Marriage.' This was followed by *Jane Shore*, *Euphemia*, *Calista*, *Belvidera*, and *Zara*, in 'The Mourning Bride.' In Dublin and Cork, in the following year, she enjoyed a repetition of her metropolitan triumph. On her return to London she attempted another *Isabella*, that of Shakspeare in the difficult play of 'Measure for Measure.' This was in November, 1783. To the same year belong also her appearances in *Constance*, *Volumnia*, and *Lady Macbeth*; and to the following, the memorable circumstance of Sir Joshua Reynolds painting her portrait in the character of the tragic muse, of which he was so proud that he traced his name on the hem of the muse's garment. Her fame now became prerogative, and her profits large. At Edinburgh she received a thousand guineas for performing ten nights, with many presents, among them a magnificent silver urn, inscribed 'A Reward to Merit.' Mrs. Siddons owed much of her success to her personal beauty and dignity; her voice was remarkably melodious, and her mental endowments were extraordinary. On her brother, John Kemble, becoming

manager of Drury Lane in the spring of 1788, she appeared for his benefit as *Katharine*, in 'The Taming of the Shrew.' In the same theatre, also, she played *Juliet* in 1790, and *Lady Macbeth* in 1794. She transferred her talents to Covent Garden theatre, on her brother's taking a share in it (1801), and continued to reign there until its conflagration in 1808, with a short interregnum, during which Master Betty shone as a meteor. On the opening of the new theatre, 18th September, 1809, she appeared as *Lady Macbeth*, but in consequence of the O. P. riots, did not appear again until 24th April, 1810. In the following season she repeated all her principal characters, and on 29th June, 1812, retired altogether from the stage, in the part of *Lady Macbeth*, her greatest effort; reciting on the occasion a poetical address written by Mr. Horace Twiss, her nephew. After her retirement from the stage, she gave a course of public readings from Shakspeare at the Argyle Rooms, to which afterwards she added public readings from Milton's 'Paradise Lost.' Between 1812 and 1817 she likewise appeared on two or three occasions; but a new style of acting had then set in, which rendered her further appearances inexpedient. Her death took place 8th June, 1831, at Upper Baker-Street, London; and she was buried in a vault at Paddington church. Her style of acting was grand, noble, and natural; somewhat cold and classical, but free from the formality which distinguished that of her brother. [J.A.H.]

SIDDONS, Mrs. H., for many years the principal actress at the Theatre Royal, Edinburgh, was the daughter of Mr. Murray, comedian, formerly of Covent Garden, and the wife of Mr. Henry Siddons, son of that distinguished actress, who, like her brothers, John and Charles Kemble, raised the character of the British drama, and shed a brilliant lustre on the stage. Mr. H. Siddons died in 1814, leaving his widow and four children; when Mr. Murray, her brother, kindly undertook the management of the Edinburgh theatre for her, and conducted it with such success, that in 1830 the widow was able to retire from the concern with an ample fortune. The range of characters which Mrs. H. Siddons filled was of that class which may be best expressed by the term 'ladylike' in genteel comedy, and of the gentle and pathetic in tragedy, and in these she excelled. In private life this lady was both admired and respected.

SIDMOUTH, HENRY, Viscount, &c., was the eldest son of Dr. Addington, an eminent physician; was educated at Winchester, and Brazenose College, Oxford; and was intended for the profession of the law, which, however, he abandoned almost as soon as he was called to the bar, in order to follow the political fortunes of his boyhood's friend, the second William Pitt. Entering parliament for Devizes, in 1784, he in 1789 succeeded Lord Grenville as speaker of the House of Commons—an honor, we believe, never before or since conferred on so young a member. In this post he remained for 12 years; during which period he commanded the respect of both friends and foes, and only ceased to be speaker in order to take, at the urgent request of George III., the still more arduous post of prime minister. His ministry lasted only two years and four months, but never were an English minister's talents and courage tried during a like space of time by a more perplexing state of public affairs, both foreign and domestic; and, when circumstances led him to resign, he most honorably supported government whenever he believed its measures to be calculated to benefit the country. In 1805 he accepted the

office of president of the council, under Mr. Pitt's government, and was elected to the peerage. This office he more than once resigned, and re-accepted the office of president of the council; but, on the formation of the Liverpool administration, he accepted office as home secretary. The Spa Fields and the Manchester meetings of the Cato Street conspiracy furnish abundant proofs alike of the difficulties against which Lord Sidmouth had to contend, and of the sagacity, courage, and firmness with which he opposed and overcame them. In 1822, after passing nearly 40 years in the public service, he felt the infirmities of age pressing heavily upon him, and finally retired to private life. That he was singularly disinterested no one ever ventured to deny; more than once he refused a pension, and on one occasion he refused an earldom and the garter—those dazzling prizes for which so many statesmen have bartered both personal and political honor. He passed the remainder of life in retirement at his official residence as ranger of Richmond Park. Born 1757; died 1844.

SIDNEY, ALGERNON. See SYDNEY.

SIDNEY, SIR HENRY, an English statesman, descended from a noble family in Surrey, and knighted by Edward VI. He held several state offices, and in 1568 was sent to Ireland as lord-deputy. He married Mary, eldest daughter of John Dudley, duke of Northumberland, and sister of Robert Dudley, the favorite of Elizabeth; died 1586.

SIDNEY, MARY, countess of Pembroke, and daughter of the preceding, bears a distinguished name in English literature, both as the sympathizing friend of her brother, Sir Philip Sidney, and as the possessor of similar talents. She was married to the earl of Pembroke in 1576, and having survived her husband twenty years, died at her house in Aldersgate-Street, 1601. She wrote an Elegy on her brother, and other poems, including translations of the Psalms from the Hebrew. She also translated Mornay's 'Discourse of Life and Death,' and the 'Tragedy of Antonie.'

SIDNEY, SIR PHILIP, son of Sir Henry Sidney of Penhurst, in Kent, was born there on the 29th November, 1554. He made while young the tour of the greater part of Europe, and, in 1575, returned

which that great queen prized so dearly. He was a generous patron to Spenser and others of the literary band who gemmed the Elizabethan era. Sir Philip's own productions both in poetry and prose, though overburdened by the pedantic conceits which the conventional taste of the court delighted in, show no ordinary amount of pathos, and an exquisite sense of natural beauty. The queen had restrained him from joining Drake's expedition in 1585, and also from seeking the elective crown of Poland, 'refusing' as Camden says 'to further his advancement, out of fear that she should lose the jewel of her times.' But in 1586 he obtained the command of the cavalry in the auxiliary army which Leicester led to the Netherlands against the Spaniards. Sidney fell in a skirmish near Zutphen, 22d September, 1586, at the early age of thirty-two. He had headed three successful charges of his own squadron against the enemy, when he was shot through the thigh with a musket ball. The bullet shattered the bone, and Sidney in great agony was carried off the field by his followers. As they bore him along he asked for water, and a bottle of it was found and brought to him. He raised it to his lips, but as he saw at that moment a poor soldier, who lay mangled on the ground, 'ghastly casting up his eyes at the bottle,' Sir Philip removed the untasted draught from his own lips, and held it out to the dying man, saying 'Thy necessity is yet greater than mine.' Sidney's wound proved mortal, and he died at Arnheim, after eighteen days of severe suffering. He was buried in old St. Paul's, deeply regretted by his countrymen of every rank. A general mourning was observed for him, an honor then without precedent in England. [E.S.C.]

SIDONIUS, CAIUS SOLLIUS APOLLINARIS MODESTUS, a French poet and orator, Lyons, 428-488.

SIEBENKEES, JOHN PHILIP, prof. of philosophy and Oriental languages at Altorf, 1759-1796.

SIEYES, COUNT EMANUEL JOSEPH, commonly called the ABBE SIEYES, a politician of the French revolution, was born at Fréjus, 1748. To him, mainly, Buonaparte was indebted for the opportunity of assuming the supreme authority, and the interest of Sieyes' history terminates with that event. At the period of the American revolution he occupied the post of grand-vicar in the diocese of Chartres, but soon after abandoned his ecclesiastical expectations for the arena of politics. The prospect of the estates general meeting towards 1789 gave occasion to his first publications, the principal of which, 'Qu'est-ce que le Tiers-Etat?' (What is the Third Estate), contributed greatly to the formation of a sound public opinion on government, though a most threatening one under the circumstances. It exhibited more than 25,000,000 of men governed without law or reason by about 200,000 of the privileged orders, consisting of the clerical and lay noblesse. Sieyes, returned to the estates-general by the electors of Paris, powerfully seconded Mirabeau on occasion of the *Seance Royale*, 23d June, 1789, and the assembly being declared national, he thenceforth devoted himself, with his extensive knowledge of the former history of France, to the erection of a constitution. We may say a word here to the writers and readers of histories of those times:—it is one thing to judge of the probability of success in such a labor when the results have been long known, but quite another to pronounce on it before the event; add to which, the patriotic daring of Sieyes, for that period, was no less remarkable than the foresight and logical clearness of his views. In one point he went beyond Mirabeau, that, namely, of

[Sir Philip Sidney's chair.]

to England, where he became one of the brightest ornaments of the court of Queen Elizabeth. His learning was unusually ample and varied, his natural genius was brilliant, and he was pre-eminent in all the martial accomplishments and courtly graces

the royal *veto*, the principle laid down by Sieyes was that of making the king's office purely magisterial, and giving him no right to interfere with the will of the nation as expressed by its representatives; a point which is now regarded as secure in the English constitution, for though the sovereign really possesses the *veto*, it is wisely treated as obsolete. It would occupy too much space to follow the Abbé Sieyes through the labors of the constituent assembly, it is well known that the ideas of the Girondins prevailed, and as this became more evident, Sieyes grew reserved, and finally retired from public affairs for a short season. In this interval the Jacobin outburst of 10th August occurred, the national convention was summoned, and Sieyes reappeared as one of its members: the first question was that of the king's fate, now a prisoner in the Temple, and Sieyes gave his vote by simply repeating the words 'la mort' (death), and to the questions of delay and appeal, 'no;' it is denied in the *Biographie des Contemporaines* that he used the words 'la mort sans phrase.' In the height of the Jacobin ascendancy, Sieyes cautiously opposed the party of Robespierre in convention, from which he retired after the fall of the Girondins, and only resumed his place some months after the fall of Robespierre; at this period he narrowly escaped an attempt at assassination, and soon afterwards went as ambassador to Prussia. While there we read this notice of him in the recently published memoirs of the duke of Buckingham; it occurs in a letter from Mr. T. Grenville, then at the court of Berlin:—'I have seen Sieyes at court with his scarf and cockade. What Lavater would say of his features I know not, but I have seldom seen a countenance of so bad impression. His manners, conduct, and appearance here, have produced nothing but disgust in all that are not of the lower ranks of life, but it is to those that his mission is considered as being chiefly addressed, and he is said to have both means and agents enough to work through upon the lower classes down here.' At this very time, so fallacious is opinion, Sieyes was intriguing, not with the lower orders, but with Buonaparte, then in Egypt, to whom he had conveyed an intimation of the state of affairs under the Directory. In fine, Napoleon suddenly returned, and concerted with Sieyes the *coup d'état* of the 18th Brumaire, which resulted in the appointment of Sieyes, Ducos, and Napoleon, as provisional consuls. The part of Sieyes was nearly played out when he had placed the crown of Charlemagne within reach of the successful soldier, and great must have been his disappointment when the latter grasped his projects, and absorbed the whole power and merit of realizing them in his own person. It is probable that Sieyes could never understand such a result, and in the character of Senator, he often made vain efforts to resist his master. On the restoration of the Bourbons, he became an exile, but the revolution of 1830 enabled him to return to his country, where he died, at the advanced age of eighty-eight, in 1836.

[E.R.]

SIGALON, X., a French painter, 1790–1837.

SIGAUD DE LAFOND, JNO. RENATUS, an eminent surgeon and natural philosopher, was born in 1740, at Dijon, and died in 1810. He devoted himself chiefly to obstetric practice, and projected a new mode of operation in certain cases of difficult parturition. His principal works are, 'Elements of Theoretical and Experimental Philosophy,' and 'A Dictionary of Natural Philosophy.'

SIGEBERT, two kings of France, the *first* born about 535, was the third son of Clothaire I., king

of the Franks, whom he succeeded as king of Austrasia, or Metz, 561. He was assassinated at Vitry, at the instance of Fredegonde, mistress of his rival, Childeric, 575. The *second* of the name, son of Dagobert I., succeeded to the kingdom of Austrasia 638, died 656. Several Anglo-Saxon kings of this name are also mentioned.

SIGEBERTUS, a monk of Gemblours, in Brabant, a distinguished historian and *savant*, 1030–1112.

SIGISMUND, a king of Burgundy, 516–524.

SIGISMUND, emperor of Germany, son of Chas. IV., and brother of Wenceslaus, was born 1368, became margrave of Brandenburg, 1378; king of Hungary, in virtue of his marriage with Mary, daughter of Louis, 1386; and emperor, in 1410. Between the last two dates he had to contend with the Turkish emperor, Bajazet, and, after becoming emperor, with a revolt in Bohemia, headed by Ziska, and occasioned by the disgraceful burning of John Huss. He became master of events, and was crowned at Prague in 1436, died 1437. His second wife is called the Messalina of Germany.

[Monument of Sigismund III., at Warsaw.]

SIGISMUND, three kings of Poland—SIGISMUND I., called 'the Great,' son of Casimir IV., was born 1466, and succeeded his brother, Alexander, in 1507, died 1548. SIGISMUND II., surnamed Augustus, born 1520, was son of the preceding, and succeeded him in 1548, died 1572. SIGISMUND III., surnamed De Vasa, born 1566, was son of John III., king of Sweden and of Catharine, the daughter of Sigismund I. He was elected king of Poland in 1587, and succeeded to the crown of Sweden in 1594. Being a catholic, his uncle, Charles, duke of Sudermania, easily undermined his authority in Sweden, and he lost that kingdom in 1604. In 1610, he succeeded in placing his son, Uladislau, on the throne of Russia, but was afterwards obliged to succumb, and besides that, was involved in the war with Gustavus Adolphus. Died 1632.

SIGNORELLI, LUCA, was born at Cortona in 1441, and was the pupil of Piero Della Francesca. He was one of those extraordinary geniuses like the Pisani, Giotto Masaccio, and some few others, whose works have formed eras in the history of art. It is hardly too much to say, that Signorelli antici-

pated Michelangelo in grandeur of design; he constitutes the connecting link between Masaccio and Michelangelo, as Filippino does between Masaccio and Raphael. Signorelli's great works are in the chapel of the Madonna di San Brizzio in the cathedral of Orvieto, where he has represented in extensive frescoes, the History of Antichrist, the Resurrection of the Dead, Hell, and Paradise. These frescoes were commenced in 1499, in continuation of the unfinished series begun by Fra Giovanni da Fiesole; the ceiling was finished in 1500. The whole of the frescoes were finished about 1503, and are sufficiently new and vigorous in style to account for the extraordinary progress in design generally displayed in the famous cartoon by Michelangelo exhibited in 1506. Such indeed is the extraordinary vigor displayed in these frescoes that Vasari and many others have indicated Signorelli as the immediate precursor of Michelangelo, who, says Vasari, always expressed the highest admiration for his works, and Vasari adds, that all may see what use he made of the inventions of Luca in his great work of the Last Judgment, in the Sistine chapel, especially in the forms of the angels and demons, and in the arrangement. The fact is indisputable, some of the best figures are little more than transcripts from Signorelli. Luca died at Arezzo in 1524, whither he had retired, and where he lived, says Vasari, more after the manner of a nobleman than an artist.—(Vasari *Vite de' Pittori*, &c. Ed. Flor., 1846, seqq.) [R.N.W.]

SIGONIUS, C., a learned Italian, 1520–1584.

SIGORGNE, P., a Fr. philosopher, 1719–1809.

SIGWART, G. F., a Germ. anatomist, 1711–95.

SILANION, an Athenian sculptor, 346 B.C.

SILHON, J., a French philosopher, died 1666.

SILHOUETTE, STEPHEN DE, a French statesman, distinguished as a miscellaneous writer, 1709–1767.

SILIUS ITALICUS, CAIUS, a Roman pleader, and author of poems on the Punic war, was born A.D. 16, and became consul under Nero, 68. He was afterwards proconsul of Asia; died 100.

SILSBEE, NATH., a senator of the United States from Massachusetts from 1826 to 1835. He was a merchant by profession. Died 1850.

SILVA, D., a learned Milanese, 1690–1779.

SILVA, J. B., a French physician, 1682–1748.

SILVERSTOLPE, A. G., a Swedish statesman, historiographer, and philologist, 1772–1824.

SILVERIUS, a pope of Rome, 536–538.

SILVESTER. See SYLVESTER.

SILVESTRE, ISRAEL, a French designer and engraver, 1621–1691. His son, LOUIS, a painter, and member of the Academy, 1675–1760.

SIMEON, a Jewish rabbi who flourished about the year 120, and through fear of the Romans retired to a cave, where he lay in concealment twelve years, and composed the *Zohar*, a cabalistic work.

SIMEON, REV. CHARLES, an eminent English divine and theological writer, was born at Reading, in 1759, and was brother to the late Sir John Simeon, baronet, recorder of that town, and a master of chancery. He was educated at Eton, and entered at King's College, Cambridge, in 1776, where he made great progress in his theological studies, and received those religious impressions for which through life he was distinguished. In 1783 he was presented to the living of Trinity Church in that university, of which he continued to be the rector and officiating minister during the remainder of his life—a period of 53 years. His works are numerous and highly important. When they were pub-

lished entire, in 1832, they consisted of 21 closely printed 8vo. volumes, containing 2536 sermons and skeletons of sermons, which form a commentary upon every book of the Old and New Testament; besides various tracts and devotional treatises. When Mr. Simeon received from Mr. Cadell, the bookseller, the sum of £5000 for the copyright, he appropriated £1000 to the Society for promoting Christianity among the Jews, £1000 to the London Clerical and Education Society, and £1000 to the Church Missionary Society. The death of this truly venerable pastor took place, Nov. 13, 1836.

SIMEON OF DURHAM, an English historian of the Saxon and other kings from 616 to 1130. He probably died soon after the latter of these dates.

SIMEON, J. J., a Fr. jurisconsult, 1749–1842.

SIMEON, surnamed METAPHRASTES, an ecclesiastic of Constantinople, who lived in the tenth century, author of 'Lives of the Saints.'

SIMEON OF POLOTSK, a Russian preacher, ecclesiastical writer, and dramatist, 1628–1680.

SIMEON, surnamed STYLITES, a ridiculous fanatic, born about A.D. 392, at Sison, on the borders of Syria. In the plenitude of ascetic extravagance, he adopted the strange fancy of fixing his habitation on the tops of pillars (whence his Greek appellation), and with the notion of climbing higher and higher towards heaven, removed by degrees from a pillar of six cubits high to one of 40 cubits, and, what is truly wonderful, he was enabled to pass 47 years of his wretched existence upon his pillars. Such was the extraordinary folly of the age, that this madness was regarded as a proof of holiness; and when he died at the age of 69, his body was taken down from his last pillar by the hands of bishops, and conveyed to Antioch by an escort of 6000 soldiers, and buried with almost imperial honors.

SIMEONI, G., an Italian writer, 1509–1570.

SIMI, N., an Italian astronomer, 1530–1564.

SIMLER, JOSIAS, a Swiss divine, 1540–1576.

SIMMONS, S. F., a learned physic., 1750–1813.

SIMMONS. See SYMMONS.

SIMNEL, LAMBERT, an impostor of the reign of Henry VII., who gave himself out for the duke of York, second son of Edward IV. He was defeated at the battle of Stoke 1487, and was punished by promotion to an office in the king's kitchen.

SIMON. See MONTFORT.

SIMON, E. T., a French writer, 1740–1818.

SIMON, J. F., a French antiquary, 1654–1719.

SIMON, RICHARD, a French Hebraist and theologian, who sustained a controversy with Bossuet and the Port Royal *savants*, 1638–1712. Another of the same names, published a Dictionary of the Bible, in 1703, which was superseded by that of Calmet.

SIMON, V., a French dramatist, 1753–1820.

SIMONET, E., a French theologian, 1662–1733.

SIMONETTA, GIOVANNI, a learned Sicilian author of a History of Francisco Sforza, in whose service he was, died about 1491. Others of the family were also writers.

SIMONIDES, a Greek poet, 558–468 B.C.

SIMONIN, S., a poet and ascetic, died 1668.

SIMPLICIUS, a Greek philosopher of the time of Justinian, in the 6th century, author of Commentaries on the works of Aristotle and Epictetus.

SIMPLICIUS, two saints of the Roman calendar:—the earliest, a bishop of Autun about 374; the latter, a pope, who suc. Hilary 467, died 483.

SIMPSON, EDWARD, rector of Eastling, in Kent, dist. as a divine and chronologist, 1578–1651.

SIMPSON, JAMES, an Edinburgh lawyer, known as a writer on education, died 1853.

SIMPSON, THOMAS, an eminent mathematician, was born in 1710, at Market Bosworth, in Leicestershire, and was the son of a weaver, who brought him up to his own trade, and, perceiving his inclination for reading, took away his books. He in consequence left his father, and, after many vicissitudes, one of which was his becoming a fortune-teller, he acquired a perfect knowledge of mathematics, and rose to be a mathematical professor at the Royal Academy, Woolwich, and a member of the Royal Society. He wrote 'Treatises on Fluxions, Annuities, and Algebra,' 'Elements of Geometry,' and other scientific works. Died 1761. Simpson's widow, who was allowed a pension of £200 per annum, reached the extraordinary age of 102.

SIMS, Dr. JAMES, an eminent physician and botanist, was born at Canterbury; studied medicine at Edinburgh; removed to Leyden, where he took the degree of M.D. in 1764, and afterwards settled in London. He became physician to the Surrey dispensary, and also to the charity for lying-in women; devoting much of his time to, and gaining great reputation by, obstetric practice. His chief works are, 'Observations on Epidemic Disorders,' 'On the best Method of prosecuting Medical Inquiries,' and the 'Principles and Practice of Midwifery.' He was also the editor of the Botanical Magazine, from vol. xiv. to xlii., and contributed to the Transactions of the Linnæan Society, of which he was a member. Died 1831.

SIMSON, ROBERT, an eminent mathematician, was born in 1687, at Kirton Hall, in Ayrshire; studied medicine at Glasgow, but never practised; was professor of mathematics at Glasgow during a period of nearly half a century; and died in 1768. Among his works are, 'A Treatise on Conic Sections,' 'The Loci Plani of Apollonius restored,' &c.

SINCLAIR, CHARLES GIDEON, Baron, a Swedish general and writer on military tactics, 1730-1803.

SINCLAIR, SINCLAIRE, or SINCLARE, Geo., an engineer and professor of philosophy at Glasgow, author of works on hydrostatics, and the principles of astronomy and navigation. He wrote also a popular book on witches and apparitions, entitled 'Satan's Invisible World Discovered.' Died 1696.

SINCLAIR, Sir JOHN, Bart., an active and enlightened philanthropist, was born at Thurso Castle, in the county of Caithness, in 1754. He received his education chiefly at the High School, Edinburgh, but subsequently attended the universities of Edinburgh, Glasgow, and Oxford. In 1775 he was admitted a member of the faculty of advocates, and was afterwards called to the English bar. In 1780 he was elected member for the county of Caithness, which he also represented in the parliaments of 1790, 1802, and 1807; and sat for the borough of Lostwithiel in 1784, and for Petersfield in 1796. For more than half a century Sir John Sinclair occupied a prominent station in public life; and there was scarcely any topic in the whole range of political, statistical, or medical science, which had not engaged his active and inquiring mind. His reputation as a patron and promoter of agricultural improvement, in particular, was not confined to Britain, nor even to Europe; the most eminent political economists in America had appreciated and eulogised his valuable labors. He was the originator of the board of agriculture, which he established in 1793; and he also procured the establishment of a society, in Scotland, for the improvement of wool; of both these he was the president. Nor were his patriotic exer-

tions in defence of his country less conspicuous than his endeavors to improve its moral and statistical condition. He raised two battalions of 1000 men each, in the counties of Ross and Caithness, which were the first fencible regiments whose services were extended beyond Scotland. To a disposition as truly patriotic and philanthropic as ever warmed a human breast, he added an unflinching perseverance, which he evinced not merely by his support of all public institutions that had for their object the amelioration of mankind, but by advocating every useful public measure by his pen. To enumerate the whole of his literary productions here would be perfectly incompatible with our limits; for during upwards of 60 years they were incessantly issuing from the press. The 'Plans,' 'Proposals,' 'Hints,' 'Observations,' &c., of Sir John Sinclair were promulgated unceasingly; and, though many of them possessed only a local interest, they were not the less useful or meritorious. His principal works consist of a 'History of the Revenue of Great Britain,' 3 vols.; a 'Statistical Account of Scotland,' a work of unexampled labor; 'Thoughts on the Naval Strength of Great Britain,' 'Considerations on Militias and Standing Armies,' 'Essays on Agriculture,' 'The Code of Health and Longevity,' 'An Account of the Northern Districts of Scotland,' papers on the 'Bullion' question; and his publication of the originals of the Ossianic Poems, with a 'Dissertation.' It is said that at the time of his death he had made a considerable progress in a 'Political Code' and a 'Code of Religion.' Died Dec. 21, 1835.

SINDIAH, or SCINDIA, MAHAJEE, a bold and ambitious Mahratta prince, was born in Hindostan, about 1741. He was the son of a Mahratta officer at the court of the peishwa, and was at the battle of Panniput in 1761, where he was wounded and taken prisoner; but made his escape, and took refuge in the Deccan. In 1770 he invaded Hindostan in concert with Holkah, and made himself master of Delhi; he also took Agra, where he established a cannon foundry, and was the first Indian prince whose troops were armed and disciplined after the manner of Europeans. He was greatly indebted to the talents of Leborgne de Boigne, a French general whom he had taken into his service, and who commanded the army which gained the famous battle of Patan, in 1790. He possessed an extensive territory, and was engaged in schemes of farther aggrandisement at the time of his death, which happened in 1794. His nephew, Dowla Rao Sindia, succeeded him.

SINGH, MAHA RAJAH RUNJEET, chief of Lahore and Cachmire, was born in 1779. Perhaps neither ancient nor modern times can furnish a more striking proof of the power that lies in an iron and energetic will, than is furnished by the singular career of this chief, who from being the leader of a gang of robbers, became the absolute despot of despots; whose word was law to princes, and who ruled 20,000,000 of men with a rod of iron. Brave, active, and remorseless, his bandit troop swelled its numbers, and became an army; the mere speck of earth which he first seized upon by the right of the strongest, a centre from which he carried the sword or the snare into the dominions of his neighbors. Of education he was so destitute that he could not read; but he had a very powerful memory, much shrewdness, and great discrimination; and as he was in the daily habit of being read to in both Persian and Hindoo, it is probable that he was no great loser by his want of early tuition. Accessible to all ranks of his people, he administered justice with the utmost impartiality, at least when his own interests did not

[Runjeet Singh.]

stand in the way of an equitable decision; but in taxing, or, to speak more correctly, in plundering the people who were unhappy enough to fall beneath his sway, he was absolutely merciless. Avarice seems to have been fully as much his incentive to warfare as ambition; for he has been known to undertake a military expedition against a distant prince who had the reputation of possessing particularly fine horses, or costly jewels. Among his immensely valuable treasures of the latter kind was the celebrated *Khah-i-Noor*, or Mountain of Light, now in possession of the Queen of England. In stature he was very short, and the naturally sinister expression of his countenance was much increased by the loss of his left eye by the small-pox. His long grey tapering beard, which descended below his breast, gave him something of a venerable appearance. At his death, four of his princesses and seven slave girls were permitted to burn themselves upon his funeral pyre. Born 1779, died 1839.

SINNER, J. R., a Swiss *savant*, 1730–1787.

SIRANI, J. A., an Italian painter and engraver, 1610–79. ELIZABETH, his daughter, was also an artist, and was poisoned at the age of twenty-six.

SIRI, V., an Italian historian, 1608–1685.

SIRICIUS, a pope of Rome, 385–399.

SIRLET, F., a German engraver, died 1737.

SIRMOND, JAMES, a learned French Jesuit, was born at Riom, in 1559. For several years he taught in the college at Paris; but in 1590, Aquaviva, the general of his order, called him to Rome, and made him his secretary. On his return to Paris, he devoted himself to literary researches, and published the works of several writers in the middle ages, particularly Sidonius Apollinarius. He died in 1651, aged 92. JOHN, his nephew, historiographer royal, 1589–1649. ANTHONY, brother of the latter, a Jesuit preacher and theologian, 1591–1643.

SISMONDI. JEAN CHARLES LEONARD SIMONDE DE' SISMONDI, divided his life, as he himself says, between history and political economy. His works in the latter department are confessedly vacillating, hypothetical, and unsatisfactory; but his historical writings are very valuable, both for their matter and their liveliness of composition; and he did good service also as a critic of Italian and Spanish literature. He was the last of a noble family, which, driven from Pisa into France by republican dissensions in the fourteenth century, was again (being protestant) forced into Switzerland by the revocation of the

Edict of Nantes. He was born in 1773, at Geneva, where his father was a clergyman. After completing the usual education in his native place, he was compelled, by losses of his father on the bankruptcy of the French funds, to become a mercantile clerk at Lyons. The revolutionary disturbances drove the family about for several years, in the course of which they spent twelve months in England; and for five years, from 1795, Sismondi directed the cultivation of a small estate which his father purchased in Tuscany. In 1801, the family having returned to Geneva, he published his sensible and useful '*Tableau de l'Agriculture Toscane*.' He had also made much preparation for his historical work on Italy; but his speculations in political economy were the first to be completed. In 1807 appeared the earliest volumes of his excellent '*Histoire des Républiques Italiennes*,' which was completed, in sixteen vols., in 1818, and augmented in a subsequent edition. A series of Lectures which he delivered at Geneva, was published in 1813, and is well known in England by a translation: '*Historical View of the Literature of the South of Europe*.' In 1819 he went to England to marry a sister-in-law of Sir James Mackintosh. His principal employment afterwards, was the composition of his largest and most laborious work, '*L'Histoire Des Français*.' The first volume appeared in 1821; and he did not live to carry it farther than the reign of Louis XV. In 1822 he published '*Julia Severa*,' a short but heavy historical novel of the Fall of the Roman Empire; and a history of that period appeared in 1835. In the last year of his life he made himself unpopular at Geneva by advocating the expulsion of Prince Louis Napoleon from Switzerland. He died in his native city in 1842. [W.S.]

SISMONDI, UGO LINO, called *Buzzacherino*, a Pisan admiral, celebrated by his naval victory over the Genoese in 1241.

SIVERS, H. J., a German naturalist, 1709–58.

SIX, JOHN, a Dutch dramatic writer, known also as the friend of Rembrandt, 1618–1700. He had a relation of the same name, who translated the Psalms into Dutch verse.

SIXTUS, or XYSTUS, the name of several popes, of whom the most remarkable was Sixtus Quintus, the subject of the following article: the preceding four are—SIXTUS I., of uncertain date, say 119–128. SIXTUS II., like the former, a martyr of the Christian religion, 257 or 260. SIXTUS III., the successor of Celestine, 435, died 440, since which his name has been enrolled with the saints. SIXTUS IV., a member of the noble family of Rovere, in Savona, succeeded Paul II. 1471. He took an active part in the conspiracy of the Pazzi against the house of the Medici dukes of Florence, and ranks among the most unprincipled occupants of the papal chair. He wrote some ascetic works, and founded the Vatican library. Died 1484.

SIXTUS QUINTUS, one of the most celebrated of the popes of Rome, was descended from Slavonian parents who had fled to Italy at the period of the Ottoman conquest of their country. His father, Pereto Peretti, was a vine-dresser in the humblest circumstances, but so hopeful of the fortunes of his son that he named him FELIX or FELICE. This child was born in 1521, and educated by his uncle, Fra Salvatore, who had fortunately joined the Franciscan order of friars: before passing under his care, however, the young Felix had acted as swineherd, or in any field occupation by which a scanty addition could be made to his parents' income. Felix Peretti made great progress in scholarship and

dialectics, and being ordained priest acquired a valuable reputation by his oratory as Lent preacher in Rome, in the year 1552. His firmness in the catholic faith at this time—under trying circumstances—procured him also the friendship of the grand inquisitor, and the now rising churchman attached himself to the severe party of Ignatius and others, whose influence was then beginning to be felt. In quick succession he became commissary-general at Bologna, inquisitor at Venice, and procurator-general of his order; and these steps gained, by dint of a pushing and resolute ambition, he is said to have assumed the greatest humility, and affected the infirmities of old age; the truth of such statements, however, is denied by Ranke, who justly observes that the highest dignities are not to be won by such means. It is much more probable that Peretti's energy as a reformer of his order, and the discriminating friendship of the pope, Pius V., marked him out as a man for the epoch, and we know that he stood firmly by his favorite, whom he clothed with the purple in 1570. The son of the vine-dresser was now ranked with the princes of Italy by the title of Cardinal Montalto, and he still varied his public labors by rural occupations. We are not informed of all the circumstances attending his election to the papacy, but he succeeded Gregory XIII. in 1585, and at once commenced the administrative and social reforms in Italy that he had so long contemplated. Unlike a recent example, he carried his measures with a high and firm hand, and so vigorously enforced justice, that the instances often read more like cold-blooded cruelty: his measures had the desired effect, however, of extirpating the bandits who had so long overrun the country, and of bringing some show of order out of the general lawlessness of society. We cannot enumerate here his great enterprises in administrative reform, or the magnificence of his public works, but they all mark his passion for order and completeness. His foreign policy was of the same trenchant description; no half measures or vaporings were to be tolerated; for examples of this spirit, it may be sufficient to name the great Catholic league, and the invasion of England by the Spanish Armada. Still more surprising and gigantic were his conceptions as he grew old, as his rigid financial system enabled him to amass a large public treasure in the vaults of Saint Angelo. His designs now were sufficient to prove that he had perfected the government of his own states, and improved the discipline of the church, as an instrument of a more universal dominion than the papacy had ever reached; even the Greek church and the empire of Mahomet were destined to be transformed under his hand. Sixtus Quintus breathed his last amid these visions of grandeur on the 27th of Aug., 1590. A storm burst over the palace of the Quirinal at the moment of his death, and it became an article of the popular faith that he had achieved his enterprises by a compact with the evil one, which had then expired. [E.R.]

SIXTUS OF SIENNA, a preacher and theologian, born of Jewish parents, 1520–1569.

SIXTUS OF VESUL, JEAN PARIS, called Le Pere, a French Capuchin and Orientalist, 1736–92.

SKELTON, JOHN, one of the early poet-laureates of England, when that office was conferred as a degree at the university, was born towards the close of the fifteenth century. He was known to be curate of Trompington and rector of Dip, in Norfolk, in 1507, and is understood to have garnished his sermons with a good deal of invective against persons in authority. His poetical satires brought

down upon him the displeasure of Wolsey, who ordered him to be arrested; Skelton, however, was protected in the sanctuary of Westminster by the abbot, Islip, and died there 1529.

SKELTON, P., an Irish divine, 1707–1787.

SKINNER, STEPHEN, a philologist, was born in London, about 1622; was educated at Christchurch, Oxford; settled as a physician at Lincoln, and died in 1667. He was author of 'Etymologicon Linguae Anglicanae.'

SKYTTE, J., otherwise SCRODERUS, a Swedish senator, originally the preceptor of Gustavus Adolphus, 1577–1645. His nephew, LAURENCE, known as an ecclesiastical writer, died 1696.

SLATER, or SLATYER, WILLIAM, an elegiac poet, rector of Otterden, in Kent, 1587–1647.

SLEIDAN, JOHN PHILIPSON, an eminent German historian, was born in 1506, at Schleide, near Cologne, and completed his studies at the universities of Paris and Orleans. For many years he was confidential secretary to Cardinal du Bellay; but on espousing the doctrines of the Reformation, he settled at Strasburg, and was employed in various negotiations. Of his works the most important are, 'A History of the Reformation' and 'A History of the Four Ancient Monarchies.' Died 1556.

SLINGELANDT, PETER VAN, a famous Dutch painter, taught by Gerard Dow, 1640–1691.

SLINGELANDT, SIMON VAN, grand pensionary and treasurer-general of the United Provinces, died 1736.

SLOANE, SIR HANS, Bart., a celebrated botanist and promoter of natural history, was born in Ireland in 1660. He died in 1752. He studied medicine, but being fond of natural history, he devoted much attention to that science, and, in 1687, accompanied the Duke of Albemarle to Jamaica. A short residence in that island enabled him to collect an immense number of plants, and other objects of natural history, with which he returned to England, and commenced the practice of his profession. In this he succeeded admirably, soon acquiring a high reputation, and becoming president of the College of Physicians, and physician to George II. His love for the natural sciences continued throughout his life. He was the friend and correspondent of John Ray and most of the celebrated naturalists and philosophers of his time; and filled, with great dis-

[British Museum, founded by Sir Hans Sloane.]

inction to himself and advantage to the Society, first, the office of secretary; and, next, at the death of Sir Isaac Newton, that of President of the Royal Society. He is the author of many valuable works and treatises, amongst which are his catalogue of the plants of Jamaica, written in Latin; and his

voyage to, and natural history of, that island. He accumulated an immense store of objects of natural history, art, and antiquities, which, along with his library, consisting of 50,000 volumes and MSS., he bequeathed to the British nation, upon condition that they would pay to his family a sum of £20,000 sterling. Parliament agreeing to this condition, secured the collection, and having already become possessors of the Harleian manuscripts, and the Cottonian library, deposited them in the fine old mansion, Montagu House, which they purchased for the purpose, and thus laid the foundation of the British Museum.

[W.B.]

[Tomb of Sir Hans Sloane at Chelsea.]

**SLODZ, SEBASTIAN**, a sculptor, founder of a family of distinguished French artists, originally of Antwerp, 1655–1726. His son, **P. AMBROSE**, a designer, and professor of painting to the French Academy, died 1758. **RENE MICHAEL**, brother of the latter, a sculptor and designer, 1705–1764.

**SMALBROKE, RICHARD**, bishop of St. David's, distinguished as a controversialist, 1672–1749.

**SMALLWOOD, WILLIAM**, a revolutionary officer and governor of Maryland, 1785. Died 1792.

**SMALRIDGE, GEORGE**, bishop of Bristol, known as a theologian and Latin poet, 1666–1719.

**SMART, CHRISTOPHER**, an English poet, born in 1722, at Shipbourne, in Kent, was educated at Pembroke College, Cambridge, where he obtained a fellowship, but vacated it by marriage, and having settled in London commenced author. The gaiety of his disposition, and the buoyancy of his spirits, rendered him an acceptable companion to the wits and public writers of the day, with many of whom, particularly Pope, Johnson, Garrick, and Hawkesworth, he became intimate. He translated Pope's 'Ode on St. Cecilia's Day,' and the 'Essay on Criticism,' into elegant Latin verse; wrote a poetical version of the Psalms; a volume of original poems; 'Hannah,' an oratorio; with several odes, fables, &c. He also gave to the world, translations of the works of Horace, both in prose and verse. Poverty, however, overtook him; and his distresses, aided by intemperance, so unsettled his intellects, that he was placed for awhile under personal restraint. His 'Song to David,' written in a madhouse, and partly with charcoal, on the walls of his cell, bears a melancholy attestation to the strength of his mental powers, even in their derangement. He died, within the rules of the king's bench prison, in 1771.

**SMEATHMANN, HENRY**, an English naturalist and traveller in Africa, 1750–1787.

**SMEATON, JOHN**, a man of rare talent, who occupies a most conspicuous place in the history of civil engineering. He was among the first who styled himself 'civil engineer,' and to no name of more unimpeachable character or higher talent can members of the profession point as its type. Smeaton was born in 1724, at the dawn of the epoch of Britain's first display of commercial and manufacturing vitality. As a mere boy he showed his bent to the mechanical pursuits. In 1742 he came to London, to attend the courts of law in Westminster, in pursuance of his father's design to make him an attorney like himself; but, in 1750, we find him established as a philosophical instrument maker in Great Turnstile, Holborn. The sapling had taken its bent, and nature was too strong for any effort of authority to give the tree another form. In 1752 and 1753, he made the experiments 'concerning the natural powers of water and wind to turn mills, and other machines depending on circular motion,' from which resulted the most valuable improvements in hydraulic machines, and which remain to this day a standard of the philosophical process of inquiry into practical questions. For this essay Smeaton received the Copley gold medal of the Royal Society in 1759, of which he had been made a member in 1753, in acknowledgment of previous contributions to its transactions. In 1754, Smeaton travelled in Holland and the Netherlands, and there no doubt acquired a most important part of the engineering education, which qualified him to occupy the conspicuous position he afterwards did as standing counsel of his profession. In 1756, Smeaton commenced the great work which more than any other may be looked upon as a lasting monument of his skill—the Eddystone lighthouse. Two lighthouses had been erected on the Eddystone Rock before Smeaton's admirable structure, of which the first was swept away in a storm, and the second, which was of timber, was destroyed by fire in December, 1755. The cutting of the rock, for the foundation of the building, was commenced August, 1756. The first stone was landed June 12, 1757.

[Smeaton.]

The building was finished October, 1759, and the lantern lighted for the first time on the 16th of that month. In all, there were 421 days' work upon the rock. This, Smeaton's first work, was also his greatest: probably the epoch of its erection, and other circumstances considered, it was the most arduous

undertaking that has fallen to the lot of any engineer to execute, and none was ever more successfully accomplished. And now having been buffeted by the storms of nearly 100 years, Smeaton's work stands unmoved as the rock it is built on, a proud monument to its great author. Robert and Allan Stevenson have erected the Bell Rock and the Skerry-Vor lighthouses since, but distinguished as is the merit due to these men, they have readily testified as to who taught the first great lesson, and what was their example and standard of excellence. Smeaton's reports on the works he executed or advised to be carried out, were published in 1812, under the supervision of the Society of Civil Engineers, founded in 1771 by Smeaton and his friends. These reports are a mine of wealth for the sound principles they unfold and the able practice they exemplify, both alike based on close observation of the operations of nature, and affording examples of cautious sagacity in applying the instructions she gives by means within the reach of art. Smeaton perfected the atmospheric steam engine, but lived to see the far greater improvements of the steam engine by James Watt come into extensive operation. Smeaton dedicated his spare time to philosophical study and investigation, and had an astronomical observatory at Austhorpe near Leeds, his birth-place. Here, on the 16th September, 1792, while walking in his garden, Smeaton was seized with an attack of paralysis, and on the 28th October he died.

SMELLIE, WILLIAM, a Scotch surgeon and physician, who distinguished himself as a lecturer and practitioner in midwifery in London, died in 1763. He wrote a 'Complete System of Midwifery,' and published a set of 'Anatomical Tables, with Explanations.'

SMELLIE, WILLIAM, a printer at Edinburgh, distinguished also as a man of science and learning, was born in 1740. He was the translator of Buffon's Natural History, and author of the 'Philosophy of Natural History,' and of many other ingenious works. He was a fellow of the Royal Society of Edinburgh, and was much esteemed among the literati of his native city, where he died in 1795.

SMIBERT, JOHN, a British portrait painter, who accompanied Bishop Berkeley to Newport, R. I., and married and settled there; died 1751. His son, NATHANIEL, died at an early age, having already given great promise as an artist.

SMIDS, LUDOLPH, a German poet, 1649-1720.

SMIRKE, ROBERT, Esq., R. A., was born at Wighton, near Carlisle, in 1752; entered, at the age of 19, as a student at the Royal Academy (then in its infancy); where in 1786 he first became an exhibitor, and in 1792 was elected one of its members. His pictures, generally speaking, were of an historical or imaginative character, his favorite subjects being taken either from the sacred writings, English history, the works of Shakspeare, Cervantes, or other eminent authors. Died January 5, 1845.

SMITH, ADAM, a very great name in Scottish Literature; distinguished even amid those of the best writers and philosophers; and which will recall to all ages, as it now does to every civilized nation, the Man who by the authority of Reason laid the foundations of the Freedom of Industry, and of unfettered Commerce among States. Smith was born at Kirkcaldy in Fifehire on 5th June, 1723: in 1737 he entered the university of Glasgow, where he studied under Hutcheson: from Glasgow he passed to Balliol College, Oxford, returning to Edinburgh in 1748. In 1751, he obtained the Chair of Logic in his Alma-Mater; and in the subsequent year he

was nominated to the professorship of Moral Philosophy. It is unnecessary to record that his genius threw around this ancient University the greatest splendor of which it yet can boast,—an assertion not to be modified, even although his successor was REID. Resigning his chair in 1763, he accompanied the young duke of Buccleuch to the continent—meeting in Paris, along with his old companion HUME, the distinguished Economist and Statesman, TURGOT and the celebrated QUESNAY. Probably first moved thereto by his intimacy with Hume—who, some time previously had published his exquisite *Political Essays*—Smith had long turned his thoughts to the momentous subject which afterwards engrossed them; and his interest in it must have been greatly deepened by intercourse with the founders of that famous French School, which first aimed to reduce all Problems concerning the Public Riches, into the form of a Science. At all events, on his return to Scotland in 1766, he retired to his native town; and after ten years of undisturbed meditation, he produced his imperishable work, '*On the Nature and Causes of the WEALTH OF NATIONS.*' In just tribute to the extraordinary deserts of the Author of the '*Inquiry*,' Government bestowed on Smith a lucrative and not laborious Fiscal office. He fixed his residence thereafter in Edinburgh, where he died on 8th July, 1790. As a Man, Smith left behind him the truest testimony to his worth—viz., the best minds of his country mourning for their lost friend. He was simple and sincere, earnest in his beliefs, indefatigable in work; nor do many of the old anecdotes that still circulate regarding his *absence* and abstraction, fail to do their part in enabling us to complete a picture of him. Besides his great works, the *Theory of the Moral Sentiments* and the *Wealth of Nations*, he left a few philosophical Essays, among which is a precis of the early History of Astronomy, most exact, penetrating, and beautiful. He had been engaged for many years on another work, that promised to be of higher moment than even the *Wealth of Nations*—viz., a Treatise of Civil and Political Law—meaning to trace at once the History and the Theory of Law, from their obscure commencements, in the infancy of Society and in the Human Reason, up to their highest developments. It is only the student of Smith's actual works, who can conceive the amount of detriment to Science involved in the loss of such a Treatise. No fragments of it remain. We hasten to offer a brief account of the two great and completed investigations whose titles are as above. I. Disciple of Hutcheson, the Author of the *Theory of Moral Sentiments*, is in clear revolt against the moral doctrine of HOBBS—viz., that the foundation of Morality is the feeling of Self-interest, and also against the somewhat broader scheme of Utility, as propounded by Hume. Concurring with his Master, that we must seek that foundation in disinterested sentiment, he does not concur with him, that the required sentiment is *Benevolence*. In Smith's view the foundation of Morals is in *Sympathy*: we feel, he says, that conduct right on the part of another, with which we sympathize; and we hence infer that such acts on our own parts, alone can be right, with which others sympathize. However narrow and singular this principle may seem as a basis, the skill, clearness, feeling and eloquence, with which the theory is developed, will ever attract admiration: nor perhaps is any portion of its development more ingenious and striking, than where Smith shows, how *Reason*—working on the ground of primal feeling—gradually forms the *rules* of Morality,—*involuntarily*,

almost, classifying the *virtues*; and so impressing on the mind those rules and classifications, that, in acting, we seldom or never require to *recur to consideration of the fundamental sentiment*. Amidst the pleasure, however, with which we go along with these deductions, one very important question cannot fail to occur,—May not something of the same kind be established, with regard to any other supposed foundation of morality? If—accepting *sympathy* as that foundation—we really *act* through rule, and a direct sense of the obligation of the several virtues, and *not because of any immediate feeling of sympathy*; can it justly be averred against the moralists who claim Utility or Self-interest, as the simple or ultimate basis, that they are ever acting *with direct eye to Self-Interest*? There is a truth here which sadly damages the scaffolding beneath certain declamatory criticisms!—The errors of Smith's system are two. *First*, deriving the sense of right from sympathy with others, it pronounces, that no one can have a sense of right unless through intercourse with others; and that the quickness of that sense must be proportionate to the extent of such intercourse. The Author of the Theory, adopts this conclusion, and ingeniously but vainly defends it. The feeling of right, has sanctions in the Human Soul, which transcend every thing that concerns intercourse with our fellows. *Secondly*, Like Hutcheson's scheme of Benevolence, and the doctrine of Utility itself, the Moral Theory of Sympathy, is quite too narrow; mistaking an important moral *motive*, for the Supreme Faculty which weighs all motives, and determines Moral *Action*. The Supreme Faculty has been termed *Conscience*: we prefer to designate it with *Kant*—the PRACTICAL REASON: it is the Energy through whose unchallengeable supremacy, the philosopher of Königsberg first discerned that REALITY, which is the awful counterpart of the Subjective IDEA of GOD.—II. The 'Inquiry into the Nature and Causes of the Wealth of Nations,' stands to the Science it created, in the relation held by the labors of Lavoisier, to Chemical Science, or the combined discoveries and investigations of Copernicus, Kepler, and Newton, to Astronomy. Previous to the era of Adam Smith, all Economic Theories rested on some abstract principle, demonstrated by no induction, but merely assumed as true; in other words, a principle expressive of the common notions of the time. It was reserved for the great Scotchman to appeal for its foundations, to Observation, and Experience analyzed by Reason; to apply in this case the strictest rules of Philosophic Induction; and, on the basis so discovered, to rear a permanent structure. It is not requisite now, neither would available space permit us, to follow Smith in this conscientious research. It is matter of common knowledge, how clearly he discerned, and how firmly he established, the truths that all things coveted by men are the produce of labor, and that the quantity of labor employed in their production is the real measure of value: nor have we leisure to trace, the fine and continuous reasoning which led him from these simple and indubitable, but formerly unnoticed Principles, to the ultimate Laws which determine the economic prosperity of Nations. His achievements were indeed exhaustive, as the bare contents of his Treatise suffice to show. It consists of five sections. In the first he discusses the general causes of the formation, increase, and decline of Public Riches, and of their distribution among the various classes of men, who make up a modern Society. Next he analyzes the nature of Capital, explaining the mode in which it gradually accumulates, and the

nature of its efficacy in the production of Wealth. The third and fourth sections are occupied in examining the various theories or abstract doctrines in Political Economy, that have successively prevailed at different epochs of History and among various Nations; and in determining their influence—good and evil—over the development of the arts and agriculture, of industry and commerce. Finally, we have a searching glance at the nature of Public or State Revenue, and inquiries concerning the best and justest means of raising it by taxation. It is the peculiarity of Smith—indeed of every sound thinker on such subjects—that at every step not only of his inductive, but also of his *deductive* processes, he looks far around him over Society, as well as deeply into the nature of Man: so that what he writes may be sustained alike by experience and principle; and few men have ever possessed in so remarkable a degree, the power to *analyze experience*—to separate the causes of complex phenomena, and assign to each the portion of the result which is due to it. So rich is it in Historic criticism and illustration, that the *Wealth of Nations* is admitted by every reader to possess a charm belonging to scarcely any work of the same kind, that either preceded or has followed it. With the exception of *one* very recent Thinker, who possesses at once an amount of political and historical knowledge and power of discernment, not inferior to Smith's, the English writers on this subject, since the publication of the Classic Treatise, have rather been keen logicians than observers: and perhaps the highest compliment that can be paid to the *Wealth of Nations*, lies in the fewness and comparative unimportance of the modifications, which any of its conclusions have undergone, even from the scrutiny of such men as Ricardo, Malthus, and James Mill.—Smith in his lifetime reaped a deserved celebrity. On its first publication, the *Inquiry* was hailed as the Organon of a new Science, and rapidly translated into every language within civilized Europe. And ever since, it has been adding triumph to triumph; prejudices, one after another, falling before its force; and men and nations, in proportion as they acknowledge its worth, becoming more and more bound in brotherhood. Is, then, this remarkable monument complete;—shall Smith's doctrines, unmodified, continue to govern the policy of States? A question not lightly to be answered! The relations of the classes within Society are changing; and sentiments practically unknown in Smith's time, are pressing upward into sway. There is one great Element, even towards the production of the Wealth of a People, of which, in this memorable work, one misses notice. Among Machines, what one is equal in might or productiveness to the Human Brain? And how fares this, under the stern and withering action of the *Division of Labor*? It is foolish to throw aside questions of this sort, under the pretence that they smell of *Socialism*. The man would be daring who should deny, that under an organization permitting the culture and employment by every one, of all his Human Faculties, no Nation could fail to increase immeasurably in Wealth, as assuredly it would in Dignity and Happiness. [J.P.N.]

SMITH, ANKER, an Eng. engraver, 1759–1819.

SMITH, CHARLOTTE, a novelist and poet, whose maiden name was Turner, was born in Sussex, in 1749. At the age of 16 she married a West India merchant, who was subsequently ruined; and her pen, which she had used before merely for her amusement, now became the support of her husband and

family. Her first production was entitled 'Elegiac Sonnets and other Essays.' After this, she published 'The Romance of real Life;' the novels of 'Emmeline,' 'Marchmont,' 'Desmond,' 'Ethelinda,' 'Celestine,' and 'The Old Manor House;' besides several poems, and tales for youth; all of which were well received. Died 1806.

SMITH, EDMUND, a dramatic wr., 1668-1710.

SMITH, ELIHU HUBBARD, an American physician of Connecticut, editor of the New York Medical Reports, 1771-1798. He was the author of an opera entitled 'Edwin and Angeline.'

SMITH, ELIZABETH, a young lady of extraordinary accomplishments, the daughter of a gentleman residing at Burnhall, near Durham, was born in 1776. According to Miss Bowdler's memoir of her, she possessed a knowledge of the mathematics, and an exquisite taste for drawing and poetry; understood the French, Italian, Spanish, and German languages; made herself acquainted with the Latin, Greek, Hebrew, Syriac, Arabic, and Persian; and was thoroughly versed in biblical literature. She died of consumption in 1806. Her translations of the book of Job, and the life of Klopstock, have been published.

SMITH, GEORGE, a paint., was born at Chichester, in 1714. He excelled in landscape, and some of his pieces gained prizes from the Society of Arts. D. 1776.

SMITH, GEORGE WILLIAM, Governor of Virginia in 1811, was destroyed by the burning of the Richmond theatre in 1811.

SMITH, HENRY, a Ch. of England divine, whose eloquence rendered him highly popular, 1550-1600.

SMITH, Sir JAMES EDWARD, an eminent English physician and naturalist, was born at Norwich, in 1759; studied medicine at Edinburgh, and took his degree at Leyden, in 1786; visited France and Italy; and, on his return to England, published 'A Sketch of a Tour on the Continent,' 3 vols., in which there is much information on subjects of natural history. He established the Linnæan Society, and was its first president; received the honor of knighthood from George IV., and died in 1828, at his native city, where he had long practised as a physician. Besides his 'Tour' before mentioned, he wrote a 'Natural History of the Lepidopterous Insects of Georgia,' 2 vols. folio; 'English Botany,' 36 vols. 8vo.; 'Flora Botanica,' 3 vols. 8vo.; the 'English Flora,' 4 vols. 8vo.; and an 'Introduction to Botany.'

SMITH, JAMES and HORACE, a celebrated literary duumvirate, were the sons of Robert Smith, solicitor to the board of ordnance, and born respectively in London, Feb. 10, 1775, and Dec. 31, 1779. James was articled to his father, was subsequently taken into partnership, and eventually succeeded to his business as well as to his official appointment. Horace became a member of the stock exchange. Perhaps no two situations in life could at first sight appear less favorable to the cultivation of the muses than a lawyer's desk and Capel Court; but James and Horace Smith triumphed over obstacles that would have crushed less genial natures, and went on from step to step till they left their names deeply graven in the literature of their time. Their first effusions were contributed to the Pic Nic newspaper, established by Colonel Greville, in 1802. They also wrote largely for the Monthly Mirror and the London Review, and some of their best vers de société appeared in the New Monthly Magazine, while under Thomas Campbell's editorship. But the work by which the brothers are best known, and by which they will be longest remembered, is the 'Rejected Addresses,' which appeared on the reopening of

Drury Lane Theatre in 1812, and of which twenty-two editions have been sold. The popularity of this work appears to have satisfied the ambition of the elder brother. But soon afterwards Horace became an indefatigable novel writer. He commenced his novels with 'Gaieties and Gravities,' in 1825, and ended them with 'Love and Mesmerism,' in 1845; and within these twenty years he also gave to the public 'Brambletye House,' 'Tor Hill,' 'Reuben Apsley,' 'Zillah,' 'The New Forest,' 'Adam Brown,' &c., all of which were well received. James Smith died in London, Dec. 24, 1839; Horace died at Tunbridge Wells, July 12, 1849.

SMITH, JAMES, esq., of Deanston, a name intimately associated with agricultural and manufacturing improvement, was born in Glasgow, 1789. While only a youth of 18, he had attained such a thorough knowledge of all the intricacies both of mechanics and cotton-spinning, that his uncle gave him the entire management of the extensive cotton works at Deanston, in which he was a partner; and he soon afterwards began to put in practice on the Deanston farm various schemes for thorough draining and deep working, which have since been so generally adopted. In 1831 he published a pamphlet on this subject which attracted great attention; and since that period he rose so highly in public estimation, that he became an authority on all questions connected with agricultural pursuits. In 1848 he was one of the commissioners appointed by Sir Robert Peel to inquire into and report upon the sanitary condition of the manufacturing towns; and the schemes of improvement which he suggested can hardly fail of their effect. Died June 9, 1850.

SMITH, JAMES, a signer of the American Declaration of Independence and a lawyer, was born in Ireland, but emigrated to America at an early age, and settled in Pennsylvania. Died 1806.

SMITH, JOHN, a physician, 1630-1679.

SMITH, JOHN, a learned divine, author of 'Ten Discourses on Theological Subjects,' 1618-1652.

SMITH, JOHN, a mezzotinto engraver, abt. 1700.

[Captain John Smith.]

SMITH, JOHN, known as CAPT. JOHN SMITH, or SMYTH, a military officer and traveller, whose life is intimately connected with the history of New England and Virginia, 1579-1631.

SMITH, or SMYTHE, JOHN, an ambassador, traveller, and writer on military weapons, 16th c.

SMITH, JOHN, an English divine and antiquarian, editor of an edition of the Venerable Bede, 1659-1715. His son, GEORGE, who completed the latter work, was author of a book entitled 'Britons and Saxons not Converted to Popery,' 1693-1756.

SMITH, Rev. Dr. JOHN, an eminent antiquarian and Celtic scholar, was born at Glenorchy, in Argyleshire, in the year 1747; completed his studies at the university of St. Andrews; and, in 1774, was appointed assistant and successor in the parish of Kilbrandon, Lorn, where he preached for seven years with great zeal and effect. About this time he translated into Gaelic 'Alleine's Alarm,' and the 'Catechisms of Dr. Watts,' besides other small works. In 1781 he became minister of Cambelton. Soon after his settlement in this parish, he published his 'Essay on Gaelic Antiquities, containing the History of the Druids, particularly those of Caledonia,' 'A Dissertation on the Authenticity of the Poems of Ossian,' and a 'Collection of Ancient Poems, translated from the Gaelic.' In 1783 he published a work on the last judgment, editions of which have been published in England and America. About this time he was associated with the Rev. Dr. Stewart, minister of Luss, in translating the Scriptures into Gaelic. While engaged in translating the Scriptures, Dr. Smith, in studying the original, was led to write a concise commentary on the whole of the Bible. In 1787 he published the portion of it which embraced the prophets, and several editions of it were published both in England and America. Horne, in his introduction to the Study of the Scriptures, mentions it with approbation, and says that the Bishop of London was in the habit of recommending it to his clergy. In 1787 he published the 'Life of St. Columba, the apostle of the Highlands,' extracted from the Latin of St. Adamnan, &c. About the same time he published a new and improved edition of the Psalms in Gaelic, also a translation of the paraphrases used in our English psalm books. He also published a 'Dissertation on the Nature and Duties of the Sacred Office.' Besides his unwearied labors for the spiritual improvement of the people committed to his care, he was eager to introduce among them an improved system of husbandry. With this view he wrote many essays on the subject, and frequently obtained prizes from the Highland Society. He wrote a 'Survey of the County of Argyle,' of which a second edition was published. Died 1807, age 60.

SMITH, JOHN, an eminent London banker, and for upwards of thirty years a member of the House of Commons, was born in the year 1767. He was first returned to parliament in 1802 as member for Wendover, from 1806 to 1818 he sat for Nottingham, and from that time till 1830 he represented Midhurst. He subsequently came in as one of the members for Buckinghamshire, but at the dissolution in 1835 he retired from parliament. He always maintained Whig principles, and gave his support to the reform party. Mr. Smith was an East India proprietor and connected with many public institutions. Died Jan. 1842, age 75.

SMITH, DR. JOHN PYE, was a native of Sheffield, where he was born in 1775. His father was a bookseller, and young Smith, from his facility of access to books, early acquired a strong taste for reading, which furnished him even in boyhood with a large stock of miscellaneous knowledge, though from the nonconformist principles of his family, it was chiefly directed to the works of the Puritan divines. Hav-

ing shown a decided bias for the ministry as his future profession, he was entered a student of the dissenting college, at Rotherham, under the superintendence of the able and learned Dr. Williams. He was, on the completion of his term of study, appointed classical master of that institution; and so much satisfaction did he give in the performance of his academical duties, that he was transferred in a few years to the higher and more important college of Homerton, first in the classical and ultimately the theological chair. At an early period of life, he determined to produce a work on one of the leading doctrines of the Christian Religion. And the influence of Priestley's writings having been productive of much evil in shaking the faith of many as to the divinity and atonement of Christ, he set himself to the composition of a work which should furnish a full answer and refutation of the Socinian heresy. This book, which he entitled 'The Scripture Testimony to the Messiah,' was hailed by all denominations as a most valuable contribution to theological literature; and by the acuteness and force of its reasoning, as well as by its extensive erudition, raised the author to the foremost rank of British divines. He was complimented through Dr. Dwight of Yale College, America, with the honorary degree of D.D. A supplementary volume was published in 1818, consisting of 'Four Discourses on the Priesthood of Christ.' Dr. Smith was led to direct his researches into various departments of the great field of science, especially into that of geology, and being deeply interested in the bearing of that new science, on the truth of the Mosaic Record, he published in 1839 a treatise entitled 'The Relation between the Holy Scriptures and some parts of Geological Science.' Dr. Smith, after discharging the duties of the theological chair at Homerton for the long period of fifty years, resigned his professorship in 1850, and at a public breakfast to which he was invited, he received from his friends a most gratifying and honorable testimonial in the form of £2,600 subscription for the aid of students in divinity to be called the Smith Scholarship. His death took place early in the following year in Southwark. [R.J.]

SMITH, JOHN STRAFFORD, a famous composer of glees, anthems, and madrigals, died 1836.

SMITH, JOHN THOMAS, keeper of the prints and drawings in the British Museum, a miscellaneous and antiquarian writer, 1766-1833.

SMITH, JOHN, an American divine and scholar, professor in Dartmouth College, Massachusetts, author of a Hebrew and Greek grammar, with other works, 1752-1809.

SMITH, JOHN BLAIR, first president of Union College, in the state of New York, 1756-1799.

SMITH, JOHN COTTON, governor of Connecticut in 1812, a member of the first Congress assembled at Washington, and president of the American Bible Society, died 1845, aged 80.

SMITH, JUNIUS, an American merchant, born in Connecticut, who interested himself in the establishment of Trans-Atlantic Steam Navigation, and was the getter up of the Steam-Ship Company, of which the British Queen and the unfortunate President were the pioneers. He strove to introduce the culture of the tea plant into the United States. D. 1853, a. 72.

SMITH, MILES, a learned prelate, one of the ministers employed in translating the Bible, 1568-1624.

SMITH, NATHANIEL, an American physician, anatomist and medical writer of Mass., 1762-1829.

SMITH, RICHARD, a Roman Catholic divine and professor at Douay, born in Worcestershire 1500, died 1563. The principal circumstance recorded

of him is his attendance at the burning of Ridley and Latimer.

SMITH, RICHARD, a Roman Catholic divine and controversial writer, 1566-1655.

SMITH, RICHARD PENN, an American dramatic writer and novelist, died 1854.

SMITH, R. A., a Scotch musical composer, whose works, sacred and secular, bear testimony to his high genius and prolific industry. His compositions are likely to maintain their place among the national music of Scotland, 1780-1829.

SMITH, ROBERT, a divine and mathematician, born in 1689, was educated at Trinity College, Cambridge, of which he became master on the death of Dr. Bentley; and was mathematical preceptor of the Duke of Cumberland. He wrote 'A System of Optics,' 2 vols. 4to.; and 'Harmonies, or the Philosophy of Musical Sounds.' Died 1768.

SMITH, ROBERT, first bishop of the Episcopal Church of South Carolina, consecrated in 1795, died 1801.

SMITH, ROBERT PERCY, brother of the Rev. Sydney Smith, was one year his junior, and survived him only about a fortnight. He was a barrister-at-law, and had formerly been advocate-general of Bengal and M. P. for Lincoln. In wit, learning, and originality, he was every way fitted for the companionship of his critical relative. At Eton he was the intimate associate of Canning, Frere, and Lord Holland; and at Cambridge he obtained the highest classical honors. In 1797 he was called to the bar. He was nine years in Bengal as advocate-general, discharging the duties of his office with credit to himself, and satisfaction to the inhabitants. On his return from India he entered parliament as member for Grantham; he afterwards represented the city of Lincoln, and finally retired in 1826. Died, March 10. 1845, aged 75.

SMITH, S., a presbyterian writer, born 1588.

SMITH, Sir WILLIAM SIDNEY, G.C.B., a chivalric and far-famed British admiral, was the son of a captain in the army, John Spencer Smith, esq., of Midgham, Sussex, where he was born, 1764. He received his education chiefly under Dr. Vicesimus Knox, of Tunbridge School; but manifesting a great desire for a naval life, he was sent, before he was twelve years of age, as a midshipman on board the Sandwich, under Lord Rodney. In 1780 he became a lieutenant; in 1782 a commander; and in 1783, obtained post rank, with the command of the Nemesis, of 28 guns. The American war having just been brought to a close, and there being no opportunity of acting in the navy of his own country, the young captain (who was not quite twenty) entered, with the permission of his sovereign, into the service of the king of Sweden, who presented him with the grand cross of the order of the sword, for the skill and energy he displayed on several occasions, particularly in an attack on a Russian flotilla, a great part of which he destroyed. A peace between Sweden and Russia again threw him out of active life, and he travelled into the south of Europe. Hearing that Lord Hood had got possession of Toulon, he hastened thither, and offered his services. Soon after his arrival it was determined to evacuate the city; and the destruction of the ships of war, which could not be carried off, was intrusted to Sir Sidney, who performed the difficult and hazardous exploit with signal ability. He was now appointed to the command of the Diamond frigate, of 38 guns, in which, with a small flotilla under his direction, he greatly annoyed the enemy; but in a gallant attempt to cut out a ship at Havre-

de-Grace, he was taken prisoner, and, on pretence of having violated the law of nations, by landing assassins in France, he was confined for two years in the prison of the Temple, at Paris. At length, by the address and intrepidity of a French officer, named Phillippeaux, and two of his friends, Sir Sidney's escape was somewhat mysteriously effected. An order of the minister of the day was forged, directing the gaoler of the Temple to deliver to the bearers Le Chevalier Sidney Smith, for the purpose of transferring him to another prison; and having thus far succeeded, he and Phillippeaux proceeded, by means of false passports, to Rouen, and thence in an open boat to the Channel, where they were taken up by the Argo frigate, which soon landed them at Portsmouth. In 1798 he sailed in the Tiger of 80 guns for the Mediterranean, to assume a distinct command, as a commodore, on the coast of Egypt. In March, 1799, he proceeded to St. Jean d'Acre; and, on the 16th, captured a French flotilla, the guns of which he employed in the defence of Acre, against Buonaparte, who invested it two days after. Many fierce contests followed, and the French repeatedly endeavored to carry the place by storm; but the determined valor of the British commodore and his gallant band, assisted by the troops of Hassan Bey, frustrated every attempt. Buonaparte having quitted Egypt, Sir Sidney negotiated with General Kleber for the evacuation of the country, and by a treaty signed at Al Arisch, that desirable event was agreed to; but, though highly advantageous, the British government refused to abide by it. In 1801 he co-operated, at the head of a party of seamen, with the army sent out to Egypt under Abercromby; and he was wounded in the battle which proved fatal to that gallant general. On his return to England he received a valuable sword, with the freedom of the city, from the corporation of London; and at the general election, in 1802, he was returned to parliament as one of the representatives for Rochester. He was subsequently employed in the Mediterranean and South America, where his gallantry and skill were conspicuously displayed down to the close of the war. On his return to England, in 1814, he was presented with the freedom of Plymouth; in the following year he was made a knight commander of the Bath; in 1821, a full admiral; and, in 1830, he was appointed lieutenant-general of marines, succeeding therein his late majesty William IV. We have yet to notice that in 1814, he endeavored to procure, from the congress of Vienna, the abolition of the slave trade, and a conjoint attack of the sovereigns upon the piratical states of Barbary; but his laudable exertions proved fruitless. He then formed at Paris an association called the Anti-Piratic; and there is reason to believe that the objects it expressed and the principles it espoused had considerable weight in rendering the subjugation of Algiers a popular measure in France, if it did not immediately lead to that event. At the close of the war Sir Sidney's services were rewarded with a pension of 1000*l.* a year. A more chivalric character than Sir Sidney Smith is not to be found among the heroes of modern times, and those who recollect his brilliant career will be ready to subscribe to the eulogium passed on him by his biographer, E. Howard, esq., 'All his public actions seem to have been less the offspring of mere military calculation and naval science, than of the intuition of the most romantic courage and the highest moral feeling, always controlled by prudence and intrepidity, that no danger, however sudden, could surprise, and no

difficulty, however menacing, vanquish.' There was a time when his very name, like that of Nelson, struck terror into our enemies; and his constitutional activity kept him constantly on the alert to take advantage of every opportunity to harass and annoy them. He died at his residence in Paris, on the 26th of May, 1840, aged 76.

SMITH, SAMUEL STANHOPE, an American divine, president of Princeton College, and a religious historical and ethnological writer, 1750-1819.

SMITH, SAMUEL, an American historical writer, author of a 'History of New Jersey,' died 1776.

SMITH, the REV. SYDNEY, M. A., canon residentiary of St. Paul's, rector of Combe Florey, Somersetshire; who, for half a century, rendered himself conspicuous as a political writer and critic, was born at Woodford in Essex; received his education at Winchester College, and was thence elected to New College, Oxford, in 1780. He commenced his ministry as curate of Netheravon, Wilts; but relinquished it soon after, in order to travel with the son of Mr. Hicks Beach, M. P. for Cirencester; which event, and its immediate consequences, he thus humorously describes in the preface to his collected writings:—'When first I went into the church I had a curacy in the middle of Salisbury Plain. The squire of the parish took a fancy to me, and requested me to go with his son to reside at the university of Weimar. Before we could get there, Germany became the seat of war, and in stress of politics we put into Edinburgh, where I remained five years. The principles of the French revolution were then fully afloat, and it is impossible to conceive a more violent and agitated state of society. Among the first persons with whom I became acquainted were Lord Jeffrey, Lord Murray (late lord advocate for Scotland), and Lord Brougham; all of them maintaining opinions on political subjects a little too liberal for the dynasty of Dundas, then exercising supreme power over the northern division of the island. One day we happened to meet in the eighth or ninth story or flat in Buccleugh Place, the elevated residence of the then Mr. Jeffrey; I proposed that we should set up a 'Review:' this was acceded to with acclamation. I was appointed editor, and remained long enough in Edinburgh to edit the first number of the Edinburgh Review.' He soon after removed to London, and though the editorial department fell into the hands of Mr. Jeffrey, he continued for many years one of the most active contributors to this celebrated organ of Whig principles. During his residence at Edinburgh, Mr. Smith was minister of the episcopal church there; and when he settled in London, he became in every sense of the word 'a popular preacher,' who could at once delight and instruct the crowded assemblages of wealth and fashion that resorted to the west-end chapels. Nor were his oral eloquence, wit and learning confined to the pulpit alone; with equal success he displayed his abilities as a lecturer on the *belles lettres* at the Royal Institution, his fame increasing with every fresh effort of his genius. During the Perceval administration, Mr. Smith's activity as a political writer was at its height; and it was thought that the celebrated and amusing 'Letters of Peter Plymley,' which he produced at that period, did more in effecting 'Catholic emancipation,' than any, or perhaps all, of the numerous publications that issued from the press. Throughout his whole career, indeed, he exerted himself in favor of 'liberal' measures; or, if we may use his own words, he 'always endeavored to fight against evil.' His last literary efforts were made in denouncing the re-

pudiators of Pennsylvania. His 'Contributions' to the Edinburgh Review and various other productions of his fertile and witty pen have been collected, and have gone through numerous editions; and, more recently, his 'Sketches of Moral Philosophy,' or lectures upon that subject, delivered at the Royal Institution, have been published. He died Feb. 21, 1845, aged 76.

SMITH, THOMAS, chaplain to the English embassy at Constantinople, author of an Account of the Turks, a Life of Camden, &c., 1638-1710.

SMITH, THOMAS, a landscape painter of Derby, died 1769. His son, JOHN RAPHAEL, celebrated for his crayon portraits and mezzotinto engravings, died 1812.

SMITH, SIR THOMAS, a learned English statesman, historian, and critic, was born at Saffron Waldon, in Essex; and after having been Greek professor and university orator at Cambridge, became secretary of state in the reigns of Edward IV. and Elizabeth. Born 1512; died 1577. His 'Commonwealth of England' is the book by which he is best known.

SMITH, W., rector of Trinity church, Chester, author of poems and translations, 1711-1787.

SMITH, WILLIAM, a heraldist, died 1618.

SMITH, or SMYTH, WILLIAM, a learned prelate, founder of Brasenose College, Oxford, the plan of which he concerted with his friend, Sir R. Sutton, died 1514.

SMITH, WILLIAM, who for 46 years was a member of the House of Commons, and the leading advocate of the Dissenting interest, first entered Parliament in 1784, as M. P. for Sudbury, and in 1802 was returned for Norwich. From the commencement of his senatorial career he was the consistent supporter of liberal measures, and the advocate of all reforms calculated to promote the happiness of the human race. Died 1835, aged 79.

SMITH, WILLIAM, LL.D., F.G.S., an eminent geologist, was born at Churchill, in Oxfordshire; and at the outset of his career he studied geology and land-surveying. In 1806 he published 'A Treatise on Irrigation,' in which his geological studies and discoveries had enabled him to make some importantly valuable improvements. From this time he rapidly and steadily rose into notice in the scientific world. In 1808 his collection of organic remains was visited and carefully examined by the president and principal members of the Geological Society; and in the first volume of the society's Transactions, which appeared in 1811, his discoveries, are prominently and favorably noticed. But it was not until 1815 that he gave to the world the long promised and much desired 'Delineation of the Strata of England and Wales,' in the form of a handsomely engraved map. This publication led to the purchase, in the same year, by the British Museum, of the whole of his organic remains; and the task of arranging and describing this curious and valuable collection caused him to publish 'Strata Identified by Organised Fossils' and a 'Stratigraphical System of Organised Fossils.' From 1815 to 1825, Mr. Smith published twenty geological maps of various counties of England, delivered a series of lectures in several provincial towns, and travelled from place to place in search of new facts, having, for a long time, 'scarcely any home but the rocks, except one year which he passed at Kirkby Lonsdale, in Westmoreland.' In 1835 the degree of LL.D. was conferred upon him by Trinity College, Dublin. But though careful, he became embarrassed; and it was at length well known to his scientific friends

and other influential persons, that this excellent and highly-gifted man, now fast falling into the 'sere and yellow leaf' of age, was without the means of procuring even the common comforts of life. An application was accordingly made to the crown by his zealous friends, and a pension of £100 per annum was immediately bestowed upon him. Born 1769; died 1840.

SMITH, WILLIAM, an American divine, and first provost of the College of Philadelphia, died 1803. Author of various miscellaneous works.

SMITH, WILLIAM, colonial chief justice of New York, and author of a history of that province, died 1769. A continuation of his father's work was written by his son William S.

SMITH, WM. LOUGHTON, an American statesman, diplomatist and political writer, born in South Carolina, died 1812.

SMITHSON, JAMES, the founder of the Smithsonian institution at Washington, an Englishman, the illegitimate son of the Duke of Northumberland, died in 1829, bequeathing the bulk of his large property to the United States of America, 'to found,' in the words of his will, 'at Washington, under the name of the Smithsonian Institution, an establishment for the increase and diffusion of knowledge among men.'

SMOLLETT, TOBIAS, was the grandchild (by a younger son) of Sir James Smollett, of Bonhill in Dumbartonshire, and was born in that county in 1721. He was educated in Glasgow for the medical profession; but he attended more to literature, wrote a tragedy in his eighteenth year, and soon afterwards, by his grandfather's death, was left to his own resources, and sought his fortune in London. Being appointed, in 1741, a surgeon's mate in the navy, he was present in the unfortunate expedition to Carthage, spent some time elsewhere in the

of his later novels, and of a few pieces in verse, insufficient to give him any considerable rank as a poet. He was haughty and quarrelsome, but good-hearted and benevolent; and this union of qualities fitted him equally ill for saving money out of the precarious gains of authorship, and for enjoying comfort in the stormy vocation of a political partisan and literary critic. The best known of his miscellaneous works are two: the indifferent translation of 'Don Quixote;' and the very careless 'History of England,' of which the portion extending from the Revolution to the death of George II. has repeatedly appeared as a sequel to Hume. For a long time after 1756 Smollett edited, with great ability, but not less acrimony, the 'Critical Review,' established as an advocate of the Tory and High Church party; and Wilkes's famous 'North Briton' owed its existence and its name to his paper 'The Briton,' in which he defended the administration of Lord Bute. His novel of 'Count Fathom' appeared in 1753; and 'Sir Lancelot Greaves' was written in 1756, while the author was undergoing imprisonment for a libel. Visiting the continent in 1763 and 1764, when his circumstances and health were shattered, and his spirits sunk by the death of his only child, he published, on his return, his clever but peevish 'Travels through France and Italy.' His ill-humor vented itself anew in 'The Adventures of an Atom' (1767). After having applied unsuccessfully for a consulship in the Mediterranean, he was again compelled to seek for health in a warm climate; and, in 1770, he left England, never to return. He died near Leghorn in the autumn of 1771, having just completed 'Humphrey Clinker,' which is not only the liveliest of his works of fiction, but breathes often a kindlier and more gentle spirit than the rest. Hazlitt, in his 'Lectures on the English Comic Writers,' and in the 'Edinburgh Review,' has excellently described Smollett's novels, and contrasted their coarse and vigorous pictures of externalities with the fine dissection of character which is presented by Fielding.

[W.S.]

SMYTH, J. C., a Scotch physician, 1741-1821.

SMYTH, WILLIAM, professor of modern history in the university of Cambridge, was born in 1764. He took his degree of M.A. in 1790, and in 1807 he was appointed to the chair of modern history, which he held for 42 years. Most of his life was passed at Cambridge, in a constant train of quiet duties and innocent pleasures. Endowed with a fine taste and correct judgment, he delighted in nursing the flame of infant genius. He was among the first to appreciate the merits of Henry Kirke White, whom he treated during his life with characteristic kindness, and after his death consigned to posterity a durable expression of his friendship in the beautiful lines inscribed on the youthful poet's monument in All Saints' church, Cambridge. Mr. Smyth was himself a poet. In 1806 he published 'English Lyrics,' a volume of elegant poetry, which was very favorably received; but his chief title to fame are his 'Lectures on Modern History,' and 'On the French Revolution,' and his 'Evidences of Christianity.' Died at Norwich, June 26, 1849.

SNAPE, ANDREW, an English divine, d. 1742.

SNAYERS, H., a Flemish engraver, born 1612.

SNAYERS, P., a Flemish painter, 1593-1670.

SNELL, RODOLPH, an eminent mathematician and philological writer, was born at Oudewarde, in Holland, in 1547. He became professor of mathematics, and afterwards of Hebrew, in the university of Leyden, where he died in 1613. He published Apollonius Batavius, and several treatises on the

[Birthplace of Smollett, and the Monument erected to his memory.]

West Indies, and returned to England in 1746. He threw himself perforce on literature for a livelihood, married a lady whose fortune proved to be disappointingly small, and destroyed any chances he might have had as a play-writer by quarrelling with managers. 'Roderick Random,' his earliest novel, appeared in 1748, and 'Peregrine Pickle' in 1750. He next attempted medical practice in Bath; but, being quite unsuccessful, returned to London, and became an author for life. His time thenceforth was chiefly employed in the performance of task work, relieved only at intervals by the composition

works of Ramus. His son, WILLEBROD SNELL, born at Leyden, in 1591, succeeded his father in the mathematical chair, and died in 1626. He discovered the law of the refraction of the rays of light; and undertook the measurement of the earth, or a degree of the meridian, which Musschenbroek afterwards corrected. He published some of the works of the ancient mathematicians, and a few learned treatises of his own on mathematical subjects.

SNEYDERS, or SNYDERS, FRANCIS, a Flemish painter of hunting and battle pieces, who frequently executed the animals and fruits in pictures of Rubens, 1579-1657.

SNORRO-STURLESON, an Icelandic historian and mythologist, au. of the Edda, 1178-1241.

SOANE, SIR JOHN, an eminent architect, was born at Reading, in Berkshire, in 1752; came to London at an early age with his father, who was a builder; was placed with Mr. Dance, the celebrated architect, when about 15, and afterwards acquired more practical experience in the art under Mr. Holland. In 1772, being a student of the Royal Academy, he was awarded the silver medal for the best drawing of the Banqueting House, Whitehall. Four years afterwards he obtained the gold medal for the best design for a triumphal bridge. Soon after this he was introduced to George III., by Sir W. Chambers, and was sent to pursue his studies at Rome, with the customary academy pension of £60 per annum for three years, and the same amount of travelling expenses out and home. Here he continued until the summer of 1780, and during his sojourn in Italy he studied most assiduously the grand remains of ancient art. On his return to England he was employed on many public works, as well as private buildings; and on the death of Sir Robert Taylor, in 1788, he was appointed architect and surveyor to the Bank of England, but not without severe competition, in which there were 13 candidates. To this success is attributable the superstructure of his subsequent fortunes. In 1791 he was appointed clerk of the works to St. James's Palace, the Parliament Houses, and other public buildings; and in 1795 he was nominated architect of the Royal Woods and Forests, both of which offices he some years after resigned. In 1794, a committee of the House of Lords directed him to consider what alterations could properly be made to render the house, offices, &c., more convenient and commodious. He accordingly made all the requisite surveys, plans, elevations, &c., in which was first introduced the noble idea of enriching the Hall of Rufus, the Court of Requests, and the Painted Chamber with painting and sculpture, to commemorate great public actions and distinguished talent; but though his designs were fully sanctioned and approved of by the king, the execution of the work fell to the lot of the late Mr. James Wyatt. In 1806 he was elected professor of architecture to the Royal Academy. At this period, and for many years after, Mr. Soane was most actively engaged in erecting or improving numerous public edifices in the metropolis and elsewhere. Among these may be mentioned the Dulwich Gallery, the National Debt Redemption Office in the Old Jewry, the new Law Courts, &c. In 1821 he made a magnificent design for a new palace, to be constructed on Constitution Hill, but Buckingham House was unfortunately preferred. In 1824 he was elected architect to the Royal College of Surgeons, and a member of the Royal Society. In 1826 he built the present Freemason's Hall, in Queen Street, and gave £500 towards the expense of its erection, having been chosen grand superin-

tendant of works to the fraternity of freemasons some years before. He subscribed £1000 towards erecting the monument to his Royal Highness the Duke of York, and presented £500 to the Royal British Institution, Pall Mall. In 1833 he completed the new State Paper Office in St. James's Park. This was the last of his professional works; and, having passed his 80th year, he retired from a profession in which he had been engaged 60 years, and tendered his resignation to the governor and directors of the Bank of England, in whose service he had been for 45 years. He then set seriously about the idea he had long formed of bequeathing his large and valuable collection of works of ancient and modern art (valued at upwards of £50,000), in perpetuity to the nation, for the benefit of students in the arts, and especially for the advancement of architectural knowledge. This he lived to see completed by act of parliament; and at his death, which occurred Jan. 20, 1837, his splendid house and museum in Lincoln's Inn Fields became the property of the public. An unhappy difference had for many years subsisted between Sir John Soane and Mr. George Soane, his son. We have understood that it originated in the latter having criticised, with unbecoming levity, some of his father's performances; but whatever might have been the offence, it is sincerely to be regretted that, to all appeals on behalf of his son, Sir John for ever remained inexorable.

SOANEN, J., a Jansenist prelate, 1647-1740.

[John Sobieski, from a Medal.]

SOBIESKI, JOHN, king of Poland, famous in the wars which marked the last efforts of the Turks to extend their dominions in Europe, was born in Galicia 1629. His father, James, was governor of Poland, and his military distinction was acquired in the Polish army, in the time of those weak kings, Casimir V. and Michael. In 1667, with only 20,000 men, he defeated an army of Cossacks and Tartars numbering 100,000, who left as many dead on the field as the whole number of Sobieski's troops. Casimir dying the year following, might have been succeeded by Sobieski, had he made any effort, but he permitted the election of Michael, and only acted upon the dictates of ambition, when the latter had proved his incapacity. A desolating civil war now threatened the country, as the adherents of Sobieski and of Michael were encamped against each other, but a new invasion of the Turks numbering 150,000 combatants, under Mahomet IV., suddenly announ-

ced a new danger. At this crisis Michael and his army took to flight, and the partisans of Sobieski, upon whose head a price had been fixed, swore to defend him; he then led them against the Turkish hosts, and in another great battle put 15,000 of them to the sword, recovered the spoils they had taken, and set 80,000 prisoners at liberty. While Sobieski was reaping these laurels in one part of the kingdom, Michael in another had concluded the shameful treaty of Budchaz, by which he bartered away a part of his dominions on condition of being supported in arms against his rebellious general; against this treaty Sobieski appealed to the diet, and falling upon the Turks once more, beat them at Kotzin (1674), and took the fortress till then deemed impregnable, at a loss to the enemy of 20,000 men. On the day of this battle Michael breathed his last, and Sobieski commenced his reign under the title of John III.; but he had hardly felt the weight of the crown before a new invasion of 200,000 Turks and Tartars summoned him to the field. Once more he led his brave Polanders against this redoubtable enemy, whom he charged with the inspiring battle-cry of 'Christ for ever;' his successes, however, produced no better result than an honorable treaty of peace, which had little more effect than a truce. In 1683 Sobieski was persuaded by the pope to enter into a defensive alliance with the emperor Leopold, and in July of that year the grand vizier, Kara Mustapha, led a vast army of 300,000 men against Vienna. The capital of the Austrian empire had no prospect but submission, when Sobieski, yielding to the entreaties of a sovereign who had refused him the title of 'majesty,' placed himself at the head of a small but devoted army of less than 20,000 men, and proceeded to the seat of war by forced marches. On his way, he was joined by some of the German princes, whose reinforcements swelled his army to 75,000, and with this force he came in sight of the Turkish encampment, which he viewed from the ridge of the Kalemberg overlooking the Austrian capital. From these heights Sobieski rushed down upon the enemy, and obtained a victory with the praises of which all Europe resounded. For the evil return rendered to this hero by the emperor Leopold, and consummated by the peace of Moscow in 1686, we have no space. He died at Warsaw, June 17, 1696, and years afterwards Charles XII. paused in his headlong course to visit his tomb, and drop a tear to his memory. [E.R.]

SOBRY, F., a French writer, 1743-1820.

SOCINUS, LÆLIUS, an Italian sectary, was born at Sienna, in 1525; studied at Bologna; and in 1546 became member of a secret society formed in the territory of Venice, on the principle of free inquiry. This institution being soon broken up, Socinus quitted Italy to join the reformers in Switzerland; and died at Zurich in 1562.

SOCINUS, FAUSTUS, nephew of the preceding and a descendant of the illustrious house of the Sozini, was born at Sienna, in December, 1539. His family being suspected of heresy, Socinus, at the age of twenty, took refuge in France for a season, but returned to Italy on his uncle's death, and spent twelve years at Florence in the service of the grand duke. In 1574 he retired to Basle, and four years afterwards was invited by the court physician, George Blandrata, to Transylvania, where opinions similar to his own had been for some time professed. Francis Davidis had held, as a legitimate deduction, that if Jesus be a mere man, or a creature, it is idolatry to offer any religious service to him. The arguments of Socinus failed to convince him, and the refractory

divine was thrown into prison, where he died after six years of close confinement. In 1579 Socinus visited Poland, but the unitarians of that country had scruples about admitting him into their communion. He left Cracow, after a residence of four years, and soon after married the daughter of a nobleman, who was his patron and protector, and on whose estate he lived in retirement. He gradually obtained influence in the country, and many persons of rank and wealth were led to espouse his creed. In 1598, the mob subjected him to a cruel maltreatment, dragged him through the streets, and burned his papers. Socinus died at a village in the neighborhood of Cracow, March 1604. The vague and floating anti-Trinitarian opinions on the person of Christ, which had for some time been abroad, were reduced by Socinus into a system. He denied the Supreme Deity of the Saviour, affirming that he had no existence till he was born of the Virgin—denied that the Holy Spirit is a person—excluded the atonement from his 'scanty creed,' regarding the death of Jesus only as a martyrdom—denied the personality of Satan—and refused the doctrine of original sin and that of eternal punishment. In short, he impugned all that in every age has been held distinctive of evangelical theology. The views of his uncle, Lælius, seem to have first impressed his mind with those ideas, and though he discards all fanaticism, yet he indicates that one of that uncle's interpretations, was all but a special revelation to him from Christ himself. Opera, vol. ii. 505. The works of Socinus form the first two volumes of the 'Fratres Poloni,' and consist of numerous exegetical and polemical tracts, and letters; a long account of an argument with Francis Davidis, the 'Responsio pro Racoviensibus,' replies to Puccius and Solanus, a miscellany of disputations, with a variety of antagonists, and a life of the author prefixed by a Polish knight. [J.E.]

SOCRATES, born at Athens in the year 468 B.C.; suffered the punishment of death for 'Impiety' at the age of seventy.—How arduous to approach with a view to represent them—the Just of the Earth! To analyze a speculative system is comparatively easy; even to transfer one's self to the position of its Framer, and so discern it—as alone it can be discerned—from *within*, is still a task chiefly for the Intellect; more difficult, but also, quite within reach of impartial research, to estimate the illustrious statesman, appreciate the obstacles he overcame, and comprehend the space and duration of his influence; nor, if the Inquirer be earnest and endowed with a portion of Imagination, need he shrink from the attempt to accompany the military Hero, to unravel his complex operations, and even to participate his ardor amid the clangors of War. But Socrates! The most just, the most exalted, the completest type of Humanity to which classic Antiquity with its wonderful creations, ever gave birth—the nearest of all who preceded, to a Being we name not here—who, without ambition, or pretence, or external advantage, but, through the simple force of Moral and Intellectual greatness, took unrelaxing hold at once of the Heart and Mind of the Ancient World,—to think or write of *Him*—even these few broken paragraphs which alone we now undertake—*this*, demands preparation of a different order, and much rarer moods. The Parents of Socrates were of no mark or note in the Athenian State; nor was their son gifted with any of those personal distinctions, which were of indifferent account nowhere in Greece. A face the reverse of beautiful, flattened nose, protruding eyes, the entire physiognomy any

thing but attractive to a passer by, he made no attempt to veil or compensate deficiencies, by ordinary solicitudes: in coarse tattered cloak, and oftenest unsandalled, Socrates strolled through all Public places,—the observed, however, of all observers; frequently listened to by multitudes; and greeted by the hearts of the choicest youth of Athens, whenever he appeared. Closer inspection of the only representations we have of him, goes, indeed, a certain length in explaining this latter remarkable power of fascination. A massive head instinct with authority, a broad although rugged brow, and that aspect of self-possession which indicates a Man to whom mastery appertained too much of right, to permit him to feel conscious of it: not a vestige accordingly of repellent affectation, or assumption, or reserve; but, on the contrary, the light of the most genial Humor ever flickering like sunshine among his singular features. Qualities, of all others, the surest to win a way for their possessor to the respect and likings of the cheerful and frank; but one higher, was needed to obtain for Socrates that devoted and enthusiastic attachment, which even a spirit untamable as ALCIBIADES, could not refuse. Broad the gulf usually sundering Youth from Age, depriving Age of its authority as Counsellor, and Youth of the blessings of guardianship: but the severance springs less from the inconstancy and impulsiveness of Youth, than from the rigidity of Age. As Life advances, bonds multiply and tighten around most of us. Custom governs, as second Nature: that is, we bend before social and conventional moralities, beliefs and expectations; and forget the modes of less fettered existence. No tyranny of Custom, however, had subjected Socrates. Ever increasing in Knowledge and Wisdom; to his latest hour he was youthful as at first: no marvel, therefore, though young men clustered around him—hailing him as best companion as well as Sire. Something like a mask of the inestimable quality now spoken of, is not uncommonly worn—springing from mere lack of thought, and slightness of temperament. But it belonged to Socrates, because, through his moral and intellectual force he lived freely and consciously among those primary INTUITIONS, which Youth—when Youth is healthy—simply obeys. He had descended to the roots of that rich Nature, of which our actual Men are but stunted and fractional developments; and thus, were his sympathies so full and sincere. Hence too, that unaffected solemnity which often mingled very touchingly with his most humorous moments. He could not conceal from his own Soul, that he had gone deeper than Sense; and that the Voices to which he listened came from beyond the World. It was not for an Intellect so masculine, to get entangled with unmanageable theories concerning the nature of the INTUITIONS: he simply felt their presence, and reverently bowed himself down:—like Pythagoras, he said he had a Heavenly guide, and owed his safety to his ‘*Dæmon*.’ Turning from the Man to his mission, one might at first fall into something akin to disappointment at its apparent simplicity; and because it had so little to do with the founding and promulgation of arduous Speculation. Yet the functions which Socrates appropriated, are just the most important that can fall to Mortal; and the methods he took to fulfil them, show by their nature, how profound and universal his objects were; for these methods, without one tittle of modification, are as applicable now as in long gone Athens, and will abide so through all time. Γνωθι σεαυτον. Before acting or speaking, know what you propose. If you speak, know what you speak:

if you believe, know what you believe: no Ignorance is so shameful as an assumed knowing or believing, what one knows not. Ascertain what your Mind, in verity is, and *be that*. Surely a simple message! Do we marvel, that the delivery of it consumed the Existence of one of the greatest of Men? CIRCUMSPICE! It can scarcely require to be mentioned, that Socrates wrote nothing, and was not a professed *Doctor*. His plan was much more direct and practical. He seized on some one whom he met in his walks; and, by searching conversation, constrained him into contact with the foregoing truths. For the most part he labored to bring men to recognize two grand sources of evil—two all prevailing and always prevailing detriments to Sincerity and Truth. *Foremost*, the careless, unconscientious use of words. A *Word*: observe what it is, what realities it ought to represent! First, it stands for a certain definite Thing—a fact or form in Nature about which there can be no dispute; and secondly, by every one of its derivative meanings, it represents some actual analogy among Things, and certain equally definite laws of the Mind. To understand a word, then, implies no slight knowledge; and the use of it requires proportional care. Do men really thus comprehend the words they employ? Take up any common or received proposition, and question a man who says he stands by it;—ask, if he comprehends its terms? We fear it is as certain now, as Socrates demonstrated it to be, in Athens, that—no matter how momentous the proposition, no matter although some entire system of Morals, Politics, or Theology may hang on it—aye, that ninety-nine in a hundred even of so-called *intelligent* persons, would not come clear through the scrutiny! The power to construct language is an especial distinction of Humanity; and the right and conscientious use of it, is the means by which alone we connect the past with the present, and discern through Nature and History, those grand and serene principles of Order which reveal a Supreme Government: employ it otherwise, and it *veils reality*; it is an excuse for not looking at Things; the Mind becomes *its* instrument; Truth gives way to Dogma, and we are False without a blush. Would that every generation had its Socrates! *Again*, Socrates, rejoiced to force on collisions with the professional Teachers of his time,—the class of men who had assumed the title of SOPHISTS. It is now well and generally understood, that the once prevalent conception, that these Sophists were avowed and conscious teachers of Fallacies, is quite erroneous. They had no such distinction. Mere representatives in Athens, of the ordinary professional Teachers of almost every age, they were men who expounded Theories they had never bottomed; and undertook, for fees, to prepare Young men, by the teaching of Oratory and Philosophy, for the daily work of Athenian public Life. Certainly Socrates did not spare their presumptuous profession of Theories; and he rejoiced to do then, what, if he had lived on Earth for ever, he might have done every day and anywhere—to reduce them, by his keen interrogations as to the signification of their propositions, to the embarrassed avowal of Ignorance. But his antipathies were equally strong against the whole system of acquiring Knowledge—as it was termed—*for use*. The thing to be accomplished, he said, is to become *true Men*, and the *uses* will follow. Does the Oak of centuries send out its strong arms that they may cast a shadow? On the contrary, it ascends and spreads, through the vigor of its inner Life; and then, tribes and nations sit down within the grateful covert. This, indeed, is

no idle distinction. Knowledge attained with chief view to specific uses, never forms the Man, and is not true Knowledge. Truth, in itself is not yet represented by conventional institutions and requirements : and the mind which seeks in the first place to subserve these, must be satisfied to miss Truth. First and last, it was the counsel of Socrates—Be Men—*Γνωθι σεαυτον!* For thus alone can you become true citizens of Athens, or worthy to worship the Gods. The teaching of Socrates, in so far as we have sketched it, was *critical* only ; although his interrogations seldom failed to point the way to some momentous positive Truth. Concerning his own positive conclusions, we refer to the article PLATO, —desiring rather, in our remaining space to view him as a practical *Citizen*. And surely, Athens had never a better or a nobler one. Inferior only to his love of Truth and Justice, was his ardent love of his natal soil, his desire for its prosperity, and his obedience to its Laws. When exigencies demanded, a willing patriot and brave soldier : he fought at Delium, Potidæa, and Amphipolis—a pattern of endurance even to rank and file ; and he bore himself without ostentation, or the wish for notice. If he spoke in public, it was to defend the innocent ; and he cared not then, whether before an excited People or the Thirty Tyrants. During his whole long life, he never broke a Law—refusing in his own case to sanction disobedience, by an easy escape from the consequences of one of the most unjust sentences recorded in History. Observe too, his careful treatment of the national Mythology—his respect for the Gods. It is not easy to define precisely the position of Socrates towards the Grecian Olympus. It is clear he had penetrated far deeper than Anthropomorphism, and discerned a moral Deity, the guardian and father of Man. But he would not disturb the Laws : partly, it may be, through his practical sense of the necessity of Order to all Progress ; but mainly through the Motive, which in a later age prompted Spinoza to reply to his simple Hostess :—‘ *Your religion is good ; you ought to seek no other, nor doubt that it will assure your salvation, if while it stimulates your piety, it helps you to lead a tranquil and virtuous life.*’ What then, in painful wonderment we ask—what had been done by this most illustrious of the Greeks, that the State of Athens could not be safe unless he should perish by Hemlock ? What fault, indeed, could be found in him ? ‘ Yet they only cried out the more, “ *Not this man, but Barabbas!* ”’ Excuse, of course, there is none, although there is explanation. Athens was confessedly tolerant ; but the case of Socrates was just that one, for which toleration has existed nowhere or at any time. If, as Mr. Maurice acutely intimates, the new Teacher had only announced some new theory, however antagonistic to those already afloat, no one would have hated him—not even would he have been blamed. By proposing his particular Theory, he would virtually have classed himself with the other Teachers, and been a new Doctor. But Socrates did not do this : he did not propose a new sect : he proved that the *methods* of all sects were unworthy, and their pretensions hollow ; he made war on the very profession of Sophist. The experience of the Ages, bears but one witness as to the certainties in such a case. ‘ If,’ says Mr. Maurice, ‘ a Teacher of this kind is right in what he says, he must be regarded as a public benefactor ; the city must honor him above all its citizens.’ And for such a claim, why expect tolerance from those who are wise in their generation ! Isolation, was the seal of the greatness of Socrates ; but it likewise caused and permitted the crime that

destroyed him. Glorious, indeed, that long and noble Life : neither did he die in vain. Ages that are gone, and ages yet to come, will linger over Plato’s admiring and affecting narrative. The conversations of that last evening still warm our hearts, and subdue our souls. We hear him yet, the majestic old man ; amid the afflicted group, he alone unmoved—discoursing of duty, and resignation, and immortality—an Immortality which showed him Death as a mere incident amid Life,—not any sudden disruption or critical change, but the opening of a pathway towards worlds where duty still exists, and wherein the Good and Great who preceded him, surely for ever dwell. Wisdom he had sought here ; Wisdom he would search for there ; only he should discern more clearly, and live more purely. The final moment came. It may be, that through that humor which ever clung to him, or with other and now obscure intent,—‘ *Crito,*’ he said, ‘ *forget not the Cock that I vowed to Esculapius.*’ Socrates then departed—*πνευμα ὤφηκε!* ‘ The last,’ cried Plato, ‘ of our friend, the best of all men of this time, the wisest and the most just of all men !’

[J.P.N.]

SOCRATES, surnamed SCHOLASTICUS, a grammarian, professor of the law, and pleader at the bar in Constantinople, about the middle of the 5th century, author of an ecclesiastical history which continues that of Eusebius from 309 down to 440. This work is in much esteem as one of those original documents which can be relied on for accuracy and dispassionate judgment.

SODERINI, J. A., a Venetian antiquarian, numismatist, and Eastern traveller, 1640–1691.

SOLANDER, DANIEL CHARLES, an eminent naturalist, was born at Nordland, in Sweden, where his father was minister, in 1736. He studied under Linnæus, and became the companion of Sir Joseph Banks in Captain Cook’s first voyage round the world. The objects of natural history collected in this expedition, which terminated in 1771, are now in the British Museum, as are the MSS. of Solander. In 1771 he received the degree of D.C.L. from the university of Oxford, and in 1773 became assistant librarian at the British Museum. Died 1782.

SOLANO, F., a Spanish physician, 1685–1736.

SOLARI, two Italian painters :—ANDREA, surnamed *del Gobbo*, born at Milan about 1480 ; ANTONIO, called *Zingaro*, 1382–1455.

SOLARI, J. G., an Italian poet, 1737–1814.

SOLDANI, A., an Italian naturalist, 1736–1808.

SOLDANI, J., an Italian poet, 1579–1641.

SOLDANI, M., an Italian sculptor, 1658–1740.

SOLE, ANTONIO DAL, a famous Italian landscape painter, 1597–1684. His son, GIOVANNI GUISEPPE, a painter in the style of Guido, 1654–1719.

SOLIER, F., a French Jesuit, ascetic writer, and historian of Japan, 1568–1638.

SOLIMAN. See SOLYMAN.

SOLIMENA, FRANCESCO, surnamed L’ABATE CICCIO, an eminent painter of Naples, 1657–1747.

SOLINUS, CAIUS JULIUS, a Latin writer of the 3d century, author of ‘ *Polyhistor*,’ a poor compilation taken without acknowledgment from Pliny.

SOLIS, ANTONIO DE, a Spanish poet and historian, was born at Placenza, in Old Castile, in 1610 ; was appointed historiographer of the Indies, and wrote the ‘ *History of the Conquest of Mexico.*’ His other works consist of dramas, poems, and letters. At the

latter part of his life, De Solis entered into orders, and died in 1686.

SOLIS, F. DE, a Spanish painter, 1629–1684.

SOLIS, J. D. DE, a Spanish navigator, 16th c.

SOLIS, V., a German engraver, 1514–1570.

SOLLIER, J. B. DE, a Fr. Jesuit, 1669–1740.

SOLOMON, the son and successor of David as king of the Jews.

SOLOMON, a king of Hungary, 1045–1100.

SOLON, born at Salamis in the 638th year before Christ, whence he early removed to Athens:—the one of the Seven Sages of Greece, of whom, at this long distance of time, we can frame the distinctest picture. Known in his youth as a poet, and, as well for his personal qualities, as because of the station and repute of his family, highly esteemed in Athens, we find him at an early age inducing his fellow-citizens, to rescind by acclamation, the shameful decree, which, on account of previous defeats, had threatened death to any citizen who should propose to renew expeditions against the revolted Salamis. Appointed commander, Solon returned victorious, only to undertake and accomplish a far harder task. The civil relations in Attica were in confusion: instead of Government, Sects raged. The inhabitants of the hill country demanded a government of the most democratic order; those of the plain wished an oligarchy; those on the sea shore a mixed form. Draco's Laws—so profuse in death-punishments, and therefore so destructive of the best sanctions of authority—still prevailed; and that plague which afterwards so often threatened the extinction of Rome, viz.: the oppression of debtors by creditors, under the letter of harshest laws, had spread through Athens, widely and deep, the spirit of the worst kind of revolutions. To remedy these latter evils was comparatively easy, inasmuch as each could be extirpated by one positive decree; and Solon, now intrusted with the supreme power, annulled Draco's Laws, altered the laws of creditor and debtor, and removed the hardships of existing relations, by an artifice not unknown to modern statesmanships—an artifice never excusable unless under pressure of imperative and inevitable necessity—viz., a sweeping *depreciation of the currency*. But the work of adjusting political relations, or of framing a practical constitution for the State, was not so easy. Solon executed it in a way that enforced the assent, and even gained him the applause of all his countrymen; nor through all their subsequent and frequent vicissitudes, did the wisest of the Athenians ever cease to revert with longing regret to his wise Laws. In outline Solon's constitution was this:—He divided the citizens into four classes, according to their wealth:—the fourth class, containing the *masses*. To this class he refused access to any magistracy; but that no man within the domain of Athens, might be excluded from the rights, duties, and dignity of citizenship, he constituted a public assembly of the whole citizens, before which, all decisions of the higher courts might be brought in review: a privilege apparently restricted, but which soon convinced the Athenian *plebs*, that, in the last resort they were really masters of the Laws. Acting on that principle of *checks*, which—however easily discredited by abstract logic—has been found invaluable in experience, from the time of Athens and Rome, down to our own day, Solon sought security against haste or excess of the popular Assembly, *first* in the Council of the Areopagus, of which all who had been Archons were members, and which he invested with the general guardianship of the Laws; and again in a second Council or Senate, charged with the *initia-*

*tive* of every law, and the discussion of it, previous to its being questioned in the Assembly:—each of the four classes sending one hundred members to that Senate. Add to which, that to secure justice and aid the weakness of the poorer classes, he authorized any one to bring before the tribunals a transgressor against the person or property of any other: this he considered the most effective police: under Solon's laws, there were no processes as to *Competence*. Wiser than Lycurgus, Solon expected no perpetuity for his enactments; he ordained them, therefore, merely for a century. Alas! the Instability of Human affairs! On returning from his travels, the Legislator found Athens again in confusion, and on the eve of the splendid but absolute monarchy of Pisistratus! Want of success in Statesmanship is often good proof of deficiency in true Wisdom; and their speedy failure might have thrown discredit on Solon's Laws. But in modern times, we can interpret more soundly: we have learnt the surpassing difficulty of planting in an old country, a new Tree. Surely, the sad experience of France, establishes how inestimable the privilege and imperative the duty, to prune the branches, and clear the roots—so that it decay not nor fall—of that umbrageous Oak under whose shade our forefathers lived!—Solon, we have said, was a poet; he was more,—the fragments that have reached us, prove him a master in Greek song. He felt too, the dignity and power of the Art; and he consecrated it to the same noble purposes to which he gave all his life—the inculcation of high morals and philosophy, and the elevation of the Athenian people. We omit here, because they are universally known, those touching personal anecdotes related of him by *Herodotus*. [J.P.N.]

SOLVYNS, FRANCIS BALTHASAR, an able artist, born at Antwerp, in 1760. He accompanied Sir Home Popham in a voyage to the Red Sea and the East Indies; and having arrived at Hindostan, he studied the languages, manners, customs, and religion of the Hindoos, that he might be able accurately to illustrate them by his pen and pencil. After an absence of 15 years, he returned to Europe, settled at Paris, and published, as the result of his labors, 'Les Hindous, ou Description pittoresque des Mœurs, Costumes, et Cérémonies Religieuses de ce Peuple,' 4 vols. folio. He died at Antwerp, in 1824.

SOLYMAN, caliph of Damascus, 715–717.

SOLYMAN, emir of Cordova, 1009–1016.

SOLYMAN, three emperors of Turkey:—SOLYMAN (TCHELEBI) I., proclaimed emperor after the defeat and capture of his father, Bajazet, by Timour, 1402; dethroned by his brother, Mousa, during a revolt of his subjects, and soon after killed, 1410. SOLYMAN II., next article. SOLYMAN III., brother of Mahomet IV., succeeded on his deposition, 1688, having previously acquired the most effeminate habits by a forty years' residence in a seraglio, died 1691.

SOLYMAN THE GREAT, second Turkish emperor of that name, was born in 1494, and succeeded his father, Selim, in 1520, being then in the twenty-seventh year of his age. The circumstances of the period were such as to call forth the highest qualities that any statesman or sovereign could possess. The arms of Selim had been the terror of Christendom, and the next destination of his fleet, at the moment of his death, immediately after his conquest of Egypt, was a subject of the most anxious solicitude. A general league among the Christian princes was in agitation, and it was only their own mutual jealousies, and the designs of Francis I. in Italy,

that prevented its realization; added to which was the enmity of the haughty and warlike Mamelukes in Egypt, and the similar precarious state of many conquests on European territory. It was the critical period of the consolidation of the Turkish power, and Solyman, without the ferocity of his father, instantly proved himself equal to the emergency. We have not space to enumerate his conquests, but the Mamelukes were put down, the Hungarian army defeated, and Buda taken; he even besieged Vienna, but was compelled to retire with the loss of 80,000 men; at the same time he improved the administration of his dominions, encouraged literature, opened roads, erected caravansaries, hospitals, and libraries, and exhibited the most enlightened regard for the welfare of the vast populations ruled by him. The titles bestowed upon Solyman indicate his high qualities, for while his own countrymen designate him 'the Conqueror' and 'the Legislator,' he is called by Europeans 'the Great' and 'the Magnificent;' he was also a poet and he contributed greatly to form the present Turkish language by the happy fusion of the Arabic and Persian tongues, promoted by his example and polity. He perished of fever in a new expedition against Hungary, while encamped before the walls of Sziyeth, two days before its capture, 8th September, 1566.

[E.R.]

**SOLYMAN**, two pachas of Bagdad:—**SOLYMAN I.**, of Georgian parentage, reigned 1750–1762. **SOLYMAN II.**, succeeded 1780, and reigned during a period troubled by the incursions of the Wahabees, and the ravages of Timour Pacha, in Mesopotamia; he repulsed the latter, and died 1802.

**SOLYMAN**, emperor of Persia, 1666–1694.

**SOLYMAN**, a general and minister of the Sultan Selim I., governor of Egypt 1526–1538; governor of Zemen 1538–1541; after which he became grand vizier. He enriched Egypt with many public monuments, and caused a general survey of the country to be made.

**SOMBREUIL**, **CHARLES VEROT DE**, a French royalist officer, who, at the commencement of the revolution, distinguished himself by his courageous defence of the monarchy. He afterwards served in the emigrant armies; and having the command of part of the forces in the unfortunate expedition to Quiberon, in 1794, was taken prisoner, tried before a military commission, and shot.

**SOMEREN**, **CORNELIUS VAN**, a Dutch physician, 1593–1649.

**SOMEREN JOHN**, son of the preceding, a magistrate and poet, 1622–1676.

**SOMEREN**, **J. VAN**, a famous Dutch jurist, 1634–1706.

**SOMERS**, **JOHN**, Lord, born at Worcester, where his father was an attorney, in 1650 or 1652, died 1716. He united the study of literature with that of the law, and became known as a political writer in the time of Charles II., and in 1688 was one of the counsel for the seven bishops. The success of the revolution now opened the path to honor, and in 1695 Somers had become lord high chancellor of England, with the title of Lord Somers, baron Evesham. In the reign of Queen Ann he was one of the commissioners for effecting the Union of Scotland, and in 1708 became president of the council.

**SOMERSET**. See **SEYMOUR**.

**SOMERVILLE**, **WILLIAM**, a gentleman of Warwickshire, who ranks with the inferior class of poets,

[Urn erected by Shenstone to Somerville.]

author of 'The Chase,' a didactic and descriptive poem, in blank verse, 1692–1742.

**SOMMIER**, **J. C.**, a French theologian, 1661–1737.

**SOMNER**, **WILLIAM**, a Saxon scholar and antiquarian, who held the office of clerk to the ecclesiastical court of Canterbury, 1606–1669.

**SONNERAT**, **PETER**, a naturalist and traveller, was born at Lyons, about 1745. After making several voyages to the East Indies, Malacca, the Philippine Islands, &c., he returned to France with a rich collection of natural curiosities, wrote narratives of his voyages to New Guinea, the East Indies, and China; and died in 1814.

**SONNIN**, **E. G.**, a French architect, 1709–1794.

**SONNINI DE MANONCOURT**, **CHARLES NICHOLAS SIGISBERT**, an eminent French traveller and naturalist, was born at Luneville, in 1751; studied the law, which he relinquished for the military profession; and being sent to Cayenne as an officer of marine engineers, he was enabled at the same time to gratify his love of travelling and taste for natural history. He assisted Buffon in his account of foreign birds, visited different parts of the European and African continents, and employed himself in various scientific researches till the commencement of the revolution, when he narrowly escaped from the tyranny of Robespierre. Under the consular and imperial governments he was unable to obtain any employment, in consequence of the prejudices entertained against him by Buonaparte for his remarks on the Egyptian expedition. Among the works of Sonnini are, 'Travels in Egypt,' 'Travels in Greece and Turkey,' and an edition, in 127 vols. 8vo., of Buffon's Natural History. He also assisted in the Dictionnaire d'Histoire Naturelle, 24 vols. 8vo.; and was conductor of the Bibliothèque Physico-economique. Died 1811.

**SONTAG**, **HENRIETTA**, a famous opera singer, was born at Coblenz the 13th of May, 1805. Her father was an actor of no note, and his wife an actress of equally humble pretensions. Sontag was early destined for the stage, and at the youthful age of six years made her first appearance, as Salome in the Don au weibchen of Kauer, and won for herself the surprise and admiration of all as a 'youthful phenomenon.' On the death of her father, when she

was only nine years old, she was admitted as a pupil of the Conservatory of Prague, having been received as a student three years in advance of the usual period, in consequence of her surprising natural gifts. Having been thoroughly drilled there under Madam CZEZKA, her teacher, she left the institution a complete musician, and went to Vienna, where she appeared at once in German and Italian opera. Her reputation became rapidly established, as is proved by the fact that Weber selected her in 1823 for the principal part in his *Euryanthe*. In 1824 she was chosen by Beethoven as solo soprano for his Choral Symphony and Missa Solemni. She became rapidly a general favorite in Germany, and her reputation extending throughout Europe, she was tempted to Paris and London, by generous offers, which she accepted. Her appearance in those capitals was the commencement of a triumph, which only ended with her retirement to domestic life. She married Count Rossi, a Piedmontese nobleman, attached at the time to the Sardinian Embassy at Paris, and abandoned the stage; the king of Prussia having endowed her with a fictitious escutcheon of nobility in order to adapt the singing girl to the august position of a countess—a dignity she supported with a grace and virtue, that few of the hereditary possessors of a coronet equalled. Pecuniary difficulties, resulting from the revolutionary troubles of 1848, made it necessary for Sontag to re-appear on the stage, and prop up her fallen fortunes. She accordingly again appeared before an expectant public in London, for the first time after an interval of twenty years. She showed none of the effects of time in her singing, but renewed the recollection of her youthful genius in all its freshness. From England, she went to France, and thence to Germany, where her career was as triumphant as of old. In 1852 she came to New York, and was received with an enthusiasm correspondent with her fame abroad. Having formed a travelling operatic company, she passed over the United States, meeting with successful results everywhere. While at New Orleans she was engaged by the manager of the principal theatre of Mexico, to play in opera at that capital for \$7000 a month. She had arrived in Mexico to fulfil this engagement, and had been announced to appear in *Lucrezia Borgia* on the 11th of June, 1854, when she was attacked with the cholera, and having postponed the opera, died on the 17th. Sontag was a consummate artist, and had cultivated to the height of perfection her natural charms of voice. In personal appearance she was a beauty, and even in her more mature age, she had great personal charms, which were always set off to the greatest advantage by her skilful toilette, for which she was always remarkable.

SOPHIA, empress of Constantinople, niece of Theodora, and wife of Justinian II., with whom she shared in the government of the state. After the death of that prince in 578, she conspired against Tiberius Constantine, who had been raised to the throne by her advice, and, being defeated by him, was compelled to live in privacy.

SOPHIA, half-sister of Peter the Great, and czariness of Russia, was born 1667, and in 1682 placed herself at the head of the revolt of the Strelitzes. Having succeeded in her ambitious designs, she reigned over the Muscovites under the names of her brothers, Peter and Ivan. The former, however, finally possessed himself of the sole power (Peter the Great), and Sophia died a prisoner in a convent 1704.

SOPHIA-CHARLOTTE, queen of Prussia, daugh-

ter of Ernest Augustus, elector of Brunswick Lüneburg, and second wife of Frederick I., 1668–1705. She contributed to the foundation of the Academy of Sciences at Berlin.

SOPHIA-DOROTHEA, queen of Prussia, daughter of George I., king of England, wife of Frederick William I., and mother of Frederick the Great, 1687–1757.

SOPHOCLES, was a native of Colonos, a beautiful village in the immediate vicinity of Athens, where he was born B.C. 495, being thus thirty years younger than Æschylus, and fifteen years older than Euripides. His father, Sophilus, being a man of good family, and possessed of considerable wealth, gave him a liberal education in all the literary and personal accomplishments of his age; and these were still further enhanced by a person eminently handsome, which had been moulded and trained by the exercises of the palæstra. His proficiency in the knowledge of poetry and music, he having been instructed in the latter art by the famous Lamprus, is attested by the fact that, when his countrymen, after the battle of Salamis (B.C. 480) assembled to celebrate, around the trophy raised by their valor, the glorious victory which they had achieved, he, though a youth of fifteen, was selected to play an accompaniment on the lyre to the pæan, in which the chorus of youths sung their country's triumph. It is besides probable that he also composed the words of the ode. The commencement of his career as a dramatist took place under circumstances peculiarly interesting. Æschylus had for thirty years been the undoubted master of the Athenian stage, and was now to contest the palm with a youthful competitor of the age of twenty-seven, whose great accomplishments and personal graces had excited an unusual interest in his favor. The festival of the Dionysia was, on this occasion, rendered still more imposing by the return of Cimon from the island of Scyros, bringing with him the bones of Theseus. The people accordingly flocked to the theatre of Bacchus; and when Cimon and his nine colleagues entered the theatre to offer the customary libations to the god, the chief Archon, Aphepsion, instead of choosing judges by lot, detained the ten generals at the altar; and, after administering to them the usual oath, constituted them the judges between the rival tragedians. Before this tribunal Sophocles exhibited his first tragedy, and by their award obtained the first prize. His subsequent career fully justified the decision of the judges. From this epoch (B.C. 468), he maintained the supremacy till B.C. 441, when his formidable rival Euripides was preferred to him, and gained the first prize. For sixty-three years Sophocles continued to compose and exhibit; and during that period he twenty times obtained the first prize, still more frequently the second, and never descended so low as the third—an amount of success which far exceeded that of his great rivals. In B.C. 440 he exhibited the *Antigone*, the earliest of his extant dramas, a play which gave such satisfaction to the Athenians that they appointed him as a colleague of Pericles and Thucydides in the war against the inhabitants of Samos. He seems to have won no laurels in his military capacity. Several offices of honor and respectability were conferred upon him in his old age; he was made priest of Halon, a native hero; and after the disastrous termination of the Syracusan expedition (B.C. 413) he was, in his eighty-third year, appointed one of the committee of public salvation; in which capacity he consented (B.C. 411) to the appointment of the council of Four Hundred. The last years of his

life were disturbed by family dissensions. In consequence of his partiality for a grandson, his eldest son endeavored to deprive him of the management of his property on the ground of incapacity and dotage. The only defence offered by the aged dramatist was to read in presence of his judges a passage from the *Œdipus at Colonus* which he had just written; on hearing which the judges dismissed the case, and rebuked his son for his undutiful conduct. Sophocles died B.C. 405, after completing his ninetyeth year. He is believed to have written 113 plays, of which only seven, along with some fragments, have descended to us. His private character seems to have been, on the whole, amiable; the blemishes attributed to it being those of the age rather than the individual. In the hands of Sophocles the Athenian tragedy reached its highest degree of perfection. His language is pure and majestic, avoiding on the one hand the daring and sometimes rash flights of *Æschylus*, and on the other never descending to the common-place diction of *Euripides*. [G.F.]

SOPHRANI, R., a Genoese biographer, 1612-72.

SORANUS, two physicians of Ephesus, the earlier of whom dates about the reign of Trajan.

SORANZO, J., a doge of Venice, 1312-1328.

SORBAIT, P., a celebrated Italian physician, died 1691.

SORBIERE, SAMUEL, a French physician, philosopher, and historiographer royal, 1615-1670.

SORBIN, A, a French prelate, 1532-1606.

SORBONNE, ROBERT DE, a doctor in theology, who was the chaplain and confessor of Louis IX., and founded the college that bears his name, was born at Sorbon, a village in the diocese of Rheims, in 1201. His object was to found a society of learned theologians, who should live in common, and deliver lectures gratuitously, and this design he began to execute in 1253, by assembling a body of professors and scholars, whom he lodged near the Luxembourg palace. He died in 1274, and left the bulk of his property to render his benefaction permanent. The Sorbonne formed one part only of the faculty of theology in the university of Paris, but its name became so famous that it was often given to the whole, and graduates were proud to name themselves of the Sorbonne, rather than the university.

SOREL, AGNES, a maid of honor to the queen of Charles VII. of France, who has acquired a name in history by the influence she acquired over that monarch when she became his mistress, 1409-1450.

SOSIGENES, an astronomer of Egypt, who was invited to Rome by Julius Cæsar, for the reformation of the calendar. He fixed the year at 365 days, called the Julian year, which commenced B.C. 45. No farther particulars respecting him are known, nor are any of his works extant.

SOSTRATUS, an eminent architect, who flourished in the 3rd century B.C., and was patronized by Philadelphus, king of Egypt. Among his works was the famous Pharos, or light-house of Alexandria, which is said to have cost 800 talents, and was reckoned one of the wonders of the world.

SOTER, a bishop of Rome, 168-176.

SOTHEY, CHARLES, an English admiral, served as a midshipman under Lord Nelson at the battle of the Nile. Died 1854.

SOTHERON, Admiral FRANK, a gallant English officer. His services during several years of the hottest warfare procured him the distinguished honor of being intrusted by Lord Nelson with the defence of the bay of Naples at the time of the

French usurpation there; and the admirable arrangements made by him prevented the tremendous mischief which the slightest want of prudence would have given rise to. He was of a very wealthy landed family in Notts and Yorkshire, which former county he for some years represented in parliament. Born 1767; died 1839.

SOTO, DOMINGO, a Span. ecclesiast., 1494-1560.

SOTO, FERDINAND DE, a Spanish adventurer and navigator, of whom an interesting account may be read in Bancroft's History of the United States, died 1552.

SOTO, PETER, a Spanish divine, 1500-1563.

SOUBISE, CHARLES DE ROHAN, Prince De, marshal of France, and minister of state to Louis XV. In the earlier part of his career he distinguished himself in the field, but in his later years became implicated in the Dubarry intrigues, so disgraceful to that court; he was brother to the cardinal of Soubisse (see ROHAN), 1715-1787.

SOUFFLOT, JAMES GERMAIN, an eminent French architect born in 1713. He studied at Rome, and after travelling in Italy and the Levant, to examine the remains of antiquity, he settled at Lyons, where he built an exchange and hospital, which gained him so much credit, that he was called to Paris, and made superintendent of the royal buildings. His principal work is the church of St. G  n  vi  ve. He was a knight of the order of St. Michael, and died in 1780.

SOULT. NICOLE JEAN DE DIEUN SOULT, Duke of Dalmatia and Marshal of France, was born in 1769, at St. Amand. His father was a notary. Soult entered the ranks of the army in 1785; and in 1791 he attracted the favorable notice of Marshal Lukner, and received a lieutenant's commission. He rose rapidly under Custine, Hoche, and Marceau, and particularly signalized himself in the victory of Fleurus. In 1799 he acted under Massena in Switzerland, and in 1800 he served under the same commander in the defence of Genoa. Soult was wounded and taken prisoner in a sally in the early part of this siege, but was set at liberty after Napoleon's victory at Marengo. Napoleon, who heard of Soult's bravery and skill, now employed him under his own eye; and Soult's promotion went forward till he had reached the highest station. He was the first of the marshals whom Napoleon created in 1804, and he was the first marshal whom Napoleon made a peer. He was the chief organizer of the great army which was assembled at Boulogne for the invasion of England; and when the 'army of England' was countermarched into Germany against the Austrians, Soult led the main column, and participated largely in the glories of the campaign of Ulm and Austerlitz. He took in the next year a distinguished share in the victory of Jena: and showed consummate firmness as well as daring in the desperate struggle at Preuss Eylau. In 1808 Soult was sent into Spain. He defeated the Spaniards at Reynosa, and subsequently commanded against Sir John Moore, whom he engaged at Corunna. He next occupied the north of Portugal, but was surprised and defeated by Wellington at the Douro, and retreated with great loss and difficulty into Spain. In 1809 he gained the great victory of Ocana over the Spaniards, and subdued all the south-west of Spain, except the city of Cadiz. He lost in 1811 the hard fought battle of Albuera against Beresford. Soult was recalled to aid Napoleon after the Russian campaign; but in the July of 1813, he was sent back to Spain to stem if possible the advance of Wellington after the English triumph at Vittoria,

and to save the south of France from invasion. Soult did his duty nobly though unsuccessfully. He found the wreck of the French armies of Spain driven in disorganization upon Bayonne; the spirits of the men were damped by repeated defeats, and their discipline had suffered proportionally. Against him the English and their allies were coming on, flushed with success, in the highest state of efficiency, and with Wellington to lead them. Soult restored order and spirit among his men, and in a fortnight from the time of his arrival at Bayonne he led them boldly again into the Spanish territory against the British. A series of engagements in and near the Pyrenees followed, in which Soult showed strategic abilities of very high order, and gained several partial successes, though ultimately he was driven back into France. He now defended his native country against the invaders with indomitable courage, and an inexhaustible fertility of resources. Repeatedly engaged, and almost constantly defeated, he still presented an unbroken front against his assailants, and kept his retreating army ready to dispute every tenable post, and to seize any favorable chance of attack that fortune might offer. The final battle of Toulouse was contested by him with undiminished skill and courage; and though, on the whole, the English were successful, Soult had the advantage on several points of the battle; 5,000 of his enemies had fallen; and he led his army safely out of the city, ready for further operations when the news arrived of the emperor's first abdication. In 1815 Soult joined Napoleon and fought at Waterloo, where he acted as one of the emperor's major-generals. On the second return of the Bourbons, Soult was for some time proscribed, but was ultimately restored to all his dignities. After July, 1830, he was much trusted by Louis Philippe, who employed Soult's talents in the war office, and also twice made him president of the council. He was present at queen Victoria's coronation in 1838, as representative of France, and was received with warm favor by the English nation. The old marshal died at his chateau of Soult-Berg, 26th Nov., 1851.

[E.S.C.]

SOUSA. See SOUZA and FARIA.

SOUTH, ROBERT, an eminent divine, was born at Hackney, in 1633; and educated at Westminster School, and Christchurch, Oxford. In 1660 he was chosen public orator of the university, and successively became chaplain to the Earl of Clarendon, prebendary of Westminster, canon of Christchurch, and rector of Islip, in Oxfordshire. In 1693 he carried on a controversy with Sherlock, on the doctrine of the Trinity, when both disputants were charged with heresy, for attempting to explain an indefinable mystery. He was a man of great wit, and did not spare to display it even on serious occasions. His 'Sermons' possess the merit of earnestness and originality. Died 1716.

SOUTHARD, SAMUEL L., an American statesman, born in New Jersey 1787. He held the highest executive, legislative and judicial offices in his own state, and was secretary of the navy under Monroe and Adams. In 1841 he was chosen president of the United States Senate. Died 1842, aged 55.

SOUTHCOTE, JOANNA, was born about 1750, at Gittisham, in Devonshire. Her parents were in humble circumstances, and, until her name became celebrated, she obtained her living as a domestic servant. Her case is a very curious one, both in the history of psychology, and of religious enthusiasm. From her mother, who lived till Joanna had reached the age of womanhood, she received the

most exalted religious ideas, the exuberance of which her father often felt himself called upon to check; she was still, however, a sober member of the Church of England. At length she joined the early morning and evening meetings of the Wesleyans, and, in 1792, associated exclusively with that body. The religious exercises to which Joanna was thus introduced seem to have produced, as exciting causes, her remarkable visions and dreams, which soon took the form of prophecies, and commanded universal attention. Some of her predictions received a remarkable fulfilment, especially that which she published immediately after the conclusion of the peace of Amiens in 1801; for she then derided the joy of the nation, and gave the solemn assurance that a calamitous series of wars were about to break out, the events of which would be more terrible than any on record; at a later period, she as solemnly asserted that Napoleon would never land in England, and that his power would be overthrown. The visions which formed the ground of these prophecies are often very striking as dramatic pictures, and the rude doggerel of her prophetic chants as frequently becomes picturesque, if once the cultivated mind can overcome the disgust first excited by their uncouthness, and their deficiency in common grammatical correctness. She began the publication of her prophetic pamphlets in 1794, and about 1804 was brought up to London, and lodged at the west end by some of her admirers, many of whom were persons of consideration in society. Soon after this event, an old man, named Thomas Dowland, and a poor boy, named Joseph, also had visions, and a paper manufacturer named Carpenter—in whose employ they were—finally published many of them: we mention them here, however, because this Carpenter, conceiving himself to be the 'Right Man' of Joanna's prophecies, finally took her place as the chief of the sect who followed her, having first led the secession when she was believed by the more enlightened of her followers to have fallen under a delusion. That delusion consisted in the belief that she was destined to bring forth Shiloh, or the Messiah, and its origin is explained by Carpenter as the result of her believing that she was the church or bride itself, instead of its shadow or representative. We may here mention, that previous to its arrival at this idolatrous pitch, which it is still painful to contemplate, Joanna had occupied a year in 'sealing' her followers, generally but most unjustly regarded as a mere trick to make money. The old man Dowland expired in 1804, ten years after the commencement of his, Joseph's, and Joanna's prophecies, and 1814 was fixed upon by her for the birth of Shiloh. We omit the details of the amazing increase of her followers, and the magnificent preparations made for this event, to state the simple fact, that she was deceived by appearances, and expired on the 27th of December, in that year—having previously declared her conviction that, 'If she was deceived, she had, at all events, been the sport of some spirit, good or evil.' The whole case, like many others of the kind, may be explained by the easily ascertained laws of psychology. Females have been known, in states of temporary derangement, to go out naked into the streets: the voice having told them that if they would put off their clothes they would be *invisible*. Such are the terms only into which the spiritual language falls, but clothes, in the symbolic tongue, are bodily states, and these are what must be put off in order that the spirit may enter a life unseen by mortal eye. We throw out the hint, because many such

delusions are abroad, and it may serve to show how the sincerity of such a woman as Joanna, ignorant of spiritual laws, may be insufficient to preserve her from the grossest errors. We omitted to say that the appearance which Joanna mistook for pregnancy was the result of a diseased condition, explained when her body was opened. The prevailing thought of her writings is the redemption of man by the agency of *woman*, the supposed cause of his fall.

SOUTHERN, HENRY, an English diplomatist and review writer, died 1853, aged 54.

SOUTHERN, THOMAS, an eminent dramatic poet of the age of Charles II., was born in Dublin, in 1660; became a servitor in Pembroke College, Oxford; and then settled in London. He wrote the 'Persian Prince,' 'Isabella, or the fatal Marriage,' 'Oroonoko,' tragedies; the 'Disappointment,' the 'Rambling Lady,' and the 'Wife's Excuse,' comedies. His tragedy of 'Isabella' is one of the most pathetic and effective dramas in the language. He held a commission in the army, which with his writings produced him a handsome competency; and he died, aged 86, in 1746.

[Birth-place of Southey.]

SOUTHEY, ROBERT, was born in 1774 at Bristol, where his father was a linen-draper. In 1792, the means being furnished by his uncle, the English chaplain at Lisbon, with a view to Southey's becoming a clergyman, he was admitted at Baliol College, Oxford. He had already gone through much miscellaneous reading, had planned epics, and written plays. His studies at the university became still more diversified. Rousseau and Godwin, and the contagious enthusiasm of the French revolution, made him, for a time, a republican in politics, and in religion a doubter or unitarian. Southey was the most unlikely of all men to become a minister in a church whose creed he did not cordially accept. He abandoned his clerical views, began to study medicine, but gave it up in disgust, and left Oxford in 1794. The principal fruit of the extreme opinions he then held was his drama of 'Wat Tyler,' never published by himself. In 1794 he made acquaintance with Coleridge; and, having already published poems in conjunction with his friend Lovell, he now, with his new ally, wrote 'The Fall of Robespierre,' and 'Joan of Arc.' In 1795 Southey married, at Bristol, Edith Fricker, the sister of Mrs. Coleridge and Mrs. Lovell; but, compelled by poverty, the pair immediately separated, the poet accompanying his uncle to Lisbon. On his return he published, in 1797, his 'Letters from Spain and Portugal.' He was still reluctant to embrace literature as a profession. The study of law was now commenced in London, but never zealously pursued, and gradually deserted altogether for literary

study and composition. His circumstances were made easier by the friendship of Mr. W. W. Wynn, who allowed him an annuity of £160 till he obtained the Laureateship. His youthful extravagances of opinion were already, to all appearance, quite extinct; if he was not even far on the way towards that admiration of aristocratic principles and of the hierarchy of the church of England, which, oddly mixed up with liberal hobbies of his own, he entertained and expressed so vehemently in the later stages of his life. In 1803 he settled himself in a house called Greta Hall, near Keswick; and there he resided for nearly forty years, laboring at his desk with the steadiness of an attorney's clerk, and dividing his time, easily and regularly, between the tasks by which he made his bread and the undertakings by which he hoped to gain immortality. In 1813, his 'mania of man-mending,' as he called it, being completely cured, he was appointed Poet-Laureate, chiefly through the influence of Sir Walter Scott, who himself declined the place; and the hundred a-year which it gave him was his only certain income till 1835, when Sir Robert Peel conferred on him a pension of three hundred pounds. Out of the gains of his industry, the prudent and kind-hearted man of letters supported one of his sisters-in-law for some time in his house, and the other for many years; while he brought up his family in respectability, and left at his death several thousand pounds in cash and insurances, and a large and valuable library. His sheet anchor was writing for periodicals, a kind of composition in which he was particularly skilful. The 'Annual Review' received his first contributions; he wrote the historical sections of the 'Edinburgh Annual Register' for the years 1808, 1809, and 1810; and he was a constant contributor to 'The Quarterly Review' from its commencement in 1808 till he ceased to be able to write at all. But his separate publications amounted to forty-five, of which by far the greater number were works of his own in prose and verse, his share in the others being that of editor and critic.—In his later years he relied for lasting fame on his historical works and his speculations on politics and society. But he was neither a deep or exact thinker, nor possessed of the highest requisites for historical narrative; and the only permanent popularity he gained in this field was through his Lives of Nelson and of Wesley. 'The Doctor' begun to be published anonymously in 1834, has much that is clever, and a great deal that is amusing; but it contains rather the collections of a reading man than the inventions or observations of a man of genius. All Southey's prose is excellent in style, easy and idiomatic, tasteful and clear, though wanting in point and tending to verbosity. His poetical merits have been matter of keen controversy. He was a better artist than poet, lofty and just in his theory of poetical art rather than spontaneously imaginative or passionate in execution. Yet, since he deserves high honor for the constancy with which he aimed at deliberate and symmetrical performance, in a time when most other poets worked from inconsiderate impulse only, it is satisfactory to find in his best poems so much that gives pleasure to the real lovers of poetry. 'Madoc' indeed is heavy and vague; but 'Thalaba' (1801) and 'The Curse of Kehama' (1810), in spite of their extravagance of theme and their unwise experiments in rhythm, are very fascinating to imaginative readers; and in 'Roderick the Last of the Goths' (1814), he has come nearer than any other man of our century to the tone of the epic. In 1837 the death of Mrs.

Southey, after long affliction, deeply depressed her husband, already worn out by his many years of honorable toil. In 1839 he found an affectionate companion for his decline, by marrying Miss Bowles, herself a well-known authoress. After this time his memory and other powers failed rapidly; and he had been quite imbecile for a good while before his death, which took place in March, 1843. [W.S.]

SOUTHEY, CAROLINE ANNE, the widow of Robert Southey, and a poet herself, better known by her maiden name of Miss Bowles. She was married to Southey on the 5th June, 1839. B. 1786; d. 1854.

SOUTHGATE, RICHARD, an antiquarian, and minister of the Church of England, 1729–1795.

SOUTHMAN, P., a Dutch painter, 1580–1646.

SOUTHWELL, N., an English Jesuit, died 1676.

SOUTHWELL, ROBT., an English Jesuit, said to be descended from an ancient family of Norfolk or Suffolk, was born in 1560, and entered the order at Rome in 1578. Having come as a missionary to England, his design was discovered, and he was executed at Tyburn, February 21, 1595. He suffered with great courage. He is the author of several religious works and poems.

SOUVARROF. See SUWARROW.

SOUVESTRE, EMILE, a French miscellaneous writer, of novels, reviews, and popular dramas. Died 1854.

SOUVIGNY, G. DE, a Fr. Hellenist, 1598–1672.

SOUZA, JOHN DE, a Portuguese historian, born at Damascus, in Syria, about 1730, and died at Lisbon, in 1812. He was employed as secretary interpreter to the Spanish ambassador at Morocco, and published some etymological works, explanatory of the connection between Arabic and Portuguese.

SOUZA-BOTELHO, DON JOSE MARIA, a Portuguese diplomatist and man of letters, 1758–1825. His wife, known as a novelist, died 1836.

SOWERBY, G. B., an English naturalist, died 1854, aged 64.

SOWERBY, JAMES, originally a drawing-master, known as a writer on botanical and mineralogical subjects, illustrated by himself, 1766–1822.

SOYE, P. DE, a Dutch engraver, 1538–1575.

SOZOMEN, HERMIAS, an ecclesiastical historian, known as a pleader at Constantinople in the 5th century. The portion of his history now extant dates from 323 to 439.

SOZOMENO, an Italian historian, 1387–1458.

SPADA, J. B., an Italian cardinal, 1597–1675.

SPADA, J. J., an Ital. naturalist, 1680–1774.

SPADA, L., an Italian painter, 1576–1622.

SPAENDONCK, GERARD VAN, an eminent flower and miniature painter, was born in 1746, at Tilburg, in Holland, settled at Paris, where he became miniature painter to the king, and professor of iconography at the Jardin des Plantes. Died 1822.

SPAGNOLETTA, the name by which GIUSEPPE DE RIBERA is generally known in Italy. He was born at Xativa, near Valencia, in Spain, January 12, 1588. He went early to Italy, and is so identified with Naples that he is commonly enumerated among the painters of that school. Dominici indeed asserts that he was born in Gallipoli, in the province of Lecce, in Naples, and that his father, a Spanish officer, married there Dorotea Caterina Indolli, a lady of Gallipoli, where Guiseppe was born, in 1593; but according to Cean Bermudez, the lady, the place, and the date, are all three wrong. As Dominici is a great authority on Neapolitan painters, nothing short of documents can supplant his account; these, however, Bermudez professes to speak from, though he does not give them. He was

at first the pupil of Francesco Ribalta in Spain, he then studied in Rome, and eventually with Michelangelo da Caravaggio at Naples, and he not only adopted the naturalist style of this painter, but even surpassed him in his own manner. Lo Spagnoletto was a painter of prodigious power and facility, but of co-ordinate jealousy and arrogance. He was a prominent member of the infamous Cabal of Naples, the triumvirate headed by the Greek Belisario Corenzio, the third being Giambattista Caracciolo. These men are reported to have resolved to expel or poison every painter of talent who should attempt to settle in Naples; Domenichino is said to have been their victim, and they succeeded in expelling Annibale Caracci, the Cav. D'Arpino, and Guido. Spagnoletto terminated his great but scandalous career in a remarkable manner. In 1648 his beautiful daughter, Maria Rosa, became the mistress of Don Juan of Austria, and accompanied that prince to Palermo; this had such a powerful effect on the proud Spaniard that he disappeared from Naples and was never heard of more, leaving his wife and family with his large fortune at Naples. Cean Bermudez says he died at Naples in 1650, but in which he appears simply to have copied Palomino; he gives no authority. Luca Giordano was the most distinguished of Spagnoletto's scholars.—(Dominici, *Vite dei Pittori, Scultori, ed Architetti Napoletani*; Cean Bermudez, *Diccionario Historico*, &c.) [R.N.W.]

SPAGNUOLI. See MANTOVANO.

SPALDING, JOHN JOACHIM, an eloquent Swedish clergyman, author of several religious works, 1714–1804. His son, GEORGE LUDWIG, editor of an edition of Quintilian, 1762–1811.

SPALLANZANI, LAZARO, an eminent physiologist and naturalist, was born at Scandiano in the duchy of Modena, in 1729. He died in 1799. He studied at Reggio and Bologna, and he soon acquired such a great reputation for learning, that the university of the former town invited him to become professor of logic, metaphysics, and Greek. During the six years he remained there his leisure time was devoted to the prosecution of those physical researches that have rendered his name so celebrated. He became afterwards professor of Modena, and ultimately filled with great honor to himself and credit to the university, the chair of natural history at Pavia. At this latter place he had the superintendence of the cabinet of natural history belonging to the university; and with the view of raising it from the low state into which it had fallen, he travelled through various countries, as far as Constantinople and Asia Minor, and made great collections of objects in all the departments of nature, with which he enriched it. While at Vienna, on his return home, he heard that some of his colleagues, enemies of his reputation, had accused him of stealing some of the objects from the museum. His innocence, however, was clearly established; it was proclaimed by an imperial edict, and he returned to Pavia with the greatest honor and eclat. Spallanzani's writings are numerous, and have procured for him an universal reputation as a physiologist and naturalist. His experiments on the reproduction of animals; his researches into the circulation of the blood; his works on the physiology of animals and vegetables; and his interesting accounts of the infusoria and other microscopic animals, are full of new and interesting matter, and have added much to our knowledge of all the subjects of which they treat. [W.B.]

SPANGENBERG, A. T., a Moravian prelate, author of a *Life of Luxendorf*, 1704–1792.

SPANHEIM, FREDERIC, professor of divinity at

Leyden; author of 'Exercitationes de Gratia Universalis,' and other learned works. Born 1600; died 1649.

SPANHEIM, EZEKIEL, a learned writer and statesman, was the eldest son of the preceding, and born in 1629, at Geneva, where he was appointed professor of eloquence at the age of 20. He soon after became tutor to the son of Charles Louis, elector palatine, who employed him in several important missions. After the peace of Ryswick he was sent as ambassador to France, and from thence to England, where he died in 1710. His principal works are 'De Præstantia et Usu Numismatum antiquorum,' 2 vols.; and 'Letters and Dissertations on Medals.'

SPARFVENFELDT, J. G., a Swedish philologist, author of a Slavonic dictionary, 1655-1727.

SPARK, T., an English divine, 1655-1692.

SPARKE, T., a puritan divine, 1548-1616.

SPARRE, ERIC, a Swedish senator, who contributed to place Sigismund III. on the throne of Poland, and was beheaded by Charles IX. 1600.

SPARRMANN, ANDREW, an eminent Swedish naturalist, was born in the province of Upland about, 1747, and was instructed in botany by Linnæus. In 1765 he made a voyage to China, and again in 1772 and 1775, to South Africa. He returned from these travels laden with specimens of natural history, both plants and animals. He died at Stockholm, where he had become keeper of the museum, in 1820.

SPARROW, ANTHONY, bishop of Norwich, in the time of Charles II., was a prelate distinguished for his learning, piety, and benevolence; and is known as a writer by his 'Rationale of the Book of Common Prayer.' Died 1685.

SPARTACUS, a native of Thrace, who became a soldier in the Roman army, and, having deserted, was sold as a slave, and finally numbered with the gladiators condemned to destroy each other for the amusement of the people of Italy. In the year 73 B.C., about the period when Italy was overrun with bandits and its seas infested by pirates, the period of anarchy and social ruin attending the decline of the ancient republic, Spartacus with about seventy of his companions in bondage effected their escape, and resolved that, since they were to die, the scene of their struggle should be a larger one than the blood-stained arena, and that they would fall as brothers. They were joined by fugitive slaves, and others of the oppressed classes, till their numbers swelled to an army, of which Spartacus became the commander. The details of the struggle are related by Livy, Plutarch, and Appian. Spartacus had no hope of conquering the whole power of Rome, but was resolved on escaping into Germany, and bearing away with him the spoils of the cities of his late masters. He gained three great victories in succession over Lentulus, Genlius, and the consul of the preceding year, Manlius, and his course was now open to the Alps, but dazzled by these splendid successes he led his troops southward again, and the next year, B.C. 71, he was defeated by Crassus. He performed prodigies of valor, before meeting with his death in this last action, and many of his companions in arms, who became prisoners, were crucified, and set up at intervals on the road between Rome and Capua.

[E.R.]

SPARTIANUS, ÆLIUS, a Latin historian, of very indifferent repute, 4th century.

SPAULDING, CORNELIUS, died in New Orleans, in 1851, aged 79, who is said to have been 'the wealthiest man in that city.'

SPEED, JOHN, an English historian and antiquary, was born at Farrington, in Cheshire, 1552, and was originally a tailor. His talents coming under the notice of Sir Fulk Greville, procured him an allowance which enabled him to abandon his business, and devote his time to literature. His works are—'The Theatre of the Empire of Great Britaine, presenting an exact Geography of the Kyngdomes of England, Scotland, and Ireland, and the Isles adjoining;' 'The History of Great Britaine, from Julius Cæsar to James I.;' and 'A Cloud of Witnesses, or the Genealogies of Scripture,' prefixed to a new translation of the Bible in 1611. D. 1629.

SPEGEL, HAQUIN, archbishop of Upsala, known as a poet and philologist, 1645-1714.

SPELMAN, SIR HENRY, an eminent English historian and antiquary, was born at Congham, in Norfolk, in 1561. James I. frequently employed him on public business, and he received the honor of knighthood for his services. He died in 1641, leaving many valuable works, among which his 'Glossarium Archæologicum' and 'Villare Anglicanum' are still highly esteemed.—His son, SIR JOHN SPELMAN, inherited his father's taste for archæological inquiries, and was the author of a 'Life of Alfred the Great.' He was knighted by Charles I., and died at Oxford, in 1643.

SPENCE, JOSEPH, a divine and critic, was born in 1698, and received his education at Oxford, where he obtained a fellowship, and was elected professor of poetry. He afterwards held the living of Great Horwood, and a prebend in Durham cathedral. He wrote an 'Essay on Pope's Odyssey,' but his principal work is entitled 'Polymetis; or, an Inquiry into the Agreement between the Works of the Roman Poets and the Remains of Ancient Artists.' The 'Anecdotes collected by him, concerning eminent Literary Characters,' have been published. His death, which happened in 1768, was occasioned by his having accidentally fallen into a pond.

SPENCER, AMBROSE, a chief justice of the State of New York, was born in Connecticut, 1765. He practised law in New York, rose to great eminence in his profession, and acquired great political influence. He was a senator, and reached various other political dignities and offices. In 1819 he was made chief justice. Died 1848.

SPENCER, JOHN, a learned divine and critic, author of an erudite Latin treatise on the Hebrew Laws and Rituals, born in Kent, 1630, died 1695.

SPENCER, JOHN C., an eminent American lawyer and statesman, was born in the city of Hudson, New York, on the 8th of January, 1788. He was the son of Ambrose Spencer, C. Justice of New York. In 1806 he took his degree at Union College, and in 1809 commenced practice at the bar. While a student he acted as private secretary to Governor Tompkins of New York. On his marriage, in 1809, he removed to Canandaigua, where he resided until 1845 in the pursuit of his profession. In the year last named he removed to Albany, which thenceforth became his permanent home. From an early period he embarked in political life, and held many important offices. In 1811 he was made a master in chancery, in 1813 during the war with Great Britain he was judge advocate, in 1814 he was postmaster at Canandaigua, in 1815 assistant attorney-general for the western part of New York, and in 1816, at the early age of 28, he was sent as a representative to Congress. Mr. Spencer was several times returned both to the House of Assembly and Senate of New York, and was made speaker of the former. His commanding talents gave him great influence, and he controlled

the political influence of his party. In 1839 he was appointed secretary of state of New York, and in 1840 a regent of the University. These two offices, last named, he held until 1841. In that year he was made secretary of the treasury of the United States, and continued in that important position until 1844. He was a great lawyer, a logical thinker, of very extensive attainments beyond his professional learning and of indefatigable industry. He never seemed to tire of intellectual labor. His was the principal hand in the revision of the statutes of New York. He died of consumption in 1855.

SPENCER, JOHN CHARLES, Earl (better known as Viscount ALTHORP), was born in 1782, and was educated at Harrow and Trinity College, Cambridge. He first entered the House of Commons as member for Northampton; but from the year 1806 to 1834, when he succeeded to the peerage, he represented the county of Northampton, generally supporting all the important measures advocated by the Whig party. Shortly after the accession of William IV. he was made chancellor of the exchequer; and, though he was occasionally convicted of making erroneous calculations, yet in bringing forward the financial details he showed singular industry and candor. He was manly, liberal, straightforward, and disinterested; his honesty of purpose was never questioned; but he possessed not the physical powers requisite for a good orator. In another and a very different sphere of action, however, he was unrivalled. The improvement of agriculture was at all times his great aim; and, when he retired from office, he applied himself with zeal and energy to the practice and encouragement of that great branch of our national prosperity. To his exertions the establishment of the Royal Society of Agriculture was mainly owing; and he was present at nearly all the great agricultural meetings throughout the country; promoting the general good by his example, either as the president or as an exhibitor of prize cattle, the patron of mechanical and scientific improvements, or as the generous rewarder of the laborer's skill and industry. Died Oct. 1, 1845.

SPENCER, the Hon. WILLIAM ROBERT, the best writer of *vers de Société* in his time, was the younger son of Lord Charles Spencer, and was born in 1770. He was educated at Harrow and Oxford; and, in 1796, published a translation of Burger's *Leonore*, beautifully illustrated by lady Diana Beauclerc. In proof of his astonishing power of memory, it is gravely asserted that he undertook, for a wager, to get the whole contents of a newspaper by rote, which he won, by repeating it without the omission of a single word. He held the situation of a commissioner of stamps. Died 1834.

SPENER, P. J., a German divine, 1635-1705.

SPENSER, EDMUND, was, with one illustrious exception, the greatest of those poets whose genius brightened the last generation in the long reign of Elizabeth. Closing his life when Shakspeare was in the midst of his career, he was the earliest of the poetical stars that rose in that dazzling firmament. Indeed, although English literature had undergone great development as well as great changes during the two centuries that had intervened since the death of Chaucer, yet the long period gave birth to no poet of a very high order; and, in this view, there was truth in the assertion made by Spenser himself, that he was 'the shepherd boy, who after Tityrus his lay first sang.' The spirit of his inventions was caught from the older poetry of England, the irregular minstrelsy of the middle ages, with its chivalrous ideas, its fantastically gorgeous pictures, and

(above all) its saturation in allegory. His forms, on the other hand, were prompted by those Italian studies, in which he was so well versed, and which, introduced earlier by Surrey and others, exercised so strong an influence over all the Elizabethan poetry. Spenser, without forgetting to emulate the lyrical and meditative effusions of Petrarch and his followers, aimed, in his greatest work, at doing for English literature that which Ariosto and Tasso had recently done for the literature of Italy. He designed to construct, out of the undigested elements of mediæval song, a polished and elaborate work of art, which should resuscitate the world of chivalry,

[Kilkenny Castle, the residence of Spenser.]

in a shape not unacceptable to a generation farther advanced in knowledge, and familiar with models higher than the old romances. The design was executed, in his '*Faerie Queene*,' with a marvellous affluence of imagery at once romantic and natural, and with a delicate feeling of the beautiful such as hardly any poet has ever surpassed. If his symbolic meanings sometimes press themselves on us so closely as to cool our poetic mood, they are as often embodied in scenes and figures which, with or without regard to their hidden signification, entrance us by a spell as powerful as those of the enchanters and elves amidst whom we are brought to wander. And, though the plan of the work is too vast; though the half of it, which is all that we possess, contains Six Books, each of which is as long as most epics: yet these deal successively with successive characters and events, which are sufficiently independent of one another to allow of their being studied separately, without detriment either to our comprehension of them, or to the æsthetic effect they produce. The '*Faerie Queene*' is a great work, a work fairly comparable to the most illustrious of the narrative poems that grace the continental literature of Europe. And, when we think of it as belonging to our Elizabethan age, we should remember, also, that it is the only work of the very highest class, excepting only the dramas of Shakspeare, which that age, with all its fertility and energy, was fortunate enough to produce. Nor did it exercise, on the generations immediately succeeding the poet's time, much less of influence on the non-dramatic poetry of England, than the masterpieces of the immortal dramatist exercised on his successors. The characteristic stanza which Spenser invented for his romantic epos, was the very smallest of the points in which following poets were led, consciously or unconsciously, by the example he had set him. The events of Spenser's life, though less obscure than those of Shakspeare's, are yet known so very imperfectly, that his biographers can do little more than tantalize the cu-

riosity of their readers. He was born in London, probably in 1553, but perhaps earlier. He was descended of a good family, probably some offshoot from the house of Althorpe; and a few circumstances in his early history have suggested the supposition, that his father may have been one of the Spensers or Spencers of Hurstwood in Lancashire. He was admitted of Pembroke Hall, in Cambridge, as a sizar, in 1569, and took his degrees of B.A. and M.A. in 1573 and 1576. This is all that we know with certainty in regard to his youth. In the north of England he wrote his first considerable work, which is a series of twelve pastorals, called 'The Shepherd's Calendar,' published in 1579. These pieces are made unacceptable to ordinary readers, not only by the fondness for old words and phrases which always clung to the author, but by a frequent excess of rustic familiarity both in sentiment and in expression. Yet some of them in whole, and passages in all of them, justify to the full the reputation they gained for him. About the same time he was tempted into giving some countenance to the attempt of the learned physician Gabriel Harvey, to naturalize in England the hexameters and other prosodial forms and laws of the classical tongues. He was already engaged in composing his epic; and, in his correspondence, mention is made of nine comedies which he had written before 1580. He had become acquainted with Sir Philip Sidney, whose friendship he has commemorated in verse; and he was patronized, in early manhood, by Sidney's uncle, the all-powerful earl of Leicester. In the year last named he went to Ireland, as secretary to Lord Grey of Wilton, then appointed viceroy, and immortalized by the poet under the character of Artega, the personification of justice. Lord Grey's government was very short; but, while it lasted, the poet was made clerk of the Irish Court of Chancery, and received also a lucrative lease (which he sold) of abbey-lands in the shire of Wexford. In 1586 he received another grant, containing three thousand acres of land in the county of Cork, on which stood his castle of Kilcolman. His residence must have been chiefly in Ireland for several years; and on this Irish domain, by his beloved stream Mulla, his great poem was principally composed. In 1590, the poet being then in England, were published its first Three Books, which are also by universal consent the finest. The allegorical design, explained in an introductory letter to Raleigh, was set forth in the title-page: 'The Faerie Queen, disposed into Twelve Books, fashioning Twelve Moral Virtues.' In the Three Legends which now appeared, were allegorized Holiness, Temperance, and Chastity. In 1591 appeared a volume of his minor poems, quaintly entitled 'Complaints.' Its most noticeable pieces are 'The Ruins of Time,' 'The Tears of the Muses,' and a long satirical fable called 'Mother Hubbard's Tale.' Spenser was addicted to complaining; and, though he had received so much from his patrons, and showed himself attentive and shrewd in matters of business, he was poor in the latter part of his life, whether through improvidence or by reason of the disturbed state of Ireland. In the same year in which the 'Complaints' appeared the queen bestowed on him a pension of fifty pounds a year. In 1595 he published 'Colin Clout's Come Home Again,' a poem not only very beautiful, but interesting for its many allusions to the poet's personal history. In the same year appeared a large series of Sonnets, and the exquisite 'Epithalamion,' in which he celebrates his recent marriage. In 1596 Spenser brought to England, and published, the Fourth, Fifth, and Sixth Books of

'The Faerie Queene.' They are the Legends of Friendship, Justice, and Courtesy. All that we possess beyond these is a fragment containing Two Cantos 'Of Mutability.' The Six Books required for working out the design are traditionally said to have been lost in a voyage from Ireland; but there is great reason for doubting whether the poem was ever in reality completed. The only other work of the poet that calls for notice is his prose treatise, 'A View of the State of Ireland,' written or finished in 1596, but never published till 1633. It is a sagacious book, and an excellent and vigorous specimen of old English prose. In September, 1598, he was appointed sheriff of Cork. Perhaps this office caused the tragical catastrophe which hastened his end. The rebellion of Tyrone breaking out immediately, Kilcolman castle was burned, and a new-born child of the owner perished in the flames. He and his wife escaped, and sought shelter in London. He died there, on the 16th January, 1599. According to Ben Jonson he perished of want; and the fact may have been so, although it seems improbable. His funeral, at all events, was splendidly celebrated by the earl of Essex; and his grave is in Westminster Abbey, next to that of Chaucer. [W.S.]

SPERLING, OTTO, a physician and naturalist of Hamburg, 1602-81. His son, of the same name, professor of jurisprudence and history, 1634-1715.

SPIEGEL, H., a Dutch poet, 1549-1612.

SPIELMANN, JAMES REINHOLD, an eminent chemist, was born at Strasburg, in 1722. He became professor of chemistry at his native place, where, by his means, a botanic garden was established. He held also the chair of poetry three years. Among his works are, 'Elementa Chimiæ,' 'Prodromus Floræ Argentinensis,' 'Institutiones Materiæ Mediæ,' &c. Died 1782.

SPIGELIUS, or VANDEN SPIEGHEL, ADRIAN, a physician and anatomist, was born at Brussels, in 1578. He studied at Louvain and Padua, in which last university he became professor of anatomy and surgery; which office he discharged with such reputation, that the Venetian government made him a knight of St. Mark, and gave him a chain of gold. Died 1625.

SPIILBERG, J., a Dutch painter, 1619-1690.

SPILLER, JOHN, a young English sculptor, of great promise, was born in London, in 1763, and studied under Bacon. He distinguished himself by his talents at the Royal Academy, and was chosen to execute a statue of Charles II. for the centre of the old Royal Exchange; but the much admired production had scarcely been erected before the artist expired, a victim to consumption, at the age of 30, in 1794. 'The energy of his labor, with the strong excitement of his feelings, had already made fatal inroads on his constitution. But he was willing, he said, to die at the foot of his statue. The statue was raised, and the young sculptor, with the shining eyes and hectic flush of consumption, beheld it there, returned home, and shortly was no more.'

SPINCKES, N., a nonjuring divine, 1654-1727.

SPINELLI, E. M., prince of Scala, and a philosopher of the Cartesian school, 1686-1752.

SPINELLI, M., an Italian historian, 1230-68.

SPINELLI, N., a Jesuit of Naples, 14th cent.

SPINELLI, or SPINELLO, a family of Italian artists who flourished in the 14th and 15th centuries, one of whom is said to have painted a figure of the devil so hideous, that it haunted him in his dreams, and occasioned a singular conference with the presumed original. This singular story is related by Vasari.

SPINOLA, AMBROSE, MARQUIS DE, descended from a noble family originally of Genoa, was born in 1571, and entered into the military service of Spain at the period of the war in the Netherlands. His first great exploit was the reduction of Ostend, on the 14th September, 1604, after a siege of more than three years, and the loss of 130,000 men under previous commanders. This victory was rendered the more remarkable by the circumstance, that Maurice of Nassau, at the head of an equal number of troops, had made repeated efforts to raise the siege, and Spinola, before his last successful assault on the city, had sustained fifteen terrible combats with him: such an achievement caused his name to resound through Europe, and he was soon after appointed commander-in-chief in the Netherlands. For the next twenty-six years the name of Spinola appears always foremost in the annals of that protracted struggle, as the hero of the catholic party, and the house of Austria. We may mention among his exploits the capture of Juliers 1622, and of Breda in 1625. He was recalled from this command in 1628 through the influence of intrigues at Madrid, and was subsequently employed in Italy against the French. His death was hastened by grief at the shameful manner in which his glory was betrayed in this new enterprise, and he expired at Castel-Nuova di Scrivia, Sept. 25, 1630. [E.R.]

SPINOLA, FREDERICK, brother of the preceding, and commander of the Spanish fleet of the Low Countries, killed in a naval action 1603.

SPINOZA, BARUCH, or BENEDICT, born in Amsterdam, 24th November, 1632; died in his solitary apartment at the Hague, 24th February, 1677;—it will astonish many to observe that this illustrious Thinker, whose name is the mark of an epoch in Philosophy, and whose reputation is once more in the ascendant in a country like Germany, attained no greater age than forty-five. But paucity of years, was not the sole obstacle of which—in estimating Spinoza—the just critic requires to take account. His parents were Portuguese Jews, rich and of weight in the synagogue; and the young Inquirer had to bear their frowns, as well as that terrible excommunication of the Rabbis—the formula *schem-mathr.* Disasters so grievous could not drive him from his integrity, but they naturally disturbed very sadly the course of his meditations, depriving him of leisure, and inflicting nearly the keenest of anguish. The greatest and the wisest of his time, however, loved him: he enjoyed the respect of VAN ENDE and the DE-WITTS: and it may be imagined, how inestimable, in such circumstances, the solace of such affection! Spinoza acted like the bravest of men. Resolute to live with meditation, he acquired the art of polishing lenses, that so—like St. Paul—he might supply, by the labor of his hands, his material wants: and, thus raised above the farther shock of circumstance, he rented a single chamber from Van den Spyck, an honest burgher of the Hague, wherein he henceforth lived and meditated, and produced the wonderful works which so stunned all Europe. To that little room the student must needs go back if he would discern Spinoza: and he must further add, that the feeble, emaciated, and sickly form he sees writing there, had learned so well the value of independence, and had so felt the delight of searching for Truth, that, although sustaining nature on some such sum as twopence or threepence a-day, he declined to be drawn from his retirement by munificent offers of patronage—resisting the solicitations even of the world-renowned PRINCE of CONDE.—In proceeding with the arduous endeavor to explain

the system of Spinoza, we bespeak the forbearance of scientific readers, and the gravest attention of all others: forbearance, because we must write popularly; and attention, because the writings we are about to analyze are the true source of so much subsequent Philosophical History. We shall divide our exposition into several distinct sections.—I. Like his early and only master Des Cartes, Spinoza recognized the necessity of first laying down his Method of Inquiry, or determining by prior investigation the road which alone seemed likely to lead to Truth. There are, he says, three kinds of *knowledge* commonly so called;—the *First*, consisting of mere hearsay, and of vague experiences and impressions, passively received—making up those indiscriminate beliefs, and confused images, which are represented by the opinions and prejudices of the vulgar. Of such *knowledge*, the philosopher makes no account.—The *Second*, is of a higher aim; it arises when we seek the relations of things or of phenomena; when after comparing objects and classing them by their resemblances, we ascend to the general Law expressing their apparent place and function in the Universe. But this knowledge is also vitiated and incomplete; *vitiated*, because we rarely discern or apprehend an object precisely as it is—being misled by the imperfection of our Senses: *incomplete*, because although it may lead us to a Law, it does not explain or account for Law itself.—The *Third* kind of knowledge alone possesses absolute certainty, and alone is worth the pursuit of the philosopher. It is born when we discern some Absolute Principle, from which, by rigorous deduction, the character of the Universe, the phenomena of Mind and Matter, the nature of Man and God, can be made to flow. Then we are superior to sense and its illusions; Experience with its deceits and phantasms, and Reasoning merely discursive, which can never lead to the absolute goal, are banished from the domain of Metaphysics. If, indeed, it belonged to the Human Faculties to obtain this primary and all-comprehending principle, Spinoza would be right; but he has not brought out the *Organ* by which these Faculties ever reach the elevation from which he demands that Inquiry start. His method is thus defective at the outset, and immeasurably inferior to that of Des Cartes, who—not thinking of the desirable, but of the real and practicable—lays down the immovable axiom, that Philosophy must ever begin in the certainties of *Consciousness*.—II. Searching for the adequate primary Principle of Philosophy, Spinoza quickly and easily reaches the Idea of *Existence in itself*, or as it is termed by him the Idea of *SUBSTANCE*—that which *stands under* all phenomena. What is this Idea? How can we define Substance? It is infinite, it is perfect—else it were limited and determined by something else, and would not be the ultimate principle of Existence. But it must have attributes, or intelligible characteristics? Spinoza speaks of two—*Extension* and *Thought*, and the discussion of these occupies his system. It was suggested by LEIBNITZ afterwards, that our Idea of Substance, involves also the Idea of *Cause*, or of Force and Activity—a criticism whose propriety is unquestionable, and which of itself goes far to invalidate those terrible fatalistic conclusions, which, as we shall see, inhere in the philosophy we are exposing. But apart from objections like these, there is the fundamental one—whence drew Spinoza his knowledge of this Idea of Substance and its attributes? By what process, or in what manner can he convince any one of his right to that stupendous *postulate*? Can he indicate any process, different

from an appeal to *Consciousness*? And yet, the system reared on that postulate, denies and over-rides every other truth of which *Consciousness* testifies! In this is the weakness of all such efforts; and it is the ruin of all merely *empirical* as well as of *à priori* schemes. The Materialist who owns no mental phenomena except what he can gather from external nature, or explain by its schemes and appearances, seldom reflects that—seduced by seeming clearness—he is really employing *derived* and *secondary* certainties (if the expression be allowable) for the purpose of invalidating a *primary* one.—III. Let us contemplate now, the Fabric reared on this postulate by Spinoza: nowhere certainly, even in the strictly deductive sciences, is the reasoning more impregnable and complete. Allow the postulate, and before you is a mailed combatant, whose armor opens not a chink for your arrows! This was the real triumph of Spinoza's massive intellect, as well as the secret of that power by which he so easily crushed opponents.—SUBSTANCE—this infinite substance or reality of all things—must, because of its infinity, have an infinite number of Attributes or Qualities,—else were it not infinite. Of these, however, *two* only are known, or manifested to us by the Universe, viz.;—*Extension* and *Thought*. But each Attribute of an Infinite Substance, must in itself be Infinite—infinite in *energy*, though limited in *quality*: *Extension*, as *Extension*, can have no bounds; and *Thought*, as *Thought*, must have the faculty of Infinite expansion, owning no limits, either in Space or Time. Such the attributes that to us define Substance; if such attributes did not exist, or were not cognizable, the Infinite Absolute Substance, would be a mere negation, unknown and unknowable. Turn now to the separate attributes. Through what is *Extension* cognizable? Not *in itself*:—Infinite Space, is a word, a term without meaning, a simple negation, but as Substance has attributes, so *Extension* as an attribute, has *modes* or manifestations. The modes or manifestations of *Extension*—manifestations, through which alone we know it—are the forms which crowd it, and the motions which diversify it. Each of these is *Finite*: they are therefore multiple; and by the infinity of their numbers, they come, in their totality, to equal the Infinite attribute they represent. This will at once make plain the 16th proposition of the *Ethics*, '*It is the nature of Substance to develop itself necessarily by an infinity of attributes, which also are infinitely modified.*' Again with regard to *Thought*. Has not *Thought* its modes? For otherwise how could it be known? As Space is shown forth through Form, *Thought* is manifested through Ideas. Ideas are its modes, and they too are in number infinite. The VARIETY of Things, therefore, is no longer a mystery: *it even belongs to their UNITY*: so that the problem of philosophy is solved. Before us, is this ineffable, and unapproachable infinite and absolute SUBSTANCE, unfolded through its Infinite attributes, which again, are themselves unfolded and rendered apprehensible by that infinitude of modes—Forms and Ideas—which make up the universe. The student will not fail to detect the true parentage of much of the scheme of SCHELLING. Spinoza further declares, that as every mode of *Extension* must correspond to a mode of *Thought*, the order and connection of IDEAS, is necessarily the same as the order and connection of THINGS,—surely a pretty close anticipation of the *Philosophy of Identity*.—IV. It now only remains, that we state succinctly the conclusions accepted by Spinoza and inseparable from his system, regarding MAN and GOD. It is easy to see, that the remorse-

less logic of Spinoza, could admit no Deity, apart from his Absolute Substance. God, according to this philosophy, must in essence be that Substance; they are convertible Names, with the same Attributes. But in justice to that great Thinker, the student must be warned, not to attach to the word *substance*, conceptions of Inertness, absence of Understanding, or of Will. If Spinoza has said that Deity is void of understanding, he meant only Deity absolutely, just as he would have so spoken of Substance,—that is, treated without regard to its Attribute. We are dealing, it must never be forgotten, with a consummate logician, whose deductive method has no flaw; and he necessarily abides first with the most abstract conception—passing down by regular steps, from almost inaccessible heights. Rather, the World, all Things are God; the Material Universe, but also Intelligence: every firmament that shines, every thought that pierces the serene, every emotion that agitates the heart, every virtuous and heroic aspiration that raises humanity above circumstance and the grave—these, aye, and manifestations, which human eye nor ear has either heard or seen—these, are *fulgurations* of Divinity—gleams of the character of that Essence which is All! Surely we have no *Atheism* here; but a loftiest, however mistaken, *Pantheism*. It is said quaintly by NOVALIS that Spinoza was 'intoxicated with God!' As to MAN, the conclusions are too sorrowful. His Understanding is a mere succession of these modes of *Thought*; his Soul a more exalted or comprehensive mode: and, as to every mode of Infinite *Thought* there is a corresponding mode of *Extension*, each soul has a body which it animates, or of which it is the Idea. No *personality* here; not a shred of human Liberty: Body and Soul, each a mere expression, impersonal and transient, of one phase of that huge all-comprehending Development! Spinoza saves, indeed, that form of Morality within which he lived himself. Part of the Infinite, let us recognize our blessedness. To live, to enjoy in plentitude, we must concentrate our desires around one aspiration—the longing to possess God, which means to love Him, and thereby to live in Him. How poorly, this bare outline represents Spinoza! Has the student who peruses these lines, ever, under the dark vault of Heaven, or at the hour of midnight, experienced perplexity alike of Head and Heart, as he questioned the Mystery of Things? So, likewise, did the young and heroic Jew of whom we write; and the foregoing was his solution. It must in nowise be forgotten that the Philosophy of which, thorough mere exercise of Intellect, we give an account, was dug by this remarkable man, from the mine of his profound Nature; what we describe, he created; it is for us to examine and contemplate only, but he *believed*; it gave him dignity and integrity through Life, and did not impair his courage at a lonely Death.

SPIRITI, S., an Italian historian, 1712–1776.

SPIRITO, L., an Italian poet, born 1436.

SPITTLER, BARON VON, a minister of state and historian of Wurtemberg, 1752–1810.

SPITZNER, J. E., a Ger. naturalist, 1731–1806.

SPIZELIUS, T., a Lutheran divine, 1639–1691.

SPOFFORTH, R., an English musician, 1768–

SPOHN, FREDERIC AUGUSTUS WILLIAM, professor of philosophy and ancient literature at Leipzig, born 1792, died prematurely when preparing to publish a work on hieroglyphics, 1824.

SPOLVERINI, HILARION, an Italian painter, famous for his battle-pieces, 1657–1734. 1826.

**SPOLVERINI, MARQUIS**, an Italian administrator and writer of poetry, 1695–1763.

**SPON, CHARLES**, a French physician and Latin poet, 1609–1684. His son, **JAMES**, a physician, antiquarian, and traveller, 1647–1685.

**SPONDE, HENRY DE**, or **SPONDANUS**, a French prelate and ecclesiastical historian, was born in 1568, and was educated in the Protestant College at Orte; after which he studied the law, and became so eminent as a pleader, that Henry of Navarre made him master of requests. In 1595 he changed his religion, and took orders at Rome; was made bishop of Pamiers in 1626, and died in 1643. Spondanus abridged the annals of Baronius, and continued them from 1197 to 1640. He also wrote 'Annales Sacri à Mundi Creatione ad ejusdem Redemptionem.'

**SPONTINI, GASPARO**, a distinguished musical composer, was born at Majolatti, near Jesi, in the Roman states, 1778. He was educated at the Conservatorio de la Pietà of Naples, and began his career when seventeen years of age, as the composer of an opera 'I Puntigli delle Donne.' This was followed by some sixteen operas, produced within six years, for the theatres of Italy and Sicily, but not a note of which has survived. In 1803 Spontini came to Paris, in which capital again he produced some half-a-dozen operas and an oratorio, all of which have perished. In 1807 he was appointed music-director to the empress Josephine; and in 1808 he produced his most famous work, 'La Vestale,' with brilliant and decisive success. His 'Fernando Cortez' appeared in 1809; and the next year witnessed his appointment to the directorship of the Italian Opera in Paris, which he held for ten years. In 1820 the magnificent appointments offered by the court of Prussia tempted him to leave Paris for Berlin, in which capital his last three grand operas, 'Nourmahal' (founded on Lalla Rookh), 'Alcidor,' and 'Agnes von Hohenstauffen,' were produced with great splendor, but with little comparative success. Spontini continued to reside as first chapel-master in Berlin till the death of the late king in 1840, when his professional career may be said to have ended. The latter period of his sojourn at Berlin had been embittered by professional disputes; and in 1842 he once more repaired to Paris, where he had, in 1839, been elected one of the five members of the Académie des Beaux Arts. Died, at the place of his birth, 1851.

**SPONTONI, C.**, an Italian historian, 1552–1610.

**SPORENO, J.**, an Italian historian, 1490–1560.

**SPOTSWOOD, or SPOTTISWOOD, JOHN**, archbishop of St. Andrews, descended from an ancient Scottish family, was born in the county of Edinburgh 1565. He accompanied James VI. to England, who raised him to the primacy, and made him one of the privy council for Scotland the same year. He labored greatly to bring the Church of Scotland to the episcopal discipline, and became chancellor of that kingdom in 1665, two years after he had crowned Charles I. at Holyrood. Died 1639. **SIR ROBERT**, his second son, wrote a History of the Scottish Church, and was put to death by the Covenanters.

**SPRAGG, EDWARD**, a brave English admiral, was a captain in the first engagement with the Dutch in 1665, when, for his gallant conduct, he was knighted by the king on board the Royal Charles. He attracted the particular notice of the Duke of Albemarle in the four days' battle in 1666; and the year following he burnt a number of Dutch fire-ships when they came up the Thames, which threw their

whole fleet into confusion. In 1671 he destroyed, in the Mediterranean, seven Algerine men of war. He was sunk in his boat in an engagement with Van Tromp in 1673, as he was going from his sinking ship to another.

**SPRANGHER, BARTHOLOMEW**, a Flemish painter, whose principal work is The Last Judgment, 1546–1623.

**SPRAT, THOMAS**, a learned English prelate, one of the first fellows of the Royal Society of London, of which he wrote a History; he was also the friend and biographer of the poet Cowley; born in Devonshire 1636, died 1713.

**SPRENGEL, K.**, a Germ. botanist, 1766–1833.

**SPRENGEL, M. C.**, a Germ. hist., 1746–1803.

**SPRENGER, B.**, a German agriculturist and writer on the Cultivation of the Vine, 1724–1791.

**SPRENGER, P.**, a Germ. historian, 1735–1806.

**SPURSTOW, WILLIAM**, minister of Hackney, near London, at the period of the civil wars, author of religious works, and of attacks on episcopacy, published under the name of *Smectymmus*; d. 1666.

[Spurzheim's Monument, Mount Auburn Cemetery, Cambridge.]

**SPURZHEIM, JOHN GASPAR**, a famous name in the history of phrenological science, was born at Longwich, near Treves, in 1776, and became acquainted with Dr. Gall at Vienna, where he studied medicine. From 1805 till 1813 he was the constant companion of Gall in his travels and scientific researches, and subsequently became an active promulgator of the new doctrine in England and France. He died in 1832, a few months after his arrival in Boston, United States. One of his distinct claims is that of having demonstrated the fibrous structure of the brain; but his works are too well known to require particular description.

**SQUARCIONE, FRANCESCO**, a painter of the Venetian school, and virtuoso of art, 1394–1474.

**SQUIRE, SAMUEL**, a learned and exemplary English prelate, was born at Warminster, in 1714; and after obtaining various preferments, reached the see of St. David's; and died in 1766. He wrote several works, theological and political.

**STAAL, Madame De**, whose maiden name was **DE LAUNAI**, was the daughter of a painter at Paris, who abandoned her when a child, and she was taken into the priory of St. Louis, at Rouen. After this, she became waiting-woman to the Duchess of Maine, when her literary talents were suddenly discovered by her being found to be the author of a very witty letter to M. de Fontenelle, on the subject of a beautiful girl at Paris, who was said to be possessed, which imposture was at that time occupying public

attention. From that time the duchess reposed an entire confidence in her; and Mademoiselle de Launais shared in her misfortune, by being committed to the Bastille. After her release, she married M. de Staal, an officer of the Swiss guards; wrote some entertaining 'Memoirs of her Life,' and died 1750.

STABEN, H., a Flemish painter, 1578-1658.

STACE, P. P., or STATIUS, a Latin poet, 61-96.

STACKHOUSE, JOHN, nephew of the celebrated divine, distinguished as a botanist, died 1819.

STACKHOUSE, THOMAS, a divine of the church of England, who was many years curate of Finchley, in Middlesex, and vicar of Benham, in Berkshire. He wrote a 'Review of the Controversy concerning Miracles,' on the 'Miseries of the inferior Clergy,' a 'Body of Practical Divinity,' and a 'Defence of the Christian Religion;' but his most important work, which has often been reprinted, is his 'History of the Bible,' 2 vols. folio. Born 1680; died 1752.—There was another Rev. THOMAS STACKHOUSE, who published 'A Greek Grammar,' a 'General View of Ancient History, Chronology, and Geography;' and an 'Atlas of Ancient and Modern Geography.'

STADION, PHIL., Count, a diplomatist in the service of Austria, time of Napoleon, 1768-1824.

STADIUS, J., a Flemish astronomer, 1527-79.

STADLER, M., a Ger. mus. compos. 1743-1833.

STAEL-HOLSTEIN, ANNA LOUISA GERMAINE NECKER, Baroness De, was born at Paris, in 1766, where the elevation of her father, M. Necker, to the ministry of finance, brought him into close connection with the most brilliant circles of the capital. She soon displayed signs of a precocious genius; and the encouragement to converse which she received in this society, and the various excitements which it furnished to her faculties, had an important influence on the formation of her mind. Her earliest productions were 'Sophia,' a comedy, written in 1786, and two tragedies, 'Lady Jane Grey,' and 'Montmorency;' but her 'Lettres sur les Ouvrages et le Caractère de J. J. Rousseau,' printed in 1788, first attracted the public notice. In 1786 she was married to the Baron de Stael-Holstein, Swedish ambassador to the French court. She was warmly attached to the principles of liberty; and the breaking out of the revolution, in 1789, necessarily exercised a powerful influence both on her mind and fate. During Robespierre's ascendancy, she exerted herself, even at the hazard of her life, to save the victims, and published a powerful and eloquent 'Defence of the Queen.' The populace being called to riot and murder, she attempted to leave Paris, but was detained, and escaped the popular fury only by a remarkable concurrence of circumstances. When Sweden recognized the French republic, her husband was again sent as ambassador to Paris, whither she also returned in 1795. Barras became her friend; and she acquired so much influence, that on Talleyrand's return from America, in 1796, she obtained, through Barras, his appointment to the ministry of foreign affairs. In Dec. 1797, she for the first time saw Buonaparte, then at Paris, preparing for his expedition to Egypt; and the admiration with which she had regarded the conqueror of Italy was succeeded by a sentiment bordering on aversion, which appears to have been mutual; and in 1801, in consequence of her attempting to thwart his government, she was ordered to quit Paris. After visiting Germany, Prussia, and Italy, she returned to France, and published her romance of 'Delphine;' but this work, and a tract entitled 'Les Dernières Vues de Politique et de Finance,' published by M. Necker,

had given so much offence to Napoleon (who had no great esteem for female politicians), that in 1803 he banished her from his territories. Her peregrinations were next extended to Moscow, Stockholm, and London; nor did she again behold her favorite abode, Paris, till after the restoration of Louis XVIII. On the escape of Buonaparte from Elba, she retired to Coppet; and, after the battle of Waterloo, she once more made her appearance in the French capital, with her daughter, who was married to the Duke de Broglie. She was favorably received by the king, and obtained an order on the royal treasury for the payment of two millions, which had been deposited there by her father. Her husband, the baron, died in 1802; and in 1811 she was married to M. de Rocca, a young French officer, by whom she had a son; but their union was kept secret till after her death. She died in 1817. Besides the works before-mentioned, she wrote the romance of 'Corinne,' 'Considerations on the French Revolution,' 'Dramatic Essays,' 'Considerations on Literature,' 'Germany,' 'Ten Years of Exile,' &c.

STAEL-HOLSTEIN, ERIC MAGNUS, Baron De, a Swedish diplomatist, born 1725, minister plenipotentiary at the court of France from 1783 to 1799, died 1802. He married the celebrated daughter of Necker in 1786, and assisted passively in the French revolution till his recall.

STAFFORD, a noble family belonging to the Norman aristocracy of England. The principal historical names are:—HUMPHREY, a partisan of Henry VI., created duke of Buckingham 1465. HENRY, his grandson, a favorite of Richard III., beheaded 1483. EDWARD, beheaded on accusation of treason by Henry VIII. 1521.

STAFFORD, ANTHONY, a learned writer, author of 'The Life and Death of Henry, Lord Stafford,' died 1641.

STAFFORD, WILLIAM HOWARD, earl of, who received the title by marriage with the heiress of that house in 1640, was the second son of Thomas, duke of Norfolk. He was executed in connection with the gunpowder plot 1680.

STAHL, GEORGE ERNEST, an eminent German physician and chemist, was born at Anspach, in 1660, studied at Jena, became physician to the king of Prussia, and died in 1734. His discoveries and theories in medical science were highly ingenious and valuable; and he may be ranked as one of the most illustrious medical philosophers of his age.

STAHEMBERG, GUIDO BALDI, Count De, a celebrated Austrian field-marshal, was born in 1657. He commanded the imperial army in Germany, Italy, and Spain; and during a long career was distinguished for his military skill and bravery. Died 1737.

STAINER, or STAYNER, SIR RICHARD, a naval officer, time of Cromwell and Charles II., d. 1662.

STAIR. See DALRYMPLE.

STALBENT, A., a Flemish painter, 1580-1660.

STALHENS, J., a Fr. theologian, 1595-1681.

STANCARI, F., an Ital. Hebraist, 1501-1574.

STANCAIRI, V. F., an Italian mathematician and man of letters, 1678-1709.

STANBRIDGE, JOHN, a learned schoolmaster and grammarian, known from 1481 to 1522.

STANDISH, FRANK HALL, author of the 'Life of Voltaire,' &c., and well known by his elegant taste for the arts, was the son of Anthony Hall, esq., of Flass, in the county of Durham; and having succeeded to the estates of Sir Frank Standish, bart., as cousin and heir at law, assumed the name, &c. by royal license. Having the opportunity of gratifying his natural inclination by foreign travels, for acquir-

ing information on classic antiquities and literature, and being moreover possessed of an exquisite judgment as a connoisseur of the fine arts, he made an admirable collection of the best pictures, books, manuscripts, &c. during his sojourn on the continent; the whole of which he bequeathed to Louis Philippe, king of the French, 'in token (as he says) of his esteem for a generous and polite nation, one that is always ready to welcome the traveller and relieve the stranger, and one that he has ever gone to with pleasure and quitted with regret.' The works published by Mr. Standish are as follows: 'The Life of Voltaire,' 'The Shores of the Mediterranean,' 2 vols.; 'Notices on the Northern Capitals of Europe,' 'Seville and its Vicinity,' and a volume of 'Poems.' Died, aged 42, Dec. 1840.

STANDISH, MILES, the first captain of the settlers at Plymouth, N. E., was born in England 1584, and came to America with the pilgrim fathers in 1620. He exhibited great courage and skill in protecting the settlement from the Indians. Died 1656.

STANHOPE, a noble English family, principal of whom are:—JAMES, the first earl, who distinguished himself both as a diplomatist and military officer in the wars of William III., born in Hertfordshire 1673, died 1721. CHARLES, grandson of the preceding, and third earl, born 1753, was distinguished as a man of science by several valuable inventions, among which are the printing press, known by his name, a calculating machine, a vessel to sail against wind and tide, locks for canals, a method for securing buildings from fire, and a monochord for tuning musical instruments. At the period of the French revolution he openly avowed republican sentiments, and even laid aside the insignia of the peerage. By his first wife, daughter of the great earl of Chatham, he had three daughters, one of whom is the subject of the following notice; his second wife, daughter of Mr. Henry Grenville, bore him three sons; died 1816.

STANHOPE, LADY HESTER, whose remarkable life in Mount Lebanon may be numbered among the most interesting romances of history, was born in 1766. Her father was the celebrated Lord Stanhope, and her mother a daughter of the great Earl Chatham, consequently she was niece to William Pitt, in whose house she resided, acting as his private secretary, and sharing in all his confidences. Biographers are silent on the causes which influenced her fate, after the death of her uncle, but they were principally two:—First, the disgust of her high nature for European society, created by her knowledge of the secrets of diplomacy, and the hollow deceitful life of all around her; and secondly, the mystic influence which prevailed for about ten years at that period, and of which history takes little note. It is certain, however, that from 1794 to the death of Pitt, startling announcements were continually made by private letters to the minister, and prophecies were actually fulfilled both in England and France; it is probable that these circumstances, exaggerated by her unrestrained imagination, and her longing for the free simplicity of nature, finally determined Lady Stanhope to leave England. William Pitt having recommended his niece to the care of the nation, she received a pension of £1,200 per annum, with which, after his death, she commenced a life of great state in the East, and acquired immense influence over the Arabian population. Her manner of life and romantic style are well known; we will only add, therefore, that it is unfair to judge her character from the reports of English travellers, for she was one of those high-souled women who not

only refused allegiance to the empty mannerisms she had cast off, but was well able to answer every fool who forced his way into her presence according to his folly. She never married, but adopted the habit of an Arabian cavalier, and under those bright skies, rode and dwelt where she pleased, virtually queen of the deserts, and mistress of the ancient palaces of Zenobia. Her permanent abode was in Mount Lebanon, about eight miles from Sidon, where she died in 1839. [E.R.]

STANHOPE, P. D. See CHESTERFIELD.

STANISLAUS, a bishop of Cracovia, k. 1079.

STANISLAUS, AUGUSTUS, the last king of Poland, was a son of Count Stanislaus Poniatowski, and of the princess Czartoryska. He was born in Lithuania in 1732, and was advanced to the throne by the intrigues of Catharine of Russia, aided by another of her favorites, the Polish traitor, BRANESKI, in 1764. It is hardly necessary to mention that the crown of Poland was elective, and that the people had been kept in a state of serfdom under a powerful aristocracy,—circumstances exceedingly favorable to the Russian designs, and productive at last of the infamous partition of Poland, and the virtual effacement of that ancient kingdom from the map of Europe. The first partition of Poland between Russia, Prussia, and Austria took place in 1773, and the second, after a long struggle, in 1792, when Kosciusko was defeated by the Russian general, Suwarrow. Stanislaus abdicated his vain title in 1795, and took up his abode in Russia, where he died, in receipt of a pension, the proper reward of his career, in 1798. [E.R.]

STANLEY, ANTHONY DUMOND, an American mathematician, professor of mathematics in Yale College, and author of various elementary works on natural science, was born in Conn. 1810, died 1853.

STANLEY, the Right Rev. EDWARD, bishop of Norwich, was the younger son of Sir John Thomas Stanley, bart., of Alderley, in Cheshire, and was born in 1770. Having finished his studies at St. John's College, Cambridge, he was presented by his father to the rectory of Alderley in 1805; and here he labored for upwards of 30 years in the faithful discharge of his pastoral duties. His connection with the Whig party led to his nomination to the see of Norwich in 1837; and such was his unwearied devotion to every good and useful work, his sincerity, his disinterestedness, and his pure and active benevolence in all the relations of life, that his character truly corresponded with the apostolic portrait of a Christian bishop. Bishop Stanley also attained distinction as an author. Whilst rector of Alderley, he occasionally delivered lectures on various branches of natural history, and contributed papers on the same subject to Blackwood's and the British Magazine, besides publishing various pamphlets on questions more immediately connected with his clerical office. But his most popular work was his 'Familiar History of Birds,' published in 1835, which has gone through several editions. Died Sept. 6, 1849.

STANLEY, JOHN, a musical composer, 1713–86.

STANLEY, THOMAS, the name of three accomplished men of letters, the first of whom, SIR THOMAS STANLEY, of Laytonstone, in Essex, wrote poems, and was knighted by Charles I. The second THOMAS, and most famous of the three, was his son; he was a master of philosophy and polite learning, and a friend of William Fairfax, the translator of Tasso; his works are 'The History of Philosophy, and Lives of the Philosophers,' and some original poems, and translations from the Greek, born 1625, died in London, 1678. The third of the name was a son of

the latter, who translated, when very young, the Histories of Ælian.

STANLEY, WM., a dignitary of the church, author of 'The Devotion of the Church of Rome compared with the Devotion of the Church of England,' 1647-1731.

STANLY, JOHN, an eminent lawyer of North Carolina, and a member of the legislature of that state and of Congress. Died 1833.

STANSBURY, TOBIAS E., an American statesman of Maryland, died 1850.

STANSEL, V., a German astronomer, 1621-90.

STANYHURST, RICHARD, an Irish clergyman, known as a poet and historian, 1546-1618.

STANZIONI, M., an Ital. painter, 1585-1656.

STAPEL, JOHN BODÆUS A., a Dutch physician, and botanist, honored by Linnæus, died 1636.

STAPLETON, SIR ROBERT, a native of Carleton, in Yorkshire, who fought in the interest of Charles I. at the battle of Edgehill, 1642, and adhered steadfastly to the royal cause; he wrote several dramatic pieces, and translations of the classic poets, died 1669.

STAPLETON, THOMAS, Roman Catholic professor of divinity at Louvain, known as a learned controversial writer, 1535-1598.

STARCK, SAMUEL, a native of Pomerania, distinguished as a theologian and Oriental scholar, 1640-1697. His grandson, JOHN AUGUSTUS VON, a German divine and theological writer, born at Schwerin, in 1741. He was professor of oriental literature and antiquities at St. Petersburg, subsequently filled the chair of philosophy at Mittau, and in 1781 he was appointed first preacher at the court of Darmstadt, where he was highly esteemed by the Landgrave of Hesse, who in 1811 made him a baron. Among his principal works are, 'The History of the First Age of the Christian Church,' 3 vols.; and 'The Triumph of Philosophy in the Eighteenth Century.' Died 1816.

STARK, JOHN, an American revolutionary general, was born in N. H. 1728. In the colonial war with the French he distinguished himself at Ticonderoga in 1758. In the revolution he won renown at Bunker Hill, and at Taunton, and gained a brilliant victory at Bennington. He was among the bravest and most enterprising officers during the revolution. Died 1822.

STARK, W., a London physician, died 1769.

STARNINA, J., an Italian painter, 1354-1406.

STAROWOLSKI, SIMON, a Polish ecclesiastic and historian of his country, died 1656.

STASZIC, S., a Polish patriot, 1755-1806.

STATIUS, PUBLIUS P., a Roman poet, 61-96.

STAUNTON, SIR GEORGE LEONARD, an Irish physician, who rose to the post of attorney-general in Grenada, and having attached himself to Lord Macartney in the character of secretary, was afterwards known as a diplomatist, and his intimate adviser; his principal services were displayed in the arrest of Major-general Stuart, commander-in-chief of the Madras army, in treating with Tippoo Sultan, and in the embassy to China; of the latter he published an interesting account in 2 vols. 4to, 1797. Born in Galway, 1737; died 1801.

STAUPITZ, J., a German theologian, d. 1527.

STAVELEY, T., a learned antiquary, died 1683.

STEARNS, ASAHEL, an American lawyer of distinction, and legal writer. Author of a work on 'Real Actions' &c., professor of law in the school at Cambridge, Mass. Died 1839, aged 64.

STEBBING, HENRY, a friend of Bishop Sherlock, known as a writer in the Bangorian controversy, and the attack on Warburton's Legation, d. 1763.

STEDMAN, C., author of a history of the American war, 1794.

STEDMAN, J. G., a Scotch officer in the Dutch East India service, author of an interesting narrative, 1745-1797.

STEDINGK, ADAM, Baron Von, a distinguished Swedish officer, statesman and diplomatist, was born in Swedish Pomerania, 1746. Took service in France, and became a great favorite of Marie Antoinette, and joined the French in their succor of the American revolutionists in 1778, and was with Count D'Estaing in the unsuccessful attack upon the British at Savannah. Died 1836.

[Steele's House at Llanngunnor.]

STEELE, SIR RICHARD, was born in 1671 at Dublin, to which his father had gone from England as secretary to the Lord-Lieutenant. At the Charterhouse School in London, he formed a life-long intimacy with Addison. Steele next went to Oxford, but, bent on being a soldier, and discouraged by his family, eloped and enlisted in the Horse Guards. His officers, knowing him to be a gentleman, and becoming aware of his attractive social qualities, procured an ensign's commission for him; and, in the gay company of the mess, he exhibited and cherished his good-hearted liveliness, his inclination for dissipated extravagance, and the sanguine flightiness which in later life made him a rash and unsuccessful speculator. Intervals of repentance for his follies gave birth, while he was in the army, to his tract 'The Christian Hero;' but he dealt more in play-writing, and produced lively and popular comedies, which had the merit (rare on the English stage for some time previously) of being morally correct. His first piece, 'The Funeral, or Love A-la-mode,' was acted in 1701, 'The Tender Husband' in 1703, and 'The Lying Lover' in 1704. His only subsequent drama ('The Drummer' being really Addison's) was 'The Conscious Lovers,' which did not appear till 1722. In 1709, by starting 'The Tatler,' he had the great merit of striking out a new kind of literary composition; and his large share in this first periodical, the active part he took in the 'Spectator,' and his still more active authorship in 'The Guardian,' place him second only to Addison among the Essayists. Before commencing 'The Tatler,' he had become useful as a political pamphleteer on the Whig side, and was appointed 'Gazette' writer, and afterwards a commissioner of stamps. On the fall of the Whig ministry in 1710, the Tories, anxious to obtain the aid of his pen, allowed him to keep his place. But Steele, honorably true to his party, refused to write for their enemies; and, not content with silence, he insisted in 1713 on attacking the ministry in 'The Guardian,' and resigned

his commissionership. He was then brought into the House of Commons, but expelled for matter relating to the succession to the crown, contained in 'The Englishman' and 'The Crisis.' After the accession of George I. he again sat in parliament, was knighted, and appointed a commissioner for the forfeited estates in Scotland. He continued to write on politics. His 'Whig Examiner' has been noticed in the memoir of Addison. In his latest years he was poor and embarrassed; and he died in Wales in 1729. [W.S.]

STEEN, F. VAN, a Flemish painter, born 1604.

STEEN, JAN, an eminent painter, was born at Leyden, in 1636. One of his masters was Von Goyen, whose daughter he married; but Steen proved a dissipated character, and totally neglected his family. Died 1689.

STEENWYCK, HENRY VAN, a Flemish painter, remarkable for his skill in delineating the interiors of churches and temples, 1550-1604. His son, of the same names, distinguished in the same line of art, was a friend of Vandyck, who introduced him to Charles I. He was born in 1589, and died in London at an unknown date. Another STEENWYCK, celebrated as a painter of still life, was born at Breda about 1640.

STEEVENS, GEORGE, the well-known commentator on the works of Shakspeare, was born at Stepney 1736, and first appeared as an editor of the immortal dramatist in 1766. In 1770 he associated his labors with those of Johnson, and their joint edition appeared in 10 vols. 8vo, 1773. In 1793 it was reprinted in 15 vols., the criticisms of Malone having appeared in the interval. Steevens died in 1800.

STEFANI, P. DE, the earliest sculptor of the Neapolitan school, about 1228-1310. His brother, THOMASO, a painter, was born at Naples abt. 1230.

STEFANO, called *Il Fiorentino*, an Italian painter, grandson and pupil of Giotto, 1301-1350. THOMASO, his supposed son, called, from his style, *Il Giotto*, 1324-1356.

STEFFANI, AGOSTINO, a musical composer, claimed by the Germans as a native of Leipzig, and by the Italians as a countryman of theirs, was born in 1665, and was first known as a chorister at St. Mark's at Venice. He composed several operas, but the most celebrated and numerous of his works are his chamber duets. Died 1729.

STEFFENS, HEINRICH, a naturalist, miscellaneous writer, and patriot of Copenhagen, 1773-1848.

STEIBELT, D., a German composer, 1760-1823.

STEIGUER, N. F. DE, a Swiss patriot, 1729-99.

STEIN, CHRISTOPHER GODFREY DANIEL, a geographer and compiler, prof. at Berlin, 1771-1830.

STEIN, G. W., a Germ. accoucheur, 1737-1803.

STEIN, H. F. KARL, Baron Von, a Prussian statesman and enemy of Napoleon, was born at Nassau 1757, and became minister of finance and trade at Berlin on the death of Struensee 1804. Having been exiled from Prussia by the influence of the dictator of Europe, he retired to Prague, and in the disastrous year 1812, was with the emperor Alexander at St. Petersburg. He lived in privacy after the peace till 1827, when political circumstances recalled him to public life; died 1831.

STEINBART, G. S., a Germ. philosopher, 1738-1809.

STELLA, a family of French artists:—FRANCIS, a painter of altar-pieces, 1563-1605. JAMES, the most eminent of the family, a painter, designer, and engraver, 1596-1657. FRANCIS, brother of the latter, 1603-1647. ANTOINE, their nephew, a painter

and engraver, 1630-1682. CLAUDINE, sister of Antoine, 1634-1697. FRANCOISE, a second sister, dates unknown. ANTOINETTE, a third sister, an engraver, 1635-1676.

STELLA, F. A., a Venetian writer, 1757-1833.

STELLA, J. C., an Italian poet, 16th century.

STELLINI, J., an Italian moralist, 1699-1770.

STELLUTS, F., an Ital. naturalist, born 1577.

STENBOCK, MAGNUS, Count, a Swedish general and patriot, period of Charles XII., was born in 1664, and first bore arms under the princes of Waldeck and Baden, in the coalition against Louis XIV. He joined the army of Charles XII. at the commencement of his campaigns, and in 1701 participated in the glorious victory of Narva. He then followed Charles in his meteor-like progress through Poland, and when, in 1707, the Swedish hero halted in Saxony, meditating where next he should lead his veterans, Stenbock was made governor of Scania; in which post he gained the confidence of the people by his firm administration of justice. In 1709 Charles was defeated by Peter the Great at the battle of Pultowa, and soon found himself shut up in Bender, on Turkish territory. The Danes, who had been defeated by Charles at the beginning of his career, took advantage of this crisis to break through their engagements, and send an invading army against Scania, where they took the town of Helsingburgh. Stenbock rushed to the field at the head of the Swedish militia, consisting partly of undisciplined peasants assembled in haste, and rivaling his absent sovereign in glory, gave the Danes a bloody defeat; he even followed the enemy into Germany, captured their cities, and gained a second great victory over the combined Saxon and Danish army. This, however, was the limit of his success. Listening to perfidious counsels, he penetrated into Holland, and the Russians having now joined his other enemies, he was at last compelled to capitulate. Stenbock became the prisoner of the Danes in 1712, and died in a miserable confinement in 1717. [E.R.]

STENGEL, L., a German physician, 1523-87.

STENO, M., a doge of Venice, 1400-1413.

STENO, NICHOLAS, in Latin *Stenonius*, a famous anatomist, author of professional and theological works, born at Copenhagen 1638, died 1687.

STEPHANUS ATHENIENSIS, a Greek physician and professor of Christianity, 7th century.

STEPHANUS BYZANTINUS, a Greek grammarian and lexicographer, 5th century.

STEPHEN, the name of several saints:—1. *The Jewish martyr*, stoned shortly after the crucifixion of the Saviour, as recorded in Acts. 2. *The first pope* of the name. 3. *The first king of Hungary* of the name. 4. *Stephen of Muret*, founder of a religious order in France, died 1124. 5. *An English abbot*, surnamed Harding, founder of several monasteries, died 1134.

STEPHEN, several popes of Rome:—STEPHEN I., reigned 253-257. STEPHEN II., died four days after his election, 752. STEPHEN III., successor of the latter; in his time Pepin was invited into Italy to subdue Astolphus, king of the Lombards, and the foundation was laid for the temporal sovereignty of the papacy, died 757. STEPHEN IV., reigned 768-772. STEPHEN V., who crowned Louis, son of Charlemagne, emperor, reigned seven months only, 817. STEPHEN VI., reigned 885-891. STEPHEN VII., remarkable chiefly for his disgraceful treatment of the corpse of Boniface V., succeeded that pontiff in 896, and was strangled by his predecessor's friends, 897. STEPHEN VIII., predecessor of

John, son of Marozia, 929-931. STEPHEN IX., another pope of the period in which Marozia figured, 939-942. STEPHEN X., an advocate for the marriage of the priests, and distinguished by his efforts to unite the two churches, reigned only a few months, 1057-1058. Sometimes only *nine* popes of this name are reckoned, STEPHEN II. being omitted.

STEPHEN, four kings of Hungary:—STEPHEN I., introduced Christianity into that country, and published a body of laws; he is numbered with the saints, and gives his name to the famous crown, reigned 997-1038. STEPHEN II., reigned 1114-1131. STEPHEN III., succeeded 1161; he aided the emperor, Manuel Comnenus, against the Venetians, and was twice dethroned for short periods, first by his uncle, Ladislas; he died 1173. STEPHEN IV., reigned two years only, but gained an illustrious name by his victories over Ottocar, king of Bohemia, 1270-1272.

STEPHEN, king of Poland, surnamed BATHORI, was a noble Hungarian, born 1532, elected prince of Transylvania 1571, succeeded to Henry of Valois, as king of Poland 1575, died 1586.

STEPHEN, king of England, was the third son of Adela, fourth daughter of William the Conqueror, and of Stephen, count of Blois. He was born in 1105, and was invited to the English court by his uncle, Henry I., who enriched him with estates and honors, and finally promoted his marriage with Matilda, heiress of the county of Boulogne, and niece to David, king of Scotland. On Henry's death in 1135, Stephen, who was then in France, hastened to England, and was crowned king to the prejudice of Henry's daughter, Matilda, empress of Germany; this event, however, was an advantage to the English nation, for he was a man 'noble and hardy, of passing comely favor and personage, excelling in martial policy, gentleness, and liberality towards all men, and though he had continual wars, yet did he never burthen his commons with exactions.' In such an age, there could be no question between a character thus described, residing at the seat of government, and a woman connected by the nearest ties to a distant land; and if many of the barons kept aloof from Stephen, it was probably far more from a sense of the privileged despotism they might have retained in the latter case, than from any regard to the welfare of the state. It would seem, in fact, that Stephen's principal difficulties arose from his regard for the old Saxon population at a period when the barons were rising into importance, and to the disgust excited by it among the chivalrous aristocracy introduced by his grandfather; the insolence of whose bearing, and their followers infesting the highways, could not but be galling to the peaceful burgher. The intestine troubles produced by these causes were commenced by David of Scotland, to whom Matilda was more nearly related than Stephen. Invading England in the spring of 1136, that prince was induced to retire by the cession of Cumberland; but returning again, in the year following, was defeated at the battle of the Standard, fought on Cutton Moor, August 22, 1138. Then followed, in September, 1139, the arrival of Matilda, supported by the earl of Gloucester, and the disaffected barons, to whose forces Stephen was compelled to yield: the triumph of Matilda lasted from February to September, 1141, when the king recovered his liberty, and his rival took refuge in Normandy. Nor yet was Stephen allowed to wear the crown in peace, for Matilda having resigned her pretensions to Henry Plantagenet, her son, that chivalrous prince landed an army at Wareham, in 1153, and met the forces

of Stephen at Wallingford. The threatened bloodshed, however, was now avoided by an armistice, for at this juncture the son of Stephen expired, and he was easily prevailed upon to conclude a treaty recognizing Henry as his successor, who had only just arrived at the age of manhood, and could afford to wait a few years: the interval was brief indeed, for Stephen died the year following, aged forty-nine, 1154. The foreign troops drawn by Stephen from Brittany and Flanders, and the fortresses erected by the barons in their contests with him, were alike harassing to the people during his troubled reign, and besides all this he maintained a difficult struggle with the papal clergy. [E.R.]

STEPHEN, JAMES, an eminent lawyer and political writer, was a native of Poole, in Dorsetshire, received his education at Winchester, was brought up as a barrister, and became parliamentary reporter for the Morning Chronicle. He at length obtained an appointment in the prize court at the island of St. Christopher's, where he realized a handsome fortune; and on his return to England he formed a matrimonial alliance with the family of Mr. Wilberforce. Having acquired, while abroad, an intimate knowledge of colonial law, he now obtained a large and lucrative share of practice as an advocate in prize causes before the privy council. As the violation of territory by the masters of American vessels often came under his notice, he published his sentiments in an anonymous pamphlet, entitled 'War in Disguise, or the Frauds of Neutral Flags;' when the talents and views displayed by the writer attracted the attention of government, and he was soon after introduced into parliament as a member for Tralee. He suggested and arranged the whole system of the continental blockade, which for many years occasioned the greatest embarrassment to Buonaparte; and for his services the minister appointed him a master in chancery, which office he held during 20 years. He also distinguished himself, both in the senate and by his pen, as the constant friend of African emancipation; and was regarded by the West India planters as their most formidable antagonist. Died 1832.

STEPHEN, JOHN, a Danish hist., 1599-1650.

STEPHENS, ALEXANDER, a miscellaneous writer, born at Elgin, in Scotland, 1757; died 1821. His works are 'A History of the War of the French Revolution,' 'Memoirs of Horne Tooke,' 'Public Characters.' Besides these he was a contributor to the 'Annual Obituary,' and the 'Monthly Magazine.'

STEPHENS, HENRY, the *first* of a family of French printers, the most distinguished in those early times, when the most learned men devoted themselves to the perfection of the new art; he was born at Paris about 1470, began printing in 1503, and died 1520. FRANCIS, his eldest son, is known to have carried on the business from 1537 to 1547. ROBERT, the brother of Francis, and second son of Henry, born at Paris 1503, was protected by Francis I., but after that monarch's death had a severe struggle with the doctors of the Sorbonne: their enmity drove him to Geneva in 1552, and he died there in the Calvinist faith, 1559. CHARLES, brother of the latter, carried on the noble work in which his family had embarked their fortunes, from 1535 to 1564. HENRY, son of Robert, one of the most learned men and finest spirits of his age, was born at Paris 1532; he ruined himself in the cause, and died in the hospital of Lyons 1506. Several others of the family are mentioned, the last, ETIENNE ANTOINE, born at Geneva 1594, ended his arduous career at the hospital Hôtel Dieu 1674.

STEPHENS, JAMES FRANCIS, an English entomologist, died 1852, aged 61.

STEPHENS, J., a learned divine, 1592-1665.

STEPHENS, JOHN, an officer of the army of James II., who maintained himself by his pen after the success of the revolution, and wrote several works for the booksellers, died 1726.

STEPHENS, JOHN LLOYD, an American traveller and writer, was born in Shrewsbury, New Jersey, November 28, 1805. He entered Columbia College of the city of New York, at the early age of 13, and continued there for the usual course of four years, having towards the end of his collegiate career reached the head of his class. On taking his degree he commenced the study of law, and was admitted in due time to the bar. He practised his profession for nearly eight years, but never with the ardor of a man determined to make it his vocation for life. Like many of his profession he early took an active part in politics, and became a partisan of the Democratic party, and was conspicuous among its advocates as a speaker at the political assembly at Tammany Hall. Suffering from a bronchial affection he was advised to travel, an advice his fondness for adventure made him joyfully follow. In 1834 he sailed for Europe, and having visited France, England, Italy, Greece, Turkey, and the north of Europe, he prolonged his absence by a journey to the East, and returned to New York in 1836. Previous to his return some of his letters written from Greece had been published in a magazine, edited by his friend, Charles F. Hoffman, which were received with such popular favor that he was induced to commence the career of an author. In 1837 he published his first work, entitled 'Incidents of Travel in Egypt, &c.' In 1838 the first publication was followed by his 'Incidents of Travel in Greece, Turkey, &c.' Such was the popular success of these books that the large number of 21,000 copies of the former and 12,000 of the latter, was printed in the course of a few years. They were also republished in England, and received with general favor. In 1839, President Van Buren, whose administration was marked by its appreciation of literary men, appointed him special ambassador to Central America for the negotiation of a treaty. Stephens availed himself of this occasion for an exploration of the ancient monuments of that country, and on his return to the United States, published in 1841, his 'Incidents of Travel in Central America, &c.,' which gave the result of his observation, in an interesting account of his personal adventures, and of his investigations of the remains of the Central American antiquities. He repeated his visit to Yucatan in 1842, and afterwards published a sequel to his former work, entitled 'Incidents of Travel in Yucatan.' Both books met with great success. In 1846 he was chosen a delegate from the city of New York to the convention appointed to revise the Constitution of the State. Mr. Stephens took an active part in the establishment of the first lines of American steamers between Europe and America. He was a director of the Ocean Steam Navigation Company, and sailed in the Washington, to represent the company in Europe, on her first trip to Southampton and Bremen. On this occasion, after passing through the felicitations with which the pioneer steamer was received at Southampton and Bremen, he paid a hurried visit to Humboldt at Potsdam. The graceful compliment was then proffered to that great philosopher and traveller of giving his name in anticipation to the proposed third steamer of the American lines, a compliment which was accepted

and finally consummated. Stephens published an account in the New York Literary World of his visit, to which he gave the title of 'An Hour with Humboldt.' In 1849 Mr. Stephens was appointed vice-president of the Panama Railroad Company, and thenceforward devoted himself with his characteristic energy to the fulfilment of its objects. He was commissioned to make the contract with the New Granadian government, and went to Bogota for that purpose, and succeeded by his personal influence in effecting an arrangement; securing the most favorable terms to the company. On his return to New York he was made president of the Panama Company, and passed the winters of 1851 and 1852 on the Isthmus of Darien, personally superintending the work of the railroad. Soon after his return to New York in 1852, he was attacked with a disease of the liver, which resulted in an abscess that terminated his life, after a tedious illness of several months, in the summer of 1852. The characteristics of the man have been thus marked by the editor of this work, in a published tribute to 'The Memory of Stephens:' 'His life was spent in action; and it is a sad thought that the very enthusiasm and energy which formed in him such marked characteristics, probably contributed, in no small degree, to send him to the grave at the comparatively early age of forty-seven. His travels in Central America subjected him to exposure and disease, of which, at the time, he thought less than they deserved. They doubtless gave to his constitution a blow which but little fitted it to encounter fresh exposure on the Isthmus of Panama, whither he was led by the same unconquerable energy and perseverance which had marked his previous career. The great work of connecting the two oceans proceeded too slowly for his enthusiastic nature. He saw its importance, and resolved that it should be finished speedily. As president of the company he repaired in person to the spot, and enduring toil, and exposure, and sickness, returned home but to die; but he has left his mark upon the age in which he lived. The railroad is nearly completed, and the first iron track between the Atlantic and Pacific is henceforth indelibly connected with the name of John L. Stephens.

STEPHENS, R., an Eng. antiquary, died 1732.

STEPHENS, W., an English divine, died 1736.

STEPHENSON, GEORGE, a civil engineer of extraordinary genius, not only in his art but for affairs in general. As the names of Brindley and Smeaton are connected with England's canal system; that of Arkwright with mechanical spinning; of Watt with the steam engine; of Fulton with steam navigation; so is that of George Stephenson connected with her railway system, and we may say with the railway system of the world. Born of humble parents at Wylam, in the county of Durham, about nine miles west of Newcastle-on-Tyne, in April, 1787, he seems to have been left to his own resources for education. His first job was picking turnips at twopence per day. As a boy he was a 'trapper' in the coal workings; and there, in the lonely hours he spent with the lives of the men in the pit depending on his attention to the *air trap* which he had to open and close, germinated the idea which, long after matured, entitles him to be classed among the great benefactors of mankind. When he was fourteen or fifteen years of age he worked at Water-row pit as brakesman on the waggon-way between Wylam and Newburn. He, therefore, became early experienced in the working of and laws of motion of waggons on railways. As he often referred to this experience

in later years, and to actual *experiments* made at that time, we have another proof to add to many more that genius will always declare itself as early as the special subject of its delight is presented for contemplation. About 1805 Stephenson left his father's roof and went to Killingworth, the centre of the collieries worked by the 'grand allies,' Lords Ravensworth and partners. He went to Killingworth still a brakesman; but soon afterwards got the charge of the steam engine, an advancement which arose from the circumstance of his having successfully remedied defects in the valve gear of the engine, after several ineffectual attempts had been made to do so by a then celebrated Geordy Dod, whose actual business it was. Stephenson had before this acquired a reputation among his fellow-workmen as a repairer of clocks and watches. Appointed *engineer* in consequence of this success, he married, and a son was born, an only child, Robert, who was early associated with his father in the glorious career tracked by the name of Stephenson, father and son. Between 1807 and 1815 Stephenson's attention was much drawn to the subject of locomotive engines, many attempts having been made during that period to introduce them on to the tramways and edge railways of the Northumberland and Durham coal districts, with but very partial success. After various trials and modifications of his designs, George Stephenson started a locomotive on the Killingworth railway on the 6th of March, 1815, which embodied every essential part of the locomotive of the present day, with the exception of the tubular boiler and expansion gear. This was not the starting point of Stephenson's public career, however, although it was about this period that from his genius having been turned in another, for the moment, more important direction, he actually did come prominently before the public. It was as an inventor of the miners' safety lamp that Stephenson's pre-eminent merit was first recognized. As an independent inventor of a safety lamp, depending on the same principles as that of Sir Humphrey Davy's lamp, Stephenson was presented by a number of the leading coal owners of the north with one thousand pounds and a piece of plate. On that occasion the chairman, Mr. Charles John Brandling, said:—'A great deal of controversy, and he was sorry to say of animosity, had prevailed upon the subject of the safety lamp; but this he trusted, after the example of moderation that had been set by Mr. Stephenson's friends, would subside, and all personalities cease to be remembered. As to the claim of that individual, to testify their gratitude to whom they were that day assembled, he thought every doubt must have been removed in the minds of unprejudiced persons by a perusal of the evidence recently laid before the public. He begged Mr. Stephenson's acceptance of this token of their esteem, wishing him health long to enjoy it, and to enable him to employ those talents with which Providence had blessed him for the benefit of his fellow-creatures.' Stephenson in acknowledging the gift, gave the following pledge, which was nobly redeemed during the subsequent part of his valuable life. 'I shall ever reflect with pride and gratitude that my labors have been honored with the approbation of such a distinguished meeting; and you may rest assured that my time and any talent I possess shall hereafter be employed in such manner as not to give you, gentlemen, any cause to regret the countenance and support you have so generously afforded me.' Though men of Stephenson's scope and frame of mind are in a great measure independent of education, they most thor-

oughly understand the advantages of it. George Stephenson, therefore, took special care to insure his son's receiving every advantage in this way, and was well rewarded even in the beginning; for Robert Stephenson carried off mathematical and philosophical prizes from Edinburgh university. The first locomotive railway, for the purposes of travelling according to the present principle of traction, was constructed between Stockton and Darlington. Stephenson was engineer. The safety-lamp testimonial had enabled him, in partnership with certain capitalists and his son, to establish the now world-renowned engine factory in Newcastle. On the opening of the Darlington railway, in 1825, Stephenson's engines travelled with a speed of ten miles an hour; but his ideas and anticipations of the capabilities of this mode of transit, both as to speed and the effect it would produce when generally adopted, as he foresaw it must be ultimately, were such as he did not then even dare to express for fear of being pronounced insane! With the engineering of the Liverpool and Manchester railway, Stephenson entered upon the field of his great fame; and from 1825 to 1847 he occupied the foremost position of all railway engineers, whether in Britain or on the continent. His son, and his pupils and assistants, spread the fame of his name and the principles of his practice from one end of the world to the other, and continue to do so. Stephenson was a man of iron frame of body and mind, of plain manners, ardent temperament, eminently social habits; too confident of his powers and too sure of his position to be ambitious; he unflinchingly pursued his own ends by all proper means, and seldom if ever failed in accomplishing his objects. He amassed great wealth, partly from his profession; but he was also an extensive coal proprietor, and it is no small portion of his renown that he mainly, on his own account, established the inland coal trade to the metropolis. He died at Tapton house near Chesterfield, aged sixty-seven, on the 12th August, 1848. [L.D.B.G.]

STEPNEY, GEORGE, an English poet and ambassador of the reign of James II., 1663–1707.

STERBEECK, F., a Flemish botanist, 17th ct.

STERLING, JOHN, one of the most independent and true-hearted thinkers of this age, generally known as an essayist and critic, was born at Kames castle, in the Isle of Bute, in 1806. His father, Captain Edward Sterling, was a native of Waterford in Ireland, but was descended from a Scotch officer—one of those who acquired military distinction in the army of Gustavus Adolphus. Captain Sterling also was a political writer, and editor of the *Times* newspaper. From 1810 to 1814 he resided in Glamorganshire, where his son became deeply imbued with that love of nature, and the 'metaphysical and religious' value of its scenes, which is so conspicuous in his letters and essays. On the fall of Napoleon in 1814 the family went to reside in France, and barely managed to effect their escape in the following year, when the exile of Elba returned to reassert his rights; the family then settled in London. In 1824 John Sterling was sent to Trinity College, Cambridge, and remained there till 1827, when he left without taking a degree, but returned for that purpose in 1833, on resolving to enter the Church of England. Here he studied the classics under Archdeacon Hare, and though he did not become a thorough scholar, it is pleasant to read the confession of his old teacher that he was 'something better' in the mastery which he obtained over the spirit of the old Greek poetry and philosophy. In the interval between leaving college and taking

orders, Sterling became a contributor to the *Athenæum* and other periodicals, and pursued his literary avocations in London, under the influence of such men as Coleridge and Wordsworth, not to forget his friends Carlyle and Frederick Maurice; in 1830 he married the sister of the lady who became the wife of the latter. The connection of Sterling with the church as curate of Hertsmonceux, of which place his friend, Archdeacon Hare, was rector, lasted no more than about six months, but in this period he devoted himself with religious zeal to all the arduous duties of a country curate; his health meanwhile giving way, and his convictions gradually ripening towards a more universal faith than that of the church articles. Before taking the curacy he had resided some two years at St. Vincent, in the West Indies, and after leaving it he once more travelled under more genial skies than those of England, a measure rendered necessary by his tendency to consumption. These travels extended, by easy stages and long halts, from the south of France to Italy and Madeira, and were varied by his occupations as an author, but still more by the restless energy of his mind as a thinker, engaged in the deep problems opened up by the study of German literature and the Bible—no longer to him a mere historical narrative but a great symbol, the interpretation of which none of his masters could furnish. About 1841 he published his tragedy of 'Strafford,' which had been to him a labor of love, the one in which his genius 'swam the lightest,' but it fell still-born from the press. In 1843 his sensitive frame, already weakened by the malady which consumed him, received a severe shock from the death of his mother and his wife within a day or two of each other, and he breathed his last, kindly watched in his last illness by Mrs. Maurice, in the spring of 1844. Having appointed Archdeacon Hare and Mr. Carlyle his literary executors, the former published a collection of his works, to which a memoir was prefixed, in 1848; and the latter his picturesque and affecting 'Life of John Sterling,' in 1851. We need not dwell on the distinction between these two works,—the one lamenting his earnest strivings towards the truth as a deplorable fall, and the other so graphically sketching the 'victorious believer and the victorious doer.' We may add, however, one pregnant sentence from the pen of Sterling himself:—"The quantity of inwardness, faith, and power, which has come before me in my own generation, cannot, I think, pass away into the Invisible without helping towards some great outward revolution. But oh! how perilous will be the position of any man who may stand forth as the leader and standard-bearer in such a movement! For how small and weakly charged were the "lofts of storied thunder" even in Luther's time, which the prince of this world could set loose against him, compared with those of modern civilization and philosophy, which could be just as fierce in their way as were, of old, the papacy and the empire." [E.R.]

STERN, J., a Bavarian painter, 1698-1746.

STERN, T., a Dutch engraver, 17th century.

STERNE, or STEARNE, JOHN, a learned Irish physician, nephew to the famous Usher, at the time of his birth bishop of Meath, was born in that county 1622, and died 1669. He was better known as a theologian than a physician, and has left some learned works. His son, JOHN, successively bishop of Dromore and Clogher, died 1745.

STERNE, LAURENCE, though born in 1713 at Clonmel, owed his Irish birth, and the passing of his childhood in Ireland, to the fact that his father,

the younger son of a Yorkshire squire, was then a lieutenant in a marching regiment. Laurence was educated by his father's kinsmen; and about 1740 a clerical uncle obtained for him a prebend in York Cathedral, and the living of Sutton, in the East Riding. In addition to these preferments, after his marriage in 1741, his wife's family presented him to the parish of Stillington. Thereafter, the two parishes being adjacent, he continued to perform duty in both, residing at Sutton, amusing himself (in his own words) with 'books, painting, fiddling, and shooting,' publishing a couple of sermons, quarrelling with his clerical brethren, and collecting, by observation and reading, the materials on which his literary fame was to be built. He became celebrated immediately on publishing the first two volumes of 'Tristram Shandy' in 1759; and his reputation increased till the appearance of the ninth and last volume in 1766. The 'Sentimental Journey,' which came out in 1768, was undoubtedly inferior, but is still the favorite with many readers. His way of life soon ceased to be, even outwardly, respectable. His publication of two volumes of Sermons in 1760 was a pecuniary speculation. In the same year he obtained another Yorkshire living; but his clerical duties seem to have occupied from this time very little of his attention. He wandered about, enjoying his notoriety in London, and making two continental journeys, the one into France, the other into Italy. The lightmindedness so evident in his works, and not least so in the posthumous 'Letters,' edited by his daughter, led him into dissolute habits, of which improvidence was the least serious. He died, in lodgings in London, in 1768, leaving his family quite unprovided for. The moral tendency of Sterne's writings is unquestionably low; his freedom of plagiarism, especially from Rabelais and Molière, is audacious; but his airy and graceful humor is admirable, and some of his characters are among the most natural and original of all comic portraits.

[W.S.]

STERNE, RICHARD, a native of Mansfield, in Nottinghamshire, who attended Laud at his execution in the character of chaplain, and after the restoration became archbishop of York. He wrote a treatise on Logic, and some Latin poems, besides his share in Walton's Polyglott Bible; 1596-1683.

STERNHOLD, THOMAS, a poet, was born in Hampshire, and educated at Oxford; after which he became groom of the robes to Henry VIII. and Edward VI. He died in 1549. Sternhold versified 51 of the Psalms; the remainder were the productions of Hopkins, Norton, and others.

STESICHORUS, a Greek poet, 640-560 B.C.

STETTEN, PAUL VON, a Ger. historian, 1705-1786. His brother, of the same names, 1731-1808.

STEUBEN, FREDERIC WM. AUGUSTUS, baron, a Prussian officer in the service of America during the revolutionary war. He came to America in 1777, and his offer of service was readily accepted, and having received the appointment of inspector-general with the rank of major-general, he proved of efficient service to the American army, in establishing a system of discipline and tactics, a perfect knowledge of which he had acquired as an officer under Frederick the Great. After the war he remained in New York, where he died, 1795.

STEVENS, A., an English architect, died 1796.

STEVENS, EDWARD, an American revolutionary officer of distinction, was promoted to the rank of general. Died 1820.

STEVENS, GEORGE ALEXANDER, a satirist and humorous writer, originally known as a strolling

player, author of 'The History of Pope Fool,' a novel, 'Lectures upon Heads,' and a number of songs, the most popular of which was 'The Storm;' died 1784.

STEVENS, R. J. S., a composer, 1753-1837.

STEVENS, WILLIAM, a tradesman of London, cousin to Bishop Horne, and distinguished like him by his theological writings, 1732-1807.

STEVENS, W. B., a divine and poet, 1755-1800.

STEVENSON, SIR JOHN ANDREW, an eminent musical composer, was born at Dublin, in 1761. At 10 years of age he was received into the choir school of Christchurch, where he attained the elements of a musical education, and soon gave promise of those abilities for which he was afterwards so deservedly celebrated. In connection with Mr. T. Moore, he rescued the matchless airs of their native land from oblivion, by adapting them to the words of the 'Irish Melodies,' and enriching the accompaniments with the elaborate graces of modern science. He also produced a much-admired oratorio, entitled 'The Thanksgiving,' and a great variety of anthems, glees, &c., many of which still retain their popularity. Died 1833.

STEVENSON, ROBERT, a civil engineer, the chief points of whose character were great sagacity, fortitude, and perseverance. In private life he was a man of sterling worth, who consecrated to beneficial ends every talent committed to his trust. Born at Glasgow in June, 1772, the son of a West India merchant, he was, while yet an infant, left fatherless, and circumstances conspired to render the widow and her only son, Robert, by no means well provided for. But the mother's energy overcame these difficulties, and Robert Stevenson received a good elementary education. About 1787 his mother married Mr. Thomas Smith, an ingenious man, who had commenced life as a tinsmith in Edinburgh, but who afterwards successfully improved the mode of illuminating lighthouses, by substituting oil lamps with parabolic mirrors for the open coal fires which formerly served as beacons for the mariner. Stevenson was at the early age of nineteen intrusted by his step-father with the superintendence of the erection of the lighthouse on the Little Cumbrae in the Frith of Clyde, and through this connection became, about 1797, engineer to the Northern Lighthouse Board, an office which he resigned in 1843, after having filled its arduous duties for about half a century. The great work of Stevenson's life, that upon which his reputation as an engineer principally rests, is the Bell Rock lighthouse. To him is due the honor of conceiving and executing a tower of masonry on the Bell Rock, a situation, undoubtedly, from the level of the rock, which is covered at every tide, of much greater difficulty than the Eddystone. His zeal, ever alive to the possibility of improving on the conceptions of his great master, Smeaton, led him to introduce some advantageous changes in the arrangements of the masonry of the tower, suggested by the facility of procuring stones of greater dimensions than Smeaton had been able to get from the granite quarries of Cornwall. Stevenson may, with the strictest propriety, be said to have created the lighthouse system of Scotland, and brought about its present state of perfection. In no country has the caloptric system of illuminating lighthouses been carried out so perfectly as in Scotland; and whether we consider the accuracy and beauty of the optical apparatus, the arrangements of the buildings, or the discipline observed by the light-keepers, we cannot fail to recognize the impress of that energetic and comprehensive cast of mind which directed the

whole. In works of general engineering Stevenson was very extensively engaged in every part of Britain, and takes rank with Rennie and Telford in the annals of the profession. Mr. Stevenson died on the 12th July, 1850, in the seventy-ninth year of his age. [L.D.B.G.]

STEVENSON, SETH WILLIAM, an English writer of travels, and antiquarian. Died 1853, aged 69.

STEVENSON, W., an antiquarian, died 1821.

STEVENSON, WILLIAM, a clerk in the record office, known as a miscellaneous writer, 1772-1829.

STEVIN, SIMON, in Latin *Stevinus*, a Flemish mathematician, teacher of Prince Maurice, and inspector of the dykes in Holland, died 1633.

STEWART DENHAM, Sir JAMES, a writer on political economy, was born at Edinburgh, in 1713, and was the only son of Sir James Stewart, of Goose-trees, solicitor-general of England under Queen Anne and George I. He was educated at the university of Edinburgh, and became an advocate. In 1740 he married the daughter of the Earl of Wemyss, and great expectations were entertained of his rising in his profession; but these were disappointed by the part he took in the Rebellion of 1745. In that last struggle of the house of Stuart, Sir James co-operated so zealously as to be obliged to go into exile. In 1757 he published, at Frankfurt, his 'Apologie du Sentiment de Monsieur le Chevalier Newton, sur l'Ancienne Chronologie des Grecs.' Ten years after this he was restored to his native country and the estate of his ancestors, where he died in 1780. His most valuable work is entitled, 'An Inquiry into the Principles of Political Economy,' which is, however, considerably obscured by the defects of style. Died 1780.

STEWART, DUGALD, born in Edinburgh, 22d November, 1753; died at his seat on the Frith of Forth, 11th June, 1828:—the eloquent disciple of Reid, and chief expounder of the Philosophy of the Scottish School. Appointed, at the early age of twenty-one, to succeed his father in the Mathematical Chair in the University of Edinburgh,—an office honorably filled by him for five years; he was on the retirement of Dr. Ferguson, elected Professor of Moral Philosophy. The charm of his style and manner was so great, and such the clearness of his exposition, that in a brief time his class-room was crowded by rising Youth from all quarters of the United Kingdom; and it is not to be denied that in conjunction with PLAYFAIR and other celebrated men then in Edinburgh, he contributed powerfully to confirm that generous liberality of Thought prevailing in the northern metropolis, when Horner, Lansdowne, Brougham, Russell, &c., lived there as young men. This peculiar influence of his teaching too, was strengthened by personal intercourse with him. Of easy access, a kindly gravity, and much openness, he possessed every quality necessary to attach his pupils: and it is not rare even at this late day, to hear him spoken of with more than admiration. Stewart retained his office until 1810, when, on his retirement, Dr. Thomas Brown was instituted to the Chair. We wish it were possible to account as highly the Metaphysician, as we require to account the Man. His works, indeed, are voluminous, and few authors ever had the gift of a warmer, more perspicuous or persuasive style. Whatever idea he touches, he unquestionably adorns: nevertheless it cannot be asserted either that Stewart has done much to advance Speculation, or that he had personally attained an adequate grasp of the History of Philosophy, and the place it has occupied in the long development of Humanity. REID and he, it must be

remembered, stood in very different positions. Reid was essentially a Discoverer. Whatever the merit or defects of his system, it was a system framed by himself. Stewart, on the other hand, received it as a *work accomplished*: and, had he possessed the ability of his Master, the Philosophy of the Scottish School would have grown greater under his hands, and passed on towards the condition of a Science. Undoubtedly he improved its phraseology; for instance, for the term 'Principles of Common Sense,' he substituted 'Laws or Elements of Belief;' he strengthened some of its weaker parts, and gave precision to others; and he enriched Reid's account of the Faculties, by much felicitous and apposite illustration—witness his elaborate account of the Laws of Association: but, beyond Reid, he did not advance one hair's breadth; with him, as with his master, Philosophy confined itself to a statement or examination of some fundamental ideas of the Reason; neither attempting to account for them, nor to ascend to their origin, nor to follow them to their applications. He left the Scottish School in all vital respects, in the condition in which he found it,—'having,' in the words of Cousin, 'a commencement in psychology, but no regular logic, neither a metaphysic, nor a theodicea, nor a cosmology—a little of morals and politics, but no system.' Stewart's best work—that in which alone we discern marks of scientific Thought—is his *Philosophical Essays*; and his worst, is the most famous, viz., the *Historical Dissertation* in the *Encyclopædia Britannica*. It may seem a harsh and presumptuous deliverance, but we have no dread of its being gainsaid—that in our higher Philosophical Literature, it would be difficult to find a less adequate treatment of so great a theme. From the absence of coherence—the absence of any trace of unity or comprehensive principle, the *Dissertation* is liker the expansion of a commonplace book, than an effort to contemplate the continuous flow of Human Thought. It evinces too, an extraordinary defect of sympathy with the whole progress of speculation in modern continental Europe; Stewart manifestly knew nothing of KANT; and he did not think it necessary to take notice of SPINOZA! A singular illustration, surely, how strictly *insular*, Scotchmen have been as Thinkers, until within these recent years: and therein a promise that brighter lights, in many ways, will break over the future. Let us conclude in the spirit in which we began, and pay to the memory of Stewart, the tribute owing to a benevolent, upright, and liberal man of undoubted talent—one of the most polished writers of his day, and as fascinating a Teacher as ever occupied a chair in Scotland's Metropolitan University. [J.P.N.]

STEWART, MATTHEW, D.D., born at Rothesay in 1717; died in 1785. A pupil of Robert Simson in the College of Glasgow, he early evinced great mathematical talent; and, having given ample evidence alike of his tastes and power, he was called from the living of Roseneath to succeed Maclaurin in Edinburgh in 1747. He discharged the duties of this important office until 1772, when his son, the well-known Scottish metaphysician, began to assist him. Like all the British mathematicians of that period, Dr. Stewart was strongly attached to Geometrical Methods; and he evinced his singular command of them in the discovery, while at Roseneath, of the propositions published under the title 'Geometrical Theories,' by his 'Tracts, Physical and Mathematical,' and his 'Propositiones More Veterum Demonstratæ:'—the latter set of propositions, however, having been discovered by analytical methods,

although demonstrated synthetically. The subsequent introduction of the Continental analysis into Britain, greatly diminished the interest at one time attached to such exertations: but if we mistake not, the discovery of new, general, and very powerful methods in Geometrical treatment, is about to produce a useful revival of old Tastes. [J.P.N.]

STEWART, ROBERT. See CASTLEREAGH.

STIFEL, MICHAEL, in Latin *Stifelinus*, a Lutheran divine and mathematician, died 1567.

[President Stiles's Monument, New Haven.]

STILES, EZRA, an American divine and historian, born in 1727. He was president of Yale College; and, among other works, published a very curious 'History of Three of the Judges of King Charles I., Major-general Whalley, Major-general Goffe, and Colonel Dixwell, who, at the Restoration, 1660, fled to America, and were secreted in Massachusetts and Connecticut for nearly thirty years. Died 1795.

STILICHO, FLAVIUS, a Vandal of great genius and bravery, who distinguished himself at the declining period of the Roman empire, and was advanced to the highest dignities of the state by Theodosius the Great. After serving in the wars, he represented that sovereign and sustained the dignity of the Roman name at the court of Persia, then ruled by Sapor III., and on his return was rewarded with the hand of Serena, the emperor's adopted daughter, besides being intrusted, in 394, with the guardianship of his two sons, Arcadius and Honorius. On the division of the empire, Stilicho became virtual governor of the West, in the character of first minister to Honorius, while the same power in the East was exercised by Rufinus, under Arcadius, the other emperor. The military genius of Stilicho, after this period, was exhibited in the reduction of Africa, which had been led into a revolt by Eutropius, the successor of Rufinus at the Eastern court, and subsequently in the great contests with Alaric and Radagasius. In the year 403 he routed the former near Verona, and in 406 put the hosts of the latter to flight, and killed their commander. While Stilicho lived he sustained the fortunes of the Roman name, but he was accused of having a secret understanding with Alaric, and treacherously put to death in 408. The wives and children of 30,000 Germans who were in his service were massacred at the same time. [E.R.]

STILL, JOHN, bishop of Bath and Wells, author of one of the vile old English plays, died 1607.

**STILLING, HEINRICH**, a pseudonyme adopted by Heinrich Jung in one of the most remarkable autobiographies ever written, was born at Florenburg, in Nassau, 1740. His father was a tailor, and his son at first followed the same trade; but his great natural abilities soon burst through the trammels of his lowly position, and after acquiring, by his own exertions, considerable knowledge of Greek and of medicine, he found means to proceed to the university of Strasburg, where he prosecuted his studies with such ardor and success, that he was soon appointed to a professor's chair, and raised himself to eminence both by his ability as a lecturer and as an operator. He wrote several novels, the best of which are 'Theobald,' 'Herr von Morgenthau,' 'Das Heimweh,' &c., besides several medical and mineralogical treatises; but his name is chiefly connected with his autobiography, entitled 'Jugend-Jüngling-jahre, Wanderschaft und Alter von Heinrich Stilling,' which, it may safely be said, has never been surpassed in interest and fidelity. Died 1817.

**STILLINGFLEET, DR. EDWARD**, was born, in 1635, at Cranborn, Dorsetshire. Being destined for the church, he was entered a student of St. John's College, Cambridge, and being ordained in 1657, was immediately presented to the rectory of Sutton, Nottinghamshire. During his residence in this place, he published his 'Origines Sacrae,' an apology or defence of revealed religion—a treatise manifesting so rare a combination of natural talent and acquired learning, that his reputation as a divine spread far and wide. A shower of preferments was rained upon him. He was first appointed preacher of the Rolls' chapel, then to the rectory of St. Andrew's, Holborn, lecturer of the Temple, and chaplain in ordinary to king Charles II. In 1685 he published his 'Antiquities of the British Church.' In 1688, immediately subsequent to the revolution, he was promoted to the see of Worcester; but, instead of reposing in the indolent enjoyment of his dignity, he engaged with increased ardor in the pursuits of theological literature, particularly in the composition of some controversial works against the Socinians, as well as a metaphysical discussion with Locke. He died in 1699. His works are comprised in 6 vols. folio. [R.J.]

**STILLINGFLEET, BENJAMIN**, a grandson of the preceding, was born in 1702. He obtained the appointment of barrack-master at Kensington; and was known as the author of 'The Calendar of Flora,' 'Miscellaneous Tracts in Natural History,' and a 'Treatise on the Principles and Power of Harmony.' Died 1771.

**STILPO**, a stoic philosopher of Megara, who lived about 306 B.C. He acquired so great a reputation for his sagacity and virtue, that, when Demetrius took Megara, he forbade any one to injure either his person or property. He was one of the chiefs of the stoic sect, and several states submitted their disputes to his judgment.

**STIRLING, J.**, a mathematician, 18th century.

**STIRLING, WILLIAM**, earl of, a Scottish dramatist and poet, whose descendant is the present claimant of lands in Nova Scotia, granted to his ancestor by Charles I., 1580–1640.

**STITH, WM.**, president of William and Mary College of Virginia, and author of a history of the first discovery and settlement of Virginia, died 1750.

**STOBÆUS, JOHN**, a Greek writer who lived in the 5th century. He made a large collection of extracts from ancient poets and philosophers, which 'Excerpta' were first printed at Venice in 1536.

**STOCCADE, N.**, a Flemish painter, 17th century.

**STOCCHI, F.**, an Italian astrologer, 1599–1661.

**STOCK, SIMON**, general of the order of Carmelites, was by birth an Englishman, and died in 1265. He is celebrated as the institutor of the Scapulary, which the zealous Romanists believe he received from the Virgin Mary, in a vision, with a promise that all who wore it, or one consecrated like it, should be sure of her protection in every emergency.

**STOCKDALE, P.**, a Scotch poet, 1736–1811.

**STOCKTON, RICHARD**, one of the signers of the American declaration of independence, and a lawyer of eminence, was born in New Jersey, 1730; died 1781. His son, **RICHARD**, a lawyer of distinction and senator of the United States; died 1828.

**STOCKVICH, H.**, a Dutch painter, 1761–1818.

**STOFFLER, or STOEFFLER, JOHN**, a German astronomer, born of poor parents, 1452, died 1531.

**STOFFLET, NICHOLAS**, a French royalist chief, who commanded in La Vendée, was born in 1751, at Luneville. In 1793 he was placed at the head of a division of royalists, and distinguished himself in no less than 150 actions with the republicans. He was at length made prisoner, and shot at Angers, in 1796.

**STOKE, E.**, a Dutch chronicler, 14th century.

**STOLBERG, FREDERIC LEOPOLD**, Count, a German, distinguished for his talents, was born in 1750, at Bramstedt, in Holstein; was educated at Halle and Göttingen; was employed in various negotiations by the Duke of Oldenburg and the prince regent of Denmark; and died in 1819. His leisure was dedicated to study: he translated the Iliad and the tragedies of Æschylus; and wrote a 'History of the Christian Religion,' 15 vols.; the 'History of Alfred the Great,' 'Travels in Germany, Switzerland, and Italy;' odes, satires, dramas, &c.

**STONE, EDMUND**, an eminent mathematician, was a native of Scotland, his father being gardener to the Duke of Argyle. At the age of 18 he was discovered by that nobleman reading Newton's Principia; upon which he entered into conversation with him, and learnt, with astonishment, that he had been self-instructed in arithmetic, geometry, Latin, and French. The duke, in consequence, took him under his protection, and placed him in a situation to pursue his favorite studies. He produced a 'Mathematical Dictionary,' 'Fluxions,' a 'Treatise on Euclid, with a Life,' 'Bion on Mathematical Instruments,' &c. Died 1768.

**STONE, THOMAS**, an American revolutionist, signer of the declaration of independence, was born in Maryland. Died 1787.

**STONE, WM. L.**, an American journalist, for twenty-four years editor of the New York Commercial Advertiser, and author of a life of Brant, Red Jacket, and various Indian biographies. Died 1844, aged 52.

**STONE, WM. MURRAY**, an episcopal bishop of Maryland. Died 1838, aged 58.

**STONEHOUSE, SIR JAS.**, a physician and divine, was born in Berkshire, in 1716. After practising 20 years as a physician, he entered into orders, and obtained the lectureship of All Saints', Bristol. He was for several years of his life an infidel, and even wrote a pamphlet against revealed religion, which reached three editions; but, by reading Dr. Doddridge's Rise and Progress of Religion, he was converted. He succeeded to the title of baronet in 1791, and died at Bristol in 1795. He wrote 'The Sick Man's Friend,' and other religious pamphlets.

**STORACE, STEPHANO**, a favorite musician and composer for the English theatre, was born in London, in 1763; studied in Italy, and on his return,

was appointed composer to Drury Lane Theatre. His music in 'The Haunted Tower,' 'Siege of Belgrade,' 'No Song no Supper,' &c., as well as several pieces composed for the Italian Opera, were well received by the public, and are still in high repute; his compositions being remarkable for their spirit, melody, and brilliancy. Died 1796.—His sister, ANNE SELINA STORACE, was an accomplished singer and actress, and became a first-rate favorite in her profession. Died 1814.

STORCH, A., a German theologian, 1501–1557.

STORCH, HEINRICH FREDERIC VON, an eminent political economist, was born at Riga, 1766, studied at Jena, and Heidelberg, and on the advice of Count Roumantzof repaired to St. Petersburg, where he entered on a brilliant career as a statist and political economist, which procured for him at once the confidence of the czar, and the highest literary honors in his gift. His chief works are, his 'Cours d'Economie Politiques,' 6 vols. 8vo., which was written at the request of the emperor Alexander for the instruction of his brothers, the Grand-dukes Nicolas and Michel; and his 'Tableau Historique et Statistique de l'Empire de Russie à la fin du 18me Siècle,' 4 vols. 8vo. Died 1835.

STORCH, NICHOLAS, founder of the religious doctrines of the anabaptists, was born at Stolberg in Saxony, towards the close of the fifteenth century, and was therefore a young man when Luther commenced preaching the doctrines of the reformation. He went much farther than Luther in proscribing ancient authorities, for he denounced all external documents and traditions whatsoever, and accepting no book but the Bible, he taught his disciples to renounce the study of literature and theology, and trust to the Spirit of God to enlighten their understandings. He insisted, also, on the necessity of re-baptism, when that ceremony had been performed in infancy, on the principle, that it was an act of faith, and could not otherwise be valid. Neither Calvin nor Luther could tolerate these doctrines, and they became still more hateful to the princes of Germany, when political ends, and the doctrine of the community of goods was associated with them. For years past the poor half-starved and half-naked serfs of Germany had been accustomed to assemble in great numbers, and with 'Bread and Cheese' inscribed on their banners, had threatened the complete overthrow of the existing state of society. This state of things is glanced at in another article (LEYDEN) and it led to much bloodshed; at length the elector of Saxony, at the pressing instance of Luther, banished their spiritual guide, in addition to executing their political in the person of Munzer, 1525. Storch was a man of the most amiable disposition, but the baptists of the present day deny all connection with his party, to avoid the odium belonging to these scenes of turbulence. He died in his retreat at Munich, 1530. [E.R.]

STORCK, A., a Dutch painter, 1650–1708.

STORER, JAMES S., an English draughtsman and engraver. Died 1853, aged 82.

STORK, WILLIAM, author of a Description of E. Florida, 1774.

STORY, JOSEPH, a distinguished judge and juridical writer, better known as Mr. Justice Story, was born at Marblehead in Massachusetts, 1779; studied at Harvard University, where he took his degree in 1798; was called to the bar in 1801, and soon acquired a distinguished reputation as a pleader. After representing Salem in the State legislature for four years, he was sent to Congress in 1809, where his talents as a forensic debater were so well appreciated,

[Judge Story's Monument, Mount Auburn Cemetery, Cambridge.]

that in 1811 he was appointed associate justice in the Supreme Court of the United States. In this capacity he displayed a thorough knowledge of the most intricate questions relating to international law, and earned such distinction as a jurist, that his name has been carried far beyond the limits of his native land. His 'Commentaries on the Conflict of Laws' is looked upon as an authority in every state in Europe. Died 1845.

STOSCH, P., a German antiquarian, 1691–1757.

STOTHARD, THOMAS, R. A., an eminent English artist, was born in London in 1755; received his education at a school in Yorkshire; and was apprenticed to a calico-printer, in Spitalfields. During his apprenticeship he showed a decided taste for the painter's art; and, having been once introduced, soon found ample employment in making designs for the booksellers. So fertile was he in resources, that it was a matter of little moment to him what the nature of the subject was that he might be required to illustrate; whether pastoral, historic, humorous, pathetic, or sublime; but it is generally allowed that his fêtes champêtres were among his most happy productions; there beauty, joy, serenity, innocence, modesty, and loveliness of form are all combined. It is said that the designs made by Mr. Stothard exceed 5000 in number; it is difficult, therefore, to select from among so vast a stock; but perhaps those which particularly claim our attention are, 'The Pilgrimage to Canterbury,' 'The Wellington Shield,' etched by the artist himself, 'The Four Periods of a Sailor's Life,' and 'The Fitch of Bacon.' To these may be added his illustrations of Milton, Shakespeare, Spenser, Don Quixote, the Pilgrim's Progress, Bell's British Poets, Robinson Crusoe, Rogers' Italy, &c. Though during the latter period of his venerable life, many powerful rivals in the pictorial art had captivated the public by their masterly productions, and thereby thrown a passing shadow over his well-earned fame, yet had he still 'a world of sweet imaginings within,' and he reached an octogenarian age without having sustained any very sensible diminution of his long and lasting reputation. He died in 1834.

STOTHARD, CHARLES ALFRED, son of the preceding, was born in 1787. He exhibited at an early age a great fondness for drawing, which ere long ripened into an enthusiastic love for the art; and he became particularly celebrated for the faithful delineation of ancient costume. In 1810 appeared his admirable picture of the 'Death of Richard II.,' and

in the same year he commenced the publication of his 'Monumental Effigies of Great Britain.' He was a member and historical draughtsman of the Society of Antiquaries; by whom he was deputed to take drawings from the famous tapestry at Bayeux, in Normandy; and in 1819 he also made a series of drawings from the paintings then recently discovered on the walls of the painted chamber in the House of Lords. His death was the effect of an accident while engaged in his professional labors. As he was in the act of tracing the stained glass in a window over the altar of the parish church of Bere Ferrers in Devonshire, the ladder on which he was standing gave way, and he was instantaneously killed, May 28, 1821.

[Stow's Monument in the Church of St. Andrew, Undershorft.]

STOW, JOHN, one of our most valued antiquarian writers, was the son of a merchant tailor of London, and was born in Cornhill about 1525. He quitted his trade when in his fortieth year, and being patronised by Archbishop Parker and Robert Dudley, earl of Leicester, devoted his time to antiquarian studies. His first work, published 1565, was 'The Summary of the Chronicles of England,' which was published in an enlarged form under the title of 'Flores Historiarum,' in 1600. His famous 'Survey of London' appeared in 1598. Stow lived to beg his daily bread in his eightieth year, and died 1605.

STOWELL, WILLIAM SCOTT, Lord, brother of Lord Eldon, civilian and member of the privy council, was born in Durham, 1745. His father was a coal factor in Newcastle, and that town was in hourly expectation of the rebels when his mother approached her confinement; she was lowered from the walls in a basket, therefore, and conveyed to the other side of the river, at great hazard, where she gave birth to the subject of this notice, and his twin sister Barbara. Having completed his education at Oxford, Scott was admitted a fellow of that university in 1765; in 1772 he became bachelor of civil law, and in 1773, after his admission as a bencher of the Middle Temple, was elected by the members of convocation to the office of Camden's reader of Ancient Histories. He held this appointment till 1785, and

in the interim took the degree of doctor in civil law; he also made the acquaintance of Dr. Johnson, whom he accompanied to Edinburgh. He now rose from one post of distinction to another, until, in 1798, he was appointed judge of the High Court of Admiralty, and a privy councillor. In 1790 he entered parliament as member for one of the pocket boroughs, but in 1801 took a more honorable seat as representative of the university of Oxford, where his exertions had insured a high degree of prosperity and efficiency to the Bodleian Library. He continued to represent the university till he was raised to the peerage on the coronation of George IV. in 1821; the office of admiralty judge he retained till 1828, a period of thirty years, honorably illustrated by the Reports of his decisions, which have been published by Dr. Robinson. Lord Stowell died January 28th, 1836. He was twice married, the second time to a daughter of the famous Admiral Earl Howe. [E.R.]

STRABO, a celebrated Greek historian and geographer, was born at Amasia, in Cappadocia, about 19 A.D., and travelled through Greece, Italy, Egypt, and Asia, endeavoring to obtain the most accurate information in regard to the geography, statistics, and political conditions of the countries which he visited. The time of his death is unknown. His great geographical work, in seventeen books, contains a full account of the manners and governments of different people.

STRACHEY, C., rear admiral in the British navy to which he belonged for 60 years. He greatly distinguished himself in the service, and had a medal awarded him for his services afloat. He had also the order of St. Vladimir conferred on him by the Emperor Alexander I. of Russia. He fought a gallant action in the Jalonn sloop of war at Cape Blanc Nez, and captured two vessels in 1803. In 1807 he assisted at the defence of Dantzic, and was a meritorious officer throughout his long career. Died on the 5th of May, 1855, at the age of 77.

STRADA, FAMILIANUS, an Italian historian and modern Latin poet, was born at Rome in 1572. He joined the society of the Jesuits, and became professor of rhetoric at the Roman college, where he resided till his death, in 1649. His most famous works are, a 'History of the Wars in the Netherlands' and 'Prolusiones Academicæ.'

STRADA, J., a Flemish painter, 1536-1605.

STRADELLA, ALESSANDRO, a Neapolitan, who flourished about the year 1650. He was an excellent composer, singer, and performer on the violin. The romantic incidents in the life of Stradella have often been narrated, and some years since they were selected as the subject of an opera, the music of which was composed by Von Flotow. He died from wounds inflicted upon him by the stilettoes of two Venetian assassins, somewhere about the year 1670. His compositions were chiefly of a miscellaneous character. [J.M.]

STRAFFORD, THOMAS WENTWORTH, earl of, victim of his efforts to establish the arbitrary power of Charles I. in England, was the son of Sir William Wentworth, of Wentworth-Woodhouse in Yorkshire, and was born in Chancery Lane, London, in 1593. He was the eldest of twelve children, and having succeeded to the estates of his father, was soon after appointed custos rotulorum (keeper of the archives) for the West Riding, and in 1621 became member of parliament for his native county. At the commencement of the reign of Charles I., during the arbitrary administration of Buckingham, Wentworth stood nobly by the rights of the people—he even bore imprisonment, the deprivation of his offices, and

his tyrannical exclusion from parliament; he was among the foremost promoters of the famous Petition of Right; for, said he, 'We must vindicate—what? New things? No,—our ancient, legal, and vital liberties, by setting such a seal upon them as no licentious spirit shall hereafter dare to infringe.' It may seem strange that a man whose political life commenced thus, should leave his party and become the first sacrifice on the altar of freedom, but there are two considerations which explain all such anomalies—those of *character* and *circumstance*. Strafford was a man of pre-eminent genius, haughty, audacious, and fond of power—of that stamp who mingle with their nobler qualities a reserved ambition, and ever hold themselves in readiness, like the couchant lion, to make a magnificent spring upon the object they mark out. Circumstances are the determining cause in such a case, and had Wentworth lived a few years later he might have anticipated the actions of a Cromwell, without his strict virtue; as it happened, the critical death of Buckingham, who fell by assassination, before the popular cause had gained strength enough to promise much grandeur of success, following quick on recent overtures from the court, provoked the lion to make his spring on what he deemed nobler quarry than the cause he had so long waited on. It was no mean ambition, or obscure contest in which his promotion now involved the renegade, for the smouldering zeal of England for her ancient liberties, began to spread in bright flame, and Pym warned him of his fate, when he attempted to justify his conduct; with *him*,—beyond all question, the greatest spirit that the king had won to his cause,—the question of a manly despotism on the one hand, or a free commonwealth on the other, was now to be debated, and his head was but the first stake in the game. We shall not consider it necessary to follow this great statesman and daring innovator, from one employment to another, or note the measures which brought him to ruin; all this is matter of history. In 1640, eight years after his appointment as lord-deputy of Ireland, he was rewarded with the earldom, and his style changed to that of lord-lieutenant, but he was now constrained by the king to await the meeting of parliament; Charles, at the same time, solemnly assuring him that 'not a hair of his head should be touched.' The popular party meanwhile, headed by Pym, had prepared their accusation of Laud and Strafford, and the impeachment was carried up to the bar of the House of Lords, on November 18, 1640. The accumulative evidence, and the well-known character of Strafford's designs, could leave no doubt of his intention to accomplish what the indictment charged him with: 'to subvert the fundamental laws of the realm,' as construed by the parliament; but the *necessary legal evidence*, under the law of treason, completely failed them, and Strafford made such a defence that the committee abandoned that mode of procedure, and framed a bill of attainder. Abandoned to his fate by Charles, Strafford was executed in pursuance of this sentence on the 12th of May, 1641. His *Letters*, which make two folio volumes, were published by Dr. Knowles in 1739. It is remarkable that Whitlocke, chairman of the committee by which the impeachment was conducted, thus testifies to the bearing of Strafford when on his trial:—'Certainly,' he says, 'never any man acted such a part, on such a theatre, with more wisdom, constancy, and eloquence, with greater reason, judgment, and temper, and with a better grace in all his words and actions, than did this great and excellent person; and he moved the hearts

of all his auditors, some few excepted, to remorse and pity.' [E.R.]

STRANGE, SIR JOHN, an English lawyer and author of Reports, 1696–1754. His son, JOHN, a naturalist and antiquarian, 1732–1799.

STRANGE, SIR ROBERT, one of the most eminent historical engravers of Europe, was born in Pomona, one of the Orkneys, July 14, 1721. After attempting various pursuits, he joined the Pretender in 1745, and was present at the battle of Culloden. He afterwards lived by drawing portraits in Edinburgh, till he married in 1747, when he went abroad, and resided first at Rouen and subsequently at Paris, where he commenced the study of engraving under Le Bas, and he finally settled as an historical engraver, in London, in 1751. His reputation soon extended beyond the limits of his own country: he has no superior as a line engraver generally; he went again abroad in 1760, and though formally excluded from the English Royal Academy, when established in London, in 1768 he was successively elected a member by the academies of Rome, Florence, Bologna, Parma, and Paris. He was knighted by George III. in 1787, and died July 5, 1792, bequeathing to posterity many exquisite engravings from some of the most celebrated Italian pictures. But the plates of Strange are far too elaborate to be numerous, they do not amount to sixty altogether: the Bolognese masters appear to have been his favorites, but one of his most celebrated works is a full-length of Charles I., after Vandyck. Strange is unsurpassed in the representation of flesh: a fine example is the Venus of the Tribune, after Titian. The question of the exclusion of engravers from the academy was one taken up very warmly by Sir Robert, he assumed the whole to be personal to himself. Certainly, in the original scheme for the foundation of the academy in 1753, it was designed that *two* out of the whole number of twenty-four should be engravers. It is gratifying to be able to state, that this standing cause of contention among English artists has at length been removed: the height to which the dispute was carried at one time, may be seen in a statement published by Sir Robert Strange himself, '*An Enquiry into the Rise and Establishment of the Royal Academy of Arts. To which is prefixed a letter to the Earl of Bute.*' London, 1775.—(Le Blanc, *Le Graveur en taille douce*, Part II., Leipzig, 1848; Longhi, *La Calcografia*, Milan, 1830.) [R.N.W.]

STRATFORD, W. S., an English naval officer, and editor of 'Nautical Almanac.' Died 1853, aged 63.

STRATO, a Greek epigrammatic poet, presumed contemporary of Septimius Severus, from 193–211.

STRATO OF LAMPSACUS, a Greek philosopher, surnamed the *physician*, or *naturalist*, from the materialistic character of his system. He was the successor of Theophrastus, and taught Ptolemy Philadelphus in Egypt.

STRAUCH, F. R., a Sp. theologian, 1760–1823.

STRAUCH, J., a Ger. jurisconsult, 1612–1679.

STRAUCHIUS, ÆGIDIUS, an eminent mathematician and controversialist, born at Wittemberg, in 1632. He was a zealous Lutheran, and wrote fiercely against the Calvinists; he is, however, better known as a mathematician than a polemic; and his '*Breviarum Chronologicum*' is a very excellent work. Died 1682.

STRAUSS, JANS JANSZON, otherwise JOHN STRUYS, a Dutch traveller, author of Memoirs of his Life, and of his journeys through Muscovy, Tartary, Persia, and the East Indies. His travels date from 1647 to 1673. Died 1694.

**STREATER, ROBERT**, an English painter, excelling in history, architecture, and landscape. At the Restoration, he was made serjeant-painter to the king. Born 1624; died 1680.

**STRICKLAND, E.**, distinguished as a traveller and naturalist, grandson of Sir George Strickland of Baynton, in Yorkshire, and of the celebrated Dr. Cartwright, was born in Yorkshire 1811. His travels in Asia, followed by the publication of papers on geology and ornithology, date in 1835. In 1847 he began his editorial labors upon the zoology and geology of Professor Agassiz for the Ray Society. He succeeded Dr. Buckland as professor of geology at Oxford, and was killed by a railway accident in September, 1853.

**STRIGELIUS, VICTORINUS**, a German divine of the 16th century, who, in the controversies at that time going on between the different sects of reformers, attached himself to Melancthon and Luther, and displayed great moderation and good sense. He was the author of '*Scholiæ Historiæ*,' '*Epitome Doctrinæ de primo Motu*,' &c. Born 1524; died 1569.

**STROEMER, MARTIN**, a Swedish professor of natural philosophy and astronomy, 1707-1770.

**STROGONOFF, COUNT ALEXANDER VON**, the Mæcenas of arts and letters at St. Petersburg, born about 1750, died 1811. His nephew, **PAUL**, a military officer and statesman, died 1814.

**STRONG, CALEB**, governor of Mass., was born in that state 1744. He was an early and active adherent of the revolutionary cause, and in 1775 was one of the committee of safety. He was member of the convention which framed the federal constitution, a United States senator, and governor of Massachusetts for 11 years. Died 1820.

**STROZZI**, a Florentine name, which has been illustrated by many noble characters as statesmen, warriors, and men of letters. The *savants* and poets are—**PALLAS**, chief of the university, and a devoted friend of learning, 1372-1462. **TITO VESPASIANO**, a Latin poet and statesman, 1422-1501. **ERCOLE**, his son, author of a poem on the Greek language, and a friend of Bembo, born 1471, assassinated 1508. **FRANCISCO DI SOLDO**, a translator of Xenophon and Thucydides, known from 1550 to 1563. **CIRIACO**, or **CHIRICO**, professor of philosophy and Greek at Bologna, 1504-1565. **LAURENTIA**, his sister, a nun, and author of festival hymns in Latin, 1514-1591. **GIAMBATTISTA**, an elegant writer, who was invited to Rome by Urban VIII., and had apartments in the Vatican, died 1634. **GUILIO**, author of a fine epic poem on the origin of Venice, died 1636. **PIETRO**, secretary of briefs under Paul V., and afterwards professor of philosophy at Pisa, 1575-1640. **BERNARDO**, surnamed *Il Cappucino* and *Il prete Genovese*, a painter, 1581-1644. **NICOLO**, a tragic writer, died 1654; and **GIACOMO**, a poet and dramatist, flourished at Venice, 1583-1660. The public characters are those following:—

**STROZZI, FILIPPO**, a Florentine senator, born 1488, and allied to the Medici by his marriage with Clarice, niece of Leo X., famous in history for his attempt to expel that family from the republic. He was taken prisoner, and anticipated the public death reserved for him by self-destruction, 1538. His sons went to France, and engaged in the service of that state against Charles V., who protected the Medici. **PIETRO**, general of the French galleys and marshal, was killed at the siege of Thionville 1558. **LEO**, his brother, was chief of the forces sent to the aid of Mary Stuart; he was killed in Italy 1554. **FILIPPO**, son of Pietro, born at Venice 1541, became colonel of the French guards, and distinguished himself at

Montcontour and Rochelle; he was wounded in a fight with the Spanish fleet off the island of St. Michael, and was then thrown overboard, though living, by order of the admiral, Santa Cruz, 1582.

**STRUDEL, P.**, a Tyrolese painter, 1660-1717.

**STRUENSEE, ADRIAN**, a theologian and ascetic writer, minister at Halle, in Saxony, 1708-1791. His eldest son, **CARL AUGUST VON STRUENSEE**, a distinguished economist, tactician, mathematician, and statesman, 1735-1806. His younger son is the subject of the following notice.

**STRUENSEE, JOHN FREDERIC**, Count, whose fate is connected with that of the hapless princess, Matilda Caroline, sister of George III., was born at Halle in 1737, and became physician to Christian VII., king of Denmark, in 1768. The marriage of Christian had disappointed the ambitious hopes of the queen dowager, Julia Maria, who had hitherto been able to retain her influence at court, and had calculated on the succession of her son, Prince Frederic; she became, therefore, the mortal enemy of Matilda, who found herself neglected by the king, and after a long pleasure excursion, in which he was accompanied by Struensee, virtually separated from him. The first circumstance leading to any intimacy between Matilda and Struensee was the inoculation of her child, from which time she appears to have concerted with him the counter intrigues which led to the ruin of both. He first became governor of the prince, then counsellor of the conferences and reader to the king; his friend and firm coadjutor, at the same time, Count Brandt, being appointed director of the court spectacles. The imbecility of the king favored any enterprise, however rash, and Struensee, once in action, contemplated nothing short of a complete revolution in the state, by which the aristocracy was to be abased, and the people gratified with a free press and many useful reforms. All this was accomplished in 1771, and the adventurer became secret minister with the title of count; having, however, a powerful party of the nobles, headed by the queen dowager and Count Rantzau, opposed to him. This party began by blackening the character of Matilda, who had been reconciled to the king by the influence of Struensee, and as scandal is always palatable to those whose conduct would most merit its envenomed shafts, the press was set in motion against the authors of its freedom. In fine, the same deplorable weakness that had enabled Struensee to effect his rash enterprise, was now used to his destruction. Late one night in January, 1772, the conspirators suddenly forced their way to the king's apartment, persuaded him that he was about to be assassinated, and procured his order for the arrest of Struensee, his friend Brandt, and the queen. The latter was sleeping in her chamber at four in the morning, when Rantzau entered without ceremony and made her his prisoner, and it is well known that her life was only saved by the presence of the English fleet, by which she was conveyed to Germany. The charge against them was that of conspiracy against the state, aggravated by adultery. Struensee and Brandt were beheaded on the 28th of April, 1772, and four years after Matilda, not then twenty-five years of age, expired in Zell. [E.R.]

**STRUTHERS, JOHN**, a Scotch author, who from the humble position of a shoemaker became a poet and a historian. Died 1853, aged 78.

**STRUTT, JOSEPH**, an artist and antiquarian wr., born at Springfield, in Essex, 1749, died in London 1802. Having been apprenticed to Ryland, the engraver, he united the study of antiquities to his profession, and produced the following valuable works:—

'The Regal and Ecclesiastical Antiquities of England,' 1773; 'Manners, Customs, Arms, Habits, &c., of the English, from the Arrival of the Saxons to the Reign of Henry VIII.,' 1774-1776; 'Chronicles of England,' 1777-1778; 'Biographical Dictionary of Engravers,' 1785-1786; 'A Complete View of the Dresses and Habits of the People of England,' 1796-1799; and that most favorite of all his works, 'The Sports and Pastimes of the People of England,' 1801.

STRUVE, GEORGE ADAM, an eminent German jurist, born in 1619, was first counsellor of the city of Brunswick, was employed in several important affairs by the princes of Saxony, and wrote some able works on the feudal and civil law. Died 1692.

STRUVE, BURCHARD GOTTHELF, son of the preceding, was a learned and indefatigable German bibliographer. His talents attracted much notice at Jena, where he lectured on philosophy, antiquities, &c. His works on history, law, and philosophy, are numerous and highly esteemed. Born 1671; died 1738.

STRUYS. See STRAUSS.

STRY, A. VAN, a Dutch painter, 1755-1824.

STRYPE, JOHN, an ecclesiastical historian and biographer, was born at Stepney in 1643; was educated at St. Paul's School, and at Jesus College, Cambridge; and enjoyed the living of Low Layton in Essex, 60 years, although he was never inducted. During his residence at this place, he applied diligently to the study of English history, and, by procuring access to numerous collections of manuscripts, was enabled to throw more light upon the period of the Reformation than any writer who went before him. His chief works are, 'Ecclesiastical Monuments,' 3 vols. folio; 'Annals of the Reformation,' 4 vols. folio; and an augmented edition of Stow's Survey of London, 2 vols. folio. He also wrote the lives of the archbishops Cranmer, Parker, Grindall, and Whitgift; and those of Sir John Cheke, Sir Thomas Smith, and Bishop Aylmer. During the latter part of his life he was rector of Hackney, where he died in 1737, aged 94.

[Stirling Castle, Royal Residence of the Stuarts.]

STUART, the royal house of Great Britain after the union of Scotland. The first of the name was the only child of Walter, the Steward of Scotland, and his wife Marjory, daughter of king Robert Bruce; he was born 1316; commanded the second division of the Scottish army at the battle of Halidon, 19th July, 1333; concluded the treaty of Perth with Edward III., 1335; succeeded David II. under the title

of Robert II. 1371, died 1390. His son, ROBERT III., reigned after him, and continued the peace till 1399, when the succession of Henry IV. to the throne of England led to the renewal of hostilities; died 1406. He was succeeded by his son, JAMES, whose successors all bore the same name,—the fifth of the line becoming father of the unhappy Queen of Scots. See JAMES, MARY. The other kings of this house were James the Sixth of Scotland and First of England, Charles I., Charles II., and James II., by whose deposition in 1688 the Stuarts were finally expelled the throne. The son of the last-named, JAMES FRANCIS EDWARD, called the Elder Pretender, was acknowledged king by Louis XIV., under the title of James III., in 1701, and in 1719 married the daughter of John Sobieski, king of Poland; he made some vain attempts to recover the kingdom, and died at Rome in 1765. He resigned his pretensions to his son, CHARLES EDWARD, born 1721, who fought gallantly for the throne of his ancestors, and was defeated at Culloden 1746; died at Rome 1788. The last of the Stuarts was his brother, HENRY BENEDICT, who entered the church after the disasters of 1745, and became titular cardinal of York; on the death of Prince Charles, however, he assumed the vain title of Henry IX. The invasion of Italy by the French republic soon after, compelled him to seek safety in Venice, and he was there supported by a pension from the English crown. Died 1807.

STUART, ARABELLA. See SEYMOUR.

STUART, SIR CHARLES, fourth son of Lord Bute, the favorite of George III., employed as a military officer beginning of last war, 1753-1801.

STUART, DANIEL, an able political writer, known for many years as the editor and proprietor of the Morning Post and the Courier, was born in Edinburgh, 1766; but removed to London when a mere lad, his brothers, under whose care he was placed, being established there in connection with the press. Through their means he became acquainted with the spirit and views of different parties; and in 1795 he purchased several shares in the Morning Post, of which he ultimately became sole proprietor and editor. His success was rapid and flattering. His own ready pen, aided by that of his brother-in-law, Mr. (afterwards Sir James) Mackintosh, Coleridge, Southey, and Wordsworth, raised the reputation of the paper beyond that of any contemporary journal. In 1803 he sold the Morning Post, and having become joint proprietor of the Courier, he increased the fame of this journal by the same sagacity, industry and talent, that had raised the other. In 1816 he retired into private life, and for thirty years enjoyed in easy competence the fruits of the labors of an active life. Died 1846.

STUART, LORD DUDLEY, an English nobleman, conspicuous as the indefatigable friend of the Poles and Hungarians. Died at Copenhagen 1854.

STUART, GILBERT, an eminent historical writer, was born at Edinburgh, in 1742, and received his education in that university. He studied jurisprudence, but became an author by profession. In his 22d year, he published a 'Dissertation concerning the Antiquity of the British Constitution;' for which he was complimented with the degree of LL.D. His next work was a 'View of Society in Europe;' but being disappointed of the professorship of law at Edinburgh, he removed to London, and became a writer in the Monthly Review. He however returned in 1773, and commenced the Edinburgh Magazine and Review, which was discontinued in 1776. Besides the works before mentioned, he wrote

'The History of Scotland,' a 'History of the Reformation of Scotland,' &c. Dropsy, brought on by a life of intemperance, caused his death in 1786.

STUART, GILBERT, an American portrait painter, was born in Newport, Rhode Island, in 1755. He went to England at an early period of life, and became a pupil of Benjamin West, and acquired while abroad a high reputation for skill in his art. On his return to America he resided successively in Philadelphia, Washington and Boston, where he busily practised his profession. His portraits of Washington and other revolutionary worthies are among the finest of modern portraiture. Died 1828.

STUART, JAMES, commonly called ATHENIAN STUART, a celebrated traveller, antiquary, and delineator of Athenian architecture, was born in London, in 1713. He originally gained his livelihood by painting fans; but having made himself master of Greek, Latin, and the mathematics, he travelled to Italy on foot, and afterwards visited Athens, in company with Nicholas Revett, a skilful architect, where they employed themselves in making drawings of the architectural relics which have escaped the ravages of time and violence. On his return to England, he became eminent as an architect, and was appointed surveyor to Greenwich Hospital; became F.R.S. and F.S.A., and published the result of his foreign labors in a valuable work, entitled 'The Antiquities of Athens,' 4 vols. folio. Died 1788.

STUART, JAMES, of Duncarn, whose name will be long remembered in social and political circles, was a scion of the noble house of Moray, and was born 1776. He was bred to the legal profession, and became a writer to the signet in 1798. But with great aptitude for business, he became engrossed in political engagements, and distinguished himself by the vigor, the decision, and the boldness with which he maintained Whig principles in opposition to what was then called the 'dynasty of Dundas' in Scotland. In consequence of his prominent position, he became exposed to unsparring invective from his political opponents; and certain truculent pasquinades reflecting on his honor and courage having been traced to Sir A. Boswell, the son of Dr. Johnson's biographer, Mr. Stuart saw himself compelled to demand satisfaction. Sir Alexander having refused all apology, the parties met near Auchtertool, in Fife, March 26, 1822, accompanied respectively by the Honorable John Douglas and the late Earl of Rosslyn, when the baronet received a shot in the neck, which next day caused his death. Mr. Stuart afterwards stood his trial for murder before the high court of justiciary, and was honorably acquitted. After his triumphant acquittal, he diversified his professional pursuits with experiments in farming and commercial speculations, which in the year 1825 proved so disastrous as to compel him to embark for America. He resided here for three years; and on his return to England he published an account of his travels in the United States, which enjoyed great success. Soon after the publication of that work, he undertook the editorship of the Courier newspaper, and when Lord Melbourne became premier in 1835, he was rewarded for his devotion to the Whig cause with the office of inspector of factories, which he held till his death. He was also chairman of the United Kingdom Assurance Company. In bearing and manners, Mr. Stuart was a perfect gentleman. He was distinguished for his taste for the fine arts, and his eminent social qualities procured him a

hearty welcome wherever he appeared. Died 1849, preserving to the last the character of a staunch partisan, a warm friend, and an honorable man.

STUART, JOHN, A.M., F.R.S., an antiquarian writer, and professor of Greek in Marischal College, Aberdeen, was born at Castleton, Kincardine, in 1751. He was the youngest son of John Stuart, of Inchbrick, M.D., and lineally descended from Walter Stuart of Morpie, in the Mearns, whose grandfather Murdoch, duke of Albany, was grandson of Robert the Second, by Elizabeth Mure of Rowallan. He was a profound antiquarian, especially on all subjects connected with Scottish history, and was the friend and correspondent of Pinkerton, Chalmers, Jamieson, Generals Hutton, Ray, &c. He was the author of the 'Account of Marischal College and University,' published in Sir John Sinclair's Statistical Account of Scotland; 'Sketch of the Life of Dr. Duncan Liddel,' Aberdeen, 1790; and antiquarian essays communicated to the Royal Antiquarian Society of Scotland, consisting of 'Observations upon the various Accounts of the Progress of the Roman Arms in Scotland,' and 'An Account of the Sculptured Pillars in the Northern Counties of Scotland.' Died 1827.

STUART, MOSES, an American presbyterian and Hebrew scholar, was born in Connecticut 1780. He was originally a member of the bar, but having been appointed tutor in Yale College, 1802, he gave up the profession of the law, and became a divine. In 1806 he was the pastor of a presbyterian church in New Haven. In 1810 he was appointed professor of Sacred Literature in the Theological Seminary of Andover. He was an able theologian and learned scholar and biblical commentator. He published various works. Died 1852.

STUBBE, H., a learned writer, 1631-1676.

STUBBS, G., an English divine, 17th century.

STUBBS, GEORGE, a painter, was born at Liverpool, in 1724; studied at Rome; and on his return, settled in London, where he distinguished himself as a painter of animals, particularly horses. He was an associate of the Royal Academy; and published 'The Anatomy of the Horse,' and a 'Comparative Anatomical Exposition of the Structure of the Human Body, with that of a Tiger and a Common Fowl.' Died 1806.

STUBBS, or STUBBE, JOHN, a spirited lawyer and celebrated political writer, was born about 1541, and educated at Corpus Christi College, Cambridge, whence he removed to Lincoln's Inn. When the Duke of Anjou became a suitor to queen Elizabeth, Stubbs, who had become a Puritan, published a pamphlet against the alliance, entitled 'The Discovery of a gaping Gulph, wherein England is likely to be swallowed up by another French Marriage.' For this he was condemned to have his right hand cut off; and when the barbarous sentence was executed, Stubbs, with amazing fortitude, took off his cap with his left hand, and cried 'God save the queen.'

STUCKIUS, J. W., a Swiss divine, 1542-1607.

STUKELEY, WILLIAM, a celebrated English antiquary, was born at Holbeach, in Lincolnshire, in 1687; was educated at Bene't College, Cambridge, where he devoted his time principally to medical studies, and took the degree of M.B. He then settled at Boston, but removed to London in 1717, and in 1720 was admitted a fellow of the College of Physicians. In 1726 he went to reside at Grantham, where he acquired great reputation as a medical practitioner; but repeated attacks of the gout in-

duced him to relinquish his profession and enter into holy orders; and he was presented to the living of All Saints, in Stamford. In 1747 the Duke of Montague gave him the rectory of St. George the Martyr, Queen Square, where he died, 1765. Dr. Stukeley pursued his antiquarian researches with an unusual degree of spirit and enthusiasm, and he made important accessions to a knowledge of the early monuments of human art and industry belonging to Great Britain. His principal works are, 'Itinerarium Curiozum; or an Account of the Antiquities and Curiosities of Great Britain,' 2 vols. folio; 'Palæographia Sacra; or Discourses on the Monuments of Antiquity, that relate to Sacred History,' 4to.; 'An Account of Stonehenge,' folio; 'Palæographia Britannica,' 4to.; 'The History of Carausius,' 2 vols. 4to. &c.

STURE, STENO, called 'the Elder,' administrator of the government of Sweden, was the son of the statesman, Gustavus Anundson Sture, by Bridget, half-sister of Charles Canuteson. The historical events in which all the Stures figured mark the period of the union of the three kingdoms, Norway, Denmark, and Sweden, as effected by Margaret of Waldemar. Charles Canuteson, installed king in defiance of Christian I. of Denmark, expired in 1470, and Steno Sture, already known for a 'skilful, cautious, and free-minded lord, and therewithal prosperous in his designs,' received the government at his death, with the counsel never to strive after the regal title, the assumption of which, by Charles, had brought many disasters upon the kingdom. Steno Sture was the man of the people, and the chief votes for his election were those of the peasants and burgesses; few of the lords followed his banner. In the middle of 1471, Christian appeared at Stockholm with a fleet of seventy ships, and Steno advanced to the relief of the capital with about ten thousand men; the strength of the Danish army was about the same, and it was posted on a sandy height, called the Brunkeberg, outside the town. Here the battle for the independence of Sweden was fought, on the 11th of October, and the Swedes gained a hard won victory, as may be judged from the fact that no less than five hundred of the enemy fell around the Danebrog or standard of Christian, who quitted Sweden, and made no further attempts against it. The wise administration of the kingdom by Steno Sture now secured to Sweden a long succession of happy years, and in 1477 he founded the university of Upsala. His later years were disturbed by the invasion of Finland by Russia, the accidental burning of Stockholm, the plague, the failure of crops, and finally, by the revival of the Danish claims under King John. All these circumstances combined to deprive Steno Sture of his power in 1497, but he regained it in 1501, and again carried matters with a high hand. He died by poison, probably administered by the physician of the Danish queen, in 1503. [E.R.]

STURE, SUANTO NILSON, successor of the preceding, was joined in the government of Sweden by a warrior priest named Hemming Gadd, who was 'oftener seen at the head of an army or a fleet than at the altar.' Suanto is described as a valiant warrior of a bounteous and cheerful disposition. It was said of him proverbially that no one was admitted into his service who was observed to wink before the blow of a battle-axe, and that he would rather strip himself of his clothes than suffer a fellow-soldier to go unrewarded. He seems to have been 'hail fellow, well met,' with the peasantry, and made a gallant stand with them against the pretensions of John,

king of Denmark. He was marching against Prince Christian, son of John, when he expired suddenly in 1512. His administration had been one prolonged warfare with the Danes, and he succeeded in drawing into his alliance the Hanse Towns of Germany. His death was followed, a year later, by that of King John, who was succeeded by the cruel tyrant, Christian II. [E.R.]

STURE, STENO SUANTESON, son and successor of the preceding Suanto Sture, and 'the noblest and most chivalrous of his family,' was elected administrator in defiance of the Danish faction, one of whom was run through at the feast in the castle of Stockholm, on that occasion. In 1516, the ambitious prelate Gustavus Trollé connived at the revival of the Danish claims under Christian, and that invader was defeated by Sture at the battle of Brenn-Kirk, near Stockholm, 22d July, 1518. In this battle the Swedish banner was carried by a young noble, GUSTAVUS VASA, destined to be the avenger of his country, and the founder of a dynasty of kings. In the beginning of 1520, the Danish army made a new invasion, and a battle was fought on the ice of lake Assundun in West Gothland. Steno was mortally wounded, and being carried out of the battle, died in his sledge while hastening across the ice to Stockholm, where his wife, Christina Gyllenstierna, continued the resistance with great heroism. The Swedes, however, were routed, and the coronation of Christian was celebrated by that 'massacre of Stockholm,' which makes one of the bloodiest chapters of history. Such were the results at which the policy of Margaret of Waldemar had arrived; aggravated, however, by the bigotry of a dark and ambitious superstition assuming the name of religion. These events possess more than the interest of old annals. The Stures of Sweden carried on the battle of freedom and the Christian faith till the Gustavuses arose, to whose great victories we owe at this hour the peaceful possession of the Bible in Europe. [E.R.]

STURGEON, WILLIAM, whose career presents a remarkable illustration of the successful pursuit of knowledge under difficulties, was born at Whittington, in Lancashire, 1783, and was apprenticed to a shoemaker. In 1802 he entered the Westmoreland militia; and two years later he enlisted in the royal artillery, in which corps he remained about twenty years. While in this corps he devoted his leisure to scientific studies, and appears to have made himself familiar with all the great facts of electricity and magnetism, which were then opening to the world. His earliest essays on electro-magnetism appeared in the Philosophical Magazine in 1823 and 1824. In 1825 he published, in the Transactions of the Society of Arts, the description of a complete set of novel electro-magnetic apparatus; and the Society of Arts testified their sense of the importance of this contribution by awarding to its author their large silver medal, with a purse of thirty guineas. He continued to furnish contributions to the Philosophical Magazine from time to time; and in 1830 he published a pamphlet, entitled 'Experimental Researches in Electro-Magnetism, Galvanism,' &c., comprising an extensive series of original experiments, and exhibiting an improvement in the preparation of the positive plates of the galvanic apparatus, which has not yet been superseded. In 1836, Mr. Sturgeon communicated a paper to the Royal Society, which contains the description of a perfectly original magnetic electrical machine, in which a most ingenious contrivance was adopted for uniting the reciprocating electric currents, developed so as to

give them one uniform direction. In the same year, the great industry of Mr. Sturgeon was rewarded by two other important inventions. The first of these was that of the electro-magnetic coil machine, an instrument devised for the purpose of giving a succession of electric shocks in medical treatment, and which has been generally preferred by medical men to all others intended for similar purposes. The other was an electro-magnetic engine, for giving motion to machinery. Besides these works, Mr. Sturgeon edited the 'Annals of Electricity, Magnetism, and Chemistry;' and published a treatise on electricity and galvanism; and one of his last works was a publication, in a collected form, of his numerous philosophical memoirs, in one vol. 4to.—Soon after he left the army he was appointed to the chair of experimental philosophy in the Honorable East India Company's Military Academy at Addiscombe, which he filled for many years with great credit. In 1842 he became superintendent of the Victoria Gallery of practical science at Manchester; but this institution was soon afterwards discontinued; and this able experimentalist saw himself, in the decline of life, overwhelmed with difficulties, which, however, were to a small extent mitigated by a government pension of 50*l.* a year, awarded to him in 1849. Died 1850.

STURGES, JOHN, a divine and theological writer, chancellor of the diocese and prebendary of Winchester; of which cathedral chapter he was for nearly half a century, a useful and distinguished member. He published 'Considerations on the present State of the Church Establishment,' 'Discourses on the Evidence of Natural and Revealed Religion,' &c.; but he acquired his chief literary notoriety by his controversy with the polemical historian of Winchester, Dr. Milner, who replied to his objections in his well-known 'Letters to a Prebendary.' Dr. Sturges died at Alverstoke, Hants, in 1807, and was buried in Winchester cathedral.

STURM, JAMES, a German diplomatist, whose protest against the exclusion of the deputies of the reformed from the diet of Spire, in 1519, led to the appellation of 'Protestants,' was born at Strasburg 1489. He was employed in several embassies, and contributed materials towards Sleidan's History of the Reformation; died 1555.

STURM, CHRISTOPHER CHRISTIAN, a German divine, born at Augsburg, in 1740. He is chiefly known as the author of 'Reflections on the Works of God,' which has been frequently reprinted in England and other countries, as well as in his own. He also published 'Morning Converse with God, for every Day in the Year,' &c. Died 1786.

STURMIUS, JOHN, whose learning acquired him the name of the 'German Cicero,' was born in 1507, at Sleidan, near Cologne. His talents were not confined to mere scholastic learning, but well adapted to politics and the business of life, of which he gave many striking proofs. He formed an academy at Strasburg in 1537; and such was his fame, that the emperor Maximilian II. was induced to raise it to an university in 1566, of which Sturmius was the first rector. He was the author of several original works and translations from the classic authors. Died 1589.—There were several other ingenious scholars of this name, among whom should be noticed, JOHN CHRISTOPHER STURMIUS, author of 'Mathesis Juvenilis,' 2 vols.; 'Physicæ Modernæ Compendium,' 'Prælectiones Academicæ,' &c. He died at Altdorf, in 1703, leaving a son, LEONARD CHRISTOPHER STURMIUS, who was a celebrated

engineer, and the author of a 'Complete Course of Architecture,' 16 vols. Died 1719.

STURT, JOHN, an engraver, was born in London, in 1658. He is principally celebrated for the extraordinary minuteness and beauty of his letters. The most curious of his works is the 'Book of Common Prayer,' which he executed on silver plates. Each page is headed with a vignette, and prefixed to the book is a portrait of George I. the lines of the face being expressed by writing so small, as scarcely to be read with a magnifying glass. This writing consists of the Lord's prayer, the decalogue, the prayers for the royal family, and the 21st psalm. Died 1730.

STURZ, H. P., a German writer, 1736–1776.

STUYVESANT, PETER, the last Dutch Governor of New York, appointed in 1647, was born in Holland. In 1664, when the English attacked New Amsterdam (afterwards New York), he was summoned to surrender, but having refused was forced to capitulate. He remained in New York after it fell into the power of the English, and died there.

STYLE, W., a writer on law, 1603–1679.

SUARD, JEAN BAPTISTE ANTOINE, an elegant writer, secretary to the French Academy, 1733–1817.

SUAREZ, FRANCIS, a Spanish Jesuit, was born at Grenada, in 1548; was appointed professor at Coimbra, by Philip II.; and died at Lisbon, in 1617. His 'Treatise on Laws' has been highly esteemed; but his 'Defensio Catholicæ,' written in obedience to the papal command, against the English reformation, was burned at St. Paul's by order of James I.

SUAREZ, J. M., an Ital. antiquary, died 1677.

SUBLEYRAS, PETER, a French painter, taught by his father, Matthew, and by Rival, 1699–1749.

SUBTERMANS, or SUSTERMANS, JUSTUS, a portrait and historical painter of Antwerp, 1597–1681.

SUCHET, LOUIS GABRIEL, duke of Albufera, a brave and skilful French general, was born at Lyons, in 1772, and entered the army as a volunteer. He distinguished himself in Italy and Switzerland on numerous occasions; and, before the end of the year 1800, he had attained the rank of major-general. The battles of Marengo and Austerlitz added to his fame; and in 1808 he was appointed to the command of the troops in the south-east of Spain, which he retained till the French were expelled from the peninsula. During that period he displayed great knowledge of the art of war, and his services were rewarded with the rank of marshal and a dukedom. On Napoleon's return from Elba, the frontiers of Savoy were intrusted to his defence. Died 1826.

SUCKLING, SIR JOHN, a poet and courtier of the period of James I., was born at Whitton, in Middlesex, in 1609, and became the friend and companion of such men as Falkland and Devereux. At the period of the rebellion he displayed his loyalty and love of show by spending £12,000 in equipping a troop of one hundred horse, who proved too fine to be good for much in the field. Another trait of his character was exhibited by his endeavor to rescue Strafford, for which he was obliged to fly to France, where he died prematurely in 1641. He was an elegant writer, an accomplished scholar, and a great wit.

SUDAN, J. N., archivist of Lyons, 1761–1827.

SUE, JEAN JOSEPH, father and son, French surgeons, the former 1710–1792. PIERRE, a nephew of the elder, author of a 'History of Galvanism,' 1739–1816.

SUENO, three kings of Denmark, the *first* reigned 985–1014. The *second*, his grandson, received the crown of that country to the prejudice of Harald, king of Norway, 1047, died 1074. The *third*, usurped the throne after assassinating Canute V., 1147, and was killed in battle with Waldemar, 1157.

SUERKER III., king of Sweden from 1192–1210.

SUETONIUS, CAIUS TRANQUILLUS, a Roman advocate, who obtained the office of tribune through the influence of his friend, Pliny the Younger, and was afterwards secretary to Trajan. He is now known as an historian and miscellaneous writer, by his 'Lives of the Twelve Cæsars,' and his 'Notices of Grammarians, Rhetoricians, and Poets,' still extant.

SUETONIUS-PAULINUS, a Roman general, who became governor of Britain, and vanquished Boadicea, queen of the Iceni, 59.

SUETT, RICHARD, a low comedian of great humor, and supposed to be inimitable in his line. He was a native of London, and a choir boy in St. Paul's cathedral. He made his first appearance on the stage at the Haymarket theatre, while yet very young; but afterwards sought practice in the provinces, and particularly at York, where he acquired some reputation. In 1781 he appeared at Drury Lane, and became famous in comedy and broad farce. Among the parts for which he was celebrated were *Robin*, *Endless*, and *Dickey Gossip*. He died in 1805, at the age of forty-seven, habits of intemperance having led to his early death. [J.A.H.]

SUEUR, EUSTACHE LE, was born at Mont Didier in 1617, and became the pupil of Simon Vouet at Paris, but by the aid of some of Marcantonio's prints after Raphael, and some of the pictures of that great painter in France, he developed a style superior to that of any of his contemporaries. His celebrated series of twenty-two large pictures, from the life of St. Bruno, now in the Louvre, was painted before his thirtieth year; they were originally painted on wood in the cloister of the Carthusians at Paris, but were transferred to canvas in 1766. Le Sueur died in 1655, in the thirty-eighth year of his age. Considering his comparatively short life, his works are very numerous, and most of them are on a large scale: they have been well engraved by the Massards, G. Andran, and the two Picarts. His style was grand in design, and he excelled in composition, but he was deficient both in color and in chiaroscuro. The more showy style of Lebrun obscured the reputation of Le Sueur during his lifetime, but he now holds deservedly a much higher place than his more successful rival. He is sometimes styled the French Raphael. In composition, in character, and in the disposing of draperies, he was equal to the greatest of the Italians.—(Felibien, *Entretiens sur les vies, &c. des plus excellens Peintres*, &c.; D'Argenville, *Abrégé de la vie des Peintres*; Supp. to Penny Cyclopædia.) [R.N.W.]

SUEUR, J. LE, a French protestant, d. 1681.

SUEUR, PETER LE, a French wood engraver, 1636–1716. NICHOLAS, his nephew, 1690–1764.

SUFFREN, J., a French Jesuit, 1565–1641.

SUFFRENSAINT-TROPEZ, PETER ANDREW DE, one of the most dist. naval officers produced by France, served under De Grasse, 1726–1788.

SUGER, the Abbé, a celebrated French statesman, was born at Touri, in Beauce, in 1082. He was, successively, minister of state to Louis VII. and Louis le Gros; and in 1122 was made abbot of St. Denis, though he still continued to act in his political character. Died 1152.

SUHM, P. F., a Danish historian, 1728–1798.

SUICER, or SCHWEITZER, JOHN GASPAR, a Swiss theologian and Hellenist, 1620–1684. His son, J. HENRY, a theologian and commentator on the Bible, 1644–1705.

SUIDAS, a Greek lexicographer, who is supposed to have lived about the 11th century. His work is highly valuable for its details of literary history, and its excerpts from lost authors.

SULLA. See SYLLA.

SULIVAN, SIR RICHARD JOSEPH, bart., was born in Ireland, and sent out to India early in life, through the patronage of his relation, Laurence Sullivan, at that time chairman of the East India Company. On his return he made a tour through Ireland, Scotland and Wales; of which he gave an account in a series of letters, in 2 vols. He also wrote an 'Analysis of the Political History of India,' 'Philosophical Rhapsodies, being Fragments of Akber of Betlis,' &c.; but his most important work was, 'A View of Nature, in Letters to a Traveller among the Alps,' 6 vols. He was returned M. P. for New Romney, in 1790, and for Seaford, in 1802; he was made a baronet in 1804, and died in 1806.

SULLIVAN, JOHN, an American general, who served with reputation in the republican army at the battles of Brandywine and Germantown, in 1777 and 1778, and subsequently against the Indians; but was deprived of his command, on a charge of speculation, and lived in retirement till 1788, when he became a member of the Congress, and was afterwards judge of New Hampshire. Born 1741; died 1795.

SULLIVAN, JAMES, brother of the preceding, was successively justice, attorney-general, and governor of the province of Massachusetts. He was for many years president of the Historical Society of Massachusetts; and was the author of 'Observations on the Government of the United States of America,' a 'Dissertation on the Constitutional Liberty of the Press,' &c. Died 1808.

SULLIVAN, WILLIAM, an American lawyer of Massachusetts, and author of 'Familiar Letters,' 'Political Class Book,' &c. Died 1839; aged 64.

SULLY, H., an English watchmaker, d. 1728.

SULLY, MAURICE DE, bishop of Paris, celebrated as a preacher, and for having laid the first stone of the cathedral, 1160–1196. EUDES, his successor, 1197–1208.

SULLY, MAXIMILIN DE BETHUNE, duke of Sully, born the 13th December, 1560, was the second son of Francis de Bethune, baron of Rosny, a French protestant noble of high lineage, but impoverished patrimony. Young Maximilien Rosny was taken at the age of twelve to the court of Henry of Navarre, (afterwards Henry IV. of France,) then in his twentieth year, and was solemnly commanded by his father to live and die with the royal master, to whom he was then assigned. Rosny accompanied Henry to Paris and narrowly escaped perishing in the massacre of St. Bartholomew. When the young king of Navarre escaped from Paris, and renewed the armed resistance of the Huguenots against their catholic persecutors, young Rosny was with him, and became, while yet in boyhood, a captain of proved courage and skill. During the nineteen years of civil war, which elapsed before Henry was acknowledged king of France, Rosny rendered him the most eminent services, not only by valor and conduct in the field, but by his honesty and candor as an adviser, and also by the genius, as a financier and a statesman, which developed itself in the young noble, during the struggles and vicissitudes of this stormy portion of his chivalrous master's career. When the civil wars

were at last ended, and Henry obtained undisputed possession of the crown, the internal affairs of the kingdom were in the most deplorable condition. There was the bitterest animosity of sect against sect. Agriculture, trade, and foreign commerce had suffered equally from the lawless violence of the contending factions; the finances of the crown were deeply, and as it seemed irretrievably embarrassed; and the resources of the state were dilapidated and apparently destroyed. Rosny now acted as the

[Rosny, seat of the Duke of Sully.]

king's chief minister in reorganizing the kingdom out of the shipwreck of intestine strife and national bankruptcy. He was indefatigable in searching out and redressing the abuses that had grown up in every department of the administration; he investigated the origin and proper character of each branch of the revenue, and he personally examined the productive and commercial capabilities of the various districts and towns. He studied the modes of collecting the taxes and other imposts, that might be most lucrative to the crown, and least oppressive to the subject. The schemes, which he thus cautiously and wisely framed, were put into execution by him with equal firmness and skill; and having found, when he undertook the management of the French finances in 1597, an empty treasury, an increasing national debt, and an over-burdened and discontented population, he left in 1611 a surplus revenue, a large accumulation of treasure, and satisfaction and prosperity in every class of the community. It was not only as a financial reformer that he served his king and his country. He was Henry's counsellor in all the king's great measures of the reign with regard to foreign affairs, and also in those by which liberty of conscience and full rights of citizenship were guaranteed to the Huguenots, and by which the effective administration of the law and the maintenance of order and tranquillity were secured. He was liberally rewarded by his sovereign with wealth and honors, and in 1606 was made duke de Sully, and a peer of France. After Henry's assassination in 1610 Sully retained his offices for a short time under Louis XIII., but finding his influence decline and his counsels slighted, he retired from the court. Part of the occupation of Sully's after life was the composition of his well-known and valuable Memoirs. He died December 22, 1641. [E.S.C.]

SULPICIA, a Latin poetess, who was the wife of Calenus, a Roman knight, and flourished about A. D. 90. She obtained the name of the Roman Sappho,

and appears to have merited it, if we may take the opinion of Martial on her poem on 'Conjugal Love.'

SULPICIUS, GALLUS. See GALLUS.

SULPICIUS-LEMONIA-RUFUS, SERVIUS, a Roman lawyer, and friend of Cicero, 106-43 B.C.

SULPICIUS, RUFUS, a Roman orator, born 124 B.C., became tribune 88; he was decapitated by Sylla, as a partisan of Marius.

SULPICIOUS-SEVERUS, an ecclesiastical historian of the 5th century, author of a 'Life of St. Martin of Tours,' and an 'Ecclesiastical History.'

SULZER, an ingenious Swiss writer, was born in the canton of Zurich, in 1720; and became professor of mathematics at the royal college of Berlin. He was the author of 'Moral Contemplations of the Works of Nature,' an 'Account of a Journey in the Alps,' and 'The Universal Theory, or Dictionary of the Fine Arts,' 2 vols.

SUMOROKOF, ALEXANDER, a Russian poet and dramatist, the son of a general officer, was born at Moscow in 1727. He was educated in the seminary of cadets at Petersburg; and, while a student, wrote a tragedy, called 'Koref,' which was acted by his schoolfellows, and afterwards performed in the presence of the court, with such applause, as encouraged the author to proceed in his dramatic career. Besides tragedies and comedies, he wrote odes, idyls, fables, satires, and other poems; together with a few works on the history of Russia. He was created a councillor of state, and honored with other marks of distinction. Died 1777.

SUMMERFIELD, JOHN, an elegant methodist preacher, born in England, but settled at New York. Died 1825, at the early age of 27.

SUMMONTE, J. A., a Neapolitan historian of the city and kingdom of Naples, who was rewarded for his labors by a persecution, and died 1602.

SUMNER, INCREASE, governor of Mass., from 1797 to 1879, the date of his death.

SUMTER, THOMAS, an American revolutionary officer of South Carolina. He distinguished himself in the war, in the southern district, which was the chief scene of his gallant conduct. In 1811, was a United States Senator. Died 1832, aged 97.

SURITA, or ZURITA, JEROME, a Spanish historian and secretary to the Inquisition, 1512-80.

SURIN, J. J., a French Jesuit, 1600-1665.

SURIUS, L., an ascetic writer, 1522-1578.

SURREY. See HOWARD.

SUSARION, an ancient Greek actor, supposed to be the inventor of comedy.

SUSON, B. H., a French ascetic, died 1366.

SUSSEX, H. R. H. AUGUSTUS FREDERICK, Duke of, was the sixth son of king George the Third, and was born at Buckingham Palace, Jan. 27, 1773. Having made some progress in his studies in England, he was sent to Göttingen to complete them; thence he went to Italy, and while there, and still a minor, he married lady Augusta Murray, second daughter of the Earl of Dunmore. This marriage gave great offence to the king, as being in direct opposition, not only to his own views for his son's establishment, but also to the enactments of the royal marriage act; and after the usual proceedings, the prerogative court pronounced the marriage to be null and void. The young couple, however, treated this sentence as a mere arbitrary stretch of power, and continued to reside together as man and wife. The lady died in 1830, leaving two children, the elder of whom, Sir Augustus d'Este (since died), claimed to be considered legitimate, and, consequently, the inheritor of his royal father's state and

titles; and he had some high law authorities on his side, though the simple question would seem to be—‘Was or was not the marriage illegal, as being opposed to 12 Geo. 3. c. 11?’ If it was contracted in direct contravention of that act, we confess that any further argument upon the subject seems to us to be a mere bandying of words. This marriage, and his unnecessarily conspicuous connection with the Whig party, completely alienated the young prince from his father, and of course from the court; and he had arrived at the age of 28 before he was created duke of Sussex, with an income of 12,000*l.* per annum, which was subsequently increased to 18,000*l.* His royal highness was a steady friend to art, science, and literature; and his presence as chairman at dinners or meetings for the benefit of public charities might always be reckoned on. But though we cheerfully confess that thus far the duke did good service to humanity, we are not prepared to imitate or to quote the somewhat too emphatic laudation which certain of his friends have written and spoken upon the subject of his *personal* liberality. We have reason to believe that, with much goodness of heart, the duke had also much hankering after that sort of applause which is so easily obtained by fluent speech and affable demeanor, where these are displayed by a personage of his rank. Leaving to others the task of criticising the politics of the duke, we shall only add, that though but moderately learned, he knew how to value learning; his library was very extensive, and, perhaps, the richest private collection in England in bibles, in various tongues and of various editions; and that, while doing much good by the influence of his name, he was as simple in manner and as regular in conduct as any private gentleman in the kingdom. By his will he seemed to wish to be as much separated from his family in his death as he had been in his life, for he gave orders that he should be buried at the cemetery at Kensall Green, and not at Windsor! Died, April 21, 1843, aged 70.—His daughter, Mdle. d’Este, married Sir Thomas Wilde, who in 1850 became lord chancellor, and was raised to the peerage with the title of Baron Truro.

SUSSMITCH, J. P., a Germ. divine, 1705–67.

SUTCLIFFE, MATTHEW, an English divine, was born in Devonshire, and educated at Trinity College, Cambridge. He was admitted a civilian in 1582; but took orders, and became dean of Exeter. He founded, at Chelsea, a singular college, the fellows of which were to be employed in writing the annals of their times, and in combating the errors of popery and pelagianism. Sutcliffe was himself the first provost; but the establishment fell to decay, and became at last an asylum for invalid soldiers, being part of the present Chelsea Hospital. He was an eminent controversialist, and wrote numerous tracts against the Catholic propagandists. Died 1629.

SUTTON, RICHARD, one of the founders of Brasenose College, Oxford, and steward of Sion monastery, near Brentford, known 1490–1522.

SUTTON, THOMAS, founder of the Charter-house, was an accomplished English gentleman, and merchant, born at Knaith, in Lincolnshire, 1532. In 1569, being already secretary to the earl of Warwick, he was appointed master-general of the ordnance at Berwick, and greatly distinguished himself in the northern rebellion, which broke out under the earls of Northumberland and Westmoreland. In 1573, he commanded one of the batteries which compelled the castle of Edinburgh to surrender to the English; and the same year went to the assistance of the Regent Morton as one of the chiefs of

a body of 1,500 men, sent into Scotland by Elizabeth. In 1582, Sutton married a relative of the earl of Warwick, and soon after commenced those speculations as a contractor, merchant, and armed privateer, by which he acquired his immense fortune. This was greatly augmented, however, by the value of the coal discovered in two manors which he had purchased of the bishop of Durham. After the loss of his wife in 1602, Sutton began to change his manner of living, and being deeply impressed with a sense of religion, he finally purchased the dissolved monastery of the Charterhouse, which he endowed most nobly with the bulk of his property: the purchase money alone was no less than £13,000, in those times a much greater sum than at present. He died at Hackney, in 1611, and his remains were deposited in a vault prepared for them under the chapel of the Charter-house. After his death, the nephew of Sutton, though munificently provided for, sought to invalidate the foundation of this charity, and the history of his attempt is supposed to implicate Lord Bacon as a *particeps criminis*. Like many other noble charities, the administration of the Charterhouse is said to have been marked by great abuse, the augmented value of the endowment being much more largely shared in by the officials and the school than the needy brethren; within the last week or two, however, a vindication has been published by the present master, Archdeacon Hale, entitled, ‘Some Account of the Early History and Foundation of the Hospital.’ [E.R.]

SUVEE, J. B., a Flemish painter, 1743–1807.

SUVENHUSIUS, WILLIAM, professor of Hebrew and Greek at Amsterdam, editor of an edition of the Mishna, with Notes, and a Latin version, published 1703.

SUWARROW, or SOUVAROFF, PETER ALEXIS VASILIEVITCH, Count, a Russian general, remarkable for his headlong valor and barbarian energy of purpose, was born at Suskoi, in the Ukraine, 1730, and commenced his military career in the campaign against Sweden in 1747, shortly followed by the seven years’ war. In 1762 he returned to his country, but took the field again in 1768, and obtained those successes in Poland which led to its first partition between Russia, Austria, and Prussia, the events of which date from 1768 to 1771. In 1773 he led the Russian hordes against Turkey, and captured in succession Tourtakaye and Hirsout. In 1772 he defeated the Tartars of the Crimea, and obliged them to take the oath of submission to Russia: the next year he was appointed general-in-chief and governor of that country. The Turks having renewed the struggle in 1787, a desperate battle was fought at Kinburn, where Suvarrow was severely wounded, and compelled to seek repose in his litter; his troops were soon after thrown into confusion, but the general mounted his horse, and reproaching them with their cowardice, threw himself almost into the midst of the enemy, and retrieved the fortunes of the field. The crowning victory in this campaign was the capture of Ismail, a fortress of Bessarabia, near the mouth of the Danube, in December, 1789. In 1794 the brave Polanders took the field under Kosciusko, to fight once more the battle of their independence, and in two months the Vistula was crimsoned with the blood of the patriots: on the 4th of November, Suvarrow captured Praga, and on the 9th he made his solemn entry into Warsaw. Much has been written about the excessive cruelty practised on this occasion, but there is really nothing to show that it exceeded the usual practice—fiendish as it is—of a victorious army; and it is

recorded that Suwarrow's eyes filled with tears when the keys of Warsaw were presented to him, at the remembrance of what had occurred. He was, in some respects, a man of almost barbarian character; of this no denial can reasonably be admitted; but we are disposed to believe that his method of leading the Russians to victory was as merciful as any method *could* be, and it is from the Russian side of view that we ought to estimate the character of her commanders; to measure them by the higher standard applicable to our own countrymen, is manifestly absurd. Suwarrow's eccentricities enter largely into all the narratives of his career, but we can hardly find space for his personal portrait, or for those traits of character which properly belong to biography. In height, he barely exceeded five feet, he was miserably thin, had a large mouth, a wrinkled forehead, and a few patches of grey hair on his head. His contempt of dress could only be equalled by his disregard of every form of politeness, and some idea may be formed of both from the fact, that he was washed in the morning by several buckets of cold water thrown over him, and that he often drilled his men in his shirt sleeves, with his stockings hanging down about his heels; like his men also, proudly dispensing with the use of a pocket handkerchief! His favorite signal of attack was a shrill cock-crow: 'To-morrow morning,' said he, previous to the storming of Ismail, 'I mean to be up an hour before daybreak, I shall then dress and wash myself, then say my prayers, then give one good cock-crow, and capture Ismail.' His despatches announcing victory were equally singular, and were generally in doggerel rhyme. One of these, in his campaign of 1773, is literally rendered thus—it was addressed to Prince Romanzoff:—

'Glory to God—glory to thee,  
Tourtakaye's taken and taken by me!'

The most remarkable points in his character as a soldier were his contempt of strategy, and his devoted courage: his motto was 'Forward and strike,' 'Nothing to be thought of but the offensive—quick marches—energy in attack—the naked steel.' With these qualities he won the hearts of his soldiers, and obtained his great victories over the Poles and Turks. They were unsuited, however, to the atmosphere of a court, and after the death of Catharine, Suwarrow disgusted her successor, Paul I., and retired to his estate of Khantschansk, where he remained till 1799. The wish of his heart to take a command against the French was then gratified, and he was sent into Italy at the head of 30,000 Russians, to co-operate with the archduke Charles of Austria. No exigency or respect of persons could induce this stalwart old kern to alter his principles: asked for his plans by the emperor, he protested he had none, or, if he had, that he should not disclose them: presented with propositions for defensive operations, he would not hear of them; 'Tell my lord, the prince, that I know nothing of the defensive; I can only attack. I shall advance when it seems good to me to do so; and when I do, I shall not stop in Switzerland. I shall go, according to my orders, into Franche-Comté. Tell him that at Vienna I am at his feet, but that here I am at least his equal. He is a field marshal, so am I; he serves a great emperor, so do I; he commands an army, so do I; he is young, and I am old. I have acquired experience by successive victories, and I receive neither counsel nor advice from any one: I trust alone in God and my sword.' It is not surprising that he was defeated by Massena at Zurich, and that a campaign thus conducted against the generals of the rising star of Na-

poleon, should have had an unsatisfactory termination, yet Suwarrow was never, at any moment, unworthy of his laurels. He was at length ordered to return, and died, neglected by the emperor, at St. Petersburg, May 18, 1800. [E.R.]

SUZE, HENRIETTA. See COLIGNI.

SUZE, H. DE, archbishop of Embrun, 1250-71.

SWAAN, J., a Dutch chemist, 1774-1826.

SWAMMERDAM, JEAN, a celebrated anatomist and entomologist, was born at Amsterdam in 1637. He died in 1680. His father was an apothecary, and possessed a collection of objects in natural history. Engaged while a mere boy in cleaning the articles in this museum, the young Swammerdam soon acquired a taste for the study of nature, and became an especial lover of entomology. He studied medicine at Leyden, and took his degree there in 1667. He prosecuted his anatomical researches with great zeal and success, and was the first to discover the art of injecting the arteries and veins, which has proved of such use in dissections. A severe attack of a quartan ague obliged him to intermit his studies for a time, and upon his recovery he relinquished his human anatomy, and devoted himself almost entirely to that of insects. In 1669 he published his 'General History of Insects,' in which he attempts a classification of them, according to their structure and the metamorphoses they undergo. From this work he acquired great reputation, but in consequence of over-exertion in study, his health gave way. He fell soon afterwards into an extremely hypochondriacal state, scarce deigning even to answer a question addressed to him, and at length became unfit for entering into society. In this sad state of mind he was struck with the peculiar tenets of an extraordinary woman of that time, Antoinette Bourignon, and soon became plunged into the depths of her mystical devotion. He fancied that he would offend the Deity by continuing his anatomical pursuits, and throwing away the scalpel, he followed his fanatical leader to Holstein. He returned some time afterwards to Amsterdam, but his mortifications and mystical studies had reduced him to the state of a living skeleton. In one of his fits of melancholy, he burned all the manuscripts he could lay his hands upon; but fortunately some time previous to this, his limited means had compelled him to sell a portion of them, which ultimately coming into the hands of Boerhaave, were published by him many years after the unfortunate author's death. [W.B.]

SWAN, TIMOTHY, an American musical composer, author of 'China,' and other well-known sacred pieces. Died 1842, aged 82.

SWANEVELT, HERMANN, called *Hermann of Italy*, a Dutch landscape painter, 1620-1690.

SWARTZ, OLAUS, an excellent botanist, was born at Norkœping in Sweden, in 1760. He died in 1817. At the age of eighteen he was sent to study at the university of Upsal, and attended the lectures of the younger Linnæus. Soon becoming his own master he devoted himself to travel and collecting plants. While only twenty-three he undertook at his own expense a voyage to the West Indies and South America. He explored the botany of Jamaica, St. Domingo, and the other islands; and after visiting the coast of America returned to Europe by way of England. In London he made the acquaintance of Sir Joseph Banks, Sir Hans Sloane, &c., and returned to his native country with great acquisitions in both knowledge and collections. He was soon afterwards elected a member of the Academy of Stockholm, and the year after made its president. He was called to the chair of botany at the medico-chirurgi-

cal institution of that town, and was decorated by his sovereign with the orders of Vasa and the Polar Star. He taught botany with much success at Stockholm, and continued a great upholder of the Linnæan system. He established many new genera of plants; described with clearness and conciseness an immense number of species: and paid particular attention to cryptogamic botany. Schreber has called a genus of plants after him, *Schwartzia*.

[W.B.]

SVEDBERG, or SWEDBERG, JESPER, bishop of Skara in Westrogothia, was born on his father's estate near Fahlun in Sweden, 1653, and was many years chaplain in a regiment of cavalry, and superintendent of the Swedish mission established in England and America. He was raised to the see of Skara in 1702 by Charles XII., and three years later became doctor of theology at Upsala. In 1719 the family was ennobled, and the name of Swedenborg adopted by his son, Emanuel, as mentioned in the following article. Bishop Swedberg was a great writer, and among the fruits of his pen is an autobiography still in MSS. His children are the subjects of some curious notices, among which occurs the following:—'I have kept my sons to that profession to which God has given them inclination and liking; and I have not brought up one to the clerical office, although many parents do this inconsiderately and in a manner not justifiable, by which the Christian Church, and also the clerical order, suffer not a little, and is brought into contempt. I have never had my daughters in Stockholm, where many reside in order to learn fine manners, but where also they learn much that is worldly and injurious to the soul.' This good old man died in 1735. [E.R.]

SWEDENBORG, EMANUEL, in an eminent sense *The Philosopher of Christianity*, was born at Stockholm, 29th January, 1688. His parentage is shown in the preceding article, and as the events of his life were few and simple, we shall here limit ourselves to a sketch of his literary career, and a justification of the above title. In 1709 Emanuel Swedberg,

[Swedenborg's summer-house, his favorite retreat for study.]

afterwards Swedenborg, completed his education at the university of Upsala, and published his academic dissertation, consisting of moral sentences from the writings of Seneca, Publius Syrus, and others, illustrated with notes from the old Latin authors. From 1710 to 1714 he was journeying abroad, according to the custom in those days, sometimes writing heroic verses, epigrams, or love pieces in the

Latin tongue to relieve his toils at the various seats of learning that he visited. In 1716 he commenced the publication of papers on the mathematics and physical sciences in his '*Dædalus Hyperboreus*,' and was received into public employment as the colleague of the famous Count Polheim; soon afterwards he was appointed assessor in the Metallic College by Charles XII., who honored him with his personal friendship. In 1718, besides continuing the '*Dædalus*,' Swedberg published a work on algebra, which included, among the higher rules of mathematics, the integral and differential calculus: the year following he assumed the style of nobility by favor of Queen Ulrica Eleonora, and from that period had a seat with the nobles of the equestrian order in the triennial assemblies of the states. From 1719 to 1722, his professional avocations introduced him to the study of the fusibility and structure of metals, and, gradually, to the geometrical principles of chemistry, for the further study of which, and the knowledge of mines, he journeyed some fifteen months through the German states. The titles of his works in this period indicate very clearly the progress of *the Thinker* proceeding steadily through the physical sciences towards a philosophy of nature: the chief of them are '*Arguments derived from Appearances in Sweden in Favor of the Depth of the Waters, and Greater Tides of the Sea in the Ancient World*;' '*Specimens of a Work on the Principles of Chemistry*;' '*Observations on Iron and the Elementary Nature of Fire*;' and '*Miscellaneous Observations about Natural Things, especially Minerals, Fire, and the Strata of Mountains*.' In 1734 he completed *one stage* of this onward march by publishing his '*Principia*,' contained in the first of three folio volumes, which were issued at Dresden and Leipzig at the expense of the duke of Brunswick, and to publish which, Swedenborg undertook another journey. This work explains the production and nature of the elements, the formation and laws of the solar vortex, and the sublime analogy between the starry heavens and the magnetic sphere; it will be found to ante-date many important discoveries, especially in the co-relation of magnetism, electricity, light, gravitation, and all the physical forces; while the practical part on mineralogy has been pronounced, in Cramer's '*Art of Assaying Metals*,' '*magnificent and laborious*.' While this work was passing through the press, its author made the acquaintance of Wolff's *Ontology*, and having found that his own theory of the elementary world agreed with it, his ambition took wing, and he resolved to try the experiment of applying his principles to the deep subjects glanced at by that philosophy. His prompt reasoning flashed through all difficulties like a sabre-cut—nature is all mechanism—the soul is in nature—these principles of his, with Wolff's seal on them, are the exponents of nature—why, then, not demonstrate the nature of the soul with as much precision as that of the elementary world? With Swedenborg to *think* was to *do*; hence arose his *Philosophy of the Infinite*, a '*Prodromus*,' as he calls it, written immediately after the perusal of Wolff in 1734: in strict relation with all that preceded it, this little work was but a plank thrown across the gulf which separated one field of thought from another,—it carried Swedenborg from the dead mechanics of metals and elements to *the living*. Treating of the soul had set him thinking about the body; he is curious to know what the learned are doing—whether they have found the same key as himself; now, therefore, he buries himself for a few days in the library at Dresden, reads the '*Bibliothèque Italique*,' which

contains an account of the learned men of the day, and finds to his extreme satisfaction, a new and wide field open before him. These learned men are divided into parties—some affirming and others denying the animation of the brain; others, again, with the microscope searching the body through and through to decide these contests. It is the same with the question of the atomic constitution of the blood—the existence of the animal spirit in the nerves—the growth of the embryo in the womb—the cause of the circulation, and all the kindred topics. Ruysch, Bianchi, Leeuwenhoeck, Borelli, Lancisi, Morgagni, Malpighi, are here with all the treasures of art and learning, with anatomical preparations and models of the human frame hardly equalled by anything in our own times, and finally, with the doctrines of geometry and analogy already pressed into the service. Discovery and art had anticipated all the requirements of the philosopher. It was only for *Reason* to take up the thread of demonstration at a point where all confessed that nature was seen to work most distinctly and perfectly. Swedenborg, in short, reverting to his attempted demonstration of the connection between soul and body on mathematical principles, resolved to pursue his inquiry from this fresh plane of induction. Obligated to return for a season to his professional avocations, he carried this high purpose along with him, and in 1736 obtained leave of absence again for the purpose of writing and publishing a great work. Space is not allowed us to follow him step by step, as we might do, in the conception and publication of his works on the 'Animal Kingdom.' Three years were occupied abroad in collecting and digesting his materials, and in 1740 'The Economy of the Animal Kingdom, Considered Anatomically, Physically, and Philosophically,' appeared at Amsterdam, followed in 1744 by 'The Animal Kingdom,' and in 1745 by 'The Worship and Love of God,'—the latter, apart from its philosophy, acknowledged by competent judges for one of the most gorgeous specimens of Latinity in existence. These works completed the Thinker's *second stage*; and among the doctrines contained in them are discoveries of high importance in physiology still awaiting an adequate criticism, or courting adoption: such are the author's demonstration of the animation of the brain, and of its coincidence during formation with the systole and diastole of the heart, and after birth with the respiration of the lungs—of the beautiful provision for muscular action derived from the respiration, exhibiting the function of the lungs in distributing and regulating motion throughout the entire system—of the law of series and society among the organs—and of many others which it would be inconsistent with our limits to enumerate, but tending upwards to a rational psychology. Through the whole of his career up to this point, Swedenborg's labors had grown, one task out of another, like a tree; the goodly proportions and excellent fruit of which, placed him in the highest rank of scientific men; he was not yet, however, the *Philosopher of Christianity*. In after years he recognized these labors as his preparation; and they who know him best, are well aware that they are nothing more, and that their results enter no farther into his revelations than the words of a new language into the thoughts of an older one. It was in the year 1745, as he drew near the utmost limits of his philosophical inquiries concerning the soul, that he declares his eyes were opened to see spirits, and that, warned by a divine appearance, he abandoned his uncompleted labors and worldly honors, and devoted himself to the new office to which he

[Residence of Swedenborg, Stockholm.]

was called. This is a subject we cannot discuss in a notice which is necessarily limited to information in matters of fact, but we may remark that the case of Swedenborg is essentially different from that of the visionaries of all ages who have discoursed with spiritual beings. Distinctly, his claim is this:—not that he saw spirits only, but that he actually lived with them *as a spirit*, seeing all things in the spirit world as one of themselves, and only existing here in the body, in order to use it as an instrument for publishing the facts, and digesting in a rational form the conclusions to be derived from them. It is, then, on the nature and value of these conclusions that we dare to rest the whole weight of his claims to our regard and to the title we have assigned him,—not as one of many Christian philosophers, but as the veritable philosopher of the Christian faith; as much the instrument of Providence in this age as Paul in a former, and doing precisely *that* for present habits of thought that Paul did for the spirit of his age, grounded in Judaism or in idolatry. We do not say indeed that the systems of the Scotch and German philosophers have nothing in common with Christianity, but they stand, as their warmest partisans will admit, on ground *apart* from it, and the attempt to reconcile religion and philosophy has never been cordially acknowledged as successful on either side. Theologians have clearly perceived that no system of philosophy has taken up, as *essential to it*, the Christian doctrine of Regeneration, the only pretensions of this nature in the course of eighteen weary centuries being discoverable in the writings of the mystics—more especially in those of Jacob Boehmen, and his eloquent exponent in this country, the nonjuring divine, William Law. These latter have become *obsolete*, not because the problem could ever cease to engage human attention, but for this very sufficient reason—that the science they embraced had become in many essential particulars inconsistent with our actual knowledge of things, and the most they could do was to keep alive the spirit of earnest piety, and the expectation of a future great development which had always been looked for. Swedenborg, it will be observed, wrote after Newton and Locke, with whose works he was acquainted, and no man living was better informed on the progress of science in his own day, and with the richer harvest it promised in the future; step by step all the great problems that had hitherto engaged attention were brought under his review, and whatever was significant of life or death in nature, seems to have passed before him as the animals were brought to Adam to see what he would call them. Such was the man destined by Providence to furnish the nineteenth century with the Christian development of philosophy; and here we

will endeavor to state in what this consists, and in what it does *not*. Certainly, it is not a mere dialectic, for what, after all, is that, but a logical instrument, fashioned, if possible, to reconcile the self-sufficient reason with faith; and what does the insufficiency of the German schools consist in except this, that the very process of reason by which the understanding and the Word are sought to be reconciled, does but strengthen the former? Besides, the true Christian Philosophy cannot, by the very conditions which call for it, be a bare *method*: like Christianity itself, it must be a *result*, and a final one. In this consists the supereminence of the mental philosophy contained in the theological works of Swedenborg. It groups the thoughts around the affections, and it gives the latter a mighty power both to raise and to lower the former, so that the regenerate man, or him whose affections have been purified by the procedure of a pure love through them, is altogether another, *even as a reasoning man*, for he becomes the little child who has entered into the kingdom of God. This hint of the real nature of Swedenborg's philosophy is all we can here give; and now a word or two on the two great subjects of development in which it is embodied: these are his *doctrine of the Bible*, and his *doctrine of the spiritual world*. The former has never been represented by him as an invented allegory, but as a perfectly unique divine symbol, such as the supreme wisdom becomes when it is breathed through the human mind, the self-intelligence meanwhile not interfering with its appropriation of images and figures. Let not these expressions be read carelessly, but deeply pondered, for they will be found to consist with a great law of intercourse between higher and lower intelligences; they point, in short, to the marvellous fact, that the Word is the open gate between the world and heaven, which it links together by a correspondence of thoughts and ideas: this can now be brought to the test of *objectiveness* through some states of clairvoyance, while its *subjective* test is open to all who know what Christian experience is. But the statements of Swedenborg concerning the spiritual world, are after all perhaps, the first and greatest difficulty that his readers have to encounter, and even when these are not altogether discredited, the similarity between spiritual and natural things is regarded as offensive. In the first place this similarity is apparent only, and belongs to a superficial acquaintance with his meaning; the real similarity being not that of *identity* but *correspondence*, and arising from the universal law that the ideal is nothing, even in things spiritual, till it finds repose and form in the real or substantial. We have already alluded to the preparation of Swedenborg, as consisting in the mathematical discipline of his mind and his acquaintance with the sciences, two distinct courses of which he went through—the elementary, in which all nature is reviewed as a mechanism, even to the intercourse between soul and body, and what we may term the concrete, which views the soul or living form in nature; the one a study of the laws which unite the atomic parts of bodies, from the grain of salt up to the scattered stars of the firmament; the other a study of organization from the least living part of the body, up to the rational soul dwelling in its whole order by influx and correspondence. This double course of preparation, it may now be apprehended, was absolutely necessary if spiritual laws were ever to become subjects of study: and even if we grant, in any case, that Swedenborg has brought them down to a too rigid formula, the form is but the net needful to catch these

winged thoughts, or rather, the artist's stationary figure representing his ever living and varying model; the life, the actual motion, cannot be drawn, but only one phasis of it, from which infinite variety and living beauty may be inferred. We hold it no disparagement of Swedenborg, therefore, that when he had arrived at his spiritual manhood, he was still as a child who had never left his mother nature—that his 'umbilical cord was never cut,' as Emerson expresses it: had it been, we should have had another great mystic, another Boehmen, Bourignon, or Peter Poiret, but we should still have awaited the Newton of the unseen universe. We have not space to substantiate these hints as we could wish, by reviewing ever so briefly the mass of writing to which they apply; yet we cannot conclude without a word or two on the principal of these works. The series commences with the '*Arcana Coelestia*,' published in London from 1749 to 1756. This work, a model of literary method and precision of language, is really the text-book of all that followed it, and is remarkable for the increasing depth of its meaning as we pass from volume to volume. The very heart of its contents, if we may dare trust ourselves to express so much in one sentence, is a psychological disclosure of the struggle between the Divine and the human natures in the experience of the Saviour; and it is in course of this development—sometimes expressed in terms applicable to Him alone, sometimes in the lower phraseology of all Christian experience—that Swedenborg has evolved his philosophy, and established his doctrine of the Word. We may here repeat, therefore, what we have already intimated, that it is in vain to look for either of these in the set terms of a *creed*; it is a study which frees the mind of all formularies, and the deeper it is pondered, the more confidently may the spirit take wing in the pure ether: *terms*, we have indeed, precise and beautifully fashioned forms of thought in these writings, which are as the nests in the branches, to which the tired thoughts will always return for repose and security, and the more gratefully the longer they have been on the wing: anything more than this Swedenborg would be the last among theologians to contemplate. That he speaks as a master is most true, but as one whose constant anxiety it is to place his disciples on the same intellectual footing as himself, to lure them gently on, whether by persuasion or authority, till they may look at the same divine things that he gazed upon, less by prerogative than the constitutional right which belongs to all. In a word, if there is any truth in Swedenborg's revelations at all, their pre-eminent value consists in this, that they unite the *understanding* and the *Word*; as the poet attracts the eye and the heart to nature—not by a painted *mirage*, or a crowd of stilted figures to be taken for it, but by awakening instincts, and touching the chords which really unite them within the human consciousness; they are, therefore, speaking within the bounds of coolest reason, the very complement and last necessity of Protestant freedom, for no church can claim dogmatic authority over any man who has once possessed himself of this key to the Scriptures, and no philosophy can have any dangers for him: all the stronger, therefore, becomes the *moral authority* of the church, for it thus grounds itself in the reason and freedom of man. After the *Arcana*, Swedenborg published, in 1758, a small tract '*Concerning the Last Judgment and the Destruction of Babylon*,' another '*On the White Horse of the Apocalypse*,' a third '*On the Earths of our Solar System, and some of the Earths of the Starry Heavens*,'

and a summary view of his position in theological form, entitled 'The New Jerusalem and its Heavenly Doctrine:' he added to these, as his labor of that year, his account 'Of Heaven and its Wonders,' accompanied with an 'Account of Hell.' What now is that Last Judgment and the Destroyed Babylon, manifested, as he says, among spirits in 1757? Why the announcement of the commencement of a new age, almost instantly followed, speaking historically, by the earthquake of the French revolution, the commotion begun by which is still spreading from land to land, and threatens to tremble under the feet of many generations? A question surely not answerable in these days of final judgment upon all things by the contemptuous regard hitherto paid to it. Why also, we may ask, this revelation of the Word coincident with its publication in all the known languages of the world? That White Horse—what is it but the free human spirit, the illuminated understanding, proceeding by which, through ages and nations, the Eternal Wisdom, as a crowned warrior, subdues all that is contrary to its dominion? It may be easy to doubt one figure even while admiring its beauty and universality, but what if this figure take a consistent place in the grand epic of the Scriptures and of human history, and marches in due order with a thousand others equally grand and universal? We can but say, these are some of the questions that the reader of Swedenborg must be prepared to encounter, and by these glimpses at his meaning we are far from intending any eulogy: they are simply designed to supply the place of a more elaborate description. Swedenborg continued his developments of the Word and of Spiritual Laws during the whole remainder of his life—a period, reckoning from 1745, when his spiritual sight commenced, of twenty-seven years. The principal works published by him after those mentioned above were his 'Doctrine of the Lord,' 'Doctrine of the Sacred Scripture,' 'Doctrine of Life,' and 'Doctrine of Faith,' all in 1763; his 'Angelic Wisdom, concerning Divine Love and Wisdom,' and 'Concerning Divine Providence,' in 1763 and 1764. His 'Apocalypse Revealed,' 1766; 'The Delights of Wisdom concerning Conjugal Love,' 1768; and 'The True Christian Religion,' 1771. None of these works were published in his own country, where the press was not free, but in London or Amsterdam; for this reason he made several journeys backwards and forwards, which were the only changes that marked his external life in the whole period. He died in London, in the eighty-fifth year of his age, 29th March, 1772. [E.R.]

SWEERT, E., a Dutch botanist, 17th century.

SWEERT, F., a Flemish historian, 1567–1629.

SWETT, JOHN A., an American physician, was born in Boston in Dec. 1808. His early education was received at the Boston grammar school, of which Mr. Benjamin A. Gould, known as the editor of an edition of Virgil, and subsequently a merchant of Boston, was at that time principal. After leaving school young Swett entered Harvard University, where he made the usual terms, graduating in 1828. He immediately commenced the study of medicine in the office of Dr. Jacob Bigelow, of Boston, at that time as now, professor of *Materia Medica* in the Harvard Medical School, and in 1831 obtained his diploma. Shortly afterwards, while still undecided as to the place he should fix upon, in which to await the slow and uncertain advent of practice, he paid a visit to New York. Longing for professional improvement, and for an instruction larger and more exact than could be obtained there, he determined

to visit Europe; and the following May, having obtained the reluctant consent of his mother, he sailed for Europe. Dr. Swett's residence in Paris formed an era in his life, and he always looked back to it with pleasure, as the period in which he had made the greatest and most rapid advances in professional knowledge. Among the hospital physicians, Louis was his favorite, not alone from the subjects to which he more especially devoted himself, but from the simplicity of character, the strong reliance upon facts, and the scrupulous regard for truth, of that great physician. Dr. Swett left Paris with regret. The progress he had made in his profession, the friendships he had formed, the pleasures which youth and health enabled him to enjoy, and which derived an increased zest from the hard study from which they had been stolen, rendered his residence there a happy period of his life. Soon after his return, Dr. Swett became again connected with the New York Dispensary. The lectures which he delivered there were stenographed by the late Dr. J. A. Houston, and published by him in the *New York Lancet*, of which he was the editor. Being extensively circulated, these lectures did much to enhance the growing reputation of Dr. Swett, and bring him into repute as an authority on the subject of which they treat. In 1842, one great object of Dr. Swett's ambition was attained; he was elected one of the physicians of the New York Hospital, in the place of Dr. Macdonald. Seldom has an appointment been made with greater unanimity on the part of the governors, and never had one been received with more satisfaction by the profession. He delivered repeated courses of lectures there upon diseases of the chest and of the kidneys; and his instructions at the bedside attracted a crowd of students who had hitherto been strangers to the medical wards of the institution. On the 1st of August, 1849, Dr. Swett was married to Martha, the daughter of the late Dr. Dale, of Gloucester, Massachusetts. In 1852 he published his treatise on diseases of the chest, the work on which his reputation with the public must mainly rest. The clearness of its method, the accuracy of its descriptions of disease, and the soundness of its pathological and therapeutical doctrines, must long render it a favorite with students and with the profession. In the spring of the following year, he was appointed professor of the theory and practice of physic in the medical department of the University of the city of New York. So far as professional honors were concerned, he had now attained the summit of his wishes. Early in life he had proposed two ends in his professional career; to become one of the physicians of the New York Hospital, and to become an authorized teacher of medicine. Both his aims at length were accomplished. His careful preparation was now to bear its fruit. A new and honorable career of usefulness lay open before him,—but clouds and darkness were gathering upon his path, and the shadow of death was slowly creeping over him. The illness which terminated Dr. Swett's life, dates as far back as the spring of 1848. He was a continual sufferer from that period until his death, which occurred on the 17th of September, 1854. Dr. Swett's understanding was clear and comprehensive, his judgment sound; he was a careful and patient observer, and a devoted and conscientious lover of truth. He was energetic and persevering in what he undertook, his passions were moderate and under the control of his reason, and he possessed in a high degree that almost instinctive recognition of truth and propriety quite independent of the mere power of reasoning, to which we give the name of common

sense. The soundness of his judgment and the moderation of his views were shown in the conduct of his ordinary affairs as well as in his professional career. With the greater part of the time a very moderate income, his expenditure was always sufficiently liberal, and yet within his means; he never involved himself in debt, and after giving in his last will a handsome legacy to the Society for the benefit of the widows and orphans of medical men, he still left his family a moderate competence.

SWIETEN, G., a Dutch physician, 1700–1772.

SWIFT, DEANE, grandson of Godwin Swift, eldest of the uncles of the celebrated writer (next article), and a descendant by the mother's side from Admiral Dean, a naval commander of Cromwell's time; author of an Essay upon the Life, Writings, and Character of Dr. Jonathan Swift; died 1783. His son, THEOPHILUS, a miscellaneous writer, died 1815.

SWIFT, JONATHAN, though Irish by birth, was of English descent. His grandfather was a clergyman in Herefordshire, and married a cousin of the poet, Dryden; his father, who was steward of the Irish inns of court, died very poor in 1667; and Jonathan was born at Dublin in November of the same year. The widow was thrown for support on her own relations, by whom her son was educated at the school of Kilkenny, and at Trinity College, Dublin. He was a careless student, and irregular in his conduct. Even then, however, he had worked in his vocation as a satirist, having sketched the 'Tale of a Tub' before he came across to England. This migration, occurring in 1688, opens the first of the four stages in the career of this singular and celebrated man. While he was always a polemic, and always strongest in satire, the opinions which he advocated, and the victims whom he attacked, were very different in the different periods of his activity. During the first of these periods, extending from his twenty-first year to his forty-third, he was a zealous Whig; for three years more he was engaged in supporting the politics and party of the English Tories; and in his third epoch, the longest and most creditable of all, and reaching from his forty-sixth year to his sixty-ninth, his efforts were chiefly directed, always earnestly though not always wisely, towards improving the treatment and condition of Ireland. The closing period of his long life, lasting nine years, was spent in total inactivity, enforced by the decay of his faculties.—On coming to England, Swift was received into the family of the accomplished Sir William Temple, whose wife was a kinswoman of his mother. During this first residence at Moor Park he studied hard, acted as secretary of his patron, became a favorite of William III., and refused the king's offer to give him a troop of horse. He wrote Pindaric odes, which, being printed, compel an acquiescence in the unpalatable opinion expressed to him by Dryden; 'Cousin Swift, you will never be a poet.' But his practice of serious verse-making, was useful in training him for the production of those comic and satirical rhymes, which, though they want all the elements of poetry, abound so much in his characteristic humor and his apt vigor of diction, as to be among the best of his works, and the most curious monuments of his time. In 1694, having become discontented with his patron, he crossed to Ireland, took orders, and went to be a country pastor in Antrim, on an endowment of a hundred a-year. Perhaps this retirement was only a feint; perhaps he found it to be a mistake. On receiving a friendly recall from Temple, he benevolently obtained a transference of his living to a poor curate in the neighborhood, and returned to Moor Park in 1695.

He had already begun his course of coquetry with ladies, by coming to a breach with his 'Varina,' in Ireland. He now began his tutorship and admiration of the unfortunate 'Stella,' who was a Miss Johnson, the daughter of Sir William Temple's steward, and then no more than thirteen or fourteen years old. During his second residence at Moor Park, he was led by his patron's share in the controversy between Bentley and Boyle, to write his 'Battle of the Books;' and probably the 'Tale of a Tub' also was now completed. These early works, while they fly at game higher than his political satires, are as characteristic as anything he ever wrote; and they are as full of talent, though not so well fitted for popularity, as the satirical romance which is his masterpiece. As a writer of plain, pure, vigorous, idiomatic English, Swift has no equal; and he has hardly any superior as a satirist, uniting extraordinary force with extraordinary humor, tremendously powerful in invective, and yet more formidable for the biting dexterity with which he wields the lash of irony. In reading his works we are never allowed to forget that he was ill-tempered, nor to suspect that, notwithstanding some good points, he was essentially bad-hearted and selfish;

[Laracor Church.]

but we are impressed by his strength even when he uses it in defence of error, and diverted by his wit even when it plays on things true and sacred. The intellectual characteristics of his writings were equally prominent in his conversation; when in good humor he was a marvellous talker, full of lively anecdote and jest; and he was always ready to throw back a stinging retort on an adversary. On Sir William Temple's death in 1699, Swift edited his posthumous works in London, and then accompanied Lord Berkeley, who was sent to Ireland. Misunderstandings occurred as usual; but, on his patron's recall next year, Swift was left in possession of livings yielding nearly four hundred a-year. He took up his abode at his vicarage of Laracor, in the county of Meath, made himself beloved for the charitable disposition which was one of his redeeming virtues, and discharged his duties as a parish clergyman with all the assiduity allowed by visits to England. These, however, took place every year, and sometimes lasted for several months. In 1704 the 'Tale of a Tub' and 'Battle of the Books' were published together, and, though anonymous, were attributed by the public to the right author. The former of the two was generally disliked by the clergy; and it was used as the means of infusing into the mind of Queen Anne an aversion to Swift, which made it impossible for his friends in the ministry to gratify his eager desire for ecclesiastical

preferment in England. The effect was not removed, either by his serious and manly 'Project for the Advancement of Religion,' or by the fine irony exhibited in the very title of 'An Argument to Prove that the Abolishing of Christianity in England may, as things now stand, be attended with some Inconveniences.' As early as 1708, when the latter of these pieces appeared, Swift was edging off from his political party. A real dissent from their opinions was indicated in more than one of those occasional pamphlets of his, which cannot here be so much as named. He was a vehement high churchman, and wrote against all relaxation of tests. In other points, such as his advocacy of annual parliaments, his doctrines would now make him be classed as a Radical. But his chief reasons for dissatisfaction with the Whigs themselves were two. They wounded his self-love by resisting demands of the Irish clergy, who had chosen Swift as their organ; and, above all, they could not, or would not, make him a bishop.—In the autumn of 1710, when the Tories had just come into power, a second mission from the Irish prelates introduced him familiarly to Harley and St. John: Godolphin, the Whig leader, treated him haughtily: and he enlisted in the cause of the new ministry with an envenomed alacrity. The most valuable service he rendered them was performed in the seven months ending in June, 1711, during which he wrote 'The Examiner.' Later in the same year he assisted the negotiations for peace by his tract 'The Conduct of the Allies;' and, the discreditable treaty of Utrecht having been concluded, his defence of it grew into the 'History of the Four Last Years of the Queen.' Still his new friends contented themselves, even more than the old, with rewarding him by flattering attentions. He proudly refused to be Harley's chaplain: and the minister, though he must have seen that he was hardly a safe man for the episcopal bench, made the attempt to raise him. But the royal obstinacy proved insurmountable. As a last resource, the deanery of St. Patrick's Cathedral, in Dublin, was secured for Swift in the spring of 1713; and, accepting this fairly lucrative appointment as a sentence of exile, he departed, resolving, as he says in one of those bitter letters which are among the most vigorous of his compositions, to forget everything in England, and never see it again, 'if they have no further service for me.' He was speedily recalled to write one or two pamphlets, and to see the displacement of the Tories on the accession of George I. He then returned to Ireland, and ceased to have any concern in English politics. Soon after 1714, when his residence was fixed in Dublin, he became involved, further than the world was allowed to suspect, in troubles arising out of his strange and unmanly flirtations. Stella, under the protection of a widowed lady, had come to live near him on his settlement at Laracor: and she now removed to Dublin, where she unexpectedly found a rival. This was Miss Vanhomrigh, the 'Vanessa' of Swift's verses, who had become acquainted with him in London much in the same way as Miss Johnson, and who now with her sister followed him to Dublin. Stella's jealousy caused stormy scenes, which the Dean thought to terminate by marrying her secretly in 1716. The pair were never more than friends, before the marriage or after it; a state of affairs for which various reasons have conjecturally been assigned. But, in 1723, Vanessa chose to write to Stella, demanding explanations; and Stella exhibited the letter to Swift. He rode off with it in a paroxysm of rage, presented himself to Vanessa, threw it on her table, and departed without say-

ing a word. The shock killed her in a few weeks. Nor did his other victim long survive. He was called away from his last visit to England, in the end of 1727, to attend her on her deathbed. In the mean time he had continued to write with his usual frequency. In 1726 he lived with Pope in his villa at Twickenham, and contributed to the first draught of 'Martinus Scriblerus:' and then, also, he published the bitterest, most ingenious, and most amusing of all satires on human nature, the 'Travels of Lemuel Gulliver.' Lilliput and Brobdignag will always preserve the name of Dean Swift. Nor was any practical occasion too trifling to call forth his cynical wit: he never was stronger than in his 'Polite Conversation,' and his mock 'Directions to Servants.' Irish affairs, however, were now his chief object; and the interests of the nation were embraced with a fiery zeal, which, in its denunciations of wrongs inflicted by England, forgot all distinctions of political party. The 'Draper's Letters,' published in 1723, to expose a patent granted for copper coinage in Ireland raised Swift, whom no one hesitated to hold as the writer, to the summit of a popularity, which was augmented both by many acts of private kindness, and by an incessant series of masked attacks on the government and on prevalent abuses. Some of the best of the Dean's pamphlets are dressed in his favorite ironical garb. One of them is a plan for paying off the national debt, by the very simple process of confiscating and selling the church lands. In another, he offers at once to increase capital in Ireland, and to diminish the surplus population; the little children are to be carefully fattened, and sold to the London butchers: the plan is recommended by a grave array of statistical calculations; and objections are answered in a series of the most tremendous sarcasms on Irish misery and English misgovernment. That Swift's energy was unabated in 1735, when he was in his sixty-eighth year, is roved by one of his best rhymed pieces, 'The Legion Club,' a libel on the Irish House of Commons, who had resisted claims of the clergy. But his last public efforts were made, in the same cause, during the succeeding year. Giddiness, and other symptoms, had long portended danger. His memory now began to fail; and terror of worse evils made him miserable, till the other powers gave way likewise. After having lingered for three years in peaceful idiocy, he died of hydrocephalus in October, 1745. He bequeathed his property, amounting to about £10,000, for the formation of a hospital in Dublin for lunatics and idiots. [W.S.]

SWIFT, ZEPHANIAH, chief justice of Connecticut, and a writer on law, 1759–1823.

SWINBURNE, H., a civilian, died 1624.

SWINBURNE, HENRY, the descendant of an ancient Roman Catholic family, known as the accomplished writer of Narratives of his Travels in Spain and the Two Sicilies, died in Trinidad 1803.

SWINDEN, JOHN HENRY VAN, a learned Dutch physician, professor of philosophy, logic, and metaphysics at Franeker, and of astronomy at Amsterdam, 1746–1853.

SWINDEN, TOBIAS, rector of Cuxton, in Kent, author of a book strangely entitled, an 'Enquiry into the Nature and Place of Hell,' died 1720.

SWINNOCK, G., a rector of Buckinghamshire, author of 'Heaven and Hell Epitomised,' died 1673.

SWINTON, JOHN, chaplain to the English factory at Leghorn, author of papers on Etruscan, Phœnician, and Eastern Antiquities, and a contributor to the Universal History, 1703–1777.

SWITZER, E., an English horticulturist, last et.

SYBRECHT, J., a Flemish painter, 1625–1730.

**SYDENHAM, CHARLES WILLIAM POULETT**, Lord, successor of the earl of Durham as governor-general of Canada, was born in London 1793, and continued the mercantile business of his father, J. Poulett Thompson, till 1830. Four years previously he had become a member of parliament, and when the Whig administration was formed, he took office as vice-president of the board of trade and treasurer of the navy. In 1834 he became president of that board, and in 1839 was appointed to the government of Canada, having previously been raised to the peerage. He was killed in Canada by a fall from his horse, 1841.

**SYDENHAM, FLOYER**, an eminent Greek scholar, was born in 1710, and educated at Wadham College, Oxford, where he took the degree of M.A. in 1734. He translated some of the works of Plato into English; but the want of patronage involved him in embarrassments; he was arrested and thrown into prison for a trifling debt due for his frugal meals, and there perished, in 1788. Such was the sympathy which his sad fate excited, that it gave rise to that excellent institution, the Literary Fund.

**SYDENHAM, THOMAS, M. D.**, a distinguished physician of the seventeenth century, and sometimes called the English Hippocrates, was born in 1624, at Windford Eagle, Dorsetshire, where his ancestors had been settled for many generations. Nothing whatever is known of the history of his boyhood, though it may be concluded from the condition of his family that his early education was not wholly neglected; but we find that in 1642, at the age of eighteen, he entered Oxford as a commoner of Magdalen Hall. His stay there, however, could not have been of long duration, for he shortly afterwards, probably in that very year, joined the army of the parliament, in which two of his brothers were then serving—William, who attained to the rank of a colonel, and was ultimately governor of the Isle of Wight; and Francis, who was a major of horse, and was killed in 1644. How long Thomas Sydenham, who is only known to posterity as the most eminent physician of his time, continued to act as a soldier, or what exploits he performed in that capacity, are points which it is impossible now to ascertain, but he himself speaks of his military career as having extended to several years, *aliquot annos*; and Sir Richard Blackmore described him as a ‘disbanded officer who entered upon the study of medicine for a maintenance and without any preparatory learning.’ He seems to have re-entered Oxford in 1646, where he acquired a fellowship in All Souls, and he graduated there in 1648, as M. B. (Bachelor of Medicine). When he settled in London is unknown, but he was certainly there before 1661, as he describes the epidemics of that year. In 1663 he became a licentiate of the College of Physicians, and in 1666 he published his first medical work, which he entitled *Methodus Curandi Febres*. In 1676 he took the degree of M. D. (Doctor of Medicine) at Cambridge, though not otherwise connected with that university, and in this year the first edition of his *Observationes Medicæ* appeared. In 1680 the first edition of the *Epistolæ Responsariæ* was published, and in 1686 the *Tractatus de Podagra et Hydrope*; and in 1685, the collected edition of his works known as the *Opera Universa*. Sydenham had been long afflicted by gout, which at length undermined his constitution, and he died of that distemper, combined with other maladies, at London on the 29th of December, 1689, in the sixty-fifth year of his age. [J.M'C]

**SYDNEY, ALGERNON**, the second son of Robert,

[Algernon Sydney.]

earl of Leicester, was born about the year 1621. In early youth he fought in the ranks of the parliamentary forces. Whatever sentiments influenced many of the other opponents of Charles I., his opinions, founded on the spirit of Roman republicanism, were inimical to all monarchy, and he proved them in his disgust at the ascendancy of Cromwell. He was abroad at the time of the restoration, and wandered about for some years scattering bitter sarcasms around against the objects of his political enmity. He was haughty and imperious in his own nature, and seems by no means to have courted the literary and social distinction which his genius might have achieved. His ‘Discourses concerning Government,’ was a posthumous work. It is full of powerful rhetorical arguments—as when in answer to the proposition of Salmasius, that kingly government is typed in the superiority of one kind of animal over another, he answers that this is nothing but the superiority of brutish violence and injustice, and that the type, ‘Though it should prove to be in all respects adequate to the matter in question, could only show, that those who have no sense of right, reason, or religion, have a natural propensity to make use of their strength to the destruction of such as are weaker than they—and not that any are willing to submit, or not to resist it if they can—which I think will be of no great advantage to monarchy.’ He was permitted to return to England in 1677. Though he had probably deeper ultimate views, his connection with the Ryehouse plot, for which he suffered, was the same substantially as that of Lord William Russell, already referred to. Sydney met his fate with iron firmness, and was beheaded on the 7th of December, 1683. [J.H.B.]

**SYEN, ARNOLD**, a Dutch botanist, 1604–1667.

**SYKES, ARTHUR ASHLEY**, an English divine, was born in London about 1694, and educated at St. Paul’s School, and Corpus Christi College, Cambridge. He held, successively, the livings of Godmersham, Dry Drayton, and Rayleigh; became a prebendary and chancellor of Salisbury cathedral; and ultimately obtained the deanery of St. Burien, in Cornwall, and a prebend at Winchester. He died in 1756. Dr. Sykes was distinguished as an able controversialist in favor of the Hoadleyan or low church principles; and was also the author of ‘An Essay on the Truth of the Christian Religion,’ &c.

**SYLBURG, F.**, a German philologist, 1536–96.

**SYLLA, LUCIUS CORNELIUS**, whose bloody pros-

criptions have passed into a proverb, was descended from one branch of the famous Cornelian family. He became quæstor when about thirty years of age, B.C. 107, and after obtaining military renown under Marius in Africa, became chief of the aristocratic party in the social war, and vanquished his old companion-in-arms in Italy; he was then, B.C. 88, elected consul. Sylla had marched to his victory over Marius from the field of battle in which Mithridates had succumbed to him, and the latter having renewed the war, he led another expedition against him B.C. 87. The success to which he had now become accustomed still attended the arms of Sylla, and his operations were one long series of victories, often, however, dearly bought; it was in these wars that he captured Athens, and the victory was such a fearful one that the blood is said to have run out from the city gates into the fields; the most splendid monuments of Athenian art were also doomed to destruction. While these events were taking place in the East, Marius and his party had recovered the dictatorship in Rome, and Sylla hastily returning at the head of his victorious legions, gained a second great victory over the Plebeians, and entered Rome in triumph in the year 82. He was now absolute master of the lives, liberties, and property of the citizens of Rome, and he used his power as the head of an unprincipled faction, cradled in the blood and crimes of the expiring republic, may be supposed to have done. Sylla governed under the title of perpetual dictator, and strenuously applied himself to the reconstruction of the aristocratic constitution. His contempt for the people may be judged from the instance in which he addressed an assembly of them, on occasion of certain complaints reaching him: he recited this apologue:—‘A laborer when at plough was annoyed by vermin, and he twice stopped from his work and pulled them off his jacket. But finding himself bitten again, to spare himself any further trouble, he threw the jacket into the fire. Now I advise those whom I have twice conquered, not to oblige me, a third time, to try the fire.’ The wholesale nature of his confiscations may be judged from the number of his soldiers, namely, 115,000 men, whom he rewarded with settlements in Italy; finally, he enfranchised 10,000 slaves to increase the number of his partisans, and enrolled them among the free citizens. In a manner as extraordinary, he abdicated all power, B.C. 79, chiefly, we may presume, from his subsequent conduct, that he might exchange the cares of state for the licentiousness of private life. This fact is a sufficient answer, one might suppose, to all that can be urged in behalf of his desire for the public good. No man who is unprincipled and licentious in private life, can deserve credit for any real virtue in his public acts. Sylla died of a disgusting malady, B.C. 77, having previously written his ‘Memoirs.’ [E.R.]

SYLVESTER, or SILVESTER, *first* of the name pope and saint of Rome, reigned 814–323. The *second*, who was one of the most extraordinary men of his age as an astronomer, mathematician, and man of practical science, succeeded Gregory V. 999, and died 1003. Some of his writings are extant. The *third* Sylvester was an antipope set up in 1044.

SYLVESTER, JOSHUA, an inferior English poet, translator of Du Bartas’s ‘Divine Weeks and Works,’ born in London 1563, died 1618.

SYLVESTER, MATTHEW, a Church of England minister, ejected for nonconformity, 1662.

SYLVIUS, F., a French grammarian, died 1630.

SYLVIUS, FRANCIS DELABOE or DUBOIS, a Dutch physiologist and chemist, 1614–1672.

SYLVIVS, LAMBERT, otherwise VANDEN BOSCH, a Dutch biographer and poet, 1610–1688.

SYMES, MICHAEL, an English officer, who was sent as ambassador to the Burmese court at Amrapoora, in 1795, and had the satisfaction of concluding an advantageous treaty of commerce with the Burmese emperor. On arriving in England, Major Symes published the account of his ‘Embassy to the Kingdom of Ava.’ He died, shortly after the disastrous retreat of Sir John Moore’s army, from fatigue, being then colonel of the 66th regiment of infantry, Jan., 1809.

SYMMACHUS, a pope of Rome, 498–514.

SYMMACHUS, QUINTUS AURELIUS, a prefect, pontiff, and augur of Rome in its declining age, remarkable for his eloquent appeal against the ruin threatened by the triumph of Christianity; he is the author of ‘Epistles’ still extant, and became consul under Theodosius in 391. His descendant, QUINTUS AURELIUS MEMMIUS, was a senator in the time of Odoacer 485, and was put to death by Theodoric 525.

SYMMACHUS THE SAMARITAN, a learned Christian of the sect of Ebionites, 2d century.

[J. C. Symmes's monument, Hamilton, Ohio.]

SYMME, JOHN CLEVES, the author of an Eccentric Theory of the Earth, in which he held that the globe was hollow, with openings at the poles for admission of light, died 1829.

SYMMONS, DR. CHARLES, was born in 1749, at Cardigan, which town his father represented in three successive parliaments. He was the author of ‘Inez’ and ‘Constantia,’ two dramatic poems; a metrical translation of the Æneid, and a ‘Life of Milton.’ Dr. Symmons was a warm admirer of literature, and a zealous supporter of the Literary Fund Society. Died 1826.—CAROLINE SYMMONS, his daughter, was remarkable for precocity of talent. She was born in 1788; and after her death, which took place in 1812, her father published a collection of her poems.

SYNCELLUS, GEORGE, a monk of Constantinople, author of a Chronography, which contains an account of Egyptian kings, and corrects the Chronicon of Eusebius, died 800.

SYNESIUS, a bishop of Ptolemais, in Africa, in the 5th century, who had the advantage of pursuing his philosophical studies under Hypatia. Author of Epistles and other writings.

SYNGE, E., an Irish prelate, 1659–1741.

SYPHAX, king of Western Numidia, d. 201 B.C.

SYRIANUS, a philosopher of the school of Neoplatonists at Athens, died 450.

SYROPULUS, SILVESTER, a Greek ecclesiastic, historian of the Council of Florence, 15th century.

SYRUS. See PUBLIUS.

SZALKAI, ANTHONY, a Hungarian poet and dramatic author, author of the first regular drama composed in his native tongue, died 1804.

SZECEDI, JOHN BAPTIST, a learned Jesuit, born at Eisenstadt, in 1699. He became, successively, rector, missionary, and almoner-general; and was

distinguished as well by the purity of his life, as by his talents. His works chiefly relate to the laws and history of Hungary. He died in 1760.

SZENT-MARTONLY, IGNATIUS, a Jesuit and astronomer of Portugal, who suffered a long imprisonment on the suppression of his order in that country, 1718-1793.

SZTARAY, ANTHONY, Count De, an Austrian general, opposed to Dumouriez, period of the French revolution, died 1808.

## T

TABARI, an Arabian historian, 839-925.

TABARRANI, PIETRO, an Italian physician, and author of *Anatomical Observations*, 1702-79.

TABERNÆMONTANUS, JAMES THEODORE, a German physician and botanist, 1520-1588.

TABOR, J. O., a Ger. juriconsult, 1604-1674.

TABOUE, J., a French historian, 17th century.

TABOUROT, S., a French poet, 1547-1590.

TACCA, PETER JAMES, a celebrated Italian sculptor, was a pupil of John of Bologna. Two of his greatest works are the statue of Ferdinand III., grand-duke of Tuscany, with four slaves chained at his feet, at Leghorn; and the equestrian figure of Philip IV., at Madrid. Died 1640.

TACCOLI, N., an Italian historian, 1690-1768.

TACHARD, GUY, a French Jesuit, who accompanied the French ambassadors to Siam, as a missionary. In 1688 he returned to Europe, after an absence of two years, but went again to India, and died in Bengal about 1694. His voyages, in 2 vols., were published at Paris, in 1689.

TACITUS (CAIUS CORNELIUS), the Roman historian. Tacitus was probably born in the reign of Nero, but neither the place nor the exact time of his birth is known. It appears from a letter of the younger Pliny, who was born A. D. 61, that Tacitus was about the same age with himself, but a little older; he may, therefore, have been born in A. D. 58 or 59. His parentage is veiled in the same obscurity; but it is not improbable that his father was Cornelius Tacitus, a Roman knight, who is

[Tacitus.—From an Antique Gem.]

mentioned by Pliny as a procurator of the emperor in Belgic Gaul. We thus know nothing of the training which he underwent in youth, preparatory to the literary labors which he afterwards so ably performed. He has himself recorded a few facts illustrative of his career after he had attained the age of manhood; and these form the only authentic history of his life. He owed his first promotion to Vespasian, and was indebted for further favors to his

sons and successors, Titus and Domitian. In A.D. 77 C. Julius Agricola, who was then consul, betrothed to him his daughter, whom he married in the following year. He was one of fifteen commissioners appointed to superintend the celebration of the secular games in A.D. 88, and held in the same year the office of prætor. He was not in Rome when his father-in-law died there A.D. 93, nor does he state the reason of his absence. In A.D. 97 he was elected consul to supply the place of Virginius Rufus, who died during his year of office; and pronounced over the deceased the funeral oration. In A.D. 99 he was appointed by the senate, along with Pliny, to conduct the prosecution of Marius, proconsul of Africa, who was impeached for malversation in his province; and, on the testimony of his associate and friend, made a most eloquent and dignified reply to the arguments advanced in defence of the accused. The time of his death is unknown; but it may perhaps be inferred that he survived Trajan, who died A.D. 117. The extant works of Tacitus are—1. The Life of Agricola, his father-in-law; 2. A Treatise on the Manners and Customs of the Germans; 3. Histories; 4. Annals; 5. Dialogue on Orators, or the Causes of the Decline of Eloquence. The Life of Agricola is one of the earliest works of Tacitus, and must have been written after the death of Domitian B.C. 96. It has been much and justly admired as a specimen of Biography; and is certainly an affectionate tribute to the memory of an able administrator and a good man. His description of ancient Germany and its people is not of much value as an historical document, though there can be little doubt that it contains the hearsay accounts which were prevalent in the age of the author. The histories, of which only the first four books and a part of the fifth are extant, comprehended the period from the accession of Galba (A.D. 68) to the death of Domitian (A.D. 96). The Annals comprised the period from the death of Augustus (A.D. 14) to the death of Nero (A.D. 68). Of these a part of the fifth book is lost, and also the seventh, eighth, ninth, tenth, the beginning of the eleventh, and the end of the sixteenth, which is the last. The style of Tacitus is concise, vigorous, and expressive: occasionally obscured by elaborate condensation, but always such as to impress the reader with a high opinion of the reflective powers of the writer.

[G.F.]

TACITUS, MARCUS CLAUDIUS, a patriotic Roman emperor, elected to the imperial office on the death of Aurelian, A.D. 275, when in his 75th year. He was descended from the great historian above described, and had been twice consul; but he reigned as emperor only six months, in which short space he displayed wisdom, vigor, and a just moderation.

TACQUET, ANDREW, an able mathematician, born at Antwerp, in 1611. He published several mathematical works, all of which were collected in

one folio volume, and published after his death, in 1707.

TADJ-EDDYN, an Arabian historian, d. 1275.

TAFFI, ANDREA, an Italian artist, born at Florence in 1213. He introduced into Italy the art of designing in Mosaic, which he learnt from some Greeks employed at Venice. Died 1294.

TAFURI, J. B., an Ital. biographer, 1695-1760.

TAGLIACOZZI, or TALIACOTIUS, GASPAR, an eminent Italian surgeon, ludicrously alluded to by the author of *Hudibras*, was born at Bologna, in 1546, where he was for many years anatomical professor. He applied himself chiefly to curing wounds of the ears, lips, &c., but more particularly the nose. This, which has obtained the name of the *Taliacotian* process, has both been performed and written on by Mr. Carpue and Mr. Travers, and various other surgeons, English and American. It appears, also, that the operation has long been practised in India. Died 1599.

TAHUREAU, J., a French poet, 1527-1555.

TAILLASSON, JOHN JOSEPH, a French painter and writer on art, 1746-1809.

TAILLE, J. DE LA, a French poet, dramatist, and historian, 1540-1595. His brother, JAMES, a poet and author of several tragedies, 1542-1562.

TAILLEPIED, NOEL, a French biographer, antiquarian, and historian of the Druids, 1540-89.

TAISAUD, P., a French jurist, 1644-1715.

TAI-TSOU, emperor of China, 951-954.

TAIE-TSOUNG, emperor of China, 977-997.

TALBERT, F. X., a French priest, 1728-1803.

TALBOT, CHARLES, successively earl and duke of Shrewsbury, descended from the famous warrior of that name (next article), was born in 1660. He held the office of lord chamberlain to James II., but actively promoted the revolution in 1688, and became viceroy of Ireland and lord treasurer. d. 1717.

[Effigy on the Tomb of John Talbot.]

TALBOT, JOHN, earl of Shrewsbury, called 'The English Achilles,' renowned in the French wars, was the second son of Richard, Lord Talbot, and was born at Blechmore, in Shropshire, 1373. Shakspeare calls him 'The Terror of France' with historical correctness, his name at the time having really become

proverbial in that country. The history of Talbot commences with his call to parliament by Henry IV., after which, in 1412, he was appointed lord justice in Ireland, and in 1414 lord-lieutenant. He first went to France in the reign of Henry V., 1420, and nine years later, under the regent Bedford, his exploits had rendered his name a word of terror. At this time, however, the Maid of Orleans (see JOAN OF ARC) turned the fortunes of war against him, and Talbot became the prisoner of Charles VII. from 1429 to 1432, when he recovered his liberty by ransom. Under date 1433, the French chronicler, Mon-

[Mausoleum of the Talbots, at Dorking.]

strelet, informs us how 'Messire Jean de Thellebot' came into France, where he conquered many cities and fortresses; on this occasion, in fact, he reasserted the English dominion in that country, and for his services was created marshal of the kingdom; at a later period, 1442, the earldom of Shrewsbury was conferred on him. We next hear of him in an embassy for peace 1443, and then, 1446, in his old lieutenancy in Ireland,—English affairs in France meanwhile going to ruin. In 1449 we read in old Monstrelet's annals, how valiantly he led three hundred men to the assault of Rouen, and planted the English flag on the battlements. He seems then to have returned to England again, and in 1451 went back to Aquitaine as lieutenant-general with extraordinary powers: once more he led the 'noble English' to victory, and at the head of less than five thousand combatants, recovered Guienne, aided, indeed, by the treason of Lesparre and others. Twice did Charles, and twice did Talbot, recover Bourdeaux,—the latter, on the first of these occasions, becoming prisoner, when he was treated with great courtesy on account of his valor, and presented by Charles with gifts of horses and gold and silver. In 1453 he marched to the relief of Castillon, then besieged by the French, and was killed by a cannon ball in the eightieth year of his age; one of his sons also fell with him on the field of battle, and the English, no longer sustained by his heroic arm, were soon after expelled from France. [E.R.]

TALBOT, P., an Irish Jesuit, 1620-1680.

TALBOT, R., an English antiquary, died 1558.

TALBOT, WILLIAM, successively bishop of Oxford, Salisbury, and Durham, 1659-1730. His son, CHARLES, Lord Talbot, brought up to the bar, was born 1684. In 1719 he entered parliament, became solicitor-general in 1726, and lord chancellor in 1733; died 1737. CATHERINE, only child of Edward, his second son, author of several elegantly written works, 1720-1770.

TALCOTT, JOSEPH, governor of Connecticut from 1724 to 1741. Died 1742.

TALFOURD, THOMAS NOON, the author of 'Ion,' was born at Reading in 1795. He was educated

there at the Dissenters' grammar school, and instructed in classical literature by Dr. Valpy. In 1821 he was called to the bar, and first wore the serjeant's gown in 1833. Two years later Serjeant Talfourd became a member of parliament, and published his famous tragedy, followed at intervals by 'The Athenian Captive,' 'Glencoe,' and the 'Castilian.' In 1849 he was appointed a judge of the Common Pleas, and was on the bench at Stafford, apparently in good health, when he suddenly breathed his last on the 20th March, 1854. 'Ion' is acknowledged to be a fine classical production, abounding in passages of remarkable beauty. The character of Talfourd also was well worthy of his literary fame; perhaps no man was more beloved in his own circle for kindness of heart, and all the virtues of social intercourse. His prose works are a 'Life of Charles Lamb,' 'Vacation Rambles,' and a biography of Mrs. Radcliffe.

TALIESIN, termed PEN BIERDD, or the Chief of the Bards, is regarded as the most eminent of the ancient British poets. He lived in the middle of the sixth century; and his name has been handed down to posterity in conjunction with the two Merlins, under the appellation of the three principal Christian bards.

TALLARD, CAMILLE D'HOSTUN, Duke De, a celebrated marshal of France, was born in 1652. After having distinguished himself under Turenne, he was, in 1697, sent ambassador to England, to negotiate concerning the succession to the crown of Spain on the death of Charles II. War breaking out in 1702, he was honored with a marshal's staff; and after he had defeated the imperialists before Landau, and the town had capitulated, he announced his success to Louis XIV. in the following terms: 'I have taken more standards than your majesty has lost soldiers.' He was afterwards opposed to the Duke of Marlborough, and taken prisoner at the battle of Hochstet; on which occasion he said to the duke, 'Your Grace has beaten the finest troops in Europe.' The duke replied, 'You will except, I hope, those who defeated them.' Marshal Tallard remained in England till 1712, when he returned to Paris, and was created a duke. In 1726 he was made secretary of state, and died in 1728.

TALLENTS, F., a nonconf. divine, 1619-1708.

TALLEYRAND, a younger branch of the family of the counts of Perigord, the first of whom known to history was HELIE DE TALLEYRAND, who lived about 1100. After him we find HELIE DE TALLEYRAND PERIGORD, an influential cardinal and statesman, 1301-1364. H. DE TALLEYRAND, count of Chalais, minister and favorite of Louis XIII., who was out-generated by Richelieu, and perished on the scaffold 1626. ALBERT ANGELIQUE, cardinal and peer of France at the period of the revolution, fled with the emigration, but returned with the Bourbons, and in 1819 became archbishop of Paris, 1736-1821.

TALLEYRAND-PERIGORD, CHARLES MAURICE DE, the character of his house who fills by far the largest space in history, the prince of diplomatists, was born at Paris in 1754, and educated for the church. His course of life was not very consistent with this profession, but the wish of his dying father prevailed with Louis XVI., and he was named, in 1788, bishop of Autun, a rural diocese in the Bourbonnais. The connection, studies, and manners of the young prelate were still such as invited him to preserve his place in society, and he frequented not the less the gay salons of Paris, studying, if any thing, Voltaire and Fontenelle, and drawing more

closely to Mirabeau and the other stirring spirits of that period. In May, 1789, the states-general met, and Talleyrand took his place with the clergy, and, adopting popular principles, actively engaged himself in the reorganization of the state, upon which that body so resolutely entered; he even proposed the confiscation and sale of the church property, and when that measure was carried, zealously applied himself to the creation of a constitutional clergy. For these and similar misdeeds, he was excommunicated by Pius VI. some six months after he had given the sanction of the church to the people's cause by celebrating high mass on the 'altar of the country.' On leaving the church, Talleyrand at once assumed the character by which he is known to history, and went as ambassador to England with M. Chauvelin, with whom also he was suddenly expelled from London by the ministry of Pitt; he then fled to America, his name being compromised in the discoveries of the iron chest, so soon followed by the ruin of the monarchy. He remained in his transatlantic asylum till after the fall of Robespierre, thus escaping the whole period of the reign of terror, and then, returning to Paris, became a member of the newly-founded National Institute, and minister of foreign affairs under the Directory. It is at this point that the European interest of his history commences, for he now conspired against his masters, and promoted the revolution which carried Napoleon to the summit of power. Here the question occurs, therefore, What were his convictions? *Faith*, in what any single party might understand by *principle*, Talleyrand had not; yet, he possessed some rare quality of mind which, to him, supplied the place of such a faith, and which has been aptly designated a 'supernatural indifference,'—an indifference not to his own fate, but to whatsoever event might befall the men or the institutions surrounding him, so that his own schemes remained buoyant. Napoleon's summary judgment of him is perhaps nearer the truth than any more labored criticism, and his words are these:—'Talleyrand was always in a state of treason, *but it was a treasonable complicity with fortune herself*; his circumspection was extreme; he conducted himself towards his friends as if, at some future time, they might be his enemies, and towards his enemies as if they might become his friends!' This, after all the apologies we have read for him, really seems to be the sum of the matter; and however admirable such a character might be as a minister of foreign affairs, there is surely too much of the Mephistopheles element in it to satisfy any lover of honesty; it is a judgment, also, by no means *ex parte* in character, for the fact stated is implied in the very apologies for him. What else is the argument that he shifted from one party to another, lest he should partake in the threatened corruption of the body of which he foresaw the decay, except another way of stating his *treasonable complicity with fortune*; and what would any cause be worth if all its supporters were in this state of perennial treason towards it? What, again, is the moral worth of that man, however great his capacity, who supports a cause on condition of its success? We should be doing injustice to the memory of Talleyrand, not to add that he earnestly desired peace, and the alliance of France and England in a progressive policy; his great misfortune was an overweening reliance on the shifts of diplomacy, his too great willingness to adopt that expedient of abominable cunning—though the expression came from a nobler head than his—'tell a lie and find it truth!' Talleyrand re-

mained foreign minister under Napoleon till 1807, when he was created prince of Benevento, and became grand-chamberlain, with the titular rank of vice-grand-elect of the empire. In 1809 he began his opposition to the policy of Napoleon, and being deprived of his office of chamberlain, retired to Valençay, where it would appear he conspired against the emperor. The year 1814 found him acting openly with the allies, and he next appears as minister under Louis XVIII. In the latter years of the opposition which ended in the revolution of 1830, Talleyrand took no part in public business, but on the accession of Louis Philippe, as citizen king, he became ambassador once more in England. This appointment he held till January, 1835, when his great age caused him to resign it, and he was succeeded by General Sebastiani. To him, more than any other man, Louis Philippe was indebted for the creation of his peace policy, maintained, say the French, 'at any price,—a matter this which must yet await, some time, a righteous judgment. Died 1838.

[E.R.]

Tallien.

TALLIEN, JEAN LAMBERT, a Jacobin of the French revolution, chief agent in the fall of Robespierre, was born at Paris 1769, and was successively clerk to an attorney, and in one of the government offices. At the epoch of the revolution he became secretary to one of the deputies, and at the declining period of the Legislative Assembly was editor of the 'Ami des Citoyens,' one of the journals by which the populace were goaded to anarchy; he also actively assisted in organizing the insurrection of August 10, 1792, on the success of which he was appointed recording secretary of the Paris Commune. From this time Tallien ranked with the most active members of the mountain, and aided in the destruction of the Girondins; he was also implicated in the massacres of September, and became president of the Assembly on the day of the king's execution. In the beginning of 1794 he was sent with Ysabeau to the city of Bourdeaux to crush the remnant of feeling remaining in favor of Girondism, and place the republican government on a secure basis: here he struck terror into the population by his remorseless use of the guillotine, at the same time that he revelled in the proconsular splendor and debauchery of which several other cities of France at that time presented a like example. One of the most beautiful and highly spirited women of that age was a Madame de Fontenai, daughter of the count de Cabarrus, a Spanish grandee, of French extraction; she was detained at Bourdeaux *en route* for Spain by the

arrest of her husband, and was accustomed to address the clubs, where her appearance excited the greatest enthusiasm. Easily moved to pity by the terror around her, and fond of adventure and notoriety, this woman resolved to conquer the heart of the dreaded Tallien, and she succeeded so well that his greatest pride was to exhibit her in his splendid equipage, clothed in Grecian costume, to represent the goddess of liberty—a parade of Oriental luxury and vice, which disgusted Robespierre beyond expression, while it amused the people and was the salvation of many of them, for whom this modern Thais was never tired of interceding. Being recalled to Paris as the last struggle between Robespierre and these corrupters of the people drew high, Madame de Fontenai was arrested, in the expectation that she would lend her assistance in the fall of Tallien, and, at all events, that she might not embarrass the action of Robespierre and Saint Just. She, however, proved true to her lover, and privately conveyed a note to him, in which she reproached him with cowardice if he suffered her now to perish on the scaffold. Thus exasperated, and certain that his own head would fall next, Tallien acted that daring part in Convention, on the 9th Thermidor, which proved the destruction of Robespierre: he was then elected to the Committee of Public Safety, and became president of the Convention; now, also, Madame de Fontenai became his wife. He played a considerable part in subsequent events, and was elected on the Council of 500; the ascendancy of Buonaparte, however, soon threw men of his stamp into the shade, and Tallien died, without ever recovering the undeserved importance he had once enjoyed, in 1820. His beautiful colleague, for such Madame de Fontenai really was, procured a divorce during his absence in Egypt, whither he had gone with Napoleon, and in 1805, was married to the count Joseph de Caraman, afterwards prince of Chimay: she died in 1835. Tallien, we ought to say, admitted his 'errors,' as he called them, but pleaded the delirium of the times, a fact surely of some significance; ignorant of what the future may have in store for us, let us ponder these circumstances, and consider well what monstrous births might yet be brought forth among the millions who know nothing of Christianity but the name, and little of civilization but its corrupting influences. [E.R.]

TALLIS, THOMAS, the master of William Byrde, one of the greatest of English musicians, was born early in the reign of Henry VIII. The most curious and extraordinary of his works which is still extant was his song of forty vocal parts. This great effort of musical science is carried on in alternate flight, pursuit, attack, and choral counterpoint to the end. This many-voiced piece of Gothicism is terminated by twelve bars of full harmony. Tallis died in 1585, and was buried in the old parish church of Greenwich. [J.M.]

TALMA, FRANCIS JOSEPH, the Garrick of the French stage, was born at Paris about 1770, but a great portion of his boyhood was passed in London. He was educated at a boarding school in Lambeth, and then articled to a surgeon; but soon joined an amateur French company, under Sir John Gallini at the Hanover Square Rooms, and appeared as *Count Almaviva*, in Beaumarchais' comedy of 'The Barber of Seville,' and other characters. His taste was formed by witnessing the performances of Kemble and Siddons, and on visiting Paris as an actor, and making his *débüt* on the boards of the theatre Français, he ventured on the new style of acting, but as might have been expected, it was not imme-

Talma's House.

diately acceptable. An accident caused, at length, the acknowledgment of his merits. A tragedy by M. Chenier, entitled *Charles IX.*, being accepted, and the part refused by the chief performer, M. Saintful, who accompanied his refusal with the sneering recommendation that it should be given 'to young Talma;' the recommendation was literally adopted, and Talma, by sedulous study of the part, and an adoption of proper costume, won a decided triumph by the performance. The advantage of his English education was in this apparent; but still more conspicuously in the next occurrence. M. Ducis had undertaken a translation of Shakspeare's '*Othello*,' with a catastrophe more suitable, as he thought, to the prejudices of a French audience; but Talma, enlightened by what he had observed of the English stage, insisted on the Shaksperian conclusion. The result was a marvellous success, which placed Talma at the summit of his profession. He won a large fortune by his exertions, a high position in society, and the favor of the emperor Napoleon. He died at Paris 19th October, 1826, having previously published (1825) '*Reflexions*' on the histrionic art, distinguished by much truth and research. He was interred, according to his own directions, in the cemetery of Père la Chaise, without any religious ceremony, but funeral orations by Jouy and Arnault were delivered at the grave. To change, it is alleged, his resolution on this score, the archbishop of Paris had sought an interview, but in vain. Talma's conduct, it is supposed, proceeded from his resentment at the excommunication pronounced by the Roman Catholic Church against actors. A short time before his death, he embraced his theatrical friends, Jouy, Arnault, and Duvilliers, but refused to see Madam Vanhove, his wife, from whom he had been long separated. At the funeral a magnificent hearse conveyed his remains, and was followed by fifteen mourning coaches, besides Talma's own, and several empty carriages, with a great number of literary and theatrical persons on foot, and a multitude exceeding four thousand individuals. A large concourse of citizens also filled the cemetery and surrounded the tomb. Such was the respect shown to the great actor—not excessive, though so significant, for to the artist reverence is always due, and the art of acting is one in which the characteristics of all the other arts are united.

TALMONT, A. P. LA TREMOILLE, Prince De, a royalist chief in the war of La Vendée, executed at his castle of Laval 1793.

TALMONT, GABRIELLE DE BOURBON, Princess De, wife of Louis II. of La Tremouille, author of works of devotion still in MS., died 1516.

TAMBRONI, JOSEPH, an Italian poet and historian, born at Bologna, in 1773. In 1809 he was appointed consul at Leghorn, and afterwards at Rome. He wrote '*Compendio delle Storie di Polonio*,' &c. Died 1824.—His sister, CLOTILDA, was noted for her acquaintance with Greek literature, and in 1794 the Greek professorship of Bologna was bestowed on her. Died 1817.

TAMBURINI, PIETRO, a famous Italian moralist and writer on jurisprudence, 1737–1827.

TAMERLANE, sometimes called 'Timour the Tartar,' one of those grand old heroes who have in past times disputed the empire of the world, was born at Kesh, a town south-east of Samarcand, in 1335. He was a descendant on the mother's side of the Mongol emperor Genghis Khan, and became sovereign of Tartary after the defeat of Houssein, his competitor, in 1369 or 1370. Saluted emperor, with the surname of *Saheb Karan* (Master of the World), he commenced to make good his title by invading Persia, and in a short time, 1380, took possession of Herat and the whole of Khorassan. It was the age of the capture of Constantinople by the Turks, and all the races of the East were more or less engaged in the struggle for empire. The feeling of Tamerlane was thus distinctly expressed: 'The earth ought to have but one master, as there is only one God in heaven; and what (he asked) is the earth, with all its inhabitants, for the ambition of a great prince?' The barbarian grandeur of resolve thus announced is greatly preferable, if only on the score of manly sincerity, to the same end sought by the tricks of corruption and diplomacy, fearful as it is to contemplate the progress of such a scourge, the cities destroyed, and the pyramids formed of thousands of human heads, which were all that Tamerlane left to mark the spot where they had once flourished. These are scenes it is unnecessary to depict in detail, enough to state that the conquests of Tamerlane had reached from Moscow on the one hand, to Delhi in India on the other, before he marched against his last and greatest foe, the Sultan Bajazet. The eventful battle which decided the question whether the Osmanlis or the Tartars should be masters for the present was fought at Angora, on the 20th July, 1402, the number of combatants on the side of Tamerlane being 200,000 men, having twenty-six elephants, and on the part of Bajazet 300,000 men, with ten elephants. The conflict raged with fury six hours, and after 40,000 of the Turks were laid dead on the field, and 10,000 of their adversaries, Bajazet became the prisoner of his conqueror, who retained him captive, though he treated him with great generosity, till his death in the year following. Tamerlane then, in 1404, returned to his capital, and insatiate of conquest, immediately organized an army of elite troops, numbering 200,000 men, destined to act against China, but he was seized with a violent fever, and died, soon after taking the field, 18th February, 1405. This extraordinary man is supposed to be the author of a book of '*Institutes, Political and Military*,' which has been translated from the Persian into French and English. His portrait represents a warrior armed *cap-a-pie*, of lofty stature, with a noble countenance, framed on the Greek model, and a head massive as that of Hercules. While extensive conquests, and the foundation of empires, are rendered necessary by the ignorance and vice of whole masses of population, such a man must be numbered among the great of his kind; the

history of all such, however, proves by accumulated instances, that their successes are only as so many judgments upon society, as grand, and it may be as beneficial in their results as the storms of the atmosphere. If it be so, the sudden rise of empires, and the recurrence of the experiment from age to age, whether under an Alexander, a Cæsar, a Tamerlane, or a Napoleon, can but be for a temporal purpose; instead of pointing to universal dominion as the end of society, every fresh attempt does but prove the impossibility of such a result; the master mind seems but the electric spot to which the clouds gather from all sides, till the heavens are black, and the portent explodes in thunder, or dazzles the world with its fires. The end of Providence is not to arm frail man with his thunders, but to render the air free and pure around him; so long as ignorance prevails, so long as the darkest passions continue to ferment and clash with each other, these scenes must recur. After all, we may hope, will come those peaceful communities, of which the policy of our own country and the spirit of its history afford the likeliest promise the world has yet seen. [E.R.]

**TAMMEAMEA**, a king of the Sandwich Islands, to whom the merit belongs of beginning the civilization of his country, died 1819.

**TANCRED**, a chief of the crusades, who headed a vast army collected from Apulia and Calabria, and founded the principality of Galilee on Lake Tiberias. He is one of the heroes of Tasso, and his exploits date from 1096 to 1112.

**TANDY, JAMES NAPPER**, one of the leaders of the 'United Irishmen,' was born in 1757, and became secretary of the Catholic Association at Dublin, where he was a merchant, in 1791. Having escaped to France at the commencement of the government prosecution, he was commissioned as general of brigade in the expedition directed against Ireland under General Rey in 1798. After the failure of this attempt he took refuge in Hamburgh, but was delivered up to the English government, and condemned to death. The sentence, however, was not executed, and Napper Tandy, liberated after the peace of Amiens, died at Bourdeaux, a colonel in the French service, 1803.

**TANNAHILL, ROBERT**, a Scottish lyric, and author of some of the most popular songs which have been written since the time of Burns. He was born in 1774, in humble life, and followed the handicraft of a weaver. His education, as might be expected, was of the most ordinary character, and the necessity of daily toil necessarily restricted his means of improvement. But the love of song was strong within him, and on the loom he frequently composed his sweet but simple strains, having attached to it a small desk, to enable him to put down his thick-coming fancies as they arose. Though his muse was not of a high-rate character, and never continued long on the wing, there is a gentle pathos, and wild thrilling music in such pieces as 'Jessie the Flower of Dumblane,' 'Gloomy Winter's noo awa,' 'Loudon's bonny Woods and Braes,' and some others, which have embalmed them in the hearts and memories of his countrymen. Tannahill was indebted to a Mr. R. A. Smith, a popular composer of his day, for setting several of his pieces to music, and which contributed to their early and permanent notoriety. Like others of the tuneful tribe, this unfortunate son of song was subject to fits of melancholy, which terminated in mental derangement, under the impulse of which he committed suicide in 1810, by drowning himself in a deep pool of the Paisley canal, leaving behind him a name and reputation,

second to few English or Scotch minor and popular song-writers. [T.D.]

**TANNER, A.**, a German ascetic, 1572-1632.

**TANNER, B.**, a German writer of the 17th cent.

**TANNER, MATHIAS**, a Bohemian Jesuit and historian of his order, about 1630-1700.

**TANNER, THOMAS**, a learned prelate, was born at Market Lavington, in Wiltshire, in 1674; was educated at Oxford; and ultimately reached the episcopal bench, as bishop of St. Asaph. He wrote 'Notitia Monastica, or an Account of all the Religious Houses in England and Wales,' 'Bibliotheca Britannico-Hibernica,' and contributed to the last edition of Wood's *Athenæ Oxoniensis*. Died 1735.

**TANSILLO, LUIGI**, an Italian poet, born about 1510. Having composed some poems of a licentious character, pope Paul V. placed all his works in the *Index Purgatorius*, or list of prohibited books; upon which the poet made the best reparation in his power, by writing a devout poem, and this had the desired effect. He was also the author of sonnets, songs, some comedies, and 'The Nurse,' which has been translated into English by Mr. Roscoe. He died in 1568, judge of Gaeta.

**TANTARANI, M. EDDYN ACHMED**, an Arabian poet and professor at Bagdad, 11th century.

**TANUCCI, BERNARDO**, Marquis of, a celebrated statesman of Naples, 1698-1783.

**TAPLIN, WILLIAM**, a veterinary surgeon, author of works on farriery and horses, died 1807.

**TAPPER, R.**, a French theologian, 1487-1559.

**TAPPIN, DAVID, D.D.**, professor of divinity at Harvard College, was born in 1753, graduated at that college in 1771, and ordained in Newbury in 1774. He was chosen professor in 1792 in succession of Dr. Wigglesworth. Died 1803, aged 72.

**TARCAGNOTA, J.**, a native of Gaeta, author of a 'Universal History,' died 1566.

**TARDIF, W.**, a French translator, 1449-1480.

**TARDY, C.**, a French physician, 1607-1670.

**TARGA, L.**, an Italian physician, 1730-1815.

**TARGE, J. B.**, a French historian, 1720-1788.

**TARGIONI-TOZETTI, GIOVANNI**, an eminent Italian physician and naturalist, 1712-1783.

**TARIN, J.**, a French *savant*, 1586-1666.

**TARIN, P.**, a French anatomist, died 1761.

**TARLTON, or TARLETON, RICHARD**, a celebrated actor and wit, author of a dramatic piece, entitled 'The Seven Deadly Sins,' died 1589.

**TARNOWSKI**, called 'the Great,' an illustrious Polish general and tactician, 1488-1571.

**TARQUIN**, two kings of Rome:—1. **TARQUINIUS PRISCUS**, fifth in the line of kings, succeeded Ancus Martius 614 B.C., and was assassinated by the sons of Ancus 576 B.C. He contributed much to the fortification and embellishment of the city, and signally defeated the Sabines and Latins; he is considered one of the most illustrious of the Roman kings. 2. **TARQUINIUS SUPERBUS**, seventh king, grandson of the preceding, obtained the throne by the murder of Servius Tullius, whose daughter, **TULLIA**, he had married. He was an able warrior and statesman, but cruel and unprincipled in his conduct; he was dethroned, and a revolution effected, by Junius Brutus, provoked by the outrage offered to Lucretia. The history of Tullia is one of the most atrocious on record, she having murdered her first husband in order to espouse Tarquin, and afterwards driven over the mangled remains of her father in the streets of Rome.

**TARSIA, G. DE**, an Italian poet, 1476-1530.

**TARSIA, P. A. DE**, a Span. historian, d. 1670.

**TARTINI, GIUSEPPE**, was born at Pisano in Istria, in 1692. Tartini was first meant for the law,

but music compelled him to follow her bidding, and thus the world gained a great violinist. The story of his dream in which he thought he had made a compact with the devil is well known. The result of this nocturnal vision was his 'Devil's Sonata' still extant, and which is esteemed as his greatest work. His life was full of struggles and adventures. He fought several duels, and married a cardinal's niece against the consent of both her father and uncle. He afterwards took sanctuary in a monastery, where he remained for two years. Tartini became the founder of a school of violinists, of which Nardini, Pugnani, Viotti, and Baillet were celebrated disciples. He died at Padua in 1770. [J.M.]

TARLETON, B., lieutenant-colonel in the British service. He published a History of the Southern Campaigns of 1780 and 1781.

TARUFFI, J. A., an Italian poet, 1722-1786.

TASKER, WILLIAM, a translator and poet, rector of Iddesleigh, in Devonshire, died 1800.

TASMAN, ABEL JANSSEN, was born at Hoorn in North Holland, about the year 1600. The skill and judgment which he displayed at an early period of his life in the service of the Dutch East India Company, brought him under the notice of its distinguished governor-general, Anthony Van Diemen. His first commission on a voyage of discovery was received from his patron in 1642. For some years previously the Dutch had been vigorously prosecuting geographical researches in the western Pacific; and had already traced a large part of the Australian coasts; but the southern and south-eastern limits were still undetermined. To ascertain these was the object of the expedition put under the command of Tasman in 1642, by the governor-general and council of Batavia. He sailed from that port on the 14th August, and directed his course, first to Mauritius; and then S.E. and E. across the Indian ocean, till on the 24th November, he discovered a country, which he named Van Diemen's Land, in honor of the governor; and which he considered to be a part of the great 'terra australis,' already in great measure surveyed. On the 2d December he doubled its southern limit; and thus proved that it did not extend to a great distance south, as had been before supposed. Tasman now turned northwards; but meeting unfavorable winds, directed his course towards the east; and, in a short time, was so fortunate as to discover New Zealand. Having traced a portion of its coasts, and made many other discoveries in the adjoining seas, he returned to Batavia, after a prosperous voyage of nine months, during which he made many important additions to geography, and cleared up many doubtful points. The results of a second voyage, undertaken in 1644, for further examination of the same regions, are not certainly known; but, judging from the instructions furnished to him, as given in 'Flinder's Voyages,' and from the circumstance that his own name, those of the governor-general, and his daughter Maria—to whom Tasman was attached,—and of two of the council who signed the instructions, are applied to places on the north coast, there seems no doubt that this portion of Australia was carefully examined by him. Nothing is known of the after life of Tasman, or of the time and place of his death. An account of the first voyage is given in the collections of Thévenot, Correa, and Callender; and with considerable fulness in the Penny Cyclopædia, *sub nom.* [J.B.]

TASSEL, R., a French painter, 1588-1666.

TASSET, J., a French musician, 1732-1820.

TASSIE, JAMES, a modeller, who gained much reputation in his art, was a native of Scotland, born

early in the eighteenth century. He had been brought up to the trade of a stone-mason. D. 1799.

TASSINS, L., a French surgeon, died 1687.

TASSIN, R. P., a learned French Benedictine, author of 'The Literary History of the Congregation of Saint Maur,' 1697-1777.

TASSO, A., an Italian painter, 1566-1643.

TASSO, BERNARDO, father of the great Italian poet, secretary to the duke of Mantua and other Italian princes, and author of several poems, chief of which is the romance of 'Amadis de Gaul,' born at Bergamo 1493, died 1569.

[Residence of Tasso.]

TASSO, TORQUATO, one of the most celebrated and most unfortunate among all men of genius, was the son of Bernardo Tasso, himself noted in the roll of Italian poets. Bernardo, noble but poor, had passed, from his native town, Bergamo, into the service of the prince of Salerno; and his son was born in 1544, at Sorrento, on the southern shore of the Bay of Naples. We cannot in any degree understand even the soluble questions in the riddle of Tasso's life, without remembering what his character was. It exhibited such a preponderance of imagination and feeling, and such a consequent tendency both to ideal dreaming and to timid and irritable sensitiveness, as must probably in any circumstances have unfitted him for active business, and made it certain that his happiness and safety could not have been secured otherwise than by the most watchful tenderness and protection. Placed in a situation of uncertainty and dependence, overawed by haughty and capricious patrons, and thwarted by the jealousy or contempt of rival worldlings, such a man was necessarily miserable; nor can we wonder that the fine mind at length lost its balance under the shocks which it had to sustain. Tasso studied at Padua, devoted himself to poetry in spite of the warnings of his father, and published 'Rinaldo,' a romantic poem, at the age of eighteen. There are still preserved three cantos of his greater work, written only a year later; and he began to remodel and continue it in 1565, when he entered the service of the cardinal D'Este, brother of the duke of Ferrara. The reading of parts of it at court, and beautiful lyrics published by the young poet, made his name famous throughout Italy; and he became yet better known by his pastoral drama, the 'Aminta.' In 1575 the 'Gierusalemme Liberata,' one of the few great epics which the world has seen, was completed. But its illustrious author had not the courage to publish it. Obscure stories are told of unfortunate love; what we know is, that the poet was already in a state of incipient derangement. He put himself, as a heretic, into the hands of the inquisitors at Bologna, who wisely dismissed him as a hypochondriac; he returned to Ferrara, escaped from a

convent in which he was placed, wandered on foot to his sister's house at Sorrento, and thence, in 1579, came back to Ferrara. He is said to have now become violent: at all events, the duke shut him up in a madhouse, the hospital of Sant' Anna, where he was imprisoned for more than seven years. The 'Jerusalem' was printed repeatedly in 1581, in spite of his angry prohibitions. It is a chivalrous and Christian epic, displaying a beauty of poetic fancy which had not been reached by any one since Virgil; and a melting tenderness of feeling which has not been equalled in any other great narrative poem. In the mean time, its unhappy author was, by turns, seeing consolatory angels or tormenting demons, and subsiding into intervals of calmness and sanity. He wrote in his dungeon some of his best pieces, both in prose and in verse. He was released in 1586, and soon afterwards published his tragedy 'Torrismondo.' In 1592 he showed evident decay of judgment by issuing an altered and spoiled edition of the 'Gierusalemme.' His life was now one of wandering. He was invited to come to Rome from Naples, and be crowned a poet as Petrarch had been. He obeyed the call, but said, truly, that he went only to die. The applause of crowds, and the honor paid to him by the papal court, shed some consolation over his last days. The time had been fixed for his coronation, when he felt his end approaching, retired to the convent of Sant' Onofrio, on a hill overlooking the Eternal City, and there expired calmly, in the spring of 1595. [W.S.]

TASSONI, ALEXANDER, an Italian poet, was born at Modena in 1565. He was counsellor to the Duke of Modena. He was the author of several works, but his chief production, and by which his reputation was established, is 'The Rape of the Bucket.' Died 1635.

TASSONI, A., an Ital. ecclesiastic, 1749-1818.

TASTE, L. BERNARD DE LA, bishop of Bethleem, author of Theological Letters on the subject of Convulsionaries, 1692-1754.

TATE, FRANCIS, an English lawyer, author of interesting antiquarian works, 1560-1616.

TATE, NAHUM, a poet, was born in Dublin, in 1652, and was educated in the college of his native city. On coming to London he assisted Dryden in some of his works; and succeeded Shadwell as poet laureate. He altered Shakspeare's play of Lear, and wrote several poems; but he is best known by the Version of the Psalms, which he executed in conjunction with Brady.

TATIAN, a Platonic philosopher who became a convert to Christianity, and is numbered among those early writers of the church who are charged with heresy. He was born in Syria about 130, and taught in Mesopotamia about 172.

TATIUS, a king of the Sabines, who was put to death at Lavinium about 742 B.C.

TAUBE, F. W. DE, a Fr. geographer, 1724-78.

TAUBMAN, FREDERIC, an eminent Ger. philologist and critic, born in Franconia 1565, d. 1613.

TAULER or THAULER, JOHN, in Latin *Taulerus*, a famous name among the mystic divines, was born at Strasburgh, as nearly as can be ascertained, about 1290, and died there in 1361. He was a monk of the Dominican order, and in several respects one of the most remarkable men of his age, if, indeed, he may not rightly be regarded as the forerunner of Luther, who, as well as Melancthon, and Henry More, highly esteemed his works. His external history possesses little interest beyond that which arises from the circumstances attending his spiritual experience; the brothers of his order hav-

ing greatly derided, and even persecuted him. The peculiarity which exposed him to this treatment was the slight esteem in which he held their superstitious observances, his earnest love of truth, and his devotion to the welfare of the people, especially shown by preaching to them in their native German instead of Latin as had previously been the custom. Here also may be mentioned the influence of his style upon the German language, to which he gave a smoother rhythm, a more exact meaning, and a richer vocabulary than it had previously borne; a circumstance which has given him a distinguished place in the history of German prose writers. His sermons are admitted to be models in this respect, but of all his writings we can only notice his famous 'Institutions,' commonly known as 'The German Theology,' a work which has been frequently translated into Latin and French, and exercised as much influence as any other single book on the development of religious thought. Wesley was at first captivated by it, but it went too deep for him, and he finally rejected it, and adopted those methodical religious exercises which acquired so great popularity. The sum of the 'Institutions' may be thus stated:—

1. The most rigid performance of mere ceremonials amounts to nothing; it is all but the conceit of form, mere imagery; the beginning of the spiritual life is profound abasement of heart and mind before God.
2. God must be loved above all things, and the neighbor as one's self; this supposes a resignation of all sensual pleasures and external satisfactions, so far as they are not produced from the internal state towards God; in like manner of all self-intelligence, conceit of the understanding, and pleasure of the imagination; this internal self-annihilation is more difficult than mortification of the body, because in the latter case the acts of piety may really be agreeable to the spirit and fall in with its humor.
3. The state to be reached is that of conjunction with God essentially, not under images, or by way of reflection; He then becomes the effective good of the soul and illuminates the sacred shade with which man has surrounded himself.—These are the vital principles treated methodically in the Institutions, and Tauler himself was called *The Illuminated Doctor*, from the visions and spiritual voices that reached him. [E.R.]

TAUNAY, A., a French sculptor, 1768-1824.

TAUNAY, N. A., a French painter, 1755-1830.

TAURELLUS, N., a German philosopher, whose endeavor was to establish a fixed demarcation between theology and philosophy, 1547-1586.

TAURI, D., a French anatomist, 1669-1701.

TAWSEN, TAUSSEN, or TAGESSEN, JOHN, called the Luther of Denmark, one of the earliest promoters of the reform. in that country, 1494-1561.

TAVANNES, GASPARD DE SAULX DE, a French marshal, and one of the most eminent of their commanders, distinguished in the wars of Italy, and in the religious wars which ended in the massacre of St. Bartholomew, 1509-1573.

TAVELLI, J., an Italian theologian, 1764-84.

TAVERNER, RICHARD, clerk to the signet in the reign of Edward VI., author of religious and theological works, born in Norfolk 1505, died 1575.

TAVERNIER, JEAN BAPTISTE, a celebrated Eastern traveller, born in Paris 1605, died at Moscow 1686. He made an immense fortune in trading with diamonds; his 'Travels,' published in 6 vols., 1679, are highly valued.

TAWANQUATUCK, the first Sachem converted to Christianity on Martha's Vineyard in 1642. Died 1670.

TAYLOR, BROOK, a natural philosopher and mathematician, author of *Experiments on Magnetism*, and other works, born at Edmonton, in Middlesex, 1685, died 1731.

TAYLOR, GEORGE, a revolutionary soldier, was born in Ireland, in 1716, and emigrated to America. He obtained employment at the extensive iron works of M. Savage, on the Delaware, and on the death of that person, Taylor married the widow and became possessed of large property. He represented Northampton county in the provincial assembly, and was elected to the continental congress in 1776. He was one of the signers of the declaration of independence. Died 1781.

TAYLOR, HENRY, a rector of Hampshire, known as an Arian divine, died 1788. His son, JOHN, well known as a writer of humorous verse by his '*Monsieur Tonson*,' and similar pieces, and proprietor of the '*Sun*' newspaper, died 1832.

TAYLOR, Lieutenant-general, Sir HERBERT, entered the army in 1793, and served in the campaigns of that and the following year. He was present at the sieges of Valenciennes and Dunkirk, and at numerous other affairs of minor importance, and in 1795 he returned to England, having the appointment of aide-de-camp to the commander-in-chief. He subsequently was appointed private secretary to the Duke of York, in which capacity he continued, until appointed to the same office to George III. As military secretary, Sir Herbert did very much towards bringing the British army into its present state of excellent discipline, and a state of comfort little thought of in former years; and as private secretary to the Duke of York, George III., and Queen Charlotte, it is sufficient to say that he was executor to the will of the first, trustee to the private property of the second, and warmly patronized by the third, who made him master of St. Katherine's Hospital in the Regent's Park. In addition to his military services, Sir Herbert on several occasions was intrusted with political missions, in which he displayed considerable tact, and gave great satisfaction at home. Born 1775; died 1839.

TAYLOR, JANE, who distinguished herself as a poetical and prose writer for youth, was born in London, where her father exercised the profession of an engraver, 1783. She afterwards removed with him to Colchester, where he became minister to a dissenting congregation. She published her first work, '*The Beggar Boy*,' in 1804. The principal of her other productions are '*Essays on Rhyme, on Morals, and Manners*,' '*Original Poems for Infant Minds*,' '*Rhymes for the Nursery*,' a prose tale entitled '*Display*,' &c., died 1823.

TAYLOR, DR. JEREMY, an eminent bishop of the episcopal Church of England. He was the son of a barber, who resided in Cambridge, and in that town Jeremy was born in 1613. His father having resolved to educate him for the church, he was sent first to the grammar school, and afterwards to Caius College in his native town. His brilliant career procured him the patronage of Laud, then chancellor of the university, and from being private chaplain to his patron, he was appointed to the rectory of Uppingham. Through the same influence he was nominated to the office of chaplain in ordinary to Charles I., to whom on the outbreak of his troubles, Taylor rendered important aid by accompanying him on several of the royalist campaigns, as well as by writing in defence of the English hierarchy. During the reign of the parliamentary party Taylor lost his benefice, and retired into Wales, where he supported himself by teaching a school, till he was

taken by Lord Carbury into his house in the capacity of domestic chaplain. It was during his residence with that nobleman, that Taylor composed most of those brilliant discourses that have long ranked him among the most eloquent of British divines. Cromwell's spies kept a vigilant eye upon him, and he twice suffered imprisonment during the Protectorate. At the restoration his steadfast loyalty was rewarded by his appointment to the bishopric of Down and Connor, and the vice-chancellorship of Trinity College, Dublin. Besides his far-famed sermons, Taylor was the author of various other works of great repute—the chief of which are '*Ductor Dubitantium*,' or '*Rule of Conscience*,' '*Liberty of Prophecy*,' and '*Holy Living and Dying*.' Bishop Taylor died in 1667. [R.J.]

TAYLOR, JOHN, commonly called '*The Water Poet*,' was born at Gloucester, in 1580, and for a long time followed the occupation of a waterman on the Thames, after which he kept a public house in Phoenix Alley, Long Acre. Living at the period of the rebellion he was a stanch royalist, but his manifestations of opinion were rather eccentric than dangerous. He died in 1654, and was buried in the churchyard of St. Paul's, Covent Garden. His works, published in folio, 1630, possess little interest beyond that which attaches to the quaint conceits and manners of a past age.

TAYLOR, JOHN, a learned dissenter, who became successively minister of a congregation at Norwich, and tutor in divinity at the then newly-founded Warrington Academy. He is author of several works on theology and moral philosophy, and is understood to have been of unitarian principles; born in Lancashire 1694, died 1761.

TAYLOR, JOHN, Colonel, a senator of the United States. He published an '*Inquiry into the Principles and Policy of the United States*.' Died 1824.

TAYLOR, JEFFREYS, an English miscellaneous and prose writer. Died 1853; aged 61.

TAYLOR, JOHN, a divine and civilian, was born at Shrewsbury, in 1704. He was educated at St. John's College, Cambridge, where he obtained a fellowship, and proceeded to the degree of LL.D. In 1742 he became a member of Doctors' Commons, and two years afterwards was appointed chancellor of Lincoln; but in 1751 he entered into orders, was presented to the rectory of Lawford, in Essex, and became a canon residentiary of St. Paul's. Died 1766.

TAYLOR, JOHN, an English oculist, known by his travels, of which he wrote a narrative, last cent.

TAYLOR, RICHARD COWLING, an antiquarian and naturalist, was born in England, but resided for the last twenty years of his life in Philadelphia, where he died 1851, at the age of 60.

TAYLOR, SIR ROBERT, the son of a London stone-mason, who became a famous architect and sculptor, and served as sheriff, 1714–1788.

TAYLOR, ROWLAND, rector of Hadleigh, in Suffolk, burnt alive in the reign of Mary, 1555.

TAYLOR, SILAS, an antiquarian writer, keeper of the government stores at Harwich, 1624–1678.

TAYLOR, T., a puritan divine, 1576–1632.

TAYLOR, THOMAS, usually called '*the Platonist*,' was born in London, 1758, and became clerk in a banking-house, afterwards assistant secretary to the '*Society for the Encouragement of Arts, Manufactures, and Commerce*.' He devoted all his leisure to the study of Greek literature and the revival of the Platonic philosophy, for which he was eminently qualified by his keen philosophical insight, the richness of his imagination, and the graces of his dic-

tion. He was fortunate enough to find two munificent patrons in the Duke of Norfolk and a retired tradesman named Meredith, the latter of whom settled upon him a pension of £100 a-year, while they both supplied him with the expenses of publishing his valuable editions of Plato and other masters of the Grecian philosophy. Mr. Taylor was not simply a translator, though a translator of such works would need to possess rare talents and indefatigable industry; he was also a commentator upon his originals, and carried on the war against Locke, in behalf of the Platonic doctrine of ideas, with regard to the soul, not as a *tabula rasa*, but as a plenitude of forms. One of his concise arguments may here be cited: 'If the soul possess another eye different from that of sense (and that she does so the sciences sufficiently evince), there must be, in the nature of things, species accommodated to her perception different from sensible forms. For if our intellects speculate things which have no real subsistence, such as Mr. Locke's ideas, its condition must be much more unhappy than that of the sensitive eye, since this is co-ordinated to beings, but intellect could speculate nothing but illusions. Now if this be absurd, and if we possess an intellectual eye which is endued with a visual power, there must be forms correspondent and conjoined with its vision; forms immovable, indeed, by a corporeal motion, but moved by an intellectual energy.' We cannot give the catalogue of Mr. Taylor's editions and commentaries, as it would occupy more space than this notice, but they all tend to a representation and development of the Grecian theology and of its entire history. Died 1835. [E.R.]

TAYLOR, WILLIAM, a distinguished critic, translator, and *littérateur*, was the only son of an eminent merchant of Norwich, where he was born 1765. He was originally destined for his father's business; but his early bias for literary pursuits proved so strong, that his father gave way to his inclinations, and after one or two somewhat lengthened sojourns in France and Germany, he gave himself up almost entirely to the 'cultivation of the Muses' and of politics. He first became known by a vigorous translation of Bürger's 'Lenore;' and stimulated by the success which followed his first attempt, he made various other translations from the same author, and from time to time contributed specimens of other German poets to different magazines and periodicals. In 1798 he formed an acquaintance with Southey, which soon ripened into the warmest friendship; and in 1802 he became the editor of the Norwich Iris, which he made the organ of his peculiar political and religious opinions; but he soon abandoned this speculation, and henceforth engaged in the business of 'reviewing,' for which he found a main vent in the Monthly Review, then under the editorship of Dr. Griffiths. Mr. Taylor wrote few separate works. Among these, however, should be mentioned his 'English Synonymes;' and in 1830 he published a 'Survey of German Poetry,' consisting chiefly of his collected translations with explanatory notes. Died 1836. A 'Memoir of his Life and Writings' was published by Mr. Robberds in 1843.

TAYLOR, WILLIAM COOKE, LL.D., an eminent writer on miscellaneous subjects, was born at Youghal, 1800. After prosecuting his studies at the university of Dublin with great distinction, he repaired to the metropolis, and entered upon a literary career, which, for constancy of application, and variety of subject, has had few equals in modern times. Being literally a writer for his daily bread,

little profound thought or originality of speculation was to be looked for in his writings; but the care and diligence which he bestowed on every subject he undertook, amply toned for the absence of these higher qualities, and he has left a name in the literary history of his country which will not soon be forgotten. In his zeal for the promotion of education, he had acquired such vast information, that his opinion was eagerly sought. He was employed in 1846, by the British government, to inquire into the system of education on the Continent; and he was just on the eve of being placed in a position on the establishment of the lord-lieutenant of Ireland, to carry out his views, when he was cut off by the pestilence that ravaged Great Britain and Ireland in 1849. Among his chief works are, his 'Manuals of Ancient and Modern History,' 'Life and Times of Sir Robert Peel,' 'History of Mohammedanism,' 'Revolutions and Remarkable Conspiracies of Europe;' and his last, and perhaps his most important work, 'The History of the House of Orleans,' published only a few weeks before his death. Died 1849.

[President Taylor.]

TAYLOR, ZACHARY, president of the United States, was born in Orange County, Virginia, 1790, and was descended from an English family who settled in that state in 1692. His father, Colonel Richard Taylor, was a companion-in-arms of Washington, and bore a name dreaded in Indian warfare; his mother, as usual in the case of men who in any way distinguish themselves, was a woman of high spirit and intelligence. The military life of Zachary Taylor, who was always noted for his hardihood, commenced at the outbreak of the war with England in 1812, when he was commissioned as lieutenant, and sent to defend the borders against the Indians; his great exploit on this occasion was the defence of Fort Harrison on the Wabash, at the head of a garrison numbering only fifty-two men. He rose from grade to grade till he became general in the subsequent Indian wars of Florida and Arkansas, but acquired his great popularity in the invasion of Mexico, 1846, when he crossed the Rio-Grande, and gained in succession the battles of Palo-Alto, Resaca-de-la-Palma, Monterey, and Buena-Vista. His character is very well expressed by the nickname of 'Rough-and-ready,' given to him, according to a very natural practice on the part of a free people, of characterizing by an expressive term, a popular fa-

vorite. General Taylor was elected president in November, 1848, and entered upon office in March, 1849. He was carried off suddenly, before completing his term, by an attack of cholera, in July, 1850, and was succeeded by Vice-president Fillmore.

TCHING TCHING KONG, a noted Chinese admiral in the 17th century, known in Europe by the name of Koxinga. His father having fallen into the hands of the Mantchou Tartars, Tching Kong swore implacable vengeance against the insidious invaders; and after attacking their coasts, and committing great cruelties on the prisoners whom he took in battle, he established himself on the island of Formosa, and made a treaty with the English, with a view to their aid against the Mantchous. He died in 1670, and Formosa was reconquered in 1683.

TEDESCHI, N., an Ital. canonist, 1389-1445.

TEGEL, ERIC, a Swedish historian, died 1638.

TEGNER, E., a Swedish poet, 1782-1847.

TEIA, last king of the Ostrogoths in Italy, vanquished by Narses, and killed 553.

TEIGNMOUTH, JOHN SHORE, Lord, was born in Devonshire, 1751. Himself the son of a supercargo, and the grandson of a captain in the East India Company's marine, he was destined from his youth to the service of the same employers. Having finished his education at Harrow and Hackney, he went to Bengal in 1769 as a cadet; in 1773 he was appointed Persian translator and secretary to the provincial council of Moorshedabad; and his diligence and abilities being now duly appreciated, he was nominated a member of the general committee of revenue, an office which brought him into friendly relations with Warren Hastings, whom he accompanied to England in 1785. In 1786 he returned to Calcutta as a member of the supreme council, and so distinguished himself by the numerous reforms, financial and judicial, which he introduced, that in 1793 he was appointed governor-general of India, having in the preceding year been created a baronet. In 1797 he quitted his high office, and returned to England with the title of Lord Teignmouth, where he entered on a career of practical philanthropy which completely eclipsed even the splendors of his early life. He became a member of what is known as 'The Clapham Sect,' which numbered among its adherents Wilberforce, Clarkson, Z. Macaulay, I. Milner, and Granville Sharpe; and closed a long life, passed in works of charity and mercy, Feb. 14th, 1834. He was the first president of the British and Foreign Bible Society, established in 1804; he was also president of the Asiatic Society; and though he never acquired great celebrity as an author, he published an edition of the works of Sir W. Jones, together with a memoir, besides various pamphlets on religious questions. A memoir of his life and correspondence was published by his son in 1843.

TEISSIER, ANTHONY, a French protestant advocate, who became historiographer to the Prussian court, and wrote several works, 1632-1715.

TEKELI, EMERIC, Count De, a Hungarian nobleman, was born in 1658, and took the command of his countrymen in their struggle to throw off the yoke of Austria. He defeated the Imperialists in several battles; but, after many vicissitudes, he was compelled to seek an asylum in Turkey, and died at Constantinople, in 1705.

TELEMANN, GEORGE PHILIP, a great composer of overtures, time of Handel, 1681-1767.

TELESIO, ANTONIO, otherwise *Thiletius*, or *Tilesius*, an Italian professor of literature and Latin poet, 1482-1533. BERNARDINO, his nephew, a philosopher and mathematician, 1509-88.

[Telford.]

TELFORD, THOMAS, a celebrated civil engineer, a striking instance of the many on record of men who have by the force of natural talent—unaided save by uprightness and persevering industry—raised themselves from the lowly estate in which they were born, to take rank among the master spirits of their age. Telford's father was a shepherd of Eskdale, in Dumfriesshire, where Thomas, his only son, was born in August, 1757. His father died when he was an infant, and thus the care of Telford's early years devolved upon his mother, for whom he cherished an affectionate regard, and evinced true filial piety. He had the immense advantage peculiar to Scotchmen at that time, of the *parish school* education; but at the age of fourteen he was apprenticed to a mason in Langholm. The construction of small bridges, farm buildings, Scotch churches and mansees, were the opportunities afforded him of obtaining practical knowledge. In his autobiography he has expressed his sense of the value of this humble training, observing, that although convenience and usefulness only are studied in such buildings, yet, 'as there is not sufficient employment to produce a division of labor in building, he was under the necessity of making himself acquainted with every detail of procuring, preparing, and employing all kinds of material, whether it be the produce of the forest, the quarry, or the forge; and this necessity, although unfavorable to the dexterity of the individual workman who earns his livelihood by expertness in one operation, is of singular advantage to the future architect or engineer, whose professional excellence must rest on the adaptation of materials, and a confirmed habit of discrimination and judicious superintendence.' In 1780 Telford went to Edinburgh, and enlarged his field of observation during two years' employment there, on the splendid improvements of that city then commenced. He then went to London, and was employed in the works of the quadrangle of Somerset House, where he says he 'obtained much practical information.' He was afterwards engaged as superintendent on various buildings at Portsmouth Dockyard. In 1787 he removed to Shrewsbury, to superintend alterations on Shrewsbury castle. Here he erected the new gaol; finally, in 1793, became county surveyor, an office which he continued to hold as long as he lived. Telford's first bridge was over the Severn at Montford, consisting of three elliptical stone arches, one of 58 feet, the others of 55 feet span. In 1795 he

erected the Buildenas iron bridge of 130 feet span. Henceforward his attention was almost solely devoted to civil engineering.—The Ellesmere canal, with its magnificent Christe and Pont-y-Cysylte viaducts, occupied him chiefly from 1795 to 1805. In 1801 Telford was deputed by government to report on the works desirable for the improvement of the internal and external intercourse and trade of Scotland. In consequence of his reports the Highland roads and bridges were made, the Caledonian canal cut, and many ports and harbors made and improved, all of which works he superintended. The Caledonian canal was opened in 1823. It was a gigantic work for the period; but has not proved of much use, or to have been very perfectly executed.—In his extensive practice in bridge building he improved the general practice of engineers in England, by adopting the important principle of making the spandrils hollow, and supporting the roadway upon slabs laid upon longitudinal walls, instead of filling up the haunches with a mass of loose rubbish, which may press injuriously upon the arch, and often proves of serious inconvenience when the masonry of the bridge needs any repair. Telford improved the Macadam system of road-making, and carried it into effect on the Holyhead roads, for which he was long engineer under the commissioners. The Menai suspension bridge on this road is a noble example of Telford's engineering skill and boldness in design, and even now in juxtaposition with the Britannia Tubular bridge, fairly divides with that great work the admiration of the intelligent observer.—The St. Katherine docks, London, are from Telford's design, and were executed under his direction. There are innumerable happy details in the engineering, for an account of which we must refer to the plates attached to his autobiography. The work of civil engineering, on the success of which Telford seems to have looked with greatest self-complacency, is the improvement of the outfall of the Seine river, by which the drainage of about 30,000 acres of richest sea land was secured, and that of some 80,000 acres greatly improved. This was finished in 1830. He was employed by the Swedish government in the construction of the Gotha canal, and often consulted by the Russian government. Before leaving Eskdale, Telford had acquired some distinction as a poet, and corresponded with Burns, recommending him to take up other subjects of serious nature similar to the Cottar's Saturday Night. He is said to have taught himself Latin, French, Italian, and German. He has left valuable contributions to engineering literature in the articles architecture, bridge, civil architecture, inland navigation, in Brewster's 'Edinburgh Encyclopædia,' and in his autobiography. He was F.R.S.L. and E. Telford became president of the Institution of Civil Engineers in 1820, and remained so till his death in 1834. In all the relations of life he commanded respect and esteem. He was of athletic form, and reached the age of seventy without any serious illness. It was only late in life that he had any fixed residence. Even in London he lived in an hotel, for many years in the Salopian at Charing Cross (now the 'Ship'), but from 1825 he resided in 24 Abingdon-Street, where he died on the 2d September, 1834, at the age of seventy-seven. His mortal remains were interred in Westminster Abbey. [L.D.B.G.]

TELL, WILLIAM, the popular hero of Swiss independence: his story is open to grave doubts, but the facts certainly known are these. In the time of Albert, archduke of Austria, Switzerland was divided into small baronial fiefs, and independent cities hav-

ing a democratic form of government; and these free districts, being surrounded nearly by the imperial domains, were objects of great jealousy to the house of Austria, by which at last their subjugation was resolved upon. Already the archduke possessed the right of appointing bailiffs for administering the criminal jurisdiction in all these places, and such a functionary was Gessler, the tyrant of the legends concerning Tell. When the purpose of the Austrians became known, the natives of Uri, Scheveitz, and Unterwalden, formed the nucleus of an association to defend their country; and three patriots, Furst, Melchal, and Staffacher led them to victory January 13th, 1308, when the baronial castles were attacked and the oppressive barons driven out of the country. The legend of William Tell supplies the circumstance which gave the signal for this sudden rising. Gessler, it is said, appointed governor or bailiff of Uri, caused his plumed cap to be elevated on a pole in a public place at Altorf, and required the peasantry to render the same homage to it as to himself: the probability is, that it was raised as a standard to rally his partisans, and discover the disaffected. William Tell, supposed to have been the son-in-law of Walter Furst, treated this symbol with contempt, and was ordered under arrest by the enraged governor: the story adds, that his liberty was offered to him on condition of striking an apple, placed on the head of his child, with a bolt from his cross bow;—it relates that he struck the apple, but

[Tell's Chapel on the Lake of Waldstatten.]

having reserved an arrow, destined, as he avowed, for the heart of the governor had his child received any injury, he was still detained in custody and loaded with irons. Gessler had reason to fear that the friends of Tell would liberate him if confined in the prison of Altorf; he resolved therefore to convey him across the lake of Waldstatten to his own castle of Kupnacht. On the passage a violent storm arose, and Tell was released from his bonds as the only person capable of managing the boat, which he shoved towards a flat shelf that jutted out into the lake; on this he suddenly leaped, at the same time snatching up his cross bow, and pushing the boat from shore with his foot as he took the spring: he afterwards lay in wait for Gessler, and shot him as he passed through a mountain defile. It was at this juncture that the peasantry flew to arms at the call of Tell and his fellow-patriots, as already related: and there can be no doubt that his story is substantially true, though the embellishment of the apple

seems to have been borrowed from a legend of Denmark. Not yet, however, had the Austrians given up all hope of conquering the 'audacious rustics,' as they styled the Swiss peasantry, and in 1315 the mountain passes were invaded by an army of 20,000 men, under the archduke Leopold. This immense force was totally routed by a little band of fourteen hundred Swiss, in the pass of Morgarten, and Tell is believed to have been present in the battle. He is said to have perished in the river Schachen, during a great flood, in 1350. [E.R.]

TELLER, W. A., a Ger. theologian, 1734-1804.

TELLEZ, BALTHAZAR, a Portuguese Jesuit, and historian of his order and of Ethiopia, 1595-1675.

TELLEZ DE SYLVA, DON MANUEL, marquis of Aleyrete, a Portuguese historian, 1682-1736.

TELLIER, MICHAEL LE, secretary of state and chancellor of France in the time of Mazarin; he was the chief instrument in procuring the revocation of the edict of Nantes, the order for which he signed, and died a few days after, 1603-1685. His son, FRANCIS MICHAEL, marquis of Louvois, minister of war, and the enemy and successor of Colbert, 1641-1691. CHARLES MAURICE, brother of the latter, archbishop of Rheims, and an active mover in all ecclesiastical affairs at that time, 1642-1710. CAMILLE, fourth son of Francis, known as the Abbé de Louvois, a famous doctor of the Sorbonne, 1675-1718.

TELLIER, MICHAEL, a bigoted Jesuit, confessor to Louis XIV., and promoter of the bull *Unigenitus*; his enmity to the Jansenists was so great, that he demolished the very buildings of the Port Royal, 1643-1719.

TEMANZA, T., an Italian architect, 1705-1789.

TEMPELHOF, GEORGE FREDERIC, a German officer, author of 'The Prussian Bombardier,' 'The Elements of Military Tactics,' the 'History of the Seven Years' War,' &c. In the beginning of the revolutionary war with France, he had the command of all the Prussian artillery; and, in 1802, he received the order of the red eagle from Frederick William III., who nominated him lieutenant-general and military tutor to the young princes, his brothers. Died 1807.

TEMPESTA, ANTONIO, a Florentine painter of landscapes and battle-pieces, 1555-1630.

TEMPESTA, PETER. See MOLYN.

TEMPLE, a well-known name in the history of English statesmanship, was first borne by Sir WILLIAM TEMPLE, secretary to Sir Philip Sidney, who died in his arms; he afterwards accompanied the earl of Essex to Ireland, and became provost of Trinity College, died 1626. His son, SIR JOHN, became master of the rolls and privy councillor in Ireland in the reign of Charles II., and was an eyewitness of the Irish rebellion, of which he wrote a history, published in 1641.

TEMPLE, SIR WILLIAM, an eminent statesman, the son of Sir John Temple, was born in London, in 1628. He was instructed by the learned Dr. Hammond, his maternal uncle, and completed his studies at Emanuel College, Cambridge. In his 25th year he commenced his travels, and passed six years in France, Holland, Flanders, and Germany. In 1665 he went on a secret mission to Munster, after which he was employed in forming the triple alliance between England, Sweden, and Holland. He next became the resident minister at the Hague, and in that capacity promoted the marriage of the Prince of Orange with Mary, eldest daughter of the Duke of York, which union took place in 1677. A change of politics at home led to the recall of Temple in

1669, who, refusing to assist in the intended breach with Holland, retired from public business to Sheen, and employed himself in writing his 'Observations on the United Provinces,' and part of his 'Miscellanies.' In 1674, Sir William Temple was again ambassador to the states-general, in order to negotiate a general pacification. In 1679 he was appointed secretary of state; but the next year he resigned that situation and retired to his country seat in Surrey, where he was often visited by Charles II., James II., and William III. Died 1700.

TEMPLEMAN, PETER, a physician, born at Dorchester, in 1711; was educated at the Charter House, and at Trinity College, Cambridge; and took his degree at Leyden. He practised in London; but a fondness for literature and the company of literary men diverted his attention from his profession; and having, in 1753, obtained a situation in the British Museum, as keeper of the reading-room, he from that time devoted his whole attention to pursuits more congenial to his disposition. He wrote some medical works, and translated Norden's Travels in Egypt. Died 1769.

TENCIN, CLAUDINE ALEXANDRINA, GUERIN DE, a French writer, was born at Grenoble, in 1681. At an early age she devoted herself to a religious life, but subsequently employed her time in political and love intrigues, and was imprisoned on an unjust charge of murdering one of her lovers. She wrote several works, one of which, 'The Count de Comminges,' is most admired. Died in 1749.

TENIERS, DAVID, the elder, a celebrated painter of the Flemish school, was born at Antwerp, in 1582; studied under Rubens, and afterwards at Rome. On his return to his native country, he occupied himself principally in the delineation of fairs, rustic sports, and carousals, &c., which he exhibited with such truth, humor, and originality, that he may be considered the founder of a style of painting, which his son afterwards brought to perfection. His pictures are usually of a small size, and are considered very valuable. Died 1649.

[Perck, residence of Teniers.]

TENIERS, DAVID, the younger, was born at Antwerp in 1610; died at Brussels in 1694, and was buried at Pesth, a village between Antwerp and Mechlin, where he had purchased an estate. Teniers is one of the most distinguished of the Flemish painters, though in subject he belongs more to the Dutch school: his pictures are very numerous, and generally represent fairs, markets, merry-makings,

guard rooms, beer houses, and other interiors. His execution is remarkably free, but thoroughly true and masterly in every respect.—(Houbraken, *Groote Schouburgh*, &c.) [R.N.W.]

TENISON, THOMAS, archbishop of Canterbury, a learned and pious prelate, was born at Cottenham, in Cambridgeshire, in 1636, and graduated at Corpus Christi College; obtained the living of St. Peter Mancroft, Norwich; and was afterwards presented to the vicarage of St. Martin's-in-the Fields, where he founded a parochial school and library. He distinguished himself so much by his zeal in favor of Protestantism, both before and after the revolution, that in 1691 he was consecrated bishop of Lincoln, from whence he was raised to the see of Canterbury in 1694, and held the primacy with moderation, firmness, and ability, till his death, in 1715. He published 'The Creed of Hobbes examined,' 'Baconiana, or Remains of Sir F. Bacon,' 'Sir Thomas Browne's Tracts,' and various sermons.

TENNANT, JOHN, a physician of Virginia. He wrote an essay on the pleurisy, and first brought into notice the virtues of Seneca snake-root, now a common remedy in diseases of the lungs.

TENNANT, SMITHSON, F.R.S., an eminent chemist, was born at Selby, in Yorkshire, in 1761; studied medicine at Edinburgh, and took his degree at Cambridge, in 1796. He was chosen professor of chemistry at Cambridge, in 1813; and was killed by a fall from his horse, at Boulogne, in February, 1815. His discoveries appear in the Transactions of the Philosophical Society, and are highly useful.

TENNANT, WILLIAM, an eminent poet and philologist, was a native of Anstruther, in Fifeshire; the town where Dr. Chalmers first saw the light. Lame in both limbs from his childhood, he early entered on the path of study; and gradually amassed those vast stores of literary wealth, which ultimately raised him to public honor. After filling the office of parochial schoolmaster in various places in Scotland, he was in 1810 elected classical teacher of the Dollar Academy; and in 1837 was presented to the chair of oriental languages in the university of St. Andrew's, which he filled with credit till his death. As a poet, Professor Tennant rose into eminence by his 'Anster Fair,' published in 1812, and since often reprinted; and this was followed by his tragedy of 'Cardinal Beaton,' and various smaller poems, marked by much originality and poetic power. Died 1843.

TENNANT, GILBERT, son of the preceding, was born in Ireland in 1703, accompanied his father to America, where he studied medicine for a short time, but afterwards devoted his attention to theology, and was ordained in 1726 as minister of New Brunswick, New Jersey. After a useful life, he died in 1765.

TENNANT, WILLIAM, minister of Freehold, New Jersey, brother to the foregoing, was born in Ireland in 1705, and accompanied his family to America, and was ordained in 1733. Died 1777.

TENNENT, WILLIAM, a Presbyterian minister at Neshaminy, Penn., was ordained in Ireland, and emigrated to America in 1718. Died 1743.

TENNEY, SAMUEL, M. D., Judge of Probate from 1793 to 1800, and then elected a member of Congress, was born at Byfield, Massachusetts, and graduated at Harvard College in 1772. Died 1816.

TENNHART, JOHN, a native of Saxony; remarkable for his alleged visions and writings, dictated by the 'interior voice,' 1661–1720.

TENON, J. R., a French surgeon, 1724–1816.

TENTERDEN, CHARLES ABBOTT, Lord, the son

of a hairdresser, was born at Canterbury in 1762, and received his education at the King's School of that city. In 1778 he was elected to a scholarship in Corpus Christi College, Oxford, where he was soon alike distinguished for scholastic attainments and for purity of moral conduct; and, having the good fortune to be appointed tutor to the son of Judge Buller, this gentleman took great interest in his welfare, and with his characteristic acuteness of observation, advised Abbott to turn his attention to the law, and not to the church, for which he had hitherto designed himself. Acting on this advice, he spent some time in the office of Sandys & Co., and then placed himself under the tuition of a special pleader, Mr. (afterwards Baron) Wood. After practising some time as a special pleader he was called to the bar, being then in the 33d year of his age, and went the Oxford circuit. His practice soon became extensive, and for twenty years he steadily pursued his way, acquiring both fortune and reputation, and making himself known to the profession not merely as a skilful pleader, but also as a learned and accurate writer. His 'Treatise of the Law of Merchant Ships and Seamen,' published in 1802, is still considered the standard work upon maritime law. In 1815 his incessant and arduous labor had begun to have a serious effect upon his health and spirits. His sight, too, was impaired, and it is said that but for the dissuasion of his friends he would have wholly retired from the profession. He had as far back as 1808 refused a seat on the bench, his professional emoluments at that time being far greater than those of a judge. But when, in 1816, he was again offered promotion, his health had become so unequal to the toils of practice, that he closed with the offer, and was made a puisne judge in the common pleas. This took place in February, and in the following May he was removed to the king's bench, on the death of Mr. Justice Le Blanc. In 1818, on the retirement of Lord Ellenborough, he became lord chief justice of the king's bench; and though his inflexible Toryism rendered him unpopular with a portion of the public, it was admitted by men of all ranks and parties, that a more impartial chief justice had never presided in that court. During the premiership of Mr. Canning he was raised to the peerage, but did not long enjoy his title: and it is a curious fact that his last words were, 'Gentlemen of the jury, you may retire.' D. 1832.

TENTZEL, or TENZEL, WILLIAM ERNEST, a German historian and antiquary, 1659–1707.

TERAMO, GIACOMODI, archbishop of Florence, and author of an ascetic romance, 1349–1417.

TERBURG, G., a Flemish painter, 1608–1681.

TERCIER, J. P., a Fr. diplomatist, 1704–1767.

TERENCE, the short name of *Publius Terentius*, a celebrated author of Comedies in the Latin tongue, supposed to have been born at Carthage about 194 B.C. He was carried to Rome as a slave, and brought out his first play, the 'Andria,' in 166, and the others now extant between that period and 160 B.C. Shortly afterwards he went on a literary journey to Greece, and having translated the plays of Menandez, is supposed to have died on his voyage home, about 146 B.C. An English translation of Terence was executed by the elder Colman.

TERENTIUS, T., an Italian Jesuit and missionary, who went to China in 1581, and died there.

TERPANDER, a Greek poet of Lesbos, said to have improved the lyre, 7th century B.C.

TERRASSON, JOHN, a French ecclesiastic, known as a moralist and philosophical critic, 1670–1750.

ANDREW, his elder brother, an eloquent priest of the oratory, 1668-1723. GASPARD, a third brother, a priest of the oratory, and author of a work censured by the Sorbonne, 1680-1752. MATTHEW, cousin to the preceding, a famous juriconsult, 1669-1734. ANTHONY, son of Matthew, author of a 'History of Roman Jurisprudence,' completed by order of the chancellor D'Aguesseau, 1705-1782.

TERRIN, C., a French antiquarian, 1640-1710.

TERRY, DANIEL, a comedian of considerable ability, was born at Bath, about 1780, and was articulated to Mr. Wyatt, the architect, with whom he remained five years, and then turned his attention to the drama. His first attempts were not very encouraging; but when, in 1806, he appeared on the Liverpool stage, he found favor with the public; as he did also afterwards at Edinburgh, where he became a leading actor. Through the interest of Sir Walter Scott he obtained an engagement at the Haymarket Theatre, in 1812; and, after remaining there two seasons, he appeared, first at Covent Garden, but soon after at Drury Lane, where he continued till 1825, generally playing in the summer at the Haymarket. He then entered into partnership with Mr. Yates in the proprietorship of the Adelphi Theatre; but being indebted to Sir Walter Scott for the capital embarked in it, and the baronet's affairs being at that time in an embarrassed state through the failure of Constable and Co. of Edinburgh, he found it necessary to sell his share. He then went over to the Continent, but mental anxiety destroyed his health, and he died in June, 1828.

TERRY, EDWARD, an English traveller, born about 1590. He accompanied Sir Thomas Roe, ambassador to the Great Mogul, in 1615; and on his return published an account of the observations he had made during his two years' residence abroad.

TERSERUS, J., a Swedish theologian, b. 1605.

TERTULLIAN, QUINTUS SEPTIMIUS FLORENS, was the son of a pagan centurion, and was born at Carthage, probably about A.D. 160. His original profession was that of a pleader, or lawyer, and he rose to eminence in the courts. On his being converted to Christianity, he was ordained a presbyter in the church of Carthage. At the end of the second century he became a Montanist. (See MONTANUS.) These peculiar views he illustrated with constitutional ardor and keenness. Even in his writings, composed prior to his conversion to Montanism, there are traces of that peculiar temperament which predisposed him to the change. He is supposed to have died about the year 220. The Fathers give Tertullian a very high character, and he stamped the impress of his spirit to some extent on the African churches. His works are great favorites of Cyprian, and in asking for any one of them, he used to say to his attendants, *Da magistrum*,—hand me my master. Among the Latin Fathers Tertullian occupies a very distinguished place. He had not the sound sense of Augustine, nor the milder graces of Cyprian, but he was inspired with unconquerable zeal, and his style burns with the fervor of his heart. His erudition was extensive, and his acuteness was seldom baffled. His writings exhibit on every page the skill and the defects of a rhetorician. Figures swell into absurd hyperbole, and the language is so twisted as often to be obscure. His arguments are frequently edged with satire, and loaded with severe vituperation. Tertullian's works consist of thirty treatises, apologetical, doctrinal, and ascetical. In the first he combats Jews and pagans, in the second he deals with heretics, and in the third he defends the rigid austerities of his peculiar creed. The best

known of his works are his 'Apologeticum,' his 'De Præscriptione Hereticorum,' and his treatise against Marcion. His works were published in two folio volumes by Da Cerda, Paris, 1524; by Rigaltius, at the same place, in one folio, 1634; by Moreau, in three folios, Paris, 1657-58; twice at Venice, 1701-1744; by Semler, at Halle, in five volumes, 8vo. 1769-73, reprinted in 1827-29 in six 12mos. Leopold's edition occupies four volumes in Gersdorf's 'Bibliotheca Patrum.' But the last and most complete edition is in three large volumes 8vo. Leipzig, 1854, edited with care, elegance, and copious indexes by Oehler; the third volume containing the most important of the dissertations by preceding editors and historians on the life, character, times, and writings of Tertullian. Several of his tracts have been translated into English by Chevallier, Betty, Lord Hailes, and Dr. Pusey. [J.E.]

TESMAN, J., a Germ. diplomatist, 1643-1693.

TESSIER, M., an eminent French writer on agriculture, to which he had devoted a long life, died at Paris, in December, 1837, aged 94. During the period of revolutionary anarchy, this gentleman lived in retirement in Normandy, still, however, actively engaged in his favorite pursuit. He was the editor of the 'Annals of French Agriculture,' a voluminous periodical work. He was also the early patron of Cuvier, being the first to discover his talents, and introduce him to the scientific world.

TESSIN, NICODEMUS, crown architect of Sweden, and the designer of several great public edifices, 1619-1688. His son, NICODEMUS COUNT TESSIN, also a great architect, senator, and marshal to the court, 1654-1728. TESSIN, CHARLES GUSTAVUS, Count de, son of the preceding, was born at Stockholm, in 1695; and on entering the arena of public life, became a man of extensive influence, assisted at the most secret deliberations of the states, and was nominated president of the assembly of nobility in the diet of 1738. He was subsequently ambassador to various foreign courts, had the direction of foreign affairs as president of the chancery; and at the same time he was appointed governor of the prince royal, afterwards Gustavus III., to whom he addressed a series of letters relative to morals, politics, &c. In 1760 he resigned all his employments, and died in 1770.

TESTA, PIETRO, an Italian painter, 1611-1650.

TESTI, FULVIO, an eminent lyric poet, and accounted the Horace of modern Italy. He was born at Ferrara, in 1593, of a noble family; was thrown into prison in consequence of having entered into a correspondence with Cardinal Mazarin; and is supposed to have been there put to death in 1646.

TETENS, J. N., a Germ. politician, 1757-1807.

TETZEL, JOHN, a Dominican monk, who was appointed in 1517 to sell the papal indulgences, which excited the first movements of the reformation; he was a man of bad morals himself, and sold indulgences for the most shameful crimes, past or future—died of the plague 1519.

THAARUP, T., a Danish poet, 1749-1821.

THACHER, JAMES, a surgeon in the army of the American revolution, author of various medical and miscellaneous works, among the latter of which were the 'Military Journal,' and the 'History of Plymouth.' Died 1844, aged 90.

THACHER, OXENBRIDGE, a representative of Boston in the general court, graduated at Harvard college in 1738. Died 1765.

THAIS, a Greek courtesan of remarkable beauty, who accompanied Alexander to Asia, and became one of the wives of Ptolemy.

**THALES**, born most probably in the year 636 B.C. : according to Herodotus, he was a citizen of Miletus, although by descent a Phœnician. We shall not enter on any of that mere gossip regarding Thales, which has floated downwards from Antiquity ; but endeavor rather to discern something, however little, that may be considered a sure index to his pursuits and character. That in the opinion of the Greeks he occupied a most distinguished place, cannot be doubted ; for they unanimously place him at the head of their list of seven sages ; and in so far as we know, he is entitled to claim the origination of Greek Philosophy. He was evidently a close observer of material nature : it may be said that the Ionic School sprung from him. He had made himself master of all existing Astronomical lore,—whether it be a fact or a myth that he predicted the Eclipse of the Sun which occurred during the battle between the Lydians and the Medes. Supposing it a fact, it were quite wrong to endow him with familiarity with any form of scientific process applicable to the calculation of Eclipses : but he must have been well acquainted with the Cyclic period comprehending the order of Eclipses. His searching culture of Physics, is, however, more emphatically evinced by his cardinal maxim that ‘Water is the ground or primal element of all Things’—a maxim not to be confounded with mere fantastic conjecture, for it was evidently the result of a discriminating observation of the immense and essential influence of that element over all forms of Matter and Life, as well as of its own singular transformations. That was no inferior Mind, which, at so early an epoch, led the way in generalizing on the ground of Observation. But Thales went farther : his thoughts were not confined within the sphere of Physics. He taught, also, that the ‘World has a soul, is full of dæmons.’ His specific views are lost ; but it is clear, even from so slight an intimation, that he led the way in those perilous questionings of the Unseen and the Infinite, which afterwards so distinguished Greek speculation. Thales, besides, was a practical worker among men. He is said to have accomplished feats of Engineering, to have been skilful in business, and to have taken part in guiding the State. Could we reproduce him thoroughly, it cannot be doubted, that we should discern a Potentate all worthy of the admiration of Greece. [J.P.N.]

**THALIUS**, J., a German botanist, 16th century.

**THEAULON**, S., a French poet, 1744–1780.

**THEAULON**, S., a French dramatist, 1787–1841.

**THAMAR**, a queen of Georgia, 1184–1206.

**THATCHER**, BENJAMIN B., an American periodical writer of Boston. Died 1840, aged 30.

**THEDEN**, J. C. A., a Ger. surgeon, 1714–1797.

**THELLUSSON**, PETER ISAAC, a native of Geneva, who settled as a merchant in London, where he acquired a prodigious fortune, and died in 1798. He left about £100,000 to his family ; and the remainder of his property, considerably above half a million, is to accumulate during the lives of his three sons and the lives of their sons ; when, if there are none of his descendants and name existing, the whole is to be added to the sinking fund. This singular will being contested by the heirs at law, was established by a decision of the House of Lords in 1805 ; it, however, occasioned the passing of an act, restraining the power of devising property for the purpose of accumulation to 21 years after the death of the testator.—His eldest son was raised to the peerage by the title of baron Rendlesham.

**THELWALL**, JOHN, an orator of the London Corresponding Society, who was tried with Hardy

and Horne Tooke for high treason, afterwards a miscellaneous writer and lecturer, 1764–1834.

**THEMISON**, a Syrian physician, 1st century.

**THEMISTIUS**, a Greek philosopher and critic, præfect of Constantinople in 362.

[Themistocles—From an Ancient Bust.]

**THEMISTOCLES**, an Athenian statesman and general, of the period when Greece was menaced by the Persian empire, was born of obscure parentage in the latter half of the 6th century B.C. His public career was contemporaneous with that of Aristides, and the rivalry between them became a subject of the highest public importance soon after the battle of Marathon (see **MILTIADES**). The character of Aristides seems to have been that of a sturdy republican Tory, resolute to stand upon the good old ways ; that of Themistocles was more suited to the exigencies of the period, and he possessed far greater political foresight, not unmixed with the duplicity so characteristic of statesmanship in more modern times. Greece was threatened with a partisan warfare between these leaders, when the dispute was terminated by the banishment of Aristides, B.C. 483, and Themistocles was left at liberty to pursue his policy. His great object was the creation of a navy, able to cope with that of the Persians ; and to the success of his design may be attributed not only the salvation of Greece, but the supremacy of Athens over the other Grecian cities. He had great difficulties, both material and political, to encounter, and even the Delphian oracle was at first opposed to him : a second response, however, though ambiguous, was interpreted in favor of his design, and Themistocles soon found himself at the head of the Greek armies, and well provided with ships. By a master stroke of policy, he fairly tricked both the Greeks and Persians into fighting the great naval battle off Salamis, in which he totally defeated Xerxes, B.C. 480 : he then took the necessary measures for securing the supremacy of Athens by internal defences, the works of which were carried on in defiance of Sparta. In B.C. 466, the jealousies excited by his great power, led to his banishment by Ostracism, and he retired to the Persian court, where, it would appear, he forgot his patriotism, and plotted against his country. It is related by Plutarch, however, that he poisoned himself rather than yield to the overtures of Artaxerxes. His death, from whatever cause, took place at Magnesia in Asia Minor, B.C. 470, or 472. [E.R.]

**THEOBALD**. See **THIBAUT**.

**THEOBALD**, LOUIS, a dramatic critic and poet, known as the commentator on Shakspeare, and as the original hero in Pope's ‘Dunciad,’ where its

splenetic author placed him, more for having published an edition of Shakspeare immediately after the appearance of his own, than for the sin of dulness, which he makes the ostensible cause. He was a native of Sittingbourne, Kent; and died in 1744.

THEOCRITUS, a Greek pastoral poet, some of whose 'Idyls' and 'Epigrams' are still extant: time of Ptolemy Philadelphus, B.C. 284-247.

THEODATUS, king of the Ostrogoths in Italy, defeated by Belisarius, and killed 536.

THEODEMIR, a prince of the Visigoths in Spain, who reigned over an independent state in New Castile, beginning of the 8th century.

THEODORA, three empresses of the East:—The *earliest* was the wife of Justinian, originally a dancer and courtesan, who ascended the throne with her husband in 527; she occasioned the disgrace of Belisarius, in revenge of her quarrels with his wife, Antonina; died 548. The *second* was the wife of Theophilus, who was left a widow in 842, and ruled as regent for her son, Michael III., till 857, when she was deposed and imprisoned in a monastery; died 867. The *third* was daughter of Constantine VIII., and reigned a short time with her sister, Zoe, in 1042, and alone, after the death of Constantine IX., from 1054 to 1056. She was the last of the Macedonian dynasty. Another Theodora was wife of the Armenian emperor, Leo V.

THEODORE, two popes of Rome:—The *first* reigned 642-649. The *second* survived his election, in 898, three weeks only, and was succeeded by John IX.

THEODORE, a king of Corsica, 1696-1756.

THEODORET, a learned ecclesiastical writer and historian, born at Antioch, about 386, died 457.

THEODORIC, two kings of the Visigoths in the south of France:—THEODORIC I., son of the famous Alaric, was elected on the death of Wallia in 419; he was at war with the Romans, some years, but afterwards entered into a league with them against Attila; he was killed in the great battle with the latter on the plains of Châlons 451. THEODORIC II., son of the preceding, acquired the throne by putting to death his elder brother, Thorismond, in 453; he extended the empire of the Visigoths to the foot of the Pyrenees, and was assassinated by his brother, Euric, in 466.

THEODORIC, surnamed 'The Great,' king of the Ostrogoths, and founder of their dominion in Italy, was born in 457, or 459. He was descended from the royal race of that people settled in Pannonia, and his father is supposed to have been one of three brothers who had divided the sovereignty over them, but this point is uncertain. Sent as a hostage to Constantinople in his childhood, he had the advantage of an education in the politics, philosophy, and jurisprudence of the Greek empire, and was restored to his father, now become sole ruler of the Ostrogoths, at the end of ten years. Italy at this time was swayed by the Heruli and Rugians, two branches of the Gothic stock, acknowledging Odoacer as their prince, whose authority was hated at Rome, and gave occasion to the interference of the Eastern emperor, Zeno, in the affairs of Italy. With the formal consent of the latter, Theodoric went to the conquest of his future kingdom, and having defeated and slain Odoacer, was saluted king of Italy by the army in 493. He now assumed the Roman purple, and made Ravenna his capital; a few years later he married Andofleda, sister of Clovis, the Frank king. Schlegel's brief notice is sufficiently descriptive of his reign:—'He was highly esteemed in Rome, and by all the Germanic nations; his name, like that of

Charlemagne after him, was celebrated in the heroic songs of the Germans, while political writers and historical critics commend alike his talents and his virtues. His rule was generous and noble; he loved and honored the arts and sciences which the age still possessed, and the last of Roman writers, Cassiodorus, and Boethius, were the ornaments of his reign.' The latter, indeed, and his father-in-law, Symmachus, were allowed by Theodoric to become the victims of false accusations, and his own death was hastened by the melancholy it induced upon him; the shade of Symmachus is said to have haunted him incessantly. Theodoric, like the Goths in general, was an Arian; he died at Ravenna in 526, and was succeeded by his son, Athalaric, who died in 534. The mother of this prince, Amalasontha, then became the wife and victim of Theodoric's nephew, Theodatus, who usurped the throne. These circumstances led to the interference of the emperor Justinian, and produced the expedition of Belisarius in Italy. [E.R.]

THEODORIC, an Italian surgeon, died 1298.

THEODORUS, POPE. See THEODORE.

THEODORUS, or DIODORUS, bishop of Tarsus in 394, distinguished against the Arians.

THEODORUS LASCARIS. See LASCARIS.

THEODORUS PRISCIANUS, a medical writer of the empirical sect, in the 4th century.

THEODOSIUS, called of *Tripolis* or of *Bithynia*, a Greek mathematician and astronomer, of uncertain date, the age assigned to him varying from 50 B.C. to the 3d century.

THEODOSIUS, called *the Grammarian*, a writer of Syracuse, 9th century.

[Theodosius the Great.]

THEODOSIUS THE GREAT, emperor of the whole Roman world, was the son of a distinguished general of that name, who was executed at Carthage by order of Gratian in 376. The young Theodosius, then about thirty years of age, retired to Galicia, which, according to some accounts, was his native place; but in the third year after he was recalled by Gratian, and proclaimed his colleague in Illyricum and the eastern provinces of the empire. Theodosius now proved himself the worthy successor of CONSTANTINE, and delivered the empire from the irruption of the Visigoths, both with the strong arm of the warrior, and the hardy head of the politician; he resembled him also as the champion of orthodoxy, and eventually completed the work that Constantine had only begun, by extinguishing idolatry, and strengthening the bulwarks of orthodoxy against Arianism. In 383 Gratian became the victim of a rebellion, and Maximus, usurping the western empire, was defeated by Theodosius, who gave him battle on the banks of the Drave in Pannonia. His trium-

phant entry into Rome took place in 389, but before and after this period he had the arduous task of suppressing continual seditions in the great cities. The most threatening of these broke out at Thessalonica, and Theodosius, yielding to his anger, and to the advice of Rufinus, sent a commission to punish the inhabitants, some thousands of whom were put to the sword, though Theodosius, too late, had countermanded his orders. For this measure of severity he was boldly deprived of Christian communion by Ambrose, archbishop of Milan, who turned him back from the church porch, and only consented to his reunion after a repentance of months. The abolition of paganism dates in 391, and the undisputed sovereign authority of Theodosius in 394, when he defeated Arbogastes, and the pretender Eugenius. He now divided his dominions between his sons Honorius and Arcadius, and expired at Milan the year following, 395. [E.R.]

THEODOSIUS II., grandson of the preceding, succeeded his father, Arcadius, as emperor of the East, in 399. He was a feeble prince, but a body of laws is named after him, the 'Theodosian Code,' and he had to sustain a war with Persia, and a series of religious quarrels; died 450. THEODOSIUS III. was proclaimed emperor on the deposition of Anastasius II. in 715; he yielded the government in his turn to Leo III. in 716, and died in a monastery.

THEODOTON, or THEODOTUS, an Ebionite of Ephesus, translator of the Bible into Greek, 2d ct.

THEODULF, bishop of Orleans in the time of Charlemagne in 781, died in exile 821.

THEOGNIS, an elegiac Greek poet, 6th c. B.C.

THEON, a Greek painter, 4th century B.C.

THEON, a celebrated mathematician and Platonic philosopher of Smyrna, 2d century.

THEON, the father of Hypatia, and himself a learned mathematician, and master of the ancient doctrines of the Alexandrine school, flourished 365. He wrote a work still extant.

THEOPHANES, a Lesbian poet, and historian of the wars of the Romans in the time of Pompey the Great. He was first attached to Mithridates, afterwards to Pompey, and at length to Cæsar. Only some fragments of his history are now extant, but it was made use of by Plutarch.

THEOPHANES, GEORGE, a Greek historian of the Eastern empire, died in exile 818.

THEOPHANES, PROKOPOVITCH, a Russian historian and archbishop of Novogorod, 1681-1736.

THEOPHILE DE VIAUD, a French poet, born in 1590, at Clerac in the Agenois. His satires and epigrams are spirited and witty, but several of his pieces are offensive to decency and religion; and on that score he suffered two years' imprisonment. Died 1626.

THEOPHILUS, a saint and bishop of Antioch, who is reckoned among the fathers of the church; he was the first Christian writer to use the word Trinity; flourished in the 2d century.

THEOPHILUS, patriarch of Alexandria, and an enemy of Chrysostom, 385-412.

THEOPHILUS, a Greek jurisconsult, one of those employed on the Justinian Code, 527-565.

THEOPHILUS, emp. of Constantinople, 829-42.

THEOPHRASTUS, a celebrated Greek philosopher and botanist, was born at Eresos (or Erisium), in the island of Lesbos, in the year B.C. 371. He died about the year B.C. 286. He studied under Plato and Aristotle, and was nominated by the latter as his successor in the school of the Lyceum. He taught there with such increasing reputation, that he had at one time collected around him a number

of pupils amounting to 2,000. He was distinguished for his engaging manners and great eloquence, which it is said procured for him his name Theophrastus, or the Divine speaker. He was the author of many works on various subjects, of which Diogenes Laertius enumerates 200. Several of them have been preserved, and amongst them two on botany, which prove him possessed of a comprehensive genius, and show him to be a diligent inquirer into nature. The many new observations offered in his 'History of Plants,' and in his work on the 'Causes of Plants,' his large views, and the deep knowledge displayed by him of the secret laws of organization, have given him a great reputation, and caused him to be looked up to as the father of botany. [W.B.]

THEOPHYLACTUS, a Greek historian of some of the Byzantine emperors, 7th century.

THEOPOMPUS, a Gr. historian, B.C. 380-308.

THEOS, or THEOT, CATHERINE, one of those singular characters who acquired a strange notoriety at the period of the French revolution, by pretensions to supernatural authority. She was born in 1725, and had been known many years before the revolution as the claimant of a mission to regenerate the human race; she had fallen into obscurity however till the events of 1794, when she took the place of Labrousse, another of these prophetesses, who had become a prisoner at Rome. The chief disciple of both these women was Dom Gerle, who formed the link between Catherine Theos and whatever connection existed on the part of Robespierre; and, besides this, acted as the high priest of the new religion that was founded upon her prophecies, and to which thousands of the populace attached themselves. A worship, with supernatural claims, initial rites, and certain spirit manifestations, was really instituted, the phenomena of which, according to some, are to be explained, not by naked imposture, but by the marvels of clairvoyance and animal magnetism *misunderstood and blasphemously misappropriated*. Unhappily, many noble and virtuous names became implicated by a series of misadventures in the reunions around this pythoness, and among others, the lovely Madame de Sainte-Amaranthe and her family, who were suddenly arrested, to the number of sixty-two, by order of the Committee of General Surety, and charged with conspiracy. Catherine Theos died in prison; the rest were executed shortly before the fall of Robespierre, 1795. [E.R.]

THERAMENES, an Athenian statesman and general, who took a leading part in the subversion of the democracy, was born in the Isle of Cos, about the middle of the fifth century B.C. He was the colleague of Antiphon and Phrenicus, and all three labored in the political designs of Pisander. The hope of this party was an alliance with Persia, which could not be brought to pass with a democracy, failing, as it would, to supply a sufficient number of traitors having a political interest in Persian supremacy. The conspiracy dates about 411 B.C., and resort being had to terror, it was eminently successful; the orators of the people were disposed of singly by assassination, and finally, by a sudden display of military power, the senate was dissolved, and an oligarchy of 400 established in its stead. Soon, however, the conspirators quarrelled among themselves, and Alcibiades was recalled at the instance of Theramenes and Critias, who pretended to moderation; the 400 were then dispersed by flight, and some of them were put to death on the accusation of the minority. The restoration of the democracy was followed by the most remarkable events of the Peloponnesian war, and Theramenes frequent-

ly distinguished himself as a commander; at the naval battle of Arginusæ, B.C. 406, he commanded the right of the Athenians. Soon after this, Athens was blockaded by sea and land, and the remnant of the 400 returned as victors, under the standards of Lysander, with whom Theramenes conspired to re-establish an oligarchy this time, consisting of a smaller number, generally called *the thirty tyrants*: among the principal of this body were Theramenes and Critias. A struggle now commenced between the treacherous moderation of the former, and the cruel determination evinced by the latter, the result of which was the condemnation of Theramenes. He was taken from the altar, where he had fled for refuge, and on the cup of poison being presented to him, he drank, with bitter irony, 'To the health of the good Critias.' This event took place in 403 B.C.

[E.R.]

THERESA, SAINT, a mystic writer and reformer of the Carmelite order, 1525-1582.

THEROIGNE DE MERICOURT, a character of the French Revolution, is a name we should hardly admit into these pages, but for the sake of a word or two we have at heart, and cannot well find utterance of elsewhere. She was born at the village of Mericourt, near Liège, where her family lived in opulence as farmers, was highly educated, and being remarkable for her beauty, was seduced at the age of seventeen by the young lord of a neighboring chateau. The period of the Revolution found her at Paris, passing from one master to another among the great, and finally enrolling herself in the mass of courtizans, but all the while playing an influential part in secret politics, and as a club orator. At last, Theroigne became first in every scene of tumult; clothed in a scarlet riding habit, and a plumed cap, she headed the most desperate attacks, and decided on the life and death of the victims of the faubourgs by a nod. After the excesses of the 10th of August, this amazon inclined towards the moderate counsels of the Girondins; perhaps she had sufficiently avenged her dishonor, and the original cause of it had fallen among many others, vainly asking his life at her hands. Whatever the cause of her change, it gave offence to the furies of the guillotine, who on meeting her one day, stripped her naked, and publicly whipped her on the terrace of the Tuileries. This outrage turned the miserable creature's brain, and she passed the remainder of her life, nearly twenty years, in a madhouse—one of the saddest pictures of humanity, totally brutalized, that imagination ever conceived. Enough of her! but how many thousands of similar victims, prepared for a like career, if circumstances admitted it, may be counted in the streets of our great cities? What a work it would be, in an age of noble endeavor like the present, to trample out this plague spot, this foulest image of hell upon earth, this crying disgrace of a Christian land! In other days the youth of a nation have engaged in crusades and chivalrous fellowships, with objects in view that shed a far less glory upon them, than a conquest such as this would confer on the age and nation that accomplished it. Here is a work of more genuine heroism than ever inspired the imagination of Jesuit or Paladin—a work most truly Christian and full of promise, and one which most of all requires united action and persevering enthusiasm for its accomplishment.

[E.R.]

THESPIS, the inventor of tragedy, was a Greek poet, born at Xarca, in Attica, and became famous about 540 B.C. His stage was the chariot in which he drove about Greece, and his invention consisted

in the introduction of a person who conversed with the chorus, and represented different characters by means of masks.

THEUDIS, king of the Visigoths, 531-548.

THEUDISELUS, successor of Theudis as king of the Spanish Visigoths, 548-549.

THEVENARD, A. J. M., a French admiral, naval engineer, and administrator, 1735-1815.

THEVENOT, MELCHISEDEC, an eminent traveller, was born at Paris, in 1621. He travelled in various parts of Europe; and on his return devoted himself entirely to study, and to the promotion of the interests of literature, by collecting books and manuscripts, and by carrying on a correspondence with the learned, in all parts of the world. He was appointed royal librarian, published his 'Voyages and Travels,' and died in 1692.

THEVENOT, JOHN DE, nephew of the preceding, was born at Paris, in 1633. Being enabled to gratify his love of travelling, he visited several parts of Europe, and afterwards explored many countries in the East. On his second oriental tour, as he was returning from Hindostan, through Persia, he died near Tauris, in 1667.

THEVET, A., a French traveller, 1502-1590.

THEW, ROBERT, an English engraver, 1758-1802.

THIBAULT, J. T., a French painter, 1757-1826.

THIBAULT, N., a deputy of the clergy to the estates-general, and an active politician, died 1812.

THIBAUT, THIEBAUT, or THEOBALD, brother of Ladislaus II., king of Bohemia, remarkable for his uprightness as protector of his brother's kingdom during the crusade of 1147.

THIBAUT, six counts of Blois:—THIBAUT I., count of Troyes, Beauvais, and Meaux, and first count of Blois, from 924 to about 978. THIBAUT II., reigned 995-1004. THIBAUT III., count of Blois, Tours, and Chartres, 1037-1089. THIBAUT IV., a party to all the leagues formed against Louis le Gros; he became master of Champagne in 1125; 1102-1151. THIBAUT V., called 'the Good,' son of the latter, succeeded 1152, and became grand seneschal of France; he died at the siege of Jean d'Acre 1190. THIBAUT VI., last count of his house, succeeded Louis 1205, died without issue 1218.

THIBAUT, five counts of Champagne, the first two of whom are the same as the *third* and *fourth* of Blois. The *third* (or the *fifth*, according to the line of Blois) succeeded his brother, Henry II., 1197, died 1199. THIBAUT IV., famous as one of the earliest troubadours, was born 1201, and added the kingdom of Navarre to his paternal dominions by a marriage in 1234. In 1235 he embarked in the crusades; died 1253. THIBAUT V., or THIBAUT II., as king of Navarre, was the son and successor of the preceding, died 1270.

THIBAUT, two dukes of Lorraine:—the *first* of whom reigned 1213-1220; the *second*, 1304-1312.

THIBAUT, two counts of Bar:—the *first* of whom reigned 1191-1214; the *second*, 1239-1296.

THIBAUT, ANTON JUSTUS FRIEDERICH, a celebrated German jurist, was born at Hameln, in Hanover, 1792; studied successively at Göttingen, Königsberg, and Kiel; and after displaying great ability as a private teacher of the law of Jena, was appointed to the chair of civil law at Heidelberg in 1805, where he remained till his death in 1840. A list of his various works would be too long for our columns; but his chief title to fame rests on his 'System des Pandekten-rechts,' which has passed through

numerous editions, and is regarded as an authority by most German lawyers.

**THICKNESSE, ANNE**, a lady of great beauty and acquirements, the daughter of John Ford, an eminent solicitor and clerk of the arraigns, was born in 1737. She eloped from her father's house, in order to avoid a disagreeable marriage: and her talents and personal attractions having early introduced her into the world of fashion, she took advantage of that circumstance to give three concerts at the Opera House, by which she realized 1500*l.*, and acquiring the patronage of Lady Thicknesse, she became domesticated in the family. On the death of this lady, the widow, after a due interval, offered her his hand, which she accepted: and during a union of 30 years, till his death in 1792, she accompanied him on various journeys to different parts of the Continent. The French revolution had now commenced; and Mrs. Thicknesse, in company with several other English ladies, was imprisoned, but fortunately escaped the guillotine through the death of Robespierre, who had sent an order for their execution. She ended her long and exemplary life at her house in the Edgeware Road, London, in 1824. She was personally intimate with the leading wits of her own time, and spoke several languages with fluency and elegance. Her principal works are 'Biographical Sketches of Literary Females of the French Nation,' 3 vols., and a novel entitled 'The School of Fashion,' 2 vols.

**THICKNESSE, PHILIP**, the son of a clergyman, and brother to the master of St. Paul's School, was born in 1720. He entered the army when young, and went to Georgia, with governor Oglethorpe; after which he served in the West Indies, and, on his return to England, obtained a captain's commission. He first married a French lady; and, on becoming a widower, he obtained the hand of Lady Elizabeth Touchet, heiress of the ancient barony of Audley; and her fortune enabled him to purchase the office of lieutenant-governor of Languard Fort. By this lady he had one son, with whom, on his succeeding to the title and estate of his mother's family, he had some very unpleasant disputes. About 1761, Mr. Thicknesse lost his second consort, and shortly after married Miss Anne Ford, by whom he had a numerous family. After travelling through France, Italy, and Spain, he settled in Wales, and next at Bath; but at the commencement of the French revolution he went abroad again, and died near Boulogne, in 1792. He published several works, the most curious of which is an account of his own life, with the following title, 'Memoirs and Anecdotes of Philip Thicknesse, late Lieutenant-governor of Landguard Fort, and unfortunately Father to George Touchet, Baron Audley,' 2 vols.

**THIELEN, JOHN PHILIP VAN**, lord of Conwenberg, a Flemish painter, 1618–1667.

**THIERRI**, or **THEODORIC**, the name of four French princes, two of whom are reckoned kings of France:—**THIERRI I.** (king of Mentz), eldest son of Clovis I., succeeded 511, and having extended his kingdom at the expense of Theodric, king of the Ostrogoths, died 534. **THIERRI II.** (king of Orleans, Burgundy and Austrasia), son of Childebert II., succeeded 596, and died of poison, leaving six natural sons, one of whom succeeded him, in 613. **THIERRI III.** (or **Thierry I.**, king of France), third son of Clovis II., and brother of Clothaire III. and Childeric II., was placed on the throne of Neustria and Burgundy by Ebroin, maire du Palais, in 670. He was defeated by Pepin of Heristal in 687, and possessed no real power; died 692. **THIERRI IV.**

(or **Thierry II.**, king of France), only son of Dagobert III., was taken from a monastery and placed on a pretended throne by Charles Martel, in place of Childeric, 720; died 736 or 737.

**THIERRI, J.**, a French philosopher, died 1660.

**THIERS, JOHN BAPTIST**, a French ecclesiastic, was born at Chartres, in 1636, and died at Mans, in 1703. He wrote several books, particularly 'A History of Perukes,' being an invective against those ecclesiastics who adopted that ornament. His best performance is 'Traité des Superstitions qui regardent les Sacramens,' 4 vols.

**THIERY, N. J.**, a French botanist, 1739–1780.

**THIRLBY, STRYAN**, a learned critic, born at Leicester, in 1692. He was a man of intemperate habits; and though he studied divinity, physic, and civil law, he never applied himself to either as a profession. Through the interest of Sir Edward Walpole, he obtained a small sinecure place in the custom-house; and died in 1753. His edition of Justin Martyr, with notes and emendations, is esteemed a valuable performance.

**THISTLEWOOD, ARTHUR**, memorable as the leader of the 'Cato Street' conspirators in 1820, was the son of a respectable farmer near Lincoln, and was born in 1772. He obtained a lieutenant's commission in the supplementary militia, in 1797, and shortly after married a young lady with a considerable fortune, but who died about 18 months after their union. After squandering his property in habits of dissipation and gambling, he left Lincoln for London, and from thence made occasional voyages to America and France, where he probably contracted that spirit of discontent which influenced his future conduct. He married again, and thereby improved his circumstances; but he had now become a gambler by profession, and had also connected himself with disaffected characters, which drew on him the notice of government. When the riots in Spa Fields took place, he was arrested as one of the ringleaders; but after being kept some time in confinement, he was liberated, there being no proof of his guilt. Shortly after, he sent a challenge to the home secretary, Lord Sidmouth, as the author of the bad treatment he had received during his confinement; which occasioned his subsequent detention in prison for a considerable time. Burning with rage, he madly became the principal agent in the Cato Street conspiracy, the object of which was to murder several members of the administration, while at a cabinet-dinner at Lord Harrowsby's, and excite an insurrection in the metropolis. Information, however, having been given to the ministers by a spy employed for the purpose, a party of police officers, with a company of the guards ready at hand, if wanted, proceeded to the place of meeting—a room over some stables in Cato Street—where the wretched conspirators were, at the time, preparing for their diabolical enterprise. As soon as the officers had effected an entrance, Thistlewood seized a sword, and killed the foremost of them, named Smithers, on the spot. But he and his coadjutors (who were all ignorant persons, of the lowest grade in society) were quickly secured: and being brought to trial, were condemned, and suffered as traitors, May 1, 1820.

**THOM, JAMES**, a native of Ayrshire, celebrated as a sculptor, was born in 1799, and died at New York, where he had gone twelve or fourteen years previously, in 1850. He rose from the condition of an obscure stone-cutter by his own unaided genius, and acquired a famous name in London for his execution of busts and groups in Scotch graystone.

[Thom's Group of Old Mortality, at Laurel Hill Cemetery, Phila.]

The well-known group of 'Tam O'Shanter' is from his chisel.

THOM, JOHN NICHOLLS, leader of the Canterbury riots in 1838, was a native of Cornwall, and first became known about the period of the Reform Bill. He assumed the name of Sir William Courtenay, knight of Malta, and exhibiting his fine person to the people, often graced by rich costumes, completely fascinated them by his singular talents. In 1833, he became a candidate for Canterbury, and polled nearly a thousand votes, after which he was confined four years in Maidstone lunatic asylum. Having escaped from the custody of his friends, he reappeared in Kent in the spring of 1838, and claiming a divine mission, persuaded nearly 100 of the most resolute characters to join him. The immediate object of Thom was to establish himself as lord of Kent, and the standard he raised was a loaf elevated on a pole, with a flag of white and blue, emblazoned with a lion rampant. This band really took the field at Boughton, on the 28th of May, and sustained a conflict with the military at Bossenden wood on the 31st. Thom, and eight of his party, fell before the fire of the soldiers at the first onset, and many others were seriously wounded: the disclosures at the trial of the remainder, afforded the most painful evidence of the ignorance prevailing among our peasantry; and also marks of that noble faith in supposed greatness, which has animated the martyrs and heroes of the greatest events in the world's history,—a singular proof that human nature is still the same as in past ages, and that only leaders are wanted for any cause, whether it be good or evil. This little episode in the peaceful annals of recent years, ought to be read as a lesson to educators, and especially by the English clergy, regardless of the necessity of popular education. What has been may be again, so long as so many thousands of Englishmen are doomed to poverty and ignorance. The affair of Thom caused some discussion in parliament at the time. [E.R.]

THOM, WALTER, an historical and miscellaneous writer, was born at Bervie, in the county of Kincardine, 14th April, 1770. He commenced business as a manufacturer in his native town, but not succeeding, he came to Aberdeen, and adopted literature as a profession. During his residence in Aberdeen he published 'The History of Aberdeen,' in 2 vols. 12mo. Aberdeen, 1811; and the 'Annals of

Pedestrianism,' 1 vol. 8vo. 1813. He afterwards went to Dublin, where he was engaged as editor of the Dublin Correspondent, which he conducted for some years. He was the author of several articles in Brewster's Encyclopædia, and contributed portions of the Statistical Account and General Report of Scotland, for Sir John Sinclair, and also to Mr. Shaw Masson's Agricultural and Statistical Account of Ireland, and various other works. He died at his house in Dublin, 16th June, 1824, aged 54.

THOM, WILLIAM, known as the poet of Inverury, was born at Aberdeen in 1788. He soon gave indications of poetic genius in some pieces which appeared in the Aberdeen newspapers; and afterwards published two volumes, full of poetic feeling, which were well received by the public. In 1845 he visited London, where he was *fêted*, and had substantial gifts conferred on him, but notwithstanding he died in deep poverty, in Dundee, in 1848.

THOMAS, the apostle, whose name in Greek, signifying a *twin*, is written *Didymus*, was probably a Galilean like his fellow-laborers, but his history is almost unknown. He is supposed, with good reason, to have travelled far East, even to China and India, in the course of his mission. The churches of Malabar have preserved some traditions of his martyrdom.

THOMAS AQUINAS. See AQUINAS.

THOMAS, count of Savoy, 1188–1233.

THOMAS, ANTHONY LEONARD, an eminent French writer, was born in 1732, at Clermont, in Auvergne. He was a professor in the college of Beauvais, at Paris; and afterwards secretary to the Duke of Orleans. Died 1785. Among his works are, 'Réflexions Historiques et Littéraires sur le Poème de la Religion Naturelle de Voltaire,' and 'Essai sur le Caractère, des Mœurs, et l'Esprit des Femmes.'

THOMAS, A. J. B., a Fr. painter, 1791–1833.

THOMAS, ELIZABETH, a writer of the times of Dryden and Pope, the latter of whom placed her in the Dunciad, author of Poems and Letters, and of a Memoir of her own Life, 1675–1730.

THOMAS, J. E., a German painter, 1588–1653.

THOMAS, ISAAH, LL.D., a distinguished printer, and the founder of the American Antiquarian Society at Worcester, to which institution he made a large bequest, was born at Boston in 1749. In 1770, he commenced the publication of the Massachusetts Spy in Boston. Died 1831.

THOMAS, JOHN, a major general in the American army, served against the French and Indians in 1756. In 1775 he raised a regiment and marched to Roxbury, and was soon promoted to the rank of brigadier general, and during the siege of Boston, commanded a division at Roxbury. In 1776 he commanded in Canada on the death of Montgomery. Died at Chamblee 1776.

THOMAS, JOHN, a Flem. painter, 1610–1673.

THOMAS, JOHN, a learned and liberal prelate, was born at Carlisle, in 1712. He studied at Queen's College, Oxford; and, on leaving the university, he lived in the family of Sir William Clayton, as tutor to his son. Having been ordained, he became rector of Bletchingley, in Surrey, and married the daughter of his patron. He was, successively, chaplain to the king, prebendary of Westminster, and vicar of St. Bride's, Fleet Street. In 1768 he succeeded Bishop Pearce in the Deanery of Westminster, and, in 1774, was consecrated bishop of Rochester. Died 1793.

THOMAS, R., a medical writer, 1753–1835.

THOMAS, WILLIAM, an eminent prelate, was

born at Bristol, in 1613. He suffered much during the rebellion, but afterwards became precentor of St. David's; he was also chaplain to the Duke of York, and preceptor to his daughter, afterwards Queen Anne. In 1665 he was made dean of Worcester, whence he was removed to the see of St. David's, and died, bishop of Worcester, in 1689.

THOMAS, WILLIAM, a grandson of the preceding, was born in 1670, and educated at Westminster school, and Trinity College, Cambridge. He obtained the living of Exal, in Warwickshire; and in 1723 was presented to the rectory of St. Nicholas, in Worcester. Died 1738. He published among other works 'An Enlarged edition of Dugdale's Warwickshire,' 2 vols.; and a 'Survey of Worcester Cathedral.' He had made collections for a history of Worcestershire, which fell into the hands of Dr. Treadway Nash, and served as the foundation of his work.

THOMAS, WILLIAM, a native of Wales, who was educated at Oxford; after which he became clerk of the council to Edward VI., who gave him, though a layman, some ecclesiastical preferments, of which he was deprived in the next reign; and being accused of treasonable practices, was executed at Tyburn, in 1553. He was the author of 'The History of Italy,' and some other works of minor importance.

THOMASIN, or TOMASIN, called *Tinkelase*, *Clar*, or *Zerkler*, a German poet, 13th century.

THOMASIUS, JAMES, a professor of Leipzig, among whose pupils was numbered the celebrated Leibnitz, author of 'The Origin of Philosophical and Ecclesiastical History,' 1622-1684. His son, CHRISTIAN, a jurisconsult and philos., 1655-1728.

THOMASSIN, three French engravers:—PHILIP, died at Rome end of the 16th century. His relation, SIMON, died 1732. H. SIMON, the son and pupil of the latter, 1688-1741.

THOMASSIN, L., a Fr. engineer, 15th century.

THOMASSIN, LOUIS, a French ecclesiastic, was born in 1619, at Aix, in Provence. He became a member of the congregation of the Oratory, and professor of divinity at Saumur, whence he was called to Paris, where he taught in the seminary of St. Magloire, with great reputation. He wrote many works, but the most important are, 'De la Discipline Ecclésiastique,' and 'Dogmata Theologica.' The former of these was so much esteemed at Rome, that Pope Innocent XI. invited him to the papal court, with the promise of a cardinal's hat, but Louis XIV. refused his sanction. Died 1695. His cousin, CLAUDE, also an oratorian and writer, 1613-1692.

THOMOND, T., a French architect, 1759-1813.

THOMPSON. See RUMFORD.

THOMPSON, EDWARD, a miscellaneous writer and friend of Churchill, the poet, famous for his sea-songs, born at Hull about 1738, died 1786.

THOMPSON, GEORGE, a Scotch musical amateur and composer, better known as the correspondent of Burns, many of whose songs were written at the suggestion of Thompson for adaptation to old Scotch melodies. Died 1852; aged 92.

THOMPSON, JONATHAN, a worthy citizen of New York, who served as collector of that port, from 1820 to 1829. During his official career he collected over a hundred million of dollars for the United States Government. His accounts were literally exact to one cent. Died 1846; aged 73.

THOMPSON, SMITH, secretary of the navy under Monroe in 1818, and finally judge of the United States supreme court. Died 1843; aged 76.

THOMPSON, THOMAS, a Scotch antiquarian and

one of the original founders of the Edinburgh Review. Died 1852; aged 83.

THOMPSON, WILLIAM, an Irish naturalist, who projected a complete Natural History of Ireland, but had published only the department on Birds when he died 1852; aged 46.

THOMSON, WILLIAM, dean of Raphoe, in Ireland, known as a poet, died about 1766.

THOMPSON, ALEXANDER, a miscellaneous writer and poet, born 1762, died at Edinburgh 1803. He was the author of 'Whist,' a poem in two cantos, 1791; 'The Paradise of Taste,' 1793; 'The German Miscellany, consisting of Dramas, Dialogues, Tales, and Novels, translated from that Language,' 1796; 'The British Parnassus at the Close of the Eighteenth Century,' and some others.

THOMSON, DR. ANDREW, an eminent modern divine and leader in the national church courts of Scotland, was born at Sanquhar, in Dumfriesshire, in 1779. He was ordained minister of the parish of Sprouston, in 1802; removed to the East Church of Perth, in 1808, where he labored assiduously and successfully till 1810, when he received a presentation from the magistrates and council of Edinburgh to the New Gray Friars' church in that city. Eloquent, indefatigable, and zealous, he came prepared to the discussion of every subject, making an impression on the public mind which has but few parallels in the history of ministerial labors. In 1814 he was appointed to St. George's church, where, laboring in his vocation with surpassing energy, he rapidly extended his reputation, and acquired extraordinary influence. Died 1831.

THOMSON, ANTHONY TODD, M.D., a distinguished medical writer and practitioner, was born at Edinburgh, 1778, where his father had settled, after having long held an important office in America. He was educated at the high school and university of his native city; and while prosecuting his medical studies, he became a member of the speculative society, where he formed the acquaintance of Lord Brougham, and many other eminent persons, whose friendship he enjoyed till his death. In 1806 he settled as a general practitioner in Chelsea, and practised there for twenty-five years with great success, laying the basis of his future reputation by the most indefatigable study, and publishing his 'Conspicuum,' a work of European fame, and his 'London Dispensatory,' no less distinguished; editing in conjunction with Dr. Burrows, the Medical Repository; and gaining 'golden opinions' by the amiability of his character, no less than by his professional skill. In 1826 he became one of the first professors of the University of London, and held the chairs of *materia medica* and medical jurisprudence till his death. About this period, also, he commenced practice as a physician; and he took advantage of the greater leisure thus procured, to write his lectures on '*Materia Medica*,' which were afterwards published in 2 vols., and to plan various other works which he afterwards gave to the world, besides contributing many articles and reviews to different medical journals. Dr. Thomson was a votary of literature no less than of science; and his last works were, a translation of Salvarte's *Philosophy of Magic*, Omens, and apparent Miracles, and an edition of Thomson's Seasons, with numerous explanatory notes. Died, July 3d, 1849. His '*Treatise on Diseases of the Skin*,' was a posthumous publication.

THOMSON, JAMES, was born in 1700, at Ednam in Roxburghshire, of which his father was then the parish minister. To the images of agricultural life, with which this beautiful district furnished his

childhood, were afterwards added scenes of another cast, in the pastoral parish of Southdean, to which his father removed. After having passed through the borough school at Jedburgh, he studied for several years at the university of Edinburgh. He was intended for the church, and is said to have been diverted from the profession by the censure of a theological professor on one of his exercises. At any rate, he had already written verses, and was ambitious enough to hope for fame by writing more; and, without any fixed view beyond literary employment, he started for London with his poem of 'Winter' in his pocket. David Mallet, whose own literary reputation is long since eclipsed, conferred eminent service on literature by smoothing the way for Thomson, whom he had known at college. The author of 'Winter' being without money to buy a new pair of shoes, congratulated himself when a bookseller gave him three guineas for his poem. It was published in 1726, and became rapidly popular when one or two literary men had called attention to it. Thomson, provided for in the meantime as tutor in the family of Lord Binning, published 'Summer' and 'Spring' in the next two years; and in 1730, 'Autumn' being added, the four poems were printed together, under their common title 'The Seasons.'—The appearance of the series was a phenomenon more remarkable than we are apt to suppose. The raw young Scotsman, meditating among the Cheviot hills and by the banks of the Tweed, had struck out a vein of poetry which had not been worked in England since the restoration. When his poem appeared, the artificial school of Pope was in the ascendant; and the fashionable poets of the day were alike distant from simplicity and nature in the themes they selected, and in the form with which they invested them. Thomson was far from being pure in taste: his tone of sentiment, too, is very often mawkish, and his diction almost everywhere pompous and pedantic. But the closeness with which he observed external nature has hardly ever been surpassed; and the poetic intuition with which he apprehends the features of a landscape, and the moral associations which clothe it with the finest part of its beauty, is as keen and exquisite as that of Wordsworth himself.—While the parts of his great work were in progress, Thomson produced, among other things, his unfortunate tragedy of 'Sophonisba.' In 1731 he travelled in France, Italy, and Switzerland, as a tutor; and the father of his pupil, on becoming the Lord Chancellor Talbot, gave him a sinecure place in his court, which was lost on the patron's death. This event drove him again to write for the stage. There is very little merit even in 'Tancred and Sigismunda,' the last and most successful of his plays. A pension from the Prince of Wales raised him just above penury; and in 1745 his friend Lord Lyttleton, coming into power, made him surveyor-general of the Leward Islands, an office yielding him three hundred a-year. He had long worked on his 'Castle of Indolence,' which he published in 1748. This beautiful poem shows a wonderful improvement in taste, and betrays a love of Old English poetry which was hardly felt by any other person of the time. The poet did not long enjoy the ease in which he was placed. Living in a cottage at Kew, he caught cold in sailing up the Thames, and died of fever in 1748. He was a friendly, shy, and indolent man.

THOMSON, REV. JOHN, a distinguished landscape painter, was born at Dailly, in Ayrshire, 1778; succeeded his father as minister of that parish in 1800, and was translated to Duddingstone, near Edinburgh,

in 1805, where he remained till his death. From his boyhood he evinced a strong predilection for art, which increased with his years; and having early become an honorary member of the Royal Scottish Academy, he produced an infinite variety of landscapes, which have placed him on a level with the best artists of his native land. Died 1840.

THOMSON, THOMAS, M.D., born at Crieff, Perthshire, 12th April, 1773; died at Glasgow, 2d July, 1852. Dr. Thomson was educated at the parish school of his native place until his fourteenth year, when he was placed under the tuition of Dr. Doig, rector of the borough school of Stirling, and author of 'Letters on the Savage State,' a work which attracted much notice at the time of its publication. His master, an eminent classical scholar, speedily imbued him with a love of literature, which afterwards enabled him to apply numerous improvements to his favorite science. On the conclusion of his scholastic studies, he gained a bursary by public competition at the university of St. Andrews, where he remained for three sessions. In 1796, while pursuing his literary and scientific studies at the university of Edinburgh, he succeeded his brother, afterwards the Rev. Dr. James Thomson, minister of Eccles, as one of the editors of the 'Encyclopædia Britannica.' His attendance on the lectures of the celebrated Dr. Black, during the sessions 1795–96, imparted to him an intense interest in the science of chemistry, which never deserted him during his subsequent career. He entered on this study with devotion, and wrote the articles Chemistry, Mineralogy, Vegetable Substances, Animal Substances, and Dyeing Substances, which all appeared before the 10th December, 1800, and formed the groundwork of his celebrated 'System of Chemistry,' which soon became the text-book of the science in almost every country in Europe. In 1800–1 he gave his first course of lectures in Edinburgh with fifty-two pupils; a second course in the summer of 1801 was attended by thirty-nine students. On the appearance of the first edition of his Chemistry his winter class swelled to ninety-six members. He continued his lectures till 1810, in the lawyer's metropolis of his native country, attended usually by the most select of the Scottish and English students, as his roll-book contains such names as James Mill the historian, James Wardrop, Charles Badham, Henry Cockburn, James Ballantyne, the distillers Haigs and Steins, George Ballingall, John Abercrombie, Benjamin Travers, John Thomson, Andrew Rutherford, Sir James Suttie, Sir Thomas Kirkpatrick, &c., &c. His lectures formed, however, but a secondary portion of his employment, his time being principally taken up with the preparation of new editions of his System, conducting an extensive series of researches upon brewing for the excise, a work which laid the basis of the Scottish legislation on this subject, and in various chemical consultations. During this period, also, he invented the system of symbols which are now in universal use, as modified in some respects by subsequent discovery, and introduced the use of Greek and Latin numerals to designate the various degrees of oxidation, &c. of which bodies are susceptible, and which are also in general use. He likewise first opened in Great Britain a laboratory for practical manipulation. In 1810 he published his 'Elements of Chemistry.' In 1812 he visited Sweden, and published his travels in that country. In 1813 he commenced the 'Annals of Philosophy,' and continued to edit this journal for several years. In 1817 he was elected lecturer on chemistry in the university of Glasgow, a position

which was endowed as a professorship in 1818. In 1825 he published 'An Attempt to Establish the First Principles of Chemistry by Experiment,' 2 vols. 8vo, comprising the results of many thousand experiments to determine the atomic weights of bodies; the most important of which have been confirmed by subsequent experiments. In 1830-31 he published the 'History of Chemistry,' in 2 vols. In 1836 'Outlines of Mineralogy and Geology,' 2 vols. 8vo, being a portion of the seventh edition of his 'System of Chemistry.' His last work was 'On Brewing and Distillation,' 8vo, 1849. Dr. Thomson's discoveries were exceedingly numerous, including chlorocromic acid, hyposulphurous acid, hydrosulphurous acid, potash oxalates of chromium, potash chromate of magnesia, chloride of sulphur, called Thomson's liquor, and an immense number of salts, &c. &c., and above fifty species of minerals. Dr. Thomson invented Allan's Saccharometer, which is used by the Scottish excise, from which the idea of Bate's instrument, used in England, was taken; the original inventor being thus deprived of the proper reward of merit. Dr. Thomson as a chemical teacher was most distinguished. He has left behind him a numerous band of chemists, who occupy as teachers, manufacturers, and physicians, some of the most prominent positions in the country.

THOMSON, WILLIAM, a poet and divine, was born at Brough, in Westmoreland; graduated A.M., at Queen's College, Oxford, in 1738; became dean of Raphoe, in Ireland; and died in 1766. He published two volumes of poems, among which those entitled 'Sickness,' and the 'Hymn to May,' have received the meed of public approbation.

THOMSON, WILLIAM, an industrious writer and compiler, was born in 1746, at Burnside, in Perthshire; was educated for the church, became minister of Monivad, and ultimately settled in London as an author by profession. His compilations were extremely numerous, and he prepared for the press many works of other authors; he was also the editor of several periodical publications, as the English Review, the Political Magazine, the Whitehall Evening Post, and the Annual Register. Among his original works are, 'The Man in the Moon,' a novel; 'Memoirs of the War in Asia,' 2 vols. Died 1817.

THORE, J., a French physician, 1762-1823.

THORER, A., a Swiss Hellenist, 1489-1550.

THORESBY, RALPH, an eminent antiquary and topographer, was born at Leeds, in 1658. He was educated at the school of his native place, after which he went to Rotterdam to learn the Dutch and French languages, to fit him for mercantile pursuits. On the death of his father he succeeded to a large concern, but he found leisure to cultivate his taste for antiquarian pursuits, and produced the 'Topography of Leeds,' 'Vicaria Leodiensis,' &c. Died 1725.

THORILD, THOMAS, a Swedish poet, philosopher, and critic of taste, remarkable as a writer on the beautiful in nature, professor at Griefswalde and Upsala, 1759-1808.

THORNDIKE, HERBERT, a dignitary of the church, and a great writer on church principles, died 1672.

THORNE, LIEUT.-COLONEL PEREGRINE FRANCIS, the originator of the London police, died 1854.

THORNHILL, SIR JAMES, an eminent English painter, was born at Weymouth, in Dorsetshire, 1676. He was a nephew of Dr. Sydenham, the celebrated physician, who placed him under the tuition of an artist in London. Having painted the dome of Saint Paul's, he became history painter to

Queen Anne, and executed some allegorical subjects for her at Hampton Court. His masterpiece is the refectory and saloon of the hospital at Greenwich. He died after receiving the honor of knighthood from George I., in 1734. His son, JAMES, inherited much of his genius, and he had a daughter, who became the wife of Hogarth.

THORNTON, BONNEL, a humorous writer and poet, was born in London, in 1724; and was educated at Westminster School, and Christchurch, Oxford. He made literature his profession, and was on terms of intimacy with many of the wits of the age, united with the elder Colman in the Connoisseur, and was a fertile contributor to the periodicals of the day. He also projected an exhibition of sign paintings; and brought out a burlesque 'Ode for St. Cecilia's Day,' which afforded much amusement. In 1766 he published a translation of Plautus; and the year following a poem, entitled 'The Battle of the Wigs,' in ridicule of the dispute between the licentiates and fellows of the College of Physicians. Died 1768.

THORNTON, JOHN ROBERT, a celebrated botanist, the younger son of the preceding, was born about 1758, and was educated at Cambridge. Shortly after this, having acquired an important accession of fortune by the death of his brother, he resolved to make medicine his profession, and became a member of Guy's Hospital. After studying three years in London, he visited the Continent; and, returning to the metropolis, commenced practice with considerable success. In 1798 he published a work in support of the Brunonian system, entitled 'The Philosophy of Medicine, or Medical Extracts on the Nature of Health and Disease,' in 5 vols. Soon after, he brought out a work, called 'The Philosophy of Politics,' &c. 3 vols.; but he derives his chief fame from his magnificent 'Temple of Flora, or Garden of the Botanist, Poet, Painter, and Philosopher.' Died 1837.

THORNTON, COLONEL MATTHEW, was a native of Ireland, born in 1714, and at an early age emigrated with his father to America, and settled at Worcester, Massachusetts. He studied the medical profession, and practised at Londonderry, N. H. He was a delegate to the continental congress, and one of the signers of the declaration of independence in 1776. He was afterwards appointed chief justice of the court of common pleas, and judge of the superior court of Massachusetts. Died 1803.

THORNTON, SAMUEL, of Clapham Park, Surrey, was a director of the Bank of England for the long period of 53 years, and an active M. P. nearly 40 years. From 1784 to 1806 he represented the town of Kingston-upon-Hull, and from 1807 to 1818 the county of Surrey. His sagacious counsels had always great influence at the Bank of England, and when the memorable stoppage of cash payments occurred in 1797, he was the governor. In the various duties he had to perform, whether as a bank director, a member of parliament, a governor of Greenwich Hospital, or as the head of a mercantile firm, he was able, zealous, and indefatigable. Died July 3, 1838, aged 83.

THORNTON, THOMAS, a militia officer of West Yorkshire, author of several sporting works, and father of the celebrated botanist, died 1823.

THORPE, JOHN, a physician of the county of Kent, author of professional and antiquarian works, 1682-1750. His son, of the same name, also an antiquarian, 1713-1792.

THORWALDSEN, BERTEL (*Albert*), was born at Copenhagen, November 19, 1770. His father,

Gottschalk Thorwaldsen, a carver of wood, being a native of Iceland; his mother was of a Danish family. Bertel attended the Danish academy, and soon made such progress as to undertake the carving of figure-heads for ships. In 1793 he obtained the principal gold medal of the academy, which gave him the privilege of studying abroad at the expense of the government. He set out for Italy, May 20, 1790, in the Danish frigate *Thetis*; he landed at Naples, and arrived at Rome, March 8, 1797, and he did not return to his native country until 1819, after an absence of twenty-three years. His first important commission was from Mr. Thomas Hope, in 1803, and it was owing to the liberality of this distinguished patron of the arts that Thorwaldsen was enabled to remain and prosecute his profession in 'the Eternal City.' In 1812, on the occasion of Napoleon's expected visit to Rome, Thorwaldsen greatly distinguished himself by a sketch of the 'Triumphal entry of Alexander into Babylon,' which he completed with such expedition that the frieze, in plaster, was fixed up in one of the halls of the Quirinal palace within three months of the date of the commission. It is a composition of great extent, measuring 160 Roman palms (the palm is about nine inches) in length, and five in height; it has been twice executed in marble since, and is well engraved by Amsler of Munich. His principal works, however, were executed after his visit to Denmark; he returned to Rome at the close of 1820, and acquired the highest European fame by the following works:—Christ and the Twelve Apostles; St. John Preaching in the Wilderness; and the monuments to Copernicus, Pius VII., Maximilian of Bavaria, Prince Poniatowsky and others. The Christ and the St. John were for the church of our Lady at Copenhagen, where they are now placed. He again visited Denmark, in 1838, but finding the climate disagree with him, returned to Rome in 1841, but again visited Copenhagen in 1842, and died there suddenly in the theatre, March 24, 1844, of disease of the heart, aged seventy-three. Thorwaldsen bequeathed all works of art in his possession to the city of Copenhagen, to form a distinct collection, and the city now boasts of a great art museum, containing specimens of many classes of art, besides books, &c., known as the Thorwaldsen Museum; he left sufficient funds to endow it, and enable it to constantly add to its collection, foreign as well as Danish works. Thorwaldsen was never married, but left a natural daughter in Rome well provided. There is a cheap edition of outlines after all the works of Thorwaldsen, now in course of publication.—(H. C. Anderson, *Bertel Thorwaldsen eine biographische skizze aus dem Dänischen übertragen von Julius Reuscher*; and the writer's notice in the *Supplement to the Penny Cyclopædia*.) [R.N.W.]

THOU, JAMES AUGUSTUS DE, in Latin *Thuanus*, a celebrated French historian and Latinist, whose father and grandfather were both presidents of the parliament of Paris, 1553–1617. De Thou inherited the talents of his ancestry for statesmanship, and was employed as ambassador and finance minister. His son, FRANCIS AUGUSTUS, born at Paris about 1607, was beheaded on account of his privy to the conspiracy of Cinqmars against Richelieu, 1642.

THOUARS. See PETIT-THOUARS.

THOUIN, A., a Fr. horticulturist, 1747–1823.

THOURET, J. W., one of the most celebrated members of the French constituent assembly, born in Normandy 1746, executed 1794. His brother, MICHAEL AUGUSTUS, a distinguished physician,

1748–1810. W. F. ANTHONY, son of the deputy, author of an *Encyclopædia*, died 1832.

THOYNARD, NICHOLAS, a French scholar, author of a *Harmony of the Gospels*, 1629–1706.

THRASYBULUS, one of the great names of ancient Greece, period of the Peloponnesian or civil war between Sparta and Athens, was the son of Lycus, and was born at Steiria in Attica. He was commander of the infantry at Samos, when the Four Hundred was established on the ruins of the Athenian democracy (as noticed in the articles *THERAMENES*), B.C. 411. He immediately swore his soldiers not to recognize the oligarchy, and united with Theramenes and Alcibiades to effect their destruction; at the same time he continued his part in the Peloponnesian war, and to him belongs the chief honor of the Athenian victory at Cyzicus. That dubious struggle being closed by the victory of Ly-sander, and the government of the humbled Athenians vested in the thirty-tyrants, Thrasybulus took refuge in the Theban territory, where the patriots of the democracy once more rallied to him. After the death of Theramenes, Thrasybulus might have occupied his seat among the thirty, but he preferred the liberties of his country, and advancing at the head of the patriots, a thousand in number, he surprised the camp before Phyle, on the frontier of Bœotia, and after repeated successes became master of the government. In the second of the battles fought on this occasion fell Critias, at whose instance Theramenes had been compelled to drink the poisoned chalice. The despotic Thirty were now replaced by a council of ten representatives, and Thrasybulus exhibited the highest magnanimity towards his enemies. At length, having generously taken the field in aid of the Thebans, menaced by the yoke of Sparta, he was massacred in his tent while encamped in Cilicia, B.C. 389. [E.R.]

THRELKELD, CALEB, an English physician and naturalist, settled in Dublin, 1676–1728.

THROSBY, J., a topographer, 1740–1803.

THUANUS. See THOU.

THUCYDIDES, the historian, was an Athenian citizen, and belonged to the Attic borough Halimus. The date of his birth, which is not quite certain, was, perhaps, B.C. 471. Being of a good family, and living in a city which was the centre of Greek civilization, he received the highest education which the time afforded; and this, superadded to great ability, manifested itself in the 'eternal possession' which he bequeathed to posterity. He is said to have studied rhetoric under Antiphon of Rhammus, the most distinguished orator of the time, and to have received instruction in philosophy from Anaxagoras. The well-known story of his having been moved to tears of emulation by hearing Herodotus recite his history at the Olympic games, is generally admitted to be without foundation. At the commencement of the Peloponnesian war (B.C. 431), he entered the military service of his country, and in B.C. 424, held the command of a fleet of seven ships which lay off Thasos, when Brasidas, the Lacedæmonian commander, invested Amphipolis, a city on the Strymon, belonging to the Athenians. Thucydides hastened to the assistance of his countrymen; and though he arrived too late to prevent a capitulation, he saved Eion, a seaport at the mouth of the river. In consequence of this failure, he was banished by the Athenians, or found it prudent to retire into voluntary exile, and passed the next twenty years of his life as a refugee. The accounts as to the places of his residence during his exile, are various and conflicting; we may only infer, that he

could not live with safety in any place which was under Athenian dominion. He himself states, that he spent much of his time either in the Peloponnesus, or in places under the Peloponnesian rule; and his minute description of Syracuse and the neighborhood, leads to the belief that he visited these

[Thucydides—From an Ancient Bust.]

localities. It may, at least, be confidently affirmed that, during this eventful period, he was an attentive observer of the great struggle, collected the materials for his history as the events proceeded, and to some extent, reduced them to the form in which they have commanded the admiration of all succeeding generations. When peace was concluded with the Lacedæmonians in B.C. 404, a decree was passed, permitting the return of all exiles; in consequence of which, Thucydides was restored to his country in the following year. According to the united testimony of the ancient writers, he came to a violent end, having died by the hand of an assassin; but the time and place of his death are not known. There was a tomb erected to his memory at Athens; and he probably died there. The History of Thucydides was designed to comprise a complete account of the events of the Peloponnesian war (B.C. 431–404), but breaks off in the middle of the twenty-first year (B.C. 411). It is divided into eight Books, the last of which, in consequence of the absence of speeches, and a supposed inferiority of style, has, without any good reason, been held by some critics as not genuine. Thucydides has always been placed first in the first rank of philosophical historians. His moral reflections are searching and profound; his speeches abound in political wisdom; and the simple minuteness of his pictures is often striking and tragic. His style is concise, vigorous, and energetic; every word has its appropriate meaning, and not a clause is inserted which is not necessary for his narrative. Hence, he is sometimes harsh and obscure; his sentences are occasionally very involved, and the connection and dependence of the several parts difficult to perceive. [G.F.]

THUGUT, F., an Austrian statesman, and party to the coalition against France, 1739–1818.

THUILLIER, J. L., a Fr. botanist, died 1822.

THULDEN, C. A., a Ger. historian, 17th cent.

THULDEN, or TULDEN, THEODORE VAN, a painter and engraver, taught by Rubens, 1607–76.

THUMMEL, M. A., a Ger. writer, 1738–1817.

THUMMIC, L. P., a German philos., 1697–1728.

THUNBERG, CHARLES PETER, a Swedish traveller and botanist, prof. at Upsala, 1743–1828.

THUNBERG, D., a Swedish engineer, died 1788.

THUNMANN, J., a Swiss antiquarian, 1746–78.

THURLOE, JOHN, secretary of state during the protectorate of the two Cromwells, and the chief agent in detecting the plots of Harrison and the fifth monarchy men, born at Abbots-Reding, in Essex, where his father was rector, 1616, died 1668. His state papers, published in 1742, form a valuable mass of historical documents.

THURLOW, EDWARD, Lord, chancellor in the reign of George III., was born at Little Ashfield, near Stowmarket, in Suffolk, where his father was rector, in 1732. He was called to the bar in 1758, and entering parliament as member for Tamworth in 1768, became a distinguished supporter of the administration of Lord North. He succeeded Dunning as solicitor-general in 1770, and became attorney-general, after Sir William De Grey, in 1771. On the 3d of June, 1778, he was appointed lord chancellor, and raised to the peerage; on the retirement of Lord North, and the accession of the marquis of Rockingham in 1782, he still retained the seals by express favor of the king, though he neither supported the ministry, nor was much liked by the premier. On the coalition ministry of Fox and North being formed, he was compelled to retire; but he came into office again under Mr. Pitt, and, still pursuing his inconsistent course of action, was obliged to withdraw in 1792, from which time he took no part in public affairs. Lord Thurlow bears the character of an arrogant, factious politician, rather the bully than the debater in parliament, but yet a man of keen understanding: his character has been delineated by Lords Brougham and Campbell, and slightly sketched by the recent editor of the Rockingham papers. From the latter we cite the following: 'To Thurlow in his private relations the praise may be fairly awarded. He was a scholar, and a good and ripe one. He was an affectionate parent, and sometimes an active and cherishing patron. He had a kind of rough generosity, which moved him occasionally to take in good part a blunt remonstrance, and to prefer one who thwarted, rather than one who fawned upon him. He befriended Johnson and Crabbe—the one when the shadows of evening were closing upon him, the other when the trials of poverty pressed most heavily. In worse times there have been worse chancellors than Edward, Lord Thurlow, but an age of comparative freedom and refinement has rarely exhibited one who so ill understood, or at least so ill discharged, the functions of a statesman and legislator.' Died 1806.

THURMER, J., a German architect, 1789–1833.

THURNEYSSER, L., an alchemist and astrologer, son of a goldsmith at Bale, 1531–1596.

THUROT, FRANCIS, a French naval officer, born in 1727. Having rendered himself conspicuous by his courage and success while in command of a privateer, he was invited to enter into the royal navy, and intrusted with the command of five frigates and a corvette, destined to make a descent on the British coasts. He sailed on this expedition, Oct. 15, 1759, and arriving at Carrickfergus Bay, in Ireland, Jan. 10, following, the troops were landed, and the place surrendered in a few days. Thurot thought proper, however, to re-embark his troops; and, on his return to France, his vessels were attacked by an English squadron, and he fell in the engagement, Jan. 20, 1760.

THUROT, J. F., a French Hellenist 1768–1832.

THWAITES, EDWARD, a Saxon and Greek scholar, professor at Oxford, and assistant of Dr. Hickeys in compiling his Thesaurus, 1667–1711.

THYNNE, FRANCIS, a herald and antiquary of the 16th century, was the son of William Thynne, the editor of Chaucer, and steward of the household to Henry VIII. He was educated at Tunbridge School, and Magdalen College, Oxford; became a member of Lincoln's Inn, and in 1602 was made Lancaster herald. Hearne published 'A Discourse of the Duty and Office of an Herald of Arms,' written by Thynne, who also continued Holinshed's Chronicle; and wrote a 'History of Dover Castle and the Cinque Ports,' which, with many other productions, remain in MS. Died 1611.

THYSIUS, A., a Dutch historian, 1603-1697.

TIARA, P., a Dutch *savant*, 1514-1586.

TIARINI, A., an Italian painter, 1577-1658.

TIARKS, JOHN LEWIS, F. R. S., an astronomer, was born at Jever, in 1789; studied at Göttingen; and, coming to London in 1810, became assistant librarian to Sir Joseph Banks. In 1816 he visited Germany, and on his return received the appointment of British astronomer to the American boundary line commission, in carrying out which the greater part of his life was spent. He died in 1837.

TIBERIUS, CLAUDIUS NERO, the second emperor of Rome, was born B.C. 42, and succeeded Augustus A.D. 14. He was a great general, and a master of Greek and Roman literature, but as he grew older in years he disgraced himself with every species of cruelty and debauchery. He was probably insane long before the commander of his prætorian guard assumed the responsibility of putting him to death, March 16, A.D. 37.

TIBERIUS CONSTANTINE, called also TIBERIUS II., one of the most virtuous emperors of the East, was a native of Thrace, and was brought up at the court of Justinian. He succeeded to the throne in 578, and having suppressed the conspiracy of Sophia, widow of his predecessor, reigned unchallenged till his death in 582. A *third* of the name reigned emperor of the East, 698-705.

TIBULLUS, ALBIUS, a Roman patrician and elegiac poet, whose productions are marked by much feeling for the beauties of nature and the pleasures of a country life. They are generally printed with the compositions of Catullus and Propertius; flourished in the 1st century.

TICKELL, THOMAS, a popular writer and poet of the age of Addison, was born at Bridekirk, near Carlisle, 1686. His father was a clergyman, and Tickell was educated at Oxford, where he became a fellow of Queen's College. He obtained an appointment as under-secretary of state through the friendship of Addison, and some of his pieces appeared in the 'Spectator'; died 1740. His grandson, RICHARD, a political writer, died 1793.

TICOZZI, S., an Italian ecclesiastic, 1762-1836.

TIECK, CHRISTIAN FREDERICK, a German sculptor and director of the Sculpture Gallery of the Royal Museum of Berlin, was brother of the celebrated Ludwig Tieck. Died 1851, aged 75.

TIECK, LUDWIG, was born at Berlin in 1773, and studied successively at Halle, Göttingen, and Erlangen. Poetry was from boyhood his favorite study; but while he was always a ready and pleasing versifier, his poetical endowments, really very fine, worked most strongly when he wrote in prose. His literary career exhibits three epochs. In the first of these, beginning about 1796, and lasting ten years, he was one of the most efficient of the Romanticists, and, like Novalis, made the system attractive by displaying, in inventive compositions, an originality of fancy and depth of feeling not pos-

essed by the Schlegels, the critical chiefs of the school. The works he produced during this period were both numerous and diversified. Some of them were Dramatic and Poetical Parodies, whimsically uniting jest and earnest; the principal of these being 'Bluebeard' and 'Puss in Boots.' Others were Tales, or compositions like tales, which, following in the wake of 'Wilhelm Meister,' are referred by the Germans to the class of 'Art-Novels;' such are the 'Effusions of the Heart of an Art-loving Cloister-Brother,' and 'Franz Sternbald's Wanderings.' Other pieces, like 'Genoveva' and 'The Emperor Octavianus,' are saintly or historical Legends, dramatically treated, with a close and studied imitation of the rude drama of the middle ages. Others again, and these the most poetical of all Tieck's works, are Popular Legends (*Volksmährchen*), related in a prose narrative form, with great fulness of playful fancy, very much beauty of description, and a simplicity or *naïveté* of manner which, sometimes fairly childish, is yet wonderfully pleasing. The first attack of a painful disease of the joints, which made Tieck very long an invalid, came on in 1806, and forced him to cease from literary labor for several years. He resumed work in 1814, and for five years was chiefly busied on the Old English Drama, which he knew better than any other foreigner ever knew it; while he translated it with great spirit, and criticised it, not indeed without great caprice and rashness of judgment, but with much delicacy of poetical feeling. He began with his 'Old English Theatre,' containing translations and criticisms of old plays, some of which were on themes afterwards handled by Shakspeare, while others were maintained by Tieck (on grounds abundantly fantastic and slippery) to be really his, in spite of the English critics. Visiting London in 1818, and reading and copying in the Museum, he collected materials for two volumes of translations of plays preceding Shakspeare's ('Shakspeare's *Vorschule*).—In 1819, after a life of many wanderings, he finally took up his residence in Dresden, where he enjoyed a pension and honorary counsellorship. Besides collections of his earlier poems and other works, the chief business of this, the last period in his history, was the writing of short Novels, most of which first appeared in *Annals*; and which, critical and dissertative in character, and full of dialogue, have much more of analytic and reflective refinement than of narrative impressiveness, and show surprisingly little of the writer's early vein of poetry. Among the most interesting of these are 'Pietro of Abano,' and 'The Revolt in the Cevennes.' Others are 'Art-Novels,' to which class belong the 'Poet-Life' and 'Poet-Death,' having respectively for their heroes Shakspeare and Camoens. Tieck died at Dresden in the spring of 1853. [W.S.]

TIEDEMANN, DIETRICH, a German philosopher and opponent of Kant, famous for his researches in the history of philosophy, anthropology, the origin of languages, and similar subjects, 1745-1803.

TIEDGE, CHRISTOPHER AUGUSTUS, a German poet was born in 1752. His principal works are, 'The Echo, or Alexis and Ida,' 'Urania,' &c. D. 1841.

TIEFFENTHALER, JOSEPH, a Tyrolese missionary, thirty years resident in India, last century.

TIEPOLO, GIOVANNI BATISTA, called *Tiepoletto*, a celebrated Venetian painter, 1692-1769.

TIEPOLO, J., a Venetian poet, 16th century.

TIEPOLO, JACOB, a doge of Venice, distinguished as a partisan of the Guelphs, 1229-1249. LAURENT, his son, doge 1268-1275. BOHEMOND, of the same family, chief of a conspiracy against the doge,

Gradinijo, which led to the establishment of the Council of Ten, 1310.

TIEPOLO, N., a Venetian poet, 16th century.

TIERNEY, GEORGE, a distinguished statesman and political writer, was born in London, in 1756; received his education at Cambridge, and was designed for the bar. At the commencement of his public life, Mr. Tierney attached himself to the Whigs, and in 1796 he was elected M.P. for Southwark. He soon proved himself an able debater, and was one of the most formidable opponents of Mr. Pitt. In 1806 he lost his seat as member for Southwark, and afterwards successively represented Athlone, Bandonbridge, Appleby, and Knaresborough. During a debate in the year 1798, some words spoken in the house were the cause of a duel between him and Mr. Pitt, in which, however, neither party was wounded. When Mr. Addington became minister, in 1802, he made Mr. Tierney treasurer of the navy. In 1806, under the Grenville administration, he became president of the board of control, but went out of office early in the following year, on the resignation of the ministry. On the formation of the Canning ministry, he was appointed to the mastership of the mint; from which he retired, with Lord Goderich, in 1828, and died in 1830.

TIGLATH PILESER, or THEGLAT-PHALASAR, son and successor of Sardanapalus as king of Assyria, supposed date 747-728 B.C.

TIGNY, MARIN GROSTETE DE, a French naturalist, who, aided by his wife, produced a work in ten volumes on the natural history of insects, valuable as a compendium, 1736-1799.

TIGRANES, several princes of Armenia:—TIGRANES I., a friend and ally of Cyrus, B.C. 565-520. TIGRANES II., the first king of Armenia of the Arsacides' dynasty, was placed on the throne by his brother, Mithridates II., king of the Parthians; he labored many years in developing the commercial and industrial resources of the state, B.C. 128-95. TIGRANES III., called *the Great*, son of the preceding, succeeded him in B.C. 95. He married Cleopatra, daughter of Mithridates the Great, and was his faithful ally in the gigantic war with Rome; date of his death unknown. The next TIGRANES was a captive at Rome, but became king by the authorization of Augustus, and allied himself with the Parthians against their masters; died 6 B.C. His son, TIGRANES IV., occupied the throne a short time, and died B.C. 2. TIGRANES V., was a grandson of Herod, king of Judæa, and governed Armenia by sufferance of the Romans; he was put to death by order of Tiberius, A.D. 34. TIGRANES VI., another dependent of Rome, figured in history about 61. TIGRANES VII., reigned 142-178. TIGRANES VIII., succeeded, with his brother, Arsaces, about 408. In the troubles which ensued, they were both reduced to the necessity of surrendering their rights, the one to Theodosius, emperor of Constantinople, the other to the Parthians.

TIL, S. VAN, a Dutch theologian, 1644-1731.

TILENUS, DANIEL, a protestant theologian of the French church, born in Silesia, 1563-1633.

TILGHMAN, WILLIAM, chief justice of Pennsylvania, was born in Talbot county, Maryland, in 1756. In 1772 he removed to Philadelphia, and studied law, and in 1783 he was called to the bar. In 1801 he was appointed chief judge of the circuit court of the United States, in 1805 president of the courts of common pleas in the first district of Pennsylvania, and in the following year he was made chief justice of the supreme court of that State. Died 1827.

TILING, J., a German physician, 1688-1715.

TILING, M., a German naturalist, died 1685.

TILLADET, J. R. DE LA MARQUE DE, a French writer, theologian, and philosopher, 1650-1715.

TILLEMAN, PETER, a Flemish painter of landscapes and imaginary views, 1684-1734.

TILLEMAN, SEBASTIAN LE NAIN DE, a famous critic and historian of the Port Royal, author of a 'History of the Emperors and other Princes during the First Six Ages of the Church,' 'Materials towards the Ecclesiastical History of the First Six Ages,' and of much other historical matter, highly valued for extreme accuracy, 1637-1698.

TILLET, M., a French agriculturist, 1720-1791.

TILLI, M. A., an Italian botanist, 1655-1740.

TILLIOT, J. B. LUCOTTE, Seigneur Du, a French philologist and antiquary, 1688-1750.

TILLOCH, ALEXANDER, an ingenious Scotch printer, who became distinguished as a miscellaneous writer and journalist, was born at Glasgow, where his father was a tobacconist, in 1759. In the course of his business as a printer he discovered the art of stereotyping, but, finally abandoning that business, he removed to London, and in 1789 became joint-proprietor and editor of an evening paper, called 'The Star.' In 1797 he commenced 'The Philosophical Magazine,' and having, from time to time, published a series of papers on theological subjects, he added to these, in 1823, his 'Disquisitions on the Apocalypse.' In July, 1824, he commenced 'The Mechanics' Oracle,' a weekly periodical devoted to the instruction of the working-classes: he also officiated as preacher to a congregation of dissenters in Goswell-Street Road. Some years before his death, which took place in January, 1825, Tilloch was honored with the degree of LL. D. by the university of Glasgow.

TILLOTSON, JOHN, D.D., a distinguished prelate of the English Church, was a native of Sowerby, Yorkshire. His father was a clothier in that county town, and with respect to religious principles, was a nonconformist. His father having determined to give his son a liberal education, young John was sent in due time to Clare Hall College, Cambridge, where the influence of the society in which he mingled gradually dispelled his dissenting prejudices, and having resolved to adhere to the establishment, he began in earnest to prepare for the ministry in connection with the English Church. He soon rose to distinction as a preacher, and preferments flowed upon him in rapid succession—for he was first appointed to a curacy at Cheshunt, then he became rector of Reddington, preacher in Lincoln's Inn, and lecturer at St. Laurence, Jewry. Tillotson was sincerely attached to the protestant religion, and an occasion occurred for drawing out strongly his protestant spirit, when Charles II. in 1672 issued a proclamation for liberty of conscience, under the covert design of favoring the Roman Catholics. Tillotson gave a decided opposition to the measure both from the pulpit and the press. Notwithstanding this opposition to their favorite policy, the government deemed it expedient to bestow on the popular preacher the highest favors of the crown patronage by appointing him prebendary in St. Paul's, and dean of Canterbury. Tillotson evinced his protestantism on another occasion in a still more decided manner, by the advocacy of the Exclusion Bill against the duke of York. One gross inconsistency, however, sullies the otherwise honorable character and reputation of Tillotson, viz., that in attending Lord William Russell on the scaffold, he used every effort to persuade that patriotic nobleman to save

[St. Laurence Church, Jewry.]

himself by adopting the principles of passive obedience, and yet he became himself not long after, one of the most active enemies of the Stuart dynasty by promoting the revolution. The important services he rendered to the cause of the prince of Orange, were rewarded on William III. being established on the British throne, by promotion first to the deanery of St. Paul's, and not long after by his elevation in 1691 to the archiepiscopal see of Canterbury. He had enjoyed that high dignity only three years, when his useful career was brought to a premature end by death. Tillotson was the popular preacher of his day, and in so great estimation were his discourses held, that even in that age, the copyright, though it was a posthumous publication, was sold for 2,500 guineas. Tillotson adopted a moderate Arminianism, and his discourses are accordingly devoted to the inculcation chiefly of the practical precepts of the gospel. In private life the archbishop was plain and unostentatious, kind to his relatives and charitable to the poor, liberal in his sentiments towards dissenters, and exercised the very extensive influence which his character as well as his office procured him in doing good to all without regard to rank or sectarian distinctions; 1630-1694.

TILLY, JOHN TERCLES, count of Tilly, was born at the castle of Tilly, in South Brabant, in 1559. He joined the order of Jesuits in youth; but soon left the ecclesiastical for the military profession. He first entered the Spanish army, and served for several years under Alva, and the other Spanish commanders in the Netherlands. About 1599 he entered the service of the Austrian emperor, Rudolf, and distinguished himself greatly in several campaigns against the Turks and the Hungarians. He then re-organized and commanded the army of the duke of Bavaria, and was also appointed generalissimo of the forces of the Roman Catholic league in Germany. In the beginning of the Thirty years' war, Tilly subjugated Bohemia by the single great battle of the White Hill (1620). He then conquered the Palatinate of the Rhine, defeating decisively the protestant troops in the three days' battle of Stadt

Loo, 1623. He next commanded against Christian, king of Denmark, who sought to aid the German protestants. Tilly out-manceuvred and defeated him. When Gustavus Adolphus interfered in the war, Tilly was chosen to oppose the Swedish hero. He was now field-marshal, and commander-in-chief of the imperial forces. The first event of this part of the thirty years' war was the siege and capture of the city of Magdeburg by Tilly, 1631. The cruelty of the imperialist army on this occasion excited the deepest horror even in an age and country accustomed to military atrocities. Tilly himself wrote to the emperor that no such spectacle as that of the ruin of Magdeburg had been witnessed on earth, since the captures of Troy and Jerusalem. In the autumn of the same year Tilly met Gustavus Adolphus at Leipzig, and was utterly defeated, though he effected a soldierly retreat with part of his army. He was again beaten by the Swedish king at the passage of the river Lech, in 1632. Tilly was wounded in this battle, and died on the following day. He is said to have been personally of austere and pure character, despising all sensual enjoyments, and indifferent to wealth and honors. But the cruelties which he permitted his troops to exercise upon the unoffending inhabitants of the countries which were the scenes of his campaigns, show the frightful effects of military fanaticism combined with religious bigotry, even in a commander, who himself takes no part in the license and the violence which he sanctions. [E.S.C.]

TILLY, ALEXANDER DE, Count, was descended from an ancient family in Normandy, and born in 1754. He entered young into the army, and was a zealous royalist from the commencement of the French revolution. In 1792 he exerted his best abilities in defence of Louis XVI., subsequently emigrated, returned with the Bourbons in 1814, was compelled to leave France again on Buonaparte's escape from Elba, and put an end to his own existence at Brussels, in 1816. He was the author of some spirited political essays, '*Œuvres mêlées*,' '*De la Révolution Française en 1794*,' &c.

TILLY, Lieutenant-general the Count De, was also a native of Normandy, but of a different family from the preceding. Becoming a partisan of the revolution, he was made a colonel of cavalry in 1792: was sent, in 1793, to oppose the Vendéans, over whom he gained some advantages; subsequently commanded the army of the Sambre and Meuse; and was governor of Brussels, in 1796. He served in Austria, Prussia, Poland, and Spain, under the imperial government; and having accepted an appointment during the hundred days, was not employed after the second restoration of the Bourbons. Died 1822.

TIMÆUS, a Pythagorean philosopher, called 'the Locrian,' from his birth-place; known as the instructor of Plato, and highly eulogized by him. A Greek historian, of the same name, lived about 350 B.C. A third TIMÆUS was a sophist of the third century of our era, and author of a Dictionary of Platonic phrases.

TIMANTHES, a Greek painter, 400 B.C.

TIMOCREON, a comic poet, 476 B.C.

TIMOLEON, one of the greatest of Greek generals and patriots, if not the ideal of the Grecian hero, was born in Corinth about 410 B.C. His first exploit was the deliverance of Corinth from the armed dictatorship of his elder brother, Timophanes, though it was necessary to put him to death, and bear the curses of his mother, who had made the tyrant her especial favorite. Timoleon, whose mo-

tives were not understood, was execrated for his share in this tragedy, and his existence became so burdensome that he meditated self-destruction, and retired altogether from public life: the affecting narrative may be read in Plutarch. After a lapse of twenty years, 343 B.C., he was recalled by the Corinthians, and sent to the aid of the Syracusans, then suffering from the despotism of the younger Dionysius. In this expedition, success attended upon success until all Sicily was redeemed from the cruel slavery to which it had been brought, and Syracuse became the seat of a republican freedom which linked in one brotherhood all the cities that had suffered from the petty tyrants who oppressed them: the Carthaginians were also expelled, and their army of 70,000 men, led by Hamilcar and Hasdrubal, defeated by a mere handful of patriots under Timoleon. It is the conduct of the deliverer after these victories that must decide his character, and to him belongs the rare virtue of abdicating a power which he still virtually exercised as a private citizen. Forty thousand Greeks flying before the sword of Philip, the father of Alexander, were glad to accept the new home offered to them in the devastated cities of Sicily; and Timoleon, having organized the states, retired to private life, but always attended the deliberations of the people. In his latter years he went to their assemblies in a chariot, from which he also addressed them on account of his blindness: it was his highest joy that he had secured to the Syracusans perfect freedom of opinion, and the impartial operation of the laws. He was so highly honored, that his birth-day was kept as a public festival; and when he died, B.C. 337, he was buried with great magnificence at the public cost. The value of his life was soon after proved by the anarchy which began to spread, and the unruly spirits which obtained the supremacy in Syracuse. [E.R.]

**TIMOMACHUS**, a Greek painter, about 300 B.C.

**TIMON**, a Greek poet, and disciple in philosophy of Pyrrho, B.C. 270.

**TIMON**, the Misanthrope, was born near Athens, B.C. 420. It is related of him that he took a great pleasure in Alcibiades; and being asked the reason, said, 'because I foresee that he will one day be the ruin of the Athenians.'

**TIMON**, E., a Greek physician, last century.

**TIMON**, S., a famous Hungarian Jesuit, historian, and antiquary, 1675-1736.

**TIMOPHANES**, a tyrant of Corinth, who was assassinated B.C. 365. See **TIMOLEON**.

**TIMOTHEUS**, a Greek poet and musician, unrivalled in his age, 6th century B.C. He excelled in lyrical composition, and was a skilful performer on the cithara, or harp, which he improved by the addition of two chords.

**TIMOTHEUS**, called 'of Thebes,' a celebrated musician, time of Alexander the Great.

**TIMOTHEUS**, an Athenian general, who took a distinguished part in the social wars, and was condemned for avoiding a naval conflict, B.C. 358.

**TIMUR**. See **TAMERLANE**.

**TINDAL**, **MATTHEW**, one of the successors of Toland and Shaftesbury in the School of English Deists or Freethinkers, was born at Beer Ferrers in Devonshire about 1657, and was admitted doctor of laws at Oxford in 1685. He retained his fellowship during the reign of James II. by professing the Roman Catholic faith; he afterwards recanted, however, and adopting revolutionary principles, went to the other extreme, and wrote against the Nonjurors. He now became an advocate, and sat as judge in the

court of delegates, with a pension from the crown of £200 per annum. Some time afterwards, considerable attention was drawn to him, by his work, entitled 'The Rights of the Christian Church' and the ensuing controversy; but the production which has rendered his name a memorable one was his 'Christianity as Old as the Creation,' which appeared in 1730, and provoked replies from Dr. Warburton, Leland, Foster, and Conybeare. Dr. Middleton endeavored to take a middle course in this controversy, as may be seen in that article, but the most effective answer, though its very existence seems to have been forgotten, was that embodied in the 'Appeal' of William Law, published 1740. Tindal's line of argument was mainly coincident with Shaftesbury's, that the immutable principles of faith and duty must be found within the breast, and that no external revelation can have any authority equal to the internal; this he supported by much learning and show of argument, which Warburton thought he had replied to by the mass of learned evidence contained in his 'Legation.' William Law, making no account of literary evidence, replied by his masterly development of the philosophy of the fall and final recovery of mankind; a book remarkable for close argument and for its many fine illustrations, but now obsolete in certain fundamental principles. Tindal died in 1733, and was interred in Clerkenwell church, near the remains of Bishop Burnet. [E.R.]

**TINDAL**, **NICHOLAS**, nephew of the preceding, chiefly known by his translation and continuation of Rapin's History of England, 1687-1774.

**TINDAL**, **SIR NICHOLAS CONYNGHAM**, lord chief justice of the court of common pleas, was born in 1777, educated at Trinity College, Cambridge, and having become a student of Lincoln's Inn, he commenced practice as a special pleader, and in 1809 was called to the bar. He entered parliament in 1824, as member for the Wigton district of burghs; and in 1826 he was made solicitor-general, and knighted. When Sir John Copley, who had represented the university of Cambridge, was raised to the office of lord chancellor, in 1827, Sir Nicholas Tindal contested with Mr. Bankes the honor of representing his *alma mater*, and was returned by a considerable majority. Two years afterwards he was promoted to the chief justiceship, which position he occupied till his death. Died July 6, 1846, in the 70th year of his age.

**TINDAL**, **WILLIAM**. See **TYNDALE**.

**TINELLI**, T., a Venetian painter, 1586-1638.

**TINGRI**, P. F., a French chemist, 1743-1821.

**TINTORETTO**, **JACOPO ROBUSTI**, called Tintoretto from the circumstance of his father being a dyer, was born at Venice in 1512. He studied only a few days in the studio of Titian, and was then dismissed by that great painter, for what cause is not known. This circumstance had an admirable effect upon him, it made him have more decided recourse to his own resources, and his spirit is well indicated in the words he wrote upon the wall of his room:—'The drawing of Michelangelo and the coloring of Titian.' He did eventually become the acknowledged rival of Titian in Venice itself; his *Miracle of St. Mark*, the *Miracolo dello Schiavo*, his masterpiece, is now in the academy of Venice, and is generally admitted to be one of the finest pictures in Italy: there is a good print of it by J. Matham. He died at Venice in 1594, aged eighty-two. Tintoretto is sometimes called *il Furioso*, from the extraordinary vigor and rapidity with which he painted; he was bold and grand, but often careless; he is said to have had three pencils, one of gold, one of

silver, and a third of iron.—(Ridolfi, *Le Maraviglie dell' arte, &c.*) [R.N.W.]

TIPHAIGNE DE LA ROCHE, C. F., a French physician and man of letters, 1729–1774.

[Tipu Saib.]

TIPPOO SAIB, the last sultan of Mysore, was born in 1749, and made his first appearance in the field of Indian warfare at the head of 5,000 horse in 1767. His father was the sultan, Hyder Ali, a soldier of fortune, who constructed his empire out of the dominions of the great Mogul, then falling to ruins. In 1780 the progress of Hyder was arrested by Sir Eyre Coote, under the government of Hastings, and the French having joined their forces to those of the sultan, the young Tippoo became acquainted with Lally Tollendal. In December, 1782, the death of his father placed him on the throne of Mysore, and at the head of an army then in the field, of 88,000 men, supported by a sum of three millions sterling in his treasury, besides costly jewels: he continued the war with a zeal far surpassing his father's for Islamism, and in a short time not less than 100,000 persons were forcibly circumcised. In 1784 he concluded an advantageous peace with General Matthews, who surrendered to him the Nigger fort; but in 1786 he took the field again, provoked by a confederacy formed against him in Southern India, of which the Mahrattas were chief: the war on this occasion lasted till 1792, when his late defeats at Travancore and elsewhere compelled him to conclude a peace with the Marquis Cornwallis. The war upon which he had entered, however, was a religious one, and Tippoo was too sincere and courageous to surrender India without a last struggle to the Christians. It is certain that he entered into an extensive correspondence, which reached as far as Arabia, his purpose being to organize a general confederacy against the English; but it is doubtful whether he made any overtures to the French: the advantage he derived from his former acquaintance with them was realized in the superior discipline of his troops. His purpose was anticipated by the government of India, then under the marquis of Wellesley, who sent an invading army, numbering nearly 40,000 men, into his territories at the beginning of 1799. On reaching Seringapatam, his

capital, General Harris demanded the cession of half his dominions, a large payment in money, and four of his sons, besides four of his principal subjects, as hostages—terms which the sultan rejected, in alternate rage and despair, at being thus bearded in his last stronghold. A breach having been made in the walls, the storming party, of 4,000 men, was led by Sir David Baird on the 4th of May, and Tippoo Saib, resolving not to survive the loss of his kingdom, met the fate of a hero in the thickness of the conflict; his body was found amid heaps of slain, and interred with royal honors in his father's sepulchre, after which the empire of Mysore was dismembered. The reader desirous of further particulars may consult Murray's *History of British India* in the Edinburgh Cabinet Library, 1832, 2d edition, 1850; or Thornton's *History of the British Empire*, in India, 1842. For the due appreciation of Tippoo's character, and the correction of some facts, compare the '*History of Tippoo Sultan*, translated from the Persian of Myr Houssein by Colonel Miles,' 1845. [E.R.]

TIPTOFT, JOHN, earl of Worcester, a patron of learning in the 15th century, was appointed lord-deputy of Ireland by Henry VI., and afterwards became lord high constable and lord high treasurer. After this he went on a pilgrimage to Jerusalem, and on his return presented many valuable manuscripts to the university of Oxford. On the temporary reverse of fortune experienced by Edward IV., and the house of York, he was accused of cruelty in his Irish administration, particularly towards two infant sons of the Earl of Desmond, and condemned to lose his head on Tower Hill, which sentence was executed, Oct. 18, 1470. He wrote many works, and was the great patron of Caxton the printer.

TIRABOSCHI, GIROLAMO, a famous historian of Italian and Roman literature, was born at Bergamo, in 1731. His chief production is '*The History of Italian Literature*.' Died 1794.

TIRIN, J., a Flemish Jesuit, 1580–1636.

TISCHBEIN, J. A., a German painter and writer, 1720–1784. His brother, JOHN HENRY, founder of a new school similar in character to the Venetian, 1722–1789. J. H. CONRAD, their nephew, a painter and engraver, 1742–1808. J. H. WILLIAM, brother of the latter, known from 1751 to 1803. J. F. AUGUSTUS, a third brother, a painter of portraits, 1750–1812.

TISSARD, F., a French *savant*, died 1508.

TISSARD, P., a French poet, 1666–1740.

TISSOT, A. P., a French jurist, 1782–1823.

TISSOT, C. J., a French physician, 1750–1826.

TISSOT, J. M., a mathematician, died 1650.

TISSOT, SIMON ANDREW, an eminent physician and medical writer, was born at Grancy, in the Pays de Vaud, in 1728. He was chiefly distinguished by his successful treatment of the confluent small-pox. He wrote several excellent professional works, was three years medical professor at Pavia, and refused advantageous offers made him by the kings of England and Poland to quit Lausanne, where he died in 1797. His works were collected by himself, and form 10 vols.

TITI, R., an Italian poet, 1551–1609.

TITI, or TITO, SANTI DI, a distinguished Italian painter and architect, 1538–1603.

TITIAN, or TIZIANO VECELLIO, one of the greatest of Italian painters, and the prince of colorists and portrait painters, was born in the territory of Venice at Capo del Cadore in 1477. He studied in the school of the Bellini, first with Gentile and afterwards with Giovanni, with whom he was fellow pu-

pil with Giorgione, his own future rival. Titian first appeared as a great painter at the court of Alfonso I., duke of Ferrara, in 1514, when he painted the 'Bacchus and Ariadne,' in the National Gallery. Two years later he had attained to the full vigor of his extraordinary powers; in that year he executed his celebrated 'Assumption of the Virgin,' now in the academy of Venice, and hanging opposite to the *Miracolo dello Schiavo* by Tintoretto; the merits of both masters are well illustrated by the contrast. In 1528 Titian painted his 'St. Peter Martyr,' in which he has shown himself one of the first of landscape painters, especially of landscapes as an accessory to figures. In 1545 he visited Rome, where he saw Michelangelo; he returned to Venice in the following year. He is supposed also to have visited Spain, but this is doubtful; Spain is, however, extremely rich in the masterpieces of Titian; after Venice, the gallery of the Prado at Madrid gives the greatest display of his powers. It has been assumed that Titian visited Spain partly from the fact of the patent of nobility, granted by Charles V., creating him Count Palatine of the empire, and knight of the order of St. Iago, being dated at Barcelona. This great painter died at Venice of the plague, in 1576, having lived to the extraordinary age of ninety-nine years. To describe fully his masterpieces alone, would occupy a volume; of his scholars, Paris Bordone, Bonifazio Veneziano, Girolamo di Tiziano, and his own son Orazio Vecellio, were able painters—(Vasari; Ridolfi; Zanetti, *Della Pittura Veneziana*, &c.; Cadorin, *Della amore ai Venezianai di Tiziano Vecellio*; Northcote, *Life of Titian*, 1830.) [R.N.W.]

TITIUS, G. G., a German jurist, 1661–1714.

TITON DU TILLET, EVERARD, a master of polite literature and patron of letters, projector of a French Parnassus in honor of Louis XIV., a description of which he published, 1677–1762.

TITSINGH, J., a Dutch traveller, 1740–1812.

TITTEL, G. A., a Ger. philosopher, died 1816.

TITTMANN, JOHN AUGUSTUS HENRY, a German professor of theology, au. of 'Encyclopädie der Theologischen Wissenschaften,' 1773–1831.

TITUS, a disciple of Paul, and preacher of the Gospel in Dalmatia, 1st century.

TITUS LIVIUS. See LIVY.

TITUS, FLAVIUS VESPASIANUS, emperor of Rome, was the eldest son of the emperor Vespasian: he was born in the year 40, and educated with Britannicus at the court of Nero: like the latter, he gave way to vices which afforded little promise of a happy reign. From 67 to 70 he was carrying on the war in Judæa, the whole conduct of which devolved upon him on his father's election as emperor. The capture of Jerusalem, on September 2, of the year last mentioned, brought this struggle to a close, after which Vespasian and Titus were both honored with a triumph. It is almost unnecessary to mention that the fullest details of this war, the unparalleled cruelties and sufferings with which it was attended, may be read in Josephus; the episode on the passion of Titus for Berenice will be found in Suetonius. On the death of Vespasian in 79, Titus succeeded as emperor, commencing, by repeated proofs of his reformation, one of the most princely and beneficent reigns in the annals of Rome; for this the wisdom of his father was partly to be thanked, he having associated Titus with him in the empire, and developed the nobler traits of his character by the generous trust reposed in him. In the year of his succession the great eruption of Vesuvius took place, which buried Herculaneum, Stabiae, Pompeii,

and other towns beneath its ashes; in the following year a fatal epidemic and a fearful conflagration occurred in Rome, and in the next again, September 13, 81, Titus expired, perhaps of poison, and was succeeded by his brother, Domitian: the hopes he had excited were so great that his death was mourned as a public calamity, a rare honor for an emperor of Rome. [E.R.]

TIZIANO VECELLI. See TITIAN.

TOALDO, J., an Italian astrologer, 1719–1798.

TOBIN, A. M. DE, a Sp. painter, 1678–1758.

TOBIN, JOHN, a solicitor, born at Salisbury, author of 'The Honey Moon,' 'All's Fair for Love,' and several other plays, 1770–1804. JAMES, his brother, a poet, died 1815.

TOD, JAMES, a lieutenant-colonel in the service of the East India Company; author of 'Annals of Rajasthan' and 'Travels in Western India,' the latter of which was scarcely completed when he died, Nov. 1835. Colonel Tod surveyed Rajpootana, and completed his magnificent map in 1815; and it was by him that the name of Central India was originally given to that important and interesting tract of country. He was a sound scholar; indefatigable in research and enthusiastic in his zeal to benefit the people for whom he labored.

TODD, HUGH, vicar of Stanwix, in Cumberland, au. of a 'Description of Sweden,' 1658–1728.

TODE, H. J., a German naturalist, 1738–1797.

TODE, J. C., a Ger. medical writer, 1736–1805.

TOFINO DE SAN MIGUEL, a Spanish astronomer, was born at Carthage, in 1740; entered the naval service, and became brigadier-general of the marine forces. During the American war he was employed in surveying the Spanish coasts, and died in 1806. He is the author of 'Astronomical Observations made at Cadiz,' and other works.

TOINARD, N., a Fr. antiquarian. 1629–1706.

TOLAND, JOHN, one of those learned free-thinkers who rendered themselves conspicuous after the publication of Locke's philosophy, was born in Ireland, of Roman Catholic parents, in 1669. As early as his sixteenth year, he shook off the superstitions in which he had been educated, and in consequence of this change, completed his education at Glasgow and Edinburgh, taking the degree of M.A. in the latter university in 1690. At Leyden, where he next passed two years, he made the acquaintance of Leclerc and Leibnitz, and returning to England again, published, in 1695, his 'Christianity not Mysterious.' This work was launched forth in the midst of a controversy concerning Socinian principles—that in which South, Sherlock, Wallis, Howes, Cudworth, and others, took part,—and was designed to show 'that there is nothing in the Gospel contrary to reason, or above it, and that no Christian doctrine can be properly called a mystery.' Attacks were made upon the author from all sides, the grand jury of Middlesex answered his work in a 'Presentment,' and the Irish Parliament ordered it to be burnt by the hangman. Toland had gone to Dublin to escape the storm raised against him, chiefly by the Dissenters, in London, and he was now compelled to return to avoid a prosecution by the attorney-general of Ireland: thus alienated from all parties he declared himself a 'Latitudinarian,' though he always professed himself a Christian. His subsequent works were a 'Life of Milton,' which accompanied an edition of that author's prose works, 'Amyntor,' 'Origines Judaicæ,' 'The Philosophy of the Ancients,' 'Hypatia,' 'Nazarenus,' 'History of the Soul's Immortality among the Heathens,' 'The Origin and Force of

Prejudices,' and numerous political pamphlets. His principal object, so far as these bore on religion, was to sustain his original controversy, and destroy the authority of the Books of Scripture, deemed canonical: but he was a vain man, proud of distinction, however obtained, and was probably more concerned about the great names he could associate with his own, than the principles he professed. He died at Putney in the fifty-third year of his age, 1722. In this neighborhood resided the Gibbons, Bolingbroke, and Mallets. [E.R.]

TOLEDO, FERNANDO ALVAREZ DE, duke of Alba, or Alva. See ALVA.

TOLEDO, F. DE, a Spanish viceroy of Peru, died in prison after his return home, 1581.

TOLEDO, J. DE, a Spanish painter, died 1645.

TOLEDO, DON P. DE, Spanish viceroy of Naples under Charles V., 1484-1553. PETER, of the same family, ambassador in 1608.

TOLER, JOHN, Earl of NORBURY, chief justice of the court of common pleas in Ireland, was born in 1745, at Beechwood, in the county of Tipperary. He was called to the bar in 1770; appointed king's counsel in 1781, solicitor-general in 1781, attorney-general in 1798, during which year he was actively engaged in the prosecution of the Irish rebels; and was advanced to the chief justiceship of the common pleas in 1800, with the title of lord Norbury. This high office he retained till 1827, when, on his retirement, he obtained a pension of 3046*l.*, and was advanced to the title of viscount Glandine and earl of Norbury. He died in 1831. He was an able judge; but he was chiefly known from his reputation for wit and drollery, and was consequently compelled to appear as the parent of many an illegitimate pun in the newspapers. It is perfectly true, however, that 'Lord Norbury's jokes' were sprinkled very thickly with his law, and the Dublin court of common pleas was often thronged with idlers attracted by the amusement which was to be found in the sallies of wit and repartee so freely bandied about from judge, counsel, and witnesses.

TOLET, F., a Spanish cardinal, 1532-1596.

TOLET, F., a French physician, died 1724.

TOLET, J., an English cardinal, died 1274.

TOLLET, ELIZABETH, an accomplished English lady, author of *Poems*, 1694-1754. Her nephew, GEORGE TOLLET, author of valuable *Notes on Shakespeare*, died 1779.

TOLLIUS, CORNELIUS, a Dutch philologist, born about 1620, died 1662. His brother, ALEXANDER, also a philologist, died 1675. JAMES, a physician, was born near Utrecht, in 1630. He became professor of eloquence and Greek at Brandenburg, and died in 1696. Among his works are, '*Epistolæ Itinerariæ*' and '*Fortuita Sacra*.' In this last he evinced an extraordinary degree of credulity, by supposing that the secret of the philosopher's stone was concealed under the mythology of paganism.

TOLOMEI, J. B., an Italian Jesuit, cardinal, and statesman, 1655-1726. NICHOLAS, of the same family, a Jesuit and ecclesiastical writer, 1699-1774.

TOLOMMEI, CLAUDIO, an Italian master and promoter of polite literature, 1492-1555.

TOMASELLI, J., an Ital. naturalist, 1733-1818.

TOMASINI, GIACOMO FILIPPO, bishop of Citta Nuova, a biographical writer, 1597-1654.

TOMBES, J., a nonconformist divine, 1603-1676.

TOMLINE, GEORGE, an eminent English prelate, whose family name was Prettyman, was born at Bury St. Edmund's, in Suffolk, in 1750. He was senior wrangler at Cambridge, in 1772; and having been chosen a fellow of Pembroke College in

1781, he served the office of moderator. He had been the academical tutor of Mr. Pitt, who, on becoming chancellor of the exchequer, made him his private secretary, gave him the living of Sudbury, and a prebend of Westminster, and, in 1787, raised him to the see of Lincoln; from which, in 1820, he was translated to that of Winchester. In 1799 he published a work, entitled '*Elements of Christian Theology*,' 2 vols.; and in 1812 appeared his '*Refutation of the Charge of Calvinism against the Church of England*.' He also published the '*Life of the Right Hon. William Pitt*.' He took the name of Tomline, in consequence of a person, to whom he was almost unknown, having bequeathed him a very considerable fortune on that special condition.

TOMLINS, ELIZABETH SOPHIA, a poetess, novelist, and miscellaneous writer, was born in London, 1768. She wrote '*The Victim of Fancy*,' and other novels; '*Tributes of Affection*,' and much fugitive poetry in various periodicals. She also translated the first history of Napoleon Buonaparte that ever appeared in England, and part of Anquetil's *Universal History*. Died 1828.

TOMPKINS, DANL. D., vice-president of the United States, was born June 21, 1774, and graduated at Columbia College in 1795. Having studied law, he practised at New York. In the party struggles of 1799 he took a prominent part. In 1803 he was appointed chief justice of the superior court of New York, and, in 1807, he was elected governor. In 1817 he was chosen vice-president of the United States, and retired from public life in 1825, in which year he died.

TONDUZZI, J. C., an Ital. historian, 1617-73.

TONE, THEOBALD WOLFE, an Irish revolutionary politician, and founder of the '*Society of United Irishmen*,' was born in Dublin, in 1763, and was bred to the bar. In 1790 he published a pamphlet, the object of which was to expose the mismanagement of the English government regarding Ireland; and, in 1793, he established the society above mentioned. He afterwards became involved in a treasonable correspondence with France, but made a sort of compromise with the English government, and was allowed to withdraw himself. He accordingly came to America in 1795, from whence he proceeded to France in the following year. By his persuasions, the French directory fitted out an expedition, consisting of 17 sail of the line, 13 frigates, &c., with 14,000 troops on board, and upwards of 40,000 stand of arms, besides artillery and warlike stores. Tone was appointed chef de brigade, under General Hoche, the commander-in-chief. They set sail Dec. 15, 1796; but, before they had all reached their destinations (Bantry Bay), a hurricane arose, in consequence of which three ships of the line and a frigate only remained together. This bold attempt being thus frustrated by the elements, the scattered ships made the best of their way back to France, and Tone was foiled in all his future endeavors to persuade the French government to undertake another expedition on a large scale. But he still persevered in those plans which he conceived would lead to a separation of Ireland from Great Britain; and he at length embarked in one of those petty armaments, the inefficiency of which, he thought, perhaps, might be remedied by his own courage and experience. He was taken prisoner in the *Hoche*, after fighting bravely in a desperate action, was tried by a military commission, and sentenced to be hanged. The execution of his sentence, however, he avoided, by cutting his own throat in prison, Nov. 19, 1798.

TONSTALL. See TUNSTALL.

TOOKE, ANDREW, a learned schoolmaster and mathematician, born in London 1673, died 1731.

TOOKE, JOHN HORNE, a political character of very considerable consequence in the last century, noted in the literary world as a grammarian and philologist, was born in Newport-Street, Westminster, where his father was a poulterer, in 1736. His education having been completed at Cambridge, he entered into orders, and became, in 1760, vicar of Brentford in Middlesex. He was never sincerely attached to the church, however, but bestowed the greater part of his time on law and politics, for which the factious nature of the times, and the supposed designs of George III. and Lord Bute afforded abundant scope. From 1765 to 1767 he published his philippics against the court and the chief justice, Lord Mansfield, in favor of Wilkes the popular idol, and soon after made the acquaintance of that gentleman, as well as of Voltaire and Sheridan, on the continent. In 1770 and 1771, a period of great political excitement in London, he founded the Society for Supporting the Bill of Rights; this produced a rupture between him and Wilkes, in consequence of the selfish advantages sought by the latter; about the same time he promoted the publication of the Debates in Parliament, in defiance of the House of Commons. From 1773 to 1782 he was of course the avowed enemy of the administration of Lord North and the friend of the American patriots; in this interval he underwent a year's imprisonment and a fine of £200. The most important event of his life was his trial for high treason, in conjunction with Hardy; this took place at the Old Bailey in 1794, and was remarkable for the ability and self-possession with which Mr. Tooke defended himself; it ended in an acquittal, and he afterwards numbered among his friends Sir Francis Burdett and Major Cartwright. In 1801 he became member of parliament for a nomination borough, having failed in two previous attempts as a candidate for the popular suffrages. Nothing particular marked his subsequent career, and he died at Wimbledon, having first destroyed all his MSS., in 1812. His greatest literary work is his 'Diversions of Purley,' first published in 1786; attempts have been made to prove that he was the real 'Junius.' [E.R.]

TOOKE, Rev. WILLIAM, a miscellaneous writer, was born in 1744, at Islington. He was originally a printer; but, in 1771, he obtained episcopal ordination, and was appointed minister of the church at Cronstadt. In 1774 he became chaplain to the factory at St. Petersburg; and, after residing there many years he returned to his own country, and died in 1810. His principal works are, 'Varieties in Literature,' 2 vols.; 'The Life of Catharine II.,' 'A View of the Russian Empire,' 'A General History of Russia,' and translations of Lucian and Zollikoffer's Sermons and Prayers.

TOPFER, H. A., a Ger. philosopher, 1758-1833.

TOPHAM, E., an English writer, died 1820.

TOPINO-LEBRUN, F. J. B., a French historical painter, perished on the scaffold, 1769-1801.

TOPLADY, AUGUSTUS MONTAGUE, a celebrated Calvinistic divine and controversial writer, was born at Farnham in Surrey, 1740, and became vicar of Broad Hembury in Devonshire, where he composed most of his writings, in 1762. In 1775 he removed to London, and from that period officiated at the chapel of the French Reformed, near Leicester Fields. Died August 11, 1778.

TOPPI, N., an Italian historian, 1603-1681.

TORDENSKIOLD, PETER, whose family name was WESSEL, was a celebrated Danish admiral, born

in 1691, at Drontheim, in Norway; and was killed in a duel, in 1720. For his gallant exploits his sovereign gave him the name of Tordenskiold compounded from words signifying thunder and shield. Among his achievements were the capturing of a Swedish squadron in the port of Dycekiln, and the taking of the town of Marstrand and the citadel of Carlstein.

TORELLI, GIUSEPPE, an Italian writer, was born at Verona, in 1721. Besides the Hebrew, Greek, and Latin languages, he was well acquainted with French, Spanish, and English; and he had also an extensive knowledge of antiquities; but his favorite study was the mathematics, of his proficiency in which a proof has been given in his edition of the works of Archimedes, printed in folio, at Oxford. He died in 1781. Torelli translated Æsop's Fables into Latin, and the first two books of the Æneid into Italian.

TORELLI, L., an Ital. biographer, 1609-1683.

TORELLI, L., an Italian jurist, 1489-1576.

TORELLI, P., an Italian poet, 1536-1608.

TOREN, OLAUS, a Swedish naturalist and traveler in the East Indies, died 1753.

TORENO, COUNT JOSE DE, known also as the Vicomte de Mattarosa, a distinguished Spanish statesman and historian, was born at Oviedo, 1786; bore a share in all the troubles of his country in the early part of this century; and was repeatedly proscribed by the despotic advisers of Ferdinand VII. But on the accession of the queen he once more returned to Madrid, where he was nominated minister of finance, and soon afterwards of foreign affairs, which he held till 1835. His latter years were spent at Paris, where he published his interesting 'Histoire de Soulèvement d'Espagne.'

TORFÆUS, THORMODUS, in Icelandic THORMODUS TORFASON, or THORROD TORVESEN, a learned historian of Norway, 1648-1719.

TORNIEL, or TORNIELLI, AUGUSTUS, general of the Barnabites, and writer of annals, 1543-1621.

TORNIELLI, J. F., an Italian poet, 1693-1752.

TORQUEMADA, JOHN DE, in Latin *Torrecremata*, a Spanish cardinal, confessor to Isabella of Castile, 1388-1468. A Franciscan friar, of the same names, published a 'History of the Wars and Discoveries in the West Indies,' 1615.

TORQUENADA, THOMAS DE, the first inquisitor-general of Spain, whose memory is rendered infamous for barbarity, was born in 1420. He was a monk of the order of St. Dominic, became inquisitor-general in 1483, and died in 1498. During the exercise of his power, in the course of 16 years, it is said that no less than 8,800 victims were committed to the flames, 90,000 were condemned to perpetual imprisonment and other severe punishments, and above 800,000 Jews were banished from Spain.

TORRE, BERNARDO DELLA, an ecclesiastical writer, chaplain to Murat, 1736-1820.

TORRE, FILIPPO DEL, an Italian antiquary and master of polite literature, 1657-1717.

TORRE, GIOVANNI MARIA DELLA, an eminent natural philosopher, was born at Rome; studied at the Clementine College; became professor of philosophy and the mathematics at Ciudad de Friuli; and afterwards, settling at Naples, was appointed librarian to the king, superintendent of the royal printing office, and keeper of the museum. He made great improvements in the magnifying power of microscopes, and published works on 'Natural Philosophy,' 'Microscopical Observations,' &c. Died 1782.

TORRENS, SIR HENRY, adjutant-general, was born at Londonderry, in 1779; received his education in the military academy at Dublin; entered as

an ensign in the 52d regiment of foot ; and, going to the West Indies, was early distinguished for bravery in actual service, and for courage in enduring hardships. He afterwards served in Holland, where he was wounded ; next proceeded to join the army in Egypt ; thence embarked at a port of the Red Sea for Bombay ; but being seized with a coup-de-soleil, he was obliged to take his passage to England. The ship touched at St. Helena, where, recovering his health and spirits, he married Miss Patton, the governor's daughter. He was present at the attack on Buenos Ayres, and gave his testimony on the trial of General Whitelock in a manner that evinced his judgment and integrity. He was appointed secretary to Sir Arthur Wellesley, and accompanied him to Portugal. In March, 1820, Sir Henry was made adjutant-general, in which situation he revised the army regulations, and introduced many essential improvements. Died 1828.

TORRENTINUS, HERMANN VAN BECK, called a Dutch *savant*, author of the earliest attempt at an historical dictionary, 1450-1520.

TORRENTIUS-LÆVINUS, otherwise LIEVIN VANDER BEKEN, a Belgian prelate, philologist, and Latin poet, 1525-1595.

TORRICELLI, EVANGELISTA, a celebrated Italian mathematician, was born in 1608, at Faenza ; began his education under the Jesuits there, and completed it at Rome ; was invited to Florence by Galileo, and succeeded that eminent man as professor of mathematics. The grand-duke also appointed him his mathematician. He wrote several geometrical works, and to him science is indebted for the invention of the barometer.

TORRIGIANO, PIETRO, a Florentine sculptor, of great eminence, was born in 1472. Being a fellow student with the famous Michel Angelo Buonarrotti, a dispute arising from a jealousy with respect to their comparative proficiency, terminated in blows ; one of which, from the hand of Torrigiano, broke the bridge of his antagonist's nose. While in the zenith of his reputation he went to England, which he afterwards quitted for Spain, and there fell into the hands of the Inquisition, being denounced as guilty of impiety and sacrilege in breaking to pieces a statue of the Virgin, which he had himself executed for a nobleman, who afterwards refused to pay him an adequate price. He was condemned to the stake, but avoided the torture of a public execution by starving himself in prison, previously to the celebration of the *auto da fe*, in 1522. The beautiful tomb of Henry VII., in Westminster Abbey, is the work of Torrigiano.

TORRIGIANO, T., a physician, 1270-1350.

TORRIJOS, DON JOSE MARIA, a Spanish patriot, who served against the French during the war of independence, and gradually passing through the inferior posts, obtained the rank of colonel on the field of battle. He was in disgrace after the return of Ferdinand VII. ; but, in 1820, the Cortes made him field-marshal, and chief commandant of Navarre and the Basque provinces. When the French invaded Spain, Torrijos held out to the last ; he signed the capitulation of Carthagena after Cadiz had surrendered, and gave up his arms to General Mina ; but having subsequently resolved to renew his efforts for the liberation of Spain, he quitted his asylum at Gibraltar, and on repairing to Malaga, he and his companions were made prisoners, tried by a court-martial, and shot.

TORRINGTON, GEORGE BYNG, Viscount, was the son of John, the fifth Viscount Torrington, and was born in London, in 1768. He was entered a

midshipman on board the Thunderer at 10 years of age, and was present in the action between Admiral Keppel and the Count d'Orvilliers, on the 27th July, 1778. He joined the flag-ship of Sir Edward Hughes, in the East Indies, and was in the actions with M. Soufferin. In June, 1795, he was made post-captain ; in 1797 he had the command of the Galatea frigate, in which he captured a French corvette, and some armed vessels ; but ill health compelled him to resign the command in 1802. In December, 1812, his uncle, the fourth viscount, died, to whose title his father succeeded ; but he dying 14 days after, Captain Byng became Viscount Torrington. He at that time commanded the Warrior, in which ship he conveyed the Prince of Orange from the Downs, in Nov. 1813, and landed him at Schwelling. After that service, he convoyed a fleet of merchant ships to the West Indies. During that period a promotion took place, which made him rear-admiral of the blue, and he was made vice-admiral in 1821. He died in 1831.

TORRUBIA, JOSE, a Spanish Franciscan, historian, and naturalist, died 1768.

TORSINELLO, H., an Ital. historian, 1545-99.

TORSTENSON, LEONARD, Count, a Swedish general, time of Gustavus Adolphus, 1595-1654.

TORSTI, F., an Italian physician, 1658-1741.

TOSCAN, G., a French horticulturist, 1756-1826.

TOSCANELLA, PAOLO DEL POZZO, an astronomer of Florence, time of Columbus, 1397-1482.

TOSCHI, PAOLO, an Italian emperor, died 1854.

TOSELLI, F., an Italian biographer, 1699-1768.

TOSHI, D., an Italian theologian, 1535-1620.

TOSSANUS. See TOUSSAIN.

TOTILA, king of the Ostrogoths in Italy, succeeded to the throne in 541. He overran Italy, and took possession of Rome. At length the emperor Justinian, resolving to free Italy, recalled Belisarius from the Persian war, and dispatched a powerful army to its relief, under the able and valiant Narses, with which he advanced directly towards Rome. The opposing forces met, and a furious battle took place ; the army of Totila was totally vanquished, and being overtaken in his flight by a party of Gepidæ, their commander, Ashbad, ran him through the body with a lance ; and with him expired the revived glory of the Goths in Italy, A.D. 552.

TOTT, CLAUDE AKESON, a Swedish general distinguished against the Russians in 1573, died 1596.

TOTT, CLAUDE, Count, a Swedish senator and ambassador, time of Christina, 1616-1674.

TOTT, FRANCIS, Baron De, a French negotiator and officer, was born, in 1733, at Chamigny, and after having served in the army, was employed in the French embassy at Constantinople. In 1767 he was appointed consul in the Crimea. He subsequently went back to Constantinople, and was charged by the grand seignor to carry into effect various important reforms in the military department. He was promoted on his return to France, but emigrated in 1790, and died 1793.

TOTZE, E., a Prussian historian, 1715-1789.

TOULLIER, C. B. M., a Fr. jurist, 1752-1835.

TOULMIN, JOSHUA, successively a baptist and unitarian minister, editor of a new edition of Neale's History of the Puritans and other works, 1740-1815.

TOUP, JONATHAN, a classical scholar and critic, born at St. Ives, in Cornwall, 1713, died 1785.

TOUR, B. DE LA, a French preacher, last cent.

TOUR, BAILLET, Count De La, an Austrian general, time of Joseph II., died 1806.

TOUR, J. B. BONNAFAS DE LA, a French Jesuit preacher and religious poet, 1712-1777.

TOUR, MAURICE. See DELATOUR.

TOUR, THEODORE. See LATOUR.

TOUR D'AUVERGNE, THEOPHILUS MALO CORRET DE LA, called *the first Grenadier of France*, and long the terror of the enemy in Spanish warfare, 1743-1800.

TOURLET, R., a French Hellenist, 1770-1836.

TOURNEFORT, JOSEPH PITTON DE, a celebrated botanist, was born at Aix in Provence in 1656. He died in 1708. He was destined by his parents for the church, but at the death of his father he chose the profession of medicine. Botany was his favorite study, and to the prosecution of this, he ultimately devoted his life. He travelled in quest of plants over the Alps and Pyrenees, through Spain and Portugal; and afterwards visited Holland and England. He had for many years the superintendence of the Jardin du Roi, and lectured on botany to a numerous throng of students. Tournefort was one of a celebrated triumvirate of botanists which the end of the 17th and beginning of the 18th centuries produced. Ray in England, Rivinus in Germany, and Tournefort in France, were contemporaries and correspondents, and botany is much indebted to their labors for the progress it has since made. Tournefort's method of classification of plants is derived almost entirely from the flower, and, considering the time in which it was published, possesses very great merit. In France he is esteemed as much as Ray is in England; and the two philosophers are justly reckoned each the pride of their country. In 1700 he was selected, under royal patronage, to proceed to the Levant, to investigate the plants mentioned by ancient writers and to discover new ones. His journey occupied more than two years, during which he made a large collection of plants and other objects of natural history; and upon his return he was nominated professor of medicine at the college of France. His chief botanical works are the 'Elements de Botanique,' and the 'Institutiones Rei Herbariæ,' which possess great merit. Plumier named a genus of plants after him, Pittonia; but Linnæus afterwards changed it to Tournefortiæ, which it now retains. [W.B.]

TOURNELY, H., a Fr. theologian, 1658-1629.

TOURNEMINE, R. J. DE, a learned Jesuit, author of 'Reflections on Atheism,' 1661-1739.

TOURNEUR, P. C., a Fr. translator, 1736-88.

TOURNIE, J. J., a Fr. mechanician, 1690-1770.

TOURNON, C. T. MAILLARD DE, an Italian cardinal and legate to India and China, 1668-1710.

TOURNON, F. DE, a French cardinal and diplomatist, time of Henry VIII., 1489-1562.

TOURNON, P. C. CASIMIR MARCELLIN, Count De, a French statesman, died 1833.

TOURON, A., a French biographer, 1688-1775.

TOURRETTE, MARC-ANTOINE LOUIS CLARET DE LA, a French naturalist, 1729-1793.

TOURTELLE, S., a French physician, author of a 'Philosophical History of Medicine,' 1756-1801.

TOUSSAIN, DANIEL, in Latin *Tossanus*, a learned protestant theologian, 1541-1602. PAUL, his son, author of a Life of the elder Toussain, and of various controversial works, died 1629. JAMES, a learned Hellenist, died 1547.

TOUSSAINT, F. V., a French deist, 1715-1772.

TOUSSAINT DE SAINT LUC, the father, a Carmelite and ecclesiastical historian, died 1694.

TOUSSAINT, L'OUVERTURE, was a negro, the son of African slave parents, and was himself a slave in St. Domingo during the greater portion of his life. He is said to have been born in 1743. When the revolt of the blacks broke out in that

island in 1791, Toussaint joined his fellow-countrymen; but he did not sully himself by participation in any of the atrocities that marked the furious struggle of blacks, mulattoes, and whites, each against the other two races, by which the unhappy island was devastated. Toussaint, by his courage and generalship in the field, and still more by his eloquence, his knowledge of character, and his political skill and firmness, made himself chief of the negroes, who were the victorious party in the war. He reduced the part of the island, that had belonged to the Spaniards, into complete submission. He formed and maintained a regular army of black soldiers, and black officers, disciplined after the European model; and revived some slight degree of the commerce, by which St. Domingo had once been enriched. By introducing a strict system of compulsory labor among the negroes, whom he allowed to receive a fourth part of the produce of their toil, he secured the blessing of industry for the land and the people, while the blacks still prided themselves on being no longer the slaves of the white men. He maintained rigid military discipline, and administered justice with stern and impartial vigilance. Notwithstanding the severity of his rule, he was idolized by the negroes, who regarded him as a type of the eminence which their race was fitted to attain. Toussaint preserved a nominal allegiance to France, and assiduously courted Buonaparte's favor after the establishment of the consulate. But Napoleon was resolved to reduce St. Domingo into thorough submission as a colony, and after the peace of Amiens, in 1801, an army of 35,000 troops, under General Le Clerc, was sent on board a powerful fleet from the French ports against the island. Toussaint and his followers resisted for a time with valor and skill; but several of the negro generals deserted

[Castle of Joux.]

their chief, and at last Toussaint made his submission, and retired to a farm in the interior, leaving the French acknowledged masters of St. Domingo. For two months Toussaint lived in retirement, but the French were jealous of his possible influence over the negroes, and, on July 5, 1802, Le Clerc caused Toussaint to be arrested, and sent him a prisoner to France. He was confined in the castle of Joux, in the Jura mountains, where he died on the 27th April, 1803. Toussaint L'Ouverture is a bright example of the intellectual energy and greatness of which the maligned negro race is capable; and his fate is one of the saddest among the many melan-

choly proofs of the guilt and meanness which have marked Europeans in their dealings with their African brethren. [E.S.C.]

TOUSTAIN, C. F., a learned Benedictine, author of a '*Traité de Diplomatie*,' 1700-1754.

TOWERS, JOSEPH, a miscellaneous and political writer, born in Southwark, where his father was a dealer in second-hand books, 1737, died 1799. Towers began life as a printer, but became a preacher among the dissenters, and his merits were recognized by the degree of LL.D., conferred upon him by the university of Edinburgh. Among his works are '*A Review of the Genuine Doctrines of Christianity*,' '*A Vindication of the Political Opinions of Locke*,' and some articles in the *Biographia Britannica*.

TOWERSON, G., a theologian, died 1697.

TOWGOOD, MICAJAH, a dissenting minister, and famous advocate of the principle of separation from the Established Church; born in Devonshire 1700, died 1792.

TOWNLEY, CHARLES, a gentleman of Lancashire, who is numbered in the ranks of English scholars and connoisseurs, was born at the seat of his ancestors, 1737. He resided many years at Rome, where he collected the valuable marbles now in the British Museum, and known as the Townley Collection; died 1805. His uncle, JOHN, was an officer in the French army, and translated *Hudibras* into the language of his adopted country; died 1782.

TOWNLEY, JAMES, rector of St. Bennet's, Gracechurch-Street, and subsequently master of Merchant Tailors' school, known as a dramatic writer, and chiefly by his piece, entitled '*High Life Below Stairs*,' 1715-1778.

TOWNSEND, JOHN, founder of the deaf and dumb asylum, was born in London, in 1757. He settled as a minister to an independent congregation at Kingston, in Surrey, whence, in 1784, he removed to Bermondsey, where he continued to reside during the remainder of his life. With the assistance of the Rev. H. C. Mason, parochial minister of Bermondsey, he, in 1792, founded the institution for the deaf and dumb children of indigent parents; which excellent charity obtained such efficient patronage, that, in 1807, an edifice, since much enlarged, was erected under the auspices of the late Duke of Gloucester. Mr. Townsend also actively assisted in the formation of the Missionary Society, the Female Penitentiary, and other religious and charitable associations; besides instituting a congregational school, for the gratuitous education of the children of necessitous dissenting ministers. He was a coadjutor with the Rev. Mr. Mason in his '*Family Bible*,' and was the author of '*Hints on Sunday Schools and Itinerant Preaching*,' '*Nine Discourses on Prayer*,' &c. Died 1826.

TOWNSEND, JOSEPH, a minister of the Church of England, educated as a physician under Dr. Cullen at Edinburgh. He was first interested in religion by the movement of the Wesleyans, and for some time acted as chaplain to Lady Huntingdon, and preached in her chapel at Bath; after which he obtained the living of Pewsey. He wrote several works, and died 1816.

TOWNSON, Dr. THOMAS, a distinguished clergyman of the established church, was a native of Essex, and born in 1715. Through the influence of Dr. Porteus, bishop of London, he obtained some valuable church preferment, of which the livings of Hatfield, Peverill, and Malpas were a part. He published several devotional tracts of great merit, a series of sermons on the Gospels, and a posthumous treatise on evangelical history. Died 1792.

TOWSTON, W., an English traveller, 16th cent.

TOZER, H., a puritan divine, 1602-1650.

TOZZETTI, G. T., an Ital. botanist, 1722-1780.

TOZZI, LUKE, an Italian physician, 1638-1717.

TRACY, ANTHONY LOUIS CLAUDE DESTUTT DE, a French moralist and politician, 1754-1836.

TRACY, BERNARD DESTUTT DE, an ecclesiastic and ascetic writer, 1720-1786.

TRACY, URIAH, a statesman, was graduated at Yale College in 1778, and afterwards studied law and became distinguished in that profession. He was for some time a member of Congress, and afterwards a senator. Died 1807.

TRADESCANT, JOHN, a Dutch naturalist and Asiatic traveller, gardener to Charles I., died about 1652. His son, of the same name, author of a description of his father's curiosities, died about 1662. The latter bequeathed his father's museum to Elias Ashmole, who gave it to the university of Oxford. The Tradescants introduced many new plants into this country.

TRAETTA, T., an Italian composer, 1727-79.

TRAHERON, B., a learned divine, 16th cent.

TRAILL, ROBERT, a presbyterian minister, author of works highly esteemed among the Calvinists, born at Ely, in Fifeshire, 1642, died 1716. His son, ROBERT, was a minister in the county of Angus. JAMES, son of the latter, became an episcopalian, and was appointed, in 1765, bishop of Down and Connor; died 1783.

[Trajan's column, Rome.]

TRAJAN, one of the most illustrious emperors of Rome, was born near Seville, in Spain, in the year 53, and was adopted by Nerva in 97. The custom of adoption, when the choice was happily made, prevented the dangers incident to an interregnum, and, in this instance, only three months intervened between that expedient and the accession of the new Cæsar. It is singular that Trajan was no connection or friend of Nerva's, but was chosen by him solely for his well-known virtues, his fine military spirit, and his general fitness for command; and so well had Rome reason to be satisfied with this choice, that the virtues of the new emperor remained, for ages after his time, proverbial. The great victories of Trajan were obtained over the Dacians, Germans, and Parthians, and it was to commemorate the first of these that his famous column was erected. imi-

tated in our own times by that of Napoleon. By these victories he fixed securely the boundaries of the Roman empire on the banks of the Rhine and the Tigris. His internal administration was equally glorious, his reign being numbered with that of his successor, Hadrian, and with the period of the two Antonines, for its great clemency, and rigid discipline of justice—these virtues being ever inseparable. Among his benefactions may be mentioned the humane and legal mode of dealing with the Christians which he enjoined in his rescript to Pliny, appointed by him proconsul of Bithynia and Pontus. Trajan died at Selinus, a town in Cilicia, in August, 117. [E.R.]

TRALLES, B. L., a Polish physician, 1708–97.

TRALLIANUS. See ALEXANDER.

TRAPP, JOHN, a minister of the Church of England, author of Commentaries on all the books of Scripture, 1601–1669.

TRAPP, JOSEPH, a divine and poet, was born in 1679, at Cherington, in Gloucestershire; was educated at Wadham College, Oxford, at which university he was professor of poetry; became evening lecturer at St. Martin's church, London; rector of Harlington, Middlesex; and died in 1747. His principal works are, a blank verse translation of Virgil's *Æneid*, '*Prælectiones Poeticæ*,' '*Sermons*,' '*Miscellaneous Poems*,' '*Abramule*,' a tragedy; and a Latin translation of Milton's *Paradise Lost*. He was strongly attached to high church principles, was an eloquent preacher, and, besides the works before mentioned, was the author of several polemical treatises.

TRAVASA, CAJETAN M., an Italian theatine, preacher, and historian, 1698–1774.

TRAVERS, N., a French priest, 1686–1750.

TRAVIS, G., an English divine, died 1797.

TREADWELL, JOHN, LL. D., governor of Connecticut, and first president of the American Foreign Mission Society, was born at Farmington in 1745, graduated at Yale College, and afterwards studied law. He held different offices, and was appointed governor in 1809 in succession to Mr. Trumbull. Died 1823.

TREBY, Sir GEORGE, an able judge and lawyer, was born at Plympton, in Devonshire, in 1644; became a commoner of Exeter College, Oxford; studied in the Inner Temple, and was called to the bar. He also sat in parliament for his native place; and, in 1681, was appointed recorder of London, and knighted. Of this office he was deprived in 1685, but recovered it at the revolution, and successively became solicitor and attorney-general, and chief justice of the common pleas. Died 1702.

TREDGOLD, T., a civil engineer, died 1834.

TREIBER, J. P., a Ger. jurisconsult, 1675–1727.

TREILHARD, J. B., Count, a French jurist and deputy to the estates-general, 1742–1810.

TRELLON, C., a French poet, 16th century.

TREMBECKI, a Polish poet, died 1812.

TREMBLEY, ABRAHAM, an eminent naturalist, was born in 1700, at Geneva. After having been tutor to the families of Lord Bentinck and the Duke of Richmond, he returned in 1757 to his native city, where he became one of the members of the great council. He first acquired notice as a naturalist by his '*Memoirs on Fresh Water Polypes*,' and was admitted into the Royal Society, and other learned bodies. He also wrote '*Instructions from a Father to his Children on Nature and Religion*,' '*Instructions on Natural and Revealed Religion*,' and '*Inquiries into the Principles of Virtue and Happiness*.' Died 1784.

TREMELLIUS, EMANUEL, son of a Jew of Ferrara, professor of Hebrew at Heidelberg, and author of a version of the Bible, 1510–1580.

TRENCHARD, Sir JOHN, a member of parliament and statesman, who was implicated in the Rye-house plot and the rebellion of Monmouth, 1650–1695. JOHN, of the same family, a political writer, of the Whig party, author of '*The Natural History of Superstition*,' 1669–1723.

TRENCK, FREDERICK, Baron Von Der, a celebrated commander in the Austrian war of succession, was born at Reggio, of a noble Polish family, in 1711. His military career commenced from 1738, when he entered the service of Russia. In 1740 he joined the Austrians, and became chief of the *Pandours*. His cruel and rapacious conduct created him many enemies, and being thrown into prison, he poisoned himself, after four years' confinement, in 1749.

[Trenck in Prison.]

TRENCK, FREDERIC, Baron Von, a Prussian officer, celebrated for his adventures and misfortunes, was born in 1726, at Königsberg, and made such rapid progress in his studies, that, at the age of 17, he was presented to the king as a student who was well worthy the royal patronage. Frederic rapidly advanced him in the army, and manifested much regard for him; but the accomplishments of Trenck having won the heart of the Princess Amelia, the king's sister, he resolved to punish him. He was imprisoned in the fortress of Gatz, but contrived to effect his escape. He then visited the north of Europe, Austria, and Italy. In 1758 he was seized at Dantzic, and was conveyed to Magdeburg, where, loaded with irons, he was for years incarcerated. On procuring his liberation, in 1763, he withdrew to Vienna; after which he went to Aix-la-Chapelle, where literature, politics, and commerce alternately engaged his attention. He next went to reside at his castle of Zwerbeck, in Hungary, and while there he published his own '*Memoirs*.' In 1791 he settled in France; and in 1794, having been charged with being a secret emissary of the king of Prussia, he closed his eventful career under the axe of the guillotine.

TRENEUIL, J., a French poet, 1763–1818.

TRENTA, P., an Italian poet, 1731–1795.

TRENTO, J., an Italian Jesuit, 1728–1784.

TRESCHOW, NIELS, a Norwegian philosopher

and theologian, author of 'The Spirit of Christianity,' and the 'Philosophical Testament, or God, Nature, and Revelation,' 1751-1833.

TRESHAM, HENRY, a painter and poet, was born in Ireland, and was a pupil of West, of Dublin. He resided in Italy 14 years, during which he greatly improved himself in the art, and made a valuable collection of articles of virtù, and on his return to England he became a royal academician. He was the author of three poems, 'The Sea-sick Minstrel,' 'Rome at the close of the Eighteenth Century,' and 'Britannicus to Buonaparte.'

TRESSAN, LOUIS ELIZABETH DE LA VERGNE, Count de, a distinguished French officer and writer, was born in 1705, at Mons; entered the army in 1723; was conspicuous for his valor during several campaigns, particularly at the battle of Fontenoy; was appointed grand marshal of the court of Stanislaus at Lorraine in 1750; was admitted into the French academy in 1781, and died in 1783. His works, published in 12 vols., contain his miscellaneous pieces, and his translations of Amadis de Gaul, the Orlando Furioso, and several old French romances. He did not, however, wholly confine himself to subjects of mere amusement, but produced a 'Treatise on Electricity,' and some other works of science.

TRESSAN, PETER DE LA VERGNE DE, a missionary, born in Languedoc 1618, died 1684.

TREUER, G. S., a Germ. publicist, 1683-1743.

TREUTLER, J., a German jurist, 1565-1607.

TREUVE, S. M., a Fr. theologian, 1651-1730.

TREVETT, SAMUEL R., surgeon in the American army, was born at Marblehead, Massachusetts, in 1783, and graduated at Harvard College. He studied physic and practised in Boston, but soon obtained an appointment in the navy. After the war he was made surgeon to the navy-yard at Charlestown. Died 1822.

TREVISANI, FRANCESCO, an Italian painter, taught by Antonio Zanchi, 1656-1746. ANGELO, his brother, a portrait painter, dates unknown.

TREVISANI, M. A., a Venetian doge, 1553-54.

TREW, C. J., a German botanist, 1695-1769.

TRIBOLO, N. Di, an Ital. sculptor, 1500-1550.

TRIBONIAN, a celebrated Roman jurist, who was employed by Justinian on the famous digest of the laws, died about 546. Tribonian bears a very indifferent character; a brief account of the great work on which he was engaged may be seen in the article JUSTINIAN.

TRICALET, P. J., an ascetic writer, 1696-1761.

TRICHET-DUFRESNE, RAPHAEL, a French bibliopole and numismatist, 1611-1661.

TRIER, J. P., a Germ. theologian, 1687-1768.

TRIEST, A., a Flemish prelate, 1576-1657.

TRIEWALD, SAMUEL, a Swedish poet and statesman, 1688-1742. His brother, MARTIN, a mathematician and engineer, 1691-1747.

TRIGLAND, J., a Dutch divine, 1652-1705.

TRILLER, D. W., a Ger. physician, 1695-1782.

TRIMMER, SARAH, authoress of numerous works designed to promote the religious education of the populace, was the daughter of Joshua Kirby, and was born at Ipswich in 1741. The principal of her works was a periodical continued several years under the title of 'The Guardian of Education.' Some of her books have been admitted into the list of the Society for promoting Christian Knowledge. She died in 1810, and was buried in the family vault at Ealing.

TRIMNELL, C., a learned prelate, 1663-1723.

TRINCANO, DIDIER GREGORY, a military engi-

neer and writer on fortification, born in Franche-Comté 1719, died about 1792. His son, H. L. VICTOR, a mathematician, 1754-1785.

TRINCAVELLI, VICTOR, a physician and classical editor of Venice, 1496-1568.

TRIONFETTI, LELIO and GIAMBATISTA, Italian botanists: the former 1647-1722; the latter, who was his brother, 1656-1708.

TRIP, LUKE, a Dutch poet, died 1783.

TRIPPEL, A., a Swiss sculptor, 1747-1793.

TRISSINO, GIOVANNI GIORGIO, an Italian poet, was born in 1478, at Vicenza; was educated at Rome and Milan; was employed by Leo X. and his successor, Clement, on various diplomatic missions, and died in 1558. Among his works are, 'The Deliverance of Italy from the Goths,' an epic poem; a treatise on the 'Art of Poetry,' and the tragedy of 'Sophonisba.'

TRISTAN, J., a French numismatist, died 1656.

TRISTAN, L., a Spanish painter, 1586-1640.

TRISTAN L'ERMITE, FRANCIS, a French poet and dramatist, 1601-1649. His brother, JEAN BAPTISTE, a poet, historian, and genealogist, died about 1670.

TRISTAN, N., a Portuguese navigator in 1440-1447.

TRITHEMIUS, JOHN, a famous German theologian and learned writer, 1462-1516.

TRIVET, NICHOLAS, an English Dominican, author of 'Annales Regium Angliæ,' died 1328.

TRIVISANO, MARCO, a Venetian biographer, died about 1674. His nephew, BERNARDO, a philosopher and literary *savant*, 1652-1720.

TRIULZI, GIAM GIACOMO, a distinguished general, born in 1447 of a noble Milanese family. Being slighted at the court of Lodovico Sforza, he entered the French service, and finally headed the invading army of Francis I., and won the battle of Marignano, which put the French in possession of Milan. Died at Chartres, 1518.

TROGUS POMPEIUS, a Roman historian, author of a Universal History, abridged by Justin, and described by him as a man of antique eloquence, time of Augustus.

TROILLIUS, SAMUEL, a learned archbishop of Upsala, 1706-1764. His son, UNO, also archbishop of Upsala, and a man of letters, 1746-1803.

TROLLE, GUSTAVUS, archbishop of Upsala, and partisan of the Danish tyranny, killed in a battle in Norway after his expulsion, 1535.

TROLLE, G. H., a Swedish admiral, 1680-1765.

TROLLE, H., a Danish admiral, 1516-1565.

TROLLOPE, ANTHONY, a barrister-at-law, the husband of the celebrated Mrs. Trollope, whose sketches and novels have attained so much popularity. Died at Bruges, 1835.

TROMMIUS, A., a German divine, 1633-1719.

TROMP, MARTEN HARPERTZOAN, a famous Dutch commander, was born in 1597, and received his first command from Prince Maurice in 1624. From 1637 to 1639 he was employed against the Spaniards and Portuguese, and was afterwards matched against Admiral Blake; it was Tromp who sailed up the channel with a broom at his masthead, protesting he would sweep the English from the seas. He was killed in an action off the Dutch coast, 29th July, 1653. His son, CORNELIUS VAN TROMP, born 1629, displayed extraordinary courage and skill in his contests with the English, and died peaceably at Amsterdam in 1691. Some particulars will be found under the name of RUYTER, his fellow-commander.

TRONCHAY, G. DU, a Fr. writer, 1540-1582.

TRONCHET, F. D., a French jurist, 1726-1806.

TRONCHIN, THEODORE, a protestant theologian of Geneva, 1582-1657. LEWIS, his son and successor as professor of divinity, died 1705. N. DUBREUIL, of the same family, a journalist, died in Holland, 1640-1721.

TRONCHIN, THEODORE, an eminent physician, was born in 1709, at Geneva; and being maternally related to Lord Bolingbroke, he was sent to England, to be educated at Cambridge. He studied medicine under Boerhaave, at Leyden; and having taken the degree of M.D., he first settled at Amsterdam, and afterwards at his native city; but subsequently removed to Paris, on being appointed physician to the Duke of Orleans. Tronchin was a man of consummate skill in his profession, and of great benevolence. He was the friend of Voltaire, Rousseau, and many other celebrated characters, who have eulogised his talents and his virtues in their writings. Died 1781.

TROOST, C., a Dutch painter, 1697-1750.

TROWBRIDGE, EDMUND, a distinguished lawyer, was born at Newton, Massachusetts, in 1709, and educated at Harvard College. In 1749 he was appointed attorney-general, and a judge of the Supreme Court of Massachusetts, in 1767. D. 1793.

TROWBRIDGE, SIR EDWARD T., a distinguished British admiral, died 1852.

TROWBRIDGE, SIR THOMAS, a naval officer distinguished in the last war, supposed to have perished at sea in the *Blenheim*, 1807.

TROSK, M., a German Orientalist, 1588-1636.

TROTTER, THOMAS, M.D., an eminent medical writer, was a native of Roxburghshire, and educated at the university of Edinburgh. After being duly qualified, he was appointed a surgeon in the navy, in 1782; obtained his doctor's degree at Edinburgh, in 1788; was appointed physician to the royal hospital at Portsmouth, in 1793, and, in the following year, physician to the fleet. He introduced many improvements into the medical discipline of the navy; was indefatigable in his endeavors to mitigate the pernicious effects of the scurvy; and was completely successful in repressing a putrid fever which broke out among the French prisoners taken on the 1st of June, 1794. On his retirement from the public service, he settled at Newcastle as a physician; and died there in 1832. He wrote many useful works, of which the following are the principal: 'Medical and Chemical Essays,' 'Medica Nautica, or an Essay on the Diseases of Seamen,' a 'Practical Treatise on Nervous, Bilious, Stomach and Liver Complaints,' an 'Essay on Drunkenness,' a 'Review of the Medical Department of the British Navy,' 'The Noble Foundling,' a tragedy; a volume of poems, &c.

TROTTI, J. P. B., an Ital. painter, 1555-1602.

TROTZ, C. H., a Ger. jurisconsult, 1701-1773.

TROY, FRANCIS DE, a Fr. painter, 1645-1730. His son, same name and profession, 1676-1752.

TRUBLET, N. C. J., a Fr. writer, 1697-1770.

TRUCHET, JOHN, a French mathematician, was born in 1657, at Lyons. On entering into the order of Carmelites, he obtained the name of father Sebastian; but, notwithstanding his monastic life, he devoted a considerable part of his time to scientific and mechanical pursuits, particularly hydraulics, which occasioned his being consulted in the making of the grand canal of France. He also contributed, by his discoveries, to the improvement of various manufactures.

TRUEBA, DON TELESFORO DE, a Spaniard, who, on the overthrow of the constitutional party, came,

with his mother, to England, where he was educated. He was a man of very considerable talent, as may be seen by his having written dramas in Spanish, French, and English, which were produced at the different national theatres with success. Amongst his English dramatic pieces were the popular farces of 'Call again To-morrow' and 'Mr. and Mrs. Pringle;' besides some comedies, which were not equally successful. He also wrote 'The Castilian,' 'The Incognito,' 'Paris and London,' 'Salvador the Guerilla,' and other novels; and was a frequent contributor to many of the periodicals. In 1834 he returned to Spain, with many of his more distinguished countrymen, and was soon after elected a member of the Chamber of Procuradores, and secretary to one of the committees. Died, aged 31, 1835.

TRUMAN, J., a nonconform. divine, 1631-1671.

TRUMBULL, BENJAMIN, D.D., minister of North Haven, Connecticut, was born at Hebron, graduated at Yale College in 1759, and was ordained in 1760. He published a History of Connecticut, also a History of the United States. Died 1820.

TRUMBULL, JONATHAN, Governor of Connecticut, was born in 1710, and graduated at Harvard College in 1727. He was annually elected governor from 1769 till 1783, when he resigned. Died 1785.

[Governor Trumbull's House, Lebanon.]

TRUMBULL, JONATHAN, Governor of Connecticut, the son of the preceding, was born at Lebanon in 1740, and graduated at Harvard College in 1759. In 1775 he was appointed paymaster to the army in the northern department. In 1780 he was made secretary to Washington, in which office he continued till the close of the war. In 1789 he was chosen a delegate to Congress, in 1791 speaker of the House, and in 1794 a United States senator. He succeeded Wolcott as governor in 1798. Died 1809.

TRUMBULL, JOHN, son of the foregoing, was an officer in the American army, and aid to General Washington. Having quitted that profession in 1777, he went to Europe and studied painting under West, and soon became a proficient in his art. Died 1843.

TRUMBULL, JOHN, LL.D., judge, a poet, was born in 1750, and graduated at Yale College in 1767. He studied law and became eminent in his profession. In 1784 he published his celebrated poem McFingal. In 1801, he was a judge of the Superior Court. Died 1831.

TRUMBULL, SIR WILLIAM, an eminent statesman, was born at East Hempstead, in Berkshire, in 1638. He studied at Oxford, and having taken the degree of doctor of laws, was admitted a civilian in

the Commons. After this he was employed in state affairs, and in 1684 received the honor of knighthood. He went on diplomatic missions to France and Constantinople; was subsequently made a lord of the treasury and secretary of state; and died in 1716. Sir William was the friend of Dryden and the patron of Pope, in whose correspondence are many of his letters.

TRUSLER, DR. JOHN, was born in London, in 1735; was brought up as an apothecary, but got into orders, and for a time officiated as a curate. He published abridgments of popular sermons, printed in imitation of manuscript, for the use of the pulpit; this turned out a profitable speculation, and led to his commencing business as a bookseller, by which, and the numerous compilations he produced, he realized a good fortune. Died 1820

[Commodore Truxton—From the Medal voted by Congress.]

TRUXTON, THOMAS, a naval officer in the American service, was born on Long Island in 1755. In 1776 he had the command of a privateer, and committed many depredations on British merchant vessels, making many prizes during the war. After the termination of hostilities with England, he engaged extensively in commercial pursuits in Philadelphia, where he died in 1822.

TRYPHIODORUS, a Greek poet and grammarian, time of Anastasius, 6th century.

TRYPHO, a Syrian usurper between Antiochus VI. and Antiochus VII., B.C. 140–134.

TSCHARNER, BERNARD, a Swiss historian, died 1778. His brother, N. EMMANUEL, 1723–94.

TSCHERNING, ANDREW, a Prussian poet and philologist, 1611–1659.

TSCHIRNER, HENRY THEOPHILUS, an eminent German theologian and pulpit orator, was born, in 1778, near Chemnitz; was professor of theology at Wittenberg; and died in 1828. He wrote 'The Fall of Paganism,' 'Christian Apologetics,' 'A Treatise on Catholicism and Protestantism, considered in a Political Point of View,' &c.

TSCHIRNHAUSEN, EHRENFRED WALTHER VON, a German geometrician and experimental philosopher, was born in 1651, in Lusatia, and was lord of Killengswald and Stolzenberg, in that country. He studied at Leyden; and, after having served in the army and travelled, he devoted himself to scientific pursuits. He established several glass houses to improve the glass used for optical instruments, constructed an enormous burning mirror, gave rise to the manufacture of Saxon porcelain, and discovered a particular kind of curve, endowed with very remarkable properties, called, after him, Tschirnhausen's Caustics. He wrote 'De Medicina Mentis et

Corporis,' and some philosophical papers. Died 1708.

TSCHOULBOF, M.D., secretary to the Russian senate and an historical writer, died 1793.

TSCHUDI, GILLES, in Latin *Egidius Tscudus*, a Swiss historian and teacher of Zuinglius, 1505–1572. DOMINIQUE, his brother, an ecclesiastic and historian, 1596–1654. J. HENRY, also an historian, 1670–1729.

TUAIRE, F., a French painter, 1794–1823.

TUBI, J. B., an Italian sculptor, 1630–1700.

TUCKER, ABRAHAM, the son of a London merchant, who was educated for the bar, and became known as a metaphysical writer. His principal work, entitled 'The Light of Nature Pursued,' was published under the fictitious name of Edward Search in 1765; flourished 1705–1774.

TUCKER, JOSIAH, a shrewd writer on political economy, was born in 1712, at Langham, in Caermarthenshire; was educated at St. John's College, Oxford; and was successively curate of All Saints and rector of St. Stephen's, Bristol, minor canon and prebendary in the cathedral, and dean of Gloucester. During the American war he published many pamphlets, and strenuously recommended the separation of the colonies from Great Britain, as conducive to their mutual interest. He died in 1799. Among his works are, 'A Treatise on Civil Government,' 'Sermons,' 'Elements of Commerce,' and 'An Apology for the Church of England.'

TUCKER, SAINT GEORGE, an American lawyer and statesman, distinguished by the title of 'The American Blackstone,' was a zealous promoter of the independence of the United States, and bore a part in its accomplishment, not only with his pen, but his sword. Died 1828.

TUCKER, HENRY ST. GEORGE, a lawyer of Virginia, professor of law in the university of that state, and author of various works. Died 1848, aged 69.

TUCKER, W., a learned divine, died 1620.

TUCKERMAN, JOSEPH, a native of Boston, who devoted his time and property to the benefit of the distressed. Died 1840.

TUCKEY, JAMES HINGSTON, a nautical writer, was born in 1778, at Greenhill, in the county of Cork; entered the navy at an early age, went to India in 1794, was employed in surveying the coast of New South Wales, was taken prisoner by the French in 1805, and remained in captivity till 1814. He was then selected to command the expedition for exploring the river Congo, where he died in 1816. He was the author of 'Maritime Geography,' 4 vols.

TUCKNEY, A., a learned puritan, 1599–1670.

TUDWAY, T., a musical composer, 17th cent.

TUDOR. See OWAIN.

TUDOR, WILLIAM, an author, was a native of Boston, Massachusetts, and graduated at Harvard College in 1796. In 1823 he was appointed consul at Lima, in Peru, and in 1827 he was sent as chargé d'affaires to the court of Brazil, and died at Rio de Janeiro in 1830. He was the sole editor of the 'North American Review' for some time.

TUET, J. C. F., a Fr. philologist, 1742–1797.

TULL, JETHRO, an agricultural writer, was a native of Oxfordshire, and born about 1680. He studied at the Temple, and was admitted a barrister; but, returning from his travels, he settled on his paternal estate, and devoted himself to agriculture. Tull is the inventor of the horse-hoeing system of husbandry, on which he wrote a valuable volume. This was reprinted by Mr. Cobbett, and warmly espoused by him.

**TULLIA.** See **TARQUIN**.

**TULLIN, C. B.**, a Norwegian historian, 1728–65.

**TULLUS HOSTILIUS**, successor of Numa Pompilius as king of Rome, B.C., 673–641.

**TULLY, GEORGE**, rector of Gateside near Newcastle, and a famous writer against popery, d. 1697.

**TULLY, THOMAS**, a learned divine and controversial writer, was born at Carlisle, in 1620, and died in 1676. Dr. Tully wrote 'Logica Apodeictica,' 'Præcipuorum Theologia,' and several controversial pieces against Dr. Bull and Mr. Baxter, on the subject of justification.

**TULP, NICHOLAS**, an eminent physician and distinguished patriot, was born at Amsterdam, in 1593. He not only rose to eminence in his profession, but being elected burgomaster of Holland at a very advanced age, he so strenuously encouraged his countrymen in their resistance to the unprincipled invasion of Holland by Louis XIV., in 1672, that a silver medal was struck to his honor, with the motto 'Vires ultra sortemque senectæ.'

**TUNSTALL, or TONSTAL, CUTHBERT**, a famous English prelate, uncle of Bernard Gilpin, was born near Richmond, in Yorkshire, about 1474. In 1516 he accompanied Sir Thomas More as ambassador to Charles V., after which he became successively bishop of London and Durham. He was imprisoned in the Tower during the reign of Edward VI., and though he had shown a humane regard for the persons of protestants in the reign of Mary, he was deprived of his liberty again in that of Elizabeth. His keeper, however, was Archbishop Parker, who entertained him in a friendly manner at Lambeth, where he died in 1559.

**TUNSTALL, JAMES**, vicar of Rochdale, author of 'Discourses upon Natural and Revealed Religion,' and some classical commentaries, 1710–72.

**TURA, COSMO**, an Italian painter, 1406–1469.

**TURBERVILLE, GEORGE**, a poet and translator of Ovid, born at Whitchurch, in Devonshire, about 1530, died about 1600. His poetical description of Russia was founded on the knowledge he obtained of that country as secretary to the English ambassador, Sir Thomas Randolph.

**TURCHI, ALESSANDRO**, an Italian painter, taught by Brusasorci, about 1580–1650.

**TURCHI, L.**, bishop of Parma, 1724–1803.

**TURENNE. HENRI DE LA TOUR D'AUVERGNE**, Viscount de Turenne, was born at Sedan, of a noble family, 16th September, 1611. At the age of fifteen he served in Holland, and studied the art of war under his maternal uncles, Prince Maurice of Nassau, and Prince Frederick Henry. In 1634 he received the command of a French regiment, and gained brilliant distinctions in the campaign in Flanders. In 1639 he commanded with success in Italy, and in 1643 he conquered Roussillon. In the next year he was made marshal of France, and commander of the French armies in Germany. He gained the great battle of Nordlingen in 1645; and by his able manœuvres, and decision and skill in action, he was the chief cause of the advantages gained over the imperialists in the latter part of the thirty years' war. When the civil war of the French broke out in France, Turenne was first engaged against the court, but afterwards became the chief commander of the royal armies. In 1654 and 1655 he commanded against the Spaniards in the Low Countries, gained the battle of the Dunes, and conquered the greater part of Flanders. The peace of the Pyrenees in 1660 closed this war; but when hostilities were renewed in 1667, Turenne ran through another rapid career of victories in Flanders, and

the Spaniards were obliged to beg again for peace in the next year. In 1672 he was at the head of the French troops in Holland. He took forty towns in twenty-two days, and won five pitched battles against the Dutch and Austrians. He continued to guide the French arms with almost unvarying skill and success till the 27th July, 1675, when he was killed by a chance cannon shot when reconnoitring the ground for an intended battle against the celebrated imperialist commander, Montecuculi.

[E.S.C.]

[Monument of Turenne, at Sasseback.]

**TURGOT**, an English monk and historian of Durham, who became bishop of St. Andrews and primate of Scotland, died 1115.

**TURGOT, ANNE ROBERT JACQUES**, born at Paris, 10th May, 1727; died 20th March, 1781: one of the purest and most virtuous of men; certainly the wisest statesman who appeared during the latter days of the French monarchy. Could the fury of the terrible whirlwind which so soon numbered that ancient and gorgeous monarchy among things that were, have been averted by human providence, the man who alone could have saved that calamity was Turgot. In early youth, intended for the Church, his studies were varied, and in regions seldom visited by men of Action. Fortunately for France his purposes changed, and he turned his mind towards the functions of the Magistracy. Having obtained some inferior appointments, the repute of his administration was such, that in 1774, the Count Maurepas, the first Minister, called him to the high and responsible office of *Minister of Finance*. Here, the consummate ability of Turgot had fullest scope; and for a time, alike Court and Nation reposed on his unimpeachable probity. The Finances of France, as is well known, were then fast verging towards that condition which forced on the Revolution. Turgot's remedies were distinct and simple — 'No bankruptcy, no more Loans, no increase of Taxes; but a rigorous examination of expenditure and resolute reduction.' Nor was the panacea a mere proposal. The Minister was equal to the realizing of it. And the reforms effected during his brief tenor of office were so numerous and important, that public credit for the time was re-established! Who knows not, however, that every financial reformer creates an army of enemies? Is a sinecure destroyed? Not only its holder, but his family: not only these, but all who are thereby put in fear, conspire against the

formidable Minister. On a day marked black in the French Fasti—12th May, 1776, Turgot was dismissed: poor Louis XVI. having first remarked '*Il n'y a que M. Turgot et moi qui aimons le peuple.*' It was about the middle period of his ministry that Turgot addressed to Louis that celebrated memoir on the state of the Municipalities, in which he declared that the safety of France depended on the realization of such a constitution as actually prevailed long afterwards under Louis Philippe. 'The cause of the evil, Sire, is, that your people have no constitution. The French nation is a society composed of different orders of men imperfectly united, and of a people among whom there are few social ties. On this account every man is absorbed in concern for his private interests; no one takes trouble about his public duties, or his relations with others.' Would that France had then obtained what might have converted mutual hatreds into a common patriotism, and jarring classes into a Nation!—After these two years of office, Turgot lived in retirement: but an active and glorious one. He wrote much;—the spirit of large and wise philanthropy breathing through every line. He had an old attachment to political economy; and his pen had fought well in the war with Monopolies. He was fond of metaphysics—especially as these bear on the Theory of Language: his essay on *Existence* in the *Encyclopédie* is well known. But, perhaps, of all the writings he has left, those which have the most enduring value are his *Letters to an Ecclesiastic on Toleration*: his *Discourse on the Advantages of the Christian Religion*: a second *Discourse on the Progress of the Human Mind*: and *Sketch of Universal History*. Pregnant as these are with instruction for all time, we express the fervent hope, that some one of our many enterprising publishers, may see reason to present them to the British people.—Turgot's whole works have been collected recently and published in two elegant royal 8vo. volumes. [J.P.N.]

TURGOT, FRANCIS, called 'the Chevalier,' brother of the preceding, and a colonial governor, 1721–89.

TURGOT, M. S., a French provost, 1690–1751.

TURLOT, F. C., a French writer, 1745–1824.

TURNÈBE, ADRIAN, in Latin *Turnebius*, a French Hellenist and critic, 1512–1565.

TURNER, D., an English botanist, died 1818.

TURNER, D., a baptist writer, 1701–1798.

TURNER, DANIEL, a commodore in the American navy, distinguished at the battle of Lake Erie. Died 1850.

TURNER, EDWARD, M. D., born in Jamaica, 1797; died at London, 1837; the author of a valuable manual of chemistry, and of numerous contributions to chemical mineralogy and stoichiometry. He began his career as a lecturer in Edinburgh. When University College was instituted, the lectureship of chemistry was offered to Dr. Thomas Thomson, and on his declining to leave Glasgow, he was requested to nominate a qualified chemist; he recommended Dr. Turner, who was accordingly appointed. Dr. Turner was a man of the most amiable disposition, and of acute scientific talents.

TURNER, FRANCIS, bishop of Ely, was one of the seven bishops prosecuted for resisting the royal authority in ecclesiastical affairs under James II.: yet he refused to take the oath of allegiance to William III., and was consequently deprived of his benefice. Died 1700. He wrote '*Animadversions on Naked Truth*,' and was answered by Marvell, who gave him the title of '*The Divine in Mode.*' The bishop was also the author of a '*Vindication of Archbishop Sancroft*, and the rest of the deprived Bishops.'

TURNER, J. H., an archæologist, 1814–1851.

TURNER, JOSEPH MALLERD WILLIAM, was born in Maiden Lane, Covent Garden, in the spring of 1775. His father carried on a small business as a hair-dresser; and it was over his father's shop in Maiden Lane where most of his early efforts, in the art in which he eventually became so famous, were produced. His abilities appear to have been rapidly developed, for though unaided by instruction from any master, he obtained admission as a student into the Royal Academy in 1789, in only his fifteenth year, and was an exhibitor in the academy the following year, 1790. In his early youth, Girtin, the water-color painter, appears to have been Turner's chief adviser, who always expressed a high veneration for his friend's ability. Turner had also the very great advantage of freely copying in the Gallery, or from the collection of drawings of Dr. Munro in the Adelphi; and his elaborate drawings soon procured a public recognition of his talents: he was elected an associate of the Royal Academy in 1800, and an academicien in 1802. He was thus for fifty years one of the most distinguished members of that institution; and after a life of almost unrivalled success, and an industry unsurpassed, this great landscape painter died unmarried, and under an assumed name, in an obscure lodging at Chelsea,

[Birth-place of Turner.]

19th December, 1851. He was, however, buried by the side of Sir Joshua Reynolds, in the crypt of St. Paul's Cathedral. His life was in every sense a remarkable one; for its humble origin, and for its splendid results; retired and reserved always while living, the splendor of his fame among his contemporaries does not contrast more strongly with his habits of life, than the great and national character henceforth identified with his name, both by his reputation and the disposition of his property, does with the singular humanity of his closing career. His large fortune, both in pictures and in funded property, he has bequeathed to the nation; his pictures, however, under the condition that the government provide a suitable dwelling for them within ten years, and his unded property towards the establishment of an institution for the benefit of decayed artists. Turner had three styles as a landscape painter, and as the history of every distinguished painter will show, his first manner was much distinguished for laborious care in execution: he was chiefly a water-color painter in early life. The contrast of style between his early and latest

works is remarkable—the latter distinguished for its excessive looseness of execution, the former for its elaborate finish; and, compared with his ordinary works, for a coldness of color. This peculiar coldness of color he displayed both in his oil and water-color pictures; and in some of the best of his early works, he shows a decided imitation of Wilson. In middle life he adopted a much freer mode of execution, and a greatly richer style of coloring. His finest works belong to this middle period, of which the two pictures bequeathed by him to the National Gallery, to be hung between two Claudes, are fine examples: the sun rising in a mist, exhibited in 1807; and Dido building Carthage, exhibited in 1815. Turner may be judged by these works, as he himself considered them two of his principal masterpieces; and the self-assertion of insisting upon their being exhibited by the side of the Claudes, shows that he courted, and required no indulgence from, our criticism. In comparison with Claude his execution is loose, even in his middle period; but these two pictures do not suffer more by the comparison than the Claudes—both are injured, as they are nearly in opposite extremes of taste; the Turners require some of his own later works as a foil, and in this case the two bequests might display the happy medium of execution. The majority of Turner's works of this middle period are certainly masterly and brilliant in color. In the last twenty years of his career he was extravagant to an extreme degree: he played equally with nature and with his colors: although we could not see such effects in nature as he latterly represented, he maintained that we should be glad to see them, nevertheless. Light, with all its prismatic varieties, seemed to have been the chief object of his studies; individuality of form or character he was wholly indifferent to. The wild looseness of execution in Turner's latest works has not the apology of being attempted on scientific principles; he does not work up a particular point of the picture as a focus, and leave the rest obscure, as a foil, to enhance it; but all is equally obscure and wild. But were it otherwise, the philosophy would be very questionable: the infinite advantage of the human eye over instruments made by man is, that it can instantly adapt its focus to any object, and thus distinguish, within a limited range, the distant or the near equally well. It is this faculty of the eye which makes the natural landscape so charming; and, accordingly, nature also requires that the landscape which professes to be its transcript should be finished in all its parts, and thus enable the eye to exercise its wonderful functions over it as it does over a natural scene. Turner's works are very numerous in all his styles: he exhibited about 300 pictures in the Royal Academy, which, however, constitute but a very small portion of his works. In 1808 he published a work called *Liber Studiorum*, or Book of Sketches, in imitation of Claude's *Liber Veritatis*.—(John Burnet, *Turner and his Works*, &c., 1852.)

[R.N.W.]

TURNER, SIR T. H., an officer in the British army, and an archæologist. In his military capacity he distinguished himself in Egypt under Sir Ralph Abercromby, who fell during that campaign. In his scientific capacity he was remarkable for having carried off the celebrated Rosetta Stone, with its trilingual inscription, and deposited it in the British Museum. He was the author of various archæological contributions to the Society of Antiquaries of London. Died 1853, at an advanced age.

TURNER, SAMUEL, a traveller and diplomatist,

was born in Gloucestershire, about 1749. He entered the military service of the East India Company, and having attracted the favorable notice of Governor Hastings, was sent on an embassy to congratulate the new potentate of Thibet, in 1783. In the war with Tippoo Saib, this officer distinguished himself at the siege of Seringapatam; and being afterwards sent ambassador to the sovereign of Mysore, acquitted himself so much to the satisfaction of the Company, that they rewarded him with a handsome present. He returned to England, and published his 'Account of an Embassy to the Court of the Teshoo Lama in Thibet,' &c. Died 1802.

TURNER, SHARON, the well-known historian of the Anglo-Saxons, was born in London, 1768. He was principally educated at Pentonville, and having chosen the law for his profession, he was articled to an attorney in the Temple at the age of 15. The death of his master before his articles of clerkship were expired left him free to decide on his future career; but at the suggestion of an old client, who promised him support, he took up the business, and notwithstanding the great amount of time occupied by his literary pursuits, he continued to conduct a large professional business, which he transmitted to his family. His chief works, or rather series of works (for they were published separately), are, the 'History of England from the earliest Period to the Death of Elizabeth,' and the 'Sacred History of the World;' they have been repeatedly reprinted, and may be now said to form part of the standard literature of the country. Shortly before his death he published a poem, entitled 'Richard III.' D. 1847.

TURNER, THOMAS, chaplain to Laud, bishop of London, and finally dean of Canterbury, 1591–1672. FRANCIS, his son, bishop of Ely, one of the seven prelates committed to the Tower by James II., author of a 'Vindication of Archbishop Sancroft,' 'Animadversions on a Pamphlet entitled the Naked Truth,' and other works, died 1700.

TURNER, WILLIAM, rector of Walberton, in Sussex, au. of a 'History of all Religions,' 1695.

TURNER, WILLIAM, a dignitary of the church, who wrote the earliest English herbal, entitled a 'History of Plants,' died 1568.

TURPIN, TULPIN, or TELPIN, JOHN, in Lat. *Turpinus*, a Fr. prelate and chronicler, 8th century.

TURPIN, FRANCIS HENRY, a French historian, was born at Caen, in Normandy, in 1709. He wrote 'La France illustre, ou le Plutarque Français,' 4 vols.; and other works on biography and history. Died 1799.

TURPIN DE CRISSE, LANCELOT, Count, a French officer and writer on Tactics, 1715–1795.

TURRETIN, BENEDICT, a Swiss protestant theologian, 1588–1631. His son, FRANCIS, professor at Geneva and a theological writer, 1623–1687. JOHN ALPHONSUS, son of the latter, and the most celebrated ecclesiastical writer and theologian of the family, 1671–1737. Of the same family were—MICHAEL, professor of divinity, 1646–1721. SAMUEL, son of Michael, professor of theology and Oriental languages, 1688–1718.

TUSSAUD, MADAME, the well-known proprietress of the wax-work collection in the metropolis, was born in Berne, 1760. Adopted by her uncle, M. Curtius, an artist in Paris, she repaired thither early in life, and soon became, under his care, so proficient in the fine arts, that she received the appointment of drawing-mistress to the family of Louis XVI., whose sufferings she witnessed, and in some measure participated. In 1802 she came to England, and commenced her exhibition, travelling

with it from town to town; but in 1812, while crossing over to Ireland, the vessel in which she had embarked, was wrecked, and her goodly collection fell a prey to the waves. Nothing daunted by this disaster, the enterprising *artiste* began the world anew, with what success, all who have beheld her interesting exhibition, which is justly considered one of 'the sights' of the metropolis, can testify. Died April 16, 1850.

TUSSER, THOMAS, a poet, called by Warton 'The British Varro,' born in Essex about 1515, died in London between 1580 and 1585. His principal work is quaintly entitled, 'Five Hundred Points of Good Husbandry united to as many of Good Housewifery.'

TUTCHIN, JOHN, a political writer, distinguished for his boldness and virulence. At the time of Monmouth's rebellion, he published a pamphlet in his favor, for which he was tried, and sentenced by Judge Jeffries to be whipped through all the principal market towns in the west of England. He petitioned the king that his sentence might be commuted to hanging, and he was at length pardoned. Yet, so forgetful was he of the favor he had been shown, that, on the death of James II., he wrote an invective against the unfortunate monarch. Died 1707.

TUTILO, or TUOTILO, a monk of St. Gall, in Switzerland, distinguished as a painter, sculptor, orator, poet, and musician, 9th century.

TUTHILL, Sir GEORGE, was a physician of some eminence, whose practice latterly had been chiefly confined to diseases of the brain, though at one time he was a popular lecturer on the practice of physic. At the time of Buonaparte's detention of the English during the short peace of 1801, Dr. Tuthill and his lady were among the number; but after several years' captivity they obtained their liberty, the lady having purposely encountered the chief consul and his suite on their return from hunting, and presented a memorial which had been prepared for the occasion. Died 1835.

TWEDDE, JOHN, a highly accomplished scholar, was born in 1769, at Threepwood, near Hexham, was educated first at Hartforth School, Yorkshire; next under Dr. Parr; and, lastly, at Trinity College, Cambridge; gained several prizes at the University, became a student of the Middle Temple, began his travels in 1795, with a view to accomplish himself as a diplomatist; and, after remaining abroad four years, died suddenly at Athens. It was known that he had amassed large materials with a view to publication; but the manuscripts of the observations which he made in his journey were unfortunately lost.

TWELLO, L., a learned divine, died 1742.

TWIGG, LEVI, a major in the American army, who fell at the storming of Chapultapec, in Mexico, Sept. 13, 1847.

TWINING, T., a classical scholar who was presented to the living of St. Mary's, Colchester, by Bishop Lowth, born in London 1734, died 1804.

TWINING, W., an army physician and professional writer, born in Nova Scotia, died 1835.

TWISS, HORACE, whose name will long be remembered in social, literary, and political circles, was the eldest son of Francis Twiss, esq., author of a verbal index to Shakspeare, and of Frances, second daughter of Roger Kemble, the father of the illustrious family of the Kembles and the Siddonses. Called to the bar in 1811, he travelled the Oxford circuit for some years, and became one of its most distinguished leaders; but he subsequently attached himself to the equity courts, and had he continued

to devote himself exclusively to his profession, there can be no doubt that he would have attained to forensic, or even judicial, eminence. His political life commenced in 1820 as member for Wootton Bassett. He represented this borough for ten years, during which he reaped great distinction for his business talents, and his speeches in favor of Catholic emancipation and law reform. On the formation of the Duke of Wellington's administration in 1828, he was appointed under-secretary to the colonies, having previously been counsel to the admiralty and judge advocate during Lord Liverpool's administration. In 1830 he sat for Newport; but the reform bill, which he earnestly opposed, may be said to have cut short his parliamentary career, for though he represented Bridport from 1835 to 1837, he could not establish a durable hold on the constituency, and all his subsequent attempts to obtain a seat in parliament proved abortive. From this period he devoted his talents to the press. He occasionally contributed leading articles to the Times; and to him is owing the plan now generally adopted by the daily press, of giving a summary of the speeches in the Houses of Parliament in addition to the reports. In 1844 he received the appointment of vice-chancellor of the duchy of Lancaster. From an early age, Mr. Twiss had been devoted to literary pursuits. When a young man, he gained great distinction by slight dramatic productions, poetry, and jeux-d'esprit of every description; and these were followed at intervals by various other publications, chiefly on constitutional subjects; but his literary fame rests on his elaborate 'Life of Lord Eldon,' which will long be consulted, not merely as one of the best biographies ever written, but as a repertory of the most remarkable political transactions of the era to which he refers. In private life, Mr. Twiss was no less esteemed than in the world of literature and politics. In feeling he was a perfect gentleman. His amiable manners and convivial talents made him everywhere a welcome guest; while his own hospitality was unboundedly shared by a wide circle of friends, among whom were many of the most distinguished persons in the country. Died 1849.

TWISS, RICHARD, an English traveller, born in 1747, was a man of fortune, and spent several years in visiting various parts of the Continent. He died in 1821. Among his works are, 'Travels through Spain and Portugal,' 'A Tour in Ireland,' 'A Trip to Paris in 1792,' 'Anecdotes of Chess,' and 'Miscellanies.'

TWISS, W., a nonconformist divine, 17th century.

TWYNE, JOHN, an antiquarian and mayor of Canterbury, died 1581. His grandson, BRIAN, an antiquarian, was vicar of Rye, in Sussex, and archivist at Oxford, 1579-1644.

TWYSDEN, Sir ROGER, the second baronet of the family, was born at East Peckham, in Kent, in 1597. His father, Sir William, accompanied James I. to England, and was created a baronet. Sir Roger, who was an excellent antiquary, suffered severely from his attachment to the royal cause. Besides contributing to Philpot's Survey of Kent, and the publication of the 'Decem Scriptores,' he was the author of 'The Historical Defence of the Church of England.' Died 1672.

TYCHSEN, O. G., professor at Rostock, and author of several Oriental works, 1734-1815.

TYCHSEN, T. C., an Orientalist, 1758-1834.

TYDEMAN, M., a Dutch *savant*, 1741-1825.

TYE, C., a musical composer, 16th century.

TYERS, T., an English critic, 1726-1787.

TYLER, ROYALL, a lawyer and an author, was a native of Boston, and graduated at Harvard College in 1776. Having removed to Vermont, he soon became eminent in his profession. He held the office of associate judge, and afterward that of chief justice for some years. He wrote several pieces in prose and verse. Died 1825.

TYMPE, J. G., a Ger. theologian, 1699–1768.

TYNDALE, or TINDALE, WILLIAM, the venerable martyr and translator, was born in the hundred of Berkeley, either at Stinchcomb, or North Nibley, Gloucestershire, about the year 1484. At an early period he was sent to Oxford, where he took his degree, and also gave instructions in Magdalen Hall. But he left Oxford for Cambridge, where it is believed that he took a degree. In 1522 Tyndale is next found as tutor in the house of Sir John Welch of Little Sodbury, not far from Bristol, where he preached in the villages and towns on Sabbath, and often disputed with neighboring abbots and other Romish ecclesiastics. Here, too, he translated the 'Enchiridion Militis' of Erasmus, as a present to his host and his lady. His free opinions and discussions soon got him into troublous examinations before the popish dignitaries, but no penalty was inflicted on him. He took the hint, however, left the county, and came to London, his mind being now fully occupied with the idea of translating the Scriptures. He soon found, as he himself quaintly says, 'that there was no room in my lord of London's palace to translate the New Testament, nay, no place to do it in all England.' In London he sometimes preached at St. Dunstan's-in-the-West, while Alderman Humphrey Monmouth took him under his protection, and gave him an annuity of ten pounds a year, to enable him to live abroad, for which ten pounds he was in return to pray for the souls of the alderman's father and mother. Tyndale on leaving England went first to Hamburg. It is often said that from Hamburg he proceeded to Wittenberg, where he met Luther, who had now thrown off the last vestige of popish thralldom, and that there he completed his translation of the New Testament. The statement is apparently not correct, for during 1524 he seems to have remained at Hamburg, and in 1525 he appears to have been first at Cologne and then at Worms. At Cologne, Tyndale seems to have commenced to print his first edition in 4to, but after ten sheets were printed, the work was interrupted, and the translator and his coadjutors betook themselves to the Lutheran city of Worms, where the quarto was finished, and an octavo edition also issued from the press. The prologue to the quarto has been republished under the name of 'A Pathway to the Scriptures.' The translator's name was attached to neither of the two editions, and he assigns a reason for this omission in his 'Wicked Mammon,' published in 1527. Copies of these versions early found their way into England. In 1526 Tunstall, bishop of London, fulminated his prohibition of them, and two years afterwards a number of copies were collected, nay, some were purchased by the bishop in Antwerp, and burnt at St. Paul's Cross. Warham and Wolsey were also dreadfully enraged, and Sir Thomas More was employed to denounce Tyndale, but his genius was foiled in the attempt, and Tyndale won a precious victory over the learned chancellor. Two editions were then printed at Antwerp, and found their way to England in vessels laden with grain. Endeavors were made to seize Tyndale and punish all who assisted him, but he removed to Marburg in Hesse in 1528, and published there a book of great value—'The Obedience of a Christian Man.' The

result of all the English opposition was, that, as Foxe expresses it, 'copies of the New Testament came thick and threefold into England.' We find Tyndale again at Antwerp in 1529, during which year a fifth edition was printed; the four books of Moses were also translated, printed each at a separate press, and put into circulation. The enemies of the translator endeavored to decoy him into England, but he was too wary to be so easily entrapped, for he well knew what displeasure Henry VIII. felt at his tract, called 'The Practice of Prelates,' and what penalty the royal indignation would speedily inflict. After the martyrdom of Frith, Tyndale set himself to revise and correct the version of the New Testament, and it was soon thrown off, with this remark in the preface, 'which I have looked over again with all diligence, and compared with the Greek, and have wedded out of it many fautes.' But his enemies in England, whose power had been shaken by the copious circulation of the English New Testament, were the more enraged against him, and conspired to seize him on the continent, in the name of the emperor. An Englishman, named Philips, betrayed him, and acting under such information, the authorities at Brussels seized him, in the house of Pointz his friend, and conveyed him to Vilvorde, twenty-three miles from Antwerp. Pointz, who had with great difficulty escaped himself, made every effort for him, but in vain. The neighboring university of Louvain thirsted for his blood. Tyndale was speedily condemned, and on Friday, the 6th October, 1536, in virtue of a recent Augsburg decree, he was led out to the scene of execution. On being fastened to the stake, he cried in loud and earnest prayer, 'Lord, open the eyes of the king of England,' and then was first strangled and afterwards burnt.

His ashes flew,  
No marble tells us whither.

The merits of Tyndale must ever be recognized and honored by all who enjoy the English Bible—for their authorized version of the New Testament has his for its basis. He made good his early boast, that ploughboys should have the Word of God. His friends all speak of his great simplicity of heart, and commend his abstemious habits, his zeal, and his industry; while even the imperial procurator who prosecuted him styles him, *homo doctus, pius et bonus*. The works of Tyndale and Frith were collected and published in three vols. 8vo, London, 1831. [J.E.]

TYPOEST, JAMES, in Latin *Typotius*, a Flemish historian, died 1601.

TYRANNIO, a Ger. grammarian, 1st cent. B.C.

TYRCONNEL, RICHARD TALBOT, earl of, a partisan of James II. in Ireland.

TYRREL, JAMES, an historian and political writer, was born in 1642, in London; was educated at Queen's College, Oxford; studied in the Inner Temple, and was called to the bar, but never practised professionally. He is the author of a 'General History of England,' and other works. Died 1718.

TYRTÆUS, an ancient Greek poet, celebrated for his martial strains, who flourished about B.C. 680, is said to have been a native of Miletus, and to have settled at Athens. He was lame, and blind of one eye. In the war between the Lacedæmonians and Messenians, the Spartans applied to the Athenians for a general; and the latter, it is supposed, in derision, sent them Tyrtaeus. The bard, however, so inspired the Spartans by his warlike songs, that they reduced the Messenians to subjection. He was accordingly treated with great respect, and granted the rights of citizenship; and the martial airs of

Tyrtaeus were constantly played in the Lacedæmonian army as long as that republic existed.

TYRWHITT, THOMAS, a famous scholar and master of polite literature, was born at Westminster in 1730, and was successively under-secretary at war and clerk to the House of Commons. He resigned the latter situation in 1768, and devoted his future years to literature. Besides his valuable classic commentaries, Tyrwhitt edited Chaucer's *Canterbury Tales* and Rowley's *Poems*, which he proved to be the production of Chatterton; died 1786.

TYSON, EDWARD, a physician, was born at Bristol, in 1649; and educated at Magdalen Hall, Oxford. He became a member of the College of Physicians and the Royal Society; and he was physician to Bedlam and Bridewell Hospitals. Dr. Tyson was a very skilful anatomist and an able writer; he published 'The Anatomy of a Porpoise,' 'The Anatomy of a Pigmy, compared with that of a Monkey, an Ape, and a Man, with a Philosophical Discourse concerning the Pigmies of the Ancients,' and several clever essays in the *Philosophical Transactions*. Died 1708.

TYSON, JAMES, a dramatic writer, 1799-1820.

TYSSEUS, PETER, a Flemish historical painter, 1625-1692. His son, NICHOLAS, famous for the representation of still life, flowers, fruit, armor, and military weapons, 1660-1719. AUGUSTUS, brother of the latter, a landscape painter, 1662-1722.

TYTLER, H. W., a Scotch physick, 1752-1808.

TYTLER, JAMES, an eccentric, laborious, and able writer, was born at Brechin, in Scotland, in 1747. His first work, entitled 'Essays on the most important Subjects of Natural and Revealed Religion,' was printed by the author himself, without any manuscript or notes whatever, but just as the ideas arose in his mind. His other principal works are, 'A System of Geography,' a 'Geographical, Historical, and Commercial Grammar,' a 'History of Edinburgh,' and a poetical translation of Virgil's *Eclogues*. He also edited several periodical works, viz. the *Historical Register*, the *Gentleman and Lady's Magazine*, the *Weekly Review*, &c., and contributed largely to the *Encyclopædia Britannica*. Having joined the society of the 'Friends of the People,' at the close of the last century, he was outlawed, and died in America, in 1805.

TYTLER, WILLIAM, an historical and miscellaneous writer, was born at Edinburgh, in 1711; was educated at the university of his native city; followed the profession of writer to the signet; and died in 1792. His principal work is, 'An Historical and Critical Inquiry into the Evidence produced against Mary, Queen of Scots.' He was also a contributor to the *Transactions of the Edinburgh Antiquarian Society*, of which he was one of the vice-presidents.

TYTLER, ALEX. FRASER, lord Woodhouselee, son of the preceding, was born in 1747, at Edinburgh, in which city he was educated. After having been prof. of universal history at the university, and judge ad-

vocate for Scotland, he was raised to the bench, and took his seat as Lord Woodhouselee, in 1802; and on the elevation of Lord Hope to the president's chair in 1811, he was appointed a commissioner of justiciary. Among his works are, 'Decisions of the Court of Session,' a treatise on 'Martial Law,' 'Outlines of a Course of Lectures on Universal History,' 'Elements of General History,' 'An Essay on the Principles of Translation,' 'An Historical and Critical Essay on the Life of Petrarch,' and 'Memoirs of the Life and Writings of Lord Kaimes.' Died 1813.

TYTLER, PATRICK FRASER, an eminent historian, son of the preceding, was born, 1790. After the usual curriculum of a Scotch education, he was enrolled a member of the faculty of advocates in 1813. But he soon turned from the law to the pursuit of letters, his first adventure being a volume of travels in France in 1814 or 1815. But the work which first gave him a place of note in the world of letters, was his 'Life of the Admirable Crichton'—an erudite, pleasing, and ingenious book, which reached a second edition in 1823. The same year saw the publication of another volume of the same stamp—'An Account of the Life and Writings of Sir Thomas Craig, of Riccarton, including Biographical Sketches of the most eminent Legal Characters,' &c. But the work by which his name has become most widely known, and by which it will go down to after generations, is his 'History of Scotland,' the first volume of which appeared in 1828, and the ninth and last in 1843. During the composition of his great work, he found leisure to give several others to the world. He contributed to Mr. Murray's Family Library, one of the most delightful of all his writings, 3 vols. of 'Lives of Scottish Worthies' (1832-3). For the Edinburgh Cabinet Library, he wrote an 'Historical View of the Progress of Discovery on the more Northern Coasts of America' (1832), the 'Life of Sir Walter Raleigh' (1832), and the 'Life of Henry VIII.' (1837); besides editing various other works, the materials for which he had collected in the state paper office. A pension of £200 a year was conferred upon him a few years ago, during the administration of Sir Robert Peel. Mr. Tytler's constitution was never robust, and it gradually gave way under the exhausting labors of a literary life. During a lingering illness of mind and body, he wandered over the Continent in search of health, and returned to England, only to die in the land for the illustration of whose annals he had done much and contemplated more. Died at Great Malvern, 1849.

TZETZES, JOHN or JOANNES, a learned grammarian and poet of Constantinople, author of a valuable work entitled, *Chiliades Variarum Historiarum*, or *Historical Miscellanies*, 12th century. His brother, ISAAC, was also a man of taste and letters, and held a magisterial office in Macedonia.

TZETZI, J. B., a learned writer, 16th century

TZSCHIRNER. See TSCHIRNER.

## U

UBALDI, G., a mathematician of the 17th cent.

UBALDINI, PETRUCCIO, an illuminator of Florence, who came to England in the reign of Elizabeth as a teacher of his native language, and wrote several historical works, from 1550-1588.

UBALDINI, ROGER, archbishop of Pisa, in 1276, noted for his cruelty as a Ghibelline chief. Having captured Ugolino and his sons, of the opposite party,

he shut them up in a room and left them to die of hunger.

UBERTO, F. DEGLI, an Italian poet, died 1370.

UCCELLO, P., an Italian painter, 1349-1432.

UCHENSKI, J., primate of Poland, died 1581.

UDAL, JOHN, a rigid puritan and Oriental scholar, died in the Marshalsea prison, London, 1592.

EPHRAIM, his son, vicar of St. Augustin's, Walling Street, a zealous royalist, author of a treatise against

sacrilege, entitled 'A Coal from the Altar,' and other works, died 1647.

UDAL, NICHOLAS, master of Westminster school, author of several works, 1506-1564.

UDALRIC, duke of Bohemia, 1012-1037.

UDEN, L. VAN, a Flemish painter, 1595-1662.

UDINA, GIOVANNI DA, an Italian painter, taught by Giorgione and Raphael, 1489-1562.

UFFEMBACH, or UFFENBACH, Z. C. VON, a learned German biographer, 1683-1734. His brother, JOHN FREDERIC, a lyric poet, 1687-1769. PETER, a physician, died 1635.

UGGERI, A., an Italian antiquary, 1754-1837.

UGGIONE, M., an Italian painter, died 1520.

UGHELLI, F., an eccles. historian, 1595-1670.

UGOLINO. See GHERARDESEA.

UHLICH, G., an Austrian historian, 1743-1794.

UULKENS, JAMES ALBERT, a Dutch naturalist, was born near Groningen, in 1772. Among his numerous works are, an 'Elementary Treatise on Physics,' a 'Discourse on the Perfections of the Creator considered in the Creature,' 4 vols.; and a 'Manual of Technology.' In 1815 he was appointed to the chair of rural economy at Groningen, and died in 1825.

UITENBOGAARD, J., a Dutch theologian of the party of Remonstrants, 1557-1650.

ULADISLAS, seven kings of Poland:—ULADISLAS I., duke or king, succeeded his brother, Boleslas, in 1081 or 1082; his reign was troubled with civil and foreign wars, died 1102 or 1103. ULADISLAS II., succeeded his father, Boleslas III., in 1138 or 1139; he was deposed 1146, and died in exile 1159. ULADISLAS III., was elected king 1202, and deposed in 1206 on account of his cruelties, died 1233. ULADISLAS IV., surnamed LOKETEK, became master of the kingdom in 1296, was deposed by the states, and Wenceslaus elected in his room, 1300, but was restored on the death of the latter in 1305 or 1306. He sustained a war with the Teutonic knights, and died 1333. His son, Casimir III., called *the Great*, succeeded him. ULADISLAS V., grand duke of Lithuania, obtained the crown by marrying Hedwiga, daughter of Louis. See JAGELLON. He was succeeded by his son, Casimir IV. ULADISLAS VI., son of Casimir IV., same as LADISLAUS VI., king of Hungary; see that article. ULADISLAS VII., son of Sigismond, was born 1595, and succeeded his father 1632. He had previously sustained a war with the house of Romanoff, and now in 1633-4 he conquered the Turks and the Tartars of the Crimea. Died 1648.

ULADISLAS, three dukes or kings of Bohemia:—ULADISLAS I., reigned 1109-1125. ULADISLAS II., succeeded 1140, deposed and died in the same year, 1173. ULADISLAS III., reigned only a few months in 1198, and died 1222. The sixth king of Hungary and Poland of this name, became king of Bohemia in 1471. See LADISLAUS.

ULDIN, a king of the Huns, 400-412.

ULEFELD, CORNIFIX or CORFITO, Count, a Danish statesman time of Christian VI., d. 1664.

ULFT, J. VANDER, a Dutch painter, 1627-80.

ULLOA, A. DE, a Spanish historian, d. 1580.

ULLOA, ANTONIO DE, a Spanish general and statesman, a great promoter of industrial and scientific progress in that country, 1718-1795. Ulloa's great distinction was in the mathematical sciences; and when very young he was sent to South America to co-operate with Condamine and the other French academicians in measuring a degree of the meridian. His talents, more lately, were turned to account in the construction of public works requiring engineer-

ing skill, the introduction of the woollen manufacture, &c.

ULLOA Y PEREIRA, LOUIS DE, a Spanish poet, time of Philip IV., died 1660.

ULPHILAS, a Gothic bishop, known to history about 375 as a delegate to the emperor Valens, from whom he solicited a settlement in Thrace for his countrymen. He is said to have translated the Bible into the Gothic language, and to have invented the characters for that purpose.

ULPIAN, a rhetorician of Antioch, 4th cent.

ULPIANUS, DOMITIUS, a famous jurist of Rome, who became the chief minister of his pupil, the emperor Alexander Severus, in the year 222. He is said to have been a resolute enemy of the Christians; and having effected some reforms in the army, he was murdered by the soldiers at the feet of the emperor and his mother, 228.

ULRIC, PHILIP ADAM, a native of the bishopric of Wurtzburg, a teacher of jurisprudence and a promoter of agricultural improvements, born 1692.

ULRICA, ELEANORA, two queens of Sweden. 1. The wife of Charles XI., and mother of Charles XII., was born in 1656: her father was Frederick III. of Denmark, and her marriage with the Swedish king in 1679 facilitated the establishment of peace between the two countries. She died in 1693. She was remarkable for her great learning and beneficent disposition. 2. The daughter of the preceding, born 1688, succeeded her brother, Charles XII., as queen regnant in 1719, four years after her marriage with prince Frederick of Hesse Cassel. In 1720, she resigned the government into the hands of her husband. Died 1744.

ULRICH, J. H., a Ger. philosopher, died 1813.

ULRICH, JOHN JAMES, a Swiss theologian, 1569-1638. Another of the same names, professor of moral philosophy and natural law, and an ecclesiastical writer, 1638-1731. JOHN GASPARD, an ecclesiastic, author of a curious history of the Swiss Jews, 1705-1768. JOHN RODOLPH, a minister and author of ascetic works, 1728-1795.

ULUGH BEGH, a prince of the Tartars, grandson of the famous Tamerlane, was born in 1394, and succeeded his father on the throne, in 1447. He had been accustomed to the cares of government from his boyhood, and greatly distinguished himself as a patron of learning, and by his own astronomical observations, and works illustrating Eastern history and geography. His elder son having rebelled against him, caused him to be put to death near Samarcand in 1449 or 1450.

UNCAS, chief of the Mohegan Indians in Connecticut, a faithful ally of the English colonists, to whom he rendered great aid in the engagement with the hostile Indians. Died 1654.

UNDERHILL, JOHN, an early settler of Massachusetts, and distinguished himself in the colonial wars with the Indians. He received from Sir Harry Vane in 1637, the command of the troops at Saybrook, Connecticut. In 1641, was made governor of Exeter, Dover, and died in New York, where he had retired in the decline of life.

UNDERWOOD, T. R., an artist and naturalist, author of 'Memorable Events in Paris during the Capitulaton of 1814,' died 1835.

UNGER, J. F., a Ger. economist, 1716-1781.

UNTERBERGER, IGNATIUS, a painter of a Tyrolese family that has produced many celebrated artists, born at Karales, 1744, died 1797.

UNZER, JOHN AUGUSTUS, a German physician, distinguished by his works on physiological and psychological subjects, among which may be mentioned

'A New Doctrine concerning the Movements of the Soul and the Imagination,' 'Thoughts on Sleep and Dreams,' 'On the Sensitive Faculties of Animated Bodies,' 'The Physiology of Animated Nature,' and 'Physiological Researches,' 1727-99. His wife, JANE CHARLOTTE, a poetess and mor., d. 1782.

UNZER, LOUIS AUGUSTUS, a German writer, au. of a 'Treatise on Chinese Gardens,' 1748-1775.

UPHAM, W. E., an Eng. historian, died 1833.

UPSHUR, ABEL PARKER, Secretary of State of the United States, was killed on board the steamer Princeton, by the bursting of the 'great gun,' during a trial trip, February 28th, 1844. He was born in Virginia 1790.

UPTON, JAMES, a learned schoolmaster and divine of the Church of England, editor of classical works, 1670-1749. His son, JOHN, rector of great Rissington, in Gloucestershire, also a classical editor, published an edition of Spenser's 'Faerie Queene,' and Notes on Shakspeare, 1707-1760.

URBAN, eight popes of Rome.—URBAN I., succeeded Calixtus I. in 222, and suffered martyrdom in 230. URBAN II., whose name was Otho or Eudes, a Frenchman, succeeded Victor III. in 1087 or 1088; he struggled against the pretensions of the emperor, and proclaimed the first crusade at the instance of Peter the Hermit, died 1099. URBAN III., reigned in the time of the emperor Frederick I., 1185-1187. URBAN IV., time of St. Louis, to whom he offered the crown of Sicily, which was accepted by the duke of Anjou, 1261-1265. He instituted the festival of Corpus Christi. URBAN V., succeeded Innocent VI. 1362, at the period when the papal court was held at Avignon (see RIENZI); he removed to Rome in 1367, but returned again in 1370, and died at Avignon the same year. URBAN VI., succeeded Gregory XI. in 1378, and became the abettor of Charles Durazzo against Joan of Naples, died after an unquiet pontificate 1389. URBAN VII., died the twelfth day after his election in September, 1590. URBAN VIII., whose family name was MAFFEI BARBERINI, was born at Florence, in 1568. He studied the law at Pisa; after which he entered into orders, and, in 1606, attained the rank of cardinal. In 1628 he was elected to the papal chair, and proved himself a zealous advocate for the interests, spiritual and temporal, of the Roman church. He was also a patron of learning, and founded the college 'De Propaganda Fide.' No less than seventy-four cardinals were created by this pontiff. Died 1644.

URBAN, FERDINAND DE ST., an eminent artist, born at Nancy, in 1654. He became first architect and director of medals to pope Innocent XI., for whom and for his two immediate successors, he executed a great number of moulds or matrices of exquisite beauty. Died 1738.

URCEO, A., a learned Italian, 1446-1500.

URFE, ANNE D', a French poet, 1555-1621. Honore, his brother, a novelist and historian of the gallantries of Henry IV., contained in his romance of Astræa, 1567-1625.

URQUHART, SIR THOMAS, of Cromarty, in Scotland, was a philologist and mathematician. He was a cavalier officer among the followers of Charles II., and was present at the battle of Worcester; relative to which he published a piece, entitled 'The Discovery of a most rare Jewel, found in the Kennel of Worcester Streets,' &c. He was also the author of a work on trigonometry; but the performance which he regarded as his most admirable invention was called 'Logopandecteism, or an Introduction to the Universal Language.'

URQUIJO, MARIANO LOUIS, Chevalier De, a Spanish statesman, born in Old Castile, in 1768. He passed some of his early years in England, and is supposed to have there acquired those liberal notions in politics, which he afterwards displayed. During the ministry of Godoy, he became secretary of state for foreign affairs; but having at length offended the royal favorite, he was disgraced in 1800, and for several years closely confined in the citadel of Pampeluna. On the accession of Ferdinand, in 1808, he was set at liberty; followed the royal family to Bayonne, was afterwards minister of state, and died in 1817.

URREA, J. DE, a Spanish writer, 16th cent.

URRUTIA, J. DE., a Span. general, 1728-1800.

URSIN, J. F., a Germ. philologist, 1735-1796.

URSIN, JOHN HENRY, ecclesiastical superintendent at Ratisbon, author of a 'Compendium of the Ecclesiastical History of Germany,' died 1667. GEORGE HENRY, his son, a philologist and teacher of the *Belles Lettres*, 1647-1707.

URSINS, ANNA MARIA DE LA TREMOILLE, Princess De, a celebrated name in Spanish history, was born in France about 1643. She was married in 1659 to the prince of Talleyrand Chalais, and in 1675 to the duke of Bracciano, chief of the Orsini family. After the death of the latter she was attached to the court of Spain, and really governed the country during the early part of the reign of Philip V. In 1714, however, she was banished the kingdom, and subsequently kept house for the Pretender, James Stuart. Died 1722.

URSINS, J. JOUVENEL DES. See JUVENAL.

URSINUS, B., a Germ. mathematic., 1587-1633.

URSINUS, ZACHARY, a German professor of divinity and friend of Melancthon, author of several works, some of which have been translated into English, and a man of high moral character, 1534-1577. A descendant of his, named BENJAMIN, was raised to the prelacy when Frederic I. assumed the title of king of Prussia in 1701. For others of the name see above (URSIN).

URSULA, SAINT, a virgin and martyr, supposed to have been a daughter of a British prince, and to have been put to death at Cologne at a date which varies from 384 to 463. There is a legend that 11,000 virgin martyrs suffered with her, which some have explained by supposing that she had a companion named *Undecimilla*. It is pretty certain, however, that many were put to death at the same time. She is regarded as the patroness of the Sorbonne.

URSUS, NICHOLAS RAYMARUS, a Danish mathematician, who died in 1600. He invented an astronomical system, so like that of Tycho Brahe as to bring him into a dispute with that astronomer respecting the right of discovery.

URVILLE. See DUMONT.

USHER, JAMES, D.D., was born at Dublin, 4th January, 1580. Early destined for the ministry, he was entered a student in the university of Dublin, where he acquired a brilliant reputation as a scholar in Latin, Greek, Hebrew and divinity. In this latter department, his unquenchable thirst for knowledge had led him into a course of reading far more extensive than that which is commonly pursued even by enthusiastic students of theology—for during his residence at the university, he had not only read the works of all the most celebrated of modern theological writers—but even most of the fathers; and more especially he had gained so complete a mastery of the popish controversy, that at the age of eighteen, he entered the lists with a learned Jesuit who had

given a general challenge to the protestants. With a reputation for learning so high, his promotion in the church was rapid. Having in 1601 obtained orders in the episcopal church, he was appointed Sunday preacher before the government at Christ's church, Dublin. In 1607 he was chosen professor of divinity in the university and chancellor of the cathedral of St. Patrick. He now entered on a career of authorship; and the first work he undertook being an historical dissertation on the government and discipline of the church, he made a tour through England with a view to prosecute some inquiries in the libraries of the two universities. His fame procured him a welcome reception in these venerable seats of learning. His treatise was published in London, 1610, and a copy of it having been presented by Archbishop Abbot to King James, that monarch, delighted with so powerful a defence of his favorite episcopacy, loaded the author with tokens of his royal approbation—raising him to the bishopric of Meath which was then vacant, and afterwards constituting him a privy councillor of Ireland. By the royal command, Usher went to reside some years in England to prosecute researches into the antiquity of the British churches, and during his residence there the archbishop of Armagh having died suddenly, he was elevated to the high position of primate of Ireland, in January, 1624. The results of his antiquarian researches were given to the world in 1632, when he published a rare collection of letters from ancient MSS., extending from the year 592 to 1180. Usher being a man of liberal sentiments as to church government, maintained a friendly correspondence with all the eminent men in the churches both of England and Scotland, and took a lively interest in the progress of the gospel throughout the world, by whatever church or instrumentality the truth was diffused. Being, in 1640, driven from his see by the rebellion, and stripped of all his property except his books, he sought an asylum in England. In 1648 he was summoned to the Isle of Wight, to aid the king in negotiating with the parliament respecting the introduction of a uniform system of episcopacy. He sketched out a middle scheme which obtained the warm approbation of his royal master as the best expedient to settle the differences. But the expectations of this good man were sadly disappointed. The Scottish people would not receive it, and the imprudent attempts to force it on their acceptance, gave rise to the religious wars of which Scotland was the theatre during the seventeenth century. Usher again came before the world in 1650 as an author by the publication of his celebrated 'Annals of the Old and New Testament.' Various other works issued from his industrious pen; and he was the author of the received chronology of the Bible. After a long and active life, distinguished by usefulness, and adorned by works of piety, he died on the 20th March, 1656. [R.J.]

USHER, JAMES, of the same family as the distinguished prelate (preceding article), born of Catholic parents in 1720, and known as a philosophical writer against Locke, died 1772.

USSIEUX, L. D', a Fr. agriculturist, 1747–1805.

USTARIZ, GABRIEL, one of the leaders of the revolution in Spanish America, 1772–1814.

USTARIZ, JEROME, a Spanish economist, author of the 'Theory and Practice of Commerce and Navigation,' died about 1760.

USTERI, LEONARD, a Swiss writer on education, was born at Zurich, in 1741. The reform in the schools and gymnasiums, effected in 1773, were chiefly owing to his exertions. He was keeper of the public library, and member of the philosophical society at Zurich. Died 1789.

USUARD, a French hagiographer, 9th century.

UTENHOVIUS, CHARLES, a polemical and political divine, born at Ghent, about 1536. On the death of queen Mary he visited England, and wrote in defence of the reformed religion, and of Elizabeth's right to the throne, which raised him high in her favor. He died at Cologne, towards the end of the 16th century.

UVA, BENEDETTO DELL', an Italian ecclesiastic and writer of sacred poetry, 16th century.

UVEDALE, ROBERT, a classical scholar and botanist, born in London 1642. The date of his death is unknown, but he assisted Dryden in translating Plutarch's Lives. Another Uvedale translated the Memoirs of Philip de Comines.

UWINS, DAVID, M.D., an eminent physician and medical writer, was born in London, in 1780. After going through a regular course of hospital instruction, and completing his studies at Edinburgh, he commenced practice as assistant-physician to the Finsbury Dispensary; subsequently settled at Aylesbury; and, returning to London shortly after he had married, was elected physician to the City Dispensary in 1815. He particularly directed his attention to mental diseases; and an essay on 'Insanity and Madhouses,' in the Quarterly Review for July 1816, established his power as a medical writer. He also wrote 'Reports' in the Monthly Magazine, and afterwards became editor of the Medical Repository. In 1828 he was appointed physician to the lunatic asylum at Peckham, and published a work on 'Insanity,' which was eagerly read. But his last production, a pamphlet on 'Homœopathy,' is supposed to have injured his professional reputation. He died in September, 1837.

UXELLES, NICHOLAS DE BLE, Marquis D', a French commander, time of Louis XIV., 1652–1730.

UZ, JOHN PETER, a German scholar and poet, who filled several magisterial offices at Anspach, in Franconia, of which place he was a native, 1720–1796.

UZBEK, a khan of a portion of the people now governed by the emperor of Russia, since called, after his name, Uzbeks, 1305–1342.

UZES, ALDEBERT D', so named from his birthplace, bishop of Nismes, and one of the council which condemned the Albigenses, died 1180.

UZZANO, NICOLÒ D', a Florentine statesman, attached to the aristocracy and the Guelph party, succeeded Albizzi as chief of the republic, 1417, died 1432. After his death his political supporters became exiles from their country.

## V

VACA DE GUZMAN, JOSEPH MARIA, a Spanish poet, born in Grenada about 1745, died 1805.

VACAORIUS, an Italian civilian, who became professor of law at Oxford, 12th century.

VACCA, ALVAR NUNEZ CAEZA DE, a Spanish governor of Paraguay, transported to Africa for his avarice and cruelty in 1539.

VACCA, FLAMINIO, an Italian sculptor of the 16th century, who was employed by Sixtus V. in restoring and beautifying the public edifices of Rome, of the antiquities of which city he wrote a memoir.

VACCA BERLINGHIERI, FRANCIS, a Spanish physician, 1732-1812. His son, ANDREW, a surgeon, died at Pisa in 1826.

VACCARO, A., a painter of Naples, 1598-1670.

VACCHIERI, C. A., a Ger. histor., 1745-1807.

VACHET, B., a French missionary, 1641-1720.

VADDER, L. DE, a Flem. painter, 1560-1623.

VADDERE, J. B., a Flemish historian, 1640-91.

VADE, JOHN JOSEPH, a French farce and song writer, was a native of Ham, in Picardy. He was the first who introduced, on the French stage, the coarse but expressive language of the Parisian mob; and his comic operas, &c., exhibit all the low humor and vivacity of that class, whose manners he delighted in representing. He died, aged 37, in 1757.

VADIANUS, the Latinized name of JOACHIM VON WATT, a German *savant*, 1484-1551.

VADIER, M. W. ALEXIS, a Jacobin of the French revolution, who took part in most of the violent scenes of that period, and was the accuser of Catharine Theos and her party. The last scene in which he acted, was the conspiracy of Babeuf; born in Languedoc 1735; died in exile 1828.

VAGA, PIERINO DEL, whose real name was Buonaccorsi, an Italian painter, 1500-1547.

VAHL, MARTIN, an excellent botanist, was born at Bergen in Norway, 1749 or 50. He died in 1804. Vahl commenced his studies in natural history under Strom at Copenhagen. After two years he removed to Upsal, where he prosecuted his botanical studies under the great Linnæus, and became one of his most distinguished pupils. He found favor in the eyes of Mademoiselle Linné, but Linnæus, at that time in the zenith of his fame, did not consider a poor botanist a sufficient match for his daughter. In 1779 he became lecturer and demonstrator of botany in the garden at Copenhagen, and a few years afterwards filled the chairs of natural history and botany in the university of that town. He travelled under royal auspices and at the expense of his sovereign through a great portion of Europe, and made an extensive collection of plants. Being provided with excellent introductions, he had free access to the libraries and museums of the various literati of the towns he visited. In London the rich herbarium of Sir Joseph Banks was open to him, and he had the privilege of examining the manuscripts of Banks's friend Dr. Solander. He taught botany with much success at Copenhagen, and has left behind him several excellent works which have established his reputation as a first-rate botanist. A genus of plants was dedicated to him by his contemporary Thunberg, under the name of Vahlia.

VAILLANT, FRANCIS LE, son of the French consul at Paramaribo, in Dutch Guiana, an eminent traveller and ornithologist, 1753-1824.

VAILLANT, G. H., a Latin poet, died 1678.

VAILLANT, JAEN FOI, one of the greatest of

European medallists, time of Colbert, the minister of Louis XIV., by whom he was employed on several important scientific missions, born at Beauvais 1632, died 1706. His son, JEAN FRANCIS FOI, was a physician, and cultivated the same branch of sciences as his father, 1655-1708.

VAILLANT, SEBASTIAN, an able botanist, who became director and professor at the Jardin du Roi, in the reign of Louis XIV., 1669-1722. The principal work of Vaillant is his '*Botanicon Parisiense*.' He is said to have taught the sexual system of plants.

VAILLANT, WALBRANT, a French painter and engraver, 1623-1677. He taught three of his brothers who followed the same profession—BERNARD, JAMES, and ANDREW, but the particular dates are unknown.

VAILLANT-DE-GUELLE, G., bishop of Orleans, a philologist and poet, died 1587.

VAISSETTE, J., a French historian, 1685-1756.

VALADON, ZACHARIAH, a French Capuchin and missionary who labored in Asia Minor, and signalized himself by his devotion to the suffering people during the plague at Marseilles, born about 1680, died 1746.

VALARESSO, C., an Italian poet, 1700-1769.

VALARSACES, a king of Armenia, descended from Mithridates the Great, 150-127 B.C.

VALART, J., a French *savant*, 1698-1781.

VALAZE, CHARLES ELEONORE DU FRICHE DE, a native of Alençon, born in 1751; one of the Girondists in the French National Convention, who, opposing the sanguinary violence of Robespierre, were suppressed and destroyed by him. When arrested on the 31st of May, 1793, with his colleagues, he was offered means of escape, but refused. At the moment that Herman, the president of the revolutionary tribunal, pronounced sentence of death on him and his friends, on the charge of federalism, he poniarded himself. His body, at the instance of the execrable Fouquier Tinville, was carried to the scaffold, and beheaded. The convention granted a pension to his widow and children, on the fall of Robespierre.

VALCARCEL, JOSEPH ANTHONY, a Spanish writer on agriculture, flourished about 1720-1792.

VALCARCEL, PIO ANTONIO, Count De Lunares, a learned Spanish antiquarian, 1740-1800.

VALCKENAER, LOUIS CASPAR, an able philologist and critic, was born at Leeuwarden, in Friesland, in 1715; and became professor of natural history, Greek, and antiquities, at the university of Leyden, where he died in 1785. His works are numerous and erudite. His son, JOHN VALCKENAER, who was professor of jurisprudence at Franeker, having joined the party against the house of Orange, was obliged to take refuge in France, but returned to Holland at the invasion of that country by the French, in 1795, and took a very active part in politics. He was subsequently employed in diplomatic missions to Prussia, Spain, and Paris. Died 1820.

VALDEMAR. See WALDEMAR.

VALDES, ANTHONY, a Spanish statesman, who in 1796 yielded his office to Emmanuel Godoi, about 1735-1811. CAYETANO, his nephew, a member of the Cortes 1822, executed 1826.

VALDES, F., a Spanish tactician, 16th century.

VALDES, VALDESSO, or VALDESIUS, JUAN, a Spanish controversialist and reformer, generally claimed by the Socinians, died 1540.

VALDES, L. DE, a Spanish painter, 1661–1724.

VALDEZ, J. M., a Spanish poet, died 1817.

VALDO, PETER, generally considered the founder of the *Vaudois* or *Waldenses*, a body of Christians who separated themselves from the Church of Rome in the twelfth century, was born at Vaux, in Dauphiny, on the banks of the Rhone. He acquired a large fortune by commercial pursuits at Lyons; and when he resolved to retire from business, not only devoted himself to the spiritual instruction of the poor, but distributed his goods among them, and in all respects treated them as his children or his brothers. The only version of the Bible in use at that time, was the Latin Vulgate, but Valdo, who was a learned as well as a benevolent man, translated the four Gospels into French, this being the first appearance of the Scriptures in any modern language. The possession of these books soon discovered to Valdo and his people that the church was never designed to be dependent on a priesthood, even for the administration of the sacraments; and his instruction, boldly followed by practice, became so obnoxious to the church, that he was first persecuted by the archbishop of Lyons, and at length anathematized by the pope. No longer safe at Lyons, Valdo and his friends took refuge in the mountains of Dauphiny and Piedmont; and there formed those communities which grew in peace, and flourished in rustic simplicity,—‘pure as a flower amid Alpine snows.’ From these mountain valleys the simple doctrine of Christianity flowed out in multiplied rivulets over all Europe; Provence, Languedoc, Flanders, Germany,—one after the other tasted of the refreshing waters, until in course of ages they swelled to a flood that swept over all lands. Valdo is understood to have travelled in Picardy, teaching his reformation; he finally settled in Bohemia, where he died in 1179; the same year in which his tenets were condemned by a general council. [E.R.]

VALDORY, C., a French ascetic, 17th century.

VALDRIGI, T., an Italian jurist, 1761–1834.

VALENCIENNES, PETER HENRY, a French landscape painter, 1750–1819.

VALENS, FLAVIUS, emperor of Constantinople, son of a noble of Pannonia, was born in 328, and associated in the Roman empire with his brother, Valentinian I., who abandoned the East to him, 364. He embraced Arianism, and in 376 allowed the Goths, whom he had previously subjugated, to settle in Thrace. This warlike people, however, were provoked to take arms again, and having defeated the troops of Valens, they burnt the emperor in his tent, 378.

VALENS, JULIUS, an usurper of the Roman empire, proclaimed in the reign of Decius, and killed a few days afterwards in 251.

VALENS, PUBLIUS VALERIUS, a nephew of the preceding, killed by his soldiers 261.

VALENTIA, G., a Spanish ascetic, 1551–1598.

VALENTIA, P. DE, a Span. jurist, 1554–1620.

VALENTIN, L. A., a Fr. surgeon, 1736–1823.

VALENTIN, M., a French painter, 1600–1632.

VALENTIN, M. B., a German naturalist, 1637–1726.

VALENTINE, B., an alchemist, 16th century.

VALENTINIAN, three emperors of Rome :—VALENTINIAN (FLAVIUS) I., elder brother of Valens, and son of Count Gratian, was born in Pannonia 321, and succeeded after the death of Jovian 364. He gave the Eastern empire to his brother, and having defeated the Alemanni and the Quadi, died in a fit of passion 375. VALENTINIAN (FLAVIUS) II., son and successor of the preceding, was proclaimed em-

peror by the troops, and his brother, Gratian, at once ceded Italy to him. The latter shortly after was vanquished by Maximus, and Valentinian would also have lost his throne but for the timely help of Theodosius, emperor of the East, who put Maximus to death, and left Valentinian master of the whole Western empire. He was strangled by order of his rebellious general, Arbogastes, 392. VALENTINIAN (PLACIDIUS) III., became emperor at the age of six in 425, under the regency of his mother, Placidia. He was assassinated in 455.

VALENTINIANUS, founder of the sect of Gnostics named *Valentinians*, was a native of Egypt, and became publicly known as a teacher of strange doctrines in 140, when he went to Rome. He was excommunicated 143, and died after boldly devoting himself to the spread of his tenets in Syria, 160.

VALENTYN, F., a Dutch missionary, 17th cent.

VALERA, D., a Spanish historian, 15th century.

VALERIA, a Roman empress, daughter of Diocletian, and wife of Galerius Maximus, exiled and killed after his death, 315.

VALERIAN, PUBLIUS LICINIUS, a Roman emperor, born about 190, was proclaimed after the death of Gallus 253. He was defeated in the East by Sapor, king of Persia, and supposed to have been flayed alive, 260.

VALERIANO BOLZANI, PIERIO, in Latin *Valerianus*, a learned Italian, 1477–1558.

VALERIANUS. See VALERIAN.

VALERIUS, LUCAS, an Italian mathematician, called the Archimedes of his age, died 1618.

VALERIUS FLACCUS, CAIUS, author of a Latin poem, entitled *Argonautics*, 1st century.

VALERIUS MAXIMUS, a Roman historian, who was in Asia with Sextus Pompeius, A.D. 14, besides which nothing is known of him. His work contains many valuable anecdotes and examples of moral excellence, and was one of the earliest printed after the revival of letters.

VALERIUS PUBLICOLA, one of the founders of the Roman republic, 6th century B.C.

VALESIO, J. L., an Italian painter, 16th cent.

VALETTE, JEAN PARISOT DE LA, grand master of the order of St. John at Jerusalem, renowned for his defence of Malta in 1565, and founder of La Valette; died 1568.

VALETTE, SIMEON, whose proper name was FAGONS, a French mathematician, 1719–1801.

VALIERO, A., a Venetian *savant*, 1531–1606.

VALINCOUR, JEAN BAPTISTE DU TROUSSET DE, a miscellaneous French writer, 1653–1730.

VALLA, GIORGIO, an Italian professor of polite literature, known 1471–1486.

VALLA, J., a learned theologian, died 1790.

VALLA, LORENZO, a distinguished Latin scholar, and one of the revivers of literature in the 15th century, born at Rome 1406, died 1457.

VALLA, N., a French jurisconsult, 16th century.

VALLANCY, or VALLANCE, a writer on the antiquities of Ireland, was born in 1721. During his residence in Ireland, as an officer in a corps of engineers, he assiduously devoted himself to the study of the language, topography, and antiquities of that country; made a survey of the island, for which he received £1000; and wrote a ‘Grammar and Dictionary of the Irish Language,’ ‘Collectanea de Rebus Hibernicis,’ &c. He attained the rank of a general, was a member of several scientific institutions, and died, aged 90, in 1812.

VALLE, PIETRO DELLA, a celebrated traveller of the 17th century, was born at Rome, in 1586, of a noble family. His travels, though not free from

credulity and a love of the marvellous, are highly interesting. He visited Turkey, Egypt, Arabia, Persia, and India, passing upwards of eleven years in these countries, and studying the languages and manners of the inhabitants. At Bagdad he married a beautiful Georgian, who accompanied him on his travels, until her death, at Mina, in Caramania, in 1622. Her death so affected him, that he caused her body to be embalmed, and took it about with him until his return to Rome, where he buried it with great magnificence, and pronounced the funeral oration himself. Died 1652.

VALLEE, G., a French deist, hung 1574.

VALLEE, J. LA, a French writer, 1747-1816.

VALLI, EUSEBIUS, an eminent Italian physician, born at Pistoia, in 1762. He travelled to Smyrna and Constantinople, in order to make his observations on the plague; and tried the bold experiment on himself, to determine the efficacy of vaccination as a preservative from that dreadful malady. At length he fell a victim to his imprudence; for in September, 1816, having gone to the Havannah, to add to his observations on the yellow fever, he purposely exposed himself to the influence of the contagion, and caught the disease, of which he died. His works on the subjects he so closely investigated are considered valuable.

VALLIER, F. C., a French poet, 1703-1778.

VALLIERE, JEAN FLORENT DE, a French officer of artillery time of Louis XIV., 1667-1739. His son, JOSEPH FLORENT, 1717-1776.

VALLIERE, LOUISE FRANCOISE DE LA BAUME LA BLANC, Duchess De La, lady of honor to Henrietta of England, and mistress of Louis XIV., was born in Touraine 1644. She had two surviving children by the king, Mademoiselle de Blois and the count of Vermandois, the latter of whom was legitimated in 1667. She was abandoned for Madame de Montespan, and retired to the convent of Chailot in 1671; died 1710. Her grand-nephew, LOUIS CÆSAR DE LA BAUME LE BLANC, Duc De La Valliere, was a celebrated bibliophile, flourished 1708-1780.

VALLISNERI, ANTONIO, an eminent Italian physician and naturalist, 1661-1730.

VALLOT, A., a French physician, 1594-1671.

VALLOTTI, F. ANTONIO, an Italian musician and chapel-master in Padua, 1697-1780.

VALMIKI, the most ancient and most celebrated of the epic poets of India, author of the *Ramayana*, translations of which were published in English and Germany at the beginning of the present century.

VALMONT DE BOMARE, JAMES CHRISTOPHER, a French naturalist, 1731-1807.

VALOIS, HENRY DE, in Latin *Valesius*, a learned philologist and critic, 1603-1676. ADRIAN, his brother, a philologist and historian, 1607-1692. CHARLES, son of the latter, an antiquarian writer and historian, 1671-1747.

VALOIS, L. LE, a French Jesuit, 1639-1700.

VALOIS, YVES, a French Jesuit, born 1694.

VALPERGA DI CALUSO, THOMAS DES, a Piedmontese mathematician and astronomer, was born at Turin, in 1730. He first served in the navy, but quitted the profession of arms for that of an ecclesiastic, and devoted much of his attention to science. He was member of the grand council, and director of the observatory of the university of Turin, a member of the legion of honor, &c. Died 1815.

VALPY, DR. RICHARD, F.A.S., an eminent classical scholar, was a native of Jersey, and born in 1754. At 10 years of age he was sent to the college of Valognes, in Normandy, where he remained

five years; thence to the grammar school at Southampton; and completed his studies at Oxford, having been appointed to one of the scholarships founded in Pembroke College for the natives of Jersey and Guernsey. From Oxford he removed first to Bury St. Edmund's, and afterwards (1781) to Reading, where he had been unanimously elected headmaster of the school founded by Henry VII. His unwearied industry in discharging the duties of a public instructor was not confined to the school-room; all the hours he could spare were spent in his study, and numerous elementary works of acknowledged excellence were the result of his praiseworthy exertions. About six years before his death he retired from his scholastic labors, when his youngest son, the Rev. F. Valpy, was elected as his successor. Died 1836.

VALPY, EDWARD, an eminent scholar, brother of the preceding, was educated at Trinity College, Cambridge; and, after having been assistant several years in the school at Reading, obtained the mastership of the grammar school at Norwich. He was rector of All Saints, Thwaite, and vicar of St. Mary, Walsham, Norfolk. He published '*Elegantiae Latinæ*' and other classical works. Died 1832.

VALSALVA, ANTONIO MARIA, an Italian physician and anatomical discoverer, 1666-1723.

VAN ACHEN, or AKEN, HANS, a German painter, distinguished for his sacred subjects, 1552-1615.

VANBRUGH, SIR JOHN, was the grandson of a protestant refugee from the Netherlands, and the son of a wealthy sugar baker. He was probably born in 1666. We know very little as to the history of his youth, or as to the training which enabled him not only to become one of the most celebrated among English architects, but, also, in conjunction with Congreve, to prolong, in the beginning of the eighteenth century, the licentious cleverness that had characterized the comic drama in the reign of Charles II. He is said to have passed some years of his youth in France, and was afterwards, for a short time, an ensign in the army. His career as a dramatist belongs, like that of Wycherley, to a few of the early years of his manhood. Two or three of six or seven plays deserve no record. The first of them, '*The Relapse*,' appeared in 1697; and '*The Provoked Wife*,' the best of the series, immediately afterwards. In 1706 his vigorous picture of rascality, called '*The Confederacy*,' was brought out at the new theatre in the Haymarket, an unsuccessful speculation of Vanbrugh and Congreve. He left uncompleted, at his death, '*A Journey to London*,' which was worked up by Colley Cibber into '*The Provoked Husband*.' He had, previously to the opening of this theatre, become eminent as an architect, by designing the magnificent pile of Castle Howard; and Lord Carlisle, being then Deputy Earl Marshal, appointed Vanbrugh to be Clarenceux king-at-arms. The new herald's presumed ignorance of his science was indignantly complained of by his colleagues, and merrily jested at by himself. He was next chosen as the architect of Blenheim; and, in the execution of this charge, in the midst of annoyances which (though vexatious in themselves) were sometimes as comic as any thing in his plays, he produced the noblest monument of his striking though heavy architectural style. He died in 1726, having been liked as a good-natured man, and having lived more decently than he wrote.

[W.S.]

VANCE, GEORGE, an eminent surgeon, who, during the latter period of his life, resided in Sackville Street, Piccadilly, was distinguished for his abilities

in difficult cases, particularly in diseases of the stomach and liver. He acquired great reputation for his skill early in life, and was one of the resident surgeons of Haslar Hospital, near Gosport, for 17 years. His death occurred in consequence of an accident which happened to him while in attendance on one of his patients, a Mr. Broadley, residing in Lower Grosvenor Street. Mr. Vance had on a previous visit to this gentleman found him in a state of such excitement as to recommend his being placed under the charge of a competent attendant, which had accordingly been done; but at his next visit, while in the act of walking up the stairs, Mr. Broadley suddenly rushed from his room, and coming in violent collision with him, he was precipitated to the bottom. He survived this melancholy event only six days; 'thus terminating,' as his friend Dr. Willis truly observed, 'a life of ardent devotion to the duties of his profession, and of exemplary conduct in all the social relations of life,' Mar. 27, 1837.

VANCEULEN, or VANKEULEN, LUDOLPH, a Dutch mathematician, who made a remarkable approximation to the true ratio which the circumference of a circle bears to its diameter, died at Leyden 1610.

VANCOUVER, GEORGE, the distinguished navigator, a pupil and successful imitator of Cook, entered the naval service in 1771, when only thirteen years old. He served as midshipman on Cook's second and third voyages, 1772-80. On his return home he was made lieutenant, and appointed to the *Martin* sloop; and was variously employed in the public service for eleven years. In 1791 he received a command for the prosecution of maritime discovery. He was made captain, and appointed to the ship *Discovery*, again fitted out for an expedition. A small armed vessel, the *Chatham*, 135 tons, Captain Broughton, sailed in company; and the two ships left Falmouth on the 1st April, 1791. The objects, as laid down in the instructions, were to receive from the Spaniards the surrender of the settlement at Nootka, to survey the N.W. coast of North America northwards from lat. 30°, with a special view to water communications with the interior, which might facilitate the operations of the fur traders; to pass the winter in a survey of the Sandwich Islands; and, on the homeward voyage, to make a careful inspection of the western coast of South America. The first three objects were successfully accomplished; 9,000 miles of sea coast in North America were surveyed with scrupulous accuracy, after the manner of his great master, whose methods of preserving health also, he followed with such success, that during his voyage of four years' duration, and through an arduous service, he lost but two men from both crews. The third object stated was but imperfectly attended to, owing to the lateness of the season, and the stormy character of the weather. On the outward voyage to the Sandwich Isles, however, Vancouver had carefully examined the south coast of Australia, and a part of the shores of New Zealand. During his stay also at the Sandwich Isles, the native chiefs held a convocation, at which, after a protracted and amicable discussion, it was resolved to place the islands under British protection. Four European nations were at this time known to them, and they were in a condition to judge which of the four was the most likely to be a disinterested and able protector. The result was no doubt owing to the respect and confidence which Vancouver inspired. The *Discovery* was safely brought into the Shannon on the 13th September, 1795. Her commander was now post-captain, the promotion

having taken place the previous year. He was paid off on his return; and, henceforth, occupied himself in preparing an account of his voyage, with charts exhibiting his surveys. The labor, however, which he had bestowed on this great work had undermined his constitution, and brought about a premature end.—He died in May, 1798, before his work was finished; the printing had proceeded as far as the 408th page of the third volume, and the charts had all been completed some time before, under his own eye. The remaining part of the narrative was drawn up from his papers by his brother, JOHN.

[J.B.]

VAN DALE, ANTHONY, a Dutch theologian and antiquarian, author of '*De Oraculis*,' 1638-1708.

VANDAMME, DOMINIQUE, a French general, born in 1771. He entered the military service very young, and was made general of division in 1799, after distinguishing himself in the revolutionary campaigns of the Rhine. He served in most of Napoleon's campaigns in Austria in 1806-7-9; but was not in the Russian campaign of 1813, having been disgraced in consequence of some dispute with Jerome Buonaparte. But he had the command of the 32d division in 1813. With that corps he fell into an ambuscade at Kulm, his forces were nearly all cut to pieces, and himself, being made prisoner, was sent to Kasan, near Siberia. He was restored to freedom by the peace of 1814, but ordered to quit Paris in 24 hours. He joined Buonaparte during the hundred days, and served in Grouchy's division at the time of the battle of Waterloo. He made a skilful retreat, and offered the provisional government to defend Paris with the 80,000 troops he had saved and collected; but was compelled by the negotiations to retire behind the Loire. In 1816 he was banished by ordonnance to Ghent, and afterwards fixed his residence in the United States. By a subsequent ordonnance he was permitted to re-enter France, and put on half-pay in 1824. He died in 1830.

VANDELLI, DOMENICO, an Italian physician and naturalist time of Linnaeus.

VANDERGOES. See GOES.

VANDERHELST. See HELST.

VANDERHEYDEN. See HEYDEN.

VANDERLYN, JOHN, an American painter. Having early displayed a genius for his art he was sent to Paris in 1796 to cultivate his natural talents by study. He returned to the United States after five years of diligent application in the French capital; and soon after his arrival furnished his first historical piece, 'The Murder of Miss McCrea by the Indians.' Vanderlyn subsequently visited Rome and resided there several years. 'Marius on the Ruins of Carthage' was one of the first fruits of his Italian culture. This picture was exhibited at the Louvre in 1808 and received the gold medal, and the personal compliments of Napoleon Buonaparte. It was in the hard classical style, so much in vogue in those days of affected admiration for the Roman antique. Vanderlyn returned to this country in 1815, and for a while was engaged in the painting and exhibition of panoramas, which turning out to be an unprofitable enterprise, involved him in pecuniary difficulties that pressed upon him for the rest of his life. In 1832 the government of the United States gave him the commission to paint a full length portrait of Washington for the Hall of the House of Representatives. On its completion he received fifteen hundred dollars beyond the price agreed upon. In 1839 he was one of three appointed to paint a picture for the vacant panels of the Rotunda of the

capitol. He accordingly painted 'The Landing of Columbus' for that purpose. He died 1852.

VANDERMONDE, one of the most famous of modern mathematicians, 1735-1796.

VANDERSCHÆTEN, FERDINAND, a Flemish economist and publicist, 1771-1823.

VANDERVELDE, CHARLES FRANCIS, the most celebrated modern novelist of Germany, 1772-1824.

VANDERVELDE, WILLIAM, called the Old, a celebrated painter, was born at Leyden, in 1610. He excelled in marine subjects, and with his son, whose pursuits in art were similar to his own, he came to London, and received a pension from Charles II. At the great naval fight between the Duke of York and the Dutch admiral Opdam, Vandervelde sailed between the hostile fleets in a light skiff to mark their positions and observe their operations; and in this manner he is said to have been also a spectator of the memorable three days' engagement between Monk and De Ruyter. Died 1693. His son, of the same name, called the Young, regarded as the most eminent of all the marine painters, 1633-1707. There were three others of the name: —ISAIAH, born at Leyden about 1591; JOHN, his brother, a painter and engraver, born about 1598; and ADRIAN, who was a celebrated landscape painter, 1639-1672.

VANDERVENNE, a Dutch painter, 1586-1650.

VANDERWERFF, ADRIAN, a Dutch portrait and historical painter, 1659-1722.

VANDI, A. J. D., a German chemist, died 1763.

VAN DIEMEN. See DIEMEN.

VANDREUIL, MARQUIS DE, the French governor of Canada in 1703. Died 1725.

VANDYCK, ANTONY, was born at Antwerp, March 22, 1599, and is the most distinguished of all Rubens' numerous scholars. He lived with that great painter for four years, and by his advice visited Italy, in 1621, where he remained for five years, chiefly at Genoa, Venice, and Rome, and returned to Antwerp in 1626. A picture of the Crucifixion painted for the church of St. Michael, at Ghent, raised his reputation at once to the highest rank, and he obtained equal distinction as a portrait painter. Vandyck visited England a second time, 1630-31, but without attaining that notice which he had expected; he accordingly returned to Antwerp; but Charles I. having seen, by him, a portrait of Nicolas Lanière, his chapelmaster, sent him an invitation to return to England, and he was courteously received by the king, who lodged him at Blackfriars, and conferred the honor of knighthood upon him the following year, 1633, with the title of painter to his majesty, and a fixed salary of £200 per annum for life. These advantages fixed Vandyck in England, and he justified the king's choice by a long succession of the most magnificent portraits that had yet been produced out of Italy; indeed, the portraits of Vandyck are by some preferred to those of Titian; they have not the pictorial force of those of the great Venetian, but they are more refined generally, and are distinguished for more careful drawing and a more elaborate finish; the men of Titian, and the women of Vandyck, are superior. Vandyck died in London, December 9, 1641, at the early age of forty-one. Yet, notwithstanding his comparatively short life, such was his extraordinary success that he accumulated a large fortune for that time, about £20,000 sterling, though he lived in great style, keeping besides his town establishment, a country house at Eltham; and he 'kept so good a table,' says Graham, 'that few princes were more visited or better served.' He was

buried in the old church of St. Paul, near the tomb of John of Gaunt: his fortune was inherited by a daughter, his only child.—(Graham, *Essay towards an English School*; Walpole, *Anecdotes of Painting*, &c.; Carpenter, *Memoir of Sir Antony Vandyck*, &c., London, 1844.) [R.N.W.]

VANDYK, HARRY STOE, a poetical and miscellaneous writer, was born in London, in 1798. He was the author of 'Theatrical Portraits,' 'The Gondola,' a series of tales, and 'Songs,' set to music. He also contributed to Dr. Bowring's *Batavian Anthology*. Died 1828.

VANE, SIR HENRY, a republican and religious zealot of the period of the commonwealth, was the eldest son of the baronet of that name, and was born at Hadlow in Kent in 1612. He was among the earliest of those whose religious opinions induced them to seek a home in America, and having gone to New England, in 1635, was appointed governor of Massachusetts. Being far from popular among his fellow-colonists, he returned to England the year after, married there, and entered parliament: by the interest of his father also he was appointed joint treasurer of the navy with Sir William Russell. The measures in which he now took part were the condemnation of Strafford and Laud, followed, in 1643, by the 'Solemn League and Covenant' of which he was one of the chief promoters, as he also was of the 'Self-Denying Ordinance.' He stood aloof from the king's trial, but on the establishment of the commonwealth, became one of the council of state; in this position he remained till Cromwell's dissolution of parliament in 1653. Sir Henry Vane was, from the first, a steady opponent of the authority assumed by the army, his hope being that the Saviour would appear and establish a fifth universal monarchy, or reign of a thousand years; he was most obnoxious to Cromwell, therefore, the staunchest representative and upholder of whatever authority could still be exercised in the state by human agency. On several occasions these two men were brought into personal contact, and while Cromwell exhibited the greatest antipathy to the dreamy expectations, and the plausible temperament of Vane, the latter showed no deficiency of courage in braving his resentment. After the restoration he was condemned for treason, and beheaded on Tower Hill, June 14, 1662. He wrote several works, chiefly religious, at least as he understood the matter, pointing to 'The Total and Irrecoverable Ruin of the Monarchies of this World.'

[E.R.]

VAN-HELMONT. See HELMONT.

VAN-HOECK, J., a Flemish painter of history, 1600-1650. ROBERT, believed to be his relation, also a painter, born 1609.

VAN-HOOREBEKE, CHARLES JOSEPH, a Flemish botanist and pharmacopolist, 1790-1821.

VAN-HUGTENBERG. See HUGTENBURGH.

VANIERE, JAMES, a celebrated French Jesuit and Latin poet, 1664-1739.

VANINI, LUCILIO, a Neapolitan, whose writings were deemed atheistical, was born in 1585. After travelling through Germany, Holland, and England, he went to Toulouse, where he was arrested, and condemned by the parliament to be burnt alive. He wrote 'Amphitheatrum Æternæ Providentiæ' and 'De Admirandis Naturæ Arcanis,' for which latter work he suffered in 1619.

VANLOO, JAMES, a Dutch historical and portrait painter, 1614-1617. LOUIS, his son, excelled in design, died 1712. JEAN BAPTISTE, son of the lat-

ter, who became a fashionable portrait painter in England, 1684-1745. CHARLES ANDREW, called CARLO, brother of the preceding, a great historical and imaginative painter, the most popular artist of his time, 1705-1765. LOUIS MICHAEL, son and scholar of Jean Baptiste, first painter to the king of Spain, 1707-1771. His brother, CHARLES AMADEUS, famed at Berlin as a history and portrait painter, born 1718.

VAN-LOON, G., a Dutch numismatist, b. 1683.

VAN MANDER, CHARLES, a Flemish painter and writer on antiquities, 1548-1605.

VAN MILDERT, DR. WILLIAM, bishop of Durham, a learned and pious prelate, was born in London, in 1765; received his education at Merchant Tailors' School, and at Queen's College, Oxford, and entered into holy orders in 1788, as curate of Sherbourn and Lewknor, Oxfordshire. He was afterwards curate of Witham, in Essex, and in 1796 obtained the rectory of St. Mary-le-Bow, London. His abilities as a preacher soon attracted public notice, and the attention of learned men was particularly called to his 'Boyle Lectures,' which, in tracing the rise and progress of infidelity, and in refuting its principles, display an extent of reading and a force of judgment never excelled. He was soon after presented with the vicarage of Farningham, Kent, by Archbishop Sutton, and he subsequently became preacher of Lincoln's Inn and regius professor of divinity at Oxford. In 1819 he was made bishop of Llandaff, and dean of St. Paul's in the following year. He then resigned his station at Oxford, which he had filled in the most efficient manner; and on the death of Dr. Shute Barrington, in 1826, he was raised to the see of Durham. As a theological writer, Dr. Van Mildert stands in the first class; his 'Life of Waterland' is a luminous and comprehensive performance, filling up a chasm in our ecclesiastical history; and many of his sermons are perfect specimens of pulpit eloquence and logical reasoning. While defending in his place in parliament those institutions by which the church and state are connected, he was invariably listened to with profound attention; but the grand excellencies of his character were manifested in his unbounded charity, and in his deep, habitual, and pervading sense of religion. Died Feb. 21, 1836.

VAN NESS, CORNELIUS P., an American politician and minister to Spain, appointed by President Jackson, was born in Vermont. He was successively chief justice and governor of that state. He was also U. S. collector of the customs at the port of New York. Died 1852, aged 71.

VAN NESS, WM. W., judge of the Supreme Court of New York, from 1807 to 1822. 1775-1823.

VAN NEVE, F., a Flemish painter, last cent.

VAN NOORT, OLIVER, was a native of Utrecht. He is noted as the first Dutchman who circumnavigated the globe, 1598-1601. He went out by the Strait of Magellan and returned by the Cape. But the voyage was not made memorable by any important discovery or other remarkable result. [J.B.]

VANNI, CARLOS, a Neapolitan, born in 1778, who, apostatising from the liberal principles of the junta of which he was a member, sold himself to their opponents, and became a spy of the ultra royalists in 1775. In this capacity he betrayed the sons of some distinguished families to the scaffold, under pretence of holding a lodge of political freemasons, at a place where he seduced and betrayed them. This wretch destroyed himself at Sorrento, in 1799, leaving a paper expressive of his remorse.

VANNI, several Italian painters:—FORNIO, a na-

tive of Pisa, 14th century. FRANCESCO, skilled both as a painter and architect, 1565-1610. His son, RAFFAELLE, taught by Antonio Caracci, 1596-1655. GIOVANNI BATTISTA, best known as an engraver, 1599-1660.

VANNUCHI, ANDREA DEL SARTO, a very celebrated painter of Florence, 1488-1530.

VAN-OS, P. G., a Dutch painter, 1776-1839.

VAN RENSSELAER, JEREMIAH, an early Dutch settler in New York. Came to this country in 1660, and purchased a large tract of land from the Indians, which purchase was confirmed by a patent from the Dutch government. The estate is known as *Rensselaerwick*, or the manor of Van Rensselaer, and the proprietor as its *patroon*.

VAN RENSSELAER, STEPHEN, known as the patroon, filled various offices, having been Lient. Governor of New York, and member of Congress. In the war of 1812, he commanded with credit as major-general on the Niagara frontier. He divided by will his immense landed estate in the neighborhood of Albany, between his immediate descendants. Died 1839.

VAN SCHOUTEN, or SCHOUTEN, WILLIAM CORNELISAN, an able Dutch navigator, was a native of Hoorn in North Holland. He was sent out in command of an expedition fitted up by some merchants of Amsterdam, who were suffering under the oppressive monopoly which the Dutch East India Company had obtained, in virtue of their exclusive right to trade to India by the Cape and the Strait of Magellan. The object was to find another passage; this Schouten successfully accomplished (February, 1616) by sailing to the south of Terra del Fuego. He named the extreme point of land after his native town; and a strait passed through, Le Maire, after the largest contributor to the expense of the undertaking. [J.B.]

VANSITTART, NICHOLAS, Lord Bexley, an English financial writer, diplomatist, and cabinet minister, succeeded Percival as chancellor of the exchequer, and was raised to the peerage in 1823. Died 1851, aged 85.

VANSOMER, PAUL, a Flemish portrait painter, who acquired the highest distinction in England before the time of Vandyck, 1576-1621.

VAN SWIETEN, GERARD, an eminent physician, was born at Leyden, in 1700. He went to reside at Vienna, and there laid the foundation of a medical school, established chemical lectures in one of the hospitals, enlarged the botanical garden, and prevailed upon the government to rebuild the university. His principal work is a 'Commentary on the Aphorisms of Boerhaave,' 5 vols. 4to. Died 1772.

VANUDEN, L., a Flemish painter, 17th cent.

VAN-UTRECHT, ADRIAN, a Flemish painter, famous for flowers, fruit, shell-fish, &c., 1599-1651.

VAN-VEEN, or VENIUS, OTHO, a Dutch painter, distinguished for his graceful compositions and fine heads, 1556-1634.

VAN-VITELLI, GASPARD, a Dutch painter, 1647-1736. His son, LUIGI, an architect, 1700-73.

VAN WART, ISAAC, one of the captors of Major Andre, 1748-1828.

VAREDA, J., a French physician, 1620-58.

VARATANES, the Greek form of the name of Barham, king of Persia.

VARCHI, B., an Italian historian, 1502-1565.

VARENIUS, A., a Ger. theologian, 1620-1684.

VARENIUS, B., a Dutch geographer, 1610-80.

VARGAS, A. DE, a Span. painter, 1613-1674.

VARGAS, F., a Spanish jurisconsult, 16th cent.

VARGAS, L. DE, a Span. painter, 1502-1568.

VARGAS Y PONCE, DON JOSE, a Spanish navigator and geographer, 1755-1821.

VARIGNON, PIERRE, an eminent French mathematician, was born at Caen, in Normandy, in 1654. He became geometrician in the academy, and professor in the college of Mazarin, where he died in 1722. Among his works are 'Projet d'une nouvelle Méchanique,' 'Des nouvelles Conjectures sur la Pesanteur,' 'Nouvelle Méchanique en Statique,' 2 vols., 'Un traité du Mouvement et de la Mesure des Eaux Courantes,' 'De Cahiers de Mathématiques,' &c.

VARRILLAS, A., a French historian, 1624-96.

VARIN, J., a French botanist, 1740-1808.

VARIN, JAMES, a celebrated model engraver, 1604-72. JOSEPH, of the same family, 1730-1808.

VARIN, T., a French historian, 1610-1668.

VARIUS, LUCIUS, a Roman dramatic writer and epic poet, who is highly spoken of by his friends, Virgil and Horace. Hardly a fragment of his writings is now extant.

VARLEY, J., an English artist, 1777-1842.

VARNER, M., a French dramatist, died 1854.

VAROLI, C., an Italian anatomist, 1543-1575.

VARON, C., a French writer, 1761-1796.

VARRO, M. T., consul of Rome, B.C. 216.

VARRO, MARCUS TERENTIUS, a Roman statesman, and one of the most learned men of his age, was born at Rome, B.C. 116, and died about 27. His learning and his actual writings were encyclopædic in extent, but of all his labors there now only remains extant a portion of his *De Lingua Latinâ*, and his *De Re Rusticâ*, with some fragments of his *Satires*.

VARRO, PUBLIUS TERENTIUS ATACINUS, a Roman poet, and contemporary of the preceding.

VARTAN, an Armenian prince, killed in action against the Persians 451.

VARTAN, called *Vertabied*, the *learned*, an Armenian poet and historian of his country, 13th century. His 'Fables' were first published by Saint Martin; his history remains in MS.

VARUS, consul of Rome, B.C. 12.

VASARI, GIORGIO, the celebrated author of the 'Lives of the Most Excellent Painters, Sculptors, and Architects,' of Italy, from the earliest time down to the year 1568, the date of the second edition of his work, was born at Arezzo in 1512: he visited Florence in 1524, and there made the acquaintance of Michelangelo, Andrea del Sarto, and other great artists of the time. Vassari distinguished himself both as a painter and an architect, but his great and immortal service in the cause of art is his most elegant and comprehensive series of biographies above alluded to. This unparalleled biographical series, which Haydon ranked as the *third* book in the world, the Bible and Shakspeare holding the two higher places, can perhaps only be justly appreciated by the genuine lovers of their subject, and then only with diligent labor and study and considerable familiarity with the progress of modern art. It has gone through many editions in Italy; the first, or *editio princeps*, was published in Florence in 1550, in 2 vols. 8vo; the second, also by Vasari, in 1568, in 3 vols. 4to, with woodcut portraits, coarse but full of character, and doubtless of much individual truth. The following editions, and some other reprints, have appeared since Vasari's time:—one at Bologna, from 1647 to 1662, one at Rome in 1759, with notes by Bottari; another at Leghorn and Florence by Bottari, in 1767-72; another at Siena in 1791-94, by Della Valle, reprinted afterwards in the Milan edition of the Italian Classics; another at Florence, in 6 vols.

8vo, in 1822-23, a reprint of the second edition of Vasari, without any notes of the commentators, and even without an index. In 1832, the admirable German translation by Schorn and Förster was commenced, in 8 vols. 8vo, the last in 1849; and three good Italian editions have appeared within the last ten years or so; the last commenced in 1846, in 12mo, by a society of young enthusiasts in the cause, is beyond all praise, the researches of Rumohr, Schorn, Gaye, and other foreign critics have been taken the utmost advantage of, many documents have been consulted, and this great work is perhaps now as well illustrated as it is ever likely to be, except some very unexpected treasures among the old records of Italy should be discovered to throw new light upon this interesting subject. The editors are Carlo and Gaetano Milanese, and Carlo Pini of Siena. The best of Vasari's Lives are naturally the Florentines, and those who lived nearer to his own time. The notices of the earlier artists and those remote from Florence, have not escaped errors and misrepresentations, which are, however, now remedied in the various notes and comments with which the work is now enriched. But under any view the collection constitutes a remarkable series, not only for its prodigious store of facts, but also for its extreme beauty, grandeur, and fascination of style. An English translation has been lately added to Bohn's Standard Library. The following is the full title of the Italian edition recommended:—*La Vite de' pin eccellenti Pittori, Scutori, e Architetti, Di Giorgio Vasari: publicate per cura di una societa di amatori delle arti belle.* Flor., Felice La Monnier, 1846-54, seqq. Vasari died at Florence in 1574, and was buried in Arezzo, his native place, and of which one of the greatest of its glories, of past or future time, will ever remain the circumstance of its having given birth to Giorgio Vasari. [R.N.W.]

VASCO DE GAMA. See GAMA.

VASI, J., an Italian designer, 1710-1782.

VASQUES, ALPHONSO, an Italian painter, born of Spanish parentage, about 1575-1645.

VASQUES, G., a Spanish casuist, 1551-1604.

VASQUEZ DE CORONADO, FRANCESCO, a Spanish navigator, time of Mendoza, 1540.

VASSELIN, G. V., a Fr. historian, 1767-1801.

VATABLUS, J., a French hebraist, died 1547.

VATACES. See JOHN.

VATER, C., a German physician, 1651-1732. ABRAHAM, his son, a great promoter of inoculation, author of several works, 1684-1751.

VATER, JOHN SEVERINUS, a distinguished German Orientalist and theologian, 1771-1826.

VATTEL, EMMERICH, a jurist and man of letters, was born near Neufchatel, in 1714. He was originally educated for the church, but his studies turned to the direction of philosophy and literature, while he found employment in the petty diplomacy of the smaller central states. Thus he was appointed, in 1746, minister from Poland to the Republic of Berne. The occasional petty dabbling in diplomatic duties, accompanied by abundant leisure, which this office conferred, probably had considerable influence in the direction of his labors and the formation of his fame. Like all the inhabitants of middle Europe, ambitious of literary fame in his age, he sought it in a study of French literature, and an imitation of French models. He wrote many works;—some on light literature, such as 'Sur la Natur d'Amour'—others on metaphysics; but all alike forgotten. It was his fortune however, to fill up a vacant space in the literature of

jurisprudence, by systematizing and placing in lucid order the writings on international law, from Grotius downwards. His 'Droit de Gens'—'The Law of Nations, or Principles of the Law of Nature Applied to the Affairs of Nations and Sovereigns,' first published in 1758, has gone through many editions, been translated into several languages, and become a universal text-book. Vattel died on 28th of December, 1767. [J.H.B.]

VATTIER, P., an Arabian scholar, 1623–1667.

VAUBAN, SEBASTIAN LEPRESTRE DE, the greatest military engineer and tactician of France, was born in Burgundy in 1632; and commenced his public career in the time of Mazarin. He took part in all the campaigns of Holland and Flanders, and was created marshal in 1703. He constructed or improved an immense number of fortresses, directed as many as fifty-three sieges, and was present at one hundred and forty battles. He wrote twelve folio volumes on Strategy. Died 1707.

VAUBLANC-VIENNOT, VINCENT MARIE, Count De, was born in 1756. In 1791 he was appointed deputy to the legislative assembly, where he became a distinguished advocate of the royal cause. The powers assumed by the popular clubs were arraigned by him, and he obtained a decree of accusation against Marat. He was not elected a member of the convention, and, though proscribed, he had the good fortune to escape the guillotine. In 1805 he was raised to the dignity of count, and commandant of the legion of honor, and was appointed prefect of the Moselle. On the restoration, he was named minister of the interior, and displayed extraordinary talents and activity.

VAUCEL, P. L. DU, a Jansenist, 1640–1715.

VAUGELAS, CLAUDE FAVRE DE, an elegant French writer, was born at Chanberry, in 1585, and held a situation in the household of the Duke of Orleans. His character as a philologist was so high, that Cardinal Richelieu, in his favorite design of forming a complete dictionary of the French tongue, thought it advisable to put the whole under his superintendence. He was so fastidious in regard to style, as to spend 30 years in a translation of Quintus Curtius. His principal work is entitled 'Rémarques sur la Langue Française.'

VAUGHAN, HENRY, author of poems, chiefly devotional, born at Newtown, in Brecknockshire, 1621, died 1695. THOMAS, his brother, author of some Rosicrucian works, written under the title of Eugenius Philalethes, died 1666.

VAUGHAN, SIR J., a learned judge, 1608–74.

VAUGHAN, SIR JOHN, D. C. L., one of the judges of the court of common pleas. He was called to the bar in his twenty-fourth year, and in seven years more had so greatly distinguished himself that he was made a serjeant. He gained this rank at this unusually early age, it must be remembered, while Sheppard, Best, and Lens were in the zenith of their powers and reputation; and he maintained his position subsequently with such opponents as Copley (afterwards Lord Lyndhurst), Wilde, and Denman. He was made a baron of the exchequer in 1827, and in 1834 he became a judge of the common pleas and a privy councillor. In private he was as amiable as in public he was able. Born 1772; died 1839.

VAUGHAN, W., a poet and translator, 1577–1640.

VAUQUELIN, NICHOLAS LOUIS, a French chemist, instructed by Fourcroy, 1763–1830.

VAUVENARGUES, LUC DE CLAPIERS, Marquis De, a moralist and elegant writer, author of 'Intro-

duction to the Knowledge of the Human Spirit,' and 'Maxims,' 1715–1747.

VAUVILLIERS, JOHN FRANCIS, a French *savant*, 1698–1766. His son, of the same names, a learned Hellenist and statesman, 1737–1801.

VAUX, the name of a noble English family, originally of French extraction.—NICHOLAS, the first Lord VAUX, was a gallant officer, and ranked deservedly high in the favor of Henry VIII., and was present with him and the French monarch in the 'field of the cloth of gold.' Died 1530.—His son, THOMAS, inherited his father's valor, and was besides a poet. He attended Henry VIII. to Calais and Boulogne, was made governor of Jersey, and died in 1522.

VAUX, NOEL JOURDAN, Count De, a marshal of France, dist. in the Flemish wars, 1705–1788.

VAVASSOR, or VAVASSEUR, FRANCIS, a French Jesuit, Latin poet, and philologist, 1605–81.

VECHIETTA, LORENZO DE PIERO, an Italian sculptor, founder, and painter, 1482–1540.

VECCHIO DI SAN BERNARDO, F. MENZOCCHI, called Il, an Italian painter, 1510–1574.

VEDDER, DAVID, a Scotch journalist and miscellaneous writer. Died 1854, aged 64.

VEDRIANI, L., an Italian historian, 1601–70.

VEEN, or VENIUS. See VAN-VEEN.

VEGA. See GARCIAS.

VEGA, G., a Germ. mathematician, 1754–1802.

VEGA, LOPEZ DE LA, or LOPE FELIX DE VEGA CARPIO, a celebrated Spanish poet, was born at Madrid, in 1562. After studying at Alcala, he entered into the service of the Duke of Alva, at whose instance he wrote the heroic pastoral of 'Arcadia.' Soon after this he married; but, on the loss of his wife, he embarked in the Armada, prepared for the invasion of England. In this voyage he wrote a poem, called 'Hermosura de Angelica,' to which, when published, he added the 'Dragontea,' an invective against Drake and Queen Elizabeth. In 1590 Lope married a second time, and again became a widower, on which he entered into the order of St. Francis. He still, however, cultivated poetry, and scarcely a week passed without seeing a drama from his prolific muse. Honors and wealth flowed in upon him, and he was absolutely idolized by the whole nation. At his death, which happened in 1635, the highest honors were paid to his remains, and all the poets of the age vied in encomiastic tributes to his memory.

VEGETIUS, FLAVIUS RENATUS, a Roman writer on the military art, 4th century.

VEGIO, MAFFEI, a Latin poet, 1406–1458.

VEIGA, EUSEBIUS DE, a Portuguese Jesuit and astronomer, born in Coimbra 1718, died 1798.

VEITH, L. F., a Germ. theologian, 1725–1796.

VELASCO, F. DE, a Spanish general, died 1716.

VELASQUEZ, DIEGO, a Spanish general, who accompanied Columbus in his second voyage; was engaged in the conquest of St. Domingo, and founded the city of Havana in the island of Cuba. He sent out the expedition which discovered Yucatan and Mexico, and despatched Cortez to subdue the latter country; died 1523.

VELASQUEZ CARDENAS Y LEON, JOAQUIN, a Mexican astronomer, 1732–1786.

VELASQUEZ DE VALESCO, LUIS JOSE, a Spanish antiquarian, 1722–1772.

VELAZQUEZ, DON DIEGO RODRIGUEZ DE SILVA Y, was born at Seville in 1599; he first studied under Francisco Herrera, and afterwards with Pacheco, whose daughter he married. He visited

Madrid in 1622, and in 1623 was appointed court painter to Philip IV. of Spain. He visited Italy in 1629, and again in 1648, to make purchases of works of art for the king. He died August 7th, 1660. Velazquez has the reputation of being the greatest of Spanish painters; he is chiefly distinguished as a portrait painter, but he excelled also in history, landscape, and genre; like the majority of the Spanish painters, he belongs to the naturalist school; he painted life as he found it, with extraordinary force, facility and skill. His greatest works are still at Madrid.—(Cean Bermudez, *Diccionario Historico de los mas Ilustres Profesores de las Bellas Artes in Espana*. See also the *Penny Cyclopædia*, and Stirling's *Annals of the Artists of Spain*.) [R.N.W.]

VELDE. See VANDERVELDE.

VELEZ DE GUEVARA, LUIS, a Spanish satirist and comic poet, died 1646.

VELLEDA, a German prophetess, 1st century.

VELLEIUS. See PATERCULUS.

VELLEGUS, ANDREW SEVERIN, a Danish historian and councillor of state, 1542–1616.

VELLUTI, D., an Italian historian, 1313–1370.

VELLEY, P. F., a French historian, 1709–1759.

VELSER, or WELSER, MARK, in Latin *Velserus*, a German historian and philologist, 1568–1614.

VELTHEIM, AUG. FREDERICK, Count Von, a German archæologist and mineralogist, 1741–1801.

VELTWYCK, G., a Dutch poet, died 1555.

VENANTIUS, a Christian poet, 6th century.

VENCE, H. F. DE, a French ecclesiast. 1676–1749.

VENCESLAUS. See WENCESLAUS.

VENDOME, CÆSAR, Duc De, eldest son of Henry IV. and of his mistress, Gabrielle D'Estrees, a refugee in England in the time of Richelieu, and minister of state under Mazarin, 1594–1660. LOUIS, his eldest son, viceroy of Catalonia, married a niece of Mazarin, and after her death took orders and became a cardinal, 1612–1669. LOUIS JOSEPH, son of the latter, successively Duc de Penthièvre and Duc de Vendome, a famous general in the wars of Louis XIV., honored for his services by admission to the honors of a prince of the blood royal, 1654–1712. His brother, PHILIP, prior of Vendome, and the last of his house, 1655–1727.

VENEL, G. F., a French chemist, 1723–1775.

VENEL, J. A., a French physician, 1740–1791.

VENERONI, JOHN, the Italianized name of Vigneron, a French grammarian, 17th century.

VENETTE, J. DE, a Fr. chronicler, 1307–1369.

VENETTE, NICHOLAS, a French physician and physiologist, author of 'Tableau de l'Amour Conjugal,' and other works, 1632–1698.

VENEZIANO, ANTONIO, an Italian fresco painter, 1310–1384. DOMENICO, a painter in oils, 1420–1476. AGOSTINO, an engraver, 1490–1540.

VENIERO, three doges of Venice:—ANTONIO, reigned 1382–1400. FRANCESCO, succeeded Marc Antonio Trevisani 1554, died 1556. SEBASTIANO, commander of the fleet at the battle of Lepanto, elected doge and died same year, 1571.

VENIERO, DOMENICO, a distinguished Italian poet, 1517–1582. FRANCESCO, his brother, a philosophical writer, died 1581. LORENZO, a third brother, known as a poet, died about 1550. MAFFEO and LUIGI, sons of the latter, dates unknown.

VENINI, FRANCESCO, a Milanese ecclesiastic, mathematician, and poet, 1737–1820.

VENINO, J., an Italian Jesuit, 1711–1778.

VENIUS. See VAN-VEEN.

VENN, HENRY, a minister of the Church of England, son of a divine named Richard Venn, au-

thor of several religious works, 1725–1796. JOHN, his son, author of Sermons, 1759–1813.

VENNE. See VANDERVENNE.

VENNER, T., an English physician, 1577–1650.

VENNING, R., a nonconfor. divine, 1620–1673.

VENTENAT, STEPHEN PETER, a distinguished French botanist, member of the institute, and author of several useful works, 1757–1808.

VENTIMIGLIA, GIUSEPPE, a Sicilian prince and supporter of the constitution, 1761–1814.

VENTURE DE PARADIS, JEAN MICHEL, a French Orientalist and diplomatic agent, 1742–99.

VENTURI, GIAMBATISTA, an Italian physician, statesman, and literary *savant*, 1746–1822.

VENTURI, P., an Italian Jesuit, 1693–1752.

VENTURINI, J. G. JULIUS, a German officer and writer on tactics, 1772–1802.

VENUSTI, M., an Italian painter, 1515–1576.

VENUTI, R., an Ital. antiquarian, 1705–1763.

VERBIEST, FERDINAND, a Flemish Jesuit, astronomer, and Chinese missionary, 1630–1688.

VERCI, J. B. M., an Italian historian, 1739–95.

VERE, EDWARD, earl of Oxford, a poet and statesman of the age of Elizabeth, born about 1540, died 1604. He sat on the trial of Mary Queen of Scots, in virtue of his office of lord high chamberlain, and many traits of character little to his honor, are recorded of him.

VERE, SIR FRANCIS, a renowned English general in the reign of queen Elizabeth, was born in 1554. He fought with great gallantry on many occasions, in various parts of the Continent; but we can only find room for the mention of his last great exploit. He defended Ostend for the Dutch with 1700 men against the Spanish army of 12,000, commanded by Albert, archduke of Austria, whom he obliged to raise the siege in March, 1602, after having been 8 months before the place. Died 1608.

VERE, SIR HORACE, baron of Tilbury, younger brother of the preceding, was born in 1565. He served with his brother in the Netherlands, and had a considerable share in the victory near Nieuport, and in the defence of Ostend. In the reign of James I., he commanded the forces sent to the assistance of the elector palatine; on which occasion he effected a memorable retreat from Spinola, the Spanish general. He was the first person raised to the peerage by Charles I. Died 1635.

VERELIUS, OLAF, one of the most distinguished antiquaries of Sweden, 1618–1682.

VERELST, S., a Flemish painter, died 1710.

VERGARA, CÆSAR ANTONIO, a Neapolitan ecclesiastic and numismatist, born 1680.

VERGARA, J. DE, a Spanish painter, 1726–99.

VERGARA, N. DE, called 'the Old,' a Spanish painter of history, painter on glass, and sculptor, 1510–1574. His son, NICHOLAS, called 'the Young,' a sculptor and architect, 1540–1606.

VERGENNES, CHARLES GRAVIER, Count De, a French diplomatist and statesman, 1717–87.

VERGERIO, PIERO PAOLO, professor of dialectic at Padua, and one of the restorers of literature, 1349–1419. Another member of the family, bearing the same names, was at first a vigorous opponent of the reformation, but became a convert to protestantism, and died in Wirtemberg 1656.

VERGIER, J., a French poet, 1657–1720.

VERGIL, or VIRGIL, POLYDORE, an eminent historical writer in the 16th century, was born at Urbino, in Italy. He was an ecclesiastic, and was the last person sent by the popes to England to collect the tribute called Peter's pence. At the request of Henry VIII. he wrote a 'History of England,'

which, considered as the production of a foreigner, is highly creditable to him. He was also the author of 'De Rerum Inventoribus,' &c. Died 1555.

VERGNIAUD, P. V., one of the most eloquent leaders of the Girondin party in the French revolution, was born at Limoges in 1759, and was practising as an advocate of Bourdeaux, when elected to the Legislative Assembly, 1791. He was one of the twenty-two Girondists condemned by the Jacobins of the revolutionary tribunal, and executed October 31, 1793.

VERHEYDEN, F. P., a Dutch painter and sculptor, born at the Hague 1657, died 1711.

VERHEYDEN, P., a Dut. anatomist, 1648-1710.

VERHOEK, P., a painter and poet, 1633-1702.

VERMEIREN, AUGUSTIN, a Flemish Carmelite, author of Fables in verse, 1656-1703.

VERMEULEN, CORNELIUS, a famous designer and engraver of portraits, 1614-1702.

VERMEYN, J. C., a Dutch painter, died 1559.

VERNES, JACOB, a pastor of Geneva, known as an adversary of Rousseau, 1728-1790.

VERNET, CLAUDE JOSEPH, a French painter, in great esteem for his landscapes and marine subjects, more particularly the latter, in which he excelled, 1714-1789. A. C. HORACE, called *Carle*, his son and pupil, famous for his battle-pieces, 1758-1836. HORACE VERNET, the celebrated painter, is son of the latter, and was born 1789.

VERNET, J., a Genevese theologian, 1698-1789.

VERNEUIL, CATHERINE HENRIETTE DE BALZAC D'ENTRAIGUES, Marquise De, a mistress of Henry IV., who acquired so much influence over him as to obtain a written promise of marriage, which it required all the firmness of Richelieu to annul: she conspired against the king after his marriage with Mary de Medici, 1583-1633.

VERNIER, P., a Spanish mathema., 1580-1637.

VERNIER, THEODORE, a politician of the revolutionary period, afterwards a peer of France, 1731-1818.

VERNIQUET, E., a Fr. architect, 1727-1804.

[Admiral Vernon.]

VERNON, EDWARD, an English admiral, born in Westminster 1684. His father was secretary of state to William and Mary, and having given his son a classical education, was disappointed by his adoption of a seaman's career. He first served under Admiral Hopson, and was in the action at Vigo, in October, 1702. His name became historical, however, in 1739, by the expedition to Portobello, the command of which was given to him, with the rank of vice-admiral of the blue. In 1741 he made

an unsuccessful attempt upon Carthage, in conjunction with General Wentworth, the graphic details of which may be read in Smollett's *Roderick Random*. Died 1757.

[Ardington House, Seat of Robert Vernon.]

VERNON, ROBERT, the munificent founder of the Gallery of British Art, named after him, and now in the national collection, was born in 1774, and acquired his vast fortune by trading in horses. He was a liberal patron of the fine arts in his lifetime, and his bequest to the nation is said to have cost him £150,000. Died 1849.

VERNON, T., a learned lawyer, died 1726.

VERNY, C. F., a French poet, 1753-1811.

VERON, F., a French Jesuit, 1575-1649.

VERON, P. A., a French astronomer, 1736-70.

VERONESE, PAUL. See CAGLIARI.

VERRIO, A., a Neapolitan painter, 1639-1707.

VERROCHIO, ANDREA DEL, a Florentine painter, sculptor, goldsmith, and architect, 1422-1488.

VERSCHAFFELT, CHEVALIER P., called *Pietro Fiammingo*, a Flemish sculptor and architect, 1710-1793.

VERSCHURING, HENRY, a celebrated Dutch painter, born at Gorcum, in 1627. He principally excelled in battle pieces; and, in order to insure accuracy, he actually made a campaign in 1672. Accidentally drowned, 1690.

VERT, C. DE, a French liturgist, 1645-1709.

VERSTEGAN, RICHARD, an ingenious antiquarian of Roman Catholic principles, born in London of Dutch parents, and settled at Antwerp; author of 'Restitution of Decayed Intelligence concerning the most noble and renowned English Nation,' published 1605; died about 1635.

VERTOT D'AUBŒUF, RÉNE AUBERT DE, a French historian, was born at Bennetot, in Normandy, in 1655. He entered into the order of Capuchins; but the austerities of that society not agreeing with his health, he was induced to exchange it for the Premonstratenses, in which he became prior of the monastery; but this he also quitted, and settled at Paris as a secular ecclesiastic. His talents soon procured him distinction, and he was appointed secretary to the duke and duchess of Orleans, historiographer of the order of Malta, and commander of Santory. His chief works relate to the revolutions of Portugal, Sweden, and Rome; but though they are lively, elegant, and interesting, he wanted the necessary industry and research to render them valuable as historical documents.

VERTUE, GEORGE, an eminent English engraver and antiquarian, born in London 1684, died 1756.

His engraved works, consisting of portraits and historic prints, are very numerous, and in high repute for their accuracy. In the course of his antiquarian tours he took many sketches of churches, ruins, and other monuments; his literary remains consist of historic notices of artists, and anecdotes of painting.

VERUS, ÆLIUS, grandson of Cejenius Commodus, adopted son of Adrian, and consul of Rome, died 133. LUCIUS VERUS, his son, joint emperor with Marcus Aurelius, whose daughter he married, flourished 130–169.

VERZOSA, J., a Spanish writer, 1523–1574.

VESALIUS, ANDREAS, the greatest anatomist of his age, and the father of modern human anatomy, was born at Brussels, either in April, 1513, or December, 1514, for the year of his birth is uncertain. He was descended from a family remarkable for the number of eminent medical men it had produced, and his father was attached in a medical capacity to the household of the archduke Charles, afterwards the emperor, Charles V. He devoted himself at an early period of life to human anatomy and dissection, studying under the most eminent masters of the day, and between the years 1535 and 1537 he served as a physician and surgeon with the troops in the Low Countries. In 1544 he was appointed chief physician to the emperor Charles V., and on his abdication in 1555 he was nominated to the same office by his son, Philip II. His opposition to the Galenic doctrines, his habit of dissecting human bodies, then considered impious, and the great reputation he enjoyed at the Spanish court, raised him many enemies; and a rumor that he had opened the body of a young Spanish nobleman whose heart showed symptoms of vitality, having got abroad, he was publicly accused of murder. The charge was taken up by the clergy and the medical faculty, to whom he was obnoxious, and also by the relations of the deceased; and though he enjoyed the protection of the king, he was obliged to flee from the persecution by which he was assailed, and to travel into Palestine by way of expiation of his alleged guilt. When this voyage was undertaken is not exactly known, but in 1563 the senate of Venice invited him to return and fill the chair of anatomy at Padua, then vacant by the death of Fallopius; and having embarked for that purpose, he was shipwrecked on the island of Zante (the ancient Zachynthus), where he perished miserably of cold and hunger, on the 15th of October, 1564, and his body having been recognized by a goldsmith of Venice, it was honorably interred in the church of St. Mary's, in that island. He was the author of numerous works, but that by which he is best known is entitled, *De Humana Corporis Fabrica*.

[J.M'C.]

VESLING, JOHN, an eminent writer on natural history and anatomy, born at Minden, in Germany, in 1598. He studied at Vienna, and afterwards took a journey to Palestine, where he employed himself in botanical researches. Returning to Europe, he obtained the professorship of anatomy at Padua; but he quitted that office to become keeper of the botanic garden. He afterwards visited Egypt, but died soon after his return, in 1649. He was the author of several works on the subjects of his botanical researches in the East.

VESPASIAN, whose full name in Latin was TITUS FLAVIUS VESPASIANUS, emperor of Rome, was born of an obscure family in the territory of the ancient Sabines, in the year 9. He rose to distinction in the Roman army, during the reigns of Caligula

and Nero; and was conducting the war in Judæa when he was proclaimed emperor by his soldiers, after the brief reigns of Galba, Otho, and Vitellius, 69. He then left the prosecution of the war to his son Titus; and reaching Rome about the middle of the year 70, entered upon his high functions without opposition. The expectations that had been raised by his ability, his virtues, and his indefatigable application to business, were not disap-

[Coliseum, erected by Vespasian.]

pointed; but it is commonly believed, and the report is adopted by Gibbon, that he disgraced himself by a sordid parsimony. This is so incompatible with the generous qualities also attributed to him, that the explanation must be sought in circumstances, not sufficiently considered,—such as the dissatisfaction likely enough felt by the Prætorian guard, and by others who may have expected a more liberal distribution of the public money. The reign of Vespasian was marked by the pacification of Gaul, which had been disturbed by the revolt of Claudius Civilis, and by Agricola's conquest of Great Britain: the destruction of Jerusalem also took place, as mentioned under the name of Titus. Died in the seventieth year of his age, 79. [E.R.]

VESPUCCI. See AMERIGO.

VESTRIS, a family of dancers and theatrical performers:—GAETANO APOLINE BALTHAZAR, distinguished at the Parisian opera, 1729–1808. ANNA FREDERIKA, his wife, 1752–1808. M. AUGUSTUS, a natural son of Gaetano, 1760–1838. MARIE ROSE GOURGAND DUCAZON, a sister-in-law of Gaetano, distinguished by her performance in tragic parts, 1746–1804.

VETTER, L. R., a Ger. pathologist, 1765–1806.

VETTORI, F., an Italian antiquary, 1708–1778.

VETTORI, F., an Italian physician, 1485–1528.

VETTORI, V., an Italian poet, 1697–1763.

VEZZOZI, ANTONIO FRANCESCO, a learned Italian theatre and biographer, 1705–1785.

VIANE, F. VAN, a theologian, 1619–1693.

VIANI, A. M., an Italian painter, 16th century.

VIANI, G., an Italian numismatist, 1762–1816.

VIANI, GIUSEPPE, a painter of Bologna, 1636–1700. DOMENICHO, his son and pupil, 1668–1711.

VICCARS, JOHN, a fanatical writer during the Commonwealth, was born in London in 1582, and educated at Oxford. His tirades against church

and king have the following quaint titles : ' God's Ark overtopping the World's Waves,' ' The Burning Bush not consumed,' and ' God in the Mount,' which were afterwards published together, under the general title of the ' Parliamentary Chronicle.' His violent rhapsodies were satirically alluded to by the author of *Hudibras*.

VICARY, T., an English anatomist, 16th cent.

VICENTE, G., a Portuguese poet, 1480-1557.

VICENTE, J., a Castilian painter, last century.

VICHMANN, B., a Russian historian, 1786-1822.

VICI, A., an Italian architect, 1744-1817.

VICIANA, M., a Spanish historian, 16th cent.

VICO, ÆNEAS, an Italian antiquarian, engraver, and numismatist ; died about 1560.

VICO, FRANCIS DE, an Italian astronomer and writer on natural philosophy, emigrated to the United States in consequence of the revolutionary movement in Italy, and died in England during a temporary visit in 1848.

VICO, F., a Spanish historian, 17th century.

VICO, GIOVANNI BATTISTA, the first to propose a philosophical method of considering human history, was born at Naples in 1668, and became professor of rhetoric in the university of that city. His life was passed in comparative obscurity in studying the works of the ancients, and in bringing his vast acquirements in jurisprudence and criticism to bear on the problem of human destiny. The principal labor of his life is his work entitled ' *Principi di una Scienza Nuova*,' first published in 1725, and which is, in fact, a philosophy of history, recognizing the action of Providence, and the divine intention continually working out in social events ; in this view he has been followed by Schlegel, but with much less spirituality. What Vico would demonstrate is the analogy of one age and nation with another, as regards the succession of events, and these proceeding in a certain historic cycle, which he divides into three ages—the divine, the heroic, and the human : he becomes, therefore, the interpreter of the mythical remains of antiquity, such as the Homeric poems, and displays, in his way, the reason of national manners and forms of government. The ' *Universal History* ' of Bossuet, and the ' *City of God* ' by Saint Augustin, were the ' only previous works that could be named in series with this of Vico ; since his time—besides Schlegel—Kant, Herder, Lessing, and Condorcet, have each developed their own particular systems ; to Vico, however, belongs the honor of opening out this new path through the fields of philosophy. The highest recognition he received was his appointment as historiographer to the king of Naples in 1735. In 1743 he fell into a state of insensibility which lasted fourteen months, in all which time he knew neither his friends nor children ; he died thus in January, 1744. [E.R.]

VICQ D'AZYR, FELIX, a French physician, famous as a naturalist and physiologist, author of valuable works, 1748-1794.

VICTOR, several popes of Rome :—VICTOR I., bishop and saint, succeeded 185, and was martyred, according to some accounts, 197 ; he was succeeded by Zephyrinus. VICTOR II., the friend and relation of the emperor, Henry III., reigned 1055-1057. VICTOR III., succeeded Gregory VII., and died after a few months' pontificate, 1086-1087. VICTOR IV., an antipope, elected after Adrian IV. 1159, and supported by the emperor in opposition to Alexander III. ; died 1164.

VICTOR AMADEUS I., duke of Savoy, was born 1587, son of Charles Emmanuel I., and crowned

1630. He married the sister of Louis XIII., and in his latter years commanded the forces of that sovereign in his Italian wars, died 1637.

VICTOR AMADEUS II., duke of Savoy, and first king of Sardinia, was born in 1665, and succeeded his father in the duchy 1675. He married Maria of Orleans, niece of Louis XIV., but entered, nevertheless, on a tortuous policy, which involved him in a war with that monarch. Having acquired Sicily, he exchanged that kingdom in 1717 for Sardinia, by treaty with the emperor. He died two years after his abdicating in favor of his son, 1732.

VICTOR AMADEUS III., son and successor of Charles Emmanuel III., was born in 1726, and ascended the throne in 1773. He founded the Academy of Sciences at Turin, and exhibited the utmost anxiety for the welfare of his subjects. His hostility to the revolution in France provoked a contest with that country, in which his throne fell by the arms of Buonaparte, 1796.

VICTOR EMMANUEL, king of Sardinia, son of the preceding, Victor Amadeus III., born 1759, succeeded his brother, Charles Emmanuel IV., 1802, abdicated during a revolt 1821, died 1824.

VICTOR, SEXTUS AURELIUS, a Roman historian, who lived in the 4th century. He was prefect of Paunonia in 361, and consul with Valentinian in 369. His works are, ' *Origo Gentis Romanæ*,' ' *De Viris Illustribus Urbis Romæ*,' ' *De Cæsaribus Historiæ*,' and ' *De Vita et Moribus Imperatorum Romanorum excerpta*.'

VICTORINUS, MARCUS AURELIUS, one of the thirty tyrants who assumed the Roman purple in the time of Gallienus, killed by his troops 268.

VICTORINUS OF FELTRE, a celebrated Italian philanthropist and charitable founder, 1379-1447.

VICTORIUS, or VITTORI, PETER, an eminent Italian scholar, was born at Florence in 1499. When the revolution took place in the native city, he went to Rome, and resided there till Cosmo de' Medici invited him home, and appointed him to the Greek and Latin professorship. He wrote commentaries on Aristotle, Terence, Sallust, and other ancient authors ; ' *Variæ Lectiones*,' and Latin poems and orations. Died 1585.

VIDA, MARCUS HIERONYMUS, a modern Latin poet, was born at Cremona, about 1480. After studying in his own country he went to Rome, where his poem, entitled ' *Scacchiæ Ludus*,' or the game of chess, procured him the patronage of Leo X., who suggested to him his celebrated ' *Christiad*.' Clement VIII. made Vida apostolical secretary, and afterwards bishop of Alba, in which capacity he attended the Council of Trent. Died 1567.

VIDAL, B., a Provençal physician, 1741-1805.

VIDAL, D., a Spanish painter, born 1670.

VIDAL, JAMES, called *the Old*, a Spanish historical painter, 1583-1615. His nephew, J. VIDAL DE LIENDO, called *the Young*, 1602-1648.

VIDAL, P., a Provençal troubadour, died 1200.

VIEIL, PIERRE LE, a French painter on glass and writer on the art, 1708-1772. WILLIAM, of the same family and profession, 1675-1731.

VIEILH DE BOISJOLIN, CLAUDE AUGUSTIN, a French biographical writer, 1788-1832.

VIEIRA, SEBASTIAN, a Portuguese Jesuit and missionary to Japan, 1570-1634.

VIEIRA, or VIEYRA, A., a Portuguese Jesuit and missionary to Brazil, 1608-1697.

VIEL, C. F., a French architect, 1745-1819.

VIEL, CHARLES MARIA DE, a converted Jew of Lorraine, and commentator on the Gospels, died a baptist about 1700. His brother, LEWIS, entered

the communion of the Church of England, and wrote on subjects of Jewish learning.

VIEL, STEPHEN BERNARD, a French priest, translator of Telemachus into Latin verse, 1756-1821.

VIETA, FRANCIS, in Latin *Vicetus*, a French mathematician and algebraist, 1540-1603.

VIEUSSENS, RAYMOND, an eminent French physician and anatomist, born in 1641, and died at an advanced age, between the years 1715 and 1720, though in what precise year is not known. His life was spent chiefly at Montpellier, and he is known in medical history principally by a work on the nervous system, entitled, '*Neurographia Universalis*,' published in 1685. [J.M'C.]

VIGAND, or WIGAND, JOHN, a German theologian and botanist, 1523-1587.

VIGANO. S., an Italian dancer, 1769-1821.

VIGEE, LOUIS GILES BERNARD, a French poet who bears the reputation of having basely sung the praises of every successive government from the time of the republic, 1755-1820.

VIGENERE, BLAISE DE, a French alchymist, and secretary of embassy to Rome, 1523-1592.

VIGER, F., a French Hellenist, died 1647.

VIGILIUS, an African bishop, 5th century.

VIGILIUS, a pope of Rome, elected by the intrigues of Theodora, wife of Justinian, 537; died after many reverses, arising out of his opposition to Justinian and the empress, 555.

VIGILIUS, a Dutch jurisconsult and governor of Holland and Gueldres, died 1577.

VIGNE, ANDRE DE LA, a French poet and historian, secretary to Anne of Brittany, 15th cent.

VIGNIER, NICHOLAS, a distinguished historical writer, physician, and historiographer to Henry III., king of France, 1530-1596. His son, of the same name, an ascetic and controversial writer, converted from protestantism to the Catholic Church; dates unknown. JEROME, a son of the latter, a priest of the oratory, known as a poet and historian, 1606-1661.

VIGNOLA, or GIACOMO BAROZZIO, a celebrated Italian architect, was born in 1507, at Vignola. While studying at Rome, he formed an acquaintance with Primaticcio, who took him to Paris, where he made the bronze casts at Fontainebleau. Returning to Italy, he designed the church of Petronius, at Bologna, and built some elegant palaces in that city. Settling afterwards at Rome, he was appointed architect to the pope, and succeeded Michel Angelo as superintendent of St. Peter's. Died, 1573. He was the author of a work '*On the Five Orders of Architecture*,' &c.

VIGNOLES, STEPHEN, better known under the name of LAHIRE, one of the most celebrated French commanders of the reign of Charles VII., distinguished in all the wars of his time with the English, and above all at Jargeau and the battle of Patay in 1418, died 1442.

VIGNOLI, J., an Ital. archæologist, 1680-1753.

VIGORS, N. A., an Irish zoologist, 1787-1840.

VIGUIER, P. F., a Fr. Orientalist, 1745-1821.

VILLA, A. T., an Italian poet, 1720-1794.

VILLADOMAT, ANTONIO, a Spanish painter, born at Barcelona 1678, died 1755.

VILLA-FRANCA, PRINCE JOSEPH, a Sicilian, born in 1764. In 1811 he was a member of the baronial chamber, which prepared the Sicilian constitution of 1812, in which he was president of the chamber of peers; in 1813, foreign secretary; and, on the fall of the constitution in 1814, he retired to Tuscany. On the Neapolitan constitution being proclaimed in 1820, he was president of the junta.

When it was subverted by Austria, he again withdrew into private life.

VILLALPANDI, JOHN BAPTIST, a learned Spanish Jesuit, was born at Cordova, in 1552; he applied his mathematical knowledge to the elucidation of the scriptural history, and a description of Solomon's temple. Calmet's Dictionary contains some account of this curious inquiry, with several engravings in illustration of it. Died 1608.

VILLALPANDE, FRANCESCO TORREBIANCA DE, a Spanish writer on demonology, 16th century.

VILLALPANDE, GASPARD CARDILLOS DE, a Spanish scholar and controversialist, died 1570.

VILLALPANDE, J. DE, chief of a Spanish sect analogous to the quietists, 16th century.

VILLANI, GIOVANNI, an Italian historian, died 1348. MATTEO, his brother, author of a continuation of his history, died 1363. FILIPPO, son of the latter, author of a further continuation, and of the first modern work on literary history; known as a lecturer on Dante in 1404.

VILLANI, N., a Latin poet, died 1640.

VILLARET, C., a French historian, 1717-1766.

VILLARET DE JOYEUSE, L. T., a French admiral, distinguished in the last war, 1750-1812.

VILLARS, DOMINIQUE, a French physician, author of a Natural History of Dauphiny, 1745-1814.

VILLARS, MONTEAUCON DE, a French abbé, nephew of the celebrated father Montfaucon, and author of a prohibited book entitled '*Comte de Gabalis*,' from which Pope derived the machinery for his Rape of the Lock; born about 1640, murdered on the highway 1675.

VILLARS, PIERRE DE, a French prelate, negotiator, and ascetic writer, 1517-1592. His nephew, of the same name and dignity, an ecclesiastical writer, 1543-1613.

VILLARS, PIERRE, Marquis De, a French general and diplomatist, died 1678. His wife, MARIE GIGAULT DE BELLEFONDS, friend of Maria Louisa, wife of Charles II. of Spain, author of '*Letters*,' containing curious details of the Spanish court, 1772. LOUIS HECTOR, Duke De, marshal of France, was born at Moulins, in 1653. After gaining great reputation by a variety of services, he was, in 1704, sent to Languedoc against the insurgents of the Cevennes, and on his return to Paris he was made a duke. He contended against Marlborough, in the celebrated battle of Malplaquet, in 1712; defeated the Austrians at Denain, forced Eugene to raise the siege of Landrecy, and took several fortresses. On the death of Louis XIV., Villars was made member of the regency (1715), and minister of state, and was also admitted into the French academy. He died in 1734. His son, HONORE ARMAND, duke of Villars and Prince De Martiniques, was remarkable for nothing but his famous parentage and the protection he offered to Voltaire, 1702-1770.

VILLAUT DE BELLEFOND, a French traveller on the coast of Guinea, 1666.

VILLAVICIOSA, JOSE DE, a Spanish inquisitor and burlesque poet, 1589-1658.

VILLEBRUNE, J. B. LEFEVRE DE, a French Orientalist, philologist, and Hellenist, 1732-1809.

VILLEDIEU, MARIE HORTENSE DESJARDINS, Dame De, a novelist and poetess, 1632-1683.

VILLEFORE, J. F. BOURGOIN DE, an ecclesiastical and biographical writer, 1652-1737.

VILLEFROY, WM. DE, a learned Orientalist, founder of the Capuchin Hebraist, 1690-1777.

VILLEGAS, E. M. DE, a Span. poet, 1595-1669.

VILLEGAS MARMOLEJO, P. DE, a Spanish painter of sacred subjects, 1520-1577.

VILLEGOMBLAIN, F. RACINE, Seigneur De, a French statesman and historian of events during the reigns of Charles IX., Henry III., and Henry IV.

VILLEHARDOUIN, GEOFFRAI DE, an ancient French historian, and commander in the fourth crusade, which resulted in the capture of Constantinople, 1198.

VILLEMOT, P., a Fr. astronomer, 1651-1713.

VILLENEUVE, HURON DE, a French poet, contemporary with Philip Augustus.

VILLENEUVE, PIERRE CH. JEAN BAPTIST SILVESTRE, a French admiral who commanded at the battle of Aboukir in 1799, and at the battle of Trafalgar in 1805. On the latter occasion he was taken prisoner, but being soon after restored to liberty he returned to France, and was ordered by Napoleon to remain at Rennes. In the despondency created by this circumstance, he committed suicide by piercing himself through the heart.

VILLENEUVE, WILLIAM DE, a chevalier of Provence, historian of the conquest of Naples, whither he accompanied Charles VIII.

VILLENEUVE BARGEMONT, CHRISTOPHE, Count De, a Provençal statistician and man of letters, 1771-1829.

VILLENFAGNE D'INGIHOUL, HILARION NOEL, historian of Spa and Liège, 1753-1826.

VILLERMAULES, M., a Swiss missionary and writer on the state of China, 1667-1757.

VILLEROI, NICHOLAS DE NEUFVILLE, Seigneur De, a French statesman and diplomatist from the time of Charles IX. to Louis XIII., a partisan of Guise and the Spanish alliance, author of *Memoirs*, 1542-1617. His son, CHARLES, marquis of Villeroi, negotiated the marriage of Henry IV. and Mary de Medicis, died 1642. NICHOLAS, son of Charles, governor of Louis XIV. and marshal of France, 1597-1685. The most conspicuous of the family was F. DE NEUFVILLE, Duc De Villeroi, son of the latter, who was educated with Louis XIV., and took a leading part in his wars from 1693 to 1706. In 1715 he was appointed governor of Louis XV.; died 1730.

VILLERS, C. F. DOMINIQUE DE, a French writer and philosopher, who became professor at Gottingen after the emigration of 1792, and wrote an 'Essay upon the Reformation,' composed under the influence of Madame de Stael and Benjamin Constant, 1767-1815.

VILLETTE, F., a French optician, 1621-1698.

VILLIERS, GEORGE. See BUCKINGHAM.

VILLIERS, J. F. DE, a French physician, 1727-1794.

VILLOISON, JEAN BAPTISTE GASPARD D'ANSE DE, a celebrated French scholar, was born at Corbeille-sur-Seine, in 1750. He devoted his time in bringing to light valuable but forgotten Greek manuscripts; for which purpose he visited the principal libraries in Europe, and travelled to the East. He published the 'Greek Lexicon to Homer by Apollonius,' from a manuscript in the library of St. Germain-des-Prés; also 'Anecdota Græca,' 'Epistolæ Vinarienses,' part of the Old Testament, from a translation made by a Jew in the 9th century, &c.; but his most important discovery was a copy of Homer, of the 10th century. He suffered considerably in his property during the revolution; but on the restoration of order he resumed his literary career, and was appointed by Buonaparte professor of ancient Greek. Died 1805.

VILLON, F., a French poet, 1431-1490.

VILLOTTE, JAMES, a French Jesuit and missionary to Persia and Turkey, 1656-1743.

VINCE, SAMUEL, a native of Suffolk, author of several valuable works in mathematics and astronomy. He was born of poor parents, but being sent to college by the munificence of Mr. Tilney, became professor of astronomy and experimental philosophy at Cambridge, and held several livings in the Church of England. In 1786 he was elected a fellow of the Royal Society, and his principal works appeared between that period and 1809. Died 1821.

VINCENT, a Bohemian chronicler, who was a canon and archivist at Prague, 12th century.

VINCENT OF BEAUVAIS, a learned Dominican, who composed an immense *Résumé*, or *Encyclopædia*, of the learning of the 13th century, by order of Louis IX.; died about 1264.

VINCENT, F. A., a French painter, 1746-1816.

VINCENT, F. N., a French republican, born at Paris 1767, executed with Herbert 1794.

VINCENT, ISABEAU, an enthusiast of the reformed religion, born in Dauphiny 1670.

VINCENT OF LERINS, an ascetic writer and monk of that place, died about 450.

VINCENT OF PAUL. See PAUL.

VINCENT, SAINT. See FERRIER.

VINCENT, THOMAS, a nonconformist minister, remarkable for his courageous devotion to the afflicted during the great plague of London, author of 'God's Terrible Voice in the City by Plague and Fire,' an 'Explanation of the Assembly's Catechism,' and 'Fire and Brimstone,' born at Hertford 1634, died 1671. NATHANIEL, his brother, a religious writer and preacher, died 1697.

VINCENT, WILLIAM, rector of Allhallows, in London, author of several works interesting to classical scholars, 1739-1815.

VINCI, LEONARDO DA, was born at Vinci in the valley of the Arno below Florence, in 1452; he became the pupil of Andrea Verocchio. In 1483 he entered the service of Lodovico il Moro, duke of Milan, with a salary of 500 scudi per annum, equal to about a thousand pounds sterling at the present time. In 1485 he established an academy of the arts at Milan, and about ten years later, executed his celebrated picture of the 'Last Supper,' in oil colors, on the wall of the Refectory, in the convent of the *Madonna delle Grazie* in that city; there is a copy of this remarkable work, by Marco D'Oggione, now in the Royal Academy, London. Leonardo left Milan in 1499 and returned to Florence, and there commenced his great composition of the 'Battle of the Standard' for the Council Hall, in the Palazzo Vecchio. Michelangelo being commissioned by the Gonfaloniere Soderini to execute a second design for the opposite end, this was the celebrated 'Cartoon of Pisa,' exhibited in 1506, but neither work was ever executed in the hall, owing to the political disturbances. In 1514 Leonardo visited Rome, but left again shortly afterwards without executing any works there, owing partly to a misunderstanding with Michelangelo, and to the pope's want of proper appreciation of his capabilities; he entered the service of Francis I., with a salary of 700 crowns per annum, and accompanied that king to France in 1516, but he was now old, and he died in France at Cloux, near Amboise, May 2, 1519, without executing any work for the French king. Leonardo da Vinci has the most remarkable reputation of any of the illustrious artists of Italy. He was a man of universal ability in science and art; he excelled in painting, sculpture, architecture, engineering and mechanics generally; in botany, anatomy, mathematics, and astronomy; and he was also a

poet, and an admirable extempore performer on the lyre. Mr. Hallam in his *Introduction to the Literature of Europe*, has the following remarkable eulogium on him:—‘If any doubt could be harbored, not only as to the right of Leonardo da Vinci to stand as the first name of the fifteenth century, which is beyond all doubt, but as to his originality in so many discoveries, which probably no one man, especially in such circumstances, has ever made, it must be on an hypothesis not very untenable, that some parts of physical science had already attained a height which mere books do not record.’—Unpublished MSS. by Leonardo contain discoveries and anticipations of discoveries, says Mr. Hallam, ‘within the compass of a few pages, so as to strike us with something like the awe of preternatural knowledge.’ The principal of his published treatises is the *Trattato della Pittura*, of which there are several editions in several languages.—(Lomazzo, *Trattato della Pittura, Scultura ed Architettura*, Milan, 1584. Rome, 1844. Vasari, *Vite*, &c.; Amoretti, *Memorie Storiche su la Vita*, &c., *Di Leonardo da Vinci*, Milan, 1804. See also the *Penny Cyclopædia*.) [R.N.W.]

VINCI, LEONARDO DA, an eminent musical composer, born at Naples, in 1690. He was poisoned by the relation of a Roman lady of rank, of whose favors he had boasted.

VINCIGUERRA, MARC ANTONIO, an Italian poet and secretary of Venice, 15th century.

VINDING, ERASMUS, a learned Danish philologist and jurisconsult, 1615–1684.

VINER, CHARLES, a writer on law, and munificent benefactor of Oxford, 1680–1756.

VINES, R., a presbyterian divine, died 1655.

VINET, ELIE, a French philologist, antiquarian, and learned editor, died 1587.

VINKEBOON, or VINCKENBOOMS, DAVID, a painter of Malines, 1578–1606.

VINNEN, ARNOLD, in Latin *Vinnius*, a Dutch jurisconsult, regarded as the best commentator on the Imperial Institutes, 1588–1657.

VIOLE, D. G., a Benedictine of St. Maur, an ecclesiastical writer and historian, 1598–1669.

VIONNET, G., a Latin poet, 1712–1754.

VIOTTI, GIOVANNI BATTISTA, a celebrated violinist, was born near Crescentino, in Piedmont, in 1755; and, in his 21st year, was made first violinist at the royal chapel in Turin. He afterwards visited Berlin and Paris. On the breaking out of the revolution, he took refuge in England; and, from the year 1794 till 1798, was leader in the orchestra of the Italian Opera. Having received an order from the alien office to quit the country, he retired to Holland, and thence to Hamburg. In 1801 he returned to London, engaged in the wine trade, and lost the whole of his property. After the restoration of the Bourbons, Louis XVIII. invited him to preside over the Académie Royale de Musique, at Paris. In 1822 he settled finally in London, and there remained till his death, in 1824. He was author of a great variety of music for the violin, and the first performer of his age.

VIRET, PETER, a Swiss theologian, and one of the principal reformers, 1511–1571.

VIREY, C. E., a French poet, 1566–1636.

VIRGIL (PUBLIUS VIRGILIUS MARO) was born at Andes, a small village near Mantua, on the 15th of October, B.C. 70. He was thus five years older than Horace, and seven years older than the emperor Augustus. An old tradition has identified Andes with the modern village of *Pietola*, and may perhaps be accepted as true. Virgil's father was proprietor of a small estate which he cultivated

and the future poet, after passing his boyhood there in the seclusion of his father's villa, was sent to school at Cremona, where he assumed the manly gown on his sixteenth birthday (B.C. 55). He next proceeded to Mediolanum (Milan) for education of a higher order, thence to Naples, where he studied Greek under Parthenius, a native of Bithynia, and afterwards visited Rome. In the capital he was instructed in the tenets of the Epicurean philosophy by Syroon, a philosopher of that sect, and is said to

[Virgil—From an Ancient Gem.]

have had, as his fellow-pupil, Varus, to whom he afterwards inscribed his sixth Eclogue. He devoted himself to study with intense application, and thus laid the foundation of that varied learning, for which he was scarcely less remarkable than for poetical genius. It is uncertain how long he may have been absent from home, and merely a conjecture that, after completing his studies, or prosecuting them so long as his feeble health would permit, he returned to his paternal farm, and there wrote some of the small pieces which are attributed to him. But his peaceful seclusion was disturbed by an unexpected event, which is believed to be alluded to in his first Eclogue. Octavianus (Augustus), on his return to Italy after the battle of Philippi (B.C. 42), assigned to a portion of his veterans the lands in the neighborhood of Mantua, thereby depriving Virgil of his patrimony, which, however, was afterwards restored to him, by the intercession of powerful friends. Soon after this occurrence Virgil again visited Rome, was introduced to Augustus, and to his minister, Mæcenas, the munificent patron of genius, and continued during the remainder of his life to enjoy their friendship and patronage. In B.C. 19, he visited Greece, intending to make a tour of that country, and to revise and perfect his *Æneid*; but having met the emperor at Athens on his return from the East, and finding his feeble health fast declining, he resolved to accompany him to Italy. He succeeded in reaching the shores of his native country, and died soon after his arrival at Brundisium on the 22d of September, B.C. 19, before completing his fifty-first year. In compliance with his wish, his body was conveyed to Naples, and there buried at the distance of two miles from the city. The works of Virgil consist of, 1. *Bucolica*, or Eclogues, pastoral poems, amounting to ten; 2. *Georgica* (Georgics), an agricultural poem in four books; and 3. *Æneis* (the *Æneid*), a national epic poem, in twelve books, besides some minor poems which are ascribed to him. The Eclogues are doubtless his earliest productions, and must, therefore, be estimated chiefly as indications of the future efforts of the poet. In the Georgics the powers of the poet are more matured; freshness and vigor are given to a subject possessing but little of the

poetical element; and the rude and rough hexameter of Lucretius is advanced to a degree of perfection which cannot be surpassed. The object of the *Æneid* is to give an account of the fortunes of *Æneas* from the period of his leaving Troy till his settlement in Italy, as indicative of the future greatness of Rome, and, therefore, abounds in allusions to subsequent events in Roman history. In point of artistic skill the *Æneid* is inferior to the *Georgics*; and the defect is easily accounted for by the circumstance, that the poem did not receive the finishing revisal of the poet, and was therefore ordered by him, in his last illness, to be burnt. It was, however, preserved, and published by his friends Varius and Tucca. Virgil's character as an epic poet has been often assailed, and as often defended—our limits prevent us from entering upon the question. It may be sufficient to say that, till the appearance of the *Paradise Lost*, he held the second place in this the highest department of poetry; and though he has since descended to the third, he is inferior still only to Homer and Milton.

[G.F.]

[Monument to Virgil, erected by the French Army.]

**VIRGIL POLYDORE.** See **POLYDORUS.**

**VIRGILLE-LABASTIDE, C. DE,** a French economist and mechanician, 1682–1755.

**VIRGINIA,** daughter of the centurion L. Virginius. Appius Claudius, to obtain possession of her person, bribed a man to claim her as the daughter of his slave, when Appius, as judge, ordered her to be delivered into his hands. Virginius, who was at the camp, being informed of this infamous outrage, hastened to Rome, and, in the presence of Appius and the Roman people, plunged a knife into his daughter's bosom. He then returned to the camp, where he harangued the soldiers, who instantly marched to Rome. Appius destroyed himself in prison, and the office of decemvir was abolished B.C. 449.

**VIRGINIUS-ROMANUS,** a comic poet of Rome, age of Augustus, 1st century B.C. None of his works are now in existence.

**VIRGINIUS RUFUS, LUCIUS,** a Roman general and governor, time of Nero.

**VIRIATHUS,** an illustrious Lusitanian chief, who, in his patriotic endeavors to throw off the yoke of Rome, repeatedly defeated the Roman armies, and for 14 years successfully defended his country and a part of Spain. He was at last murdered by his servants, who had been bribed by Cæpio, the Roman general, B.C. 40.

**VISCANIO, SEBASTIAN,** a Spanish explorer of the coasts of New California, 1602.

**VISCHER, CORNELIUS,** a designer and engraver of Haerlem, about 1610–1660. His brother, **JOHN,** an engraver, born 1636.

**VISCHER, PETER,** a German sculptor and founder, taught in Italy, died 1530. His son, **HERMANN,** killed by an accident 1540.

**VISCONTI,** a noble Milanese family, who headed for a long time the party of Ghibellines. The principal are—**OTHO,** archbishop of Milan, and vanquisher of the Della Torre party, 1208–1295. His nephew, **MATTEO,** called 'the Great,' perpetual lord of Milan and imperial vicar in Italy, 1250–1323. **GALEAZZO,** his successor, who compromised himself with the Guelphs after a long struggle against them, and was thrown into prison by the emperor, Louis V., 1277–1328. **AZZO,** son and successor of the preceding, declared against Louis, and was named vicar of the church by the pope, John XXII. He greatly increased his territories, and died 1339. **LUCHINO,** son of Matteo the Great, and successor of his nephew, **AZZO,** poisoned by his wife 1349. **GIOTTANNI,** brother of the latter and archbishop of Milan, was associated in the temporal government of Luchino, and increased his own importance at the expense of the papacy, died 1354. **MATTEO II.,** grandson of Matteo the Great, by his fifth son, Stefano, had a share in the sovereignty 1355, and was disposed of by poison. **GALEAZZO II.,** one of the amiable brothers of the latter, died 1358. **BARNABO,** another of the brothers and associates, was poisoned by his nephew, Giovanni Galeazzo, in 1385. In this long interval of power he had shown himself a cruel and debauched prince, but he laid the foundation of the university of Pisa, and managed to steer his course through difficult times. **GALEAZZO,** the first of this name with the title *duke of Milan*, having treasonably acquired the state in 1385, endeavored to make himself king of Italy; he greatly increased the territory and the number of cities under his government; died 1402. **GIOVANNI MARIA,** eldest son and successor of the latter, being put to some trouble by the regency of his mother, made an attempt to poison her; his subjects soon after revolted, and he was assassinated by a natural son of Barnabo 1412. **PAOLO MARIA,** brother of Giovanni, secured his authority by marrying the widow of the latter, and some time after had her beheaded. He increased his dominions by robbing the Swiss, and many valiant names in Italian history were engaged in his wars; died 1447. The natural daughter of the last named having married a Sforza, gave rise to a new dynasty in Milan.

**VISCONTI, GASPARD,** of the same family as the preceding, a courtier and poet, 1461–1499.

**VISCONTI, GIOVANNI BATISTA,** a learned antiquarian, successor of Wincklemann as commissary of antiquities at Rome, and keeper of the pontifical museum, 1722–1784. His eldest son, **ENNIUS QUIRINUS,** far exceeded him in ability and learning as an archaeologist, and his works are regarded as high authorities. The principal of them is a 'Description of the Pio-Clementine Museum,' and Greek and Roman Iconographies, compiled by desire of Napoleon. Born at Rome 1751, died 1818.

**VISCONTI, J.,** a liturgist, died 1633.

**VISCONTI, LOUIS JOACHIM,** an architect, born in Rome, but settled in Paris. The plan for the completion of the Louvre, and the tomb of Napoleon, are the most famous of this artist's works in the French capital. Died 1853, aged 57.

**VISDELOW, C.,** a French Jesuit and Chinese missionary, au. of a 'Hist. of Tartary,' 1656–1737.

VISDOMINI, E., an Italian poet, 1550-1622.

WISE, JOSEPH DONNEAU DE, a French historiographer and dramatic writer, 1640-1710.

VISETTI, J., an Italian poet, 1736-1813.

VISSEHER, RÖEMER, a Dutch poet, founder of a reunion of literary men, who contributed to restore the Dutch language, 1547-1620. ANNE, his eldest daughter, called the Dutch Sappho, skilled in poetry, music, and painting, 1584-1652. MARIE, her sister, also a dist. poetess, 1594-1649.

VITA, J. DE, an Italian archæologist, 1708-74.

VITALIANUS, a pope of Rome, 657-672.

VITALIS. See ORDERIC.

VITELLIO, or VITELLO, a Polish mathematician, the first European in modern times to write any thing valuable on optics, about 1254.

VITELLIUS, AULUS, a Roman General, proclaimed emperor in Germany at the time Vespasian was engaged in war with the Jews, A.D. 69. About the time he arrived in Rome, Vespasian was proclaimed at Alexandria, and, on the latter arriving in Italy at the head of his hostile army, Vitellius was put to death.

VITELLIUS, ERASMUS, a Polish prelate and negotiator at the diet of Augsburg, 1470-1521.

VITIGES, successor of Theodatus as king of the Ostrogoths in Italy 526, taken captive by Belisarius 540, died at Constantinople 543.

VIRTINGA, CAMPEGIUS, a learned protestant divine and Hebraist, professor at Franeker, 1659-1722. His son, HORACE, a Hebrew critic, died in youth, 1680-1696. CAMPEGIUS, his second son, a professor and theologian, 1693-1723.

VITRUVIUS POLLIO, MARCUS, a Roman architect, the author of a well-known treatise on architecture in ten books, *De Architecturâ*. The *editio princeps* of this work was published at Rome about 1480, without date or name of printer, by George Herolt, in folio, and under the superintendence of Sulpitius: there have been many editions since, in the original Latin and in the principal European languages; in English by W. Newton, in 1771-91, with plates, folio, London; by W. Wilkins, R. A., in 1812; 'The Civil Architecture of Vitruvius,' in two parts, 4to, being a translation of the 3d, 4th, 5th, and 6th books only, and those not entire; and by Joseph Gwilt, London, 1826, in royal 8vo. Neither the time nor place of Vitruvius' birth are known, but as he dedicated his book to the emperor Augustus, when he was already old, he is supposed to have been born about 80 B.C. This treatise is a very important work, as explaining the knowledge of the ancients on the matters treated. Vitruvius mentions the several ancient writers to whom he was chiefly indebted, all of whose works are lost. See a summary account of this treatise in the *Penny Cyclopædia*. [R.N.W.]

VITRY, EDWARD DE, a French Jesuit, disting. as a numismatist and philologist, 1670-1730.

VITRY, J. DE, a French historian, died 1244.

VIVARES, F., a French engraver, 1709-1780.

VIVENS, CHEVALIER FRANCIS DE, a French physician and economist, 1697-1780.

VIVENS, JOHN LOUIS, one of the revivers of literature, was born at Valencia, in Spain, in 1492. He studied at Paris and Louvain, after which he visited England, and in 1517 was chosen one of the first fellows of Corpus Christi College, Oxford. He was also employed in the education of the Princess Mary, for whose use he composed his 'De Ratione Studii puerilis' and 'De Institutione Fœminæ Christianæ'; but venturing to argue and write against Henry the Eighth's divorce from Catharine, he was disgraced

and imprisoned. On regaining his liberty he repaired to Brussels, where he married, and remained for the rest of his life, occupied as a teacher of the belles-lettres. He died in 1541.

VIVIAN, RICHARD HUSSEY, Lord, was born in 1775, the eldest son of John Vivian, Esq., of Truro, Cornwall, warden of the Stanneries. In 1793 at the early age of 18, he commenced his glorious military career as ensign in the 20th infantry. His active service commenced within three months of his joining his regiment, which formed part of Lord Moira's army on the coast of France; and for the following two years he was present at various battles and affairs of outposts, in which his zeal, courage, and conduct were especially conspicuous, in Holland and in the West Indies. In 1808 he sailed in command of the 7th dragoons for Corunna, which he reached in November of that year, and had the perilous and difficult honor of covering the but too well-known retreat of Sir John Moore in January, 1809, the 7th dragoons having been left at Lugo for several hours after the march of the main army. Unlike his unfortunate chief, he reached England in safety, received the brevet of colonel in 1812, and in 1813 embarked with his regiment for the Peninsula. From this time to the battle of Waterloo, in which he commanded the sixth brigade of cavalry, consisting of the 1st dragoons and 10th and 18th hussars, he was continually in active and efficient service. In the advance upon Toulouse, on the 8th of April, 1814, he was severely wounded in the right arm while making, as the duke of Wellington's despatch remarked, 'a most gallant attack upon a superior body of the enemy's cavalry, which was driven through the village of Crais d'Orade.' In June, 1814, he returned to England, received the rank of major-general, was appointed to the staff at Brighton, and had a splendid piece of plate presented to him by the officers of the 7th hussars. In 1830 he was made lieut.-general, and in 1837 colonel of the 1st dragoons. Subsequently to the battle of Waterloo, which turned the swords of so many warriors into ploughshares, the gallant subject of this article, who was created a baronet in 1828, when he also had a grant of arms alluding to his services, took an active part in politics, both as a debater in the house and in his character of master-general of the ordnance, to which office he was appointed in 1835. He was called to the house of peers by patent, dated August, 1841. Died, October, 1842, aged 67.

VIVIANI, VINCENTIO, an Italian mathematician, taught by Galileo, and honored by the grand duke of Tuscany with the office of chief engineer. We owe to him the restoration of the lost treatises of Aristæus and Apollonius of Perga; born at Florence 1622, died 1703.

VIVIEN, J., a French painter, 1647-1734.

VIZZANI, ÆNEAS, in Latin *Vigianus*, a physician of Bologna, 1543-1602. POMPEIO, an historian of that city, died 1607. CARLO EMANUEL, a philologist and classical commentator, 1617-61.

VLADIMIR, four Russian princes:—VLADIMIR, called *the Great*, became master of the dominions of his father after assassinating his brother, Jaropolk, in 980, and commenced the civilization of Russia, and the foundation of the Christian religion; died 1005. VLADIMIR (the second, though not called by that title), eldest son of Yaroslav, grand duke of Kief, became duke of Novogorod in 1038, conducted an expedition against Constantinople 1041, died 1052. VLADIMIR II., his great-grandson, commenced to reign 1113, and was distinguished for his humanity and wise administration; he sustained a war with

the Bulgarians, the Livonians, and the emperor Alexis Comnenus, and was the first of the grand dukes who took the title of Czar, and assumed the characters of imperial dignity; died 1125. VLADIMIR ANDREIOWITZ, nephew of Ivan II., is remarkable for his renunciation of the power offered to him, in favor of his cousin, Demetrius, with the view of promoting the establishment of a regular order in the succession. This occurred in 1364, and Vladimir afterwards distinguished himself in arms against the Tartars. Died 1410.

VLADISLAS. See ULADISLAUS.

VLAMING, P., a Dutch poet, 1686-1733.

VLASTA, a Bohemian amazon, who maintained a struggle for eight years in the endeavor to establish a state ruled by women, killed 743.

VLEGER, S., a Dutch painter, 17th century.

VLIERDEN, LAMBERT DE, a Flemish juriconsult and Latin poet, 1564-1640.

VLIET, WILLIAM VAN, a Dutch historical and portrait painter, 1584-1642.

VLIET, or VLITIUS, J. VAN, a Dutch juriconsult, philologist, and poet, died 1666.

VOEL, J., a French Jesuit, 1541-1610.

VOET, or VOETIUS, GISEBERT, a Dutch theologian, was born at Heusden, in 1593. Having studied at Leyden, he first settled as a minister at his native place, where he remained till 1634. He afterwards went to Utrecht, where he was professor of divinity and the oriental languages. He distinguished himself by his attacks on the Armenians; and when the Cartesian philosophy was engaging the public attention, he wrote against Descartes with much asperity and illiberality. His principal works are, 'Selectæ Disputationes Theologicæ,' 5 vols. 4to.; and 'Politica Ecclesiastica,' 4 vols. 4to. Died 1677.—PAUL VOET, his son, who also died in 1677, was, successively, professor of logic, metaphysics, and civil law, at Utrecht; was the author of several learned works on theology and jurisprudence.—JOHN VOET, son of Paul, professor of law at Leyden, was the author of a valuable 'Commentary on the Pandects.' Died 1714.

VOGEL, C., a German composer, 1756-1788.

VOGEL, J. W., a Ger. mineralogist, 1657-1723.

VOGEL, RODOLPH, a German physician and chemist, compiler of a 'Medical Library,' published between 1751 and 1771.

VOGLER, J. P., a Ger. botanist, 1746-1802.

VOGLI, J. H., an Ital. biographer, 1697-1762.

VOIGT, G., a German theologian, 1644-1682.

VOIGT, J., a Germ. bibliographer, 1695-1765.

VOIGT, J. C., a German physician, 1725-1810.

VOIS, A. DE, a Dutch painter, born 1641.

VOIS, R. DE, a French ecclesiastic, 1665-1728.

VOISENON, CLAUDE HENRY FUSEE, Abbé De, a dramatic writer and wit, whose life presents a singular mixture of alternate devotion and licentiousness, born at the Château de Voisenon, near Melun, 1708, died 1775. The best of his romances is entitled 'L'Histoire de la Felicité;' some of his comedies were very successful.

VOISIN, J. DE, a rabbinical writer, 1620-1685.

VOISIN, or VOYSIN, D. F., chancellor of France during the Orleans regency, 1654-1717.

VOITURE, VINCENT, a celebrated French wit and poet, born at Amiens, in 1598. His manners were highly agreeable, and he became master of the ceremonies to Gaston, duke of Orleans. In 1634 he was admitted into the French academy, and was subsequently sent on a mission to Spain, where he was much caressed, and where he composed some verses in such pure and natural Spanish, that they were

universally ascribed to Lopez de Vega. Under the administration of Cardinal Mazarin, Voiture was in the zenith of his reputation, and enjoyed large pensions; but gambling, and other vicious habits kept him poor. He wrote verses in French, Spanish, and Italian; but his letters were the chief basis of his literary reputation, and in their days were extravagantly admired. He died in 1648.

VOLANUS, A., a Polish protestant, celebrated for his controversy with the Jesuits, 1530-1610.

VOLCKAMMER, J. C., a physician and botanist of Nuremberg, last century.

VOLCKAMMER, J. G., a physician and botanist of Nuremberg, 1616-1693.

VOLCKMANN, J. J., a native of Hamburg, known as a translator, 1732-1803.

VOLKOFF, THEODORE, a Russian dramatist, was born at Gostroma, in 1729. He wrote several plays, and erected a theatre at Jaroslav, where his success was such, that the empress Elizabeth sent for him to St. Petersburg, and appointed him first actor of the Russian theatre. In 1759 he was sent to establish a national theatre at Moscow; and Catharine II. bestowed on him an estate, with a patent of nobility. He died in 1763, and his funeral obsequies were celebrated with great magnificence.

VOLKYR, NICHOLAS, secretary to the duke of Lorraine, and historian of Alsace, 16th century.

VOLLENHOVE, J., a Dutch poet and protestant theologian, 17th century.

VOLNEY, CONSTANTINE CHASSEBŒUF, Comte De, enjoyed in the early part of this century a brilliant reputation, which, however, did not rest on such a basis either of deep learning or of solid thought, as to secure its permanence. His most famous work, the 'Ruines, ou Méditations sur les Révolutions des Empires' (1791), is a piece of showy and even eloquent writing; but it has no real force as an exposition of the unsound and dangerous principles which it inculcates. Soon after it, there appeared 'La Loi Naturelle,' a system of ethics founded on the basis of materialism. Before the publication of these works, he had done better service by his spirited and observant 'Voyage en Syrie et en Egypte;' and afterwards he was a valuable laborer in the field of Ancient Chronology. His speculations on the Oriental Tongues led to much controversy, but seem to be now held quite destitute of worth.—Volney was born in Anjou in 1757, and inherited after a time property enough to let him indulge in travelling and miscellaneous studies. He took part in the Revolutionary struggles, attaching himself to the party of Gironde; and after the fall of Robespierre he was for some time a professor in the Ecole Normale. At first he was a favorite of Napoleon, who proposed to make him second consul; but by and by he shared in the contempt with which the emperor treated all independent thinkers. He voted in the senate for Napoleon's deposition, and was created a peer at the restoration. He died in 1820. [W.S.]

VOLPATO, GIOVANNI, an Italian engraver and writer on the principles of design, was born at Bassano 1733, died 1802. Volpato was instructed by Bartolozzi, and was employed to make engravings from the paintings of Raphael at the Vatican. A monument by Canova has been erected to him.

VOLPATO, J. B., an Italian painter, 1633-1706.

VOLPI, GIOVANNI ANTONIO, a famous Italian scholar and Latin poet, 1686-1766. His brother, GAETANO, an editor and bibliographer, born 1689. A third brother, GIAMBATTISTA, a distinguished anatomist, taught by Morgagni, died 1757.

VOLPINI, GIAMBATTISTA, an Italian physician and disciple of Van Helmont, died 1714.

VOLTA, ALEXANDER, born at Como, Milan, 14th February, 1745; died 5th March, 1827, at Como. Educated in the public school of his native place under the eye of his father, Volta at an early age directed his attention to the phenomena of electricity. About 1775 he published an account of his electrophorus, which in the smallest size forms a source of the electric fluid, a remarkable instrument at that period in the history of electricity. In 1776 and 1777 he noticed the production of carburetted hydrogen in stagnant pools. Although probably unknown to him, Franklin had described the same fact in 1774. He showed in 1780 that the burning of some of Pietra mala is due to this gas. In 1777 he first used eudiometers to fire gases in close vessels, and invented about the same time the electric gun and pistol, and the permanent hydrogen lamp. In 1779 he became professor of physics at Pavia. In the beginning of the year 1800, Volta constructed the Voltaic pile, the most wonderful apparatus perhaps ever invented by man, since of the unparalleled truths developed by the agency of this simple invention, we have only yet seen the dawn. After this period he was made a senator of Lombardy by Napoleon, who likewise bestowed other favors upon him. But he made no figure as a political orator, falling short in this respect even of Newton; who, during his parliamentary career, is said to have spoken only once in the House of Commons, and the solitary oration was to direct the door-keeper to shut one of the windows, through which a draught of air was projected upon the member addressing the House. Volta, however, never uttered a word. In 1819, he retired from his professorship to his native town, and spent the evening of his days, beloved and honored by his fellow-citizens. [R.D.T.]

[Voltaire, from a Medal.]

VOLTAIRE, the name capriciously assumed by FRANÇOIS MARIE AROUET, was made by him more celebrated than any other word that we read in the literary history of the eighteenth century. There was hardly any department of literature to which Voltaire did not make contributions; and, to say nothing of many efforts trifling or unsuccessful, the variety of his genius is attested by the number and diversity of the departments in which he attained celebrity. He gave to the French language some of its finest tragedies, and its only epic that is worthy

of the name; a few of its liveliest novels, and many of the wittiest and most highly finished of its satirical and other light poems; several of its most spirited and judicious histories, and a large number of its most acute critical essays; and, above all, he poured out an enormous series of writings, which, though their claim to the title of philosophical may justly be questioned, passed in their time for the exposition of a true and great philosophy, and exercised on public opinion throughout Europe a tremendous and practical influence. He was a consummate master in the art of representation, owing his effectiveness much less to his great clearness and consecutiveness of thought, than to the remarkable skill and liveliness with which he puts his ideas into words; his poetical diction is very refined and terse; and his prose style is unsurpassed for its apt perspicuity, its easy and varied grace, and its brilliant turns and strokes of wit. Against this large sum of merit, there has to be set off a heavy account of literary faults, caused chiefly by a lamentable predominance of moral evil. Voltaire was a bad-hearted man: he neither loved nor revered any object except himself and his own glory; his vanity generated an irascible malignity, and a settled unbelief in all that is true and holy; and, while his serious poetry thus became cold, his other works exhibit unrestrained indulgence in a sneering irony, which, taken along with their prevalent purpose, may be held as not unjustly imaged in Goethe's Mephistophiles. The dangerous political tendency attributed to Voltaire's writings was little more than indirect: the immediate objects of his attack were much seldomer kings than priests. He was, in fact, a bigot; a bigotted and intolerant deist. The atheism professed by some of his fellow-Encyclopedists, was regarded by him with a dislike as scornful as that with which he looked on Christianity; and if the design which he avowed, of destroying the Christian religion, occupied him almost exclusively, this was only because that faith was nominally or really prevalent, and because among its ministers were many of the enemies on whom he panted to be revenged. Trained in his youth amidst the unbelief and profligacy which pervaded the aristocratic society of Paris in the era of the Regency, he taught literature to mock at truths which he saw mocked at in real life; and he thus became the direct agent in propagating, but the indirect and unwitting instrument in finally overthrowing, the system of opinions and conduct which disgraced that evil time.—Voltaire was the son of François Arouet, an officer in the finance department of the government, and was born at a village near Paris, in 1694. He distinguished himself in boyhood, at the Jesuit College of Louis-le-Grand, by his aptitude for learning, his malignant wit, and his inclination to scoff at religion. His godfather, a fashionable and literary abbé, introduced him at an early age into courtly circles, where he speedily learned the hollowness of every thing around him, and acquired and exhibited his characteristic skill both in artful compliment and in biting repartee. He was next placed in the chambers of a lawyer, but speedily deserted them.—Indecent satirical verses having been circulated on the death of Louis XIV., the notoriety of the young Arouet caused him to be suspected (wrongfully for once) of being the author. He was confined for a year in the Bastille, where he finished his tragedy 'Cedipe,' and sketched his epic 'L'Henriade.' He was now allowed by his father to take his own way. His tragedy, proving successful, was followed by others which failed; the 'Henriade,' stolen in manuscript, as he alleged, was

printed, with satirical verses which he said were interpolations. The publication, thus called surreptitious, made him famous; and the same farce was repeated so often in his literary career, that, in this case as in the rest, the whole was plainly a device of the author himself. He now experienced, much as Dryden did afterwards, the danger of associating with aristocratic rakes. A man of quality, affronting the young poet in society, was put to silence by an apt retort; he took his revenge by making his valets give the upstart a beating; Voltaire learned to fence, challenged his insulter, and was answered by an imprisonment of six months. On his release he was banished from the kingdom. He chose to pass his exile in England, where he lived for three years (1726–1729). His French apologists say that he was here confirmed in his infidelity by his intimacy with Bolingbroke and others. No confirmation or additional instruction was needed. Hardly more reason is there for the assertion that he made himself profoundly acquainted with the English language and literature. He did learn very much of both; but he never learned any thing profoundly. He became sufficiently acquainted with Shakespeare's works to ridicule them and steal from them; and he acquired English enough to write a ludicrously blundering letter, which is preserved by the biographers of Pope. In England, at all events, he learned how to publish works by subscription, and perhaps also how to conduct commercial speculations. By the English profits of an edition of the 'Henriade,' he laid the foundation of a fortune, which he afterwards increased enormously by lottery tickets, gambling in the corn trade, and lending money at usurious interest. Thus, though he soon affected to be above receiving any price for his literary works, he was a rich man for many years of his life, and a very rich one at its close.—For several years after he was allowed to return to France, Voltaire shifted his residence often, having sometimes real occasion to dread the government. Now, besides the 'Lettres Philosophiques,' (sketched in England, and very obnoxious,) appeared his 'Histoire de Charles XII.' and several tragedies, among which were 'Adelaide du Guesclin,' and 'Zaire' (1732), his dramatic masterpiece. In 1738 Voltaire and Madame du Chastelet, a married woman of a mathematical turn, agreed to live together, and retired to the Villa of Cirey, on the borders of Champagne and Lorraine. There they lived, studied, and quarrelled, till 1749, when the lady, who had more lovers than one, died in child-bed. Her example, and Voltaire's boundless presumption, made him mistake himself so much as to publish the 'Elémens de la Philosophie de Newton.' In this retreat were composed, besides other tragedies, the two fine ones 'Mahomet' and 'Europe'; as also the 'Siècle de Louis XIV.' and, in part at least, the 'Essai sur les Mœurs et l'Esprit des Nations.' The retirement was interrupted by visits to Paris, by several other journeys, and by a secret mission to Frederic II. of Prussia, whom Voltaire had already visited.—In 1750, on the invitation of this eccentric king, Voltaire settled at Berlin. He remained there for three years, during which he enlivened the royal circle by his wit, corrected the bad French of the royal philosopher and poet, and learned to demonstration, not only that courts are wearisome places, but that Frederic of Prussia and François Arouet were too like each other to be really friends. This period was not prolific in new compositions. Nor did much that was important come from his pen during the next few years, which he

spent at various places in France, living for a time also in Germany, to collect materials for the 'Annales de l'Empire,' which is described as being the only one of all his works that wearies the reader.—In 1758, when he was in his sixty-fourth year, he purchased two small estates, lying not far from Geneva, though within the French frontier; and at his chateau of Ferney, in one of these, he passed the last twenty-two years of his life. Ferney was, during that time, what Abbotsford became, more worthily, in our own day, the muster-place of all the celebrities of Europe, whom the master of the mansion entertained hospitably, while he sedulously prosecuted his own literary labors. To this period, of vigorous old age, unimpeded by personal dangers, but far from being undisturbed by personal quarrels, belong very many of Voltaire's works, and some of his best. The last of his successful plays were 'L'Orphelin de la Chine,' acted a little before his retirement, and 'Tancrède,' soon after it. A crowd of other tragedies were confessedly failures; and his comedies always had been so. 'La Philosophie de l'Histoire' (1765), was written as an introduction to the 'Essay on the Manners of Nations,' now completed and published; and the 'Histoire de Pierre le Grand' appeared in parts from 1759 to 1765. Thus, as one of his French biographers observes, 'To combat religion without ceasing, and to make war on all who defended it; to defend his own glory against those who attacked it; and to succor or avenge the innocent victims of human justice: all these diversified employments were far from absorbing his whole time.' There is here an allusion to a series of Voltaire's exertions, of which his vindication of the memory of Calas was the first. Though he was doubtless led to defend the unfortunate Calvinist by regarding him as a victim of his own enemies the priests, his better feelings were keenly awakened as the long struggle proceeded, and this and several subsequent appeals of the same sort are among the best points in the conduct of the 'Philosopher of Ferney.' It should be noted, also, that, with all his frugality, he was a liberal and improving landlord, and a charitable neighbor. He quarrelled with his parish priest; but he built him a new church. Towards the end of his days, indeed, he showed a desire of reconciliation with the ministers of religion, his expression of which scandalized his infidel friends as a piece of cowardice, while the clergy were disposed to regard it as shameless hypocrisy. He seemed to look no farther than obtaining the sacraments by pretences and tricks; and he justified himself to his disciples by saying, that he wished his body to rest in consecrated ground. It was, after all, not without deception and intrigue, that his friends were able to procure this posthumous honor for the unrepenting apostle of unbelief. Having gone to Paris, where he had not been for twenty years, he died there in 1778, soon after having completed his eighty-fourth year. [W.S.]

VOLTERRA, DANIEL DE, an Italian painter and sculptor, who was employed, under the pontificate of Paul IV., to cover the nudities of some of the figures in the Last Judgment of Michel Angelo, which obtained for him the ludicrous title of Bragghettone. Died 1566.

VONCK, F., a Belgian advocate, known as one of the popular leaders in 1789, died 1792.

VONDES, JOOST VON DER, a Dutch poet and dramatic writer, whose works have greatly aided in perfecting his native language, 1587–1679.

VOPISCUS, FLAVIUS, a Latin historian, who lived at Rome in the time of Diocletian and Con-

stantine Chlorus, commencement of the 4th century. He is considered one of the best writers of the Augustan histories. His work commenced with the history of Aurelian, but his remains now extant are the lives of the four tyrants, Firmus, Saturninus, Proclus, and Bonosas; and of the three emperors, Carus, Numerianus, and Carenas.

VORAGINE, J. DE, an Italian Dominican, historian, and writer of sacred legends, died 1298.

VORST, ÆLIUS EVERARD, a Dutch physician, director of the botanic garden at Leyden, 1565-1624. His son ADOLPHUS, a physician and botanist, editor of an edition of Hippocrates, 1597-1663.

VORST, CONRAD, in Latin, *Vorstius*, a Dutch theologian, successor of Arminius at the academy of Leyden, 1569-1622. WILLIAM HENRY, his son, a minister and Hebrew scholar, died 1660.

VORSTIUS, J., a Lutheran controversialist, philologist and Hebrew scholar, 1623-1676.

VORTIGERN, a British king, elected after the departure of the Romans from this island in 454, killed in battle 485.

VOS, MARTIN DE, an eminent Flemish painter, instructed by his father and by Tintoretto. He excelled in landscapes and historical composition; died at Antwerp 1604. SIMON PAUL, another artist of this name, excelled most in hunting pieces, and flourished at Antwerp about the same time, but the dates are not ascertained.

VOSS, JOHN HENRY, a German poet and critic, who ranks also among the greatest of German translators and philologists, was born of humble parentage at Mecklenberg in 1751. He studied under Heyne at Gottingen, and in 1809 was appointed professor at Heidelberg, in which office he died 1826. In his translations of Homer, and of others of the chief classics, Voss is said to have preserved the metrical form of the original, the most minute details, and expressions of ideas, the epithets, and all the effective characteristics, with surprising fidelity. He has translated Shakspeare, but this endeavor is understood to be less successful. He was involved in many bitter controversies with Heyne, Stolberg, and Creurey. His own 'Idyls' have the reputation of being charming additions to the native literature of Germany.

VOSSIUS, GERARD, a Roman Catholic theologian and learned editor, died 1609.

VOSSIUS, GERARD JOHN, an eminent critic and philologist, was professor of chronology and eloquence at Leyden, and of history at Amsterdam. His works are frequently referred to as authorities, particularly the following: 'De Historicis Græcis,' 'De Historicis Latinis,' and 'Ars Historica.' Born 1577; died 1649.

VOSSIUS, ISAAC, son of the preceding, was born at Leyden, in 1618, and, possessing great natural talents, very early acquired a high reputation among the learned. In 1670 he came to England, and obtained from Charles II. a canonry of Windsor, and the degree of doctor of laws from the university of Oxford. He died in 1688. His works are numerous and erudite. He was rude in his manners, and sceptical in his religious notions, but so credulous in other matters, that Charles II. said, 'he is a strange man for a divine, for there is nothing which he refuses to believe, except the Bible.'

VOUET, SIMON, an eminent French painter, employed in the Louvre and Luxembourg, 1582-1649.

VOULTE, JOHN, in Latin, *Vulteus*, a Latin poet, born at Rheims about 1542.

VOYER, a family of distinguished Frenchmen: —RENE, Seigneur D'Argenson, a soldier and diplomatist, 1596-1651. His son and successor in the title, same name, a diplomatist and ambassador to Venice, 1623-1700. MARC RENE, son of the latter, chancellor of France, minister of police, and a great promoter of *Lettres de Cachet*, 1652-1721. His eldest son, RENE LOUIS, Marquis D'Argenson, minister of foreign affairs, distinguished as a scholar and partisan of the philosophic doctrines, author of 'Essays,' 1694-1757. MARC PIERRE, brother of the latter, successor of his father as lieutenant-general of police, and successor of M. de Bretil as minister of war, was born in 1696. His name is a conspicuous one in the history of the Orleans regency; and having strenuously opposed the system of William Law, he was out of favor till the great financier had fallen into disgrace. He was a patron of learned men, and D'Alembert and Diderot dedicated the Encyclopédie to him. He was disgraced through the influence of Madame Pompadour in 1757; died 1764. His son, RENE, a distinguished commander, flourished 1722-1782.

VOYS, A. DE, a Dutch painter, born 1641.

VOYSIN. See VOISIN.

VREE, or VREDIUS, OLIVER DE, a Flemish historian of his own country, 1578-1652.

VRIES, GERARD DE, a zealous Cartesian philosopher, flourished at Utrecht 17th century.

VRIES, JOHN FREDERMAN DE, a Dutch painter of architecture and perspective, 1527-1588.

VRIES, MARTIN GERRITSON DE, a Dutch navigator, time of Van Diemen, 1642.

VRILLIERE, LOUIS PHELIPEAUX, Marquis De La, secretary of the Orleans regency, 1672-1725.

VROOM, or VROON, HENRY CORNELIUS, a Dutch marine painter, from whose designs the tapestry in the House of Lords, representing the defeat of the Spanish armada, was executed to the order of Admiral Howard, 1566-1617.

VUEZ, A. DE, a French painter, 1642-1724.

VUILLEMIN, or WILLEMIN, JEAN, a French physician and Latin poet, 16th century.

VUITASSE, C., a French theologian, 1660-1716.

VULCANUS, the Latinized name of Bonaventure de Smet, a learned Fleming, 1538-1614.

VULSON, or WILSON, DE LA COLOMBIERE, MARC DE, a famous heraldic writer, who resided at Grenoble, till his domestic peace was destroyed, in the first half of the 17th century, and then took up his abode at Paris. He died in office at the court 1658. Among his works, which are of great value, may be mentioned 'Le Vrai Théâtre d'Honneur et de Chevalerie,' 2 volumes in folio, 'La Science Heroïque,' and 'De L'Office des Rois d'Armes des Heraults et Poursuivants.'

VUORDERN, M. A., Baron De, a French administrator, author of 'Historical Journals' relating to the history of Louis XIV., 1629-1699.

VZESLAS, grand duke of Russia, rival of Isiaslav in their civil wars, 1068-1101.

## W

WAAJEN, WAASEN, or WAEYEN, JEAN VANDER, a Dutch theologian, who has the reputation of being one of the best controversialists of that country, and was counsellor to the prince of Orange, 1639-1701. His son, of the same names, who succeeded him as preacher to the university of Franeker, died 1716.

WAAL, or WAEL, LUCAS DE, a painter of Antwerp, taught by John Breughel, 1591-1676. CORNELIUS, his younger brother, 1594-1662.

WACE, ROBERT, an Anglo-Norman poet of the 12th century. He was a native of Jersey, and became chaplain to Henry II., king of England, who gave him a canonry in the cathedral of Bayeux. He wrote, in Norman-French verse, a history of England, an account of the Norman conquest, and some romances.

WACHTER, JOHN GEORGE, a learned German philologist and antiquarian, 1673-1757.

WACHERBARTH, A. C. COUNT VON, an Austrian field-marshal and statesman, 1662-1734.

WADING, or WADDING, LUKE, an Irish priest, who held a professorship at Salamanca, and afterwards resided at Rome, author of a 'History of the Order of St. Francis,' and editor of several learned works, including Duns Scotus and Calaisio's Concordance, 1588-1657.

WADDELL, JAMES, an American presbyterian pulpit orator, died in Virginia, 1805.

WADDING, PETER, an Irish Jesuit, who became chancellor at the university of Gratz, in Styria, author of Latin works, 1580-1644.

WADHAM, NICHOLAS, founder of the college that bears his name at Oxford, 1536-1610.

WADSTROM, or WADSTRÖM, CHARLES BERNARD, a Swedish engineer, memorable as a promoter of African colonization and discovery, was born in Stockholm 1746. He visited Africa in company with the botanist, Sparrman, and the mineralogist, Arrhenius, in 1787, and on coming to London was invited to give evidence before the privy council, in an inquiry tending to the abolition of the slave trade. His pamphlet on the subject led to the establishment of the English colony at Sierra Leone; died at Paris 1799. Wadstrom added some remarks upon the negro character to the work of Norris on Dahomey.

WADSWORTH, BENJAMIN, a president of Harvard University, 1725, and a prolific religious writer, d. 1737.

WADSWORTH, JAMES, a wealthy gentleman, who cultivated his large tract of land on the Genesee river, in the State of N. Y., with great agricultural success. Died 1844, aged 76.

WADSWORTH, PELEG, an American revolutionary officer, was born in Mass. During the war he was taken prisoner and conveyed to Fort Castine, from which he and a Major Bartram made their escape, which was full of daring adventure and danger. Died 1829. His son, HENRY W., who was a lieutenant in the navy, was blown up in a fire-ship in the harbor of Tripoli, in 1804.

WÆL, LUCAS DE, a Flemish painter, 1591-1676. CORNELIUS, his brother, a painter of landscapes and battle-pieces, 1594-1662.

WÆFER, LIONEL, an English adventurer, who was originally a surgeon in the army, and sailed with Dampier. The latter having quarrelled with him, put him ashore on the isthmus of Darien,

where he remained some time with the Indians. He published an interesting narrative on his return home in 1690.

WAFFLARD, ALEXIS JAMES MARIA, a French dramatic author, 1787-1824.

WAGA, THEODORE, a Polish jurist and historian of his own country, 1739-1801.

WAGENAAR, JOHN, historiographer to the city of Amsterdam, author of a 'History of Holland from the Earliest Times to 1751,' 'The Present State of the United Provinces,' 'Description of the City of Amsterdam,' and 'The Character of John de Witt placed in its True Light.' The first of these works extends to 21 vols. 8vo, and the edition of 1752-1759 is embellished with engravings, maps, and portraits, by Houbraken. Wagenaar was born in Amsterdam 1709, died 1773.

WAGENAAR, LUKE JANSEN, a Dutch pilot and writer on navigation, died 1596.

WAGENHARE, PETER DE, a religious professor and Latin poet, born about 1599, died 1662.

WAGENSEIL, JOHN CHRISTOPHER, professor of history and jurisprudence at Altorf, author of 'Tela Ignea Satanae,' which is a collection and refutation of all that the Jews have written against Christianity, 1633-1705.

WAGER, SIR CHARLES, a brave naval officer, distinguished in the reign of Anne, 1666-1743.

WAGHORN, Lieut. THOMAS, R.N., whose name will be for ever associated with the great achievement of steam communication between England and India, was born at Chatham, 1800. At 12 years of age he was appointed a midshipman, and before he had completed his 17th year he passed in navigation for lieutenant. After a short cruise he volunteered for the Arracan war, and having received the command of the East India Company's cutter, Matchless, and seen much service by land and sea, he returned to Calcutta in 1827. From this period he turned his attention to the great project he had had long secretly at heart—a steam communication between England and India; and the ardor, perseverance, and firmness with which he worked it to completion, have gained him a name among the benefactors of his race. But we regret to say that fame was all that he achieved by his arduous and long-continued exertions; for the gigantic operations in which he had been engaged exhausted his resources, and he met with but scanty assistance from those whom every consideration of humanity and liberality should have induced to lend him a helping hand. Died 1850.

WAGNER, B., a professor of philosophy, 16th century.

WAGNER, CHARLES CHRISTIAN, a German physician and professional writer, 1732-1796.

WAGNER, C. L., a Ger. theologian, last cent.

WAGNER, GABRIEL, a German polemic and philosophical writer, professor of literature and poetry at Hamburgh in 1696.

WAGNER, GODEFROI, a German divine, and editor of several learned works, last century.

WAGNER, G. F., a German jurist, born 1631.

WAGNER, J. G., a Ger. physician, died 1759.

WAGNER, J. J., a Swiss physician, author of a Natural History of his country, 1641-1695.

WAGNER, LOUIS FREDERIC, a jurisconsult and numismatist of Tübingen, 1700-1789.

WAGNER, PAUL, magistrate and jurist of Leipzig,

1617-1697. CHRISTIAN, his son, a divine and learned writer, 1663-1698. GOTTFRIED, brother of the latter, a learned writer upon the origin of the Americans, 1652-1725.

WAGNER, PETER CHRISTIAN, a learned German physician and naturalist, 1703-1764.

WAGNER, TOBIAS, a learned theologian and counsellor at Tübingen, 1598-1680.

WAGSTAFFE, THOMAS, a learned divine of the party of nonjurors, who adopted the medical profession after the revolution, and finally became a prelate: besides his Sermons, he wrote some political tracts and a vindication of Charles I., 1645-1712.

WAGSTAFFE, WILLIAM, known as a humorous writer, physician to Saint Bartholomew's Hospital, born in Buckinghamshire 1685, died 1725.

WAHLENBERG, GEORGE, an eminent botanist, was born in the province of Warmeland, in 1784. He visited the remote parts of the Scandinavian peninsula, and most of the northern countries of Europe, for the purpose of making botanical and geological researches; and on his return to Upsal, where he was superintendent of the museum of science, he published his 'Flora Lapponica,' 'Flora Carpathorum,' 'Flora Upsaliensis,' and 'Flora Succica,' besides some geological treatises. Died 1814.

WAILLY, NOEL F. DE, a French grammarian, 1724-1801. His son, STEPHEN AUGUSTIN, author of a Rhyming Dictionary, 1770-1821. CHARLES, of the same family, a famous architect, 1729-98.

WAILLY, P. J., a Fr. missionary, 1759-1828.

WAINWRIGHT, JONATHAN MAYHEW, a bishop of the Protestant Episcopal Church in the diocese of New York, was born in Liverpool, on the 24th of February, 1792, of parents who were citizens of the United States, but were in England, on a visit, at the time of his birth. His father was Peter Wainwright, and his mother was the daughter of Dr. Jonathan Mayhew, one of the most distinguished among the Socinian Congregational divines of Boston, and a strong opponent of Episcopacy, the introduction of which into the American colonies, he resisted most strenuously in his writings. Young Wainwright's parents spent some years in England, and the subject of our notice did not return to America until he was eleven years old. His first instruction was at a school in Ruthin, North Wales, under the care of members of the established church. On his return to this country, he was placed at Sandwich, Mass., where he was prepared for Harvard University, Cambridge. In 1812, he received his Bachelor's degree, and was immediately employed as Instructor in Rhetoric, filling at the same time the office of Proctor. In 1816 he was ordained deacon by Bishop Griswold, and ministered in Christ Church, Hartford, Connecticut, where he was admitted to the priesthood by Bishop Hobart, and was instituted as Rector in May, 1815. It was during his residence in this place that he married Miss Phelps, who still survives. In 1819, Bishop Brownell was elected to fill the vacant Episcopate of Connecticut, and Mr. Wainwright was called to succeed him as one of the assistant ministers of Trinity Church, in New York. Here he continued until the beginning of 1821, when he took charge of Grace Church, New York, to which he had been twice invited. In Grace Church he remained thirteen years, and in 1834, accepted the rectorship of Trinity Church, Boston. After a residence there of three years, he returned to New York, to accept once more the situation of an assistant in Trinity, in which position he had commenced his labors in that city. That situation he held from 1837 to the time of his death. After filling there

various important and responsible ecclesiastical offices, he was elected in 1852 provisional bishop of the diocese of New York. His labors now became unintermitting, and there can be no doubt that his zeal and industry overtasked his physical powers, and produced the illness which ended his career. He died on the 21st of September, 1854, aged sixty-three years.

WAITHMAN, a well-known alderman and M. P. for London, was born at Wrexham, in Denbighshire, in 1766; served his apprenticeship to his uncle, a linendraper at Bath: and for many years carried on that business in Fleet Street, London. He obtained much notoriety as a city orator, and by strenuously advocating popular rights on all occasions, was regarded, by a large class of the citizens as a champion of freedom. He consequently not only obtained a civic gown, but filled the office of lord mayor, and was elected four times to the city of London in parliament. He died in 1833, and his friends erected an obelisk to his memory, opposite to that raised in honor of Mr. Wilkes, at the foot of Ludgate Hill.

WAKE, SIR ISAAC, an able diplomatist and miscellaneous writer, born at Billing, in Northamptonshire, in 1575. He became fellow of Merton College, Oxford: and, in 1604, was chosen public orator of that university. He was afterwards employed as ambassador to several foreign courts; and, in 1619, received the honor of knighthood. He wrote several works, the principal of which was his 'Rex Platonicus.' Died 1632.

WAKE, WILLIAM, archbishop of Canterbury, a learned and exemplary prelate, was born at Blandford, in Dorsetshire, in 1657, and educated at Oxford. Having entered into orders, he soon distinguished himself by the zeal with which he espoused the Protestant cause, though in opposition to the wishes of the court; and he was accordingly well received by William III., on his accession to the throne. He was, successively, king's chaplain, rector of St. James's, Westminster, and dean of Exeter. In 1705 he was advanced to the bishopric of Lincoln; and, in 1716, he was raised to the see of Canterbury; in which station he distinguished himself by his moderation, firmness, and liberality. He endeavored to promote a union of the English and Gallican churches, for which he was grossly calumniated, though the measure was well meant, and, had it taken effect, the papal power would have been greatly weakened. He published a translation of the 'Epistles of the Apostolical Fathers,' an 'Exposition of the Church Catechism,' and three volumes of 'Sermons.' Died 1737.

WAKEFIELD, GILBERT, an eminent scholar and critic, was born at Nottingham, in 1786. He took his degree of B.A. at Jesus College, Cambridge, in 1776, and at the same time was elected to a fellowship. On entering into orders, he served a curacy at Stockport, in Cheshire, and next at Liverpool; but he grew dissatisfied with the doctrines of the church of England, and left it to become classical teacher in the Academy at Warrington. In 1790 he removed to the dissenting college at Hackney, his connection with which ended in about a year. Soon after this he published a pamphlet against Public Worship, which startled many of his most ardent admirers, and was answered chiefly by dissenters. He wrote some pamphlets against government, of which no notice was taken, until his letter to the Bishop of Llandaff appeared, when the attorney-general instituted a prosecution against him and the publisher. Mr. Wakefield was sentenced to be imprisoned two years in Dorchester gaol, from which he was liberated in

May, 1801, but died of a fever in September following. The principal of his works are, a 'Translation of the New Testament,' 2 vols.; 'Tragediarum Græcarum Delectus,' 2 vols.; an edition of 'Lucretius,' 3 vols.; an 'Inquiry into the Opinions of the Christian Writers of the Three first Centuries, concerning the Person of Jesus Christ,' 4 vols.; and the 'Silva Critica.'

WAKEFIELD, PRISCILLA, authoress of numerous works, designed to promote the education and moral improvement of the young, was born of Quaker parents, named Trewman, in 1750, and died at Ipswich 1832. Her benevolent disposition was further shown by the foundation of savings banks, originally promoted by her for the benefit of the industrious poor.

WAKEFIELD, ROBERT, a distin. Hebraist, and minister of the Church of England, died 1537.

WALBAUM, JOHN JULIUS, a German physician and naturalist, was born at Wolfenbuttel, in 1724. He settled at Lubeck, where he attained great reputation, published several valuable works, and died in 1799.

WALCH, A. G., a German writer, 1736-1801.

WALCH, B. G., a German *savant*, 1756-1805.

WALCH, J. G., a German theologian and philologist, 1693-1755. His son, J. E. EMMANUEL, a learned theologian and naturalist, 1715-1788. CHR. W. FRANCOIS, brother of the latter, an ecclesiastical historian and theologian, 1726-1784. C. FREDERIC, a third br., a juriconsult, 1734-99.

WALDAU, G. E., a German *savant*, born 1745.

WALDEGRAVE, JAMES, earl of, an eminent statesman, governor of the prince of Wales, son of George II., author of Memoirs, 1715-1763.

WALDEMAR I., called 'the Great,' king of Denmark, born 1131, succeeded Eric V., 1147. His reign was illustrated by expeditions against the pirates of the Baltic, and he compelled Magnus VI., king of Norway, to sign a humiliating treaty; died 1181. WALDEMAR II., called 'the Victorious,' younger son of the preceding, succeeded his brother, Canute VI., 1202. He made many warlike expeditions into Sweden, Norway, and Germany, created a powerful navy, and revised the laws of his kingdom; died 1241. WALDEMAR III., eldest son of the preceding, was regent from 1219 to 1231. WALDEMAR IV., third son of Christopher II., was in Bavaria at the death of his father in 1333. In 1340-4 he recovered part of his kingdom by force of arms, and obtained some further successes against Sweden in 1353 and 1357; eventually, however, he was glad to obtain peace by making some sacrifices; died 1376.

WALDENSIS, THOMAS, a learned English Carmelite, born at Walden, Essex, about 1377. He became the champion of the church against the reformers of the reign of Henry IV., and in that of Henry V., whose favorite he was, rose to be provincial of his order and a privy councillor. Henry V. died in his arms, and he himself departed this life while attending the youthful monarch, Henry VI., in France, 1430.

WALDHEIM, FISCHER DE, a German naturalist, settled in Russia. Died 1853, aged 82.

WALDO, PETER. See VALDO.

WALDIS, B., a German fabulist, died 1554.

WALDKIRCH, JOHN RODOLPH DE, a Swiss juriconsult and historian, 1678-1757.

WALDRON, RICHARD, president of the colony of New Hampshire. He was a native of England, and came with the early settlers to Dover, (N. H.) in

1635. He distinguished himself in the Indian wars, and was killed by the savages in 1689.

WALE, ANTHONY DE, a Flemish theologian and adversary of the remonstrants, 1573-1639. JOHN, his son, a physician and anatomist, 1604-1649.

WALES, WILLIAM, a mathematician and astronomer, was born about 1734; went to Hudson's Bay, in 1769, to observe the transit of Venus; accompanied Captain Cook in two voyages around the world; became mathematical master at Christ Hospital, and secretary to the Board of Longitude; and died in 1798. Among his works are, 'Astronomical Observations on the Southern Hemisphere,' a treatise on the 'Discovery of the Longitude by means of Timepieces,' and an 'Inquiry into the Population of England and Wales.'

WALINGFORD, RICHARD, abbot of St. Albans, known as an astronomer and historian, 14th cent.

WALKER, ADAM, an experimental philosopher and lecturer, was born in Westmoreland 1732, and brought up as a weaver, but devoting all his spare time to self-improvement, was early qualified for a place in the intellectual world. He was settled in London as a professional man in 1778, and died there in 1821. Besides his works in experimental philosophy, he invented the Eidouranion, or transparent orrery, the revolving lights in the islands of Scilly, and several useful machines. His son, WILLIAM, was also a lecturer on astronomy, and flourished 1766-1816.

WALKER, CLEMENT, a presbyterian and political writer of the time of Cromwell, was born at Cliffe, in Dorsetshire, and educated at Oxford. Previous to the civil war he was usher of the exchequer, but at the commencement of those stirring times he became, in 1640, member of parliament for Wells. His 'History of Independency' and 'Cromwell's Slaughter House,' were the occasion of his commitment to the Tower in 1649, and he died there 1651.

WALKER, SIR EDWARD, an historian and herald, was born at Netherstowey, in Somersetshire. He was made clerk of the privy council in 1644, and received the honor of knighthood; attended Charles II. in his exile, and was appointed by him garter-king-at-arms. Died 1677. He wrote 'Iter Carolinum, or an Account of the Marches, &c. of King Charles I.,' 'Military Discoveries,' 'Historical Discourses,' &c.

WALKER, GEORGE, a dissenting minister and teacher of theology, better known as a mathematician by his 'Doctrine of the Sphere,' was born at Newcastle-on-Tyne about 1734. He was one of the ministers of the high pavement meeting in Nottingham, and, after that, theological tutor at a dissenting academy in Manchester. Died 1807.

WALKER, GEORGE, famous for his defence of Londonderry against James II., was born of English parents at Tyrone, and became a minister in the Irish Church. He was killed at the battle of the Boyne shortly after his promotion to the bishopric of Derry, 1690.

WALKER, JOHN, a minister of Exeter, author of 'An Attempt towards Recovering an Account of the Numbers and Sufferings of the Clergy who were Sequestered in the Rebellion,' died about 1730.

WALKER, JOHN, a well-known lexicographer, was born at Friern Barnet, in Middlesex, 1732, and lived by the profession of a schoolmaster and lecturer, having, however, first studied elocution with a view to the stage. His works are a 'Critical Pronouncing Dictionary,' 'A Rhyming Dictionary,' 'Elements of Elocution,' 'Rhetorical Grammar,' 'Outlines of English Grammar,' and a 'Key to the

Classical Pronunciation of Greek, Latin, and Scripture Proper Names.' Died 1807.

WALKER, JOHN, a physician and geographical writer, who, at the time of his decease, was head of the London Vaccine Institution; born at Cocker-mouth, in Cumberland, 1759, died 1830.

WALKER, OBADIAH, a Roman Catholic divine and writer on education, 1616-1699.

WALKER, R., a portrait painter, 17th century.

WALKER, S., an English divine, 1714-1761.

WALKER, THOMAS, a dramatic performer of some note in the time of Garrick, was born in London, in 1698. He had all the physical requisites for a good actor; excelled in Macheath, Hotspur, Falconbridge, &c., and was in high favor with the public. Died 1743.

WALKER, THOMAS, a barrister and police magistrate, was born in 1784. Having a natural turn for humorous anecdotes, and mixing much in society, this gentleman hoarded up the smart sayings and witty conversations which fell from his clever companions in their hours of relaxation; and at length he resolved to make the world acquainted with the 'fond conceits' with which his brain was stored. Hence arose the weekly periodical, called 'The Original,' of which 26 numbers only made their appearance. In consequence of indisposition he went over to the Continent, and while at Brussels was attacked rather suddenly, and died Jan. 20, 1836.

WALKER, WILLIAM, a learned divine of the 17th century, was born in Lincolnshire; educated at Trinity College, Cambridge; became master of the free school at Louth, and next of that at Grantham; and had the credit of instructing Sir Isaac Newton. Among his works are, 'A Treatise of English Particles,' 'Troposchematologia Rhetoricæ,' 'Explanation of Lilly's Grammar,' and 'Idiomatologia Anglo-Latina.' Died 1684.

WALL, EDWARD, belonging to an ancient Irish family, was the chief promoter of the rebellion in that country in 1641, and, after the death of Charles I., succeeded the marquis of Ormond as viceroy. He was defeated by Cromwell, and escaped to France, where he died 1651.

WALL, JOHN, a physician and medical writer, chiefly remarkable for his researches to discover materials proper for china ware, and the great promoter of that manufacture in Worcester. He also discovered the virtues of the Malvern waters, 1708-1776. His son, MARTIN, an eminent physician, professor at Oxford, 1744-1824.

WALL, WILLIAM, vicar of Shoreham, in Sussex, author of a 'History of Infant Baptism,' and 'Critical Notes on the Old Testament;' died 1728.

WALLACE, SIR WILLIAM, the national hero of Scotland, is supposed to have been born about the middle of the thirteenth century. Like that of all men immortalized in the early history of nations as the vindicators of their independence, his life has been colored and amplified by the admixture of legendary poetry with fact. It has, however, to be remarked as to Wallace, that research in the documentary sources of history has tended to prove the main features of his career—that he gathered by his personal influence a large body of followers—that though of humble origin he became governor of Scotland—that he gained signal victories, and was the object of the special vengeance of the English monarch. He is generally said to have been the son of Sir Malcolm Wallace of Elderslie, near Paisley, a man of ancient family, though not of high rank. That he

was himself knighted, and held the title of 'Sir,' or Sieur, is shown by the documents of the day. It is usual to speak of the higher Scottish nobility of the period as basely deserting their country and leaving the national contest to be headed by the one man who was faithful among the faithless. But it must be remembered that the nobility were men of Norman origin, whose sympathies naturally were with the court of their national leader, the Norman king of England. The northern Scots, chiefly of Saxon origin, were now made to feel the regal and aristocratic oppression under which the Saxons of England had been governed since the conquest. It is natural to suppose that Wallace's family belonged to the old gentry, who felt the ascendancy of the Normans, as Cedric the Saxon is so picturesquely made to do in *Ivanhoe*, and that the young man feeling his capacity for the task, became the leader of his oppressed countrymen, while the Norman nobles stood aside until ambition opened up for some of them a prospect of dominion in the liberated country. His first conflict with the English power is attributed to a romantic origin. Engaged in a dispute with some soldiers in Lanark, the lady of his affections afforded him refuge. She was slain by the foreigners, on whom the young lover in his turn took signal vengeance. Being thus fairly at feud with the invading power, he gathered around him a gradually increasing body of his countrymen, and was at last joined by such aristocratic leaders as Douglas, Murray, and young Bruce, when Edward sent a force to quell them in 1297. These followers had not sufficient reliance on their leader, and with few exceptions made a separate submission. Wallace, however, still keeping together his humbler followers, attacked and defeated the English army on the plains of the Forth, near Stirling Bridge. The country appeared to be entirely liberated, and the successful leader carried his army across the border to make retaliation on England; a protection granted by him to the monastery of Hexham, dated 7th November, 1297, is one of the few documents relative to him which has been preserved. He assumed the title of regent of the kingdom, but the haughty nobles who had so few ties to Scotland, viewed his career with more jealousy than gratitude. Edward, who was absent during the reverses sustained by his forces, resolved, with his accustomed energy, to strike a decided blow, and on the 22d of July, 1298, the English king in person gained over him the victory of Falkirk. For some time Wallace led a wandering life, and conducted a sort of guerilla war until the year 1303, when he was taken prisoner. He was removed to London, and on the 23d of August, 1305, executed under the English treason law, with every circumstance of cruelty and ignominy that could be devised. The English populace sympathized with his fate as that of a fellow-countryman rather than an enemy. [J.H.B.]

WALLENBOURG, JAMES DE, an Austrian diplomatist and Orientalist, 1763-1806.

WALLENSTEIN. ALBERT WALLENSTEIN, duke of Friedland, born in 1583, was the most renowned German commander during the first half of the THIRTY YEARS' WAR. He was of a noble family, and greatly increased his wealth and power by marriage. When the Danes took part in the struggle between the catholics and protestants in Germany, Wallenstein offered the emperor Ferdinand II. to raise and maintain an army of 50,000 men at his own expense, on condition that he was to have the

[Castle of Friedland—Wallenstein's Residence.]

uncontrolled command of them, and the privilege of indemnifying himself from the territories that they conquered. The emperor accepted these terms, and Wallenstein raised his army of volunteers, gained repeated victories over the Danes and their allies, and overran nearly the whole north of Germany, though he was checked by the heroic resistance of the town of Stralsund. But the violence of his proceedings, and his haughty demeanor, excited the jealousy of many of the catholic princes against him; and the emperor deposed him from his command in 1629. Wallenstein retired with calmness; relying on the promises of a favorite astrologer that he would soon be gloriously restored. This actually took place in 1632. The Swedish hero Gustavus Adolphus had appeared in the meantime on the scene of war, and had crushed the imperialist armies. Tilly the emperor's favorite general had been killed in action with him; and Ferdinand now trembling for his personal safety implored Wallenstein to resume the command. Wallenstein consented, but on terms of even more haughty independence than before. Such was the confidence that the soldiery placed in him, and such was the magic of his name, that the warlike youth of Germany crowded around his standard, and in a short time he encountered the Swedes at the head of a powerful and well-equipped army. He had the advantage over Gustavus and his Saxon allies in the early part of the campaign. He recovered several provinces from them, and defeated Gustavus when the Swedish king attacked his camp at Nurnberg. Wallenstein afterwards lost the great battle of Lutzen (Nov. 10, 1632) in which Gustavus fell; but Wallenstein re-organized his army in Bohemia, and was expected by the Austrian court to press hard on the German protestants and Swedes now that they were deprived of their great king. Wallenstein, however, remained inactive, and was accused by his enemies at Vienna of intriguing with the Swedes, with the view of making himself king of Bohemia. He was also hated on account of the comparative liberality of his religious opinions by the monks and Jesuits, who were all powerful in the emperor's councils. He was assassinated Feb. 25, 1634, by an Irishman named Butler, and some other foreign officers in his army. His murderers were rewarded by the emperor, and the vast possessions of the duke were confiscated. Historians have differed as to the reasonableness or unreasonableness of the suspicions that were entertained of Wallenstein's loyalty; but there can be no difference of opinion as to the deep atrocity of his taking off.

WALLER, EDMUND, was one of the most famous of English poets, for many years both before and after the Restoration; and his celebrity was not completely eclipsed till, in the course of the present century, our older poetical literature came to be more justly appreciated, and strength of imagination and feeling to be estimated more highly than elaborate correctness of form. Waller's works are verses of society and celebrations of public personages and events, with a large number of love-poems. Much inferior, not to Donne and Cowley only, but to several others of their class, both in imaginative force and in tenderness of emotion, he has a fine grace of fancy and diction, a wise purity of taste, and greater skill and care than almost any other poet of his age in the finishing and rounding off of his smaller compositions. His versification is exceedingly sweet; and he has unquestionable merit as a forerunner of Dryden in the improvement of the heroic couplet.—Waller, born in Hertfordshire in 1605, succeeded in childhood to a large patrimonial estate; and he added to his fortune by a wealthy marriage. It was before a second marriage that he paid unsuccessful addresses to Lady Dorothea Sidney, commemorated in his poems by the name of Sacharissa. After having been a member of the House of Commons in early youth, he sat again on the reassembling of parliament by Charles I. in 1640. At first he took his position with the party of Hampden, who was his cousin, and through whom he was connected also with Cromwell. But his vacillating temper

[Waller's Tomb.]

soon showed itself; and, on the breaking out of the civil war, though he continued to sit in parliament, he was active in opposition to the proceedings of the house. In 1643 he was arrested for participation in a plot, said to have been intended for raising the Londoners on the king's behalf. Several of the plotters, and among them a brother-in-law of Waller's, were executed; and he himself escaped only through abject submission, and the most cowardly betrayal of the secrets of his friends. He was heavily fined, and banished from the country: but after the establishment of the Protectorate, Cromwell allowed him

to return from France; and he took up his residence at a house he had near Beaconsfield, in Buckinghamshire. Poetical panegyrics on the Lord Protector now flowed freely from his pen; and it was quite characteristic of the man, that, on the Restoration, these were followed by verses 'To the King, on his Majesty's Happy Return.' He sat repeatedly in parliament even in his extreme old age; and, though he was neither trustworthy nor trusted, his liveliness of talk, and his felicitous readiness of wit, made him one of the favorite speakers of the house. He died in 1687, and lies buried beside Edmund Burke.

WALLER, SIR WILLIAM, an eminent general of the parliamentary army in the reign of Charles I., was born in 1597, in Kent, and was educated at Magdalen College and Hart Hall, Oxford. On his returning from Germany, where he had served as a volunteer against the emperor, he was elected for Andover as a member of the long parliament. He opposed the court, and, on the breaking out of the war, was made second in command under the Earl of Essex. The west of England was the scene of his principal exploits; and in the early part of his career, he fought with signal success, but was ultimately defeated. The self-denying ordinance removed him from service, and he became so much an object of suspicion to the republicans, that he was twice imprisoned. He died in 1668. He wrote 'Divine Meditations,' and a 'Vindication of his Character and Conduct.'

WALLERIUS, JOHN GOTTSCHALK, an eminent Swedish naturalist, professor of chemistry, metallurgy, and pharmacy, at Upsala, 1709-1785.

WALLICK, NATHANIEL, a Danish botanist, employed in the English East India Co.'s service. D. 1854, aged 67.

WALLIN, G., a Swedish Orientalist, 1686-1760.

WALLIS, JOHN, an eminent mathematician, who held the office of archivist and Savilian professor of geometry at Oxford, born at Ashford, in Kent, 1616, died 1703.

WALLIS, S., an English navigator in 1766-68.

WALLIUS, or VAN DER WALLE, JAMES, a Jesuit and Latin poet, French Flanders, 1599-1680.

WALLOT, J. J., a German astronomer, settled as professor at Paris, executed 1794.

WALMESLEY, CHARLES, a Roman Catholic divine and doctor of the Sorbonne, known as a mathematician, 1721-1797.

WALN, ROBERT, an American miscellaneous writer, born in Philadelphia, died 1824.

WALPOLE, SIR ROBERT, better known by his name in the House of Commons, than by his peerage title as earl of Orford, was born at Haughton, his father's family mansion, on the 26th of August, 1676. His father dying in 1700, he succeeded to his estate, and entered parliament. His education, like that of other country gentlemen in that age, was extremely imperfect, and it has been said, that as he knew nothing of French, he and George I., who could not speak English, had to discourse on state questions in bad Latin. His main powers were a capacity for business and a knowledge of mankind. In 1708 he was made secretary at war. He was attacked, along with Marlborough, by the Tory government, which negotiated the treaty of Utrecht, and committed to the Tower on a charge of accession to commissariat speculation. With the Hanover accession came, of course, restoration of influence, and the power of triumphing over his enemies. He immediately entered on high office, but the foundation of his unexampled reign of ministerial power, was in the dexterity and success with

which he adjusted the losses caused by the South Sea scheme, so as to make their pressure least on those who were least culpable. From 1721 until 1742 he governed the British empire, and during that period, though more than once enemies or rivals appeared to be on the eve of bearing him to the ground, he righted himself by his own admirable dexterity. He was a friend of peace, and preserved it until a European war and his downfall came together. The country owes to his government the origin of many important projects of practical statesmanship. Among the most valuable of these was the plan for suspending the exaction of duties until commodities are brought into market, by the arrangement now so well known as the bonding system. The excise scheme, as it was termed, in which he proposed to bring this into practice, was so pertinaciously denounced by popular opinion, under the well-known cry, 'Liberty, property, and no excise,' that he was forced to abandon it. Among his good qualities may be counted his clemency towards his political opponents, and a desire rather to baffle them, than let them be involved in dangerous schemes. But on the other hand, there is no doubt that the charges of corruption made against him are well founded. If he carried out his objects in government he cared not how this was done, and he did much to verify his own axiom, that every man has his price. His habits and manners were coarse as those of the fox-hunters of his day, and we find his son, Horace, in a party of ladies of the younger and more fastidious generation, nervously anxious lest his father should say things to drive them from the room. His first wife was a daughter of Sir John Hunter, lord mayor of London, but he afterwards married his mistress, Miss Skerret, an event which the duchess of Marlborough loudly proclaimed, but which Coxe's elaborate biography does not mention. The fatal majority against him, which showed that his power was gone, was characteristically enough in an election case. It occurred on the 2d of February, 1742. On the 9th he was created earl of Orford, and on the 11th resigned. After three years of misery from unwonted inaction and painful disease, he died on 18th March, 1745.

[J.H.B.]

[Horace Walpole.]

WALPOLE, HORACE, born in 1717, was the third son of Sir Robert. On leaving Cambridge, he travelled on the continent with the poet Gray, till the sensitive man of letters and the supercilious man of rank quarrelled and parted. For more than a quarter of a century from 1741 he sat in the House of Commons; but though he made some speeches, he was neither a distinguished nor a useful member. Government sinecures conferred on him by his father

made up his income to nearly four thousand a-year. Thus enabled to indulge his natural indolence, he spent his life in luxurious lounging; watching and satirizing his political and fashionable contemporaries, coquetting haughtily with literature and literary men, with art and artists, building at Twickenham his Gothic toy-house of Strawberry Hill, and filling it with antiquarian and ornamental nicknacks. In his seventy-fourth year, by the death of his nephew, he succeeded to the Earldom of Orford; but the peerage made no change in his habits. He died six years afterwards in 1797.—Horace Walpole's literary productions never rise above the character of cleverness; but, in their several ways, all of them are

[Walpole's Library.]

clever; and the best of them are among the cleverest of their kind. Neither his 'Anecdotes of Painting in England,' nor his 'Catalogue of Royal and Noble Authors,' would suffice to preserve the reputation which, professing to despise it, he really longed for vehemently. He attempted twice, with considerable success, the adventure of imaginative composition: in the romance of 'The Castle of Otranto' (1764), and the exaggerated tragedy of 'The Mysterious Mother' (1768). He was more at home in his 'Memoirs of the Reign of George II.,' and the 'Memoirs of the Reign of George III.,' the bitterness of which has some excuse in his just indignation at the ill-usage suffered by his father. But the permanence of his celebrity rests on his 'Letters,' which offer a miniature picture of society and public life for the greater part of his long life. They are cynical and ill-minded in the extreme, but always full of keen observation and lively description, and frequent in strokes of pointed wit; and the style, though really formed by great labor, possesses a masterly terseness and apparent ease. Both the Memoirs and the Letters were, by his own order, reserved from publication till after his death. [W.S.]

WALPOLE, HORATIO, Lord, brother of Sir Robert, was born in 1678, and held several offices under government. Besides political pamphlets, he wrote an 'Answer to Bolingbroke's Letters on History.' Died 1757.

WALSH, EDWARD, an eminent physician, was born at Waterford, in Ireland, and graduated as M.D. at Edinburgh. He commenced his professional career as physician in a West India packet, and had much experience in the treatment of the yellow fever, which at that time was raging in Jamaica. He afterwards served as an army surgeon in Ireland during the rebellion, and in the expeditions to Holland and Copenhagen. With the 49th regiment he

proceeded to Canada, was afterwards attached to the 6th dragoons, and sent to Spain; and having accompanied the Walcheren expedition, he was promoted to the staff, went to the Continent as physician to the forces, and ended his medico-military career at the battle of Waterloo. Dr. Walsh published 'A Narrative of the Expedition to Holland,' and 'Bagatelles, or Poetical Sketches.' Died 1832.

WALSH, PETER, an Irish priest and political writer, who became professor at Louvain, and on his return to Ireland persuaded many of the clergy to subscribe a declaration disclaiming the pope's temporal authority; died 1687.

WALSH, WILLIAM, a gentleman of Queen Anne's household, known as a poet, 1663–1708.

WALSINGHAM, SIR FRANCIS, one of Queen Elizabeth's eminent statesmen, was born at Chislehurst, in Kent, 1536. He was first employed by Cecil as ambassador to the court of France in the period 1570–1577, and then became one of the secretaries of state, and received the honor of knighthood. In 1586, three years after he had gone as ambassador to Scotland, he formed one of the Commission for the trial of Queen Mary, and when he died, in 1590, was chancellor of the duchy of Lancaster. While Walsingham was in France the massacre of St. Bartholomew took place, and his enmity to Mary Stuart was well grounded in his knowledge of the dark machinations of the Roman Catholics. Queen Elizabeth, who had a vein of humor in her composition, and frequently addressed her ministers in a sportive manner, called him her *moon*, and in such a night as threatened Europe at that time, she had reason enough to congratulate herself on having a counselor so honest and sagacious. He possessed political knowledge and foresight in a remarkable degree, and though it is said he was puritanically inclined, no man could have drawn a more distinct line where he believed, rightly or wrongly, that the toleration of princes should cease. Walsingham deserves honorable remembrance also for the steady fidelity to his principles which he displayed at the French court, and his bold remonstrances with the king. His despatches are highly interesting, and may be consulted in the work of Sir Dudley Digges. [E.R.]

WALSINGHAM, THOMAS, a monk of St. Albans, historiographer-royal to Henry VI., about 1440, author of English chronicles.

WALTER, JOHN, whose name is inseparably connected with the gigantic achievements of the press in modern times, was the son of Mr. John Walter, printer to the customs, and for many years chief proprietor of the Times newspaper. He was born in 1773, and having on the completion of his education, made himself acquainted with all the technicalities and routine of a large printing establishment, he, in 1803, became a joint proprietor and exclusive manager of the Times; and from this period, during the long course of 44 years, he devoted himself to the moral and material improvement of what has been so justly termed 'the fourth estate' of the realm. Besides being among the first to impart to the daily press its vast range and celerity of information, its authentic accuracy, and its universal correspondence, he was the first to bring the steam-engine to its assistance. This took place Nov. 29th, 1814; and familiar as the discovery is now, it was not made without an amount of risk, labor and anxiety, which few men could have undergone. Mr. Walter's success in the establishment of the Times as the 'leading journal' was attained not so much by his own brilliant abilities, as by the discernment with which he sought out, and the munificence with which he

rewarded talent, wherever it could be found, and by the intuitive sagacity with which he, from time to time, felt the pulse of the nation and prescribed accordingly. In adopting this course he necessarily exposed himself to the charge of inconsistency, and incurred the hostility of all party politicians and class interests; but for these sacrifices he was amply compensated, in witnessing the growing success of that great organ of public opinion, which it had been his glory to found, and his chief pleasure to assist and advise. Mr. Walter sat in parliament from 1832 to 1837 for Berkshire, where his estate, Bearwood, was situated; in 1840 he contested Southwark unsuccessfully; in April, 1841, he was returned for Nottingham; and it is a curious circumstance that Mr. Walter's vote in parliament may be said to have sealed the fate of the Melbourne administration, which he had long been combating in the press (the motion of want of confidence, which led to its overthrow, being carried only by a majority of one). Died 1847.

WALTER, JOHN GOTTLÖB, an eminent Prussian anatomist, 1734—1818. FREDERIC AUGUSTUS, his son, also an anatomical writer and prof. 1764—1826.

WALTER, THOMAS, a botanist, and author of 'Flora Caroliniana,' was an Englishman by birth, but lived in Carolina about 1780.

WALTER, WM. BICKER, an Am. poet of Boston, 1796—1823.

WALTHER, B., a German astronomer, d. 1504.

WALTHER, G. C., a juriconsult, 1601—1656.

WALTHER, M., a German preacher and theologian, 1593—1662. Augustin Frederic, his son, an anatomist, au. of a Treatise on the Tongue, 1688—1746.

WALTHER, R., a Swiss theologian and Latin poet, 1519—1586. His son, ADOLPHUS, a Latin poet of remarkable talent, 1552—1577.

WALTON, BRIAN, a learned prelate, was born at Cleveland, in Yorkshire, in 1600. He suffered considerably at the breaking out of the civil war, on which he fled to Oxford, where he formed the plan of a 'Polyglot Bible,' which was published in 6 vols. folio, and to which he principally owes his literary reputation. In 1660 he was preferred to the see of Chester, but died in London the year following.

WALTON, GEORGE, a signer of the American declaration of independence and a revolutionary officer, was born in Virginia, 1740. He commenced life as a carpenter, but with a taste for study, directed his attention to the law and was admitted to the bar. In the defence of Savannah, 1778, he commanded as colonel of the militia and was wounded and taken prisoner. He was subsequently chosen governor of Georgia. Died 1804.

WALTON, IZAAC, a well-known writer on angling, was born at Stafford in 1593. He died in 1683. Though his education was not a remarkably good one, and though he made in after life no pretensions to learning, he yet became one of the most popular authors of the time in which he lived. He was originally a linen-draper in London, but acquiring a competency, he was enabled to retire from business and leave town. He was a pious man, of a thoughtful contemplative turn of mind, and during the time he was in business was exceedingly fond of fishing. The river Lea was his darling haunt (still a favorite spot for Cockney anglers), and there he spent as much of his time as he could spare from his shop, in angling and contemplation. In 1653 he published his famous work, 'The Complete Angler, or Contemplative Man's Recreation.' In this work he introduced a good deal of information upon the habits of fresh water fishes, and figured with considerable accuracy

[House of Isaac Walton.]

many of the species of which he treats. The air of verisimilitude and unaffected benevolence which this work exhibits has made it the most popular book of its kind ever written; a popularity which after the lapse of 200 years it still enjoys amongst the lovers of the 'gentle craft.' Walton was considered the most expert fisher of his time, and has been called the father of anglers. He spent a great part of his latter years in the society of eminent divines, and has left behind him several biographical memoirs which are still highly thought of. He lived to the age of ninety. [W.B.]

WAMESE, J., a French juriconsult, 1524—50.

WANGENHEIM, F. A. J. DE, a Prussian Orientalist and writer on forest botany, 1747—1800.

WANLEY, NATHANIEL, rector of Trinity Church, in Coventry, author of 'Self-Reflection,' 1633—1680.

WANLEY, HUMPHRY, son of the preceding, was born at Coventry, in 1672, and educated at Edmund Hall, Oxford; on leaving which university he became secretary to the Society for Promoting Christian Knowledge, and afterwards librarian to the Earl of Oxford, in whose service he died in 1726. Mr. Wanley formed a catalogue of Saxon manuscripts for Dr. Hickes's Thesaurus, and made numerous collections relative to archæology and bibliography.

WANSLEBEN, or VANSLEB, JOHN MICHAEL, an Oriental scholar, and traveller in Abyssinia and Egypt, born in Thuringia 1635, died 1679.

WARBECK, PETER, or PERKIN, an individual whose real history has been the subject of much speculation, made his appearance in England, in the reign of Henry VII., and assumed the character and title of Richard duke of York, the younger son of Edward IV., supposed to have been murdered in the Tower, together with his brother, by order of Richard III. Having been acknowledged by Margaret, duchess of Burgundy, as her nephew, he proceeded to claim the crown of England, and, landing in Cornwall, was joined by some thousands of insurgents. He laid siege to Exeter; but, on the approach of the royal army, he fled to Beaulieu Abbey, in Hampshire, which sanctuary he was induced to quit, under the promise of a pardon, and he was sent in custody to the Tower of London. He was there treated as an impostor, and eventually, in 1499, was hanged, drawn, and quartered. Henry VII. published an alleged confession of the captive, purporting that he was the son of one Warbeck, or Osbec, a converted Jew of Tournay; but many have asserted that he was an illegitimate son of Edward IV.

WARBURTON, ELIOT BARTHOLOMEW GEORGE, the distinguished author of 'The Crescent and the Cross,' whose promising career was cut short by the terrible calamity that befell the Amazon in 1852, was

the eldest son of George Warburton, Esq., of Aghrim, formerly Inspector General of Constabulary, and was born near Tullamore in Ireland, in 1810. His early education was conducted by a resident tutor. In 1827 he was placed under the care of the Rev. Mr. Rogers, at Wakefield, Yorkshire. He then matriculated at Queen's College, Cambridge, but soon after migrated to Trinity, where he attained a large amount of general information, and cultivated the refined and classic taste for which he was remarkable. After studying law for some time in London, under Mr. Proctor, the well-known Barry Cornwall, and others, and keeping terms at the Inner Temple, he was finally called to the Irish bar. But he soon found the profession distasteful, and abandoned it for the more congenial pursuits of social life: in which his peculiar charm of manner, his conversational powers, and his fund of humor fitted him to shine. Naturally of a delicate constitution, he often found it necessary to seek a milder climate in winter. In 1843 he made that journey to the East, which he afterwards described in the pages of 'The Crescent and the Cross;' a work which has been aptly characterised as remarkable for 'right-mindedness,' and whose popularity is attested by the number of editions (10) which it has already passed through. After his return from the East he entered largely into society in London and elsewhere, and there are few among the learned, the distinguished, and the great to whom he was not personally known. But he did not permit the enjoyments of society to supersede his other duties; and during the famine of 1846-7 he made large sacrifices both of his purse and time, for the relief of his suffering tenantry in Galway and Kildare. Besides contributing to periodical literature, he twice appeared as the editor of works by other authors; and he also published 'Memoirs of Prince Rupert and the Cavaliers,' 'Reginald Hastings,' and 'Darien, or the Merchant Prince.' This, his last work, has a strange and deep interest, as in it are described not only the lands he was about to visit in that which proved to be his final voyage, but also a catastrophe similar to that by which he was himself overtaken. On the 2d of January, 1852, he sailed for the West Indies in the Amazon Royal Mail steampacket, with the view of recruiting his health, and of accomplishing a long-cherished purpose of visiting the New World. But his wishes were not destined to be realized. Shortly after midnight on the morning of the 4th of January, the Amazon was destroyed by fire in the Bay of Biscay, and the last of the survivors on leaving the ship saw Eliot Warburton standing with the captain and two or three other officers on the poop of the wreck, calmly awaiting their fate. He left a widow and two children to bewail his untimely end.

WARBURTON, JOHN, a heraldist and antiquarian, author of 'Vallum Romanum,' 1682-1759.

WARBURTON, WM., D.D., a distinguished bishop of the English Church, was born at Newark in 1698. Having acquired the elements of education at the grammar school of his native town, he served an apprenticeship to an attorney, and after the close of his term, opened chambers as a legal practitioner. Tiring, however, of the law, he turned his views towards the church, and was admitted to deacon's orders in 1723. The legal studies of his early life exercised a powerful influence in moulding his habits of thought as well as his treatment of controversial subjects: and to the non-professional course of his preparation for the church, must be ascribed that dislike to the routine of the regular discipline, and

[Bishop Warburton.]

that pride he took in confounding the adherents to the beaten paths of theology, which formed one of the marked peculiarities in his character. Naturally of a strong, domineering temper, his arrogant dogmatism, united to great skill and power in wielding the weapons of dialectic controversy, led him into the propounding and supporting paradoxes, which, with all his great learning and acknowledged excellencies, rendered him an unsafe guide. By the force of his natural and acquired talents, however, he rose to distinction in the church. In 1726, he obtained the vicarage of Greasley, and three years after, the rectory of Brant Broughton. During his residence in this latter place, he prepared several works for the press; the principal of which are—Inquiry into the Causes of Prodiges and Miracles, a Treatise on the Legal Judicature of Chancery, and some Translations. These were soon followed by other productions of a higher character—the Alliance between Church and State, which was first published in 1738, and the first volume of the Divine Legation, which appeared towards the close of the same year. Although both of these works contributed to establish his fame as a divine, it was not to either of them directly, but to another production of his able pen that he was indebted for his elevation to episcopal dignity. This was his 'Vindication of Pope's Essay on Man,' which not only introduced him to an acquaintance with that poet, but procured him the friendship of Mr. Allen of Bath, through whose influence he gained the patronage of the crown. He was successively appointed chaplain to the king, prebend of Durham, dean of Bristol, and bishop of Gloucester, in 1759. In the conduct of the controversial wars it was his delight and pride to carry on, the temper of Warburton often presented a sad contrast to the meekness of the Christian character. But with all these palpable defects, he was a man of sincere and habitual piety—of a tender conscience—of great benevolence, and a reigning zeal, which has rarely been surpassed, for the propagation of Christianity, as the greatest blessing to the human race. His death took place in 1779. [R.J.]

WARD, ARTEMAS, the first major general in the American revolutionary army, was born in Massachusetts 1727. He commanded the right wing of the forces at Roxbury in the siege of Boston. Died 1800.

WARD, EDWARD, au. of 'The London Spy,' and of a poetic version of Don Quixote, 1667-1731.

WARD, BERNARD, an Irish economist, settled in Spain, and employed in the public service of that country, 1750.

WARD, JOHN, a learned writer, professor of rhetoric at Gresham college, was the son of a dissenting minister, and was born in London 1679. He began life as an assistant schoolmaster, and having made himself known as a classical scholar and antiquary, was chosen professor in 1720; died 1758. His principal works are 'Lives of the Gresham Professors,' and 'A System of Oratory.'

WARD, NATHANIEL, an English nonconformist divine, who settled in New England in 1634, where he became the minister of Agawam or Ipswich. In 1647 he returned to England, and published a work entitled, 'The Simple Cobbler of Agawam, in America,' a satire against monarchy and its supporters. He was also the author of a satirical work, called 'Mercurius Antimechanicus,' which severely satirized the London preachers. Died 1653.

WARD, ROBERT PLUMER, the well known author of 'Tremaine,' was born in London, 1765. His father was a Spanish merchant resident at Gibraltar, where his son Robert passed his early years. When about eight years of age he was sent to England. He received his education at Walthamstow, where he had the late Mr. Justice Park for a schoolfellow; thence he was transferred to Christchurch, Oxford; and, after a short period of continental travel, was called to the bar by the Hon. Society of the Inner Temple, in 1790. For some years he went the western circuit, spending his long vacations at the house of his elder and only surviving brother in the Isle of Wight; and here he wrote his 'Inquiry into the Foundation and History of the Law of Nations in Europe,' &c., which was published in 1795, and proved successful both as a work of literature, and as a professional speculation. He was now frequently employed in cases before the privy council; and the works relating to international and maritime law, which he produced from time to time, secured him the friendship of Lord Grenville, Sir W. Scott, and Lord Eldon, who offered him a judgeship in the admiralty court of Nova Scotia. This offer, however, he declined; and in 1802, through the influence of Pitt and Lord Mulgrave, to whom he was related by marriage, he was elected to parliament for Cocker-mouth, aided the premier both by his speeches and his pen, and had just been nominated to a Welsh judgeship, in 1805, when he relinquished it for the under-secretaryship of foreign affairs, Lord Mulgrave being his chief. On the death of Mr. Pitt, 1806, he retired into the country, and occupied himself in rural pursuits; but on the formation of the Portland ministry, in 1807, he was made one of the lords of the admiralty, exchanging this office in 1811 for the clerkship of the ordnance, which he held till 1823. He then retired from parliament and from public life. But now that his political life was over, and he found himself without any other occupation than the auditorship of the civil list—a sinecure appointment—he once more resumed the pen and wrote 'Tremaine,' which, though published anonymously, produced a great sensation in literary circles, and became exceedingly popular. This was followed, in 1827, by 'De Vere,' which was hardly less successful; and after some years spent in retirement and on the continent, he returned to his literary labors, and published successively his 'Illustrations of Human Life,' 'Pictures of the World,' 'Historical Essay on the Revolution of 1688,' and 'De Clifford,' a novel in 4 vols. Mr. Ward was thrice married. His second wife was Mrs. Plumer Lewis, of Gilston

Park, in Herts; and shortly after his marriage he assumed the name of Plumer before that of Ward. Died at Okeover Hall, Stafford, 1846, aged 81. His 'Memoirs and Literary Remains,' have been published by the Hon. E. Phipps.

WARD, SAMUEL, Margaret professor of divinity, known as a learned controversialist, died 1643.

WARD, SAMUEL, governor of Rhode Island in 1762, 1765, and 1766, died 1776. His brother, an American revolutionist, died 1797.

WARD, SETH, bishop of Salisbury, eminent as a mathematician and astronomer, 1617–1689.

WARD, T., a Roman Catholic divine, 1652–1708.

WARDLAW, HENRY, founder of the university of St. Andrews; became bishop of that see in 1404, and was chiefly remarkable for his zeal in behalf of the Roman Catholic Church. He was a man of high character in other respects, but unscrupulous in his treatment of those he regarded as heretics, many of whom he sent to the stake. Died 1440.

WARDLAW, DR. RALPH, was born in Dalkeith, 22d December, 1779, a few months after which his family removed to Glasgow. Though bred in the principles of the Secession Church, he resolved to join himself to the Congregational party, and was, in 1803, ordained by his friend Mr. Ewing to be pastor in a chapel in Albion Street; he afterwards removed to a larger place of worship in George Street. In 1811 he was associated with Mr. Ewing as one of the tutors in the Theological Academy. Dr. Wardlaw acquired a high reputation as a theologian, and his professional merits were acknowledged by an honorary degree of D.D. His principal works are 'Discourses on the Socinian Controversy,' 'Sermons,' 'Man's Responsibility for his Belief,' 'Lectures against Religious Establishments,' 'Lectures on the History of Joseph,' &c. He died 17th December, 1853, and his funeral was a public procession.

WARE, HENRY, a Unitarian divine of Massachusetts, professor in the divinity school of Harvard University, and writer on subjects connected with practical religion. Died 1843, aged 49.

WARE, JAMES, an eminent surgeon and oculist, was born, about 1756, at Portsmouth. After having been demonstrator of anatomy at Cambridge, he formed a partnership in the metropolis with Mr. Wathem, which continued till 1791; after which he practised on his own account, and attained a first-rate reputation. Among his works are, 'Observations on Ophthalmia,' 'Remarks on Fistula Lachrymalis,' and 'Chirurgical Observations.' Died 1815.

WARE, SIR JAMES, called 'the Camden of Ireland,' author of works on the history and antiquities of that country, 1594–1666.

WARE, WILLIAM, an American Unitarian divine, and miscellaneous writer, was born in Massachusetts, 1797. He was the minister of a church in the city of New York, from 1821 to 1836, and subsequently at Cambridge, Massachusetts, from 1843 to 1845, when he devoted himself exclusively to literary pursuits, and published his two best known productions 'Probus,' and 'Letters from Palmyra,' which prove him to have been a cultivated scholar, and a graceful writer. Died 1852.

WARGENTIN, P. W., a Swedish astronomer, secretary to the Academy of Sciences, 1717–1783.

WARHAM, WM., archbishop of Canterbury, and lord chancellor, was born at Okely, in Hampshire, 1460, and in 1475 admitted a fellow of New College, Oxford. His public life commenced in 1493, when Henry VII. sent him on an embassy to the Duke of Burgundy; he became keeper of the great seal in 1502, but resigned this office in 1515, in consequence

of the ascendancy of Wolsey, who succeeded him; died 1532.

WARING, EDWARD, professor of mathematics at Cambridge, author of an 'Essay on the Principles of Human Knowledge,' 'Properties of Algebraic Curves,' and other works, 1734-1798.

WARMHOLTZ, CHARLES GUSTAVUS, a Swedish bibliographer, 1710-1784.

WARNER, FERDINANDO, a doctor, and clergyman of the Church of England, author of a great number of works, theological, biographical, and historical, 1703-1768. JOHN, his son, a writer on Prosody, and translator of the history of 'Friar Gerund,' from the Spanish.

WARNER, JOHN, bishop of Rochester, distinguished for his learning and munificence, and as a royalist at the period of the rebellion, 1585-1666. Among his charitable works may be mentioned the foundation of Bromley College, for twenty widows of royal and orthodox clergymen, and four scholarships in Balliol College for young Scotchmen.

WARNER, J., an eminent surgeon, 1717-1801.

WARNER, RICHARD, a botanist, 1711-1775.

WARNER, SAMUEL ALFRED, commonly known as Captain Warner, a sailing master in the British navy, and inventor of the 'Long Range' which he made many unsuccessful efforts to have accepted by the British and other governments. Died 1853.

WARNER, SETH, an American revolutionary officer, was born in Connecticut, 1744. In 1713 he removed to Vermont, and in conjunction with Ethan Allen, was a leader of the people, in the controversy with New York, in consequence of which the latter colony passed an act of outlawry against him. He marched at the head of his Vermont troops to capture Ticonderoga, in 1775. Was with Montgomery in Canada, and subsequently marched to Quebec, and covered the retreat to Ticonderoga. In 1777, he participated in the victory of Bennington, and subsequently commanded under Gates. Died 1785.

WARNER, WILLIAM, an English scholar and poet, mentioned among the early writers to whom we owe the refinement of our language, 1558-1609.

WARNEY, C. E., a French officer and writer on tactics, in the Polish service, 1719-1786.

WARREN, CHARLES, an eminent engraver, was a native of London, and for many years held a distinguished rank in his profession. He was the first who effectually removed the difficulties of engraving on steel. Died 1823.

WARREN, JAMES, an American revolutionist, was born at Plymouth, Massachusetts, 1725. He was President of the Provincial Congress, a major general of the militia, and speaker of the House of Representatives. Died 1808. His wife, MERCY, was the author of a 'History of the Revolution,' a volume of poems, &c. Died 1814.

WARREN, JOHN, an American physician, first professor of anatomy in New England, was born at Roxbury, Massachusetts, 1763. Died 1815.

WARREN, JOSEPH, a revolutionary officer, was born in Roxbury, Massachusetts, 1741. He was educated as a physician, and arose to considerable eminence in his profession. He took an early interest in American politics, and became president of the Provincial Congress of Massachusetts. On the commencement of hostilities he was appointed major general of the forces of Massachusetts, and fought at Bunker Hill, where he fell in June 1775.

WARREN, SIR JOHN BORLASE, an English admiral, employed in the expedition to Quiberon, destined to assist the Vendéans, was born at the seat of his

family at Stapleford, in Nottinghamshire, 1754. After the Vendean expedition he joined the Brest fleet under Lord Bridport, and distinguished himself in 1798 by capturing the French squadron sent to invade Ireland. On the conclusion of peace he became a privy councillor, and was sent as ambassador to Russia; died 1822.

WARREN, SIR PETER, vice-admiral of the red, was born in Ireland 1703, and won his laurels by the capture of Louisbourg, and the total defeat of a French squadron sent to recover it, 1745-1747. In the autumn of the last-mentioned year his popularity occasioned his return to parliament as member for Westminster; died 1752.

WARRINGTON, LEWIS, an American Commodore, was born at Williamsburg, Virginia, in 1782. He entered the navy in 1800, and distinguished himself in the trouble with Tripoli and during the war with England in 1812. Died 1851.

WARSEWITZ, C. STANISLAUS, a Polish statesman, historian, and Jesuit: died 1605.

[Thomas Warton.]

WARTON, JOSEPH and THOMAS, were brothers, and very like each other in pursuits and mental character. They share with bishop Percy the honor of having given the first perceptible impulse to that revolution in literary taste, which dethroned Pope and the Didactic school of poetry, and led poets and critics to a renewed study both of nature and of Old English literature. The Wartons have a place, likewise, among our minor poets; but in this character even Thomas possesses but small merit. They were sons of a clergyman, who was professor of poetry at Oxford, and afterwards a vicar in Hampshire. Joseph was born in 1722, and lived till 1800. Thomas, born in 1728, died in 1790.—Dr. Joseph Warton was the more active and independent thinker of the two; and students of the principles of criticism have, since his time, estimated, more justly than did his contemporaries, the value of his 'Essay on the Genius and Writings of Pope.' It was published in separate parts, in 1756 (the same year with Percy's Reliques) and 1782. But Warton, a poor man during all the best period of his life, was diverted from systematic study and speculation by the toils of clerical duty, and afterwards by those of teaching. He taught for nearly forty years in Winchester School, of which for twenty-seven years he was head master.—Dr. Thomas Warton, being content to remain in the celibacy of Trinity College, Oxford, was able to devote himself without interruption to his favorite pursuits. He held the professorship of poetry for the usual ten years from 1757; and in 1785 he was appointed poet-laureate and Camden professor of

history. Besides writing a good deal of poetry, and several miscellanies and pieces of humor, he creditably edited Theocritus and one of the Greek Anthologies. But his really valuable efforts were made in the criticism of Early English Literature. His earliest performance of this sort was the 'Observations on the Faerie Queene of Spenser,' published in 1752, and much enlarged in 1762. His great work, 'The History of English Poetry,' appeared in three successive volumes, in 1774, 1778, and 1781. He lived to write only a small portion of a fourth volume; and the work closes abruptly near the beginning of Elizabeth's reign. It is ill-digested, desultory, and often very loose in reasoning: it contains many serious gaps, and very many positive errors, in detail. But even its mistakes and deficiencies are fewer than we might have expected from the first pioneer in so rugged a field; and the value of the book makes it well worth the trouble which has been expended on it, in corrections and additions, by its recent editors, Price and Taylor. Its antiquarian learning is very great; the poetical taste of the author is remarkably fine; and the flowing and animated eloquence, which breaks out whenever the occasion permits, makes many parts of it as interesting as any thing we have of the sort. [W.S.]

WARWICK, a famous baronial name in England; the principal of those who have borne it are—GUY OF BEAUCHAMP, commonly called Guy, earl of Warwick, a party to the league against Edward II., by which his favorite, Piers Gaveston, was beheaded, 1312. RICHARD, a favorite of Henry V., distinguished in the French wars, and regent in the time of his successor; died 1439. RICHARD NEVILLE, earl of Warwick, called the King Maker, slain at the battle of Barnet 1471. EDWARD, grandson of the latter, beheaded by Henry VII. 1499.

WARWICK, SIR PHILIP, secretary to Charles I., and member of the long parliament, author of a 'Discourse on Government,' and 'Memoirs of the King,' 1608–1682.

WARWICK, VIBRAND VON, a Dutch navigator, who prepared the commercial relations between Holland and the Chinese in 1606.

WASER, ANNA, a Swiss painter, 1679–1713.

WASER, GASPARD, a learned Swiss Orientalist and antiquarian, 1565–1625. His son, JOHN HENRY, a diplomatist, 1600–1669.

WASER, H., a Swiss minister and economist, author of 'Chronologie Diplomatique,' 1742–1780.

WASHINGTON, BUSHROD, a judge of the supreme court of the United States, was born in Virginia, 1759. He was the nephew of George Washington, and was left heir to his papers and library. He received the appointment to a seat upon the bench of the supreme court from President Adams in 1797. He took great interest in the organization of the American Colonization Society, and was appointed its first president. Died 1829. His nephew, AUGUSTINE WASHINGTON, came into possession of the Washington residence, of Mount Vernon, and died 1832. He was the author of 'Reports of the Court of Appeals, of Virginia.' Died 1835.

WASHINGTON, GEORGE, was born in Westmoreland in the state of Virginia, on the 22d of February, 1732. His father was affluent, but George received merely the ordinary education of the young American colonist of the day, which was always meagre, unless when the ambitious parents sent a son to the home country. He had, however, but scanty literary or artistic tastes, and studied only the accomplishments which aided his practical views. Though it has been questioned if he knew

[George Washington.]

any language but English, it is understood that he studied French after the responsibilities of command had fallen on him, for the purpose of holding communication with the auxiliaries sent from France to join the army of independence. On the other hand his practical acquirements were precociously developed. When but sixteen years old he was employed in surveying the vast wilderness assigned to his connection, Lord Fairfax, in the district of the Allegany mountains. He pursued the profession of a surveyor, which in a country full of estates, utterly unknown in character and extent to their owners, was a lucrative one; and he is said to have thus obtained an unconscious training for his subsequent warlike operations, by acquiring a minute acquaintance with some parts of the country, and a know-

[Mount Vernon.]

ledge of the general characteristics of the whole. Before he was twenty years old he received an important command, as adjutant-general in one of the military districts into which Virginia was divided to resist the Indians, and his genius entitled him to more important command in the American war with France in 1754. In a mission across the frontiers to ascertain the objects of the French, he discovered by his extraordinary sagacity the views of aggrandizement which led ultimately to the destruction of French power in America. He distinguished him-

[Washington's Head-quarters, at Valley Forge.]

self in the war which then broke out, and as all this occurred before he was twenty-three years old, his history decidedly supports the theory that the faculty of the military commander is generally developed early in life. It is believed, indeed, that many of the early calamities of that war might have been obviated if veteran British commanders had paid more respect to the sagacity of the young Virginian. In 1759 he married Mrs. Martha Custis, a widow. She brought considerable property to add to Washington's large estates, and for some years his hands were as full of business, in the management of private property and attendance on the provincial legislature, as they ever afterwards were when he was at the head of the Union. It was one of his peculiarities that he carried out small matters with the same articulate organization as large. He slurred over nothing, and his household books, of which fac-similes have been extensively circulated, would have stamped him as a pedantic trifler, had they not exemplified the same rigid adherence to system and accuracy of detail with which he subsequently organized the government of a great nation. He took an unnoticeable but active part in his own province, in the preparations for the assertion of independence. He was appointed one of the delegates from Virginia to the first general Congress in 1774, and had

[Washington's Head-quarters, at Tappan.]

the command of the independent companies of the state. Still, his position had never been brilliant or even conspicuous, and it is perhaps the most re-

markable instance of that common sense which characterized the revolution, that the supreme command of the army of independence should have fallen into his hands. He became commander-in-chief on 15th June, 1775. To give his history from that period until, after completing the task assigned to him, he resigned his command at the close of the year 1783, would be to give a history of the American war of independence. It may be only generally remarked of his career, that it was almost to the conclusion a struggle not only against the British force, but the turbulence and factiousness of those who were influential in the new states and their army. It cannot be said that the brilliancy of his achievements gave him his great influence, for he was often beaten, and it was by taking advantage of what his troops learned in hardships and defeats, that he was at last able to accomplish the sagacious and deeply planned movement by which Cornwallis was surprised and found it necessary to surrender. He was inaugurated as the first president of the United States, on the 30th of April, 1789. How he presided at the organization of a new empire, and

[Tomb of Washington.]

regulated the enthusiasts, or self-seekers, who struggled for their peculiar objects, is, like his military career, matter of history. On more than one occasion, if he could not with certainty have achieved life-long despotic power, he might have acquired the flattering title of king, but it was his great merit that he sought only as much power and greatness as enabled him to do his duty, and no more. He retired from public life in 1796, and died on the 14th of Dec., 1799, leaving a reputation without a stain.

WASHINGTON, WM., a relative of Geo. Washington, and one of his staff, and a revolutionary officer, died 1810.

WASMUTH, M., a Danish Orientalist, 1625-88.

WASSE, CORNELIA WOUTERS, Baroness Von, a female writer of Brussels, 1739-1802.

WASSE, JOSEPH, a native of Yorkshire, distinguished for his classical learning, 1672-1738.

WASSENAER, N. J., a Dutch physician and historian of Europe, died 1632.

WASSENBERG, EVERARD VON, a German historian of the reign of Uladislaus IV., born 1610.

WATELET, CLAUDE HENRY, a French painter and etcher, author of several critical works on art of considerable value, 1718-1786.

WATERHOUSE, BENJAMIN, an American physician, naturalist and writer, was born in Newport, L.

I., educated in London, Edinburgh and Leyden, became professor at Harvard, and subsequently at Brown University. He was the author of a work entitled the 'Botanist' and of another entitled 'Junius,' in which he advocated the claims of Lord Chatham to the authorship of the famous letters. Died 1846, aged 92.

WATERHOUSE, EDWARD, an English divine known as a heraldist and miscellaneous writer, 1619-1670.

WATERLAND, DANIEL, a learned divine, and dignitary of the Church of England, was born at Wasely or Walesly, in Lincolnshire, 1683, and died 1740. His principal works are of a controversial character, written against Jackson and Tindal: a complete edition was published in 11 volumes 8vo, 1823, by Van Mildert.

WATERLOO, ANTHONY, a Dutch landscape painter and etcher; born about 1618, died 1662.

WATERLOO, G. B., a Latin poet, 1572-1597.

WATRELOS, LAMBERT, a priest of Flanders, author of a Chronicle of Cambray, 1110-1172.

WATS, GILBERT, an English scholar, died 1657.

WATSON, DAVID, a learned Scotchman, best known for his version of Horace, 1710-1756.

WATSON, HENRY, a gallant East Indian officer and engineer, born at Holbeach about 1737. He distinguished himself at the siege of Belle Isle in 1761, and at the capture of Havannah 1762, but in a still more memorable manner by the works of Fort William; died 1786.

WATSON, JAMES, a Scotch printer, author of a History of the Art in Scotland, died 1722.

WATSON, JOHN, a minister of the Church of England, known as an antiquarian, and historical and miscellaneous writer, 1724-1783.

WATSON, RICHARD, bishop of Llandaff, author of several learned works, was born at Heversham, near Kendal, in 1737. He first distinguished himself as a natural philosopher, and in 1764 succeeded Dr. Hadley as professor of chemistry at Cambridge; in 1771 he became professor of divinity. The theological works of Bishop Watson are, 'An Apology for Christianity, in a series of Letters addressed to Edward Gibbon, Esq.,' 'An Apology for the Bible,' in answer to Paine's Age of Reason, and many miscellaneous Tracts and Sermons. His philosophical works are chiefly on Chemistry. Died 1816.

WATSON, ROBERT, a Scottish historian and professor of the *Belles Lettres*, author of a 'History of Philip II.' born at St. Andrews about 1730, died 1780. Mr. Watson began a History of Philip III., which was completed by Dr. Thompson.

WATSON, T., a nonconformist divine, died 1690.

WATSON, T., a catholic prelate, died 1582.

WATSON, T., a song-writer, d. 1591 or 1592.

WATSON, SIR WILLIAM, a physician of London, eminent as a botanist and natural philosopher, especially for his skill in electricity; born in Clerkenwell 1715, died 1787.

WATT, JAMES, the author of improvements in the application of steam as a motive power which have identified his name with the steam engine. Directing the force of an original genius, early exercised in philosophical research, to the improvement of the steam engine, he enlarged the resources of his country, increased the power of man, and rose to an eminent place among the illustrious followers of science and the real benefactors of the world. Watt was born at Greenock, 19th January, 1736, the son of James Watt, twenty years town councillor, treasurer, and bailie of Greenock. Being even in infancy, says M. Arago, of a delicate constitu-

[James Watt.]

tion, the early education of James Watt was in a great measure of a domestic character. His ill health seems to have led him to the cultivation of his intellect with unusual assiduity. It is said that when only six years of age, he was discovered drawing geometrical figures on the hearth with chalk, and other anecdotes related of him justify the remark which was elicited by a friend on the above occasion that he was 'a by ord'nar' wean.' When about fourteen years of age he made an electrical machine, and there is a curious anecdote related by M. Arago, to the effect that his aunt, Mrs. Muirhead, who did not entertain the same opinion as his father of the powers of the boy, upbraided him one evening at the tea table for what seemed to her to be listless idleness;—taking off the lid of the kettle and putting it on again; holding sometimes a cup and sometimes a silver spoon over the steam; watching the exit of the steam from the spout, and counting the drops of water into which it became condensed. With the increased light imparted by a knowledge of his subsequent career, the boy pondering before the tea kettle, will, as observed by his French enthusiastic biographer, be viewed as the great engineer preluding to the discoveries that were to immortalize him. In 1755, Watt went to London, and placed himself under Mr. John Morgan, mathematical and nautical instrument maker, in Finch Lane, whose business it would appear lay chiefly in making and repairing the instruments made use of in the experiments in mechanics and natural philosophy. Shortly after his return from London, about 1757, when Watt had scarcely attained his twenty-first year, he endeavored to establish himself in business in Glasgow, but owing to his not being a burgess he met with opposition from the corporation of arts and trades, who refused to allow him to set up even the humblest workshop. To the great renown of the authorities of the university, which is not under city jurisdiction, Watt was offered an asylum within the precincts of the college, where he established a shop, and he was honored with the title of mathematical instrument maker to the university. The great men of the day—Adam Smith, Dr. Black, Dr. Dick, Professor Anderson, kindly befriended young Watt, and the more intelligent students were his intimate companions. The revival of commercial and manufacturing enterprise in Britain had about this time directed attention to steam as a motive power. As early as 1761 or 1762, Watt made some experiments on the force of steam. But the event to which his invaluable dis-

coveries may be most distinctly assigned took place in the session of 1763–64, when Professor Anderson sent him a model of Newcomen's steam engine to repair. He soon repaired the model, which exists to this day in the museum of the natural philosophy class. While working at these repairs, he was led to detect the imperfections of the machine itself, and to investigate those properties of steam upon which its action depends. About this time he left the college and took up his abode in the town previous to his marriage with his cousin, Miss Miller, the daughter of a 'freeman,' in the summer of 1764. It is not possible to enter here on the nature of Watt's improvements in the steam engine, or to estimate their economical advantages; we must refer to treatises on the steam engine for information on these points. Suffice it here to say, that Watt's invention of a separate condenser, and the necessary modifications of the arrangements of the mechanism of the engine, were in their main features completed as early as 1765. In 1768, the first patent was applied for, and obtained 5th January, 1769. Dr. John Roebuck, the founder of Carron Iron Works, who had aided Watt in preparing his third working model, was a sharer in this patent. Roebuck's affairs got embarrassed in the summer of 1769, and Watt was for the time deprived of the means of prosecuting his inventions. He dedicated himself, however, with great credit to general engineering and surveying during the interval which elapsed before the opportunity presented itself of his finally devoting himself to the carrying out of his improvements in the steam engine. It was while engaged in the greatest engineering work undertaken by him, the surveying and estimating a line of canal between Fort William and Inverness, since executed by Telford on a larger scale than was then proposed, that Watt, in 1773, having been bereaved of his wife, determined to accept an invitation from Matthew Boulton, the founder of Soho, to settle in England. Watt's connection with Boulton commenced early in the year 1774, and they remained in partnership till 1800, when Watt retired from business, but their friendship continued undiminished until Boulton's death. Of the spirited manner in which Boulton conducted the mercantile department of the establishment, some idea may be formed from the fact, that upwards of £47,000 was spent before the patentees began to receive any returns; but at length their remuneration began to pour in, and in no scanty stream. In Cornwall and other mining districts, especially where coal was not abundant, the new engines speedily replaced the old; but down to 1794 the introduction of the steam engine into the other mining districts had been comparatively slow, and it has been stated, that at the expiration of the patent the aggregate power of the engines employed in London was not more than 650 nominal horse power; in Manchester about 450 horse power, and in Leeds about 300 horse power. As above alluded to, a volume would not suffice to exhaust Watt's professional biography, and we must leave our readers to inquire into this elsewhere. Of the private character of the great engineer a most pleasing account is given by Lord Jeffrey, who observes: 'Perhaps no individual in this age possessed so much and so varied exact information, had read so much, and remembered what he had read so accurately and well. He had infinite quickness of apprehension, a prodigious memory, and a certain rectifying and methodizing power of understanding, which extracted something precious out of all that was presented to it.' In social conversation he allowed his

mind, like a great cyclopædia, to be opened up or whatever subject might best suit the taste of his associates; and he made every thing so plain, clear, and intelligible, that, it is remarked, scarcely any one could be conscious of any deficiency in their own capacity in his presence.—Of a generous and affectionate disposition, he was considerate of the feelings of all around him, and gave the most liberal assistance and encouragement to all young persons who showed indications of talent, or who applied to him for patronage and advice. As his death approached, he was perfectly conscious of his situation, and calm in the contemplation of it, expressing his thankfulness for the length of days with which he had been blessed. He died at Heathfield, near Soho, Birmingham, on the 25th of August, 1819. He was fellow of the Royal Societies of London and Edinburgh; correspondent of the French Institute, and an LL.D. of Glasgow university. By public subscription a monument was erected to him in 1824 in Westminster Abbey, one of the best of Chantrey's works. The countenance of this statue has been characterized as the 'personification of abstract thought.' Other statues by Chantrey adorn George's Square, Glasgow, the University Museum, and the chapel at Handsworth, erected by Watt's only son, who survived him, and who is since dead.

[Statue of Watt.]

WATT, ROBERT, a Scotch physician, author of professional works, and of the well-known index of British and foreign literature, entitled 'Bibliotheca Britannica,' 1774–1819.

WATTEAU, ANTOINE, an eminent French painter, was born in 1684, at Valenciennes. He commenced as a scene painter at Paris, but his admirable genius soon raised him above that humble occupation; and having produced a picture which gained the prize at the academy, his ardor for the art increased, and he speedily rose to fame. Died 1721.

WATTS, ISAAC, D.D., was a native of Southampton, where he was born on 17th July, 1674. His father was a dissenter, and living at a time when nonconformity was a crime, he several times suffered heavy penalties, both by fine and imprisonment. Isaac early displayed a remarkable precocity; and his greatest delight while a mere child, consisted in reading simple story books. At the age of four he began to learn Latin, and at seven, had attracted no small attention by his talent for versifying. His proficiency in classical studies was so much above the average scholarship of school boys, that some

[Abney Park, the residence of Isaac Watts.]

wealthy individuals, desirous of encouraging so gifted a youth, offered to bear the expenses of his education at one of the universities, if his father would have consented to his entering the established church. Prevented by conscientious scruples from accepting this generous offer, the father placed Isaac at a dissenting academy, under the care of the reverend Mr. Rowe, an independent clergyman, eminent both for his piety and learning. At the age of twenty, his academic course was finished, but instead of commencing an active course of preaching, he resolved, with a rare exercise of humility, and distrust of his fitness for the pulpit, to return to his father's house, with a view of acquiring, during a season of religious retirement, those higher qualifications for the duties of the ministry, which no course of academic instruction, however extensive or varied, can supply. It was during this period that he first tried his poetic talents in the composition of sacred poetry; and so much were these sacred songs admired, that on their being collected and published in a little volume, they were unanimously adopted as the hymn-book of the independent chapel where his father worshipped. After a retirement of two years under the paternal roof, he accepted an invitation from Sir John Hartopp, Bart, of Stoke-Newington, to undertake the office of tutor to his son. In this situation, he enjoyed ample opportunities for self-improvement; and while he was most conscientious in attending to the interests of his youthful charge, he pursued his own studies at the same time, with indefatigable industry; increasing his familiarity with the Hebrew and Greek Scriptures,—perusing the works of the most eminent biblical writers and divines,—forming abridgments of many, and endeavoring to digest his acquired knowledge by the methods he afterwards described in his 'Improvement of the Mind.' In 1698, Watts entered upon the duties of the ministry, as assistant to Dr. Chauncey, pastor of the independent church, Mark Lane, London; and on the death of that clergyman, was chosen to succeed him on 8th March, 1702. Under the auspices of this eloquent and fervid young preacher, the congregation rapidly increased, and continued for several years in the most flourishing condition, when an alarming illness, brought on by his vehement style of oratory, threatened to put a premature period to his life and usefulness. By due care and attention he recovered; but his physical energies were so much impaired, that he was obliged, first, to employ an assistant, to relieve him of some part of his ministerial duties; and then afterwards, on the recurrence of a violent

fever, which gave a severe shock to his enfeebled constitution, he had, at his own desire, Mr. Price associated with him as colleague in the pastoral charge of his congregation. Compelled soon after to resign his public office, he went on a visit to the house of his friend, Sir Thomas Abney, knight and alderman, of Abney Park, Stoke-Newington; and that visit, though designed at first to be for a few days, was prolonged to a residence of more than thirty years. In this hospitable mansion he received all the tender and assiduous attention which his infirmities required; and which were sweetened by the pleasures of cultivated society and Christian friendship. In 1728, the universities of Edinburgh and Aberdeen simultaneously conferred on him the honorary degree of Doctor in Divinity. Seldom has such a title been bestowed on one so worthy to receive it. Dr. Watts' range of knowledge was almost unbounded, and although theology was of course the chief subject of his study, he had mastered the whole circle of the sciences. Dr. Watts holds a respectable rank in the list of British poets. His poetry is chiefly of a devotional cast, and in regard to his hymns, Dr. Johnson has pronounced this high eulogium: 'That for children he condescended to lay aside the scholar, the philosopher, and the wit to write little poems, systems of instruction adapted to their wants and capacities.' Dr. Watts died on 25th November, 1748, in the seventy-fifth year of his age.

[R.J.]

WAYNE, ANTHONY, an American revolutionary major-general, was born in Pennsylvania, 1745. Fought at Ticonderoga in 1775, and at Brandywine, Jamestown, and Monmouth. In 1779, he gallantly mastered the fortress of Stony Point, and otherwise distinguished himself during the war. In 1787 he

[Residence of Gen. Wayne.]

was a member of the Pennsylvania Convention which ratified the federal constitution. He was also victor of the battle of the Miamis in 1794, having succeeded St. Clair in the command of the western army in 1792. Died 1796.

WAYNFLETE, WILLIAM OF, so called from his birth-place, in Lincolnshire, was the eldest son of Richard Patten or Barbour. Commencing his distinguished career as head master of Winchester school about 1429, he became provost of Eton, then in course of foundation by Henry VI., 1442, bishop of Winchester 1447, and lord high chancellor 1456. He founded Magdalen College, Oxford, and, though a true Lancastrian, was highly honored by Edward IV.; died 1486.

WEAVER. See WEEVER.

WEBB, F., an English writer, 1735-1815.

WEBB, P. C., an antiquarian, 1700-1770.

WEBB, PETEB BARKER, an English naturalist, especially devoted to the science of botany. Died 1854, aged 62.

WEBBE, GEORGE, a native of Wiltshire, who became bishop of Limerick, and died in the castle of that town, where the rebels had imprisoned him, in 1641. He is the author of several religious works, the principal of which is entitled 'Practice of Quietness, directing a Christian to Live Quietly in this Troublesome World.'

WEBBE, SAMUEL, a great English musician and composer, was born in 1740. In his boyhood he was indentured to a cabinet-maker, but after the termination of his apprenticeship he devoted himself entirely to the study of music. At twenty-six years old he gained a gold prize medal for the best canon from the Catch Club, and from the years 1765 to 1792 he had no fewer than twenty-seven medals awarded to him from the same club for glees, canons, odes, and catches. It was for this club that Webbe composed the famous glee 'Glorious Apollo.' His compositions of the class mentioned amount to one hundred and seven. He composed, besides masses (he was a Roman Catholic), anthems, songs, &c., many of which are still sung. He died in 1817. [J.M.]

WEBBER, JOHN, an ingenious artist, who was appointed draughtsman in the last expedition of Captain Cook; born in London, 1751, died 1793.

WEBBER, SAMUEL, an American mathematician, and president of Harvard College from 1806 to his death in 1810, was born in Massachusetts. He was the author of a collegiate text book on mathematics.

WEBBER, Z., a Dutch theologian, died 1697.

WEBER, ANANIAS, a German theologian, preacher, and controversial writer, 1596-1765.

WEBER, CARL MARIA VON, one of the greatest of German musicians, was born at Eutin in Holstein, in December, 1786. In 1797 he was taken to Salzburg and placed under the tuition of Michael Haydn (brother of the illustrious composer), and here he published his first works. Soon after this he went to Munich, where he received lessons in singing from Valesi, and in composition from M. Kalcher, under whose supervision he wrote music for an opera 'The Power of Love and Wine.' In 1800 his opera the 'Wood Maiden,' was brought out, in 1801 'Peter Schlemihl,' and soon after 'Rubezahl,' which afterwards appeared as the composition of Rhode. In 1802 he set out on a professional tour through Germany, and in 1806 he went by invitation to Carlsruhe, where he produced several symphonies and concertos. At Darmstadt he composed his 'Abou Hassan,' and from 1813 to 1816 he was director of the opera at Prague. In 1822 he brought out at Berlin his greatest work, 'Der Freischutz,' which produced an immense sensation in the north of Germany, and wherever it was performed. It was put on the stage in London on the 23d of July, 1824. In November, 1823, Weber produced at Vienna his opera of 'Euryanthe,' and in 1825 he accepted from Mr. Charles Kemble the offer of £500 to compose an opera for the English stage. This opera was 'Oberon,' which was brought out at Covent Garden theatre, conducted by Weber himself, on the 12th of April, 1826. Soon after unmistakable symptoms of pulmonary disease presented themselves, and the health of the great composer sank rapidly, and his illustrious career closed on the 5th of June, 1826 when he was found lifeless in his bed.

He was buried in the Roman Catholic chapel, Moorfields, permission to inter him in St. Paul's cathedral having been refused on account of his religion. [J.M.]

WEBER, EMMANUEL, a German historian, poet, and juriconsult, died 1726.

WEBER, G., a German *savant*, 1632-1698.

WEBER, HENRY WILLIAM, a miscellaneous writer and archæologist, was born at St. Petersburg of German parents in 1783, and having been educated at Edinburgh and Jena for the medical profession, finally settled in Scotland as an author. His principal works are—'Metrical Romances of the Thirteenth, Fourteenth, and Fifteenth Centuries,' 'Explication of Northern Antiquities,' 'The Battle of Flodden Field,' and an edition of 'Beaumont and Fletcher.' Died 1818.

[Birth-place of Daniel Webster.]

WEBSTER, DANIEL, a distinguished American statesman, born in the town of Salisbury, State of New Hampshire, January 18th, 1782, died at Marshfield, State of Massachusetts, October 24th, 1852, in the 71st year of his age. He was the second son of Col. Ebenezer Webster, an officer of the American army during the war of the Revolution. At the close of the war, the father of Mr. Webster retired to private life, and with the assistance of his sons cultivated a small farm; his limited means prevented him from giving to them any other education than could be obtained at an inferior public school. The marked degree of intelligence manifested by the younger, induced such exertions to be made as enabled him to prepare himself for a collegiate course. In 1797, at the age of fifteen, he entered Dartmouth College, and devoted himself with ardor to a general course of study, exhibiting remarkable faculties of mind. Upon graduating in 1801, he assumed the charge of an academy for a year, and then commenced the study of law in his native village. After acquiring a knowledge of the first principles of the profession, he went to the city of Boston, and completed his studies in the office of Mr. Christopher Gore. Upon being admitted to the bar, he returned to the country, and commenced the practice of his profession in the vicinity of his early home. It was not long before he felt the necessity of a wider sphere of action, he therefore removed to Portsmouth, the largest town of New Hampshire, where he was obliged to compete with men of reputation and long standing in the profession. He soon occupied a prominent position, and a large and increasing practice testified to his ability and success.

Having in early life taken a decided position with regard to prominent political questions, he became about this time conspicuous in supporting the principles which he believed most conducive to the welfare of the country. In 1812 he was nominated and elected to a seat in the National Congress, where he displayed remarkable powers both as a debater and an orator. In 1817, having retired for a time to private life, he removed to the city of Boston, and resumed the practice of his profession, to which he gave his uninterrupted attention for a period of several years. In 1822 he was elected to a seat in Congress from the city of Boston, and from that position was chosen a senator of the United States, from the State of Massachusetts. From that period until his death, Mr. Webster was seldom out of public life, having been twice called to the head of the Department of State. Among the gifted statesmen to whose wise counsels the United States is indebted for its political status and respectability, no name appears more prominent than that of Daniel Webster. To an acute observation he added the weight of studied argument, and increased the natural activity of his mind by laborious industry. His writings, orations, and published speeches, bear the impress of a comprehensive intellect, and an exalted patriotism.

[Tomb of Daniel Webster.]

WEBSTER, JOHN, an Engl. dramatist, 17th c.

WEBSTER, NOAH, the famous American lexicographer, was born in 1758, at West Hartford, and was descended from one of the earliest English settlers in that colony. Having studied for the law he was called to the bar in 1781, and devoted the whole remainder of his life to literary and professional avocations. Besides his 'Dictionary of the English Language,' a work of amazing industry and research, he wrote 'Sketches of American Policy,' 'The Grammatical Institute,' and other works. He also conducted one of the daily papers of New York. Died 1843.

WEBSTER, THOMAS, a native of the Orkneys, known as professor of geology in the London University, and a writer on that science, 1773-1844. His 'Encyclopædia of Domestic Economy' may be considered the result of his acquaintance with Count Rumford, in whose researches he participated.

WEBSTER, WILLIAM, an English divine, editor of the Life of General Monk, &c., 1689-1758.

WECKERLIN, G. R., a German poet and political negotiator, 1584-1651.

WECKERLIN, G. L., a publicist and miscellaneous writer of Wirtemberg, 1739-1792.

WEDDERBURN. See ROSSLYN.

WEDDLE, THOMAS, an English mathematician, died 1853 aged 36.

WEDEL, C. H., a Prussian general, 1712-1782.

WEDEL, GORGE WOLFGANG, a German physician and writer of many learned works, 1645-1721. His son, STEPHEN HENRY, a physician, 1671-1709. J. ADOLPHUS, brother of the latter, same profession, 1675-1748. JOHN WOLFGANG, of the same family, a learned botanist, 1708-1757.

WEDGWOOD, JOSIAH, famous for his improvement of the English pottery manufacture, was born at Newcastle-under-Lyne, where his father was engaged in that branch of business, in 1730. He was well versed in natural philosophy, and produced his valuable results after numerous experiments upon the various kinds of clay and coloring substances, joined to a taste for art. He was the benefactor of his country in many other important matters, more especially in the promotion of the grand trunk canal, engineered by Brindley, and of a road through the potteries. Died 1795.

WEENINX, or WENIX, J. B., a Dutch painter, remarkable for the versatility of his powers, 1621-1660. His brother, JOHN, who excelled in hunting pieces and still life, 1644-1719.

WEERDT, ADRIAN DE, a Flemish landscape painter, flourished at Brussels, 16th century.

WEERDT, CEBALD DE, a Dutch navigator, who was killed at the isle of Ceylon 1603.

WEEVER, or WEVER, JOHN, an industrious antiquarian, supposed to have been born in Lincolnshire in 1576, died 1632. His work is the well-known 'Funeral Monuments of Great Britain,' originally published in 1631.

WEGELIN, JAMES, a native of St. Gall, author of a 'Universal History,' and of a 'Memoir on the Philosophy of History,' 1721-1793.

WEICHMANN, C. F., a German writer, author of 'The Unedited Poetical Productions of the Most Celebrated Writers of Lower Saxony,' died 1769.

WEIDLER, J. F., a Germ. astron., 1691-1755.

WEIGEL, CHRISTIAN EHRENFRIED, a German physician, distinguished as a botanist, last century.

WEIGEL, ERHARD, an eminent German astronomer and mathematician, 1625-1699.

WEIGEL, V., a German theologian, 1533-1588.

WEILLER, G., a German philosopher, d. 1826.

WEIMAR, ANNE AMELIA, duchess of, daughter of the duke of Brunswick, distinguished by her patronage of literature, died 1807.

WEINBRENNER, FREDERIC, an eminent German architect, born at Carlsruhe, in 1766. After studying in Italy, and travelling over the Continent for the purpose of examining works of art, he returned to his native country, and founded an institution for the study of painting, modelling, poetry, the fine arts, and archæology: and from this school issued many distinguished artists. He erected several splendid edifices at Carlsruhe, Leipsic, and other places, and wrote treatises on different branches of science. Died 1826.

WEINREICH, V., a German *savant*, 1552-1622.

WEISE, C., a German writer, 1642-1708.

WEISHAUP, ADAM, a famous name in the history of secret societies, was a professor of canon law in the university of Ingoldstadt. He was born in 1748, and educated among the Jesuits, quarrelling with whom caused him to propose a counter association of the good and enlightened of all nations. The society organized in pursuance of this design, began working in 1776, and was finally known as the Society of *Illuminati*. In its foundation, an endeavor was made to combine all the working advantages and most striking symbols of Freemasonry and Jesuitism; from the latter, its statutes of impli-

cit obedience, and its espionage were derived; from the former its order and ritual, but modified by the revolutionary ends which its leaders really proposed. This society was suppressed by the elector of Bavaria in 1783, and Weishaupt, quitting Ingolstadt, went to Gotha, where he was honored with the dignity of Aulic counsellor. He died in 1822, and left several works illustrating the history of the Illuminati, and his views concerning the progress of society and 'Moral Perfectibility.' The Abbé Barriel and Professor Robison wrote exaggerated reports of this and the many similar movements of the period. See further in the article SAINT MARTIN.

[E. R.]

WEISS, F. R., a Swiss statesman, 1751-1802.

WEISSE, CHRISTIAN FELIX, a miscellaneous German writer and dramatic poet, author of several successful plays, and of songs and odes which are highly spoken of by the German critics. Weisse likewise acquired great popularity as a writer of works for youth, 1726-1804.

WEITZ, J., a Prussian philologist, 1576-1642.

WELCHMAN, EDWARD, a dignitary of the church, author of an 'Illustration of the Thirty-Nine Articles,' and a 'Defence of the Church of England,' 1665-1739.

WELD, THOMAS, an English cardinal, was born in 1773, at Lulworth Castle, Dorsetshire, and was the eldest son of Thomas Weld, Esq., founder of the Roman Catholic College at Stonyhurst, in Lancashire. He succeeded to his ancestral estates in 1810; but, on the death of his wife, in 1815, he took orders, and was some years afterwards consecrated coadjutor bishop of Canada. Being in Italy with his daughter, Lady de Clifford, in 1829, pope Pius VIII. elevated him to the dignity of a cardinal. For many years previous he had devoted the whole of his time, and a great part of his fortune, to pious and charitable purposes: and he now relinquished his estates to his brother, Joseph Weld, Esq., who, in 1830, received Charles X. of France and his family, as guests at Lulworth Castle, previous to their removal to Holyrood House. He died, April 10, 1837.

WELDON, JOHN, an organist and distinguished composer of cathedral music, died 1736.

WELLER DE MOLSDORF, JEROME, a German theologian, distinguished for his piety and his connection with Luther, 1499-1572. JAMES, of the same family, an Orientalist and theologian, author of a Greek Grammar, 1602-1664.

WELLESLEY, RICHARD COLLEY WELLESLEY, marquis of, was born at Dublin on 20th June, 1760. He became in youth a very accomplished scholar, and gave in early life greater promise of distinction than his renowned brother the duke of Wellington. He was an active member of the Irish House of Lords until the union, and at the same time had a seat in the English Commons. He was brought first into notice by his views on the regency question, which pleased George III. He received a British peerage as Baron Mornington, and the Irish title of marquis of Wellesley. It was in the year 1797 that the career in which he was destined to shine, was opened to him by his appointment as governor-general of India. It seemed at first no favorable prognostic of his career, that just after the calamities which had occurred from intrusting a royal duke with the command for which he was unfit, and while a repetition of the same mistake was producing its fruits under the brother of the prime minister, Wellesley, passing over veteran officers who had performed great achievements, should intrust high command to his young brother, Arthur. Whether

fortuitous or wisely calculated, the result was fortunate for the British rule in India at a very critical time. The government of Wellesley and his brother's victories form the second great epoch after the operations of Clive and Hastings in the acquisition of the British Indian empire. Though he desired to return earlier, he was prevailed on to remain governor-general until the year 1803. He held several offices after his return, and was from 1821 to 1828 governor-general of Ireland. He died on 20th December, 1842.

[J.H.B.]

WELLESLEY, Marchioness of, the eldest daughter of Richard Caton, Esq., of Maryland, and granddaughter of Charles Carroll. Her first husband was Robert Paterson, an American merchant, her second marquis of Wellesley, died 1853

[Wellington.]

WELLINGTON, ARTHUR WELLESLEY, afterwards duke of Wellington, was born at Dangan Castle in Ireland, on May 1, 1769.—Marshal Ney, Goethe, and several of the greatest men of the age were born in the same year. His father was Lord Mornington, an Irish nobleman, but he was of Norman blood, being lineally descended from the standard-bearer to Henry II. in his conquest of Ireland in the year 1100. His elder brother, who succeeded to the family honors, was a man of great genius and capacity, who afterwards became governor-general of India, and was created Marquis Wellesley. Thus the same family had the extraordinary fortune of giving birth to the statesman whose counsel and rule preserved and extended the British empire in the Eastern, and the hero whose invincible arm saved his country and conquered Napoleon in the Western world. Young Arthur Wellesley, after having received the elements of education at Eton, was sent to the military school of Angers in France to be instructed in the art of war, for which he already evinced a strong predilection. He received his first commission in the army in the 33d regiment, which to this day is distinguished by the honor then conferred upon it. The first occasion on which he was called into active service was in 1793, when his regiment was ordered abroad, and formed part of the British contingent, which marched across from Ostend under Lord Moira, to join the allied army in Flanders. He bore an active part in the campaign which followed, and distinguished himself so much in several actions with the enemy, that though only a captain in rank, he came at length to execute the duties of major, and did good service in several well-fought affairs of the rear guard in which he bore a part. Though the issue of the campaign was unfortunate, and it ter-

minated in the disastrous retreat through Holland in 1794, yet it was of essential service in training Wellesley to the duties to which he was hereafter to be called, for it was with an army at one time mustering 90,000 combatants that he had served; and his first initiation into the duties of his profession was with the great bodies which he was afterwards destined to command, and his first insight into war was on a great scale, to which his own achievements were one day destined to form so bright a contrast. After the return of the troops from Holland, the 33d regiment was not again called into active service till 1799, when it was sent out to India, to reinforce the troops there on the eve of the important war, in which Lord Wellesley, his elder brother, who was now governor-general, was engaged with the forces of Tippoo Saib. Young Wellesley went with them, and on his way out his library consisted of two books, which he studied incessantly; the Bible, and Caesar's Commentaries. On landing, his regiment, of which he had now become lieutenant-colonel, was so conspicuous for its admirable discipline, and the perfection to which the commissariat and all the arrangements connected with it had been brought, that it was specially noticed by General Harris, the commander-in-chief. Previous to the assault of Seringapatam, Tippoo Saib's capital, Wellesley was intrusted with the command of a nocturnal

[Dangan Castle, the birth-place of Wellington.]

attack on an outwork, which proved unsuccessful, from the troops missing their way in the dark, and getting into a deep water-course which proved to be impassable. General Baird, however, the second in command, gave him next day an opportunity of renewing the attack, which he did with entire success. His regiment was not engaged in the assault which followed on May 4, when the town was taken; notwithstanding which, he was next day appointed governor of it, a promotion obviously done to gratify the governor-general, and deservedly felt as an undeserved slight by the gallant hero who had conducted and headed the assault. Whatever opinion may be formed on the merits of this appointment, one thing is perfectly clear, that Col. Wellesley immediately gave decisive proof of his entire adequacy to the discharge of the important duties to which he was called. Seringapatam was soon put in a respectable position of defence, the disorders consequent on the storm arrested, and the administration of the new dominions acquired for the Company put on the best footing. Ere long he was called to more active duties. Doondiah Waugh, a noted freebooter, having collected 5,000 horse, the wreck of Tippoo's forces, had renewed the war in the upper provinces, and was levying contributions in all quarters from the inhabitants. Col. Wellesley, upon this, put

himself at the head of 1,400 horse, partly European and partly native, with which he pursued the Mysore chief. After undergoing incredible fatigues, he at length succeeded in coming up with him and bringing him to battle. The result was soon settled, Doondiah was defeated and slain, and the first intelligence his partisans received of his death, was by seeing his dead body brought back lashed to a galloper gun. On this occasion Col. Wellesley charged the Mysore horse in person at the head of the British dragoons. This brilliant achievement was the prelude only to still more important achievements. War having broken out in 1803 between the East India Company and the Mahrattas, General Wellesley, to which rank he had now been promoted, received the command of one of the armies destined to operate against them. After having stormed the strong fortress of Achmednaghur, which lay on the road, he came up with the Mahratta force, 30,000 strong, posted at the village of ASSAYE. Wellesley's forces, at the moment, did not exceed 4,500 men, of whom only 1,700 were European; and the half of his army, under Col. Stevenson, was at a distance, advancing by a different road, separated from his own by a ridge of intervening hills. But justly deeming the boldest course in such critical circumstances the most prudent, he took the resolution of instantly attacking the enemy with the small body of men under his immediate command. The result showed the wisdom as well as heroism of the determination. After a desperate struggle, in which he himself charged a Mahratta battery at the head of the 74th regiment, the vast army of the enemy, which comprised 18,000 splendid horse, was totally defeated, all their guns, 97 in number, taken, and their army entirely dispersed. It need hardly be said that this great victory had a material effect in breaking the power of the Mahrattas, and compelling them to conclude a most glorious peace, which closed Marquis Wellesley's administration. General Wellesley was made a Knight of the Bath for this victory, and he returned to England Sir Arthur Wellesley. His next employment was at the expedition under Lord Cathcart to Copenhagen, in 1807, on which occasion he commanded a division of the army. He was not engaged in the siege, but commanded a corps, which was detached against a body of Danes, 12,000 strong, who had collected, in the rear of the British force, in the island of Zealand. They were dispersed without much difficulty by a body of 7,000 men under Sir Arthur Wellesley. After the fall of Copenhagen he returned to England, and was nominated soon after to the command, in the first instance, of an expeditionary force of 10,000 men, which was fitted out at Cork, to co-operate with the Portuguese in rescuing their country from the tyrannic grasp of the French emperor. It was intimated to him, however, that Sir Harry Burrard and Sir Hew Dalrymple would, as soon as they arrived, supersede him in the command; and his friends urged him not to accept a subordinate command after having commanded great armies in the East. But Sir Arthur replied in a noble spirit: — 'I have, as we say in India, eaten of the king's salt; and I will serve his majesty in whatever situation he may be pleased to place me, be it supreme or inferior.' The expedition set sail in June, 1808, and landed on the coast of Portugal, when they were soon assailed by General Junot, who had marched out of Lisbon, with 19,000 men, to drive him into the sea. The British force consisted of 16,000, and, as this was the first time the troops of the rival nations had met in the peninsula, great

interest was attached to the conflict. The French were defeated after a sharp action; and Sir Arthur had made preparations to follow up his victory by marching the same evening to Torres Vedras, where he would be between Junot and Lisbon, and would either drive him to a disastrous retreat or force him to surrender. But at this critical moment, when the order had just been despatched for this decisive movement, Sir H. Burrard arrived, and took the command.—He belonged to the old school, with whom it was deemed enough to fight one battle in one day, and he gave orders to halt. Junot, in consequence, hastened back to Torres Vedras, without losing an hour, and regained the capital. Sir H. Dalrymple soon afterwards arrived, and concluded the famous convention of Cintra, by which the French evacuated the whole of Portugal. That convention excited unbounded indignation in England at the time; but Sir A. Wellesley justly supported it, for, when the opportunity of cutting off Junot from Lisbon had been lost, it was the best thing that could be done. Next year, still more operations were undertaken. Sir Arthur, who had now been appointed to the sole command of the army in Portugal, landed at Lisbon on April 4, and by his presence restored the confidence which had been much weakened by the disastrous issue of Sir John Moore's campaign in the close of the preceding year. His first operation was to move against Marshal Soult, who had advanced to Oporto, with 20,000 men, and taken that city. By a bold movement he effected the passage of the Tagus, under the very guns of the enemy, and drove the French to so rapid a retreat, that he partook of the dinner which had been prepared for Marshal Soult! The French general, by abandoning all his guns and baggage, effected his retreat into Galicia, but not without sustaining losses as great as Sir John Moore had done in the preceding year. He next turned towards Spain, and having effected a junction with the Spanish general, Cuesta, in Estramadura, their united forces, 60,000 strong, but of whom only 20,000 were English and Portuguese, advanced towards Madrid. They were met at Talavera by King Joseph at the head of 45,000 of the best French troops in Spain. A desperate action of two days duration ensued, which fell almost entirely on the English and Portuguese, as the Spaniards, who were 38,000 in number, fled at the first shot. The French were in the end defeated with the loss of 8,000 men and 17 guns; but the fruits of victory were in a great measure lost to the English by the arrival of Marshals Soult, Ney, and Mortier, with the whole forces in the provinces of Galicia, Leon, and Asturias in their rear, which forced them to retreat to the Portuguese frontier. But one lasting good effect resulted from this movement, that these provinces were liberated from the enemy, who never after regained their footing in them. The year 1810 witnessed the invasion of Portugal by a huge French army, 80,000 strong, under Marshal Massena, which, after capturing the fortresses of Ciudad Rodrigo, and Almeida, penetrated into the very heart of that country. Sir Arthur, who had now been created Viscount WELLINGTON, had only 35,000 men under his command, with which, it was impossible to prevent the fall of those fortresses. But he took so strong a position on the ridge of Busaco that he repulsed, with great slaughter, an attack upon it by two corps of the French army, and when at length obliged to retire, from his flank being turned after the battle was over, he did so to the position of *Torres Vedras*, thirty miles in front of Lisbon, which,

by the advantages of nature and the resources of art had been rendered impregnable. Six hundred guns were mounted on the redoubts, which were defended by 60,000 armed men. After wasting five months in front of this formidable barrier, the French general was forced to retreat, which he did closely followed by Wellington to the Spanish frontier. There Massena turned on his pursuer, and he re-entered Spain with a view to bring away the garrison of Almeida, which was now invested; but he was met and defeated at Fuentes d'Onore by Wellington, and forced to retire without effecting his object to Ciudad Rodrigo. The remainder of the year 1810 and the whole of 1811 passed over without any very important events, although a desperate battle took place in the latter year at Albuera, where Marshal Soult was defeated with the loss of 7,000 men by Marshal Beresford, in an attempt to raise the siege of Badajoz, which Wellington was besieging. He was compelled to desist from that enterprise after he had made great progress in the siege, by a general concentration of the whole French forces in the centre and south of Spain, who advanced against him to the number of 60,000 men. But, though Wellington withdrew into Portugal on this occasion, it was only soon to return into Spain. In the depth of winter he secretly prepared a battering train, which he directed against Ciudad Rodrigo, when Marmont's army, charged with its defence, was dispersed in winter quarters, and after a siege of six days, took it by storm in January, 1812. No sooner was this done than he directed his forces against Badajoz, which he also carried by storm, after a dreadful assault, which cost the victors 4,000 men. Directing then his footsteps to the north, he defeated Marmont, with the loss of 20,000 men in killed, wounded, and prisoners, near Salamanca; and advancing to Madrid, he entered that capital in triumph, and compelled the evacuation of the whole of the south of Spain by the French troops. He then turned again to the north, and advanced to Burgos, the castle of which he attempted to carry, but in vain. He was obliged again to retire, by a general concentration of the whole French troops in Spain, 100,000 strong, against him, and regained the Portuguese frontier, after having sustained very heavy losses during his retreat. The next campaign, that of 1813, was a continual triumph. Early in May, Wellington, whose army had now been raised to 70,000 men, of whom 40,000 were native English, moved forward, and driving every thing before him, came up with the French army of equal strength, which was concentrated from all parts of Spain in the Plain of Vitoria. The battle which ensued was decisive of the fate of the peninsula. The French, who were under King Joseph in person, were totally defeated with the loss of 156 pieces of cannon, 415 tumbrils, their whole baggage, and an amount of spoil never before won in modern times by an army. The accumulated plunder of five years in Spain was wrenched from them at one fell swoop. For several miles the soldiers literally marched on dollars and Napoleons which strewed the ground. The French regained their frontier with only one gun, and in the deepest dejection. St. Sebastian was immediately besieged, and taken, after two bloody assaults, Pampeluna blockaded, and a gallant army, 35,000 strong, which Soult had collected in the south of France to raise the blockade, defeated with the loss of 12,000 men. Wellington next defeated an attempt of the French again to penetrate into France at St. Marcial, and following up his successes, crossed the Bidassoa, stormed the lines

they had constructed on the mountains, which were deemed impregnable, and after repeated actions, which were most obstinately contested through the winter, drove them entirely from the neighborhood of Bayonne, and completed the investment of that fortress, while Soult retired with 40,000 men towards Toulouse. Thither he was followed next spring by Wellington, who again defeated him at Orthes in a pitched battle, after which he detached his left wing, under Lord Dalhousie, which occupied Bourdeaux. The main army, under Wellington in person, followed Soult and brought him to action, in a fortified position of immense strength, on the heights of Toulouse. The battle took place four days after peace

[Apsley House, London, the residence of Wellington.]

had been signed, but when it was unknown to the allies; it graced the close of Wellington's peninsular career by a glorious victory. Honors and emoluments of all kinds were now showered upon the English general. He received a field-marshal's baton from George IV. in return for Marshal Jourdan's taken on the memorable field of Vittoria; he was made a duke at the conclusion of the peace; received the thanks of both Houses of Parliament, and grants at different times to the amount of £500,000 to purchase an estate and build a palace. He was chiefly at Paris during the year 1814, conducting the negotiations for peace; but on the return of Napoleon from Elba in March, 1815, he was appointed to the command of the united army of British, Hanoverians, and Belgians, 70,000 strong, formed in the Netherlands, to resist the anticipated attack of the French emperor. The French emperor was not long in making the anticipated irruption; on the 15th June, 1815, he crossed the frontier, and drove in the Prussian outposts, with 130,000 men. Next day he attacked the Prussians, under Blücher, with 80,000; and despatched Ney with 30,000 against Wellington's army, which was only beginning to be concentrated. A desperate action ensued at Quatre Bras, in which the French were at length repulsed with the loss of 5,000 men; and, on the 18th, Wellington having collected all his forces at the post of Waterloo, gave battle to Napoleon in person, who was at the head of 80,000 men. His force was only 67,000, with 156 guns—whereas, the French had 250; and of these troops only 43,000 were English, and Hanoverians, and Brunswickers, who could be relied on, the remainder being Belgians, who ran away the moment the action was seriously engaged. Notwithstanding this great inequality, the British army maintained its ground with invincible firmness till seven o'clock, when the arrival

of 50,000 Prussians, under Blücher, on Napoleon's flank, enabled Wellington to take the offensive. The result was the total defeat of the French army, with the loss of 40,000 men and 156 guns. Napoleon fled to Paris, which he soon after left, and surrendered to the English, and Louis XVIII. having returned to his capital, his dynasty, and with it peace, was restored. The allies having determined to occupy the frontier fortresses, with an army of 150,000 men during five years, the command of the whole was bestowed on the duke of Wellington; thus affording the clearest proof that his was the master mind which had come to direct the European alliance. This high and important situation he held for the next three years, during the whole of which time he discharged its arduous duties with the most consummate wisdom, justice, and discretion. Not only did he retain the entire confidence of the allied sovereigns and respect of their soldiers under his command, but he interposed in so efficacious a manner to lighten the enormous burdens laid by the treaty of Paris on France, as to earn the gratitude and receive the thanks of all well-informed persons in that country. Mainly owing to his powerful intercession the period of occupation of the fortresses was shortened from five to three years, and the amount of contributions paid for its support of course proportionally lessened. Wellington resigned his command, and with it his magnificent appointments in October, 1818, and returned to England, to the retirement of a comparatively private station, terminating thus a career of unbroken military glory by the yet purer lustre arising from relieving the difficulties and assuaging the sufferings of his vanquished enemies. In 1819 he was appointed commander-in-chief of the army, which situation he held during the whole anxious years which followed, and by his able and far-seeing arrangements, contributed in an essential manner to bring the nation without effusion of blood through the long years of distress which followed. In November, 1827, he was, upon the dissolution of Lord Goderich's administration, appointed prime minister, which situation he held till displaced by a hostile vote of the House of Commons, on November 30, 1830, when the nation was convulsed by the passion for reform. This terminated his life as a political leader: but he was again appointed commander-in-chief some years afterwards, which situation he held till his death. The vigor of his intellect and sagacity of his counsels appeared in the uniform success which, during that period, attended the military operations in every part of the globe. He suppressed the Canadian revolt in 1837; faced, undismayed, the Affghanistan disaster in 1841; arrayed the forces which again led the English standard in triumph to Cabul in 1842; brought the Chinese war to a successful issue; subdued the Sikhs and tribes of Scindia, and rooted out of their almost impregnable fastnesses the formidable Caffres of South Africa. During all this period his counsels, whether at the head of or out of the cabinet, were uniformly directed to one object, the preservation of European peace, which, mainly owing to his exertions, was preserved unbroken, save by domestic tumult, for forty years after his crowning victory at Waterloo. And thus the most successful military commander which Europe has produced, put the key-stone to the arch of his fame, by directing his whole energies, after a brief period of energetic warfare, to the preservation of the blessing and cultivation of the virtues of peace. His long and honored life, after having been prolonged beyond the usual period of human existence,

at length drew to a close. He had, some years before his death, alarming symptoms in his head; so often the consequence of long-continued intellectual effort; but by strict abstemiousness and perfect regularity of life, he succeeded in subduing the dangerous symptoms, and he was enabled to continue and discharge his duties regularly at the Horse Guards till the time of his death, which took place on September 18, 1852, at the advanced age of eighty-three years. He was honored with a public funeral, and buried in St. Paul's, in the most magnificent manner, beside Nelson. The queen and all the noblest in the land were there; a million of persons witnessed the procession, which went from the Horse Guards, by Apsley House, Piccadilly, and the Strand, to St. Paul's, and not a head was covered, and few eyes dry, when the procession appeared in the streets. Wellington was only once married. He left two sons, the eldest of whom succeeded to his titles and estates, the fruits of his transcendent

[Statue of the Duke of Wellington.]

abilities and great patriotic services. The leading feature of his intellect was wisdom and sagacity; of his moral character, a conscientious discharge of duty. In genius he was inferior to many, in foresight and just discrimination, to none. He was not gifted with the power of oratory, and had considerable difficulty in expressing his opinions; but such was the solidity of his judgment and the strength of his understanding, that what he said never failed to command attention, and, for the last twenty-five years of his life, he exercised an undisputed ascendancy in the House of Lords. In private life he was simplicity itself; his habits were regular, his life abstemious; he was punctual in keeping appointments, and assiduous in the discharge of every duty. Without any habits of ostentation he could, on fitting occasions, exhibit a splendor becoming his rank; and his simple habits enabled him to bestow innumerable sums on deserving objects, and relieve the distresses of great numbers of his brethren in arms. Without asserting that he was free from all the failings common to the children of Adam, it may safely be affirmed that, as he was the greatest general recorded in British, and one of the greatest in European story, so he was one of the most immaculate characters which has adorned the annals of his country. [A.A.]

WELLS, CHARLES WILLIAM, born of Scotch parents, at Charleston, in South Carolina, and settled as a physician in London, author of several physiological works, and of an Essay on Dew, the theory of which is now admitted, 1753-1817.

WELLS, E., a learned divine, 1664-1727.

WELSCH, C. J., a German philologist, 1624-78.

WELSER. See VELSER.

WELSTED, LEONARD, one of the heroes of Pope's Dunciad, known as a poet and miscellaneous writer, born in Northamptonshire 1689, died 1747.

WELLWOOD, SIR HENRY MONCREIFF, bart., D. D., an eminent Scotch divine, was born at Blackford, near Stirling, in 1750. He was inducted at St. Cuthbert's, Edinburgh, in 1775, and took an active part in the government of the Scottish church, of which he was an able and zealous pastor. Died 1827.

WELLWOOD, THOMAS, a Scottish physician, author of 'Memoirs of English Affairs from 1588 to the Revolution,' 1652-1716.

WEMYS, JAMES ERSKINE, a British Admiral, distinguished himself at Genoa. Died 1854.

WENCESLAUS, the name of several dukes and kings of Bohemia:—WENCESLAUS I., duke, 907-936. WENCESLAUS II., succeeded his uncle, Conrad, 1191, and was driven from the throne three months afterwards by Przemislus, died in prison 1194. WENCESLAUS III., as duke, or the *first* as king, son of Przemislus Ottocar I., was born 1205, and associated in the government with his father in 1228. He began to reign alone in 1230, died 1253. WENCESLAUS IV. or II., succeeded to the throne of Bohemia 1283, elected king of Poland in opposition to Uladislus IV. 1300, and king of Hungary 1301. He ceded the latter dignity to his son, and died 1305. WENCESLAUS V. or III., son of the preceding, became king of Hungary when twelve years of age, 1301, and ceded that country to Otho IV., when his father's death called him to the government of Bohemia in 1305; assassinated 1306. WENCESLAUS VI. or IV., king of Bohemia and emperor of Germany, was the son of the emperor Charles IV., and was born 1359. He succeeded to his father in 1378, but his cruelties and debaucheries desolated the kingdom and led, in 1394, to his deposition. This time he succeeded in re-establishing his authority, but in 1400 he was solemnly deprived of the title of emperor, and remained king of Bohemia only, till his death in 1419. It was towards the close of his reign that the wars of John Huss and Zisca broke out.

WENCESLAUS, duke of Saxony, succeeded his brother, Rodolph II., 1370, killed 1388.

WENDELIN, GODFREY, a German astronomer, geometrician, and Latin poet, 1580-1660.

WENGIERSKI, ANDREW, the most celebrated of four brothers, rendered famous by their zeal for the spread of Socinianism in Poland, 1600-1649.

WENTWORTH. See STRAFFORD.

WENTWORTH, BENNING, for 20 years governor of New Hampshire, having been inducted in 1741. Bennington in Vermont took its name from him. Died 1770.

WENTZEL, J. C., a Ger. musician, 1659-1723.

WENZEL, C. F., a German chemist, 1740-93.

WEPFER, J. J., a German anatomist, 1620-95.

WEPPE, J. A., a Ger. dramatist, 1742-1810.

WERDMULLER, JOHN RODOLPH, a Swiss landscape and flower painter, 1639-1668.

WERDUM, ULRICH VAN, a Dutch statesman and historical writer, died 1681.

WEREMBERT, a monk of St. Gall, distinguished as a Latin poet and musician, died 884.

WERENFELL, S., a German divine, 1651–1740.

WERF. See VANDERWERF.

WERKMEISTER, ANDREW, a German composer and writer on music, 1645–1706.

WERNER, ABRAHAM GOTTLIEB, a distinguished mineralogist and geologist, was born at Wehlau in Upper Lusatia, in 1750. He died in 1817. His father was connected with an iron foundry, and the young Werner, having minerals given to him as playthings, became familiar with their names from his earliest childhood. He was educated in the school of mines at Freyberg in Saxony, and eventually became professor of mineralogy and inspector of the mineralogical cabinet there. He has conferred great benefit on the science of mineralogy by introducing a precise, methodical language, well adapted for the description of minerals, and has rendered much the same service to it as Linnæus did by his Terminology to botany. As a geologist, he is the father of the Neptunian theory, and however liable he is to the charge of very grave errors, he has done vast good to the science by his causing it to be studied more systematically than it ever had been before. Few naturalists who have written as little as Werner, have enjoyed a higher reputation. As a mineralogist, the late Dr. Murray of Edinburgh used to prefer him to Haüy. As a geologist, Professor Jameson ranks him as one of the first that has ever appeared. His reputation appears to us of the present day much exaggerated. He lectured with great zeal, assiduity, and success; and though he has left few works behind him, he had the pleasure of seeing a host of ardent pupils rising around him, who by their writings and labors have extended his fame and spread a knowledge of the principles he taught throughout all Europe. A mineral has been named in honor of him, Wernerite. [W.B.]

WERNER, J., a Swiss painter, 1637–1710.

WERNER, PAUL DE, a celebrated Prussian general, born in 1707. He displayed great bravery at the head of his troops at the battles of Prague, Kollin, Breslau, &c., and in 1759, he drove General de Ville out of Silesia, and raised the siege of Colberg. He was afterwards taken prisoner by the Russians, and the most advantageous offers were made him by the czar Peter III. to induce him to enter into his service, but he rejected them, and, returning to Prussia, was again successfully employed in his country's service; and died in 1785.

WERNER, ZACHARIAS, the son of a professor in Königsberg, was born there in 1768. The ill-regulated life of this eccentric man of genius falls into two stages, surprisingly unlike each other. In the first, extending from his twenty-fifth year to his forty-third, he was, in alternate fits, a man of business, a dramatic poet, and a profligate: he obtained, and threw up, official appointments under the Prussian government: he married three times, and was three times divorced. In 1811 he became a Roman Catholic, received priest's orders, preached with great applause at Vienna during the congress of 1814, and, in spite of extravagant oddities, was a popular orator in the pulpit till his death in 1823.—His Dramas have gloomy impressiveness, both of imagination and passion, which (for some of us at least) it is difficult to resist; but they are full of coarse and hideous exaggerations, and of an ambitious mysticism with which he invests alike religion and history, human conduct and his hobby of freemasonry. In his works, indeed, as in the tenor of his life, there is much that can hardly be reconciled with the supposition of sanity. The most popular and least obscure of his works is his harrowing domestic tragedy, 'The

Twenty-fourth of February.' In others he celebrates Attila, Luther, the Destruction of the Templars, and the Conversion of Pomerania by the Teutonic Knights. [W.S.]

WERNHER, JOHN BALTHASER, Baron Von, a German juriconsult and publicist, died 1742. His nephew, M. GODFREY, a jurist, 1716–1794.

WERNICKE, C., a German poet, died 1720.

WERNSDORFF, GOTTLÖB, and his son of the same name, distinguished as philologists, the former 1668–1729, the latter 1710–1774.

WERNSDORFF, E. F., a second son of the preceding, a learned historian of Syria, 1718–1782.

WESLEY, JOHN, great grandfather of the methodist leader, was a clergyman of the Church of England, in the reign of Charles II. He received his education at New Inn, Oxford, and having distinguished himself by his piety, as well as his learning—especially his attainments in Oriental literature—he secured the favor and patronage of Dr. Owen, the vice-chancellor of the university. Having taken orders, he obtained the living of Blanford, in Dorsetshire, and was ejected for non-conformity. Continuing still to preach, he suffered imprisonment four successive times. His spirits being broken by the hardships and persecution to which he was subjected, he died at the early age of thirty-four, at the village of Preston; and such was the spirit of the times, that the authorities would not allow his body to be buried in the church of Preston. John Wesley married a niece of Thomas Fuller, the church historian.

WESLEY, SAMUEL, father of the celebrated clergyman of that name, was a minister of the Church of England, who held the livings of Epworth and Wroote, in Lincolnshire, in 1700. He was a devoted and very pious as well as learned man. The country town over which he was appointed, was noted for profligacy and vice; and the zeal with which he performed his sacred duties was so offensive to many of the wicked inhabitants, that they long meditated some plan of revenge. At length they set fire to the rectory. It was with the greatest difficulty the family were rescued, and the first act of the pious father on finding his children assembled in safety on the green before the blazing edifice, was to kneel down in the midst of the crowd, and give thanks to God for the deliverance. Mr. Wesley had some strong peculiarities of opinion; amongst which we may mention as the chief, that he was a most zealous advocate of the revolution. His wife was a violent partisan of the Stuart family: and this opposition of sentiment produced so much domestic discord, that Mr. Wesley left his family and parish for some years, till the reign of Anne brought about a reconciliation. On the accession of the Hanoverian family, the dissensions broke out afresh in the Epworth rectory, as Mrs. Welsey refused to acknowledge their right to the throne. And then there occurred an incident which produced an extraordinary sensation throughout the country in 1746, under the name of the Epworth ghost. It consisted of some strangely mysterious noises that were made when the family were at prayers, and especially when they came to the supplications for King George and the prince. It is now generally believed to have been a Jacobite trick, which the servants or neighbors resorted to, in order to frighten old Wesley from his political allegiance. Mr. Wesley was the author of several works both in prose and poetry. The principal of these were, a 'Life of Christ' in verse, 'The Histories of the Old and New Testaments' in verse, 'Elegies on Queen Mary and Archbishop Tillotson,' and 'Dissertations on the Book of Job.' He died April, 1734. [R.J.]

WESLEY, SAMUEL, son of the former, was born at Epworth, 1692. Although he was four years old before he could speak, he displayed great quickness and aptitude for learning,—distinguishing himself to a very uncommon degree by his classical attainments, first at Westminster, and afterwards at Christ Church, Oxford. From Christ Church he returned to Westminster, in the capacity of usher; and there took orders under the patronage of Bishop Atterbury. Having strongly imbibed his mother's political opinions, he assailed the administration of Sir Robert Walpole, with satirical abuse; and rendered himself so obnoxious to the ministry, that when the office of under-master became vacant, and he was proposed as in all respects well qualified to fill it, the appointment was refused. Finding promotion at Westminster hopeless, he accepted the mastership of Tiverton school. Samuel was a religious man, but of sound and sober judgment. He disapproved of much both in the sentiments and conduct of his brothers, and for many years they never met. He died in 1739, in firm and unalterable communion with the Church of England. [R.J.]

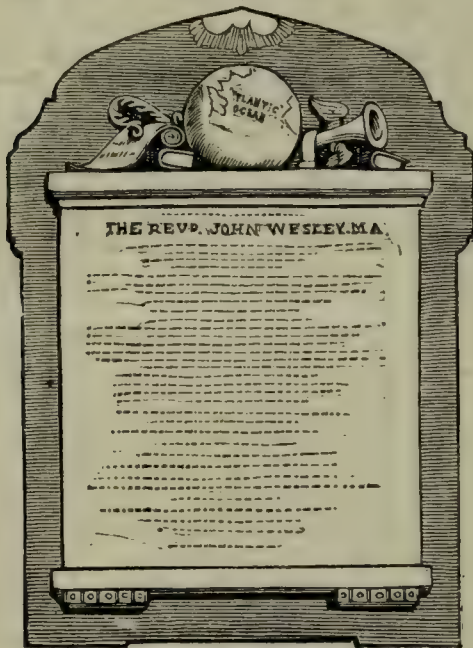

[Rev. John Wesley.]

WESLEY, JOHN, the great founder of the Arminian branch of methodists, was born at Epworth, Lincolnshire, on the 17th June, 1703. His father, the rector of that place, was a man whose great piety and zealous administration of discipline excited against him the hostile feelings of his parishioners. Their malignity drove them to the wicked purpose of setting fire to the rectory at midnight, and little Johnny Wesley, then a very young boy, was literally plucked as a brand from the burning. The domestic education he received was strictly of a religious character, and under the instructive influence of his mother especially, his heart was early imbued not only with the knowledge, but the fear of the Lord. Having received the elements of classical education at Charter House school, he was entered at the age of seventeen a student of Christ's Church, Oxford. While at that seat of learning, he became member of a private society consisting of a few young men of congenial piety, whose number amounted to fifteen, and who attracted great notice by the austerity of their manners and the fervor of their piety. Their meetings for social prayer and religious converse were held in Wesley's chambers—they formed the purpose of partaking of the communion together once, as well as fasting twice a-week. From these objects of personal improvement, they ere long directed their views towards the religious enlightenment of the poor; and for that purpose they divided the town into districts, each of the members charging himself

with the voluntary duty of paying domiciliary visits and maintaining a religious superintendence of the sick and destitute inhabitants. The novelty of such proceedings exposed the young students to much satirical abuse, but they persevered through good report and bad report, while the ardor they displayed in the prosecution of their studies, together with the honors that most of them gained, disarmed the college authorities of all grounds to complain that they were spending their time in pursuits not strictly academic. On Wesley's completion of his university studies, steps were in the course of being taken by his friends to procure his appointment to be assistant and successor to his aged father in the parish of Epworth. But for conscientious reasons, he declined the offer, and determined to remain at Oxford to diffuse his religious principles amongst the students. In 1735, being in London for the settlement of some family matters, he received from the trustees of the new colony at Georgia an invitation to go out to that settlement as missionary. Having consulted their mother, who advised their acceptance of the offer, John and Charles Wesley embarked for the Georgian settlement on 14th October, 1735. Several of their Oxford associates accompanied them as laborers in the missionary field, and in consequence, being too numerous for that place, Charles with one friend repaired to Frederica, while John settled at Savannah. There he soon gathered a large congregation, which continued to flourish for some years, till his vigorous and precipitate measures of discipline raised such a storm of indignation amongst the people, that he was forced to resign. Returning to England, he settled in London, where he became acquainted with the famous Peter Böhler, to whom Wesley himself ascribes the honor of being the agent in his conversion to vital Christianity. The date of this marked change in his religious character and views he fixes on 24th May, 1738. Whitefield having about this time returned to England, Wesley joined his standard, and both commenced an active career of field-preaching at Bristol, where also the first methodist chapel was erected, in 1739. Wesley afterwards returned to London, where he performed regular public worship in a large building in Moorfields, and that place, from its having been originally a foundry, was afterwards well known as the Foundry Church. Wesley's connection with Whitefield was broken by the irreconcilable difference of their views on fundamental articles of faith, he espousing Arminianism, while Whitefield was steadfast in his adherence to the Calvinistic system. The rupture between these two great leaders gave a shock to methodism, the effects of which remain to this day. But Wesley was as undaunted as he was indefatigable. He perambulated the country, forming new congregations in many parts; and being now untrammelled by the fetters of old or traditional usage, he employed the services of lay preachers. The leading features of the ecclesiastical system he labored to establish may be thus briefly described. The preachers were to itinerate, to depend on the gratuitous hospitality of friends to the cause, instead of being provided for by a fixed stipend—congregations were to be divided into classes—a vigilant inspection established over the morals of all—weekly meetings were to be held at which the members of any class might have an opportunity of expressing their wants or describing their religious state and feelings. He and his preachers, at the commencement of their itinerant labors, were exposed to maltreatment in a variety of ways, but they bore all annoyances, whether in the form of bodily injury or obloquy, with such fortitude and

patience as ere long disarmed the violence of their opponents. Wesley was a man of eminent piety and devoted zeal, and yet in his character several blemishes appeared, the principal of which were ambition and vanity. He married late in life, and from the violence and caprice of the lady's temper, he seems to have made a wrong choice; for it proved an unhappy union. Wesley while preaching at Lambeth caught cold, which threw him into a fever, and his weakened constitution being unable to resist its ravages, he fell a victim to this malady on the 2d of March, 1791, in the eighty-eighth year of his age, and sixty-fifth of his ministry. [R.J.]

[Monument to John Wesley.]

WESLEY, CHARLES, third son of Samuel, and brother of John Wesley, was born at Epworth, April, 1708. While at Westminster school, an Irish gentleman of great fortune, of the name of Charles Wesley, though unknown to the family, wrote, proposing to make him his heir; and accordingly, for several years the expenses of his education were borne by his unseen namesake. In course of time, a gentleman, supposed to be this Irish patron, waited upon Charles, and urged the youth to accompany him, and take up his residence in Ireland. The family having left the young man to act according to his own discretion, Charles intimated his resolution to remain in England; in consequence of which, the inheritance destined for him was given to another who, taking the name of Wesley, or Wellesley, was the first earl of Mornington, and grandfather of the duke of Wellington. 'Had Charles made a different choice,' says Southey, 'there might have been no methodists,—the British empire in India might still have been menaced from Seringapatam, and the undisputed tyrant of Europe might have continued to insult and endanger our shores.' Charles went with his brother John to Oxford, took an active part in the meetings of their religious association at that university, and accompanied him on the missionary expedition to the Georgian settlement. At Savannah, however, the brothers took different courses. Charles parted with his brother there, and in company with Ingham, one of his Oxford comrades, repaired to Frederica. The rigid discipline, however, he established at that settlement, disgusted the people; and although he labored incessantly for their spiritual welfare, yet having pursued measures

to which the people could only have been gradually reconciled, especially concerning the observance of Sabbath, and the rule of admission into communion with the church, he was at length obliged to leave. Charles returned to England, and having become acquainted with Peter Boehler, the Moravian, an entire change was produced in his religious views and feelings. He dated his *conversion* on 24th May, 1738: and that has ever been considered a remarkable day in the history of methodism. Having established himself in London, he preached for a while to large congregations in Blackheath; but disorders and confusion occurred there as formerly at Georgia, and Charles now commenced a course of itinerant preaching. While itinerating in Yorkshire, he was taken up, on suspicion of being a Jacobite, but having satisfactorily proved that he had merely used some scriptural expressions in a spiritual sense, without the remotest reference to the Pretender, he was acquitted. But this accusation tended to increase the obloquy under which the methodist leaders lay; and on several occasions, Charles and his friends were exposed to great trouble and danger. The history and public labors of Charles Wesley have been anticipated in the previous notice of his brother John. He married in the forty-first year of his age, Miss Sarah Guynne; and after this event, he gradually discontinued his itinerating, to perform the duties, and enjoy the comforts of domestic life. Latterly, his opinions differed considerably from those of his brother, especially regarding the evil tendency of the band-meetings, and other parts of the methodist discipline. Charles had a warm, poetical fancy, and wrote some beautiful hymns. He died in 1788. [R.J.]

WESSEL, JOHN, in Latin *Wesselus*, professor of philosophy and theology at Cologne, celebrated as an adversary of the Realists, and the forerunner of Luther, born at Groningen 1419, died 1498.

WESSELEY, HARTWIG, a Jew of Copenhagen, famous for his Hebrew poetry, moral treatises, and commentaries on the Bible, 1723–1805.

WESSELING, PETER, a distinguished German scholar and philologist, 1692–1764.

[Benjamin West.]

WEST, BENJAMIN, P.R.A., was born at Springfield in Pennsylvania, October 10, 1738. He commenced his career as a portrait painter at Philadelphia, he then removed to New York, and in 1760 visited Italy, where he remained about three years. In 1763 he visited England, and was induced to remain in that country, through the many valuable connections which he had formed there. West was

introduced to George III. by Dr. Drummond, the archbishop of York, and he was almost engrossed by the king from the year 1767 until 1802, when he lost the patronage of the court through the illness of the king. He then commenced his series of great religious pictures, to which he now chiefly owes his reputation. Of his earlier works, the 'Death of General Wolfe' is the most celebrated; in this picture he introduced the sensible innovation of dressing men in their own clothes; painters had previously, as a rule, very absurdly used the Roman

[Birth-place of Benjamin West.]

costume on all historic occasions, a costume not a whit less foolish than dressing the Greeks and Romans in the costume of modern times; the latter absurdity may indeed, at least, rest on the plea of ignorance of the real costume. To account for such a fact at present, as that Sir Joshua Reynolds should have endeavored to persuade West to dress Wolfe in the uniform of a Roman general of 2000 years back, defies reason. West deserves the profoundest gratitude of posterity, if it be just to identify such a revolution from the absurd to the rational with his individual efforts. He succeeded Reynolds as president of the Royal Academy in 1792; he died March 11, 1820, in his eighty-second year, and was buried in St. Paul's.—(Galt, *Life and Studies of Benjamin West*. London, 1820.) [R.N.W.]

WEST, CHARLES AUGUSTUS, a British army officer, distinguished at the siege of Copenhagen, and in the peninsular campaign. Died 1854.

WEST, GILBERT, a nephew of Lord Cobham, distinguished as a poet and miscellaneous writer, was born in 1706, and in 1752 appointed clerk of the privy council, after which he became treasurer of Chelsea Hospital. His principal works are his original Poems, a version of *l'indar*, and *Observations on the Resurrection*. He was on intimate terms with Dr. Doddridge. Died 1756.

WEST, JAMES, a connoisseur in antiquities, whose collection of MSS. is now in the British Museum, president of the Royal Society from 1768 to his death in 1772.

WEST, JANE, an English author of miscellaneous works, poems, tales, and novels. In the beginning of the present century her romances were quite popular, but are now barely remembered. The 'Gossip's Story' and the 'Infidel Father' are the best known. Died 1852, at the advanced age of 93.

WEST, R., a learned lawyer, died 1726.

WEST, THOMAS, a Jesuit of Lancashire, author of a 'History of Furness Abbey,' 1716–1779.

WESTALL, RICHARD, an eminent draughtsman and designer, born in 1765, was apprenticed to an engraver in heraldry on silver, &c.; but his genius soared higher than this humble department of the arts, and having studied at the Royal Academy, in 1786 he commenced his splendid career, imparting to his water-color paintings a brilliance and vigor before unknown. About this time he formed a friendly intercourse with Mr. (afterwards Sir Thomas) Lawrence, which continued through life. Mr. Westall produced many excellent historical paintings; but he is best known as the designer of Boydell's superb editions of Milton and Shakspeare, and as the illustrator of numerous other works. From the great facility with which his ready talent enabled him to produce book designs, he was led into a greater degree of mannerism than any of his contemporaries; but still he produced many beautiful specimens of his superior taste and judgment. Like his friend Sir Thomas Lawrence, he was favored by royal patronage, his last occupation being, in giving her present majesty (then Princess Victoria) lessons in drawing and painting. He died, aged 71, Dec. 4, 1836.

WESTALL, WILLIAM, a younger brother of the preceding, and like him an eminent artist, was born in 1782. In early life he accompanied Captain Flinders in his voyage round the world, on his return from which he illustrated Captain Flinders' work, and opened an exhibition in Brook Street, consisting of representations of the chief objects he had witnessed when abroad. In 1813 he was elected an associate of the Royal Academy. 'Though little celebrated,' says a contemporary, 'for his oil pictures, he had a pleasant feeling for landscape nature, lake scenery more especially.' He worked largely for booksellers; and many volumes, for which he supplied matter-of-fact illustrations from his own drawings, as well as from the slight sketches of artists and amateurs, evince his skill, and the taste and readiness with which he worked. Among other works which he published may be mentioned, 'A Series of Views of Picturesque and Romantic Scenery in Madeira, the Cape of Good Hope,' &c. fol. 1811–14; 'Views of the Caves near Ingleton, &c. in Yorkshire,' fol. 1818; 'Britannia delineata,' 'Views in London and its Environs,' 1825; 'Picturesque Tour of the Thames, &c. Died Jan. 22d, 1850.

WESTERBAAN, JACOB, a Dutch priest, translator of the Psalms, and author of Poems, 17th cent.

WESTERMANN, F. J., a French officer, distinguished in the army of Dumouriez and afterwards in La Vendée; executed with the Dantonists, 1794.

WESTON, ELIZABETH JANE, an English lady settled at Prague in Bohemia, and ranked with the poets and Latin scholars of the 16th century.

WESTON, STEPHEN, an Oriental scholar, who became rector of Manhead, in Devonshire, but resigned his living to devote himself to literary pursuits, author of translations from the Chinese and Persian, a Chinese Dictionary, and several other works in philology, 1747–1830.

WESTON, T., a comic actor, died 1776.

WESTON, WILLIAM, rector of Campden, in Gloucestershire, where he died in 1760, was the author of two very learned works, one entitled, 'An Enquiry into the Rejection of the Christian Miracles by the Heathens;' the other, 'Dissertations on some of the most remarkable Wonders of Antiquity.'

WESTPHAL, E. C., a German jurist, 1737–92.

WESTPHAL, J., a Germ. theologian, 1510-71.

WETHERELL, SIR CHARLES, a distinguished chancery lawyer, was the son of the learned Dean of Hereford, who for more than half a century was master of University College, Oxford. He was born in 1770, received his education at Magdalen College, and in 1794 was called to the bar. For many years he practised, though but with moderate success, at the common law bar; and he resolved on quitting the courts of king's bench and common pleas soon after Lord Eldon received the great seal. In 1818 Mr. Wetherell obtained a seat in parliament as member for Shaftesbury; and though he displayed much talent and energy in debate, 'his slovenly attire, uncouth gestures, patchwork phraseology, fanciful illustrations, odd theories, recon-dite allusions, and old fashioned jokes, tempted men to call him a buffoon, when they ought to have admired his ingenuity, revered his learning, and honored his consistency.' From 1820 to 1826 Sir Charles represented the city of Oxford; subsequently he sat for Plympton; and in 1830 he was elected for Boroughbridge, which was disfranchised by the reform act. In 1824 his just ambition was gratified in being appointed solicitor-general, and receiving the honor of knighthood. Three years afterwards he succeeded Sir John Copley as attorney-general, but on Mr. Canning assuming the reins of government he resigned. He again, however, came into office in 1828, under the Duke of Wellington, but remained only 15 months, being inveterately opposed to Catholic emancipation, and determined, as he expressed himself, to have no connection with 'the scarlet individual whose seat is on the seven hills.' To the latest moment of his parliamentary career his zeal for Protestantism and his opposition to reform—either whig or radical—knew no abatement; and amidst a torrent of eloquence, learning, drollery, and enthusiasm, he closed his *senatorial* life, exclaiming, 'This is the last dying speech and confession of the member for Boroughbridge.' Sir Charles held the office of recorder of Bristol; and it was expected that his great unpopularity, as the marked opponent of the reform bill, would render him particularly obnoxious in that city, when he appeared there to hold the Michaelmas sessions for 1831. This was intimated to him, but he was unwilling to shrink from the discharge of a public duty, and (after consulting Lord Melbourne, the premier) he resolved to proceed to Bristol as usual. When Sir Charles entered the city, his carriage was surrounded by an infuriated mob, who hooted at and pelted him with stones; and it was with the utmost difficulty that he and the other corporate authorities who accompanied him escaped without sustaining mortal injury. Of the disgraceful riots and burnings that took place on the following day and night, it is sufficient here to observe, that the subject of this memoir escaped the deadly peril that was designed for him, and continued to fulfil the duties of his office until his death in 1846, aged 76.

WETSTEIN, JOHN RODOLPH, a Swiss magistrate, statesman, and writer on diplomacy, 1594-1666. The *second* of the name, son of the preceding, a theologian and classical scholar, 1614-1684. The *third*, son of the latter, a theologian and Greek scholar, 1647-1711. JOHN HENRY, a second son, a printer of classical editions, established at Amsterdam, 1649-1726. C. ANTHONY, son of John Henry, a Dutch scholar and poet, 1743-1797. JOHN JAMES WETSTEIN, a theologian and philologist, well known for his labors on the New Testament, was also a member of this family. His 'Prolegomena' to a new

edition of the Greek Testament was published in 1730, and in 1751 the text itself was given to the world with every variation that he had discovered, and his critical remarks. Died in the sixty-first year of his age, 1754.

WETZEL, J. C. F., a Ger. Hellenist, 1762-1810.

WETZEL, J. G., a German writer, 1691-1755.

WEWITZER, R., a comic actor, 1748-1824.

WEYSE, CHRISTOPHER ERNEST FREDERICK, a dramatic and lyric composer of great eminence, was born at Altona, in 1774. From his relations who were musical, he received instructions from his very infancy; and his fine natural capacity was thus so much improved, that in 1799, when he was barely 25 years old, the *Allgemeine Musikalische Zeitung*, a very high musical authority, said of him, 'He is one of the first performers on the pianoforte now living; in his fantasias he unites the science of Bach and the inexhaustible genius of Mozart; if he can succeed in reaching the taste of the latter, the art cannot be carried to greater perfection.' Though to his musical studies he added a very diligent and extensive cultivation of philosophy, astronomy, medicine, and languages, his compositions were very numerous and various. He composed 'Floribella' and 'Kenilworth,' two admirable operas; 'An Adventure in the Garden of Rosenberg,' a very spirited comic operetta; almost innumerable songs, so popular, that they are every where sung by the peasantry of Sweden, where he found constant patronage. But it was chiefly in oratorios and other sacred music that he excelled; of which his 'Ambrosian Chant,' 'Pentecost,' 'The Sacrifice of Jesus,' &c. are excellent specimens. Died 1842, aged 68.

WEZEL, J. C., a German novelist, 1747-1800.

WHALLEY, PETER, an English critic and divine, author of 'An Essay on the Method of Writing History,' 'An Inquiry into the Learning of Shakspeare,' an edition of Ben Jonson, and a 'Vindication of the Evidences and Authenticity of the Gospel from the Objections of Lord Bolingbroke,' 1722-1791.

WHARTON, G., an Eng. astronomer, 1617-81.

WHARTON, HENRY, a learned divine, to whom we are indebted for valuable illustrations of our ecclesiastical history, 1664-1695.

WHARTON, THOMAS, an eminent physician and professional writer, b. in Yorkshire, 1610-1672.

WHARTON, THOMAS, marquis of, eldest son of Philip, Lord Wharton, distinguished as a strenuous opponent of the court in the reigns of Charles II. and James II., and as a Whig statesman under the administration of Lord Godolphin; born about 1640, d. 1715. The revolutionary ballad of 'Lillibullero,' is attributed to him. His son, PHILIP, duke of Wharton, was an unprincipled politician, and turned about without scruple from the cause of the pretender to that of George I. He was a brave soldier, however, and wrote some poems and miscellaneous pieces which have been published. Died 1731.

WHATELY, W., a puritan divine, 1583-1639.

WHEARE, D., a Cornish historian, 1573-1647.

WHEATLEY, CHARLES, a vicar of Herefordshire, author of 'A Rational Illustration of the Book of Common Prayer,' and other works, 1686-1742.

WHEATLEY, FRANCIS, a self-instructed portrait painter, who excelled also in the delineation of domestic scenes, 1747-1801.

WHEATLEY, PHILLIS, a negro poetess, was born in Africa, and brought as a slave to America in 1761, when she was only 7 or 8 years of age. She was a slave in the family of John Wheatley, of Boston, from whom she took her name. When 20 years old, she published a volume of poems. Died 1794.

[Residence of Mr. Wheaton, near Copenhagen.]

**WHEATON, HENRY**, an eminent lawyer, diplomatist, and writer on international law, was born in Providence, R. I., in 1785. After a residence of more than a year in France, which he improved by the study of the French language and literature, he returned to America and practised the law, a profession to which he had been bred in Rhode Island. He became a judge of the marine court, a member of the legislature, and of the constitutional convention of 1820, while a resident in New York. He was also employed in the editorship of the *National Advocate*. In 1815 he was appointed reporter of the Supreme Court of the United States; in 1827 chargé to Copenhagen; in 1836 minister plenipotentiary to Prussia, where he remained for several years. On his return to the United States, he was about entering upon the duties of the professorship of international law in Harvard College, to which he had been elected, when he was taken ill and died in the year 1848. Mr. Wheaton was an able and prolific writer. His chief works are Reports, 12 vols., *Treatise upon the Law of Captures*, *Elements of International Law*, *History of the Northmen*, &c.

**WHEELRIGHT, JOHN**, the founder of Exeter, New Hampshire, was an Englishman by birth, but came to America in consequence of his religious opinions. He first arrived in Massachusetts, but was obliged to leave the colony on a charge of seditious conduct. Died 1679.

**WHELOCK, JOHN**, an American revolutionary officer, and President of Dartmouth College for 36 years, from 1779 to 1815. Died 1817.

**WHELER, or WHEELER, SIR GEORGE**, a scholar and divine of the Church of England, who was born at Breda in Holland, where his parents were living in exile, 1650. After travelling in Greece and Asia Minor he entered the church, and obtained some rich preferments; the chapel known by his name in Spitalfields was built at his expense on the estate belonging to him. His works consist of his *Travels*, a highly valued production, *The Protestant Monastery*, containing directions for the religious conduct of a family, and *An Account of the Churches and Places of Assembly of the Primitive Christians*. Died 1724.

**WHELPLEY, SAMUEL**, an American divine, born in Mass., 1766. He was a theological and historical writer. Died 1817.

**WHETHAMSHED, JOHN**, an abbot and chronicler of St. Albans, who lived to be more than a hundred years old; ordained 1382, died 1464.

**WHICHCOTE, BENJAMIN**, a philosophical divine of great influence in his day, was born in Shropshire, 1610, and died at the house of his friend, Dr. Cadworth, in 1683. He belonged to what is called the Latitudinarian party. Besides his Sermons, we possess his *Observations and Apophthegms*, published by one of his pupils in 1688, and *Moral and Religious Aphorisms*, which appeared for the first time in 1703. His Sermons were first given to the world by the earl of Shaftesbury.

**WHIPPLE, WILLIAM**, a signer of the American Declaration of Independence, born in Maine, 1730, died 1785.

**WHISTON, WILLIAM**, well known as a divine and natural philosopher, was born at Norton in Leicestershire, where his father was rector, in 1667. Having taken orders, he became chaplain to the bishop of Norwich, and in 1696 published his first work, entitled *A New Theory of the Earth*, from its Original till the Consummation of All Things. In 1698 he became rector of Lowestoft in Suffolk, and in 1703 succeeded Sir Isaac Newton as professor of mathematics, but seven years later, was expelled from the university on a charge of Arianism. He published several other works, and among others a translation of Josephus, and his own *Memoirs*. Died 1752.

**WHITAKER, EDWARD**, a clergyman and schoolmaster of the Church of England, author of *A General and Connected View of the Prophecies*, *Family Sermons*, &c., born 1750.

**WHITAKER, JOHN**, a clergyman of Cornwall, well known for his learned writings on antiquarian and historical subjects; born at Manchester about 1735, died 1808. Among his works are a *History of Manchester*, *Genuine History of the Britons Asserted*, *The Origin of Arianism*, *The Real Origin of Government*, *Mary Queen of Scots Vindicated*, *Course of Hannibal over the Alps*, *The Life of St. Neot*, *Histories of London and Oxford*, besides Sermons, Poems, and various critical papers.

**WHITAKER, THOMAS DURHAM**, rector of Whalley and Blackburn, author of several antiquarian works, and an edition of the *Visions of Piers Ploughman*, 1759–1821.

**WHITAKER, WILLIAM**, a Calvinistic divine of great eminence, born at Burnley, in Lancashire, 1547. He was an active party to the religious disputes of his age, and was called by Cardinal Bellarmine, the most learned heretic he had ever read. Died 1595.

**WHITBREAD, SAMUEL**, son of the eminent brewer of that name, distinguished as a politician, was born in 1758, and was married in 1789 to Elizabeth, eldest daughter of the first Earl Grey. His career in Parliament dates from 1790 to his death in 1815, and was marked by his impeachment of Lord Melville. He was a zealous Whig. He died in the year mentioned by his own hand.

**WHITBY, DANIEL**, a learned controversial divine, whose commentary on the New Testament is still held in high estimation, 1638–1726.

**WHITE, JOSEPH BLANCO**, a Spanish gentleman of Irish descent, who became convinced of the errors of popery at the age of fifteen, while being educated as a Roman Catholic priest. He came to England in 1810, and devoted himself to literature, chiefly through the magazines and periodical press, 1775–1841.

**WHITE, REV. GILBERT**, a good naturalist and pleasing writer, was born at Selborne in Hampshire, in 1720. He died in 1793. He was educated at

Oxford; and was elected a fellow of Oriel College; took his degree of M.A., and was appointed one of the senior proctors of the university. He soon left Oxford, and possessing a quiet unambitious disposition, a great love for the study of nature, and a particular attachment to the charms of rural scenery, he fixed his residence in his native village of Selborne. Nor could any offers which were made to him of settling upon a college living, tempt him from his beloved retreat, but here, in the enjoyment of competence and learned ease, he spent his days in serene tranquillity, beloved by his neighbors and in correspondence with many of the most learned antiquarians and naturalists of the day. In 1789 he published his *Natural History of Selborne*. The minute exactness of the facts contained in it, the good taste displayed in their selection, and the elegance and the liveliness with which they are described, render this work exceedingly interesting and instructive, and make it one of the most generally popular books on natural history ever written. It has gone through various editions, and still holds its popularity with all who can relish accurate descriptions of the habits of domestic animals, birds and insects, by which they are surrounded. [W.B.]

WHITE, HENRY, a clergyman and literary character of Lichfield, died 1836.

Birth-place of H. K. White, Nottingham.]

WHITE, HENRY KIRKE, one of those many lights that have been extinguished prematurely, is deeply interesting on account of his early struggles and the amiability and piety of his character. If he had survived long enough for active usefulness, he might have been an invaluable clergyman; but it is difficult to believe that he would ever have been a distinguished poet. He was born in 1785, at Nottingham, where his father was a butcher. His zeal for study in boyhood was not damped, either by a succession of manual employments, or by the drudgery of an attorney's desk, at which he was by and by placed. Contributions to small periodicals encouraged him to print, in 1803, a volume of poems, which was severely reviewed, but made him favorably known to Southey and other men of eminence. His religious opinions and feelings had now taken a very serious turn; and Mr. Simeon, with the aid of his friends, procured for him a sizarship in St. John's

College, Cambridge. In both of his two years at the university, he distinguished himself eminently; but the severity of the labor wore him out. He died in 1806, in his twenty-first year. Southey edited his 'Remains,' prefixing a very beautiful memoir.

[W.S.]

WHITE, HUGH LAWSON, an American lawyer and statesman, was born in North Carolina, 1773. He was a senator of the United States from 1825 to 1839, and was a candidate for the Presidency of the United States in 1837, when he received all the votes of the States of Georgia and Tennessee. Died 1840, aged 68.

WHITE, JAMES, a miscellaneous writer and novelist, born in Ireland, died 1799.

WHITE, JEREMY, a nonconformist minister, and wr. in favor of universal restitution, died 1707.

WHITE, JOHN, a barrister and political writer of the commonwealth period, commonly called *Century White*, from his principal publication; this work bears the following expressive title,—'The First Century of Scandalous Malignant Priests, Made and Admitted into Benefices by the Prelates; or, a Narrative of the Causes for which the Parliament hath Ordered the Sequestration of the Benefices of Several Ministers Complained of before them, for Viciousness of Life, Errors in Doctrine, for Practising and Pressing Superstitious Innovations against Law, and for Malignancy against the Parliament.' Born in Pembrokeshire 1590, died 1645.

WHITE, JOHN, usually called '*The Patriarch of Dorchester*,' was a puritan divine, highly esteemed for his eloquence and piety, 1574–1648.

WHITE, PEREGRINE, the first person of English descent born in New England, came into this world at Plymouth, 1620, died 1704.

WHITE, or WHYTE, JOHN, a Catholic divine, created bishop of Winchester by Mary, 1511–1560.

WHITE, JOSEPH, a divine of the Church of England, in high repute as an Oriental scholar, was born at Stroud, in Gloucestershire, 1746, and died 1814. He obtained great credit and preferment for his Bampton lectures, which, it was afterwards discovered, had been composed principally by Mr. Badcock, once a dissenting minister, further aided by contributions in Greek literature from Dr. Parr. His other works are '*Observations on Certain Antiquities of Egypt*,' a '*Harmony of the Gospels*,' &c.

WHITE, or VITUS, RICHARD, a Roman Catholic professor and canonist, author of a Latin History of the British Islands, died 1612.

WHITE, ROBERT, an engraver, 1645–1704.

WHITE, THOMAS, an English Aristotelian philosopher and catholic, known as a friendly disputant with Hobbes and Descartes, died 1696.

WHITE, THOMAS, the founder of Zion College in London Wall, and other charities designed to promote learning, was a native of Bristol; he commenced his public career as vicar of St. Dunstan's, Fleet-Street, in 1575, and died 1624. The college and alms-house were built on the site of Elsynge priory, then in ruins, £3,000 being left by him for that purpose.

WHITE, SIR THOMAS, founder of St. John's College, Oxford, was a rich citizen and mayor of London. He was born at Reding in 1492. His mayoralty dates in the year of Wyatt's rebellion, and for his services at that crisis he received the honor of knighthood. Died 1566.

WHITE, WILLIAM, the first bishop of the American Protestant Episcopalians in Pennsylvania, was born at Philadelphia, in 1747. In 1777 was chaplain of Congress and a warm advocate of the revo-

lutionary cause. He took a leading part in the organization of the Episcopal Church of the United States, and bore a principal share in the formation of its constitution, and the compilation of its liturgy and canons. He was the author of various religious works. He died at an advanced age, in 1836 universally respected.

[Rev. George Whitefield.]

WHITEFIELD, GEORGE, founder of the Calvinistic Methodists, was a native of Gloucester, in the Bell Inn of which town, his father being a tavern-keeper, he was born 16th December, 1714. His father having died while George was yet young, the boy's education devolved solely on his mother, whose pious instructions and example had a powerful influence in imbuing his infant mind with strong religious impressions. Having resolved to cultivate the superior talents with which she saw George was endowed, she sent him to a classical school. At the age of fifteen he had distinguished himself by the accuracy, extent of his knowledge, and taste in Greek and Roman literature. But his mother not succeeding in the hotel, and becoming reduced to poverty, the progress of George's education was stopped, and being driven to undertake some menial place about the establishment, his manners and morals were much injured by his association with irreligious servants. Happily his impressions revived, and having been confirmed, he received for the first time the sacrament of the Lord's Supper. His mother's circumstances improving, she sent him to Pembroke College, Oxford, and there he joined in forming a small select society for mutual improvement in religious knowledge and personal piety along with the Wesleys and a few college contemporaries of kindred spirit. Dr. Benson, bishop of Gloucester, who was acquainted with his rare talents and piety, resolved to grant him ordination, and the solemn ceremony was performed at Gloucester, on 20th June, 1736. His first sermon, preached on the following Sabbath, produced an extraordinary sensation. From Gloucester he went to London, where he preached alternately in the chapel of the Tower, and at Ludgate prison every Tuesday. In 1737 he joined his friends the Wesleys as a missionary at the Georgian settlement. But he had only been four months resident there, when he returned to England, both to obtain priest's orders and to raise subscriptions for erecting an orphan house in that settlement. On his arrival in London, he found an outcry raised against him on account of methodism. Bishop Benson disregarded it, and ordained him a priest. But he was denied access to the pulpits of many old

friends; and hence he commenced the practice of open-air preaching, in Moorfields, Kennington, and Blackheath, and other quarters, where his ministrations were attended by vast crowds. Having raised a fund of £1,000 for his orphanhouse, Whitefield returned in 1739 to the American continent. At Savannah immense crowds repaired to hear him, and extraordinary scenes of excitement were enacted. On 25th March, 1740, he laid the first brick of the orphan asylum, and when the building was completed, he gave it the name of Bethesda. Although his ministry was very successful at Savannah, he sighed for his native land; and accordingly in 1741, he returned once more to Britain, where he continued with indefatigable diligence to preach the gospel. In prosecution of that object, he made a tour through England, Wales, and Scotland, preaching in many places, and always in the open air, to immense crowds. While in Wales, he married Mrs. Jones, a widow for whom he had long cherished a warm attachment; and shortly after his marriage, he repaired to London, where, it being winter, some of his admirers erected a wooden shed in which he preached. To this fragile structure, he gave the name of the tabernacle, and it was the scene of some extraordinary awakenings. The journeys and voyages of this indefatigable minister, amount to a number almost incredible. He has stated in his memorandum book, that 'from the time of his ordination to a period embracing thirty-four years, he preached upwards of 18,000 sermons, crossed the Atlantic seven times, travelled thousands of miles both in Britain and America;' and when his strength was failing, he put himself on what he termed 'short allowance,' viz., preaching only once in every day of the week, and three times on the Sabbath! Whitefield was no common preacher. Parties of the most opposite nature, such as Franklin, Hume, and John Newton, have united in bearing testimony to the beauty and effectiveness of Whitefield's pulpit oratory. The death of this eminent and most useful servant of God was sudden, having been produced by a cold caught while preaching at Portsmouth in New Hampshire, and followed by a severe attack of asthma, which put a period to the life and labors of one of the most devoted and successful ministers of Christ since the days of the apostles.

[Whitefield's Monument, in the Old South Church, Newburyport.]

WHITEHEAD, D., an eminent divine, d. 1571.  
WHITEHEAD, G., a cel. Quaker, 1636-1723.  
WHITEHEAD, John, a methodist physician, who

attended Wesley in his last illness, preached his funeral sermon, and wrote 'Memoirs' of his life, died 1804.

WHITEHEAD, P., a satiric poet, died 1774.

WHITEHEAD, WILLIAM, successor of Cibber as poet-laureate, author of 'The Roman Father,' 'The School for Lovers,' 'Friendship,' and other compositions of considerable merit; he was a friend of Mason, who wrote his life, 1715-1785.

WHITEHEART, JOHN, a philosophical writer and maker of instruments, 1713-1788.

WHITELOCK, BULSTRODE, an eminent lawyer and friend of Cromwell, was the son of Sir James Whitelock, lord chief justice of the King's Bench, and was born in London in 1605. He was one of the managers of the trial of Strafford, but took no part in that of Laud or the king. In 1656, he was chosen speaker of the House of Commons, and in 1659 became president of the council of state, and keeper of the great seal. His historical memoirs are highly valued, and Whitelock is greatly eulogized, as to personal character, by Lord Clarendon. He died after many years' retirement, at Chilton Park, in Wiltshire, 1676.

WHITGIFT, JOHN, archbishop of Canterbury, distinguished as a supporter of the Church of England, was born at Grimsby in Lincolnshire 1530, or, according to some authorities, in 1533; he was regarded as a great persecutor both of the puritans and papists, by their own partisans, but Hooker and the episcopalians extol his moderation and proper firmness. He died in 1603, almost his last words being 'Pro Ecclesia Dei.'

WHITING, HENRY, an officer in the American army, having served in the war with the English in 1812, and in the Mexican campaign, when he held the post of quarter-master general. Died 1851.

WHITLOCK, ELIZ., a famous actress, sister of Mrs. Siddons and the Kembles, 1761-1836.

WHITNEY, ELI, inventor of the cotton gin, was born at Westborough, Massachusetts, 1765. He was a graduate of Yale College, and subsequently studied law. He early went to Georgia, and became an inmate of the house of the widow of General Greene, where he invented the cotton gin, one of the most important inventions of the age. The value of this machine, by which the seed is separated from the cotton, has proved of an extent almost incalculable. He suffered greatly, and incurred enormous expense in his efforts to establish his right to his great discovery. In 1798 he made a contract with the United States Government for a supply of arms. Died 1825.

WHITTAKER, J. W., an English divine, and controversialist writer. Died 1854, aged 64.

WHITTIMORE, AMOS, the inventor of an ingenious machine for the manufacture of cards, for the carding of cotton, was born at West Cambridge, Massachusetts, and died there in 1828, age 69.

WHITTINGHAM, SIR SAMUEL FORD, a lieutenant-general in the British service, passed through the various gradations as a cavalry officer, and was appointed deputy assistant quarter-master-general in the army under the Duke of Wellington in 1809. He afterwards served with the Portuguese army, and was subsequently employed in America. But the chief scene of his services was with the Spanish troops during the Peninsular war, having been aide-de-camp to General Castanos, and afterwards serving under the Duke of Albuquerque. He consequently shared in the battles of Baylen, Barossa, and Talavera, in the latter of which he was severely wounded. In 1812, after having raised and disci-

plined a large corps of Spanish troops, he was appointed to the command of them, as major-general; and, in junction with the British army at Alicant, he was successfully opposed to the French under Marshal Suchet; after which he served with distinction in command of a division of infantry, under Sir John Murray, and subsequently under Lord W. Bentinck. As a reward for his services, the prince regent appointed him one of his aides-de-camp, and he received the honor of knighthood. He was also invested with the grand cross of the order of San Ferdinando by the king of Spain, who, on Napoleon's escape from Elba, in 1815, sent expressly for Sir William. In 1819 he was appointed governor of Dominica; but in 1822 his services were transferred to India, as quarter-master-general of the king's troops, and subsequently as a major-general. On returning from India in 1835, he was appointed to the command of the forces in the Windward and Leeward Islands; but he was permitted to resign this post in 1839, in order to take the command in chief at Madras, where he arrived in August, 1840, and died in January, 1841.

WHITTINGHAM, WILLIAM, a puritan divine, who became dean of Durham in the reign of Elizabeth. He destroyed or mutilated many of the antiquities of the cathedral in his zeal against popery, 1524-1589.

WHITTINGTON, SIR RICHARD, whose name has been rendered popular by the legends current about him, the real truth concerning which has never been ascertained, was a citizen and mercer of London. He probably rose from a humble station, like so many others who have filled the magisterial chair. His last mayoralty dates 1419.

WHITTINGTON, ROBERT, author of grammatical works, long used in the English schools, flourished about 1480-1530.

WHITWORTH, CHARLES, Baron, an ambassador from the English court to Peter the Great, author of an Account of Russia, 1670-1725.

WHYT, R., a Scotch physician, 1714-1766.

WICHERLY. See WYCHERLEY.

WICKHAM. See WYKEHAM.

WICKLIFF. See WYCLIFFE.

WICQUEFORT, ABRAHAM DE, a Dutch diplomatist, author of Memoirs concerning ambassadors and their functions, 1598-1682.

WIDDICONT, I. E., the famous rider of Astley's circus in London, died 1854.

WIEGLER, J. C., a Germ. chemist, 1732-1800.

WIELAND, CHRISTOPHER MARTIN, a celebrated German poet, dramatist, and novelist, of the last century. He has been called the German Voltaire. His works have been published in 51 volumes, and embrace essays, tales, poems, histories and translations. 'Oberon,' a poetic romance in 12 cantos, is his best known production; 1733-1813.

WIELING, A., a German jurist, 1693-1746.

WIER, JOHN, in Latin *Wierus*, or *Piscinarius*, a Brabantine physician and writer on demonology and witchcraft, 1515-1588.

WIFFEN, JEREMIAH HOLME, a celebrated Quaker poet, was born in 1792, and brought up to the profession of a schoolmaster, in which he was for some years engaged. The work on which his poetical fame mainly rests is a translation of Tasso, in which he adopted the Spenserian stanza; but he wrote many other works, and was a contributor of poetry to some of the most popular Annuals. Among his productions we must name 'Aonian Hours, and other Poems;' also, a translation of poems from the Spanish of De La Vega; a series of stanzas illustra-

tive of the portraits at Woburn Abbey, entitled 'The Russells,' and his able prose work, 'The History of the Russell Family,' which he traces up to the heathen chiefs three centuries before the time of the conquering Rollo. With a liberality befitting his wealth and station, the Duke of Bedford appointed him to the situation of private secretary and librarian; and, under the patronage of his grace, surrounded as he was by rare books, paintings, sculpture, and objects of *vertu*, he spent his hours in an enviable state of mental luxury; for he was not a mere bookworm, but had a taste for the fine arts generally; and, while he was an admirer of all that is good in morals, he well appreciated whatever was beautiful in creation. He died in 1836. His sister is the wife of Mr. Alaric Watts, both poets, and well known in the literary world.

WIGAND, JOHN, a learned divine, 1523–1587.

WIGGLESWORTH, MICHAEL, an American poet and divine of New England, died 1705, aged 73. His son, EDWARD, was professor of divinity in Harvard College and a fertile religious writer; died 1765, aged 72.

[Birthplace of Wilberforce, at Hull.]

WILBERFORCE, WILLIAM, Esq., a distinguished British statesman and Christian philanthropist, was born in 1759, at Hull. Educated at the grammar school of his native town, he was transferred in due time to Cambridge, where his distinguished position as a scholar and a gentleman is sufficiently indicated by the fact of his being chosen as soon as he attained majority, to represent Hull in parliament. For a considerable time he was content to remain a silent member of the House of Commons, while at the same time he was a most active and intelligent observer of the forms of that legislative assembly. Reserving himself for some great and important occasion, he made his *debut* as a parliamentary orator on the subject of the slave trade, and in his second session, he introduced a bill for the abolition of the inhuman traffic. The 12th of May, 1789, was the memorable day when that topic was first introduced; and the journals of that period are unanimous in ascribing much of the interest connected with the movement to the powerful and affecting speech with which the bill was prefaced. Mr. Wilberforce was acknowledged both in and out of the houses to have earned by that appearance, the reputation of one of the most eloquent orators of the age; and the hearts of all good men in every part of the country implored blessings on the head of him who dared in the highest places of the land to advocate the cause of outraged humanity. A most violent and determined opposition was organized by interested parties. Nevertheless in the following year Mr. Wilberforce

renewed his motion, and on the plea of insufficient evidence, the opposing party succeeded in procuring a postponement of the question. Many men would have been dispirited by these fruitless efforts, and perhaps have relinquished their task in despair. But Mr. Wilberforce was not to be daunted. Having taken up his position on the ground of conscientious objection to all trafficking in slaves, he prosecuted the measure with that calm and unyielding determination which is always the fruit of mature thought and strong principle; and his patience was put to a severe trial; for while he renewed his motion every session from 1792, he met with no better success than at first. In 1804, after a cessation for a few years, he brought the subject once more before the notice of a new parliament. But the public mind had made a prodigious advancement towards a better tone of feeling in regard to the slave trade, and the bill passed the third reading in the Lower House. In the Upper House, the consideration of the subject was postponed till the next session. A still more important step in advance was taken when the liberal cabinet in 1806 adopted the bill, and threw all the weight of government influence into the scale. It was introduced into the Commons' House at the special request of Wilberforce under the auspices of Fox, and was passed by a majority of 114 to 15, and Lord Granville succeeded in carrying it through the Lords. But Mr. Wilberforce was universally regarded throughout the kingdom as the great champion of the cause—and the most gratifying expressions of public gratitude were poured in upon him from all parts of the country. Mr. Wilberforce has established claims to public notice and esteem of another and even higher kind. He had become a decided Christian, at a time and in circumstances when to make an avowal of evangelical sentiments, and to act in accordance with the high principles of Christian morality was a much more difficult thing than it is happily in the present day. The publication of his 'Practical View of Christianity,' a work in which he compared the defective notions of religion that prevailed among the majority of professing Christians with the standard of the New Testament—formed an era in the religious history of his country, and multitudes have traced to its perusal their first serious impressions of religion. The character of the distinguished author was a beautiful commentary on the principles developed in this book. Throughout a long life he sustained the character of a consistent Christian; and that was no easy attainment for one who moved in the highest circles, and was constantly mingled in all the changes of the political world. But although his position was isolated, such was the sincere and unaffected piety—such the prudent discretion that regulated his intercourse with general society, that he commanded the respect and esteem of all parties. Mr. Wilberforce terminated his honorable and useful life on 28th July, 1833, and on his deathbed enjoyed the comforts of that gospel in which he had reposed his faith for so many years of his life. [R.J.]

WILBYE, J., a musical composer, 16th century.

WILCOCKS, JOSEPH, bishop of Rochester, promoted the erection of the west front of Westminster Abbey, 1673–1756. His son, JOSEPH, an ingenious antiquarian, author of 'Roman Conversations,' and 'Sacred Exercises,' 1723–1791.

WILCOX, CARLOS, an American poet, was born in Newport, 1794; died 1727.

WILD, HENRY, an Oriental scholar, born at Norwich, where he began life as a tailor about 1684. The date of his death is unknown, but in 1734 he

published a translation of Mohammed's Journey to Heaven. He was a man of irreproachable morals, and seemed to have suffered much from his precarious means of subsistence.

WILD, R., a divine and poet, 1609-1679.

WILDBORE, CHARLES, a self-taught mathematician and miscellaneous writer, died 1802.

WILDE, RICHARD HENRY, an American lawyer, statesman and poet, was born in Baltimore, but removed at an early period of his life to Georgia, where he practised law, and became a member of Congress. In the latter part of his life he lived in Louisiana, where he was the professor of law in the university of that State. He was an accomplished scholar, a man of elegant literary taste, and author of several poetical effusions and miscellaneous works. His 'Love, Madness, and Imprisonment of Tasso,' is a tasteful, scholarly production. Died 1847.

WILDENS, J., a Flemish painter, 1584-1644.

WILFORD, FRANCIS, a German Orientalist, and officer in the British service, died 1822.

WILFRED, a Saxon bishop and saint of the Roman calendar, who exhibited his architectural skill and his taste in embellishments, by the improvement of York cathedral and the erection of churches at Hexham and Ripon; died 709.

WILHEM, W. L. B., founder of the popular singing schools in France, 1779-1842.

[Wilkes.]

WILKES, JOHN, was born in London on the 17th of October, 1727. His father, an affluent distiller, gave him a high education, of which his capacity enabled him to take full advantage. He was learned and witty, and his attractive conversation, aided by his fashionable tastes and lavish habits, made him popular with the juvenile aristocracy of the day, both good and bad. His forbidding appearance has often been alluded to, but authentic original portraits, while they have a general resemblance to the expression in Hogarth's caricature, represent not a coarse rude demagogue, but the delicate, sinister features of a sybarite and heartless profligate. He treated the mob for his own purposes much as his profligate companions of the Monk-monks' Club, who were so indignant at his becoming a demagogue, treated their female victims. It was in 1762 that, driven desperate by his extravagance, he commenced the *North Briton*. For a libel there printed, his house was searched under a general or indefinite warrant, and for this constitutional outrage he obtained a verdict for £10,000 against the secretary of state. The same event began his memorable conflict with the House of Commons. His expulsion in 1764 opened the question how far the majority of the house was entitled to deprive constituents of the privilege of having their own representative, and he triumphed by the obnoxious

resolutions being expunged in 1782. He had the art in all his struggles to keep not only on the popular, but the constitutional side. When no longer attacked he fell into insignificance, which, perhaps, he did not dislike, as he had secured some lucrative offices. He died on 27th Dec., 1797. [J.H.B.]

WILKIE, SIR DAVID, a painter of distinguished merit, was born near Cupar in Fifeshire, in 1785, his father being a minister of the Scotch church. In 1805 he came to London, and soon attracted notice by the excellence of his earliest efforts; his career of fame commencing with his 'Village Politicians,' 'Blind Fiddler,' 'Rent Day,' &c. His reputation was now established, and in 1811 he was made a royal academician, from which period he regularly produced, and as regularly sold at increasing prices, his most celebrated pictures, of which we shall merely mention a few; as 'Distraining for Rent,' 'The Penny Wedding,' 'Blind Man's Buff,' 'The Village Festival' (now in the National Gallery), 'The Reading of the Will,' and 'Chelsea Pensioners reading the Gazette of the Battle of Waterloo' (painted for the Duke of Wellington, in 1823, for £1200). In consequence of ill-health, brought on by close application and some serious pecuniary losses, a continental tour was recommended by his physicians; and he accordingly visited Italy and Spain, where he remained till 1828. But his love of art and his habitual industry could neither be restrained by the injunctions of physicians nor the entreaties of friends; and, accordingly, several finished pictures, altogether different from his former style of execution, soon appeared. Upon this 'total change' of style and choice of subjects it has been remarked, that, in departing from the principle of the Flemish and Dutch schools, and adopting that of the Spanish, 'he determined on the hazardous experiment of resting his future fame on a style utterly opposite to that in which he then stood unrivalled amidst European artists.' In January, 1830, on the death of Sir Thomas Lawrence, he was appointed principal painter in ordinary to George IV., whose portrait in the Highland costume, and 'His Majesty's Reception at Holyrood House,' he was at that time occupied in painting. On the accession of William IV. the royal favor was continued to him, and he was knighted in 1836. Queen Victoria honored him with sittings for his splendid picture of her majesty's 'First Council;' and by the queen's command he went to the Turkish capital to paint the portrait of the sultan. This was his last and fatal mission. On his return on board the Oriental steamer, after having touched at Malta and Gibraltar, he was taken suddenly ill, and died in Gibraltar Bay, aged 56, June 1, 1841; the last sad offices of committing his body to the deep being rendered necessary by the strict orders of the governor, who could not allow it to be brought on shore. Among the principal pictures painted by Sir David, in his second or Spanish style, may be named 'The Maid of Saragossa,' 'The Guerilla's Departure' and 'Return,' John Knox preaching, Columbus, 'Peep-o'-day-Boy's Cabin,' 'Mary Queen of Scots escaping from Lochleven Castle,' 'The Cotter's Saturday Night,' 'The Empress Josephine and the Fortune-teller,' and 'The Discovery of the Body of Tippoo Saib' (painted for the widow of Sir David Baird, at £1500). He also produced many celebrated portraits. As a man, Sir David Wilkie had the character of being mild and unassuming; as an artist no difficulties could daunt him, nor could any labor be too great for him to undertake with a view to the attainment of excellence.

WILKIE, WILLIAM, a Scottish minister and professor of philosophy at St. Andrews, author of 'The Epigoniad,' an epic poem, 1721-1772.

WILKINS, SIR CHARLES, F.R.S., &c., an eminent Oriental scholar, was a native of Somersetshire. He went to Bengal, in the civil service, in 1770. While thus employed, he directed his attention to the study of the Sanscrit language, and followed it up with such perseverance, that he translated the Bhagavad Gita into English, which Warren Hastings, then governor-general, presented to the court of directors, and prefixed to it an elegant dissertation. Mr. Wilkins also possessed great mechanical ingenuity, and prepared with his own hands the first Bengal and Persian types employed in Bengal. After residing 15 years in India he returned, but continued to pursue his Oriental studies, and published a translation of the Hitopadésa, or the Fables of Vishnôo Sarma; and in 1800 he was made librarian of the valuable collection of MSS. which the court of directors possessed through the conquest of Seringapatam. He was also appointed visitor in the Oriental department for the company's colleges at Haileybury and Addiscombe. In 1808 Sir Charles produced his excellent 'Sanskrit Grammar;' he also edited and enlarged Richardson's Dictionary of the Persian and Arabic languages, in 2 vols. 4to. He was a member of the French Institute, admitted to the honorary degree of D.C.L., in the university of Oxford, and was a knight of the Guelphic order. Born 1751; died 1836.

WILKINS, DAVID, rector of Hedleigh, in Suffolk, and archdeacon of that county, known as an antiquarian and Saxon scholar, 1685-1745.

WILKINS, JOHN, brother-in-law of Oliver Cromwell, and bishop of Chester, was born in Northamptonshire 1614. He was distinguished for his learning, especially as a mathematician, and is the inventor of the perambulator or wheel for measuring distances. Died at the house of his friend, Dr. Tillotson, in London, 1672.

WILKINS, WILLIAM, an architect and writer on architecture, was born at Cambridge, where his father was a builder, in 1778, and succeeded Sir John Soane as professor at the Royal Academy in 1837. The principal of his edifices are the London University, St. George's Hospital, the University Club House, and the National Gallery in Trafalgar Square. His literary works are 'Remarks on the Buildings and Antiquities of Athens,' and 'The Civil Architecture of Vitruvius.' Died 1839.

WILKINSON, JEMIMA, an American religious impostor, was born in Rhode Island 1753. Pretending to have recovered from a complete suspension of life, she gave out that, she had been raised from the dead, and claimed the possession of supernatural power. She found some fools to believe her, and gathered together a band of enthusiastic followers, with whom she removed to New York, and died 1819.

WILKINSON, JAMES, an American revolutionary officer and brigadier-general in the United States Army. In the late war of 1812 he served on the northern frontier. Born in Maryland 1757; died 1825.

WILL, G. A., a Germ. numismatist, 1724-1798.

WILLERTS, ADAM, a Flemish marine painter, 1577-1640. His son, ABRAHAM, born 1613.

WILLAMOV, J. G., a Russian poet, 1737-77.

WILLAN, ROBERT, a physician of London, known as a professional and religious writer, 1757-1812.

WILLARD, SAMUEL, a New England divine and theological writer, was born at Concord, Massachu-

setta, 1640. He became vice-president of Harvard University, and is remarkable as the author of the first folio volume in divinity published in America. Died 1707. His son, JOSIAH, was in public life for 39 years; died 1756. His grandson, JOSEPH, was president of Harvard College, and a distinguished classical scholar, 1738-1804.

WILLDENOW, CHARLES LOUIS, a distinguished botanist, member of the Academy of Sciences and director of the botanic garden at Berlin; he wrote several works on plants, collected a Zoological Cabinet which he presented to the museum, flourished 1765-1812.

WILLE, J. G., a German engraver, 1717-1807.

WILLEMET, P. R. F., a French botanist and traveller in the East Indies, 1762-1790.

WILLEMET, RENÉ, a French botanist, director of the botanic garden at Nancy, 1735-1807.

WILLEMIN, N. X., a French antiquarian, designer, and engraver, author of 'The Civil and Military Customs of Antiquity,' 1764-1833.

WILLEMUR, L. DE PENEN, Count De, a Spanish general and statesman, 1761-1836.

WILLERMOZ, P. J., a French physician and chemist, 1735-1799. His son, P. C. CATHARINE, a physician and anatomist, 1767-1810.

WILLET, ANDREW, a learned divine of Cambridgeshire, author of works written against popery, and other theological subjects, born at Ely 1562, died 1621.

WILLET, MARINUS, an Am. revolutionary officer, born in New York, died 1830.

WILLIAM THE CONQUEROR. William I., king of England, was the illegitimate son of Robert duke of Normandy, by Arlotta, the daughter of a tanner of Falaise. He was born in 1027. His father had no legitimate children; and when Duke Robert departed on a pilgrimage to the Holy Land, he persuaded his barons to swear allegiance to young William as his heir. Duke Robert died while returning from Palestine in 1035; and during the first years of William's dukedom, the ambitious feuds of the Norman barons and the aggressions of the king of France placed Normandy in a perilous state of anarchy and weakness. But as soon as William grew out of boyhood, he began to govern for himself; and after years of jeopardy and strife, he established a degree of order in his duchy, which was unknown in the rest of Europe, and he made himself universally known and respected among the princes of Christendom. William was related to Edward the Confessor king of England; and he long watched anxiously for the time when the death of that childless sovereign should give him the opportunity for making himself king of this country. Edward died on the 5th January, 1066; and the Saxon Harold was chosen by the English to succeed him. But William speedily asserted his claims. Besides his relationship to the late king, he had been nominated, or he pretended that he had been nominated by the dying Edward as his successor: and he had in the preceding year taken advantage of the temporary presence of his rival in Normandy, to make Harold, partly by force and partly by fraud, swear to help him in obtaining the crown of England. As soon as King Edward was dead, William demanded the execution of the promise; and, on Harold's refusal, he prepared to assert his rights by the sword. He assembled, for the invasion of England, a host which Mackintosh has rightly termed 'the most remarkable and formidable armament which the western nations had witnessed.' He landed with this army in Pevensey Bay, 29th September, 1066, and on the 14th of the

next month he fought and won the decisive battle of Hastings, in which Harold and the bravest thanes of southern and central England, perished. William advanced and occupied London, the Saxons generally submitting themselves to him; and he was crowned king of England at Westminster on Christmas day, 1066. At first his rule was comparatively mild; but the Saxon spirit chafed under the sense of foreign domination, and under the insolence of the Norman barons and prelates of the new king. Then came fierce local risings, with delusive partial successes over the foreigners, soon crushed by the disciplined troops and high military genius of the Conqueror. Then followed the revengeful cruelties of the king, the effects not so much of hasty anger, as of stern, remorseless policy. He was resolved to establish his dominion and his dynasty firmly in England; and neither fear nor mercy ever made William pause in employing the most efficacious means to work out a settled purpose. The insurrections of the Saxons were visited by him with confiscation, massacre, and devastation; and it is computed that a third of the old Saxon population of England was swept from the land during his invasion and reign. But, terrible as are the acts of cruelty with which William's memory is associated, it would be unjust to let them blind us to the high qualities which he displayed, as a ruler, and as an ordainer of our institutions. He maintained the strictest order and internal peace. His military renown checked the ambition and cupidity of the marauding Danes, who had infested the English coasts for more than two centuries. He organized the feudal system here, with changes from its development on the continent, so as to keep down the turbulent insubordination and lawless violence of the nobility. He retained (though with many important modifications) the Saxon popular tribunals; and altogether he may be truly said to have displayed a marvellous discernment of the two great principles of government, which require centralized power in matters of imperial importance, and local self-government in matters of chiefly local interest. William the Conqueror died in 1087. It ought to be added that, like all the race of his great ancestor, Rolf the Ganger, who conquered Neustria 150 years before William conquered England, he was eminent for his appreciation of intellect, science, art, and learning, and for liberality to all men of all nations by whom they were displayed. [E.S.C.]

WILLIAM II., king of England, second son of the preceding, was born in 1060, and succeeded his father in the absence of his elder brother, Robert, 1087. The latter also allowed him to acquire the dukedom of Normandy by purchase, and then joined the crusaders. William reigned nearly thirteen years, and was killed in the New Forest by an accident, as commonly supposed, in 1100. He was surnamed *Rufus*, the red or ruddy, and bears the reputation of an evil and avaricious man.

WILLIAM III., king of England, stadtholder of Holland, and prince of Orange, was the son of William II., stadtholder of Holland, and of Mary, daughter of Charles I. of England. He was born November 14, 1650. His father had died a little more than a week before the young prince's birth, and the party of aristocratic republicans among the Dutch, that was hostile to the ascendancy of the house of Orange, eagerly took this opportunity of curtailing its power; and prevented the offices of stadtholder and captain-general, which the father had held, from being conferred on the infant son. The great wealth and hereditary estates of the

prince of Orange, his connection with the royal families of England and France, and the popularity of his name and house among the common people, still made young William an object of anxiety to the leading Dutch statesmen; and he grew up surrounded by the officers and spies of a jealous government, that watched his every action and word, and every growing tendency of his disposition with pretended courtesy but real suspicion. William thus early acquired, as a defence against the snares around him, the reserved manners, and the habits of secrecy and self-reliance, that marked him throughout life. When he was twenty-one, the disasters of the war against England and France, in which the Dutch were then involved, caused a general movement among the mass of the people against the De Witts, and the other aristocratic chiefs of the commonwealth. William was made stadtholder, and continued with this office and that of captain-general, and the other high powers which his ancestors had enjoyed. It is a deep blot on his fame, that at this crisis of his life he neither exerted himself to prevent the murder of the De Witts by the infuriated people, nor did he take any steps to bring the murderers to justice. Towards the country, that thus made him its chief at a time of unexampled distress and peril, William did his duty nobly. He encouraged the Dutch to reject the degrading terms of peace which the hostile kings offered, and to defend their fatherland, town by town, and inch by inch. Nay, he exhorted them, rather than submit, to embark on board their vessels and found a new free state in the East Indies. He himself spurned with indignation the offers of Louis XIV. to bribe him, by making him king of the United Provinces under the protection of England and France. When the French envoy pointed out to him the immense power of the invading armies, and that he was sure, if he rejected the proposals, to see both himself and Holland irretrievably ruined, William answered, 'I have thought of the means to avoid beholding the ruin of my country; I can die in the last ditch.' His heroism had its just reward. The progress of the French armies over Holland was checked. The Emperor of Germany and other powers combined against Louis XIV. Charles II. of England was compelled by his parliament and people to make peace with the Dutch; and at last the treaty of Nimeguen, 1678, left Holland free and independent after a war, in which William, though he met with frequent reverses, had won the admiration of Europe as a general and as a statesman. In the same year he married the princess Mary of England, daughter of James II. by his first wife. William watched with the deepest interest the struggle of parties in England. He felt that his own peculiar mission was to defend the cause of civil and religious liberty in Europe against the ambition and bigotry of Louis XIV. If England could be brought to fill her natural place as a free and a protestant state in this great strife, William was confident of the result. But Holland and her other allies were unequal to a continued contest against the power of France, if England, under her Stuart rulers, was to act again as the tool and accomplice of the Bourbons. Hence, when the English, in 1688, sought the intervention of William against the misgovernment of James II., William eagerly embarked in the great enterprise of his age. He landed in that country in the November of that year, and gained almost bloodless possession of the kingdom. The houses of parliament solemnly chose him king of England by the bill of rights. In Scotland and Ireland the adherents of the abdicated monarch made

some resistance in arms, but were ultimately put down. William himself decided the Irish war by the great victory of the Boyne, which he gained in person over James and his followers. William's reign over these kingdoms was disquieted by many jealousies between him and his new subjects. He was offended at the limitations on the royal power and revenue, which the English Whigs introduced; and he was of course regarded with the bitterest animosity by the Jacobites, who cherished the fallen cause of the Stuarts. The war also against France, which was the necessary consequence of the Revolution of 1688, brought many burdens on the country, and was attended with many losses in the field. The peace of Ryswick in 1697 was regarded by all parties as no more than an armed truce; and it was well known that Louis XIV. was scheming to unite the vast possessions of the Spanish crown to the dominion of France. William sought to prevent this by two treaties between the principal European powers for the partition of the Spanish provinces on the death of the reigning king. But this only incensed the court of Madrid, and when the king of Spain died in 1700, it was found that he had bequeathed all his crowns to the grandson of Louis XIV., who forthwith repudiated the partition treaties, and prepared to seize this rich inheritance for the house of Bourbon. William now applied all his energies to form a new league against France; but in the midst of his warlike preparations he died at Kensington, 8th March, 1702. William III. was unquestionably a great man, but he was one of those coldly great men, who rather extort our admiration from our reason, than raise the sympathy or enthusiasm of our hearts. His permission of the massacre of the clan Macdonald, at Glencoe, is (like his conduct with regard to the De Witts,) a grievous stain on his memory. But we must judge him by the general character of his actions, and not by one or two culpable deeds. We must look to the circumstances in which he was placed; and we must consider what would have been the probable current of events in the latter portion of the seventeenth century, and in all after time, if the fraud, the rapacity, and intolerance of Louis XIV. and the Stuarts had not been encountered by an opponent so resolute, so vigilant, so high-minded, and indomitable as William III. If we judge him thus, we shall feel that he deserves the imperishable gratitude of posterity, as the rescuer and preserver of England's national independence, her constitutional liberties, and right to worship according to a free conscience and a pure faith. [E.S.C.]

WILLIAM IV., king of England, known before his accession to the throne as WILLIAM HENRY, duke of Clarence, was the third son of George III., and was born August the 21st, 1765. At 14 years of age he entered the navy as a midshipman on board the *Prince George*, a 98-gun ship, commanded by Admiral Digby; and, at the king's especial desire, he was placed on the same footing, in every respect, with other youths of the same rank in the service. Within 12 months of his having been at sea, Prince William Henry had the good fortune to be present with Admiral Rodney at the capture of the *Caraccas* fleet, commanded by Don Juan Langara. When the Spanish admiral was brought on board the *Prince George* as a prisoner, and was told that one of the midshipmen, whom he saw actively engaged in his duty, was an English prince of the blood, he exclaimed, "Well may England be mistress of the sea, when the son of her king is thus employed in her service!" The prince served nearly all the residue

of his time as a midshipman in the West Indies, and off the coasts of Nova Scotia and Canada; and many characteristic anecdotes, honorable to his bravery and humanity, are related of him during the period of his naval career. He was afterwards removed to the *Warwick* of 50 guns, commanded by Lord Keith, and was present when that officer captured the frigates *L'Aigle* and *La Sophie*, and the *Terror* sloop-of-war, off the Delaware, in 1782. He then joined Lord Hood, who was in quest of the French fleet

[Windsor Castle, residence of the kings of England.]

under Vaudreuil, and at first became acquainted with Nelson on board the *Barfleur*. In June, 1783, Lord Hood's squadron returned to England; and in the summer of 1785, the prince, having served the regular time as a midshipman, was appointed third lieutenant of the *Hebe* frigate. In 1786, as captain of the *Pegasus* of 28 guns, he sailed for Nova Scotia; whence he proceeded to the Leeward Islands station, and remained for some months under the orders of Nelson, then captain of the *Boreas* frigate; when a strong and lasting friendship (honorable to both) sprang up between them. In December, 1787, the prince returned to England, and was appointed to command the *Andromeda* frigate, in which he again sailed for the West Indies. On his arrival at Port Royal he received the congratulations of the house of assembly, who voted 1000 guineas for a diamond star to be presented to him, as a mark of the high sense they entertained of his conduct while formerly on that station. In 1789 he was created duke of Clarence, and earl of Munster in Ireland, took his seat in the House of Lords, and was made rear-admiral of the blue in 1790. From the time, however, he received his flag, the Duke of Clarence saw no more active service afloat, though he repeatedly expressed his most anxious wishes to be employed. In 1811 he succeeded Sir Peter Parker, as admiral of the fleet. In that capacity he hoisted his flag for the last time, for the purpose of escorting Louis XVIII. to France: and on board the *Impregnable* he received the emperor of Russia and the king of Prussia, with their splendid cortège. For many years the duke lived the life of a private English gentleman, residing at Bushy Park, of which he had been appointed ranger, on the death of the Countess of Guildford, in 1797. After the death of the Princess Charlotte of Wales, in 1817, a new era took place in the position and prospects of the Duke of Clarence; and on the 11th of July, 1818, he married the Princess Adelaide Louisa Theresa Caroline Amelia, the eldest daughter of the Duke of Saxe Meiningen. Two female children, the eldest of which died on the day of her birth, and the youngest when only three months old, were their only

offspring. Having become heir-presumptive to the throne, in 1827, by the death of the Duke of York, his royal highness received an additional parliamentary grant, which raised his income to 40,000*l.* a year. He was also appointed lord high admiral of England, a post revived for the occasion, after having been in abeyance just 100 years, in which important station he was highly popular; but owing to some objections made by the Duke of Wellington (who, with his colleague, came into office soon after the death of Mr. Canning) to the expenses of his royal highness's progresses, he resigned the office. On the 26th of June, 1830, the Duke of Clarence succeeded his brother, George IV., as king of England, and was crowned, with his royal consort, in Westminster Abbey, September the 8th, 1831. A marked difference was soon observable in the conduct of William IV. and his predecessor. The secluded habits and fastidious retirement that had distinguished the last years of his brother's life, gave place to an obvious desire of popularity on the part of the new monarch; while the Wellington administration was succeeded by that of Earl Grey, under whom the reform of Parliament was effected. Political animosities were at their height; but still the king was on the popular side, and the court offered, in every respect, an example worthy of imitation. In May, 1837, his majesty was taken ill, and in four weeks from that time, June 29, 1837, "he died in a gentle sleep." Sincere and honorable were the encomiums pronounced upon him at his death by men of all parties; and perhaps we could not paint his true character more justly than in the brief and expressive language of Lord Grey:—"A man more sincerely devoted to the interest of his country, and better understanding what was necessary for the attainment of that object, there never did exist; and if ever there was a sovereign entitled to the character, his majesty may truly be styled a PATRIOT KING!" [E.R.]

WILLIAM, *king of Scotland*, surnamed 'the Lion,' succeeded his brother, Malcolm IV., 1165, and died 1214. He was succeeded by Alexander II.

WILLIAM, *duke of Normandy*, surnamed 'Long Sword,' was born in 900, and succeeded his father, Rollo, in 927. He was assassinated in 942.

WILLIAM, surnamed 'Short Hose,' son of Robert III., duke of Normandy, made a vain attempt to recover the estates of his father, of which he had been despoiled by Henry I. of England. He became count of Flanders in 1127, died 1128.

WILLIAM, son of Henry I., king of England, invested by him with the duchy of Normandy, and perished by shipwreck 1120.

WILLIAM, *duke of Apulia*, succeeded his father, Roger, son of Robert Guiscard, 1111, died 1127.

WILLIAM, *six counts of Holland*, four of whom were also *counts of Hainault*, and one *emperor of Germany*:—WILLIAM I., who usurped the country on returning from a crusade to the prejudice of Ada, his niece, and died 1223. WILLIAM II., grandson of the preceding, born about 1226, succeeded his father 1234. In 1247 he was elected king of the Romans, and being proclaimed emperor by the papal legate in 1250, had to dispute the crown with Conradin IV., till the death of that prince in 1254. He was soon after recalled to his hereditary estates by a revolt, and lost his life in a battle 1256. WILLIAM III. of Holland and I. of Hainault, succeeded his father, John, in both countries 1304, and died 1337: he was surnamed 'the Good.' WILLIAM IV. of Holland and II. of

Hainault, son and successor of the preceding, perished in a battle fought with his revolted subjects 1345. He was succeeded by his sister, Margaret, and her husband, the emperor Louis of Bavaria. WILLIAM V. of Holland and III. of Hainault, son of Margaret and Louis, usurped the authority of his mother 1349; he died miserably in a tower, to which he had been consigned for the murder of one of his gentlemen in 1377. WILLIAM VI. of Holland and IV. of Hainault, succeeded his father, Albert, in 1404, died 1417.

WILLIAM I. OF NASSAU, prince of Orange, the first leader in the Dutch war of independence, was born in 1533 of Lutheran parents, but descended from the ancient counts of that principality. Being trained to political employments at the court of Charles V., he conformed outwardly to catholicism, and had become governor of the provinces of Holland, Zealand, and Utrecht, while the reformed doctrines were spreading, and events were ripening for the revolt of the Netherlands. The leading circumstances of that great and glorious struggle, which lasted considerably more than half a century, were these. On the death of Charles V., who had made great efforts to keep the Netherlands free from 'heresy,' he bestowed those provinces on his son, Philip II., king of Spain. The latter appointed Margaret of Parma, a natural daughter of his father, stadtholderess, with the cardinal Granvella for her adviser, who began his career by prosecuting the protestants, and creating a vast number of bishoprics. The dark and resolute despotism of Philip was shadowed forth in England in the reign of Mary, called the 'bloody,' but in the Netherlands he was as the tyrant of his own household, and so much the more unscrupulous and persecuting. In 1564 the cardinal, provoked by the opposition and hatred which he had to encounter, departed for Spain, and shortly afterwards preparations were making to introduce the inquisition, and this in the might of a people already half Lutherans and Calvinists. In 1566 the nobles went in procession, and petitioned Margaret against this measure, and as they were treated with contempt, their remonstrances were followed by popular commotions. On this Alva was sent, at whose approach a hundred thousand of the most industrious Flemings took refuge in foreign countries, chiefly in England. This was the crisis at which William of Orange came forward, and raised the standard of independence, and the desperate circumstances under which he called the people to arms, may be referred to in the article ALVA. Though that monster of cruelty was recalled at the end of six years, 1574, and replaced by a milder ruler, the Dutch continued the war, and Holland was liberated by the relief of Leyden, which William effected by laying the whole country under water, 1575. He was now elected stadtholder, and Calvinism became the established religion, to the exclusion of Lutheranism as well as the Roman Catholic faith. By the 'Pacification of Ghent' in 1576, William united all the provinces in one confederation, but he found it impossible to heal these internal causes of disunion, and the Spaniards taking advantage of them, were able to repossess themselves of the southern provinces, under the duke of Parma, whence arose the present distinction between Holland and Belgium. Philip had now set a price on William's head, and, in 1582, an attempt was made to assassinate him, but he recovered from the wound. A second attempt, in 1584, was but too successful. One Balthaser Gerard, being introduced to the stadtholder on the plea of business, he suddenly drew a pistol, loaded with three balls, and shot him

in the body. The prince expired almost instantly: his last words were, 'May God have mercy on me, and these poor people!' He was succeeded, and the war carried on successfully, by his second son, MAURICE OF NASSAU. [E.R.]

WILLIAM, two kings of Holland, WILLIAM (FREDERIC) I., styled king of the Netherlands, grand duke of Luxembourg, prince of Orange, and duke of Nassau, was born at the Hague in 1772. He distinguished himself in the wars with the French republic, and became an exile with his father, the hereditary stadtholder of the Dutch republic, in 1795; after his father's death he succeeded first to the duchy of Nassau, and joined the Prussian army against Napoleon. He became king of Holland by the settlement of affairs which followed the fall of Napoleon in 1814, the countries united under his rule by the congress of Vienna being the old united provinces of Holland, the bishopric of Liège, and Belgium; the latter, however, was separated by the revolution of 1830. He abdicated in 1840, and died in 1843. WILLIAM II., son and successor of the preceding as king of Holland, was born in 1792, and distinguished himself in the peninsular war under Lord Wellington; he also commanded the army of the Netherlands at the battle of Waterloo. His reign commenced from his father's abdication in 1840, and he died a few days after the revolution of March, 1848.

WILLIAM OF APULIA, a Latin poet and historian of the 12th century.

WILLIAM OF AUVERGNE, or OF PARIS, a French prelate and theologian, died 1249.

WILLIAM OF WYKEHAM. See WYKENAM.

WILLIAMS, ANNA, a miscellaneous and poetical writer, was the daughter of a Welsh surgeon, whom she accompanied to London in 1730, and supported many years by the labor of her pen. In 1740 she became blind from cataract, and then had recourse to her needle till she was admitted under the roof of Dr. Johnson, who was struck with admiration of her generous devotion. She died in his house, Bolt Court, Fleet-Street, in the seventy-seventh year of her age, 1783.

WILLIAMS, BENJAMIN, an American revolutionist and governor of North Carolina, first appointed, 1799. Died 1814.

WILLIAMS, SIR CHARLES HANBURY, a diplomatist and man of letters, 1709-1759.

WILLIAMS, COOPER, a chaplain in the navy, and writer of voyages, &c., 1767-1816.

WILLIAMS, DANIEL, many years minister to a presbyterian congregation in Dublin, was born about 1644, at Wrexham, in Denbighshire. The latter part of his life was passed in London, and he left his library in Redcross-Street, Cripplegate, for the use of dissenting ministers. Died 1716.

WILLIAMS, DAVID, founder of the 'Literary Fund,' was born in Cardiganshire, 1738; and after officiating some time as a dissenting minister, became a teacher of deism. This speculation not answering, Mr. Williams devoted himself to private teaching and literature, and at the close of his life was supported by the excellent institution he had himself projected. His principal works are an edition of 'Hume's History,' 'Lectures on Education,' 'Lectures on Political Principles,' 'History of Monmouthshire,' &c. Died 1816.

WILLIAMS, DAVID, one of the captors of major Andre. Died 1831.

WILLIAMS, EDWARD, a Welsh bard and writer; author of a Welsh Dictionary, died in a workhouse, 1854, aged 80.

WILLIAMS, EDWIN, an American statistical

writer, the compiler of the 'Annual Register,' the 'Statesman's Manual.' Died 1854, aged 58.

WILLIAMS, EPHRAIM, an American general, founder of the college named after him, died about 1791.

WILLIAMS, F., a creole writer, died 1770.

WILLIAMS, GRIFFITH, bishop of Ossory, in Ireland, was born at Cærnarvon, about 1589, and in the rebellion of 1641 became an exile from his see, which he recovered at the restoration. He wrote several religious works, and an account of the persecutions he had suffered. Died 1672.

WILLIAMS, H. M., a female artist, 1759-1827.

WILLIAMS, ISAAC H., Governor and Chancellor of the State of New Jersey. Died 1844, aged 67.

WILLIAMS, JONATHAN, an American revolutionary officer, for many years in command of the engineer corps of the army, was born in Boston, 1752, died 1815. He was the author of various scientific writings upon subjects connected with his profession.

WILLIAMS, JOHN, archbishop of York, and lord keeper in the reign of James I., was born at Aberconway in Cærnarvonshire, 1582. He succeeded Lord Bacon as chancellor in 1621, and was raised to the see of York in 1641. During the rebellion he fortified and defended Conway castle in the interest of the king. Died 1650.

WILLIAMS, JOHN, a learned prelate, one of the divines who were promoted after the revolution of 1688, born in Northamptonshire, 1634, died 1709.

WILLIAMS, JOHN, the martyr of Erromanga, was born in a very humble rank, but being imbued with deep feelings of piety, early resolved to devote himself to missionary labors, and by his self-denying and zealous prosecution of his work, has obtained a name among the foremost of his evangelical contemporaries. Having entered into the service of the London Missionary Society, he was sent out in 1817 to their station in the South Sea Islands; and the scene of his first duties there was in the Raiatea—the largest and most central of the Society Islands, situated about one hundred miles' distance from Tahiti. He afterwards removed to what is called the Hervey Group of Islands, and having discovered Rarotonga, the largest of the group, landed with a view to establish himself there. During eleven years he prosecuted the work of an evangelist on that island, and on reviewing his course at his departure, could bear this wonderful and gratifying testimony: 'When I found them in 1823, they were entirely savages; and when I left them, they had not only embraced the Christian profession, but I am not aware that there was a house in the island where family prayer was not observed every morning and evening.'—Burning with zeal to introduce the gospel into every island of the Pacific, this indefatigable missionary removed to another group—the New Hebrides, which lay far westward. Having been welcomed to the island of Parna, Mr. Williams prepared to make a similar attempt in Erromanga. On approaching it, he and his two companions hailed some of the natives who were sailing in a canoe, and found they spoke a different language—were of a darker complexion—shorter in stature—wilder in their appearance, and more jealous of the intentions of strangers, than the people in Parna. The missionaries tried to propitiate them by offering them some bread, and requesting the chief to give them some water, which he speedily fetched. Encouraged by these appearances, they waded ashore; but scarcely had they landed when they ran in all haste back to the sea.

being pursued with hostile weapons by the savages. Mr. Williams had reached the edge of the water, but the beach being rugged and steep, he stumbled and fell, when the native who pursued him, taking advantage of the fall, struck him repeated blows with a club. Others running up, completed the work of destruction, by piercing his body with arrows. Before his two companions could venture to make the slightest attempt to rescue him, the savages had dragged the mangled remains away with them. Thus perished, in the prime of life and usefulness, a missionary who was 'in labors abundant;' and whose 'Narrative'—full of the most interesting and delightful details,—has been beautifully and justly styled, 'A Modern Acts of the Apostles.'

[R.J.]

WILLIAMS, OTHO HOLLAND, an American revolutionary, brigadier-general, was born in Maryland, 1748. He was distinguished at the battles of Guilford, Hobkirk's Hill and the Eutaw. Died 1794.

WILLIAMS, SIR ROGER, a native of Monmouthshire, dist. in the Flemish wars, died 1595.

WILLIAMS, ROGER, president of the colony of Rhode Island, and one of its founders, was born in Wales, 1599, and settled in America, 1631. He was originally a clergyman of the English Church, but became a Dissenter. He preached until 1636 at Salem and Plymouth, but being banished from those colonies in consequence of his religion, he sought freedom of conscience in Rhode Island. Died 1683.

WILLIAMS, SAMUEL, an English engraver on wood. Died 1853, aged 65.

WILLIAMS, WILLIAM, a signer of the declaration of independence, was born at Lebanon, Connecticut, 1731. He was originally educated for the church, but becoming early interested in the revolutionary cause, devoted himself to its interests. He was elected a delegate from Maryland to the continental Congress. Died 1811.

WILLIAMSON, HUGH, an American physician, was born in Pennsylvania, in 1735, and received his education at the college of Philadelphia; but relinquished the clerical profession, for which he had been intended, and turned his attention first to mathematics, and subsequently to medicine. After visiting Edinburgh and Leyden, at which latter university he obtained the degree of M.D., he returned and practised in Philadelphia. He was one of the committee appointed by the American Philosophical Society, 1769, to observe the transit of Venus over the solar disc; and he attracted considerable attention by his observations on the remarkable comet which then made its appearance, as he came to the conclusion that comets, instead of being ignited masses, are inhabited planets. He was appointed to the medical staff of the revolutionary army; and at the restoration of peace, he became a member of Congress. Among his chief works are, 'The History of North Carolina,' 2 vols.; and 'Observations on the Climate of America.' Died 1819.

WILLIAMSON, SIR JOSEPH, a statesman and collector of manuscripts, born at Cumberland, where his father was a clergyman, about 1630. He began his public career as clerk of the council after the restoration; and became principal secretary of state in 1674. Died 1701.

WILLIS, FRANCIS, a celebrated physician, distinguished for his skill in the treatment of mental disorders, was a native of Lincolnshire, and received his education in Brazenose College, Oxford, of which he became a fellow. He took the degree of M.A. in 1740, entered into holy orders, and obtained the living of St. John's, Wapping. He then studied medi-

cine, and, devoting his attention to maniacal diseases, established a private asylum for lunatics at Greatford, in Lincolnshire. The anomaly of a clergyman keeping a madhouse being sharply animadverted upon by the faculty, he proceeded to take his degrees, and properly qualified himself as a physician. When George III. was seized with the malady which for a time suspended the royal functions, Dr. Willis was called in, and, in opposition to the other physicians, pronounced it as his decided opinion, that his majesty would recover. The doctor was, in consequence, intrusted with the principal care of the royal person; and the result confirmed the accuracy of his judgment. His success was rewarded with a handsome gratuity from parliament, and a vast accession of professional practice very naturally flowed in upon him. He died in 1807.

WILLIS, THOMAS, a distinguished English anatomist and physician, born at Great Bodwin, in Wiltshire, in 1622, and died at London in 1675, in the fifty-fourth year of his age. Willis belonged to the sect of Iatro-chemists, who resolved all the motions of the human body, in health and disease, into the chemical action and reaction of the solids and fluids of which it is composed. He was deeply involved in the controversies of his age, but the work by which his name is known to posterity is that on the Anatomy of the Brain and Nerves, *Cerebri Anatome, cui accessit Nervorum descriptio et Usus*, which was published at London in 1664. Some of the opinions contained in this book are remarkable, as being anticipations of the ideas on the functions of the brain long afterwards propounded by Gall, for he not only maintained that the cerebrum is the seat of the intellectual faculties, and the cerebellum of the involuntary movements, but that each part of the brain has its own separate functions. Another treatise on the soul of brutes, *De Anima Brutorum*, published in 1672, involved him in irritating disputes with theologians of the time, which are thought to have shortened his days. [J.M.C.]

WILLOUGHBY, SIR HUGH, commander in a voyage of discovery which sailed from London in 1553, at the instance of a company of merchants directed by Sebastian Cabot. The expedition, consisting of three vessels, was last heard of off Finmark, on the 30th July in that year, soon after which all must have perished.

WILLOUGHBY, FRANCIS, a famous naturalist and friend of Ray, who arranged and published his MSS. on ichthyology, 1635-1672.

WILLYMOT, W., an English clergyman, schoolmaster, and classical editor, died 1737.

WILMOT, JOHN. See ROCHESTER.

WILMOT, JOHN EARDLEY, chief justice of the Common Pleas, was born at Derby in 1709, and died 1792. He wrote 'Notes of Opinions,' which were published by his son in 1802. The latter, same names as his father, was born at Derby in 1748, and attained great eminence as a chancery lawyer. He died in 1815.

WILSON, ALEXANDER, a celebrated ornithologist, was born in Paisley, in 1766. He died in 1813. His father was a man in poor circumstances, and Wilson himself was brought up to the trade of a weaver. His education was well attended to in early life, and he was possessed of an ardent poetic temperament of mind, accompanied with a strong predilection for the beauties of nature. He became disgusted with the drudgery of the loom; gave free vent to his poetical disposition, and for nearly three years he wandered all over the country as a peddler, selling muslins and poems. Both poetry and ped-

[Alexander Wilson.]

dlery, however, turned out failures in his hands, and an unfortunate dispute between the journeymen and master weavers, in which he took an active part, rendering his residence in his native country extremely unpleasant to him, he emigrated to America. He arrived in that country in 1794, and for eight years he supported himself by weaving or perambulating the country with his pack, occasionally surveying land for the farmers, and latterly by teaching. In 1802 he was offered an engagement in a seminary at Kingessing on the Schuylkill, whither he immediately removed, and which fortunately procured him the patronage of some kind and influential friends. Amongst these was Mr. Lawson the engraver, who taught him drawing, coloring, and etching. Previous to his coming to America he had never shown any taste for ornithology; but his application now to drawing seemed to develop his latent talent. His first attempts were not successful, but as soon as he commenced the delineation of birds he made rapid progress. His success seems to have first suggested the idea of his American Ornithology. To accomplish this work he undertook many journeys through various parts of America, sleeping for weeks in the wilderness alone with his gun and his pistols in his bosom, performing solitary voyages on the great rivers in a frail canoe, and collecting all the birds of the districts through which he travelled. He drew, etched, and colored all the plates himself, and after many delays and disappointments, he at last procured a publisher, and produced a first volume of his celebrated work. It far exceeded the expectations of the public, and eight volumes successively made their appearance and procured him great and deserved reputation. Before he could finish his great undertakings, he was seized with a sudden and severe illness, and died at the age of forty-eight. Wilson's great wish was, to use his own words, 'to raise some beacon to show that such a man had lived;' and though his death was premature, he lived long enough to accomplish the object of his ambition.

[W. B.]

WILSON, ARTHUR, an English historian, who was secretary to Robert, earl of Essex, and steward to the earl of Warwick, 1596-1652.

WILSON, FLORENCE, a Latin scholar and professor of philosophy, born at Elgin in Scotland, about the beginning of the 16th century, died in Dauphny, on his way home from Navarre, 1547. The work by which he is known is a dialogue entitled 'De Tranquillitate Animi.'

WILSON, H., an English navigator, died 1810.

WILSON, JAMES, a navigator, who discovered the islands called Duff's group in 1796.

WILSON, JAMES, one of the signers of the American declaration of independence, was born in Scotland, 1742. Came to Philadelphia in 1766, and studied law, which he afterwards practised there. He was member of the convention which framed the United States constitution, and chairman of the committee which reported it. In 1789 he was appointed a judge of the Supreme Court of the United States. He died in 1798. He was the author of various legal works and a course of published lectures which he delivered as professor of law in the University of Pennsylvania.

WILSON, JAMES P., an American presbyterian divine and religious writer. He was settled in Philadelphia and died 1830.

WILSON, JOHN, a composer of sacred music, born at Faversham in Kent, 1594, died 1673.

WILSON, JOHN, a Scotch vocalist, who attained great popularity by his manner of singing the beautiful lyrics of his native land. Born 1800, died at Quebec in 1849, while on a professional visit to America.

WILSON, JOHN, better known for many years of his life by the sobriquet of Christopher North, was born in the town of Paisley in 1785, or, as some accounts say, in 1788. His father was an eminent merchant there, and the paternal mansion in the High-Street of that ancient borough, still attests the wealth and dignity of the family by its stately urban magnificence. Wilson received the elements of his education, we believe, with the late Mr. Peddie of Paisley, and afterwards under the superintendence of the parish minister of Mearns; at the age of thirteen

[Professor Wilson.]

he entered the university of Glasgow, and afterwards that of Oxford, in Magdalen College. From the latter source he doubtless imbibed that familiar acquaintance with, and rich appreciation of the classic writers, which, in happy union with his other qualities, constituted him one of the most eminent writers and literary men of his day. The first poem he ever published obtained the Newdegate prize in his venerable Alma Mater. For some years afterwards he lived at his beautiful retreat of Elloray, on Winder-

mere, when, as a matter of course, he became intimate with Coleridge, Southey, and Wordsworth, the leading apostles of what was then called the Lake School of poetry; and the dreamy sweetness of whose style of composition tended to dilute and weaken the simplicity and vigor of his own. Pecuniary causes obliging him to leave Elloray, he joined his mother in Edinburgh, who was a woman of a high order of intellect, qualified to be the monitor and helper of so erratic a spirit. Here he began to study the law for the profession of a barrister, but never actually assumed the professional toga. In 1812 appeared the *Isle of Palms*, and soon afterwards the *City of the Plague*, and *Unimore*, the principal contributions of his fanciful and capricious muse. There is a soft, liquid flow of musical expression in these poems, with a vague, dreamy wildness and pathos, in combination with an exuberant fancy; and in the *City of the Plague* an irregular vigor and richness of imagination, resembling the *outré grandeur* of some of our old English dramatists. It is as a prose writer, however, that Wilson takes rank among the literary Titans of his native land. His novels are not much read now, being over-informed with sentiment, and the characters pitched far above the average of Scottish rural and urban nature. The *Trials of Margaret Lindsay* and the *Foresters* are, however, exquisite specimens of composition as poetic prose. In 1820 he succeeded the celebrated Dr. Brown as professor of moral philosophy in the university of Edinburgh, an appointment severely and justly commented upon at the time; and if we take Dr. Chalmers as an authority, whose dictum it was, that moral philosophy was the gate to theology, it reflected as little credit upon those who appointed, as upon him who accepted. At the same time began, and certainly oddly enough, his connection with *Blackwood's Magazine*, where appeared that famous series of political and literary pieces, which set all Edinburgh in a flame, so well known as the *Noctes Ambrosianæ*. Wilson was always considered as the presiding *genius loci*, and amongst his associates were John Gibson Lockhart and the Ettrick Shepherd, the latter chiefly as a butt. Rich in broad, coarse humor, and violating, not seldom, the conventional courtesies and even decencies of political and personal intercourse, their irresistible waggery, and biting sarcasm, raised the Edinburgh periodical to the high station it has always maintained. The genius of Wilson arose out of the rich overflow and exuberance of his animal spirits, themselves the result of a finely developed physical constitution, in fact, of a *physique* the most imposing and attractive that perhaps ever son of song was gifted with. We believe that the stories of the excesses of his youth and manhood were much exaggerated, as his fertile fancy and rich classical resources, with his irresistible tendency towards the ridiculous, would elevate him by their intense exercise, into a condition very like *ebrius*, if not *ebriosus*. In 1851, he resigned the situation of professor of moral philosophy in the university of Edinburgh; having been struck with paralysis, and expired on the 4th of April, 1854. With great propriety a Whig government granted him a pension of £300 a-year, and having lived down in himself, and in the minds of many others, the political acerbities of his youth and manhood, this eminent Scotsman has passed away, to occupy no mean niche in the Scottish Temple of Fame. [T.D.]

WILSON, MATTHEW, an American physician and medical writer, born in Pennsylvania, 1729, died 1790.

WILSON, PETER, classical professor in Columbia College, N. Y., and author of a Greek prosody; born in Scotland. Died 1826.

WILSON, RICHARD, R.A. This great landscape painter was born at Pinegas, Montgomeryshire, and showing an early taste for drawing, was taken to London by Sir George Wynne, and placed with a portrait painter of the name of Wright. Wilson himself commenced his career as a portrait painter, and took to landscape first in Italy in 1749, by the advice of Zuccarelli and Vernet. Wilson returned to London in 1755, after an absence of six years, and acquired a great name in 1760 by his picture of 'Niobe.' He was one of the original thirty-six members of the Royal Academy, and succeeded Hayman as librarian in 1776. Towards the close of his life he came into the possession of some property from a deceased brother, and he retired to the village of Llanverris, where he died in 1782. Wilson, admirable as his pictures are, was not successful, some of his works sold better than others, and these he accordingly frequently repeated, but generally with some slight difference. The figures of his pictures were frequently inserted by Mortimer and Hayman; his principal works are views in Italy; many of them have been admirably engraved by Woollet. (T. Wright, *Some Account of the Life of Richard Wilson, R.A.* London, 1824.) [R.N.W.]

WILSON, SIR ROBERT, a distinguished general officer, who played also a conspicuous part in the party politics of his time, was born in London, 1777. Educated at Westminster and Winchester, he went into a solicitor's office, with a view to qualify himself for the law; but an accidental introduction to the Duke of York induced him to exchange the desk for the field, and in 1793 he went to Flanders as a volunteer, and bore a distinguished part in all the cavalry actions of that campaign. During the rebellion in Ireland he served on the staff; in 1709 he made the campaign in Holland, and the following year he took part in Abercrombie's expedition to Egypt. He afterwards published an account of this expedition, which derived especial popularity from its charges of cruelty against Buonaparte towards the prisoners of Jaffa. In 1805 he accompanied Sir D. Baird to the Brazils, and was present at the capture of the Cape of Good Hope. On his return he accompanied Lord Hutchinson to the Continent on a secret mission. He was attached to the combined armies, and present in all the operations, battles, and actions, from Pultusk to Friedland. We next find this active officer in Lisbon, where, in 1808, he superintended the levy of the Portuguese refugees; and he subsequently commanded a legion in Spain, and wound up a career of great gallantry and peril in the Peninsula by a successful engagement with the French at Bamos. His reputation for courage and ability was still further increased by the German and Russian campaigns of 1812, 1813, and 1814; and the emperor Alexander testified his admiration of his exploits by hanging the cross of St. George round his neck in the presence of the assembled army. After the peace in 1815 he visited Paris, where he drew upon himself great notoriety by aiding in the escape of Lavalette. In consequence of this act he increased the displeasure of the prince regent, and his conduct at the funeral of queen Caroline having completed his disgrace at headquarters, he was dismissed from the army in 1821, and all the foreign orders he had received were resumed by their respective sovereigns. But a public subscription was made to indemnify him, and after the lapse of a few years he was restored to his

rank. Sir R. Wilson sat from 1818 to 1831 in parliament for Southwark; in 1841 he attained the full rank of general, and in 1842 he was appointed governor of Gibraltar, and had just returned from that post after seven years of command, when he died suddenly, May 9, 1849.

WILSON, THOMAS, bishop of Sodor and Man, greatly distinguished for his pious and exemplary conduct, was born in Chester 1663, and educated at Dublin. He was appointed to his bishopric in 1697, and refused to leave his people when preferment was offered to him. He wrote a 'History of the Isle of Man' and some religious works, but is chiefly distinguished for his acts of practical benevolence; died in 1755.—His only son, of the same name, born in 1703, was rector of St. Stephens, Walbrook, for forty-six years. He rendered himself remarkable by his devoted admiration of the historian, Mrs. Macaulay, to whom he erected a statue in his church under the name of 'Liberty.' He wrote several works, among which are 'The Ornaments of Churches Considered,' 'A View of the Projected Improvements in Westminster,' and a pamphlet against distilled liquors. Died 1784.

WILSON, SIR THOMAS, a statesman and learned writer, age of Elizabeth, died 1581.

WILSON, WILLIAM RAE, LL.D., chiefly known by his 'Travels in the Holy Land,' was born in 1774. At an early age he became acquainted with the late Duke of Kent, who remained his steady patron through life, and who furnished him with every species of recommendation likely to facilitate his travels in the East. He was one of the first of a class of travellers, since become numerous, whose object has been to illustrate the statements of holy writ by observations on the scenery and manners of those parts of the world in which its events transpired. In all his works he preserved a religious tone of sentiment, with a strong bias against the Roman Catholic Church; but, on the whole, his writings display an unusual freedom from false coloring and affectation. Died June 2, 1849.

WILSON, JOSEPH, a sculptor, 1722–1803.

WILTZ, P., a French ascetic, 1671–1749.

WIMPFEN, FELIX DE, a French officer and member of the estates-general, born 1745, pensioned by the first consul in 1799, died in the employ of the state 1814. His brother, the BARON DE WIMPFEN BORNEBOURG, a general and writer on tactics, 1732–1800.

WINCHESTER, ELHANAN, an American divine, founder of a sect, the Winchesterians, who held the doctrine of universal salvation, was born in Philadelphia; died about 1794. He was the author of various sectarian works, and of 'Christ,' an heroic poem.

WINCHESTER, SAMUEL G., an American presbyterian divine, born in Maryland, settled in Natchez, author of the 'Theatre.' Died 1842, aged 39.

WINCHESTER, T., rector of Appleton, in Berkshire, and a learned writer, known 1749–1773.

WINKELMANN, JOHN, a German protestant theologian, 1551–1626. His son, JOHN JUSTUS, an historian, born at Gnessen 1620, died 1697.

WINKELRIED, ARNOLD DE, a Swiss peasant, who died gloriously fighting against the Austrians at Sempach, 1386.

WINKLEMANN, JOHN JOACHIM, a celebrated name in æsthetical and art literature, was born in the duchy of Brandenburg 1718. He devoted himself to the studies of antiquities at Rome, where he obtained an appointment in the Vatican, and was murdered at Trieste on his way homewards for the

sake of some golden medals he possessed, in 1768. His works on the history of art and ancient monuments have exercised the happiest influence on that description of literature, and are still invaluable as mines of information.

WINCKLER, T. F., an archæologist, 1771–1807.

WINDER, HENRY, a learned pastor of the non-conformists, author of a 'Hebrew English Concordance,' and other works, 1693–1752.

WINDER, WM. H., an American lawyer of distinction and a revolutionary officer, was born in Maryland 1775. He commanded the troops at the battle of Bladensburg in the war with Great Britain, in 1812. Died 1824.

WINDHAM, JOSEPH, an artist and antiquarian, principal author of the 'Ionian Antiquities,' published by the Society of Dilettanti, 1739–1810.

[William Windham.]

WINDHAM, WILLIAM, a Whig statesman of the period of Pitt, was born in Norfolk, of an ancient family, in 1750, and made his first appearance in parliament as member for Norwich in 1783. His talents caused him to be singled out by Burke as one of his coadjutors, and he always remained his constant friend and partisan. From 1794 to 1801 he was in office under Pitt as secretary at war. He became secretary again under Lord Grenville after the death of Pitt, and held office from 1806 to March 25, 1807; died 1810.

WINDHEIM, C. E., a German professor of philosophy and the Oriental languages, 1722–1766.

WINDISCH, C. G., a Germ. historian, 1725–93.

WING, VINCENT, an astronomer, 17th century.

WINGATE, EDMUND, an eminent mathematician, lawyer, and member of parliament, 1593–1656.

WINKELMANN. See WINCKELMANN.

WINKLER, J. H., a German jurisconsult and philosopher of the school of Wolfe, 1703–1772.

WINSLOW, EDWARD, the English governor of Plymouth, in North America, author of 'Good News from New England,' died 1655.

WINSLOW, JAMES, an eminent anatomist, born in the island of Funen, in Denmark, in the year 1669, and died at Paris in the year 1760, in the ninety-first year of his age. His system of anatomy was long the standard class-book of the schools, but in modern times it has been superseded by more perfect and more recent works. [J.M.C.]

WINSOR, FREDERIC ALBERT, an enterprising projector, to whom the public is indebted for the beautiful gas lights which now illuminate our streets, &c.; made his first public experiments at the Lyceum, in the Strand, in 1803. He afterwards lighted with gas the walls of Carlton Palace Gardens, on the king's birthday in 1807; and, during 1809 and 1810, he lighted one side of Pall Mall,

from the house which he then occupied in that street. He followed up his object with great perseverance, and at length obtained a charter of incorporation for a gas-light and coke company. In consequence, however, of some misunderstanding with the parties with whom he was associated he did not obtain his expected remuneration. In 1815 he went to Paris where he also erected gas-works, and established a company. Died 1830.

WINSTANLEY, WM., originally a barber, author of several literary compilations, died about 1690.

WINSTON, T., an Eng. physician, 1575-1655.

WINTER, G. S., a German veterinarian, 17th ct.

WINTER, JOHN WILLIAM DE, a Dutch admiral, was born in 1750. Having been an active partisan in the revolution which broke out in 1787, he was obliged to take refuge in France, when the party of the stadtholder prevailed. In France he entered the army, served under Dumouriez and Pichegru, and in a short time rose to the rank of general of brigade. In 1795, when Pichegru invaded Holland, De Winter returned to his country, where the states-general made him vice-admiral and commander of the naval forces at Texel. Here, with 29 vessels, of which 16 were ships of the line, he was completely defeated by Duncan, October 7, 1797. Died 1812.

WINTER, N. S. VAN, a Dutch poet, born at Amsterdam, 1718. His wife, LUCRETIA WILHELMINA, a poetess, 1722-1795. PETER, son of Van Winter by a first marriage, author of poems and translations, beginning of the present century.

WINTER, P. VON, a Ger. musician, 1754-1825.

WINTHROP, JOHN, first governor of Massachusetts, was born at Groton, England, 1587. He came with the first colonists to Salem in 1630 as their governor, and remained in that office, with the exception of six or seven years, until his death, in 1649. He left a journal of the proceedings of the colony, which has been published, and is a valuable contribution to the early history of Massachusetts. His son, JOHN, was born in England, and arrived in Massachusetts 1633. On returning to England he collected a body of colonists and settled with them in Saybrook, Connecticut, and was appointed their governor, retaining the office until his death, in 1676. He was devoted to scientific pursuits, and had the honor of being one of the founders of the Royal Society of London.

WINTHROP, J., an American astronomer, 1714-1779. His son, JAMES, was a judge of Massachusetts, and a scientific writer of some merit; died 1821.

WINTLE, T., a learned divine, 1737-1814.

WINTRINGHAM, CLIFTON, a physician and professional writer, died at York 1748. His son, SIR CLIFTON, also a physician and writer, 1714-94.

WINWOOD, SIR RALPH, a statesman and diplomatist, author of 'Memorials,' 1565-1617.

WIRSUNG, C., a German physician, 1500-1571. JOHN GEORGE, an anatomist, assassinated 1643.

WIRT, WM., an American lawyer of eminence and miscellaneous writer, was born in Bladensburg, Maryland, 1772. He settled and practised law in Virginia, where he was made chancellor and district attorney. His defence of Blennerhasset, in the famous trial of Aaron Burr for treason, won for him a great reputation for fervid eloquence. He was the author of the 'Old Bachelor,' and a 'Life of Patrick Henry,' &c. Died 1835.

WIRTZ, J., a Swiss painter, 1640-1709.

WIRTZ, J. C., a Swiss theologian, 1688-1769.

WISE, F., a learned antiquary, 1695-1762.

WISE, JOHN, a New England divine and religious writer, was born at Ipswich, Mass.; died 1725.

WISEMAN, R., a surgical writer, 17th century.

WISHART, GEORGE, a Scotch protestant martyr, was born at the commencement of the 16th century. He embraced the Protestant faith while travelling in Germany, and resided for some years at Cambridge, where he taught at Bene't College. In 1544 he returned to his native land, and exerted himself zealously in preaching the doctrines of the Reformation; for which, in 1546, he was condemned to the flames.

WISHART, W., a Scotch divine, 1657-1727.

WISHEART, GEORGE, chaplain to Montrose, period of the civil wars, author of an 'Account of the Wars in Scotland,' and a Biography of his patron, 1609-1671.

WISTAR, CASPAR, a professor of anatomy and physician at Philadelphia, author of professional works, and a 'System of Anatomy,' 1760-1818.

WITCHELL, G., an astronomer, 1728-1785.

WITEZOWITCH, P., a learned historian and antiquarian of Dalmatia, died 1773.

WITHER, GEORGE, a poet, whose works have lately been brought into repute by Sir Egerton Brydges and others, was born in 1588, at Bentworth, in Hampshire, and was educated at Magdalen College, Oxford. In 1613 he was committed to prison for his satires, called 'Abuses Stript and Whipt.' In the civil war he espoused the popular cause, and rose to the rank of major-general; but having published a piece, called 'Vox Vulgi,' he was again incarcerated after the Restoration. Died 1667.

WITHERING, WILLIAM, a physician and naturalist, author of a 'Systematic Arrangement of British Plants,' born in Shropshire 1741, died 1799.

WITHERSPOON, JOHN, a descendant of Knox, known as a divine in Scotland and America, a signer of the declaration of independence, born near Edinburgh 1722, died 1794.

WITSIUS, or WITS, HERMAN, a Dutch divine, author of several learned works, 1636-1708.

WITT. See DE WITT.

WITTE, E., a Dutch painter, 1607-1692.

WITTE, G. DE, a Flem. theologian, 1638-1721.

WITTE, or WITTEN, HENNING, a German divine and biographical writer, 1634-1696.

WITTICHIUS, CHRISTOPHER, a protestant theologian and writer against Spinoza, 1625-1687.

WITTOLA, M. A., a Ger. theologian, 1736-97.

WITTWER, P. L., a Ger. physician, 1752-92.

WLOOSWICK, P. N. BARON HORN VAN, a Dutch archæologist, born 1742, died in Paris 1809.

WOBESER, E. W., a German poet, 1727-1795.

WODHULL, M., a poet and translator of Euripides, born in Northamptonshire 1740, died 1816.

WODROW, ROBERT, a Scottish ecclesiastical historian, born at Glasgow 1679, died 1734.

WOEHNER, A. G., a German Orientalist, 1693-1762.

WOELFT, J., a German composer, 1772-1811.

WOFFINGTON, MARGARET, a celebrated actress of last century, whose society was highly valued by the *élite* of talent and fashion, 1718-60.

WOIDE, C. G., a Dutch Orientalist, 1725-90.

WOKEN, F., a German theologian, 1685-1734.

WOLCOTT, JOHN, commonly known by his assumed name of *Peter Pindar*, was a satirical poet and humorist, born at Dodbrooke in Devonshire 1738; died in London, where he supported himself by his pen, and his skill as an artist, 1819. The painter Opie was indebted to him for his introduc-

tion to the busy world of London, Dr. Wolcott having discovered his genius during his residence at Truro. The chief of his productions is his 'Lyric Odes to the Royal Academicians:' his other poems are principally satires.

WOLCOTT, OLIVER, Governor of Connecticut in 1796, and signer of American declaration of independence, was born in that state 1727. He studied medicine, but never practised the profession. During the colonial French war, he served as a captain. He was a delegate to the congress of 1776, and continued a member for nine years. In 1785 he was chosen deputy-governor of Connecticut, and in 1796 governor. Died 1797.

WOLCOTT, OLIVER, son of Oliver Wolcott, the signer of the declaration of American independence, was secretary of the treasury under Washington, and subsequently governor of Connecticut. Died 1833, aged 74.

WOLCOTT, ROGER, Governor of Connecticut from 1751 to 1754, was born at Windsor, Conn., 1679. He distinguished himself in the colonial expedition against the French in Canada in 1711. Died 1767. He was the author of various poetical effusions, among which was a history in verse of the Pequot war.

WOLDECK D'ARNEBOURG, J. G., a Prussian general of the seven years' war, 1712-1785.

WOLF, B., a Dutch painter, 1758-1825.

WOLF, E. W., a German composer, 1735-1792.

WOLF, FREDERICK AUGUSTUS, an eminent classical scholar and philologist of Germany, was born in the county of Hohenstein in 1759, and became professor at Halle and Berlin. He was engaged in a literary contest with Heyne, arising out of his principal work, the 'Prolegomena ad Homerum,' or theory of the Homeric poems. Died 1824.

WOLF, G. F., a German anatomist, 1735-1794.

WOLF, JEROME, a learned German, professor of Greek at Augsburg, 1516-1581.

WOLF, JOHN, a German historian, 1537-1600.

WOLF, JOHN CHRISTOPHER, an eminent Lutheran divine and philologist, 1683-1739. His brother, J. CHRISTIAN, a philologist, 1689-1770.

WOLF, JOHN CHRISTIAN, born at Breslau in 1679, died at Halle in 1754; a man of considerable energy and of varied attainments—honored to become member of the Academy of Berlin, the Royal Society of London, and the Academies of Sciences at Paris and Petersburg. Wolf, nevertheless, was of the class who flourish only when great men are gone: his industry was unquestionable, for he filled Europe with his words and books: his function too was respectable; he dried, cut up, and sold the Philosophy of Leibnitz. The volumes published by him are most numerous; their simple titles would occupy a column of our Dictionary:—it is unnecessary to print these titles, for none save Antiquarians will henceforth read Wolf. He was powerful in classification, subdivision, and nomenclature; to him, for instance, we owe the technical term *Rational Psychology*, as distinguished from experimental: he thus designated his efforts—sufficiently unsatisfactory—to explain the facts of consciousness by the essence of the Soul. Wolf's greatest merit flows from his moral courage. He bravely contended for the rights of Free Thought, in the face of immense clamor and much persecution.—His system and authority were hopelessly destroyed by KANT.

[J.P.N.]

WOLF, PETER PHILIP, an historian of the Jesuits and of Maximilian I., 1761-1808.

WOLFART, P., a Germ. physician, 1675-1726.

WOLFE, CHARLES, an Irish divine and a poet of great promise, was born in 1791, at Dublin; was educated at High Abbey School, Winchester, and at Trinity College, Dublin; obtained the curacy of Ballyclog, which he exchanged for that of Castle Caulfield; and died, of consumption, in 1823. Among other pieces possessing very considerable merit, he wrote the well-known 'Ode on the Death of Sir John Moore,' commencing, 'Not a drum was heard:' which acquired much posthumous celebrity, and was pronounced by Lord Byron, 'the most perfect ode in the language.'

[General Wolfe.]

WOLFE. GENERAL JAMES WOLFE was born in Westerham in Kent, A.D. 1726. His father was a general, and young Wolfe entered the army at a very early age. He was honorably distinguished in the battle of Dettingen and Fontenoy; and at the subsequent battle of Laffeldt in 1747, he attracted the special notice of his commander, the duke of Cumberland, who ever afterwards zealously aided in Wolfe's promotion and advancement. He was not more eminent for personal bravery and coolness in action, than for his success in disciplining his men, while at the same time he won the heart of every soldier that served under him. When that great minister, the elder Pitt, undertook in 1757 to raise England from the temporary degradation into which she had then fallen, and to smite down the House of Bourbon in every quarter of the globe, he discerned the genius of Wolfe: and wisely disregarding the conventional claims of seniority, Pitt intrusted to the young officer the highest duties in the conquest of French America. Wolfe, in conjunction with Amherst, led the force which besieged and captured Louisburg in July, 1758, an achievement which gave England Cape Breton and Prince Edward's Island. In 1759 Pitt conferred on Wolfe the still more important command of the expedition against Canada, which was to advance up the St. Lawrence and attack Quebec from the west, while the other British commander in North America was to co-operate by assailing the French possessions from the opposite direction. Wolfe reached the Isle of Orleans in the St. Lawrence on the 26th June, with a force of 8,000 excellent troops, and with a fleet of twenty-two sail of the line under Admiral Saunders. Montcalm, the French governor of Canada, had concentrated all the military strength of the province in Quebec; and, though he was inferior to Wolfe in the number of regular troops, the zeal of the numerous French provincials who fought under him, the strength of his position, and the skill with which he

fortified and watched each approach to Quebec, made Wolfe's enterprise appear almost hopeless. The English commander who invaded Canada from the other direction, and who ought to have invested Quebec from the upper side, loitered on his march; and for two months Wolfe and his force lay below the city, unable to strike any effective blow, and taught by a severe repulse which they sustained on the 31st of July, with how strong and vigilant an adversary they had to cope. Wolfe's health was shattered by anxiety and fever; but he spared neither mind nor body; and at length he himself discovered the cove above the town, which now bears his name, and the narrow winding path that leads from it up the cliff to the heights of Abraham, a plateau to the west of Quebec, where the city's fortifications were feeblest. He succeeded in the

[Wolfe's Monument.]

night of the 12th September, in leading 5,000 of his men up this path, and in surprising the post of Canadians by whom the summit was guarded. On the next morning Montcalm led his troops out to meet him, and the battle was fought, which determined the ascendancy of the Anglo-Saxon race and language over the French in the New World. Both Wolfe and Montcalm fell. Wolfe was twice struck as he led on a bayonet charge which decided the day; and when the French were already broken, he received a third bullet, which was fatal, in the heart. He lived just long enough to know that the victory was complete; and the last words of the young conqueror were—'Now, God be praised, I die happy.' Wolfe was as exemplary in private life, as he was eminent in the discharge of public duty, and his name is one of the purest as well as the brightest in the long list of England's military heroes.

[E.S.C.]

**WOLFERSDORF, CH. FREDERICK VON**, a Prussian general, born in Saxe Gotha, 1717–1781.

**WOLTER, P.**, a German historian, 1758–1805.

**WOLGMUTT, M.**, a German painter, 1434–1519.

**WOLKE, C. H.**, a native of Hanover, distinguished by his efforts, as a writer and founder, in the cause of education, 1741–1825.

**WOLLASTON, WILLIAM**, an eminent moralist and theologian, who was educated for the church, but having ample means left him by a rich relation, devoted himself to literature. His principal work, and one which has been highly popular, is 'The Religion of Nature Delineated.' Born in Staffordshire 1659, died 1724.

**WOLLASTON, WILLIAM HYDE, M.D.**, born 6th August, 1766, at East Dereham, near Norwich, of which his father was clergyman; died 22d December, 1828, in London. Dr. Wollaston received a first-rate education, and having studied for the medical profession, settled first at Bury St. Edmunds. Afterwards, becoming a candidate for St. George's Hospital, London, and failing, he gave up the profession in disgust, and devoted himself to chemical pursuits. He examined with great care the crude platinum ore, discovering in it two new metals, palladium and rhodium, and improving the process for the manufacture of platinum, so as to enable him to realize a handsome fortune. In 1797 he described three new species of urinary calculi—the fusible calculus, the mulberry calculus, and the bone-earth calculus. He also first described cystic oxide, and urate of soda calculi, the latter formed in the joints of gouty persons. He was the inventor of the periscopic camera, and of numerous ingenious optical and chemical apparatus. To him chemistry is indebted for the methods at present employed for the estimation of ammonia, potash, and magnesia. Dr. Wollaston was a man of retiring habits, but by those who knew him intimately he was held in high regard. He has been accused of a penurious disposition. The fact that he presented his brother with £10,000 when asked to apply to the ministry in his behalf, seems to afford opposite evidence of the most substantial and overwhelming description. [R.D.T.]

**WOLLE, C.**, a German Orientalist, 1700–1761.

**WOLMAR, M.**, a Swiss jurist, 1497–1561.

**WOLSEY, THOMAS**, so well known in history as Cardinal Wolsey, is generally said to have been born at Ipswich, in the year 1471. His parents were so obscure, that whether or not his father followed the occupation of a butcher, attributed to him by the cardinal's enemies, has not been ascertained. However it may have been achieved, young Wolsey obtained an excellent education, and he had a brilliant student-reputation at Magdalen College, Oxford. He never was an ascetic. Though he must have worked hard during his college career, he seems to have had his full share of the dissipation of the day, and it is known that for some peccadillo he was on one occasion subjected to the penal discipline of the stocks. His first preferment, after he had taken orders, was that of Symington in Somersetshire, believed to have been obtained through the marquis of Dorset, whose sons he instructed. The turning point in his career appears to have been his appointment as one of the chaplains of Henry VII. This introduced his abilities to the royal notice, and on his successful accomplishment of a delicate diplomatic mission to Flanders he obtained the rich deanery of Lincoln in 1508. It is not easy precisely to determine the source of the extraordinary influence which he exercised over Henry VIII. in the early years of his reign. He is said by his able scholarship to have aided in the composition of the celebrated *Assertio Septem Sacramentorum*, against Luther; but he was a favorite before he had an opportunity of performing this service. He was placed in the influential office of the king's almoner, through the recommendation of Fox, the bishop of Winchester; and that calculating prelate is said to have advanced Wolsey for the purpose of counteracting his rival Surrey. When once the impetuous Henry had learned to seek counsel of Wolsey, it is easy to believe that his magnificent notions, his scholarship, his knowledge of life, and his accommodating morality, would please such a monarch. Preferment flowed in upon him. In 1514 he was made bishop of Lincoln.

He was then in possession of lucrative livings both in England and France. In 1515 he was made cardinal, and next year legate *a latere*, a commission which made him virtually the pope in England, giving him an authority which, if more limited in extent than that claimed by the bishop of Rome, was the more powerful, since it was exercised close at hand, and by one who knew the circumstances of the clergy over whom he ruled. Almost at the same time with these preferments he received the high ministerial and judicial office of lord chancellor. With his cardinalate he received the honor of the hat, usually conferred only on members of royal families. He held the bishopric of Tournay in France, and many other lucrative preferments in different parts of Europe. The vast influence which he exercised at the powerful court of England, made his friendship an object not only to private seekers of preferment, but to the principal European powers. He aspired to the popedom at the time when Charles V. and Francis the First were competing with each other to succeed Maximilian as emperor of Germany. Hence each of them sought to secure the aid of Wolsey, by outbidding his rival in prospects of assistance towards the cardinal's great object, while he on his part had the too difficult task of making up his mind where to throw his influence, and of acting for one party with as little prejudice as possible to his influence with the other. He lost, much to his mortification, the great object which would have given him a securer foundation for power than he had in England, and he ever treated the emperor Charles V. as one who had deceived him. No churchman in England had ever achieved so vast an amount of power and wealth as Wolsey, and, unfortunately for himself, he was fond of exhibiting it to all the world. He had a weakness for display, shown in the common anecdote about his having his portrait always taken in profile from one side, because the other was disfigured by a wart. The huge acquisitions made by fortunate prelates, and the ramifications of their influence by possessions all over Europe, were giving great alarm to thinking minds;

[Leicester Abbey.]

and there is no doubt that the ostentation with which Wolsey displayed the offensive innovation hastened on the reformation. He had even given an impulse in the same direction by his enlightened projects for diverting some of the monastic property from its existing uses to the university of Oxford, and to other educational institutions. His qualities and defects are told with matchless truth and beauty in the words supplied by Shakspeare to his faithful followers:—

‘He was a scholar, and a ripe and good one;  
Exceeding wise, fair spoken and persuaading;

Lofty and sour to them that loved him not,  
But to those men that sought him, sweet as summer.  
And though he was unsatisfied in getting.  
(Which was a sin), yet in bestowing, madam,  
He was most princely.’

His enmity to the emperor inclined him to sanction his sister's divorce from Henry, but as a high churchman he found it impossible to be the king's champion through the whole transaction. To justify his overthrow, charges were brought against him under the *præmunire* statute against enforcing bulls from Rome. The charge was one which with the royal favor he might have met, but when it was directed from that quarter it was irresistible. After being subjected to some capricious oscillations of favor, a warrant was issued to apprehend him for high treason. Attacked by sickness, he sought refuge in the abbey of Leicester with the mournful saying,—‘Father abbot, I am come to lay my bones among you.’ He died there on the 28th November, 1530. [J.H.B.]

WOLSTONCROFT, MARY, wife of William Godwin, author of the ‘Rights of Women,’ 1759–1797.

WOLTMANN, C. L. DE, a German historian and man of letters, 1770–1817.

WOLZOGEN, J. L., a Socinian wr., 1596–1658.

WOLZOGEN, L. VAN, a learned Dutch theologian and elocutionist, 1632–1690.

WOMOCK, LAURENCE, bishop of St. David's, and a controversial writer, 1612–1685.

WOOD, ANTHONY, author of the ‘History and Antiquities of Oxford,’ and the ‘Athenæ Oxoniensis,’ was born in 1632, and educated at the university. His works were written with the indefatigable zeal of an enthusiast, and are often quoted. He died in his native place, where he had lived and labored, in 1695.

WOOD, JAMES, the banker and millionaire of Gloucester, was born there in 1756, and died 1836. His only distinction is that of having scraped together, by indulging in every meanness, nearly a million sterling. There is not a redeeming trait recorded of his character, and nothing could entitle him to a place in our pages, but the frequency with which the name of ‘Jemmy Wood’ is quoted by way of example.

WOOD, JAMES, governor of Virginia in 1796, and a revolutionary officer of distinction. Died 1813.

WOOD, JOHN, an American journalist and author born in Scotland, but settled in America. He published a variety of works historical and scientific.

WOOD, alderman, SIR MATTHEW, bart., M.P., was the son of a serge manufacturer at Tiverton, and had but a limited scholastic education, as at the early age of 11 years he was employed in his father's business, and at 14 was apprenticed to Mr. Newton of Exeter, his cousin, who carried on a very extensive business as a chemist and druggist. After serving his time, and being for a few years employed as a traveller in the drug trade, he commenced business on his own account in London, at first as a chemist, and subsequently as a hop merchant, in which latter trade he acquired a very handsome fortune. After serving some minor offices in the city, Mr. Wood was, in rotation, elevated to the mayoralty in 1815, and gave such great and universal satisfaction in that high office that he was re-elected in 1816; a departure from the ordinary course that was unprecedented during several previous centuries. During his second mayoralty he gained a still higher position in public favor, by his humane conduct in saving the lives of three poor Irishmen who were sentenced to be hanged, on the perjured testimony of three police officers, named Brock, Vaughan, and Pelham. So great was the public admiration of

Mr. Wood's conduct on this occasion, that the livery actually sent his name up a third time for the mayoralty; but the court of aldermen, deeming this too irregular, passed his name over. During his second mayoralty he was elected M.P. for London, and from that time till his death he was invariably returned, and on all occasions, save one, at the head of the poll. Of Mr. Wood's conduct as a magistrate it is not possible to speak too highly; but we can by no means give the like unqualified praise to his course as a senator, for, in his place in parliament, he displayed more obstinacy than candor, more zeal than wisdom. He gained great notoriety for the zeal with which he attached himself to the fate and fortunes of the ill-starred queen Caroline. His political course obtained him the friendship of a maiden lady, sister of the wealthy Mr. James Wood, banker, of Gloucester. At her death she bequeathed him a handsome property, and her brother subsequently left him a fourth of his vast fortune, which, independent of land, and, after being much diminished by litigation, produced the fortunate alderman nearly a quarter of a million of money. He was created a baronet during the Melbourne administration, in 1837. Died September, 25th 1843, aged 76.

WOOD, ROBERT, an Irish scholar and archæologist, author of a 'Description of the Ruins of Balbec,' and those of 'Palmyra' or 'Tadmor,' 1716-1771.

WOODBIDGE, WM. C., an American writer of elementary school books, chiefly on geography. Died 1845, aged 50.

WOODBURY, LEVI, an American statesman, was born in New Hampshire, 1790. He was educated a lawyer. In 1816 he was appointed secretary of state of New Hampshire, and the next year judge of the superior court. He was elected governor in 1832, and chosen a member of the United States Senate in 1824, where he served seven years. He was appointed secretary of the navy by General Jackson in 1831, and subsequently secretary of the treasury. At the termination of President Van Buren's administration, he left the cabinet after a long service of ten years. The legislature of New Hampshire now elected him senator of the United States, at which post he remained until appointed one of the judges of the United States supreme court, in which office he remained until his death in 1851.

WOODDESON, RICHARD, an English civilian, author of 'Elements of Jurisprudence,' and 'A Systematic View of the Laws of England,' 1745-1822.

WOODFALL, WILLIAM, a celebrated printer, whose name became famous from the prosecution to which he was exposed for printing the Letters of Junius. Died 1803.

WOODHOUSE, ROBERT, an eminent mathematician and professor at Cambridge, author of 'The Principles of Analytical Calculation,' and other works, 1773-1827.

WOODHOUSE, JAMES, an American physician and chemist, was born in Philadelphia 1770. Was surgeon in the army, and subsequently professor of chemistry in the college of Philadelphia, died 1809. He was the author of various chemical works.

WOODHOUSELIE. See TYTLER.

WOODS, LEONARD, an American congregational divine. His life is thus recorded in the inscription for his tomb written by himself. Rev. Leonard Woods, D.D. born in Princeton, Massachusetts, June 19th, 1774; graduated at Harvard College, 1796; ordained as minister of the Gospel, at West Newbury, in 1798; inaugurated as Abbott Professor of Christian Theology, in 1808; resigned his office in 1846, died 1854. For some time previous to his

death, he had been employed in a History of the Theological Seminary in Andover, and had nearly completed the work when he was called from earth. He left directions that the manuscripts and documents pertaining to it should pass into the hands of his son, Leonard Woods, D.D., of Brunswick, Me., to be published according to the plan laid out, and nearly finished.

WOODVILLE. See ELIZABETH.

WOODVILLE, ANTHONY, otherwise WYDEVILLE, brother of Elizabeth, queen of Edward IV., and created by him Earl Rivers, was born in 1442. He made an unsuccessful attempt to crown the king's son, and was sent to the scaffold 1483.

WOODVILLE, WILLIAM, physician to the Middlesex Dispensary and Small-pox Hospital in London, author of 'Medical Botany,' and a 'History of Inoculation,' 1752-1805.

WOODWARD, HENRY, a famous comedian, dramatic writer, and composer in pantomimes, born in London 1717, died 1777.

WOODWARD, JOHN, a physician and professor at Gresham College, distinguished as a naturalist and antiquarian, was born in Derbyshire 1665, and died 1728. His principal work is an 'Essay towards a Natural History of the Earth.'

WOODWORTH, SAMUEL, an American poet, author of "New Haven," "the Oaken Bucket," and other effusions. Died at New York 1842, aged 57.

WOOLER, THOS. JONATHAN, an English political writer. Died 1853, aged 68.

WOOLLETT, WILLIAM, was born at Maidstone in Kent in 1735, and learnt engraving of John Tinney. He acquired early a great reputation as a landscape engraver; his works of this class, after Wilson, are probably still unapproached. He engraved also two of West's greatest works, the 'Death of General Wolfe,' and the 'Battle of the Hogue;' which raised his reputation as an historical engraver almost on a par with his name in landscape. He was appointed engraver to George III.; and died in London, May 23, 1785. Woollett is great for his color, and his skill in representing variety of texture, also for an extraordinary force in his prints, owing to the judicious combination of the three methods, with aquafortis, with the graver, and with the dry point. His works, after Wilson, constitute in themselves a delightful landscape gallery, all unsurpassed as pictures or as prints. [R.N.W.]

WOOLMAN, John, an Am. quaker anti-slavery writer, b. 1680, d. 1772.

WOELSTON, THOMAS, a deistical writer, who was originally a minister of the Church of England, and wrote an 'Apology for the Christian Religion;' at a later period, he was prosecuted for his 'six Discourses on Miracles,' and his 'Defence' of the discourses. Born at Northampton, 1669, d. 1702.

WOOLTON, JOHN, bishop of Exeter, known as a theological writer, 1535-1594.

WOOSTER, DAVID, a major general in the American revolutionary war, was born in Stratford, Conn. 1711. At the beginning of the war in 1776 he was appointed chief in command of the Conn. forces. He was mortally wounded at Ridgefield during an attack by the British, and died 1777.

WORCESTER, NOAH, an American divine of Mass. who earned, from his devotion to the cause of peace, the title of its Apostle. He was the first secretary of the Peace Society, and contributed to its interests by his earnest writings on the subject. Died 1837.

WORCESTER, SAMUEL, an American divine, first

secretary of the American Board of Commissioners for Foreign Missions, was born in N. H., died 1821.

WORDSWORTH, WILLIAM, was born at Cocker-mouth in Cumberland, on the 7th of April, 1770. His father was an attorney there, and he was the second of five children. Dorothy, the only daughter, was his most cherished friend and confidant during his life. The mother of the family died in William's ninth year; and the father died five years afterwards, leaving to his children little fortune beyond a claim for law-agency on Sir James Lowther, afterwards earl of Lonsdale. This debt remained unsatisfied till 1802 when, on the accession of the next earl, £8,500 was paid in satisfaction of it.—In 1787, after having been educated chiefly at the endowed school of Hawkshead, near Esthwaite Lake, William was sent by his uncles to St. John's College, Cambridge. He had read much in boyhood, especially poetry, and had written English verses, in imitation (as he says himself) of Pope's versification, 'and a little in his style.' One of these compositions presaged two of the most prominent features in the character of his mind. It was, says he, 'a long poem, running upon my own adventures, and the scenery of the country in which I was brought up.' The only considerable poem which he wrote while at the university, was 'The Evening Walk.' His vacations were devoted to wanderings in the country; and in the autumn of 1790 he spent nearly three months in a tour on the continent, visiting France, Switzerland, some of the Italian lakes, and the Rhine. He disliked the system of the university, and attended little to the studies of the place. Indeed, it is to be observed that, through life, Wordsworth was as little of a student as any literary man ever was. Except in poetical literature, his knowledge of books seems to have always been very slight. And if he was disinclined to read, he was quite as much disinclined to writing; he had weak eyes, and great indolence. In his mature years, he composed most frequently in the course of his walks, without setting down a word; and many of his poems would certainly have been lost, had not the ladies of his family been at hand to record them. He has himself said, that, if he had been free to choose his course of life, he would have spent his days in travelling. To the adoption of a profession he was never able to make up his mind. The church was proposed to him, but speedily rejected. His religious belief never was such as to prevent his taking orders; but his opinions on the state of society, during his early manhood, would not easily have been reconcileable with the position of a clergyman in the Church of England. For several years after the outbreak of the French revolution, he was an ardent republican. In 1791 he took his degree of B.A., and quitted Cambridge.—In the close of the same year he went to France, where he spent nearly twelve months: and there he wrote the poem called 'Descriptive Sketches,' which betrays, yet more than 'The Evening Walk,' the poetic strength with which he was endowed. These pieces were published in 1793. In that year, also, 'The Female Vagrant' was written. For some years he wandered about, gradually satisfying himself that he was justified in regarding poetry as his true vocation. He planned a monthly miscellany, which was to have been 'republican but not revolutionary;' and he attempted to find employment in writing for the London newspapers on the opposition side. In 1795 he received a legacy of £900 from his friend and contemporary, Raisley Calvert. This generous and seasonable bequest fully answered the intention of the donor; it enabled the poet to devote

himself to study till the settlement of his father's affairs.—In the autumn of 1795 Wordsworth began to live with his sister, their first residence being at Racedown in Dorsetshire. He commenced, but abandoned, a poetical imitation of Juvenal; and in this year and the following he made his first and last attempt in a kind of poetry very uncongenial to the cast of his genius, by writing the Tragedy of 'The Borderers.' Refused at Covent Garden, this piece remained in manuscript for nearly half a century.—About this time, likewise, were written a good many of the earliest of those fine passages, which were afterwards dovetailed into 'The Excursion.' This is a fact particularly deserving attention. The poet's blank-verse compositions, with their solemn tone of meditation, their purely dignified diction, and their sweep of rotund melody, were made known to the world only when he had passed middle age; and they were treated by his critics as the fruits of improved skill and enlarged experience and purified taste. But he actually had at his command, and was continually expressing, this his highest mood of poetry, from his twenty-fifth year. Coleridge, with whom Wordsworth made acquaintance while in Dorsetshire, always insisted that his friend's first business ought to be, the completion of the philosophical and Autobiographical Poem, of which these fragments were designed as parts. But Wordsworth was never at all disposed to pay deference to the opinion either of affectionate friends or of hostile critics. With him, as with most of us, 'the boy was father of the man.' He had always been quietly self-willed; and his character in manhood possessed the feature which he attributes to his early boyhood when he says:—'Possibly from some want of judgment in punishments inflicted, I had become perverse and obstinate in defying chastisement, and rather proud of it than otherwise.' At this time, indeed, as it has been remarked by his nephew, the whole tenor of his opinions led him to dissatisfaction with things existing; and his political creed (perhaps in part through the shock which events on the continent were beginning to give to it) affected his creed in literature. He perceived, with great clearness, two or three deep-rooted faults in the recent poets of England: the artificial stamp of their diction; their general inattention to external nature; their want of sympathy with ordinary events and with the feelings of mankind at large. He felt that he possessed the power of producing poetry, in which these faults should be avoided. But, in the meantime, tempted partly by deliberate error in theory, partly by incidental eccentricities of taste and judgment natural to a self-trained and uncommunicative muser, he rebelled, not only against the false canons of literature, but against several that are really true. In the poems with which he chose to make his first effort towards the reformation of the public taste, there are many points of thought, of sentiment, and of expression, which, as the most judicious of his admirers allow, would not have appeared if those poems had been written even a few years afterwards. Some things, indeed, especially the oddest and boldest of the colloquial words and idioms, were silently altered in the later editions. But the eccentricity of judgment lingered, in a great degree, to the last, fostered by the self-brooding solitude to which he devoted himself.—The 'Lyrical ballads,' to which chiefly these observations are applicable, made rapid progress in Wordsworth's next place of abode. This was Nether-Stoway in Somersetshire, where he lived for a year, removing to the place in August, 1797, in order to be near Coleridge. In the next

year he wrote 'Peter Bell,' and in autumn he published, in one volume, the twenty poems which (with three by Coleridge) make up the first edition of the 'Lyrical Ballads.' The poet was now in his twenty-ninth year. Immediately afterwards he went to Germany with his sister and Coleridge; and, the party separating, Miss Wordsworth and her brother spent the winter of 1798-99, very uncomfortably, and seemingly with little advantage of any kind, at Goslar in Hanover. Here were written several beautiful pieces, among which were 'Lucy Gray,' and the fragments of blank-verse beginning 'There was a Boy' and 'Wisdom and Spirit of the Universe.' A beginning was also made with that first part of the great Poem, which Wordsworth's friends entitled 'The Prelude.'—Wordsworth's long residence among the lakes of his native district began soon after his return to England. In the end of 1799 he settled with his sister in a small house at Grasmere, which he continued to occupy for eight years. In 1800 were written 'The Brothers,' 'The Pet Lamb,' 'Ruth,' 'Michael,' and 'Hart-Leap Well;' and, in the close of the year these and other poems made up a second volume of the 'Lyrical Ballads,' which appeared with a reprint of the first. To 1802 belong, among other pieces, 'The Rainbow,' 'The Leech-gatherer,' 'Alice Fell,' 'Intimations of Immortality,' and the two Sonnets on Buonaparte. Then, also, Wordsworth was working on 'The Excursion,' which at that time bore the name of 'The Pedlar.' In that year, he married Mary Hutchinson of Penrith, to whose amiability his poems pay warm and beautiful tributes. In 1803 he made a tour of some weeks in Scotland, being guided at Melrose by Walter Scott; and he now became acquainted with Sir George Beaumont, whose name appears often in his writings. In 1805 he suffered the grief of losing his brother, Captain Wordsworth who perished by shipwreck. In this year were written 'The Waggoner' and the 'Ode to Duty;' and 'The Prelude' was finished, and consigned to the poet's desk for forty-five years. In 1807 were printed two volumes of poems, composed since 1800. They contain, besides several very fine ballads, and many other small poems, 'Sonnets Dedicated to Liberty,' and the 'Memorials of a Tour in Scotland.' These volumes were the objects of some of those critical censures, (severe but very far from being groundless,) under which, with all his outward apathy and real self-esteem, the poet, as his letters show, smarted very severely.—In 1808 he removed to Allan Bank at the head of Grasmere Lake, where he lived for three years. In 1809 he contributed to the 'Friend' of Coleridge, who was then living with him; and published his indignant and very eloquent pamphlet on the Convention of Cintra. His political opinions had now settled pretty much into the form they ever afterwards held, a kind of speculative Toryism, heightened by his church opinions, but balanced by many notions really democratic. In 1810 he printed, as an introduction to a set of Views of the district, his Observations on the Scenery of the Lakes, the most interesting of all things of the sort. In this year was born the last of his five children, two of whom died two years afterwards.—In the spring of 1813, after one temporary change of dwelling, he took up his abode at Rydal Mount, two miles from Grasmere, which was his home for thirty-seven years, and the scene of his death. Then, too, by the interest of Lord Lonsdale, he was appointed distributor of stamps for Westmoreland; an office which was executed by a clerk, and yielded about £500 a year.—A second tour in Scotland, early in 1814, gave birth to a few poems;

and in summer was published 'The Excursion,' the greater part of which had been written at Allan Bank. This edition, consisting of five hundred copies, was not exhausted for six years. 'Let the age' wrote the poet to Southey, 'continue to love its own darkness; I shall continue to write, with, I trust,

[Rydal Mount.]

the light of Heaven upon me.' In the design of this remarkable poem, it is difficult to discover any thing that can justify commendation, whether we look to it as an independent work, or regard it as forming a part in that gigantic poem, which the author so long contemplated executing in whole. But if 'The Excursion' is to be judged by its best passages, hardly any poem in our language is equal to it. Some of its scenes, extending through hundreds of lines; many passages of smaller extent, but yet considerable; and innumerable verses, and phrases, and words; are among the most exquisite things to which any poetic mind ever gave expression.—In 1815 appeared 'The White Doe of Rylstone,' a work instinct with a dreamy loveliness, and estimated by its author very highly. But it evinces more plainly than any of his preceding works, his incapacity to plan or conduct a sustained narrative; and it is characterized, even more than the 'Lyrical Ballads,' by that which Coleridge had publicly pronounced to be one of his friend's besetting sins; namely, the prevalence of 'an intensity of feeling disproportionate to such knowledge and value of the objects described, as can be fairly anticipated of men in general, even of the most cultivated classes.'—Within a year or two before and after the publication of this work, the poet, in his usual fashion, proved his power of poetizing in a different key, by composing several of those small pieces, whose elaborate refinement, both of sentiment and of diction, has drawn forth the lively admiration of readers the most adverse to the peculiarities of his system. Such were 'Laodamia,' 'Dion,' the 'Ode to Lycoris,' and 'Artegal and Elidure.' In 1816 was composed the 'Thanksgiving Ode,' and a rhymed translation of Three Books of the *Æneid*. In 1819 appeared 'Peter Bell,' which was rather popular, and the 'Waggoner,' which was much the reverse. To that year belong the series of Sonnets on the River Duddon. In 1820 Wordsworth, with his wife and sister, made a tour of four months on the continent, of which 'Memorials' were published some time afterwards. In that year, too, a visit to Sir George Beaumont gave occasion to the very fine series of Sonnets called 'Ecclesiastical Sketches.'—Wordsworth was now fifty years old, had written all his best works, and had laid most of them before the world. But, though the thirty years during which his life was still prolonged were unprolific of great perform-

ances, they witnessed very extraordinary changes in the reputation of the author. Poets were already familiar with his works, and acknowledged him as the chief in a new development of the art; but ordinary readers, taking what they found of him in the periodicals, knew as yet only a few of his best passages and a great many of his worst. The Edinburgh Review, supported afterwards by the Quarterly, had hitherto guided the public opinion as to his writings; a turn was now given to the tide, by the eloquently vehement panegyrics which began to be showered on him in Blackwood's Magazine, about the year 1820. Without taking account of minor points, we may correctly consider Wordsworth's principal critics as looking at the functions and duties of poetry from two opposite points of view. Jeffrey paid regard mainly to the perfection or imperfection of the result; Wilson and his friends were content with examining the state of mind out of which the result is generated. The former, severely pure in taste, demanded an elaborate work of art, symmetrically designed, and executed with care and dignity; the latter sought for nothing beyond such proof of genius as might be furnished in a few striking passages, and held native endowment as more than sufficient to atone for imperfect execution. Scrutinized in the first of these aspects, all the brilliant poetry which arose in England during the first generation of our century was seriously defective; and that of Wordsworth, with all his deliberation and slowness of performance, was, through the natural character of his mind, still more open to exception than the effusions of Scott and Byron had been made by carelessness and haste. Even those who, having formed a competent acquaintance with Wordsworth's works, felt themselves compelled to adopt this view, could not be, and were not, blind to the admirable beauties of detail, which, when blazoned forth by the pen of Christopher North, speedily made the poet's name to be a word of honor, even with those who knew none of his poems but in fragments, or who were wearied or repelled by the inanimateness and the disproportionate design of 'The Excursion.' The fame of the Poet of the Lakes grew yet wider, when his influence had shown itself decisively in that new school of poetry, which had its beginnings with Keats and Shelley. For a good many years before his death, Wordsworth was not only acknowledged, and justly, to be really the greatest English poet of his time, but was regarded with a reverence allowing no possibility of faults. Symptoms of a wiser and more discriminating judgment have shown themselves of late; and, in no long time, the world will estimate justly and correctly the works of one of the greatest, as well as purest and most blameless, of the poets who have enriched and enlarged the domain of English literature.—The period extending from Wordsworth's fiftieth year to his eightieth requires no minute notice. He lived among his beloved mountains, travelled much, suffered a good deal, and wrote little. Two visits to Scotland, in the former of which (in 1831) he saw Scott just before he left Abbotsford for the last time, provided many of the materials for a volume, published in 1835, 'Yarrow Revisited, and other poems.' The finest of these are the meditative pieces entitled 'Evening Voluntaries.' About this time the poet was deeply affected by political events; and he felt yet more keenly the declining health of his sister, who became a confirmed invalid. In 1837 he made, for nearly six months, a tour in Italy, which suggested several pieces, printed in 1842, in a volume called 'Poems, chiefly of Early

and Late Years.' In it was inserted the Tragedy of 'The Borderers.' In that year, being now seventy-two years of age, he resigned his distributorship in favor of one of his two sons, and received from Sir Robert Peel a pension of three hundred a-year. In 1843, on the death of Southey, the same ministry appointed Wordsworth to be Poet-Laureate; an office which he accepted only on the assurance, that it was to be entirely nominal and honorary. In 1847 he had to witness the death of his accomplished daughter, Mrs. Quillinan. He died on the 23d of April, 1850, being exactly the day of the month which closed the life of Shakspeare. His remains rest in the churchyard of Grasmere.

[W.S.]

WORGAN, J. D., an English poet, 1790–1819.

WORLDRIDGE, T., a portrait painter and engraver of etchings after Rembrandt, 1700–1766.

WORM, OLAUS, in Latin *Wormius*, a Dutch physician and antiquarian, 1588–1654.

WORONZOW, M. LARIONOWITZ, Count De, a Russian statesman and favorite of the empress Elizabeth, disgraced under Catharine, 1710–1767.

WORSDALE, JAMES, a dramatic writer and painter, taught by Sir G. Kneller, died 1767.

WORSLEY, SIR RICHARD, the historian of the Isle of Wight, was born there in 1751. He became governor of the island, comptroller of the royal household, and member for Newport. In addition to his historical work, he published a magnificent catalogue of his marbles and other antiques, under the title of 'Musæum Worsleianum.' Died 1805.

WORTH, W. I., a major-general in the American army, was born in New York, 1794. He commenced life as a shop boy, and when the war of 1812 broke out, he volunteered as a private soldier in the ranks. His good conduct soon won for him promotion, and he was made a lieutenant, and at Chippewa and Lundy's Lane, he exhibited so much skill and daring that he was raised to the rank of major. He became subsequently superintendent of the military school at West Point, and when the Indian war in Florida broke out he was appointed second in command, and finally chief. In the Mexican campaign, he distinguished himself at Monterey, at Molino del Rey, at Cerro Gordo, Churubusco, and at the gates of Mexico. He was an impetuously brave officer, often reckless. Died in Texas, 1849.

WORTHINGTON, JOHN, rector of Ingoldsby in Lincolnshire, author of religious works, &c., 'The Doctrine of the Resurrection,' 1618–1671.

WORTHINGTON, THOMAS, a Roman Catholic theologian, died in exile about 1626.

WORTHINGTON, WILLIAM, vicar of Llarrhaya-der in Denbighshire, and a dignitary of the church, was born in Merionethshire 1703, and educated at Oxford. Died 1778. His principal works are an 'Essay on the Scheme of Redemption,' 'The Scripture Theory of the Earth,' 'On the Historical Sense of the Mosaic Account of the Fall,' and an 'Inquiry into the Case of the Gospel Demoniacs.'

WORTLEY, JOHN STUART, Baron Wharnclyff, was born 23d of April, 1801. In 1825 married the third daughter of the Earl of Harrowby, who still survives, and of whom were born three sons and two daughters. The elder daughter is the wife of the marquis of Drogheda. In politics, Lord Wharnclyff was a liberal conservative; but not taking any very active part in politics, he devoted himself to the promotion of agriculture, and the comfort and interest of his tenants. From 1841 to his accession to the peerage in 1845, he sat in the House of Commons as mem-

ber for the West Riding, and died on the 22d of October, 1855.

WORTLEY, LADY EMMELINE STUART, was the second daughter of the Duke of Rutland, and wife of Charles Stuart Wortley. After her husband's death she became quite a traveller, and twice visited the United States. Here she was very hospitably entertained by our most distinguished countrymen, and seems to have formed a very favorable opinion of our national traits and political institutions. She possessed a good and well cultivated mind, and was not unknown in the world of letters, as beside her observations in travel, she published a volume of poems, said to be 'of no mean order.' She died in 1855.

WOTTON, EDWARD, a physician and naturalist, time of Henry VIII, 1492-1555.

WOTTON, SIR HENRY, a well-known statesman, diplomatist, and political writer, born in Kent 1568, died 1639. He went as an ambassador to Venice, the United Provinces, and several of the German courts in the reign of James I. His works are 'The States of Christendom,' 'Parallels between Essex and Buckingham,' 'Elements of Architecture,' 'Characters of the Kings of England,' and Poems, &c.

WOTTON, WILLIAM, a clergyman of the Church of England, remarkable for his precocious knowledge of the sciences and Oriental languages, author of 'Reflections upon Ancient and Modern Learning,' a 'History of Rome, from the Death of Antoninus Pius to the death of Alexander Severus,' 'Memoirs of the Cathedrals of St. David's and Llandaff,' and other works of less note. Born at Wrentham in Suffolk 1666, died 1726.

WOUTERS, F., a Flemish painter, 1614-1659.

WOUVERMAN, PHILIP, was born at Haarlem in 1620, where he died in 1668, aged only forty-eight. Though one of the most masterly of painters, he is said to have been disappointed. His works became very valuable soon after his death, and have increased in value since, but according to D'Argenville, who rather contradicts Houbraken, he was so supremely disgusted with the encouragement he received, that shortly before his death he burnt all his drawings and studies, in case they should encourage his son to follow the profession of a painter: he seems to have worked chiefly to have enriched the dealers even during his own lifetime. Wouverman's subjects are generally road-side, travelling, hunting, fighting, or plundering scenes, and such as admit of horses, which he constantly introduced in his pictures; it is a common belief that he never painted a picture without a white or a gray horse, but this is doubtless an exaggeration. He painted horses in small with unrivalled skill; indeed his mastery in every department of painting is perfectly extraordinary, and his coloring is always rich and transparent. All the works, however, attributed to Philip Wouverman, are not his; many were doubtless the productions of his brother, PETER WOUVERMAN, who survived Philip many years; a second brother, JOHN, was a good landscape painter.—(Houbraken, *Groote Schouburgh*, &c.) [R.N.W.]

WRAGG, WILLIAM, an American colonial lawyer, was born in South Carolina, in 1714. In 1773 was a member of the King's Council of Canada, sided with the Royalists in the revolution, and on his way to England was wrecked on the coast of Holland in 1777.

WRANGEL, HERMANN, a Swedish general, rewarded with a marshal's baton by Gustavus Adolphus, 1587-1644. His son, CHARLES GUSTAVUS,

greatly distinguished in the German war, and in the councils of his sovereign, 1613-1676.

WRANGHAM, FRANCIS, an English church divine, a miscellaneous and religious writer. Died 1842, age 73.

WRAXALL, SIR NATHANIEL WILLIAM, bart., an eminent traveller and historical writer, was born at Bristol, in 1751. He entered into the civil service of the East India Company, and in 1771 acted as judge-advocate and paymaster of the forces for the presidency of Bombay. Next year he returned to England, and then travelled on the Continent, visiting almost every country from Naples to Lapland. He published several tours, the 'History of the House of Valois,' 'Memoirs of the Courts of Berlin, Dresden, Warsaw, and Vienna,' 'The History of France,' 6 vols. 8vo. &c. In 1813 he was created a baronet, and, in 1815, he published his last work, 'Historical Memoirs of his Own Time,' 2 vols. 8vo. In these memoirs, which contain a fund of anecdote, was a libel on Count Woronzow, the Russian ambassador; for which Sir Nathaniel was sentenced to a fine and six months' imprisonment. He died at Dover, while on his way to Naples, in 1831, age 80.

WRAY, D., an archæologist, 1701-1783.

WREDE, Field-marshal Prince, an eminent Bavarian soldier and statesman, whose fate it was to be a most formidable foe to the gigantic military genius under whom he had obtained the earliest distinction due to his gallantry and skill. In 1805 he served as a Bavarian lieutenant-colonel against Austria, and as the ally of France, and distinguished himself so much, that Napoleon personally conferred upon him the then much coveted grand cross of the legion of honor. In the subsequent actions of that war he still further distinguished himself, and was created a field-marshal when dangerously wounded at the decisive battle of Wagram. In the memorable campaign against Russia, too, the contingent army furnished by Bavaria to France was commanded by him; and covered the retreat of the French with such dogged determination, as to lose nearly the whole of its cavalry. In 1813, the political state of things in Europe made it impossible for Bavaria to remain attached to the Emperor's cause, but to share his inevitable ruin; and Marshal Wrede, as Bavarian Plenipotentiary, signed the treaty by which Bavaria declared herself separated from the confederation of the Rhine, and also from the cause of the emperor. Shortly afterwards, Wrede, at the head of a combined Bavarian and Austrian army, made a gallant and skilful, though unsuccessful attempt, to intercept Napoleon at Hanau, after the battle of Leipzig. In 1814 he was actively engaged in France, and with his usual gallantry; and, at the conclusion of the war, he was elevated to the rank of a prince, and, shortly afterwards, nominated an honorary knight grand cross of the English order of the Bath. The termination of the war did not terminate his services to his country. As minister of state, and inspector general of the army, he rendered most important benefits. Born 1767; died 1839.

WREN, SIR CHRISTOPHER, was born at East Knoyle, Wilts, October 20, 1632; his father was rector of the parish. He was educated at Westminster school, and showed great mechanical ability at a very early age. In 1646 he went to Oxford, and entered as a gentleman commoner at Wadham College; he took his bachelor's degree in 1650, became a fellow of All Souls, and a master of arts in 1653; and in 1657, then only in his twenty-fifth year, was chosen professor of astronomy in Gresham

College, London, and in 1661, Savilian professor of astronomy at Oxford, when he also took his degree of doctor of civil law. In the following year he was the chief mover in procuring the foundation of the Royal Society, which had already existed some few years as the Philosophical Club, and he became its president in 1680. Such were the preliminary studies of England's greatest architect, but he had already commenced his great career in 1661 as assistant to Sir John Denham, the surveyor of the royal works, who was himself incapable of the duties of the office. Wren's first work in this capacity was a new hall for the public meetings of the university, a commission intrusted to him by Archbishop Sheldon, the chancellor of the university, since celebrated as the Sheldonian Theatre; it was completed in 1668. About the same time he built a new chapel for Pembroke College, Cambridge, for his uncle, the bishop of Ely. In 1665 he visited Paris. In 1669 he succeeded Sir John Denham as surveyor of the royal works, with a salary of £100 per annum, and as surveyor-general of the repairs of St. Paul's. In 1672 he submitted plans for a new church instead of attempting to repair the old one, which

[Westminster Abbey, completed by Wren.]

had been completely destroyed by the fire; a commission was appointed for the execution of the work in 1673, and Wren having given up his professorship at Oxford, was appointed architect of the cathedral, and was knighted by the king on the occasion. This great work, in style the Italian renaissance, occupied nearly forty years; it was completed in 1710; Wren receiving only £200 a-year as architect of St. Paul's, but he executed many other churches and public buildings in London at the same time, as 'The Monument,' Temple Bar, &c., besides some others in the country, Oxford, and Cambridge, Winchester, Greenwich, Hampton Court, &c. Of all his great works, the towers of Westminster Abbey are alone discreditable; he was, however, not very successful in his palaces, as for instance, the additions to Hampton Court, and Marlborough House, in both of which the apartments are of mean proportions, contrasting strongly even with the hunting boxes of many German princes. The cartoon gallery at Hampton Court is deplorably ill suited to its purpose. Sir Christopher never visited Italy; his mastery of the Italian renaissance he owes probably mainly to the example of Inigo Jones; he has in St. Paul's achieved something more than a worthy rival of St. Peter's; though on so much smaller a scale, it has internally through its so far more judicious proportions even a

vaster effect than St. Peter's at Rome; the interior, however, is painfully cold, but this is no fault of Wren's, it is the general want of color and other decoration. The original design was more like St. Peter's than that carried out. In 1684 Wren was appointed comptroller of the works at Windsor, and in 1685 he was returned to parliament as one of the members for Plympton; he sat also in the following parliaments for Windsor and for Weymouth. In 1717, after the death of Anne, he lost the favor of the court, and was removed from his office of surveyor-general. He retired to Hampton Court, where he died February 25, 1723.—(*Parentalia*, 1750; Elmes, *Life of Wren*; Allan Cunningham, *Lives of the Painters*, &c.; *Penny Cyclopædia*.) [R.N.W.]

WREN, M., a learned prelate, 1585–1667.

WRIGHT, ABRAHAM, an English theologian, 1611–1690. His son, JAMES, an antiquarian and historian of Rutlandshire, 1644–1715.

WRIGHT, EDWARD, a mathematician, who is said to have discovered the true method of dividing the meridian line, about 1560–1615.

WRIGHT, FANNY (Madame Darusmont), English political and socialistic writer. Died 1853, aged 57.

WRIGHT, JOSEPH, a painter of versatile ability, commonly called 'Wright of Derby,' and particularly skilled in landscapes, and scenes in which the effect of fire-light is introduced, 1734–1797.

WRIGHT, NATHANIEL H., an American poet, was born in Concord, Mass., 1787. Died 1824.

WRIGHT, S., a nonconform. divine, 1683–1746.

WRIGHT, SILAS, an American statesman, and Governor of New York, was born in Amherst, Mass., 1795. He was, however, admitted to the bar of New York, where he practised. He became a Senator of the State in 1825, and won for himself a high political position, for his statesmanlike ability and power as a debater. He was subsequently a member of Congress, comptroller of the State of New York, and in 1833, a Senator of the United States. Died 1847.

WRIGHT, W., a Jesuit and theologian, d. 1639.

WRIGHT, W. R., president of the Court of Appeal at Malta, author of 'Horæ Ionicæ,' a work describing the Greek isles, died 1826.

WRISBERG, H. A., a Ger. anatom. 1739–1808.

WRONSKI, HOENE, a Polish refugee, who settled after the fall of Warsaw, and the enslavement of his native land, in Paris, and became a prolific French author. His writings were on subjects of political intellectual philosophy. Died 1853, age 76.

WUCHERER, F., a Ger. theologian, 1682–1737.

WULFER, J., a Germ. Orientalist, 1651–1682.

WUNSCH, C. E., a Prussian astronomer, physician, and naturalist, born about 1730.

WUNSCH, J. J. DE, a Prus. general, 1717–88.

WURMBRAND, JOHN WILLIAM, Count, an Austrian statesman and antiquarian, 1670–1756.

WURMSER, DAGOBERT SIGISMOND, Count, an Austrian general who distinguished himself in the wars with the French republic; born in Alsace 1724, died soon after he had been compelled to surrender Mantua 1797.

WURSTEISEN, C., a mathematician and historian of the city of Bale, 1544–1588.

WURTEMBERG, MARIA of, the princess Czartoryski, sister of prince Adam Czartoryski, of Poland, married the Duke of Wurtemberg, through the influence of his uncle, the king of Prussia, in order to secure the throne of Poland. A change in policy defeated this purpose, and the Czartoryski

found her husband and son arrayed in arms against her native land. She was also an author. Died 1854.

WURTEMBERG, PAUL, Prince of, brother-in-law to Jerome Buonaparte, and brother to the late king of Wurtemberg. Died 1852, aged 68, having on the day before his death acknowledged his conversion to the Roman Catholic Church.

WURTZ, F., a Swiss surgeon, 16th century.

WURTZ, G. C., a French physician, 1756-1823.

WURTZ, J. W., a Ger. controversialist, d. 1826.

WURTZ, PAUL, Baron De, a general in the service of Sweden and the United Provinces, d. 1676.

WURTZBURG, CONRAD DE, one of the ballad-singers of Germany, 13th century, author of the 'Nibelungen,' published 1757-1784.

WYATT, JAMES, a metropolitan architect, builder of the Pantheon in Oxford Street and of Fonthill Abbey, 1743-1813.

WYATT, R. J., an accomplished sculptor, was born on the 3rd of May, 1795, in Oxford Street, London, where his father, Edward Wyatt, was then settled. At an early age he was articled to Charles Rossi, R. A., for the term of seven years; and during that term his services at the Royal Academy were so successfully prosecuted, as to entitle him to the award of two medals upon different occasions. At the time Wyatt was under the tuition of Rossi, he executed a monument in the church of Esher, in memory of Mrs. Hughes, and another in the chapel at St. John's Wood. When Canova visited this country, he became so far interested in Wyatt, as at once to promise him his protection and the permission to work in his studio at Rome. Thither he proceeded in the early part of the year 1821, after having spent some time in Paris under the celebrated Italian sculptor Bozio; and so devotedly did he prosecute the labors of his profession, that only once in this lengthened term of nearly 30 years did he revisit his native country, and that occasion was in the year 1841. It was during Wyatt's visit to England in 1841, that he was honored by the queen with a commission for his statue of Penelope, which in Rome was considered the best of his works. His group of 'Ino and the Infant Bacchus,' a statue of 'Glycera,' 'Musidora,' a statue; two statues of Nymphs, and 'Penelope,' a charming statue, the property of her majesty, are all works of high merit. The industry of Wyatt was singularly constant. In summer, long before five in the morning, he was to be seen on his way to the Caffè Greco, where artists of all nations assemble; and in winter, long before daylight, he was to be seen at the same place reading the papers by the light of a taper which he always carried with him for that purpose. At daylight he was in a studio, and not only thus early, but he also remained at work sometimes until midnight. Died suddenly at Rome, May 29, 1850.

WYATT, SIR THOMAS, a courtier, statesman, and poet, who enjoyed the favor of Henry VIII., and was employed by him in several diplomatic missions; born at Allington castle, in Kent, 1503, died 1541. His poetical works, which consist of love elegies and odes, have been greatly admired, and were first published with those of Lord Surrey. He was twice tried for sedition, but acquitted. His son, of the same name, was a zealous protestant, and was beheaded by Queen Mary in 1554.

WYCHERLEY, WM., was the oldest of those Comic Dramatists, whose licentiousness throws on the period succeeding the Restoration a disgrace not to be wiped away by the brilliant cleverness of their works. Less witty than Congreve, less gay than

Farquhar, and inferior to Vanbrugh as a painter of character, he has a vigor and good sense, and an ingenuity in the inventions of lively incidents, not reached by any of these his contemporaries. He was the son of a Shropshire gentleman, and born

[Birth-place of Wycherley.]

about 1640. He was sent in his youth to France, where he learned the fashionable morality, and conformed to the fashionable religion by becoming a Roman Catholic. At the Restoration he was placed at Oxford, where he returned to the Church of England. The whole of his after life was that of an improvident and debauched man of pleasure. The dates at which his four comedies appeared range from 1669 to 1678; but the two earliest of them were, on his own account, written before he came of age, and the other two a considerable time before they were acted. 'The Plaindealer,' a vigorous but unpleasing adaptation of Molière's 'Misanthrope,' was composed when he was twenty-five years old; and at thirty-two he wrote his lively and unprincipled comedy, 'The Country Wife.' About 1680 he married a young widow, the countess of Drogheda, whose jealousy of her rakish husband made him uncomfortable, and whose bequest of her fortune to him served only to plunge him into lawsuits at her death. He lay for seven years in the Fleet prison for debt; and even after his release, which is said to have been procured by King James, he continued to be a needy man. When he was certainly above seventy years old, he married a young woman, being desirous, it is said, to disappoint a nephew whom he disliked. But he survived his marriage only eleven days, dying in December, 1715. [W.S.]

WYCK, THOMAS, called 'the Old,' a Dutch painter and engraver, 1616-1686.

WYCLIFFE, WICKLYFFE, or WICLIF, JOHN DE, was born at Wycliffe, near Richmond, in Yorkshire, about A.D. 1324. In early youth he was a commoner of Queen's College, Oxford, but soon removed to Merton, of which he became a fellow. His favorite studies were metaphysics and theology. One of his earliest public appearances was in 1360 against the mendicant monks, with whom the university had a resolute quarrel. In 1361 he became master of Baliol, and was presented to the rectory of Fillingham, in the diocese of Lincoln, which he afterwards exchanged for that of Ludgershall. Four years afterwards he was installed warden of Canterbury Hall, then recently founded by Archbishop Islep. In 1367, Langham, archbishop of Canterbury, expelled him from the wardenship, on which he appealed to the pope, Urban V., and a decision, after a delay of three years, was given against him. In 1372 he took his degree of D.D., and read lectures in divinity with great applause. He was sent

soon afterwards as a commissioner to the papal embassy at Bruges, where he remained two years, and detected more narrowly the workings of the mystery of iniquity. On his return he was presented to the prebend of Aust, and the rectory of Lutterworth, through the patronage of the duke of Lancaster. Three hundred of his parochial sermons have been preserved. He had for some time been loud and bitter in his remonstrances against the idle and vicious clergy, and his vehemence and fidelity increased with his years. The enraged prelates summoned him before the convocation, but his powerful patrons saved him. In 1376 the monks drew up nineteen articles against him, taken from his prelections and sermons. These charges show that Wycliffe preached a species of protestantism—denying transubstantiation and the supremacy of the pope, and severely condemning the abuse of her temporalities on the part of the church. During the next year the pope sent to England five bulls against the reformer. But the king died before they arrived, and the universities would not act. The prelates, however, cited Wycliffe to appear before them in London. In the meantime parliament was in a dilemma on a question of casuistry, whether it were lawful to refuse the pope's demand that treasure should be sent out of the kingdom. The matter was referred to Wycliffe, and he at once decided that parliament might resist. He then, attended by the duke of Lancaster and the lord marshal, Earl Percy, appeared before the episcopal tribunal, and after some altercation, left the court in safety. He was summoned to appear again at Lambeth in 1378, but the process was suddenly stopped by the queen-mother. In 1381 he published twelve theses against transubstantiation, and the archbishop of Canterbury formally pronounced the majority of them dangerous and heretical. Wycliffe left Oxford in 1382, and retired to Lutterworth. There he labored without intermission, and neither tongue nor pen was idle in the cause of evangelical truth and freedom. He had been threatened with paralysis a year or two previous, but in 1384 he was seized in the pulpit with a sudden stroke, and soon after expired. Wycliffe's

the Popes.' His essay on 'The Truth and Meaning of Scripture,' contains striking statements on the perfection and clearness of the Bible alone as the rule of faith. The English style of the reformer is wonderful for his age, and is clear and homely in its structure. Our present tongue was then beginning to raise itself into eminence and popularity. Chaucer's poetry and Mandeville's prose were evidence of its flexibility and power. Wycliffe's style is more common than theirs, for it speaks to the people in their own vernacular. Wycliffe will ever be remembered as a good and a great man, an advocate of ecclesiastical independence, an unquailing foe to popish tyranny, a translator of Scripture into our mother tongue, and an industrious instructor of the people in their own rude but ripening dialect. May he not be justly styled the 'morning star of the reformation?' So much impression was made by his works that one of his enemies complains—'that a man could not meet two persons on the road but one was a Wycliffite.' A convocation held at Oxford in 1408 prohibited the reading and diffusion of the reformer's version. At the council of Constance in 1415, the dead Wycliffe was denounced as a heretic, and his bones were ordered to be exhumed from consecrated ground. Thirteen years afterward the decree was enforced by Pope Martin V., and Fleming, bishop of London, was ordered to see it done. His grave was opened, the bones taken out and burned, and the ashes cast into the stream that passes near the church of Lutterworth. As Thomas Fuller adds in his own style:—This river took them 'into the Avon, Avon into the Severn, Severn into the narrow seas—they into the main ocean, and thus the ashes of Wycliffe are the emblems of his doctrine which is now dispersed all the world over.' [J.E.]

WYDEVILLE. See WOODVILLE.

WYDRA, S., a Polish mathematician, 1741–1804.

WYERMANN, or WEYERMANN, J. CAMPO, a Dutch painter and writer, 1679–1747.

WYKEHAM, WILLIAM OF, bishop of Winchester, and lord high chancellor of England, was born in 1324, at Wickham, in Hampshire, of respectable parents, but poor, and was indebted for his education to Nicholas Uvedale, governor of Winchester castle. On the completion of his studies, he became private secretary to his patron, and was by him eventually recommended to the notice of Edward III. The talents, diligence, and integrity he displayed in the service of the king raised him gradually to a distinguished place in the royal favor; and being appointed surveyor of his works at Windsor, under his directions that splendid structure was completed. He now gradually, but rapidly, rose to the highest dignities both in church and state. In 1357, he was presented to the rectory of Pulham, in Norfolk, to which was added a prebend in the church of Lichfield; and in 1360 he was made dean of the collegiate church of St. Martin le Grand, London. He was also successively appointed keeper of the privy seal, secretary to the king, and governor of the great council. In 1366 he was advanced to the bishopric of Winchester, and in the following year was made chancellor of England. These high dignities he sustained with honor and ability, dedicating a large portion of his temporalities to the improvement of his cathedral. Owing to the influence of a party, headed by John of Gaunt, who were strongly opposed to the increasing wealth and influence of the clergy, he was compelled to resign the seals in 1371; but the esteem in which he was held

[Wycliffe's Chair.]

works are very numerous, and are chiefly of a polemical and practical nature, induced by the spirit of the age in which he lived. His English translation of the Latin Bible, or Vulgate, was a work of great merit and necessity, for it unlocked the Scriptures to the multitude, or as his antagonist, bemoaning such an enterprise, worded it, 'the gospel pearl was cast abroad and trodden under foot.' The papal schism that happened on the death of Gregory XI., stirred him up to compose a famous tract, 'The Schism of

by the people generally, compensated for the loss; and on the accession of Richard II. he was restored to his dignities and emoluments. In 1386 he completed his munificent foundation of New College, Oxford; in the chapel of which is still to be seen his crozier, or pastoral staff, supposed to be the only one in England. He also built and endowed St. Mary's College, at Winchester; and having, in 1394, a second time resigned the chancellorship, he devoted the remainder of his life to the superintendence of his nobler establishments, and the exercise of Christian benevolence. He died Sept. 24, 1404, and was buried in Winchester cathedral, where a splendid monument is erected to the memory of its worthy and munificent benefactor.

WYLIE, SAMUEL BROWN, an American presbyterian divine, and professor of ancient languages in the University of Pennsylvania. Died 1852, aged 80 years.

WYLLIS, GEORGE, governor of Connecticut in 1642, arrived in Hartford from England in 1638, and died 1644. The oak in which the charter of Connecticut was concealed in the time of Gov. Andros, stands in front of the house in Hartford occupied by the son of Gov. Wyllis, Samuel.

WYNANTS, JOHN, a Dutch landscape painter, the teacher of Philip Wouvermans, 1600-1670.

WYNANTZ, GODWIN, Count, a jurisconsult and statesman of the empire, 1661-1732.

WYNDHAM, H. P., an antiquarian writer and member of parliament for Wiltshire, 1736-1819.

WYNDHAM, SIR WILLIAM, an eloquent parliamentary speaker and statesman of the period of Queen Anne, was born at Orchard Wyndham in Somersetshire, 1687, and entered parliament as knight of the shire for his native county. In 1710 he was made secretary of war, and in 1713 chancellor of the exchequer. On the death of the queen he became a distinguished member of the opposition, and in 1715 was committed on a charge of being implicated in the Scotch rebellion; died 1740. Having married a daughter of the duke of Somerset, his eldest son, SIR CHARLES WYNDHAM, inherited the title of earl of Egremont, from his uncle. He died in 1763.

WYNN, CHARLES WATKINS WILLIAMS, an experienced member of the House of Commons, having represented Montgomeryshire from 1797 to his death in 1850. He became secretary of war under

Earl Grey from December, 1834, to April, 1835, but is chiefly memorable for the honorable constancy of his public and private conduct during this long career. He was a liberal supporter of the Welsh School in London, and deserves to be named among the friends of literature.

WYNNE, EDWARD, author of 'Dialogues on the Laws and Constitution of England,' 1734-84.

WYNNE, JOHN HUDDLESTON, a miscellaneous writer, was born in Wales, in 1743; followed the business of a printer in London for a time, then obtained a commission in the army, and eventually sat down as an author by profession. His principal works are, 'A General History of the British Empire in America,' 2 vols.; 'A General History of Ireland,' 2 vols.; and 'Fables for the Female Sex.' He died in 1788.

WYNTOUN, ANDREW, a Scottish rhyme-chronicler, prior of the monastery of St. Serf's Inch on Lochlomond, died about 1420.

WYON, WILLIAM, R.A., a distinguished English medallist, 1795-1851.

WYRWICZ, CHARLES, a Polish Jesuit, historian, and geographical writer, 1716-1793.

WYSS, the name of several Swiss writers:—BERNARD, author of a history of events from the time of Rodolph of Hapsburg, still in MS., about 1463-1525. NICHOLAS, a chronicler of events connected with the reformation, killed in the battle of Cappel, 1531. HANS HENRY, author of a 'History of the Canton and City of Zurich,' published 1783, FELIX, professor of theology at Zurich, 1596-1666. GASPARD, brother of the latter, a Greek scholar, dates unknown.

WYTFLIET, CORNELIUS, a Flemish historian, and secretary to the senate of Brabant; date of his works, 1598-1607.

WYTHE, GEORGE, an American statesman, and signer of the Declaration of Independence, 1726-1806.

WYTTENBACH, DANIEL, a learned scholar and critic, born in 1746 at Berne, and professor from 1771 at Amsterdam and Leyden. He published an edition of the moral works of Plutarch, Historical Selections from Ancient Authors, and other works. Died 1820.

WZABECZ, WENCESLAUS JOACHIM, professor of surgery at Prague, author of several practical works on surgery, 1740-1804.

## X

XACCA, E., a Sicilian poet, born 1643.

XAINTONGE, ANNE and FRANCES DE, sisters of Dijon, who each founded a religious house of the Ursuline order, the former 1567-1621; the latter died 1639.

XAINTRAILLES, JEAN POTTON, Seigneur DE, a commander in the army of Charles VII. at the period of the expulsion of the English, died 1461.

XANTHUS OF LYDIA, a Greek historian, some fragments of whose writings, published in the collections of Creuser and Muller, are all that remain, flourished in the 6th or 5th century B.C.

XANTIPPE, whose name has passed into a proverb for a scolding wife, was the spouse of Socrates the philosopher, and notwithstanding her ill temper was deeply attached to him. The date of her death is unknown.

XANTIPPUS, an Athenian general, 5th century B.C.

XANTIPPUS, a Lacedæmonian general who defeated the Romans under Regulus, B.C. 255.

XAUPI, J., a French ecclesiastic, 1688-1778.

XAVIER. See FRANCIS.

XAVIER, JEROME, a Jesuit and missionary, of the same family as the saint, died 1617.

XENOCLES, a Greek tragedian, 4th cent. B.C.

XENOCRATES, a Greek philosopher, remarkable for the severity of his manners, and his incorruptible integrity, was born at Chalcedon, B.C. 400. He was sent on an embassy to Philip, king of Macedonia, and, afterwards to Antipater, neither of whom could corrupt him by presents. Notwithstanding this, the Athenians were so ungrateful, that they caused him to be sold as a slave, because he was too poor to pay the taxes. Demetrius Phalereus, however, discharged the debt, and gave him his freedom. Died B.C. 314.

XENOCRATES, a Greek physician, 1st century.

XENOPHANES, flourished between 540 and 500

B.C., an Ionian by birth; afterwards settled in Italy. From the few almost oracular verses of Xenophanes that have reached us, we may still form a tolerably adequate conception of the nature of that important place, in the History of Greek Philosophy, which unquestionably belongs to him. Indifferent to the search of the Ionic School after a primal physical element; neither sympathizing with the higher aim of Pythagoras,—his mind was arrested by the direct question concerning the Gods. And his conclusions seem to have been as follows: Rejecting utterly the Gods of the Poets, and every modification of Anthropomorphism—he declared, because he *felt*, that something—being, reality, is: but he denied that man can reach its nature, or ever apprehend its attributes. Man can learn or conceive only what is like himself, or what is placed before him by the senses. BEING, is not discernible by sense; neither can it be similar to Man. Essentially then it is incomprehensible, inscrutable, unknown, and unknowable. Xenophanes was not afraid to ascertain that he could see nothing, in the awfulness which is beneath visible Life. But he was no sceptic—he believed that God is.—These reverential and most pregnant thoughts, fill a large space in all subsequent Modern as well as Greek speculation. [J.P.N.]

XENOPHON, the Athenian historian and philosopher, was the son of Gryllus, a native of the Attic borough Ercheia. The time of his birth and death is not mentioned by any ancient writer, but it has been with very considerable probability inferred that he was born about B.C. 444; and Lucian states that he attained to above the age of ninety. He began life as a soldier, and was present at the battle of Delium (B. C. 424.) In the flight which ensued he fell from his horse, and owed his safety to Socrates, on whose shoulders he was carried to a place of security. Having by this incident become known to the great philosopher of the age, he cherished for him ever after the warmest affection, and derived from him all his moral and philosophical principles. Nothing worthy of notice is known respecting him till B.C. 401, when, on the invitation of his friend Proxenus, he was induced to join the expedition of Cyrus the Younger against his brother, Artaxerxes Mnemon, king of Persia. Before deciding, he asked the advice of Socrates, who recommended to him to consult the Delphian oracle; but Xenophon, who had previously determined to go, merely asked the oracle to what gods he should sacrifice in order to insure success; and, having performed the required rites, proceeded to Sardis, where he arrived in time to join the expedition. Attaching himself to the army, without any military appointment, he accompanied it in its tedious march, and was present at the battle of Cunaxa, in which Cyrus fell. On the death of their leader the barbarian troops fled, and left the Greeks alone in the plains of Mesopotamia. Clearchus, whom they invited to take the command, and also others of the Greek generals, were soon after massacred by the treachery of the Persian Satrap, Tissaphernes. In this emergency Xenophon came forward, and, with the consent of his countrymen, took a prominent part in conducting the famous 'Retreat,' of which he has left a minute and graphic account in the *Anabasis*. Not daring to attempt a return by the route by which they had advanced, they proceeded along the course of the Tigris, and across the high lands of Armenia to Trapezus (*Trebizond*), a Greek colony on the south-east coast of the Black Sea, and thence found their way to Chrysopolis, which is opposite to Byzantium

(Constantinople). On their arrival here the Greeks were in great distress, and they therefore readily accepted the invitation of Seuthes, king of Thrace, to aid him in recovering the sovereignty. They performed their promise; but the Thracian chief declined to pay the stipulated reward, and it was with great difficulty that Xenophon got from him part of the sum agreed upon. Being still very poor, the Greeks next made an expedition into the plain of the Caicus; and seizing the house and property of a wealthy Persian, thereby replenished their empty pockets. Of this spoil Xenophon obtained his due share. In consequence of his connection with the expedition under Cyrus, Xenophon was banished from Athens about B.C. 399; and, as he remained in Asia, probably joined Agesilaus, king of Sparta, during his expedition into that country in B.C. 396. When Agesilaus was recalled, Xenophon accompanied him to Greece, and was with him in the battle against his countrymen at Coronea, B.C. 394. After the battle he returned with Agesilaus to Sparta, and soon after settled at Scillus, in Elis, not far from Olympia, on a spot presented to him by the Spartans, where he was joined by his wife and children. In this secluded retreat he spent his time in hunting, entertaining his friends, and writing the works which have immortalized his name. After a residence of more than twenty years, he was expelled from Scillus by the Eleans, and retired to Corinth, where he is believed to have died. The sentence of banishment against him had been previously recalled; but Xenophon never revisited his native city. The extant works of Xenophon may be divided into four classes:—1. Historical—the *Anabasis*, an account of the expedition of Cyrus the Younger, and the Retreat of the Ten Thousand, a model of perspicuous and interesting narrative; the *Hellenica*, or Grecian Histories, a continuation of the History of Thucydides as far as the battle of Mantinea (B.C. 362); the *Cyropaedia*, an historical or philosophical romance, founded on the real events of the early life of Cyrus; and the *Life of Agesilaus*. 2. Didactic—the *Hipparchicus*, a treatise on Horsemanship; and the *Cynegeticus*, a treatise on Hunting. 3. Political—two Treatises on the *Constitutions of Sparta and Athens*, and a *Treatise on the Revenues of Attica*. 4. Philosophical—the *Memorabilia of Socrates*, a faithful record of the doctrines and sayings of the philosopher; the *Apology of Socrates*, which professes to contain the substance of Socrates' address to his judges; the *Symposium*, an account of a festive meeting, at which Socrates was present; the *Economicus*, a discussion on the duties of domestic life; and the *Hiero*, an imaginary conversation between the tyrant of Syracuse and Simonides. It is impossible in our limited space to analyze the character of Xenophon as an historian, a politician, a philosopher, and a general. It is not detracting from pre-eminent merit to allege that his continuation of the history of Thucydides falls short of the original; that, in depth and philosophical acumen, he must yield to Plato, while he is a more faithful exponent of the doctrines of their common instructor; and that his conducting of the Retreat of the Ten Thousand presents many of the qualities of a great commander. His style exhibits the Attic dialect in its purest and most perfect form; clear, simple, and devoid of ornament. [G.F.]

XERES, F., a Spanish historian of the conquest of Peru, where he accompanied Pizarro.

XERXES, king of Persia, was the son of Darius and of Atossa, daughter of Cyrus. He succeeded his father B.C. 485, to the prejudice of his elder

brother, Artazabayes. Four years previously the forces of Darius had been defeated by the Greeks under Miltiades at the battle of Marathon, and the interval had been passed in preparing for a second expedition. These preparations Xerxes continued on a scale of magnificence, almost incredible, and in the spring of 480 B.C. he commenced his march from Sardis: his army was moved forward with great deliberation, and being numbered on its arrival in Europe was found to muster 1,700,000 foot, and 80,000 horse; besides camels, chariots, and ships of war. These numbers, and the undisciplined crowds who must have attended them to supply their necessities, are perfectly bewildering to the imagination; and they become still more so when their varied costumes, the silken and gilded tents, the standards, the costly armor, and the variety of national weapons are considered. One of the political parties of Greece, it must be borne in mind, were in league with the Persian court, and the terror of the country verged upon despair of maintaining their liberties. Themistocles, however, while the pass of Thermopylæ was defended by Leonidas and his Spartans, succeeded in rallying his countrymen, and having created a navy, defeated Xerxes at the battle of Salamis. This great event took place in the year of the expedition B.C. 480. The Persians were allowed to retreat in such order as they could, but Mardonius, one of the principal commanders, reserved a more manageable army, the best he could pick from the flying host, and with these he was defeated by the combined Greeks the year following. Xerxes was assassinated by Artabanus, one of the great officers of his court, who aspired to found a new dynasty in Persia, B.C. 465. [E.R.]

XERXES, the *second* of the name, king of Persia, succeeded his father, Artaxerxes Longimanus, B.C. 424, and was assassinated 423.

XIMENES, AUGUSTIN MARIA, Marquis De, a French poet, and friend of Voltaire, 1726–1817.

XIMENES, N., a Spanish painter, 1598–1666.

XIMENES, FRANCIS, one of the Spanish missionaries who introduced Christianity into Mexico, author of a description of Mexican zoology and botany.

XIMENES, FRANCIS, known in Spanish history as Cardinal Cisneros, from the territorial title of his family, was born at Torrelaguna in 1437. A great portion of his time was spent in obscurity and hard study. In 1492 he was made confessor to Queen Isabella, and in 1494 he was made archbishop of Toledo. In 1507 he received the cardinal's hat. Along with his high dignities, he was possessed of vast revenues, but his influence arose from his discountenance of the luxurious and grasping habits of the higher priesthood, and his adopting the rigid discipline of the new order of St. Francis, with which he identified himself. He thus prepared the way for such internal reform as the Romish Church received. He was a great patron of letters, and by his exertions and expenditure produced the earliest edition of a polyglot Bible, known as the Complutensian, from its publication at Complutum. The political career of Ximenes was a struggle for the establishment of the power of the crown above the nobles, and somewhat anticipated the policy of Richelieu in France. He died on 8th Nov., 1517. [J.H.B.]

XIMENES, J., a Spanish poet, 16th century.

XIMENES, J. A., a Spanish theolog., 1719–74.

XIMENES, LEO, a geometrician, astronomer, and engineer, of Sicilian birth, 1716–1786.

XIMENES, L., a French ascetic, 13th century.

XIMENES, RODERIC, archbishop of Toledo, and author of Spanish histories, died 1247.

XIMENO, V., an Italian biographer, 17th cent.

XUARES, or SUARES, RODERIC, a Spanish juriconsult, time of Ferdinand and Isabella.

XYLANDER, the Græcised name of WILLIAM HOLTZEMANN, a German philologist, born at Augsburg 1532, d. professor at Heidelberg, 1576. He translated the works of Plutarch and Tryphiodorus.

XYPHILIN, JOHN, a patriarch of Constantinople, sprung from a noble family of Trebizond, and famed for his virtues and great learning, died 1078, after a patriarchate of twelve years. His nephew, of the same name, author of an abridgment of Dion Cassius, first published in 1551.

XYSTUS. See SIXTUS.

## Y

YAHIA AL BARMEKI, ABOU ALI, an Arabian vizier of the Barmecide family, who played a conspicuous part in the reign of Haroun al Raschid, and was put to death in 803.

YAKOUT, SCHEAB EDDYN ABDALLAH, an Arabian biographical writer and geographer, of Greek origin and birth, 1179–1229.

YALDEN, or YOULding, THOMAS, successor of Atterbury as preacher at Bridewell hospital, known to fame as a poet and miscellaneous writer, 1671–1736. The best known of his productions is his 'Ode to Saint Cecilia's Day.'

YALE, ELIHU, from whom Yale College derived its name, was born in 1648. He was brought up to mercantile pursuits and acquired a large fortune by his enterprise in the East Indies. On his return he made England his home and died in Wales 1721. He was a liberal benefactor to the college of New Haven which caused the trustees to give his name to it.

YANEZ DE LA BARBUDA, a Portuguese commander, who attempted the conquest of Grenada and perished in the field, 1374.

YANEZ, F., a Spanish painter, died 1560.

YART, A., a French poet, 1710–1791.

YATES, FREDERICK HENRY, a popular English actor, and manager of the Adelphi theatre, was born in 1797, and made his first appearance on the stage in 1817. His abilities were extremely versatile, ranging from the exhibition of the deepest pathos to the humor of broad farce; died 1842.

YATES, RICHARD, a comic actor, who kept the stage several years in such characters as 'Fondlewife' in the 'Old Bachelor;' died 1796. His wife, ANNA MARIA, a tragic actress, died 1787.

YATES, ROBERT, an American revolutionist and chief justice of New York, 1738–1801.

YDELEZ, STEPHEN, a priest of Franche-Comté, who devoted himself to the service of the sick poor, and wrote on the plague, 1581.

YEARSLEY, ANNE, known as a poetical and dramatic writer, was originally a milk-woman, and was born at Bristol about 1756. She was encouraged to publish by Hannah More, and the profits of her works enabled her to engage in a more congenial occupation as mistress of a circulating library; died 1806.

YEATES, JASPER, an American revolutionist and judge of the Supreme Court of Pennsylvania, died

1817. He was the author of Reports of Supreme Court of Pennsylvania.

YEATES, THOMAS, a celebrated oriental scholar; author of excellent grammars of the Hebrew and Syriac, and a most laborious editor and translator of portions of the Scripture, as well as a variety of biblical labors of considerable ingenuity, industry, and value. In early life he was a member and secretary of the Society for promoting Constitutional Information, but for many years previous to his death he took no part in politics. Born 1768; died 1839.

YELVERTON, Sir HENRY, an eminent English judge, born in 1566. He successively filled the offices of solicitor-general, attorney-general, and judge; published 'Reports of Special Cases,' and died in 1630.

YEPEZ, ANTONIA D', a Spanish Benedictine and historian of his order, died 1621.

YEPEZ, DIEGO D', bishop of Tarragona, and a learned historian, 1559-1613.

YEREGUI, JOSE DE, a pious and learned ecclesiastic of Guyapusco, 1734-1805.

YGLESIAS, J. DE, a Spanish poet, 1753-1791.

YMBISE, or IMBESE, JEAN D', a magistrate of Ghent, who endeavored to free his country from the Spanish Yoke, and was executed 1584.

YON, St., in Latin *Ionius* or *Eonius*, a martyr of Christianity in France, 290.

YORK, THE HOUSE OF, rival to that of Lancaster, and possessor of an elder right to the crown, derived its claim from Richard son to the duke of Clarence, who was the second son of Edward III. The line of Lancaster claimed from John of Gaunt, his third son. RICHARD, duke of York, succeeded the duke of Bedford as regent in France, during the minority of Henry VI. His claim to the crown was first asserted about 1450, after the rebellion of Cade, and he first took arms in defence of it by raising an army of 10,000 men in 1452. Thus began the wars of the red and white roses, which deluged England with blood. The duke was defeated at the battle of Wakefield, by Queen Margaret, and killed in the action, 24th December, 1460. It is questionable whether his son, Clifford, was murdered as generally understood. The last chief of the white rose was his son, Richard III. [E.R.]

[Monument to the Duke of York, St. James Park.]

YORK, FREDERICK, duke of, commander of the British army in the Low Countries at the period of the French revolution, was the second son of George

III., and was born August 16, 1763. He studied military tactics at Berlin; and in 1791 married the eldest daughter of the king of Prussia. He died, involved in debt, occasioned by his passion for gaming, on January 5, 1827. A vindication of his command in Flanders has been recently published by his military secretary.

YORKE, Admiral Sir JOSEPH SIDNEY, K.C.B., entered the navy as midshipman in 1780, and was in the actions with Lord Rodney of the 9th and 12th of April, 1782. He was made lieutenant in 1789, and appointed master and commander to the Rattlesnake; promoted to the rank of post-captain in 1793; continued in active employment on various services; and, in 1805, he received the honor of knighthood. In 1810, Sir Joseph was appointed to a seat at the admiralty board, was made vice-admiral in 1814, and became admiral of the blue in 1830. During his parliamentary career he was distinguished by his honest zeal for the interests of his profession, and by his irresistible good humor, which often proved successful in appeasing the angry feelings of debate. He had been with Captains Bradley and Young to Spithead, and, on their return, the vessel was upset in Stokes Bay, and all perished, May 5, 1831.

YORKE, PHILIP, first earl of Hardwicke, was born at Dover in 1690, and educated for the law. He was appointed chief justice of the King's Bench, and raised to the peerage in 1733. From 1736 to 1756 he held the office of lord chancellor, and retired with the duke of Newcastle; died 1764.

YORKE, PHILIP, second earl of Hardwicke, son of the preceding, was born in 1720. In 1738 he was appointed one of the tellers of the exchequer, and, in 1764, succeeded his father in the earldom. His distinction is that of a man of letters. He was joined by his brother, the Hon. CHARLES YORKE, in publishing the 'Athenian Letters, or the Epistolary Correspondence of an Agent of the King of Persia, residing at Athens during the Peloponnesian War.' His other works are 'The Correspondence of Sir Dudley Carleton, and 'Miscellaneous State Papers.' Died 1790.

YORKE, PHILIP, third earl of Hardwicke, eldest son of Charles Yorke, was born in 1757. He held several public offices, and from 1801 to 1805 was lord-lieutenant of Ireland. Died 1834.

YORKE, PHILIP, of the same family as the preceding, known as a genealogist and historian, was born about 1743, and died, after a life of literary leisure, in 1804. His work on 'The Royal Tribes of Wales,' contains much curious and authentic matter.

YOUNG, Sir ARETAS WILLIAM, Colonel. This officer entered the army in 1795, as ensign; and became a captain in the 13th foot the following year, by purchase. His first active duty was in Ireland, during the rebellion; his next in Egypt, 1801; and, for several years after, in Sicily and at Gibraltar, he acted as aide-de-camp to General Fox. In 1807 he obtained the rank of major in the 47th, and was present at the battles of Vimeira, Talavera, Busaco, Badajoz, &c. In 1813 he was promoted to a lieutenant colonelcy in the 3rd West India regiment, stationed at Trinidad: and, in 1815, he was sent to join the expedition against Guadaloupe, and received one of the badges of the order of Merit, presented by Louis XVIII. He was next selected to command the troops in Grenada, where his conduct gave the highest satisfaction; and on his being ordered back to Trinidad, the council of assembly presented him with a sword, value 100 guineas. From this time to the final disbandment of the 3rd West India regiment, in 1825, he administered the government at

various times during the absence of Sir Ralph Woodford, and was rewarded for the 'candor, integrity, and impartiality which had marked his administration,' by 150 guineas for a sword, and a piece of plate, value 250*l*. In 1826, Lieutenant-colonel Young was appointed to the office of protector of slaves in Demerara; in 1831 he was made lieutenant-governor of Prince Edward's Island; and in 1834, he received the honor of knighthood. Died 1835.

YOUNG, ARTHUR, a native of Norfolk, who became rector of Bradfield in Suffolk, and prebend of Canterbury. He wrote 'An Historical Dissertation on Idolatrous Corruptions in Religion.' Died 1759. His son, of the same name, born at his father's rectory in 1741, is well known as an agricultural writer and rural economist, and was secretary to the Board of Agriculture. Died 1820.

YOUNG, EDWARD, was born at his father's parsonage, near Winchester, in 1684. From 1708 he held a fellowship at Oxford. In 1710 part of his poem, 'The Last Day,' was inserted in the *Tatler*; and the whole was published in 1713. For many years from the latter of these dates, he continued to produce poems of various kinds. The most successful, and by much the best of them, till the appearance of his last and most popular work, were his *Satires*, which, appearing in separate pieces, were collected in 1728, under the name of 'The Love of Fame, the Universal Passion.' His tragedy of 'Busiris' was acted successfully in 1719; 'The Revenge,' the only one of his tragedies that is now ever acted, appeared in 1721; and the 'Brothers,' while in rehearsal, in 1727, was withdrawn by the author, who, after having long hesitated between professions, had just taken orders. In 1730 his college presented him to the rectory of Welwyn, in Hertfordshire, valued at three hundred a year; and this was the highest preferment he ever obtained, notwithstanding very frequent solicitations, which were continued when he was very old. In 1731 he married a widow, the daughter of the earl of Lichfield. Lady Elizabeth Young died in 1741; and her husband is supposed to have begun, soon afterwards, the composition of the 'Night Thoughts.' The publication of the poem, taking place in sections, was completed in 1746. With its want both of individual interest, and of genuine poetic imagination, this work could not have gained the permanent celebrity it has, were it not for the rarity of good religious poetry, and the readiness with which serious persons welcome any work of the sort. In its antithetical turn, and its perpetual ingenuity of strained analogies, not unrelieved by snatches of fine fancy, it reminds us of the metaphysical poetry of the seventeenth century. But the appearance of a work, so solemn and elevated in tone, at a time like that in which the 'Night Thoughts' came forth, was really a fact hardly less encouraging for the prospects of literature, than was the appearance of the exquisite 'Seasons' of Thomson a few years earlier. Young survived till 1765. [W.S.]

YOUNG, MATTHEW, an Irish prelate and mathematician, author of 'An Analysis of the Principles of Natural Philosophy,' and 'The Method of Prime and Ultimate Ratios.' Born in Roscommon, 1750.

YOUNG, THOMAS, born at Milverton, Somersetshire, 13th June, 1773, died in London, where he had long practised as a physician, on 10th May, 1829. If extent of acquirement, originality in conception, and positive contributions to knowledge of highest importance, should ever give enduring fame, the claim might well have been made by Young. Some

men, however—almost through inexplicable causes—appear formed to be unfortunate; and unhappily Young lived and died in comparative obscurity. It is probable that his acceptance in 1818 of the Secretaryship of the Board of Longitude, and the connected editorship of the *Nautical Almanac*, contributed to this unhappy result. It cannot be denied that he was not exactly fitted for either office, and that his administration of them, laid him open to the successful and very eager attacks of persons who had no respect for his genius, nor for any man's,—who, in truth, had neither the power nor the inclination to appreciate genius of any kind. Young's chief feats are two. First, he successfully contests with FRESNEL the glory of founding the Undulatory Theory of Light. The idea of propagation by Undulations, in opposition to Newton's conception of propagation by Emission, had been started long before Young's time; but to *him* unquestionably belonged the privilege of originating the explanation of all those more delicate phenomena of Light, by his doctrine of *Interference*. This view had not the advantage of *Fresnel's*; he had no willing auditory: in England, at the time, the *superstition* with which we have hitherto been inclined to invest every illustrious insular name, had not been cleared away from that Immortality which belongs of right to NEWTON. Young's other capital discovery dispelled the mists from another sphere:—it was *he* who primarily detected the key to phonetic Hieroglyphics. Previous to his time, the old Egyptian symbols had been regarded simply as pictorial representations—real pictures, or real, through *analogy*. And, although some thought it probable that the inscriptions also concealed an *alphabetic* writing, no conception had been formed of the way in which *pictorial* representations could pass into *phonetic*; and no key discovered, therefore, to the contents of Egyptian records. Aided by the Rosetta stone, Young divined the secret,—clearly preceding CHAMPOLLION, and in theory penetrating farther than even that acute and most deserving Frenchman ventured to go.—We believe that if the merits of our remarkable Countryman were made to rest even on those two memorable discoveries, injustice would be done to him. His mind teemed with new and profound conceptions, and he has left numerous other hints, that will probably yet start out into unexpected importance. Young was buried in Farnborough; but he has a monument—among the motley crowd—in that National Mausoleum, where great men alone ought ever to have been permitted to repose—the Abbey of Westminster. [J.P.N.]

YOUNG, SIR WILLIAM, a miscellaneous writer and member of parliament, born near Canterbury 1750, died, governor of Tobago, 1815.

YOUSOUF, the last governor of Spain for the Oriental caliphs, killed in battle 759.

YPSILANTI, three Greek princes who distinguished themselves in efforts to achieve the independence of their country. CONSTANTINE, born at Constantinople about 1760, became, in 1799, hospodar of Moldavia, and, in 1802, of Wallachia. He was deprived of this dignity, and after the treaty of Tilsit, 1807, resided in Russia; died 1816. —ALEXANDER, the first active agent in the Greek revolution, son of Demetrius, hospodar of Wallachia, was born at Constantinople, in 1792. About the year 1805, Ypsilanti's father received a summons from the grand signior to repair to Constantinople, and judging that obedience to the command might cost him his life, he determined on retiring into Russia. The son, adopting the

military profession, entered into the Russian army; was a captain of hussars, when a ball, at the battle of Dresden, carried away his right hand; attained the rank of major-general, and was made aide-de-camp to the emperor. In 1820 he became acquainted with the Hetaireia, of which association he eventually became the leader. When he saw that the breaking out of the insurrection in Greece could no longer be delayed, he resolved to plant in Moldavia the standard of revolt. He crossed the Pruth with a few attendants, and in March, 1821, he issued a proclamation, announcing that Greece had kindled the torch of freedom, and thrown off the yoke of tyranny. The emperor Alexander, to express publicly his disapprobation of the undertaking of the Hetairists, summoned Ypsilanti to make his defence; and, as he did not obey, he caused his name to be struck from the rolls of the Russian army. After sustaining repeated defeats, Ypsilanti gave up the cause of Greece. Having crossed the frontiers, he was arrested in Transylvania and long held captive, as a prisoner of state, in the fortress of Mungatsch. He died at Vienna in 1828, aged 36. Ypsilanti undoubtedly possessed the necessary courage, but his ridiculous pride and tenaciousness of ceremony due to his rank rendered him wholly unfit for the duties of a patriot chieftain. His brother, DEMETRIUS, also headed the insurgents, and died 1832.

YRALA, or IRALA, DOMINGO MARTINEZ DE, one of the Spanish conquerors of America, companion of Mendoza, died 1567.

YRIARTE, I., a Spanish painter, 1635-1685.

YRIARTE, DON JUAN DE, a learned archæologist, keeper of the Royal Library at Madrid, and chief author of the Improved Orthography and Punctuation of the Spanish Language, 1702-1771. His nephew, DOMINGO, a diplomatist, 1746-1795. THOMAS, brother of the latter, a famous poet, comedian, and fabulist, editor of the Mercury of Madrid, 1750-1791.

YSABEAU, ALEXANDER CLEMENT, a celebrated character of the French revolution, born about 1750. Being sent as a deputy to the convention he became the colleague of Tallien, and a participator in his cruelties at Bourdeaux. He was subsequently a member of the directory and the council of elders; died 1823.

YSAURE, or ISAURE, CLEMENCE, a lady who instituted the floral game at Toulouse, was born there, shortly before the expulsion of the English, about 1450. Her lover being slain in battle, she consecrated her life 'to the Virgin' and to the cultivation of poesy. She left a considerable revenue for the celebration of the floral games, and for prizes given to successful poets. This festival was celebrated annually, in May, till 1806, when it was repressed. Its history was written by Poitevin.

YVAN. See IVAN.

YVAN, ANTOINE, founder of the religious order of Mercy, flourished in Provence, 1576-1653.

YVART, J. A. VICTOR, an agricultural writer, called 'The Arthur Young of France,' 1764-1831.

YVER, J., a French novelist, 16th century.

YVES, CHARLES ST., a monk of St. Lazarus, who left his order and became celebrated in Paris as an oculist, 1667-1733.

YVES, ST., a theologian and canonist, appointed bishop of Chartres in 1091, died 1115.

YVETAUX, VAUQUELIN, a French scholar and poet, tutor to Louis XIII., 1559-1649.

YVON, PETER, a controversial writer and proselyte of Labadie, from about 1640.

YVON, P. C., a French physician, 1719-1811.

Y-YN, one of the greatest statesmen produced in China, was born about 1770 B.C. He was minister for thirty-three years to Tai-Kia, whose reign was rendered, by him, one of the most happy and brilliant in the Chinese dynasty. He lived to be nearly one hundred years old, and died in an honorable retirement.

## Z

ZABAGLIA, NICHOLAS, an Italian mechanic and architect, to whom the method of transferring fresco paintings is attributed, 1674-1750.

ZABAN, or ZABANIUS, ISAAC, a Hungarian philosopher, and writer in favor of the atomic theory, born about 1670, died 1699.

ZABARELLA, FRANCESCO, cardinal and archbishop of Florence, a learned canonist and writer on ecclesiastical polity, 1339-1417. BARTOLOMMEO, his nephew, also archbishop of Florence, and professor of law, 1396-1442. JACOPO, a descendant of the preceding, a professor of philosophy and commentator on Aristotle, 1553-1589.

ZABOROWA, JAMES, a Polish publicist, employed under the direction of the chancellor, in collecting the laws, 1502-1506.

ZABUESING, J. C., a German writer, 1747-1795.

ZACCARIA, FRANCESCO ANTONIO, a learned Venetian Jesuit, historian of Italian literature, and a defender of the papacy, 1714-1795.

ZACCHIAS, PAOLO, an Italian physician and man of letters, born at Rome 1584, died 1659.

ZACH, CLARA, countess of, daughter of a Hungarian noble, executed for assassinating Casimir, king of Poland, who had outraged her, 1330.

ZACH, F., a German astronomer, 1754-1832.

ZACHARIA, D., a French alchymist, 16th cent.

ZACHARIA, G. T., a Ger. Orientalist, 1729-77.

ZACHARIA, JUSTUS FREDERICK WILLIAM, a German poet, professor at Brunswick, 1726-1777.

ZACHARIAH, a king of Israel, B.C. 784.

ZACHARIAH, one of the Jewish prophets, flourished in the reign of Darius, 6th century B.C.

ZACHT-LEEVEN, or SAFT-LEEVEN, HERMANN, a Dutch painter, 1609-1685. His brother, CORNELIUS, a painter of drunken frolics, 1606-1673.

ZACUTUS LUSITANUS, a Portuguese physician, born in 1575. He was educated as a Christian, though born of Jewish parents; but after having practised twenty years at Lisbon with great reputation, he became alarmed at the decree of exile issued by Philip II. against the Jews, in 1625, and fled to Amsterdam, where he embraced the faith of his ancestors. He wrote several medical works, and died in 1642.

ZAGO, O., an Italian engineer, 1654-1737.

ZAHN, J., a German mathematician, 1641-1707.

ZAIDOUN, ABOUL WALID AHMED IBN, a Spanish Arabian poet, 1003-1070.

ZAINER, G., a German printer, 1430-1478.

ZAIONCZEK, JOSEPH, a Polish general, was born in 1752, at Kaminieck. In the diets from 1788 to 1792, he espoused the cause of his country's freedom, and was among the foremost who fought for it in 1792 and 1794. He commanded at Praga, when the suburb of Warsaw was taken by assault. Being made prisoner, and sent to the fortress of Josephstadt,

he remained there till after the death of the empress Catharine; when, on being liberated, he entered into the French army, and was in active service from 1797 till 1812, in the various campaigns of Italy, Egypt, Prussia, Poland, and Russia. When the congress of Vienna assigned Poland to Russia, the emperor Alexander conferred on him the office of viceroy, with the title of prince. With these favors the patriotism of Zaionczek vanished, and he became the devoted slave of the sovereign who had exalted him. He died in 1826.

ZAKREZEWSKI, IGNATIUS WYGSYGOTA, a member of the Polish diet, and one of those who distinguished themselves in 1794 in the cause of their country's independence, 1774-1802.

ZALEUCUS, a renowned legislator of the Locrians, who flourished about 500 B.C. Having made a law to punish adulterers with the loss of sight, he refused to exonerate his own son when convicted of the crime, but proved the strength of his paternal feelings by submitting to the loss of *one* of his own eyes, instead of exacting the penalty of *both* from the offender.

ZALLINGER, J. B. DE THARN, a Tyrolese Jesuit and botanist, 1731-1785. JAMES ANTONY, of the same family, a Jesuit, philosopher, and canonist, 1735-1812. F. SERAPHIN, a Jesuit and physician, 1743-1805.

ZALLWEIN, G., a German canonist, 1712-1766.

ZALUSKI, ANDREW CHRYSOSTOME, a prelate, diplomatist, and grand chancellor of Poland, 1655-1711. His nephew, ANDREW STANISLAUS, grand chancellor, distinguished as a patron of letters, died 1758. J. ANDREW, brother of the latter, bishop of Kiev, collector of a great library, destroyed at the capture of Warsaw by Suwarrow, 1701-1774.

ZALUZANSKI, ADAM, a physician and botanist of Bohemia, 16th century.

ZALYK, GREGORY GEORGIADIS, a Greek of Thessalonica, secretary of embassy, and author of a French and modern Greek Dictionary, 1785-1827.

ZAMAGNA, B., a Latin poet, 1735-1820.

ZAMAKHSCHARI, ABOUL CASSEM MAHMOUD AL, an Arabian poet, 1074-1144.

ZAMBECCARI, F., a Venetian poet, 15th cent.

ZAMBECCARI, COUNT FRANCESCO, an Italian aeronaut, born at Bologna 1756, perished in making one of his experiments in balloon navigation, 1812.

ZAMBECCARI, JOSEPH, an Italian physician, distinguished in comparative anatomy, 17th cent.

ZAMBERTO, B., a Venetian author, one of the first to translate Euclid, 15th century.

ZAMBONI, B., an Italian author, 1730-1797.

ZAMET, SEBASTIAN, a celebrated Italian financier and court intriguer, time of Marie de Medici, whom he accompanied to France, born at Lucca about 1549, died 1614. His son, JOHN, baron of Murat and camp-marshal, distinguished in the religious wars, died 1620. SEBASTIAN, his second son, chaplain to Marie de Medici, bp. of Langres, and protector of the Port-Royal *savants*, died 1655.

ZAMORA, A., a Spanish physician, 1570-1640.

ZAMORA, BERNARD DE, a learned Spanish ecclesiastic and philologist, 1720-1785.

ZAMORA, GASPARD DE, a Spanish Jesuit, author of a Scripture Concordance, 1546-1621.

ZAMORA, L., a Spanish poet, died 1614.

ZAMOSKI, JOHN, a distinguished Polandier in the 16th century. After studying at Paris and Padua, and becoming rector of the university at the latter city, he returned to Poland, in 1753, and was one of the ambassadors sent to Paris to offer the Polish crown to the Duke of Anjou, afterwards Henry III.

of France. When Stephen Battori came to the throne, he gave his niece in marriage to Zamoski, whom he also made chancellor of the realm and general of his armies. He distinguished himself as a warrior, and rescued from the Muscovite yoke many of the Polish provinces. He also founded colleges, and patronised the arts; and at his death, in 1605, he was honored with the title of defender of his country and the protector of the sciences.

ZAMPI, F. M., an Italian poet, died 1774.

ZAMPIERI, C., an Italian poet, 1701-1784.

ZAMPINI, MATTEO, an Italian jurisconsult and partisan of the league, author of works on French history, 16th century.

ZANARDI, N., an Italian theologian, 1570-1641.

ZANCHI, BASILIO, in Latin *Zanchius*, an elegant Latin poet, born at Bergamo 1501, died in prison 1558. GIROLAMO, his cousin, a celebrated protestant and friend of Peter Martyr, was compelled to leave Italy and become a professor at Heidelberg. He was born at Alanzo, in the territory of Bergamo, 1516, and died, some time after losing his sight, in 1660. His works form eight volumes, and one of them, on Predestination, has been translated into English by Dr. Toplady. The father of Girolamo, F. T. ZANCHI, is known in Italian literature as an historian and Latin poet.

ZANE, J., a Venetian poet, 1529-1560.

ZANETTI, ANTONIO MARIA, Count, a Venetian antiquarian who contributed to the perfection of wood engraving, 1680-1766. J. FRANCESCO, of the same family, an archæologist and learned editor, 1713-1782. ALESSANDRO, his brother, an art-writer and librarian of Saint Marc, 1716-1778. BERNARDO, a theologian and historian of the Longobardi, 1690-1762. GUIDO, a learned numismatist, keeper of the museum of antiquities at Ferrara, 1741-1791.

ZANETTINI, J., an Italian jurist, 1430-1493.

ZANIBONI, A., an Italian poet, died 1767.

ZANNICHELLI, J. GIROLAMO, an Italian physician and natural philosopher, 1662-1729.

ZANNONI, J. B., an Italian archæologist, 1774-1832.

ZANOLINI, A., an Ital. Orientalist, 1693-1762.

ZANONI, A., an Ital. agriculturist, 1696-1770.

ZANONI, JACOPO, a botanical writer, director of the botanic garden at Bologna, 1615-1682.

ZANOTTI, J. P., an Italian painter and poet, secretary of the Clementine academy, 1674-1765. ERCOLO, his brother, a poet and writer on sacred subjects, 1684-1763. F. MARIA, a third brother, distinguished as a philosopher by his labors in popularizing the systems of Descartes and Newton in Italy, 1692-1777. EUSTACHIUS, nephew of the preceding, an astronomer, 1709-1782.

ZAPF, G. W., a German *savant*, 1747-1810.

ZAPF, N., a German Hebraist, 1600-1672.

ZAPPI, GIAMBATISTA, a philosophical writer of Italy, born at Imola about 1540. His grandson, GIAMBATISTA FELICE, a lawyer and poet, author of Odes and Sonnets, remarkable for purity of style, 1667-1719. FAUSTINA, the wife of the latter, was a daughter of the famous Carlo Maratti, and like her husband was skilled in poetry.

ZARAGOZA, JOSE DE, a Spanish Jesuit, distinguished as a mathematician and astronomer, 1627-1678.

ZARATE, AUGUSTIN DE, a Spanish historian of the discovery and conquest of Peru, 16th century.

ZARATE, F. L. DE, a Spanish poet, died 1658.

ZARCO, JOHN GONZALES, a Portuguese navigator who discovered the islands of Porto Santo and Ma-

deira, the former in 1417, the latter in 1419. He became governor of Madeira, and was the founder of Funchal.

ZARLINO, J., a distinguished musician, composer, and theologian of Chioggia, 1519-1599.

ZAROTTI, C., an Italian physician, 17th cent.

ZASE, ULRIC, a Swiss councillor; although a catholic, he had a great admiration for Luther, whom he styled the Phoenix of Theologians. Many of his works were, consequently, put by the pope in the index; 1461-1535.

ZAVARONI, ANGELO, an archæologist and biographer, born in Calabria 1710, died 1767.

ZAVAVI, ABOUL HASSAN, an Arabian grammarian, author of a poem on Syntax, 1168-1230.

ZAWADOWSKI, PETER VASSILIEVITCH, Russian minister of instruction time of Alexander, 1738-1812.

ZAYAS Y SOTOMAYOR, MARIA DE, a Spanish lady, celebrated by her writings, last century.

HAZIUS, ULRIC, professor of law at Friburg, and author of several learned works, 1461-1535. His son, JOHN ULRIC, 1521-1570.

ZE, DON FRANCISCO ANTONIO, a botanist and statesman, was born in New Grenada, 1770, and received the appointment of director of the botanic cabinet at Madrid. On the abdication of Charles IV. he became minister of the interior, and on the retreat of the French went to South America, where he aided in founding the republic of Columbia, of which he became vice-president. In 1820 he came to England as a diplomatic agent to that government and died there in 1822.

ZECCHI, J., an Italian physician, 1533-1601.

ZECCHI, LELIO, an Italian theologian, juriconsult, and canonist, died 1610.

ZECCHINI, P., an Ital. physiologist, 1739-1793.

ZEGERS, H., a Flemish painter, 17th century.

ZEGERS, T. N., a Flemish ascetic, died 1559.

ZEIBICH, C. H., a Hungarian theologian, 1717-1763.

ZEID-BEN-THABET, one of the secretaries of Mahomet. He greatly contributed to disseminate the new doctrine, and made, by order of the caliph, Abou-Bekr, a complete copy of the Koran, which alone came to be considered as authentic.

ZEIDLER, C. S., a Ger. historian, 1719-1786.

ZEIDLER, J. G., a German poet, did 1711.

ZEIRI-BEN-MOUNAD, called AL TACLANI, chief of the Zeirites-Sanhadjites. He conquered the whole of the country extending from Algiers to Tripoli, and presented it to Obeid-Allah. He rendered great services to the Fatimites, and was killed at the battle of Mansourah 971. His son, YOUSSEF-BALKIN, founded the dynasty of the Zeirites-Sanhadjites.

ZEISBERGER, DAVID, a Moravian missionary, who was active in his efforts to evangelize the American Indians, was born in Moravia, and came to America in 1738. He was instrumental in forming the Moravian colonies of Bethlehem and Nazareth in Pennsylvania. Died 1808. He studied thoroughly the language of the American aborigines, and published various works, dictionaries, grammars, &c., of the Onondago and Delaware tongues.

ZEKY-KHAN, MOHAMMED, half-brother of Kerym-Khan, king of Persia, on whose death in 1779 he seized the throne. He was distinguished for nothing but his cruelty, and was put to death by his soldiers shortly after his assumption of power.

ZELADA, F. X., an Italian cardinal, secretary of state, and librarian of the Vatican, 1717-1801.

ZELLER, J. G., a Ger. physician, 1656-1734.

ZELOTTI, BATTISTA, an Italian painter, the fellow-student of Paul Veronese, under Antonio Badile, uncle of the latter, 1532-1592.

ZELTER, C. F., a Ger. composer, 1758-1832.

ZELTNER, GUSTAVUS G., a German philologist and historian, 1672-1738. His brother, J. CONRAD, also a learned writer, 1687-1720.

ZENDRINI, BERNARDO, a celebrated mathematician and hydraulic engineer, employed by the Venetian and Austrian governments in important public works, author of several treatises, 1679-1747.

ZENGER, JOHN PETER, a New York journalist, originally from Germany, died 1746. In 1733 he established the 'Weekly Journal,' and was tried for a libel in that paper upon Gov. Crosby and the council in 1734. He was acquitted by the jury in spite of the decision of the court, that they were not to judge of the truth of the libel but only the fact of publication. An important precedent was thus established. Andrew Hamilton, of Philadelphia, was the lawyer for the prisoner, and admitted the publication, but contended that it did not assert what was false. He gained his cause, and the common council conferred upon him the freedom of the city.

ZENO. There were three celebrated Zenos, ZENO of ELEA, the pupil and expounder of Parmenides; ZENO of CITTIUM, in Cyprus, founder of the school of the STOICS; and ZENO the EPICUREAN, who lived in the time of Cicero, and had the honor of teaching that illustrious Orator, Philosopher, and Statesman. The two first alone, demand notice here.

ZENO OF ELEA, in Magna Græcia, born about the year 500 B.C. Xenophanes had found, or rather divined UNITY, in the Idea of an unknown God. Parmenides took a different view, and identified the Unity we seek, with the IDEA of it; in other words, he asserted it to be wholly subjective. Zeno followed his great Master; and if we rightly interpret enigmatical traditions concerning him, it appears that he must have advanced very far. He is said to have denied the existence of Space, of Motion, and of many positive Relations; the very absurdity of the stories set afloat respecting his doctrines, evinces how much he must have been misunderstood—not by his contemporaries perhaps, but by later writers. There is no clue to the foregoing statements, save one. His scheme must have corresponded almost exactly with Kant's: he had separated subjective laws from objective reality, and proclaimed that over the chasm between, he could discern no bridge. It is indeed sufficiently strange to detect traces of the illustrious German Thinker, at the far end of two thousand three hundred years! That our interpretation is most probably true, further appears from Zeno's great and undeniable achievement. The existence of a Science of *Logic*, was discerned by him first of all; and he laid down many of its Laws. *Logic*, be it remembered, is the Science which explores not the qualities or order of external Things, but the conditions under which the Mind moves, as it determines and judges: and what more likely, than that the reality of such a Science should be earliest seen by the Philosopher, who first of all recognized the distinctiveness of Subjective Laws? [J.P.N.]

ZENO OF CITTIUM, in Cyprus, lived about 250 years before Christ. The external incidents of Zeno's life were in no wise remarkable; his importance and fame rest on his being the founder of the sect of the STOICS,—(named, because Zeno chose to teach under the Porch, or *Stoa*)—a sect of greater and wider influence than any other that sprung up during the latter days of Greece, for it took root

within the soil of Rome, and obtained sway over the Jurisprudence as well as the Morals of the Republic. The foundations only, of Stoicism, were laid by Zeno, who seems to have been indebted for his chief maxims to Antisthenes the Cynic: it was perfected as a philosophical scheme by the more vigorous genius of Chrysippus of Soli, who reached the year 210 B.C.—Stoicism is not a system of *Morals* alone; it had its *Logic* and *Theory of Nature* besides. Its doctrine of the Human Understanding, or regarding the origin and nature of knowledge, is surprisingly similar to *John Locke's*. Assuming *Sensation* as the source and foundation of whatever can be discerned in the mind, the Stoic claimed for Mind the power of acting on its sensations, comparing them, grouping them, and judging so concerning them. In this way, a *Judgment* is formed by a *synthesis* of *Sensations*,—what they termed a *comprehensive representation*, by a synthesis of individual Judgments; and finally, that ultimate and universal synthesis, which is *Science*. The critical student will not fail to observe that every trace of the profound philosophy of Plato had already disappeared.—Next, as to Stoic *Physiology*. This is a *Necessity*, a Fatalism pure and simple. They speak indeed of God. They speak of Providence. And of the beauty and perfection of the order of the World, in which each atom has its harmonious place; symmetry the most unchallengeable reigning through all, and the wisest economy also, seeing there is nothing useless—not a solitary molecule that can be called superfluous, neither one, unnecessary. To closer scrutiny, however, this God of the Portico, appears an existence devoid of personality and self-consciousness: the name is applied to an hypothetic germ or seed, from whose necessary and determinate developments, Nature and all the varieties of Being have sprung. There is no God distinct from the material Universe: there is but one substance, which, considered in its forms, is NATURE—in its essence, God. Assuredly also a powerful declension from the Theism of the greater Times!—Neither can we speak, in less qualified terms, of the vaunted *Morality* of Stoicism. With much semblance of nobleness, and undoubtedly containing wherewithal to nourish a noble nature, it is yet false through exaggeration, and that vicious exclusiveness which always characterizes the decay of Science. It is verily a maxim to be engraven on every soul—‘Be strong and free!’ But the question recurs, what is *strength*? Is it the power to regulate passion and desire, to enthrone Reason as the judge or umpire over the tendencies inseparable from our complex nature: or the ambitious, the unnatural, the vain effort to extirpate passion and desire, so that ceasing to be *Men* we may rival the Gods? No philosophy worthy the name of Ethical, ever failed to recognize it as Man’s primal duty, to curb the appetites, extinguish evil passions, and so govern the soul; but the Stoic’s conception of Order, is not government, it is extinction: just as the blind despot destroys the freedom he cannot rule, and names his solitude *Peace*! History never offers a more certain indication of decrepitude of Thought and defect of true Manliness, than the acceptance of exaggerations like these. Speaking scientifically, they involve an omission of many of the essential elements of the problem whose solution is aimed at: and under another view, they more than indicate the prevalence of practical insincerity:—no Human Being can get beyond the position of a MAN; and he who pretends to do so, universally sinks below it. It is a singularly instructive fact, that this ‘complete liberty’ of the Stoic, was often

held consistent with the worst excesses. Having triumphed, the disciple held that no crime could stain him: like multitudes of Mystics, he had achieved salvation; and neither worldliness, nor meanness, nor crime, could suffice to disturb his sanctimoniousness, or effect his Fall!—It is easy to see that out of such a doctrine, Men in themselves great, might extract much to augment their Fortitude. But if Stoicism aided in producing a SCIPIO, a THRASEAS, an EPICETUS, or MARCUS AURELIUS; it also evolved and justified that most disastrous record in the annals of Rome—the issue of the almost maniac ferocity of MARCUS BRUTUS. [J.P.N.]

ZENO, called *the Isaurian*, emperor of the East, was a chief of the Isaurian guard who obtained the favor of Leo I., and married his daughter, Ariadne. He exercised the imperial power, 464 to 491, when he found himself in the midst of dangers, from which he sought the escape of oblivion in debauchery. Four days after his suspicious death, Ariadne married Anastasius.

ZENO, APOSTOLO, called ‘the father of the Italian Opera,’ was born at Venice in 1669, and became famous by a periodical work entitled ‘The Giornale de Litterati,’ which he commenced in 1770. As a dramatic writer he is compared with Corneille, and his works form 11 volumes, published in 1744. Died 1750.

ZENO, C., a Venetian admiral, 1334–1418.

ZENO, NICOLO and ANTONIO, brothers of the preceding, are celebrated in the history of navigation, by their alleged discovery of America prior to the voyage of Columbus. It is considered probable that they reached Greenland. The former died in 1395, the latter 1405. CATERIGO, grandson of Antonio, went as ambassador to Persia, and wrote a narrative of his mission, 1472. NICOLO, of the same family, a man of letters, and member of the council of ten, 1515–1565.

ZENOBIA, SEPTIMIA, a princess of Arabian descent, who became queen of Palmyra in the desert, after the murder of her husband, Odenatus, in 267. The latter was killed by his nephew at a festival, and Zenobia, who acted with great energy, assumed the title of queen of the East. She was deprived of her dominions by the emperor Aurelian in 272, and died in a private retirement near Rome. The celebrated critic Longinus acted as her secretary, and was put to death by the Romans.

ZENOBIUS, a Greek sophist, 2d century.

ZENODORUS, a tyrant of Syria, d. B.C. 20.

ZENODORUS, a Greek sculptor, 1st century.

ZENTGRAVE, J. J., a German theolog., 1643–1707.

ZEPERNICK, C. F., a Ger. jurist, 1751–1801.

ZEPHIRINUS, a bishop of Rome, 197–217.

ZERBE, P. DE, an Ital. missionary, 1712–1716.

ZERBIS, G. DE, an Ital. anatomist, died 1505.

ZERMEGH, J., a Hungarian historian, 16th century.

ZERNITZ, C. F., a German poet, 1717–1744.

ZEROLA, T., an Italian canonist, 1548–1603.

ZESSEN, P. DE, a German poet, born 1619.

ZEUNE, J. C., a Ger. philologist, 1736–1788.

ZEUXIS, one of the most celebrated painters of antiquity, was born at one of the ancient towns of Heraclea, probably in Macedonia, about 460 B.C. Zeuxis was at the height of his reputation in the time of Archelaus, king of Macedon, 413–399 B.C.; he painted the palace of this king at Pella, for which he was paid 400 minæ, about £1,600 sterling. Much concerning Zeuxis has been preserved in ancient writers; nearly every notice reflecting upon him the

very highest praise, not only in the shape of popular anecdotes, but in the positive and circumstantial statements of art criticism: and some of the facts recorded concerning this painter, show how similar must have been the ways of art among the Greeks upwards of 2,000 years ago, to what they have been during their great epoch in Europe in modern times. The *naturalist* development of art as compared with its condition the generation before, in the time of Polygnotus, is clearly demonstrated in the various accounts of Zeuxis, both as to subject and its treatment, at the same time combined with the ideal or principle of selection; art was no longer merely representative, but thoroughly dramatic. Polygnotus, Zeuxis, and Apelles represent well the three great phases of Greek painting, the essential, the dramatic, and the refined, in which the technical qualities attained their utmost perfection, and like most clevernesses obscured or superseded more essential qualities. Amongst the most remarkable works of Zeuxis, and they were many, are mentioned particularly the celebrated 'Helen of Croton,' and a 'Family of Centaurs.' The former was painted from five beautiful virgins of the city, and was one of the most celebrated of all the Greek pictures, and it has for ages been the theme of poets of all countries. Zeuxis himself subscribed on the picture the three lines from Homer, which speak of Helen's beauty:—

'No wonder such celestial charms,  
For nine long years, have set the world in arms!  
What winning graces! what majestic mien!  
She moves a goddess, and she looks a Queen.'

Pope, *Il.* iii., 156-8.

Lucian says that Zeuxis seldom or never exerted his powers upon such vulgar or hackneyed subjects as gods, heroes, or battles. His characteristics have been described as a grand style of form, combined with a high degree of execution, and powerful effect of light and shade; for Apollodorus, the Athenian painter, who may be termed the Greek Rembrandt, complained that Zeuxis had robbed him of his art. To all these fine qualities we must add his highest, his dramatic power of composition; in expression Aristotle tells us that he was inferior to Polygnotus. There are several stories told about illusive pictures painted by Zeuxis and Parrhasius of Ephesus: the only value of these is to show that *illusion* was one of the qualities of Greek painting, which will acquire it a higher consideration in some minds than any other quality;—Wornum, *Epochs of Painting Characterized*, &c., and *Penny Cyclopædia*, Art. Zeuxis.) [R.N.W.]

ZEVECOT, J., a Flemish poet, 1604-1646.

ZHINGA, BANDI, a queen of Angola, who maintained a struggle for 28 years with the Portuguese, and after performing prodigies of valor was despoiled of the larger part of her dominions. She then submitted to be baptized as a means of preserving the remainder, 1581-1663.

ZICHEN, E. DE, a Flemish contro., 1482-1538.

ZIEGELBAUER, CARACHORD, a German Benedictine and historian of his order, 1696-1750.

ZIEGENBALG, BARTHOLOMEW, a celebrated Protestant missionary, who was sent to India in 1706, visited the territories of the Great Mogul, and returned to Copenhagen in 1815. After completing a dictionary of the Malabar language he visited England, was handsomely received by George I., and embarked for India, under the direct countenance of the East India Company, in 1816. While he was actively engaged in his pious labors, he was attacked with a fatal disease, and died in 1819.

ZIEGLER, C. J. A., a German physician, 1735-1795.

ZIEGLER, G., a German jurist, 1621-1690.

ZIEGLER, J., a Latin dramatic writer and biographer of Bavaria, 1520-1564.

ZIEGLER, J., a Bavarian theologian, mathematician, and geographical writer, 1480-1549.

ZIEGLER, W. C. L., a Ger. theologian, 1763-1809.

ZIEGLER, ST. KLIPPHAUSION H. ANSELME DE, a poet of Saxony, 1653-1690.

ZILIOLI, A., a Venetian historian, 16th century.

ZIMARA, M. A., an Ital. physician, 1460-1532.

ZIMISCES, emperor of the East. See JOHN.

ZIMMERMANN, EBERHARD AUGUSTIUS WILLIAM VON, a German naturalist, was born at Weltzen, in 1743; studied at Göttingen and Leyden; and obtained the professorship of natural philosophy at the Caroline College at Brunswick. His first work was a treatise on the 'Analysis of Curves;' and in 1777 he published 'Specimen Zoologiæ,' the outline of his 'Geographical History of Man and Quadrupeds,' 3 vols. He visited England three times, and printed here, in 1787, his 'Political Survey of the Present State of Europe;' and he subsequently employed his pen in opposing the revolutionary statesmen of France; for which he was ennobled by the emperor Leopold II. After this he published several geographical works; one of the best of which was a 'General Survey of France and of the United States of America,' 2 vols. Died 1815.

ZIMMERMANN, HENRY, author of an account of the third voyage of Captain Cook, with whom he sailed in the *Discovery*, 1776.

ZIMMERMANN, JOHANN GEORG VON, was one of the most eminent of continental physicians in the eighteenth century, both as a practitioner and as a professional writer. His miscellaneous writings also were numerous; and one of these, his striking but not very philosophical essay 'On Solitude,' is now, indeed, quite forgotten in England, but was once very popular among us. It was first printed, as a sketch, in 1756, and afterwards in its complete shape in 1785.—Zimmermann was born in 1728, at Brugg, in the canton of Bern. After having studied at Göttingen, he practised medicine successively at Bern and in his native town. His tendency to hypochondria showed itself even thus early, but did not disqualify him from either active practice or from zealous and miscellaneous studies. His professional celebrity gained him, in 1768, the appointment of royal physician at Hanover; after the second appearance of his work 'On Solitude,' he was invited to St. Petersburg; and the year after he attended Frederick of Prussia in his last illness. His writings after this were chiefly gossiping collections, and expressions of the horror with which he regarded the revolutionary principles that were becoming prevalent. His melancholy continued to increase; and he was completely deranged for some time before his death, which took place in 1795. [W.S.]

ZIMMERMANN, JOHN JAMES, a Swiss theologian, professor at Zurich, 1685-1756.

ZIMMERMANN, JOHN JAMES, an eloquent German preacher, generally regarded as a disciple of Boehmen and Brouquelle, whose doctrines he rendered highly popular; born in the duchy of Wurtemberg, 1644, died at Rotterdam, 1693. Zimmermann made many proselytes in Germany and the United Provinces, and at the moment of his death was about to depart for America to escape the persecution to which he had been subjected. For some years he was professor of mathematics at Heidel-

berg. The most notorious of his works is entitled a 'Revelation of Antichrist.'

ZIMMERMANN, JOSEPH, a Swiss officer, poet, and military writer, 17th century.

ZIMMERMANN, MATTHIAS, a learned theologian of Hungary, 1625-1689.

ZIMMERMANN, WILLIAM, a German pastor and controversial writer, 16th century.

ZIMOROWICZ, SIMON, a Russian poet, about 1604-1629. A brother of his, named BARTHOLOMEW, was a biographical writer.

ZINCKE, C. F., a German painter, 1684-1767.

ZINGARELLI, NICOLÒ, an Italian musician known at the court of Napoleon in the earlier years of the empire, and afterwards chapel-master at the Vatican, born at Naples 1752, died 1837. He is the author of several operas.

ZINKE, G. H., a Germ. economist, 1692-1769.

ZINKGREF, J. G., a German poet, 1591-1635.

ZINN, J. G., a German anatomist, 1727-1759.

ZINZENDORF, NICHOLAS LOUIS, Count Von, founder of the Herrnhuters, or Moravian Brethren, was born at Dresden in 1700. According to his own account (in his 'Natural Reflections on Various Subjects'), he aspired to form a society of believers from his boyhood. On coming of age in 1721, he settled, with this object in view, on his estate at Berthelsdorf, in Upper Lusatia, and was there joined by several proselytes from Bohemia. By 1732 the numbers who had flocked around him amounted to six hundred, and all these were subject to a species of ecclesiastical discipline, or monastic despotism, which brought them in spirit and body, or was intended so to do, under the most absolute control of their leader. From an adjacent hill, called the *Huth-berg*, was derived the name of the colony *Huth des Herrn*, contracted to *Herrnhutt*, the name of the sect;—the appellation of Moravian Brethren was assumed for his party by Count Zinzendorf, for the sake of connection with the separatists of Bohemia and Moravia, partly derived from Valdo, the forerunner of Luther: some of these, indeed, were among his colonists. Zinzendorf assumed various titles as the chief of the Herrnhuters, all of which really pointed to a *pontificate* as his function. From 1733 his missionaries began to spread, not only over parts of Europe, but in Greenland and North America—even Africa and China were not forgotten.—To him, in fact, Wesley was directly indebted for both his religious organization and his missionary plans, which became so eminently successful; that indefatigable laborer having passed some time with Count Zinzendorf at Herrnhutt. The interference of the government with the Count's projects, can hardly be regarded as a measure of persecution, as secret doctrines were undoubtedly held by him, and thus motives given to his followers, and objects sought, of which, whether good or evil, the established authorities could take no cognizance. The history of the sect is curious and interesting: next to their organization in classes, the use of singing, which furnished the Wesleys with a valuable hint, is one of its most remarkable characteristics; under this head some singular details might be given. Something might be said also on the connection of a certain marriage rite with the theory of regeneration, the efficacy of which was probably tried by the Herrnhuters in common with the Quakers. Count Zinzendorf died amongst his people on the 9th of June, 1760. [E.R.]

ZINZENDORF, PHILIP LOUIS, Count Von, an Austrian statesman, by whom the wars with Turkey and France were decided, chancellor in the reign of

Joseph I., 1671-1742. His son, of the same names, a cardinal, 1699-1747.

ZINZERLING, J., in Latin *Jodicus Sincerus*, a philologist of Thuringia, 1590-1618.

ZIRARDINI, ANTONIO, a learned Italian juriconsult and archæologist, 1725-1784.

[John Ziska.]

ZISKA. The real name of this renowned leader in the early wars of religion in Germany was JOHN TROCZNOW. He acquired the name of Ziska (which means one-eyed,) from the loss of an eye in battle. He was born about 1380. He was of one of the noblest families in Bohemia, and was brought up in the court and camp of the emperor. Like the greater number of his Bohemian fellow-countrymen, he embraced the tenets of John Huss; and when that reformer was cruelly and perfidiously put to death by the council of Constance, the Bohemians flew to arms to revenge their leader's martyrdom, and to protect themselves from the persecution with which they were menaced by the bigotry and tyranny of the emperor Sigismund: They elected John Ziska their general; and in a few months he raised and disciplined a formidable army, and organized a war of independence throughout Bohemia. The emperor invaded Bohemia, but Ziska attacked and utterly defeated him, 11th July, 1420. A negotiation and temporary pacification followed; but the war soon broke out again with redoubled violence, each side being exasperated against the other by religious fanaticism, and by the thirst for retaliation for deeds of atrocious cruelty. Ziska was everywhere victorious. He invaded Austria and Hungary, and lost his remaining eye at the siege of Raab. Though now entirely blind he continued to command the Bohemian armies, and gained a victory over Sigismund at Arssig, which placed the Austrian dominions at his mercy. Ziska's ferocity was equal to his military skill; and his followers spread the most fearful and indiscriminating ravages wherever they marched. The emperor now earnestly sought terms of peace, and a treaty, most humiliating to Austrian pride, was concluded by Ziska's influence over the Bohemians. Ziska was on his way to meet the emperor when he died of the plague, 11th October, 1425. There is a legend that by his dying orders his skin was, after his death, made into a drum, and used by the Bohemians in their subsequent wars with the emperor. [E.S.C.]

ZIZIANOFF, PAUL DEMETRIEVITCH, a Georgian

prince in the service of Russia, assassinated at the instance of Khan Ibrahim, 1805.

ZOBOLI, A., an Italian astronomer, 17th c.

ZOCCOLI, CARLO, an architect, engineer, and jurisconsult of Naples, 1718-1771.

ZOE, a mistress of Leo VI., emperor of Constantinople, who was married by him after she had defeated a conspiracy, and died in less than two years after her elevation to the throne, 893. She is said to have poisoned her first husband. A second ZOE was successively the mistress and wife of the same emperor: she condescended to the former character, in order to test the probability of her supplying Leo with a successor, and was crowned three days after the baptism of her son, Constantine VII., in 905. The latter succeeded to the throne in 911, and Zoe exercised the sovereign authority some time; she was at length exiled, and died in obscurity, 919.

ZOE, empress of the East, was the daughter of Constantine IX., and became the wife of Romanus III. in 1028, when she was in the forty-eighth year of her age. She was a debauched woman, and became the murderess of her husband, in order to place her lover on the throne, who reigned under the title of Michel IV. The latter dying, was succeeded by his nephew, Michel V., who was deposed by the people, and Zoe, and her sister, Theodora, proclaimed joint sovereigns. She displayed great ability and firmness in the government; and in 1042 married in third nuptials Constantine Monomachus. She continued to reign till her death at the age of seventy-four, in 1052.

ZOEGA, GEORGE, a Danish archæologist, celebrated for his labors in Egyptian philology and antiquities, 1755-1809.

ZOES, H., a French jurisconsult, 1571-1627.

ZOHEIR, an Arabian poet of the period of Mahomet. The work of his, which has come down to the present time, celebrates some of the Arabian princes, and was published at Leipzig in 1792, with a Latin translation and Notes.

ZOILUS, a Thracian rhetorician, who lived in the 3d century before the Christian era, and whose hypercriticisms on the works of Homer, Aristotle, Plato, and others, have given him a very unenviable distinction. So severe and indiscriminate, indeed, were his censures, that his name has become a by-word, designative of illiberal and captious pretenders to criticism.

ZOLA, J., a Venetian theologian, 1739-1806

ZOLKIEWSKI, STANISLAUS, hetman of the Polish armies under Sigismund III., was engaged in many important battles against the Russians, and died gloriously fighting against the Turks, 1547-1620.

ZOLL, H., a German jurisconsult, 1643-1725.

ZOLLIKOFER, GEORGE JOACHIM, a Swiss pastor, famous for his amiable character and eloquence as a preacher, author of 'Devotional Exercises' and Sermons, which have been translated into English, 1730-1788.

ZONARAS, JOHN, a Greek historian and ascetic writer of the 12th century.

ZONBOV, the last favorite of Catharine II. of Russia. He was made commander of the artillery, and realized an immense fortune from his exactions. Excited by Paul I., he took part in his assassination; died 1817.

ZONCA, VICTOR, an Italian architect, author of several curious mechanical inventions, of which he has written an account, published 1607.

ZOPELLI, J., a Venetian poet, 1639-1718.

ZOPF, J. H., a German historian, 1691-1776.

ZOPPIO, GIROLAMO, an Italian dramatist, died

1591. His son, MELCHIOR, a dramatic writer and philosopher, 1544-1634.

ZOPPO, P., an Italian painter, died 1515.

ZOPPO DI LUGANO, the commonly received name of J. B. DISCEPOLI, an Italian painter of the Milanese school, 1590-1660.

ZOPYRUS, one of the courtiers of Darius, the son of Hystaspes. It is asserted that he cut off his nose and ears at the siege of Babylon, and went over to the Babylonians, pretending that the Persians had thus inhumanly treated him. Thinking he would be stimulated by revenge, they gave him the command of their army, which he treacherously betrayed to Darius.

ZORG, HENRY, whose proper name was KOKES, a Dutch painter of interiors, 1621-1682.

ZORN, J., a German botanist, 1739-1799.

ZORN, P., a German philologist, 1682-1746.

ZOROASTER, or ZERDUSHT, the founder, or rather, as we believe, the *Reformer* of the Religion of the Parsees; born at Urmia, in Azerbaijan, about 589 B.C., in the reign of Darius Hystaspes. We shall not speak here of the fables concerning Zoroaster, nor seek to follow him during the twenty years he is reported to have spent in meditation among the awful solitudes of inaccessible Elbrooz. It is of chief moment to recognize him as the earliest systematic expounder of that solution of the Mystery of Evil, which may be termed *Spiritual Dualism*. He imagined two mighty spirits in contest—ORMUZD and AHRIMAN—GOD and the DEVIL; and in this, as we have said, he most probably reproduces an older mythology of the Parsee race. In English, we have the doctrine of Zoroaster in the immortal verse of Milton; nor indeed did the Hebrews ever have any notion of Dualism, until after their intermixture—during times of captivity—with the farther East. Ormuzd was conceived by Zoroaster, symbolized by Light. The Sun a visible type of Him; and Fire the expression of his energy. Fire-worship spread, extensively through India and Higher Asia; but, as usual, it became a superstition. Schism followed on the death of Zoroaster, who, any more than other greatest Men, had no true successor. [J.P.N.]

ZORZI, ALESSANDRO, in Latin *Georgius*, a Venetian theologian, 1747-1779.

ZOSIMUS, a Greek historian of the 5th century, contemporary with Honorius and Theodosius the younger. His work is a history of the Roman emperors, reaching to the year 470, and is favorable to Christianity. It was translated into English under the title of 'The New History of Count Zosimus,' 1684.

ZOSIMUS, a pope of Rome, 417-418.

ZOUCH, or ZOUCHE, RICHARD, author of several works in Latin on civil, military, and maritime jurisprudence, was born at Anstey, in Wiltshire, about 1590, and was admitted a fellow at Oxford in 1609. He was afterwards a member of parliament, and admiralty judge. Died 1660.

ZOUCH, THOMAS, born at Sandal, near Wakefield, in Yorkshire, in 1737, became rector of Wycliffe in that county, and prebendary of Durham. In 1808 he declined the bishopric of Carlisle on account of his advanced age, and died in 1816. He wrote 'The Crucifixion,' a Seaton prize poem, 'An Inquiry into the Prophetic Character of the Romans,' 'Illustrations of the Prophecies,' a 'Memoir of Sir Philip Sidney,' and other works.

ZRINGI, N., a Hungarian poet, 17th century.

ZSCHOKKE, HEINRICH, born at Magdeburg in 1771, inherited in childhood a moderate patrimony, which enabled him during his youth and early man-

hood to gratify his desire of adventure and of various knowledge. After having been a family tutor, the literary man of a troop of players, and a student in the university of Frankfort-on-the-Oder, he was licensed as a candidate of theology, or preacher, in the Reformed or Calvinistic church, and was within a little of becoming pastor of a congregation in his native town. He next returned to Frankfort, and lectured there on various branches of philosophy and theology. Failing, however, to obtain a professorship, he settled, in 1796, at Reichenau in the Grisons, where he established very successfully a boarding-school for boys. The political disturbances, spreading into Switzerland, drove him within two years to seek refuge in Bern. His administrative ability, with his political opinions, recommended him to employment under the central government of the Helvetic Republic. In 1802 he settled near Aragon, the chief town of the canton of Aragon; and there he resided for the remainder of his long life. Attaching himself in politics to that which may be regarded as having been the moderately democratic party, he held in succession several public offices, and distinguished himself by his activity in promoting social reforms, especially such as bore on the education of the poor. He died in the summer of 1848.—Zschokke's published writings filled, when collected, more than forty volumes. Their kinds were various; and he was far from being successful in some of these, especially his attempts at poetical and dramatic composition. His most ambitious works were his 'History of the Bavarian Nation and its Princes,' and his 'History of Switzerland for the Swiss People.' The latter, first published in 1802, became exceedingly popular, and is authoritative and excellent, though held not to be impartial. In his interesting 'Autobiography,' written in old age, he declared himself the author of the 'Hours of Devotion' (Stunden der Andacht), which was originally a Sunday periodical, designed for ordinary families. It became, on being collected, a great favorite throughout protestant Germany; where its shortcoming in orthodoxy was held no serious drawback on its fervor of sentiment, its advocacy of unlimited tolerance, and its zealous inculcation of practical duty.—The best known, however, of Zschokke's works are his Novels, which are very numerous, while some are of considerable length. The least successful of them are those which take the form of historical romances: he wanted the strength of imagination and the depth of feeling requisite for recreating the past. The best are those in which he paints reality and familiar life; and in these there is a very agreeable mixture of broad humor with a light and cheerful sentimentality; while the grotesqueness of characterization is supported by much originality in the invention of comic incidents. A considerable number of these comic tales, as well as several of the serious ones, are avowedly didactic. In some of them the author aims at teaching religious lessons, much like those of the 'Stunden;' as in the dissertative story of 'Alamontade,' and the serio-comic novel of 'Jonathan Frocko.' In others he represents, much in the manner of Mrs. Hamilton or Miss Edgeworth, attempts at domestic and social reforms among the poor: such are 'The Goldmakers' Village,' 'The Millionaire,' and 'The Hole at Elbows.' Several of the best are lively and striking embodiments of the weak points in social institutions, especially as these appear under absolute governments. Instances of the kind are these: the tale, 'Who Governs?' in which a European war is traced to the freak of a French chambermaid;

'Small Causes,' in which the history of two individuals is followed through a succession of trifling accidents; and 'The Adventures of a New Year's Night,' in which a prince and a policeman exchange places, and throw a petty court into confusion before morning. A good many of Zschokke's smaller novels have appeared in English periodicals; and one or two of them, as well as his 'Autobiography,' have been translated separately.

ZUALLART, J., a German traveller, and author of descriptive works, 16th century.

ZUAZO, H., a Spanish juriconsult, died 1527.

ZUBER, M., a Latin and Greek poet, 1570–1623.

ZUBLY, JOHN JOACHIM, a Swiss presbyterian divine, settled at Savannah, Georgia. He was a member of the Provincial Congress of 1775, but opposed the declaration of independence. Died 1781. He was the author of various published sermons on religious and political affairs.

ZUCCARDI, U., an Italian jurist, 1480–1541.

ZUCCARELLI, or ZUCCTIERELLI, FRANCESCO, an Italian painter and engraver, taught by Morandi, distinguished for his landscapes, in which he introduced small figures, 1712–1788.

ZUCCHERO, TADDEO, an eminent Italian painter born at Urbino, in 1529, who attained to great proficiency in the art, and died in his 27th year.—His younger brother, FEDERICO, born in 1543, resided several years in England, where he grew into high repute, and painted the portrait of queen Elizabeth. Previous to his coming to this country he had given great offence to pope Gregory XIII. by caricaturing several distinguished persons connected with the papal court; but his friends in England succeeded in restoring him to favor at Rome; and, on his return he established an academy of painting in that city, which he continued to superintend till his death in 1609.

ZUCCHERELLI. See ZUCCARELLI.

ZUCCHI, B., an Italian writer, 1560–1631.

ZUCCHI, GIOVANNI, an Italian painter, taught by Vassari, died 1590. FRANCESCO, his brother, famous for his mosaic work, died 1620.

ZUCCHI, M. A., an improvisator, died 1764.

ZUCCHI, N., an Italian Jesuit, 1586–1670.

ZUCCOLO, L., an Italian moralist, 16th cent.

ZUCCOLO, L., an Italian jurist, 1599–1688.

ZUCCONI, J., a Venetian poet, 1721–1754.

ZUCKERT, J. F., a Ger. mineralogist, 1737–78.

ZUICHEM D'AYTA, VIGILIUS, a Flemish juriconsult, and president of the council, 1507–77.

ZUINGLIUS. See ZWINGLI.

ZUMALACARREGUY, THOMAS, general in chief of the Spanish army, was born in 1789, and became a devoted partisan of Don Carlos, on the death of Ferdinand VII., which took place in 1822. He was the most redoubted opponent of the armies of Christina and Donna Maria, and possessed qualities which gained him the respect even of his enemies. Zumalacarreguy died of wounds received at the siege of Bilbao, 25th June, 1835.

ZUMBO, GAETANO JULIO, a famous Sicilian artist; he learnt, without the assistance of a teacher, the principles of sculpture, and, after having profoundly studied anatomy, he gained great reputation by his figures in a colored wax, the preparation of which he kept secret; 1656–1701.

ZUMSTEEG, J. R., a Germ. comp., 1760–1802.

ZUNIGA, DON DIEGO ORTIS DE, historian of the civil and ecclesiastical affairs of Seville, 17th ct.

ZURBARAN, F., a Spanish painter, 1598–1662

ZURITA, J., a Spanish historian, 1512–1581.

ZURLA, P., an Italian antiquarian. 1769–1834.

**ZURLAUBEN, LATOUR CHATILLON DE**, an ancient Swiss family, which produced many distinguished warriors, from the 12th to the 16th centuries. The best known is **BEAT FIDELE ANTOINE JEAN DOMINIQUE**, Baron Latour Chatillon de Zurlauben, who became lieutenant-general, and devoted his latter years to literature. His works are a 'Military History of the Swiss in the French Service,' a 'History of the Swiss and their Allies,' a 'Picturesque Tour in Switzerland,' and various memoirs; born at Zug 1720, died 1795.

**ZURLO, JOSEPH**, Count, a Neapolitan statesman, born 1759, and named finance minister 1798. In this capacity he ventured on reforms which led to his dismissal, but he became minister again under Murat in 1809, and in the fresh circumstances of 1820. On the latter occasion the influence of the Carbonari deprived him of power. Died 1828.

**ZUSTRIS, L.**, a Dutch painter, died 1600.

**UZZERI, BERNARDO**, an Italian Jesuit and missionary in Croatia, 1683-1762. **J. LUC**, of the same family, a celebrated numismatist, 1716-1746.

**ZWANZIGER, J. C.**, a Hungarian philosopher and opponent of Kant, 1732-1808.

**ZWEERS, JEROME**, a Dutch poet, 1627-1696. His grandson, **CORNELIUS**, a dramatist, died 1774.

**ZWELFER, J.**, a German chemist, 1618-1668.

**ZWICKER, DANIEL**, a theologian of Dantzic, chief of the Tolerants, 1613-1678.

**ZWINGER, THEODORE**, a German physician and philosophical writer, flourished at Basle, 1533-1588. His son, **JAMES**, a physician and Hellenist, 1599-1610. **THEODORE**, son of the latter, a theologian and superintendent of the churches at Bale, 1567-1654. **JOHN**, son of Theodore, a theologian and bibliographer, 1634-1696. **THEODORE**, son of John, a physician, anatomist, and botanist, 1658-1724. **JOHN RODOLPH**, their nephew, a physician and founder of a scientific society, 1692-1777. **FREDERIC**, his brother, a physician and naturalist, 1707-1776.

**ZWINGLI, or ZUINGLIUS, ULRICK**, the great Swiss reformer, was born at Wildhausen, in the canton of St. Gall, in 1484. His early education was carried on at Basel, and afterwards at Berne. The Dominican monks, in this place, attracted by his talents and rising reputation, sought to entrap him into their order, but his father, in order to remove him from the scene of temptation, sent him off to Vienna. In 1502, and being eighteen years of age, the young scholar returned home, and soon repaired again to Basel and took his degree as master of arts. Under the teaching of Wittenbach, who had been acting along with the famous Reuchlin, his mind received the first germs of free inquiry—those seminal truths, which, in his quick and genial mind, soon ripened into harvest. He preached his first sermon in 1506, and was chosen pastor of Glaris. Here he remained ten years, and during that period he mingled in the strife of arms against the French. The young pastor, at the same time, devoted himself to the study of Greek and Hebrew, gradually made the Scriptures his sole and supreme rule of authority, and publicly expounded the Gospels and the Epistles. In 1516 he had been chosen preacher to the Abbey of Einsidlen, a famed spot of popish pilgrimage and superstition, and the year following he removed to a similar position in the cathedral of Zürich. The effect of the honest preaching of the gospel soon became apparent in the city and country, and his general character and opinions produced a deep and universal sensation. While this state of transition was so marked, the crisis was hastened,

in 1518, by the arrival of Samson, the seller of indulgences. The traffic in these 'Roman wares' roused the indignation of Zwingli and led to a keen exposure and a successful resistance. Luther's writings were, at the same time, largely circulated at the recommendation of the reformer. The plague broke out, and, during its continuance, though weak himself from exhaustion, he assiduously tended the sick and dying. His zealous labors grew in number and results, the simplicity of the gospel was more distinctly apprehended by him; but the friends of the popedom were enraged, and Zwingli was tried, in January, 1523, on a charge of heresy. Rome gained nothing by the trial. Zwingli presented 67 propositions, and defended them from Scripture. The reformer gathered courage with growing difficulties, and, in 1524, the council of Zürich remodelled the public worship according to the views and wishes of Zwingli. Pictures, statues, and relics were removed from the churches, and mass was abolished. Opposition to the reformed doctrines was meanwhile gathering in the other cantons. The question arose, whether each canton was free to choose its own form of religion, or whether the confederation should interfere; Zürich contended for its individual liberty and independence, but was opposed by the Waldstettes, or the primitive democratic cantons of Schwytz, Unterwald, Urzug, and Lucerne. The triumph of the reformation at Berne, and other places, threw those forest cantons into wilder commotion, and, in consonance with their views of their federal polity, they took up arms for Rome. Zürich, encouraged by Zwingli, called out its troops and put itself into a posture of defence. Efforts were made to maintain peace, but it was of no long duration, and after various diplomatic negotiations, hostilities finally commenced. Zürich had also lost somewhat of its earlier evangelical purity, while the neighboring states were conspiring for its ruin. In the awful emergency, when the public mind was alarmed by a series of omens and prodigies, the reformer maintained tranquillity. The war began. Zürich was cowardly, dilatory, and far from being prepared, but the horn of the enemy echoed among their hills, and the devoted Zwingli mounted his caparisoned horse, took farewell of his wife and children, and went forth as a patriot and warrior to share in the common danger. The Zürichers marched to meet the Waldstettes, but were defeated at Cappel with great slaughter, 11th October, 1531. Zwingli was found, after the battle, lying on his back and his eyes upturned to heaven, with his helmet on his head, and his battle-axe in his hand. He had been struck near the commencement of the engagement, and then as he fell and reeled, he was several times pierced with a lance. He was living when discovered in the evening; but the infuriated fanatics soon dispatched him. Next day his dead body was barbarously quartered and burnt. Thus perished this hero-martyr. The contests of Zwingli and Luther on the nature of the Sacrament of the Lord's Supper are well known, but the Swiss proved himself freer from early prejudice and traditional teaching than his great German antagonist. It is needless to discuss the relative merits of the two illustrious reformers, their position and sphere of influence being so very different. The fame of Luther has overtopped that of Zwingli, yet the Swiss divine had perhaps more caution and sagacity, and certainly more learning and refinement than the Saxon. He was also earlier alive to the errors of Rome, and though he died a young man, yet in his narrower circle of action he carried out the reformation farther than Luther did.

The works of Zwingli were published in four folios, Tiguri, 1581; and in eight octavos, edited by Schuler and Schultess, Zurich, 1828-1842.

[J.E.]

ZYLL, OTHO VAN, in Latin *Zyllius*, a Dutch poet and professor of rhetoric, 1588-1656.

ZYPE, FRANCIS VAN DEN, in Latin *Zypæus*, pro-

fessor of anatomy at the university of Louvain, author of a work published 1683.

ZYRLIN, or ZIERLIN, G., a Swiss pastor and Latin poet, 1592-1661. An explication of the prophet Abdias, written in German, is ascribed to him.

ZYTH, A. VAN, a Dutch theologian, 17th cent.

THE END

# A LIST OF NEW WORKS IN GENERAL LITERATURE,

Published by D. APPLETON & CO., 346 & 348 Broadway, New York.

Complete Catalogues, containing full descriptions, to be had on application to the Publishers

## Agriculture and Rural Affairs.

Boussingault's Rural Economy, . . .	1 25
The Poultry Book, illustrated, . . .	5 00
Waring's Elements of Agriculture, . .	75

## Arts, Manufactures, and Architecture.

Appleton's Dictionary of Mechanics, 2 vols. . . . .	12 00
Appleton's Mechanics' Magazine, 3 vols. each, . . . . .	3 50
Allen's Philosophy of Mechanics, . . .	3 50
Arnot's Gothic Architecture, . . . .	4 00
Bassnett's Theory of Storms, . . . .	1 00
Bourne on the Steam Engine, . . . .	0 75
